

# HERITAGE

U.S. COIN AUCTION

JANUARY 7-9 & 11-12, 2015 | FUN | ORLANDO

## Lot 6991

[illegible]

# U.S. Coins

Featuring: The Rawlin "Mac" McNelly Collection • The Free Tilly Collection • The A. James Evans Collection, Part II  
The Empire Collection • The Ally Collection • The Millford Collection, Part II • The Liberty USA Collection  
The Sweet Bloomfield Collection • The College Collection

January 7-9, 2015 | Orlando

## Signature® Floor Sessions 1-7

(Floor, Telephone, HERITAGE Live!®, Internet, Fax, and Mail)

Orange County Convention Center  
West Concourse • Rooms 221 A, B  
9800 International Drive • Orlando, FL 32819

### Session 1

Wednesday, January 7 • 12:00 PM ET • Lots 3001-3930

### Session 2 - PLATINUM NIGHT (see separate catalog)

Wednesday, January 7 • 6:00 PM ET • Lots 4001-4512

### Session 3

Thursday, January 8 • 12:00 PM ET • Lots 4513-5427

### Session 4 - PARTRICK COLLECTION (see separate catalog)

Thursday, January 8 • 6:00 PM ET • Lots 5501-5855

### Session 5

Friday, January 9 • 11:00 AM ET • Lots 5856-6684

### Session 6

Friday, January 9 • 4:30 PM ET • Lots 6685-6972

### Session 7

Friday, January 9 • 7:00 PM ET • Lots 6973-7897

## Signature® Internet Sessions 8-9

(HERITAGE Live!®, Internet, Fax, & Mail only Session)

### Session 8 (see separate catalog)

Sunday, January 11 • 1:00 PM CT • Lots 9001-10672

### Session 9 (see separate catalog)

Monday, January 12 • 12:00 PM CT • Lots 10673-12644

## LOT SETTLEMENT AND PICK-UP

Thursday, January 8 • 10:00 AM – 1:00 PM ET

Friday, January 9 • 10:00 AM – 1:00 PM ET

Saturday, January 10 • 9:00 AM – 12:00 PM ET

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

**This auction is subject to a 17.5% Buyer's Premium.**

Dear Bidder:

The FUN show always gets the year off to a rousing start, and once again Heritage Auctions is proud to be the Official Auctioneer of the bellwether Florida United Numismatists event.

This year, in addition to our regular action-filled Platinum Night, Signature, and Signature Internet sessions, we are extremely pleased to present the *Donald Groves Partrick Collection of Extraordinary United States Colonials, Part I*. Scheduled for the day following Platinum Night, we believe this collection will be remembered as the finest, most comprehensive set of colonial American coins ever assembled. Whatever your numismatic interests might be—whether you collect, sell, or simply admire colonial U.S. coinage—do not miss this landmark sale. It will be presented as Session 4 on January 8 at 6 PM ET.

More than 380 individual consignors contributed to nine Heritage floor and Internet sessions, including several Featured Collections that enhance the scope and quality of this year's FUN sale:

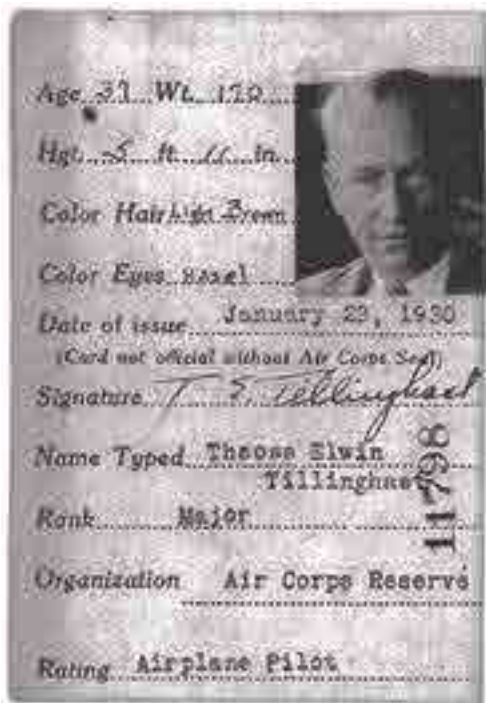

## The Rawlin "Mac" McInelly Collection

We are extremely pleased to have The "Mac" McInelly Collection in the FUN sale. Mac was the very embodiment of a life-long collector and numismatist. Starting as a youngster at age eight or nine, he would follow his father, Mac Sr., to the local coin shop to fill the empty spots in his Lincoln penny boards and Buffalo nickel set. He started a coin business while still a teenager and ran it out of his father's bowling alley in Shelton, WA (about 1956). All the while, Mac was collecting "everything" as

he grew into his adult years, assembling modern proof sets from 1936 on and completing a set of Morgan dollars (his wonderful , Gem 1895 Cameo proof dollar is lot 4208 in the Platinum Night sale). In later years, his interest was focused on early dollars. He loved his 1801 XF dollar, the favorite of many dates and varieties that he cherished. Active in local coin clubs and an ANA member, Mac had a well-known attraction to \$2.00 bills and always had some on hand. Few gifts or tips were given that didn't include a \$2.00 bill. Rawlin "Mac" McInelly passed away in September, 2014. He was a loving father, brother, friend, and grandfather and will live forever in the hearts of his family and friends. Heritage President Greg Rohan adds this personal remembrance:

"As a teenager I grew up in the small town 90 miles south of Seattle, Shelton, Washington. Mac's parents owned the bowling alley in town that my friends and I went to every week and was the epicenter of adolescent social life, and which was where at 14 I held my first, last, and only job not related to numismatics, unless you can count looking for 40% clad halves in the till (I found quite a few, it being 1976). Mac's parents were pillars of the small town business community, and through them I met their son, a friendship I would hold near and dear for nearly 40 years. Along the way, with his increasing business success, Mac became a serious coin collector, which thrilled me to no end. He visited me and Heritage when his business brought him to Dallas for an annual convention, and we talked coins, and Shelton, and all about mutual friends, and planned the next coin show that we both would meet at. Mac was a fine person, and I miss him dearly."

## The Free Tilly Collection

Our consignor's interest in rare coins was inspired by his grandfather, who was shot down over Germany in World War I and was imprisoned at a POW camp. To his amazement, two pilots he feared were lost months earlier from his squadron were at the same camp, greeting him with the call, "Hey, Tilly!" Together, they forged papers and soon escaped to freedom.

High-end examples characterize many additional selections from The Free Tilly Collection, with an amazing run of Barber and Walking Liberty half dollar proofs, stunning Morgan dollar proofs, Gem or finer commemoratives, and notable Buffalo nickels in proof and business strike formats. U.S. gold is represented by conditionally rare gold dollars, eagles, and double eagles—many with impressive pedigrees and unusually high states of preservation. An eye for quality is clearly evident in every coin from this outstanding collection, which is evident in virtually all the floor sessions throughout the sale, as well as in the Platinum Night coins, where Select gold rarities, a fabulous 1898 proof Barber half, and two Superb proof Morgan dollars are cataloged. For our Internet Session bidders, we call attention to two coins in particular: lot 9521, a beautiful 1883 No Cents Liberty nickel in MS67 ★ NGC, and lot 11582, a 1911-D Indian Eagle that is particularly nice for the grade.

## The A. James Evans Collection, Part II

We previously sold a wonderful assortment of patterns from Mr. Evans in 2004, and we are privileged to handle another group of exceptional patterns in this sale, as well as other fine consignments of commemorative gold, silver, and U.S. type coins. Our consignor took a somewhat circuitous route to his pattern specialty, which we noted in our previous sale. As a young man, he started collecting old coins out of circulation, when it was still possible to find Indian cents, Liberty nickels, and occasional Barbers in bank rolls. Liberty nickels were especially enticing, and at one of the first coin shows Mr. Evans attended, he spotted a Liberty nickel pattern in the dealer's display. It was, as he described it, "an epiphany." Mr. Evans from that point on pursued an abiding interest in patterns. Obviously, the classic commemorative series was also appealing, as many beautiful commemoratives from Mr. Evans appear in our Platinum Night presentation alongside several important patterns, with several more examples in Sessions 5 and 6 of our daytime floor sessions. The excellent type coins from this consignment populate the remaining floor sessions, as well as several appearances in the Internet auctions.

## The Empire Collection

Gold commemoratives, silver commemoratives, and selected U.S. type are presented in a remarkable group of Platinum Night and Session 5 coins from The Empire Collection. Each coin is either the finest known or among the finest-known examples of its date, without exception—extraordinary, considering the series and the issues represented. Of course, numeric grade is one thing, and eye appeal is another. Every coin in this collection is equally remarkable in that regard. Seldom have we offered such a dramatic group of high-grade Superb Gems. A group of Platinum Night Territorial gold is included in the consignment, profound in its own way, led by the former Eliasberg and Riverboat Collection 1852/1 Humbert double eagle MS64 NGC, the *Guide Book* plate coin. Other Territorials include a beautiful 1853 Assay Office twenty, MS65 PCGS, and one of the curious late Moffat issues, a rare 1853 Moffat twenty, in AU55 NGC.

## The Ally Collection

A complete, advanced collection of high-grade Liberty nickels comes to Session 1 and Platinum Night from The Ally Collection. This business-strike set deserves extra attention from Registry Set collectors—in fact, those who follow the highest-rated PCGS sets will recognize many of the coins offered here. Notable dates include the 1885 nickel in MS66+ PCGS Secure, 1886 in MS66 PCGS Secure, 1891 MS67 PCGS, 1901 MS67 PCGS Secure, and 1912-S MS66 PCGS. This is certainly one of the finest sets of business strike Liberty nickels we have ever handled.

## The Millford Collection, Part II

An incredible four-coin set of 1907 proof gold will cross the block, sold as individual lots from The Millford Collection, Part II. The quarter eagle is boldly contrasted, grading PR65+ Cameo PCGS. The half eagle is rare as a Cameo, grading PR65 Cameo PCGS from a mintage of just 92 pieces. The eagle grades PR65 Cameo PCGS, a nicely contrasted Liberty Head example. The Liberty Head double eagle grades PR64+ Cameo PCGS, completing the set, which will be sold as four consecutive individual lots. Other offerings from The Millford Collection, Part II are interspersed throughout the FUN event, ranging from California Fractional Gold to Redfield dollars.

## The Liberty USA Collection

It is our pleasure to offer an event of considerable numismatic significance, the sale of selections from Robert P. Hilt II and his personal collection of U.S. gold varieties. Presented as The Liberty USA Collection, the selections are featured in the Platinum Night auction as well as in Floor sessions 6 and 7. Robert Hilt is best known for authoring *Die Varieties of Early United States Coins* in 1980, what Mr. Hilt himself called "a radical departure from the prior studies of United States coins." He had an interest in coins from an early age. As a boy, he used his paper route money going through bags of coins from the local banks to fill out his collection. A gifted student of both history and mathematics, he applied both talents to his interest in numismatics. Later, upon returning from Vietnam (earning a Bronze Star from the U.S. Army), he again embraced numismatics and built his collection. The publication of his book was the culmination of his dedication to the study of die sequences and the subsequent production sequences. He viewed his work as a cross between M. H. Bolender's *The United States Early Silver Dollars* and Don Taxay's *The U.S. Mint and Coinage*. Hilt's "die group theory of coinage" proved there is a "very exact relationship" (Hilt's words) between Mint records and die varieties. Mr. Hilt unquestionably provided significant insight and excitement to the numismatic community. The early gold coins brought to this sale as The Liberty USA Collection are remarkable in their quality, originality, and importance ... not to mention their rarity.

## The Sweet Bloomfield Collection

A spectacular 1776 Continental dollar, struck on pewter with the CURRENCY spelling, EG FECIT (short for "Elisha Gallaudet made it") graded MS65 PCGS Secure leads a compact, high-interest group of rarities from The Sweet Bloomfield Collection. An 1827/3 Bust quarter graded PR63 PCGS is the former Pittman coin, one of only nine pieces that exist. An 1841 Seated quarter graded PR61 is rarer still, one of only three or four known. The 1842 Small Date quarter (formerly from the Richmond and Sweet collections) graded PR66 NGC is the finest-known of this proof-only, 19th century issue. A half dozen more high-grade collector coins fill out this exceptional consignment.

## The College Collection

If ever there was a "collection for collectors," The College Collection is it. More than 200 lots are scheduled for Floor and Internet sessions representing many series, grades, and dates—each with some special significance or grade to stand out from the crowd. Consigned to us by one of the best "eyes" in the business, the appeal of this collection is universal and offers many substantial opportunities for perceptive bidders.

We accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!®—our proprietary, award-winning online platform. Of course, if you are attending the FUN show in person we encourage you to stop by our booth on the Bourse, view the Platinum Night lots on-site, and bid from the auction floor.

Good luck! We look forward to a truly exceptional auction.

Sincerely,

Greg Rohan  
President

Todd Imhof  
Executive Vice-President

# SESSION ONE

## COLONIALS

- 3001** 1652 Oak Tree Sixpence, IN on Obverse — Damaged — NGC Details. VF. Noe-20, W-400, Salmon 2-B, R.6. 31.3 gn. Similar to Noe-21 and Noe-22, but the first S in MASATHVSETS resembles a question mark. A silver-gray and charcoal example with scattered flan wrinkling and a few thin horizontal marks above the date. Listed on page 39 of the 2015 *Guide Book*. PCGS# 45360
- 3002** 1652 Oak Tree Sixpence, IN on Obverse — Damaged — NGC Details. VF. Noe-17, W-370, High R.6. 33.3 gn. A silver-gray, lilac, and sea-green example of a rare Noe variety. A bend with flattened detail affects the lower right obverse and reverse. The obverse has a scrape on the lower right border, and lesser marks are noted on the left reverse border and the base of the tree. The dies are rotated nearly 90 degrees, unusual for the series. Listed on page 39 of the 2015 *Guide Book*. PCGS# 45360
- 3003** 1652 Oak Tree Shilling, IN at Bottom, VG10 NGC. Noe-7, W-480, Salmon 5-D, R.5. 69.3 gn. A golden-brown and sea-green shilling with a sharp reverse and greater wear on the obverse. The uneven wear is the result of the natural "S" wave imparted by the rocker press during the strike, which made the top half of the tree the design high point. A spectacular late die state with a contiguous break from the base of the 2 in the date to the diagonal of the N in AN DOM. The break touches the final I in the denomination. PCGS# 45362 Base PCGS# 20
- 3004** 1652 Oak Tree Shilling, IN at Bottom — Edge or Rim Damage — PCGS Genuine. Fine Details. Noe-5, W-470, Salmon 3-D, R.2. 47.07 gn. An example of Noe-5 should weigh approximately 70 gn. The present coin is clipped, impacting the peripheral legend, especially TS IN MA and EW ENGLAN. The date and denomination are bold, and the mildly bright surfaces are toned aquamarine and tan-brown. The top half of the tree is well worn. Listed on page 39 of the 2015 *Guide Book*. PCGS# 45362 Base PCGS# 20

1652 Pine Tree Threepence, VF25  
Noe-34, Pellets at Trunk

- 3005** 1652 Pine Tree Threepence, Pellets at Trunk, VF25 PCGS. Noe-34, W-630, Salmon 1-A, R.4. The scarce Noe-34 is easily identified by its extremely wide N in LAND. A cream-gray representative with a bold tree and no distracting marks. The strike is even aside from latitude weakness on the reverse above the date and below NEW. Listed on page 39 of the 2015 *Guide Book*. PCGS# 45365 Base PCGS# 21

1652 Pine Tree Shilling, Choice XF  
Noe-8.2, Large Planchet, No Pellets

- 3006** 1652 Pine Tree Shilling, Large Planchet XF45 NGC. Noe-8.2, W-740, Salmon 7-E, R.6. 70.8 gn. No Pellets at Trunk. Noe-8.2 is a late die state of Noe-8 described by Picker in 1976. No beads are present beneath the second S in MASATHVSETS, and the break below GL extends below the beads. A richly detailed and partly lustrous example with pleasing walnut-brown and gunmetal-gray toning. An edge split is noted at 12 o'clock, and a ragged mint clip at 6 o'clock affects a few peripheral letters. A thin mark is west of the lower left tree branches. All in all, an excellent example of a very scarce intermediate variety. Listed in the 2015 *Guide Book* on page 39. PCGS# 23

1652 Pine Tree Shilling, AU53  
Noe-1, Large Planchet  
Pellets at Trunk

- 3007** 1652 Pine Tree Shilling, Large Planchet AU53 NGC. Noe-1, W-690, Salmon 1-A, R.2. 69.6 gn. Pellets at Trunk. A lovely Large Planchet shilling type coin that features attractive lavender, golden-brown, sea-green, stone-gray, and plum-red toning. No marks are consequential. Most peripheral letters are complete, although the tops of MAS and ND are absent. Minor creases, as struck, are noted above the 2 in the date and east of the tree roots. A late die state with advanced breaks near the date and the N in AN DOM. Listed on page 39 of the 2015 *Guide Book*. PCGS# 23
- 3008** 1652 Pine Tree Shilling, Small Planchet — Surface Damage — PCGS Genuine. Noe-17, W-840, Salmon 3-B, R.3. 49.54 gn. A Noe-17 shilling should weigh about 70 grains, which implies that the present piece is clipped. Both sides display a narrow funnel-shaped depression. The depressions are opposite each other, and suggest that the coin was squeezed by pliers in the vicinity. The obverse has a brief, thin mark at 1:30. Pearl-gray high points contrast with deeper gunmetal fields. Listed on page 39 of the 2015 *Guide Book*. PCGS# 24

**1652 Pine Tree Shilling, XF40**  
**Small Planchet, Noe-29**  
**Attractive Color and Surfaces**

- 3009** 1652 Pine Tree Shilling, Small Planchet XF40 PCGS. Noe-29, W-930, Salmon 11-F, R.3. 71.22 gn. A lovely dove-gray representative with pleasing centering and an absence of noticeable marks. The strike is generally even, although occasional peripheral letters have a soft appearance. A quality yet economical example of both the variety and the Small Planchet type. Listed on page 39 of the 2015 *Guide Book*. PCGS# 24

**American Plantations Token, MS62**  
**Newman 5-D Circa-1828 Restrike**  
**Pleasing Light Gray Surfaces**

- 3010** (c. 1828) American Plantations 1/24 Part Real, Restrike MS62 PCGS. CAC. Newman 5-D, W-1160, R.5. The heavy vertical die break down from the A in FRAN identifies the Newman variety. Most examples seen are extensively oxidized but the present piece shows only minor to moderate oxidation, characteristic of its tin alloy. A nicely struck silver-gray representative. Listed on page 41 of the 2015 *Guide Book*. PCGS# 52

**(1694) London Elephant Token, MS61 Brown**  
**Thick Planchet, Hodder 2-B**

- 3011** (1694) London Elephant Token, Thick Planchet MS61 Brown PCGS. Hodder 2-B, W-12040, R.2. A beautiful chocolate-brown example. Nicely struck, satiny, and minimally abraded. London Elephant tokens are collected by early American numismatists because of their connection to the very rare Carolina and New England varieties, two of which share the same obverse die. Listed on page 47 of the 2015 *Guide Book*. PCGS# 55

**(1694) London Elephant Token, MS65 Brown**  
**Thick Planchet, Hodder 2-B**  
**Among the Finest Certified**

- 3012** (1694) London Elephant Token, Thick Planchet MS65 Brown PCGS. Hodder 2-B, W-12040, R.2. A high grade representative that boasts a full strike and consistent medium brown toning. Glimpses of mint red linger in design crevices. Marks are absent aside from wispy contact near the RE in PRESERVE. Listed on page 47 of the 2015 *Guide Book*. Population: 1 in 65 Brown, 2 in 65 Red and Brown, 1 in 66 Red and Brown (12/14). PCGS# 55

**Undated Rosa Americana Twopence**  
**Borderline Uncirculated**  
**Motto on Label, M. 2.1-B.1**

- 3013** Undated Rosa Americana Twopence, Label AU58 PCGS. CAC. M. 2.1-B.1, W-1322, R.3. Among the earliest issued Rosa Americana varieties, following only the very rare undated Motto Without Ribbon twopence. A well struck olive-brown Borderline Uncirculated example with minimal marks and attractive eye appeal. Listed on page 42 of the 2015 *Guide Book*. Population: 11 in 58 (1 in 58+), 9 finer (12/14). PCGS# 92

- 3014** 1723 Rosa Americana Halfpenny, Crown AU58 NGC. M. 3.7-F.1, W-1236, R.4. Ex: Eric P. Newman Collection. The I in DULCI is repunched. This example shows dark-brown coloration and is pleasing for the grade, with a bold strike and abrasion-free surfaces. Some of the dentils are imperfectly produced on both sides. Listed on page 43 of the 2015 *Guide Book*. PCGS# 119

- 3015** 1760 Hibernia-Voce Populi Halfpenny, P Before Face AU53 PCGS. N. 12, Z. 15-N, W-13950, R.2. A pleasing chocolate-brown representative with problem-free surfaces. Moderately off center toward 9 o'clock, but only the ER in HIBERNIA are partially off the flan. Struck in Dublin, Ireland, by military button-maker Vernon Roche of South King Street. Listed on page 49 of the 2015 *Guide Book*. PCGS# 271

1737 Higley Copper, AG3 Details  
 VALUE ME AS YOU PLEASE  
 I AM GOOD COPPER, 3 Hammers  
 Extremely Rare Freidus 3.3-B.a

- 3016** 1737 Higley Copper, VALUE ME AS YOU PLEASE, I AM GOOD COPPER — Plugged — NGC Details. AG3. Breen-241, Freidus 3.3-B.a, W-8275, High R.7. The die combination was described by Dan Freidus at the October 1994 ANS conference. Two examples were known at that time, lot 71 from Henry Chapman's June 1918 sale of the Jackson Collection, and lot 913 from Stack's December 1993 auction of the William B. Cowden Collection. The present piece has a smoothed plug between 6 and 8 o'clock on the obverse, and opposite on the reverse between 10 and 12 o'clock. The date is bold, as is one of the three hammers. The deer is fully outlined except for the front legs. The chestnut-gold and ice-blue surfaces are evenly granular, usual for the Higley series. Of the obverse legend, ME AS YOU PLEASE is present. The NGC holder incorrectly lists the variety as VALVE (which would be Freidus obverse 2) instead of VALUE. Listed on page 48 of the 2015 *Guide Book*.

1778-1779 Rhode Island Ship Token  
 No Wreath, AU55  
 Rare Betts-562, W-1735, Pewter Variety

- 3017** 1778-1779 Rhode Island Ship Token, No Wreath, Pewter, Betts-562, W-1735, High R.7, AU55 PCGS. The Rhode Island Ship tokens are known in eight distinct varieties, none of which are considered common. The pewter strikings without the wreath below the ship and with the inscription VLUGTENDE removed are the second-rarest, with only the VLUGTENDE Below Ship variety being absolutely rarer and, coincidentally, virtually uncollectible. The removal of VLUGTENDE was accomplished during production, with a shallow depression below the ship still visible. PCGS has certified only three examples of this rare pewter variety, including an AU50 coin, an AU58 example, and the present Choice AU representative (12/14). Uniform slate-gray patina yields a few deeper gunmetal-gray hues, while the design elements are well brought up and exhibit only a touch of wear. A couple small rim defects are noted between 9 and 10 o'clock on the obverse. An important, rare variety of this popular issue. Listed on page 50 of the 2015 *Guide Book*. PCGS# 586

1778-1779 Rhode Island Ship Token, AU58  
Wreath Below Ship, Copper  
Fully Struck, Unblemished

- 3018** 1778-1779 Rhode Island Ship Token, Wreath Below, Copper AU58 PCGS. Betts-563, W-1740, R.4. An impressive medium brown example of this scarce British propaganda medal, intended to keep the Dutch out of the conflict. The strike is precise, and wear is virtually absent, confined to the lower row of rivets on Admiral Howe's flagship. The glossy surfaces are free from any remotely reportable abrasions. Listed on page 50 of the 2015 *Guide Book*. Population: 8 in 58, 9 finer (12/14). PCGS# 576

1778-1779 Rhode Island Ship Token, AU58  
Wreath Below, Betts-563  
Very Scarce Brass Alloy

- 3019** 1778-1779 Rhode Island Ship Token, Wreath Below, Brass AU58 PCGS. Betts-563, W-1740. A well defined golden-brown and olive example with unabraded and moderately granular surfaces. Brass specimens of this medal are considerably rarer than their copper counterparts. PCGS has certified 38 copper examples (PCGS #576) and only 11 brass pieces (PCGS #587). The Battle of Rhode Island occurred on August 29, 1778. It was a strategic victory for British forces, which occupied Aquidneck Island. The issuer of the Rhode Island Ship token is unknown but almost certainly British. Listed on page 50 of the 2015 *Guide Book*. PCGS# 587

1778-1779 Rhode Island Ship Token, MS63  
Betts-563, W-1740, Wreath Below

- 3020** 1778-1779 Rhode Island Ship Token, Wreath Below, Brass, Betts-563, W-1740, R.4, MS63 PCGS. The Wreath Below Ship variety was the final issue of this popular token, struck in brass, copper, and pewter. The pewter variant is the rarest, though the brass variety is a close second. PCGS has encapsulated 38 examples of the copper variety, 18 pewter pieces, and only 11 brass representatives in all grades; of the 11 brass pieces, this example is one of three in MS63, and there are two MS64 pieces finer (12/14). The design elements are boldly struck, with substantial yellow-gold luster highlighting pale olive overtones. A few specks of deeper color are noted, but the surfaces are otherwise devoid of distractions. Listed on page 50 of the 2015 *Guide Book*. PCGS# 587

1779 Rhode Island Ship Token  
Choice AU, Struck in Pewter  
Wreath Below Ship, Betts-563

- 3021** 1778-1779 Rhode Island Ship Token, Wreath Below, Pewter AU55 PCGS. Betts-563, W-1745, High R.6. The Wreath Below Ship variety is merely very scarce in copper or brass, but pewter example are rare. The present well defined and partly lustrous token is unabraded aside from unobtrusive marks near the H in HOWE. Two spots are noted on the N in YLAND and above the U in AUG. Listed on page 50 of the 2015 *Guide Book*. Population: 4 in 55, 5 finer (12/14). PCGS# 585

1773 Virginia Halfpenny, MS64 Red and Brown  
Extremely Rare Newman 13-V Variety

- 3022** 1773 Virginia Halfpenny, No Period, N. 13-V, W-1640, R.7, MS64 Red and Brown PCGS. An extremely rare variety, with fewer than a dozen examples believed known. There are eight harp strings on the reverse coat of arms, and there is no period after GEORGIVS on the obverse. The date numerals are large. Many Virginia halfpence are well-worn, but a number of Mint State pieces exist, most coming from a large hoard that was apparently dispersed into collector channels between 1875 and 1929, per the research of Q. David Bowers. Whether or not the current piece came from that group is unknown, but it matches the physical description of the typical representative — well-struck with flashy fields that display substantial coppery-orange luster. A few deeper auburn overtones are observed, and close examination reveals a few tiny specks on each side. This is an ideal opportunity for the advanced specialist to acquire a truly rare variety in exceptional condition. Population of all 1773 Virginia halfpence varieties: 27 in 64 (1 in 64+) Red and Brown, 3 finer (11/14). PCGS# 244

**1787 Massachusetts Half Cent  
MS64 Brown, Ryder 1-D  
Outstanding Eye Appeal**

- 3023 1787 Massachusetts Half Cent MS64 Brown PCGS. Ryder 1-D, W-5900, R.4.** A scarce variety whose pick-up point is recutting on the base of the obverse star. Die rust near the LT in WEALTH is also diagnostic. Free from evident abrasions or planchet flaws. The strike is incomplete at the centers but sharp everywhere else. An outstanding Massachusetts half cent type coin. Listed on page 59 of the 2015 *Guide Book*. PCGS# 296

- 3024 1787 Massachusetts Cent, Horned Eagle AU53 PCGS. Ryder 2b-A, W-6040, R.3.** The die break between the letter H and the eagle's head is the source of the variety nickname. A well defined medium brown and olive-green example with unabraded and minutely granular surfaces. Listed on page 59 of the 2015 *Guide Book*. PCGS# 305

**1788 Massachusetts Half Cent  
MS64 Brown, Ryder 1-B  
Popular State Type Coin**

- 3025 1788 Massachusetts Half Cent MS64 Brown PCGS. Ryder 1-B, W-6010, R.2.** A well struck, mark-free, and coruscating mahogany-brown Choice cent. The upper portion of the right (facing) wing has an inconspicuous spot. The planchet quality is exceptional despite a small retained lamination near 9 o'clock on the reverse. Listed on page 59 of the 2015 *Guide Book*. PCGS# 308

- 3026 1788 Massachusetts Cent, Period AU50 PCGS. CAC. Ryder 8-C, W-6260, R.3.** A charming and problem-free walnut-brown representative of the Massachusetts commonwealth copper coinage. The state issues were legal under the Articles of Confederation but restricted by the Federal Constitution, which was ratified on June 21, 1788. Listed on page 59 of the 2015 *Guide Book*. PCGS# 311

- 3027 1788 Massachusetts Cent, Period AU53 PCGS. Ryder 10-L, W-6280, High R.2.** A charming chocolate-brown cent with noticeable remaining luster and considerable design definition. A minor lamination near the C in COMMON, and the borders display occasional wispy thin marks. Listed on page 59 of the 2015 *Guide Book*. PCGS# 311

- 3028 1788 Massachusetts Cent, Period AU53 PCGS. Ryder 8-C, W-6260, R.3.** A lovely chocolate-brown cent with traces of mint red within the shield and about other obverse crevices. Essentially devoid of contact. A pair of unimportant light gray spots are west of the bow. Listed on page 59 of the 2015 *Guide Book*. PCGS# 311

- 3029 1787 New Jersey Copper, Camel Head, VG10 PCGS. Maris 57-n, W-5315, R.6.** This rare variety, nicknamed for the unusual shape of the horse's head, is unknown in Mint State. Most examples are struck over Vermont, Connecticut, or Machin's Mills coppers, and are well-circulated. This smooth, medium brown example is struck over a 1788 Machin's Mills halfpence, with the remnants of the former design evident within the reverse shield and the 88 of the former date seen in the field to the right of the shield point. A well-worn, but problem-free example. Listed on page 70 of the 2015 *Guide Book*. Population: 2 in 10, 73 finer (12/14). PCGS# 515

**1785 Vermont Landscape Copper, VF25  
VERMONTIS, RR-4**

- 3030 1785 Vermont Copper, VERMONTIS VF25 PCGS. RR-4, Bressett 3-C, W-2015, High R.4.** The sole Landscape die variety with the republic name Latinized as VERMONTIS. This nicely defined example is mahogany-brown with deep gunmetal-gray in design recesses. Surprisingly free from abrasions and verdigris, although occasional minor planchet flaws are noted. Listed on page 72 of the 2015 *Guide Book*. PCGS# 542

**1787 Auctori Plebis Token, AU55  
W-8770, Adopted British Variety**

- 3031 1787 Auctori Plebis Token AU55 PCGS. Breen-1147, W-8770, R.3.** A smooth tan-gray example. The strike is typical for the issue, as intended by the maker to imply acceptance in circulation. The usual die state with a prominent, curved die crack in front of the face of the seated figure. Moderately off center toward 2 o'clock. The Auctori Plebis token has an English origin, but is popular with colonial specialists due to its uncanny obverse similarity with the contemporary Connecticut coppers. Listed on page 74 of the 2015 *Guide Book*. PCGS# 601

**1736 Auctori Plebis Token  
HISPANIOLA, VF20  
Very Rare Breen-1149**

- 3032** 1736 Auctori Plebis, HISPANIOLA, VF20 PCGS. Breen-1149, Low R.7. The rare Normal Date Hispaniola token with a right-facing bust on the obverse and a harp on the reverse. About a dozen of these pieces survive in all grades. Associated with the Breen-1147 Auctori Plebis tokens due to the similar obverse legend. The weak impression is typical of all known examples. The tan-brown surface are unabraded although the lower half of the reverse displays minor planchet flaws. PCGS# 966

**1783 Nova Constellatio Copper  
MS63 Brown, Exceptional Quality  
Crosby 3-C, Blunt Rays**

- 3033** 1783 Nova Constellatio Copper, Blunt Rays MS63 Brown PCGS. Crosby 3-C, W-1875, R.3. A magnificent golden-brown representative. The strike is bold and the satiny surfaces display only incidental contact. An outstanding Nova Constellatio type coin. The wedge-shaped die break on the upper border of the dated side is customary for the variety, as is the slender break through the R i LIBERTAS. Listed on page 54 of the 2015 *Guide Book*. Population: 2 in 63 Brown, 2 finer (12/14). PCGS# 807

- 3034** 1787 Fugio Cent, Club Rays, Rounded Ends XF40 PCGS. N. 4-E, W-6685, R.3. The Rounded Ends Club Rays is a scarce subtype represented by just two varieties, N. 3-D and N. 4-E. The present chocolate-brown Fugio copper is unabraded and offers pleasing definition. A mint-made lamination is noted on the reverse near 6 o'clock. Listed on page 88 of the 2015 *Guide Book*. PCGS# 904

- 3035** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays AU53 NGC. N. 12-X, W-6820, R.3. A well defined wheat-brown example with exemplary surfaces for the designated grade. Vertical breaks east of the sun and at 6 o'clock on the reverse confirm the die pair, associated with the Bank of New York holdings. Listed on page 87 of the 2015 *Guide Book*. PCGS# 883

- 3036** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays AU55 PCGS. N. 13-X, W-6855, R.2. Rich walnut-brown toning visits this clashed but unblemished and evenly struck Choice AU Fugio type coin. The left borders display a couple of minor laminations, as made. Listed on page 87 of the 2015 *Guide Book*. PCGS# 883

- 3037** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS61 Brown NGC. N. 11-X, W-6790, R.4. A lovely tan-brown and sea-green Fugio type coin with satiny and unmarked surfaces. Minor flan flaws, as made, are distributed. The usual Newman 11-X die state with bold obverse clash marks from the rings. Incorrectly designated by NGC as UNITED STATES. Listed on page 87 of the 2015 *Guide Book*. PCGS# 883

**1787 Fugio Cent, MS62 Brown  
N. 11-X, STATES UNITED  
Pointed Rays, 4 Cinquefoils**

- 3038** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS62 Brown PCGS. N. 11-X, W-6790, R.4. A pleasing chocolate-brown Fugio cent. Unabraded, although minor flan imperfections are noted near 5 o'clock on the obverse and 1:30 on the reverse. The obverse exhibits clash marks from the rings, usual for Newman 11-X. High grade 'X' reverse Fugios are associated with the Bank of New York holdings. Listed on page 87 of the 2015 *Guide Book*. PCGS# 883

**1787 Fugio Cent, MS62 Brown  
N. 13-X, Pointed Rays, STATES UNITED**

- 3039** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS62 Brown PCGS. CAC. N. 13-X, W-6855, R.2. Glossy, rich chocolate-brown color covers both sides of this well-produced cent. Sharply struck and nicely centered, the surfaces show a single flan imperfection angling from the U of BUSINESS through the D of MIND. Possibly from the Bank of New York holdings. CAC endorsed with outstanding eye appeal. Listed on page 87 of the 2015 *Guide Book*. PCGS# 883

1787 N. 13-X Fugio Cent  
MS63+ Brown, Planchet Flaw  
Pointed Rays, STATES UNITED

- 3040 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays — Struck on a Defective Planchet — MS63+ Brown PCGS. N. 13-X, W-6855, R.2. A mark-free chocolate-brown representative with glimmers of the initial red in selected design crevices. The strike is bold except on the obverse exergue and the opposite upper reverse. The planchet flaw noted on the PCGS holder is mostly on the sundial and impacts the Roman numerals IV and V. Listed on page 87 of the 2015 *Guide Book*.

1787 Fugio Cent, MS65 Brown  
N. 13-X, Four Cinquefoils  
STATES UNITED, Pointed Rays

- 3041 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS65 Brown PCGS. CAC. N. 13-X, W-6855, R.2. A beautiful Gem Fugio copper, almost certainly at one time part of the Bank of New York holdings. Plentiful glimpses of mint red outline design crevices, while the open fields and high points are steel-gray. Well struck and unabraded with only a single unimportant lamination on the reverse at 9 o'clock. Listed on page 87 of the 2015 *Guide Book*. PCGS# 883

1787 N. 13-X Fugio Cent  
MS63 Red and Brown  
Much More Red Than Brown

- 3042 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS63 Red and Brown PCGS. N. 13-X, W-6855, R.2. Fiery mint red dominates this unabraded Fugio copper. The strike is bold aside from minor incompleteness on the obverse border between 6 and 9 o'clock. Scattered minute to moderate flan striations are of mint origin. A couple of unimportant spots noted between the AR in ARE and near VII on the sundial. Listed on page 87 of the 2015 *Guide Book*. PCGS# 884

1787 Fugio Cent, MS64 Red and Brown  
N. 8-X, Pointed Rays, STATES UNITED

- 3043 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS64 Red and Brown PCGS. N. 8-X, W-6750, R.3. An evenly struck and unmarked fire-red and steel-gray near-Gem. An unimportant horizontal lamination is noted on the lower rings. Struck several degrees off center toward 2 o'clock, but all legends are complete, although the date is flush against the rim. A middle die state with the eventual heavy obverse break at 6 o'clock still in its nascent stages. Likely from the Bank of New York holding of Fugio coppers. Listed on page 87 of the 2015 *Guide Book*. PCGS# 884

1787 Fugio Cent, MS63+ Red and Brown  
N. 8-B, UNITED STATES, Cinquefoils

- 3044 1787 Fugio Cent, UNITED STATES, Cinquefoils MS63+ Red and Brown PCGS. N. 8-B, W-6740, R.3. A generous amount of orange-red luster outlines design elements, although the high points are medium brown. Unabraded and satiny. The planchet quality is superior for a Fugio cent. Clashed on the lower reverse from the sun and its rays. A couple of tiny spots are near the 8 in the date. Listed on page 87 of the 2015 *Guide Book*. PCGS# 890

- 3045 1783 Chalmers Shilling, Short Worm — Scratches — NGC Details. Good. Breen-1011, W-1785, High R.4. A collectible walnut-brown example of this scarce private silver issue. ONE SHILLING and MERS ANNAPOLIS are sharp relative to the remaining design. The obverse has a pair of lengthy but inoffensive straight pinscratches. Listed on page 51 of the 2015 *Guide Book*.

- 3046 1783 Chalmers Shilling, Short Worm — Damaged — NGC Details. VG. Breen-1011, W-1785, High R.4. The peripheral legends are mostly bold on this pearl-gray Chalmers shilling. The reverse has a horizontal planchet flaw from the S in ANNAPOLIS toward the center, and the flaw is pinscratched from an attempt at effacement. Both sides are hairlined. Listed on page 51 of the 2015 *Guide Book*.

- 3047 1783 Chalmers Shilling, Long Worm Good 4 NGC. Breen-1012, W-1790, R.4. A silver-gray and almond-gold example with moderately deeper toning along a portion of the reverse periphery. The wear is uneven, but the date, ONE, and the left bird are sharp, as is NAPOLIS and CHALM. Listed on page 51 of the 2015 *Guide Book*. PCGS# 595

1783 Chalmers Shilling  
Very Fine Details  
Long Worm, W-1790

- 3048 1783 Chalmers Shilling, Long Worm — Plugged — NGC Details. VF. Breen-1012, W-1790, R.4. A gunmetal-gray representative with surprisingly even and sharp definition given its VF assessment. The centers are slate and the borders are charcoal-gray. Skillfully repaired with a small plug near the S in SHILLING, and opposite near the second A in ANNAPOLIS. Listed on page 51 of the 2015 *Guide Book*.

1783 Chalmers Shilling, XF40  
Long Worm Variety, W-1790

- 3049 1783 Chalmers Shilling, Long Worm XF40 PCGS. Breen-1012, W-1790, R.4. Maryland silversmith John Chalmers attained eventual numismatic celebrity for his privately struck issues, designed to rid the vicinity of worn-out and cut down Spanish-American silver. Best known among his output are the Long Worm and Short Worm shillings. The Long Worm shows the fence between the letters N and I. The present example is highly pleasing due to good centering, an even strike, and unblemished medium cream-gray surfaces. Listed on page 51 of the 2015 *Guide Book*. PCGS# 595

Bar Copper, W-8520  
Very Fine Details  
Famous Early American Type

- 3050 (1785) Bar Copper — Environmental Damage — NGC Details. VF. Breen-1145, W-8520, R.4. The famous and scarce Bar copper or “cent” has been a popular Early American type since the 19th century. This example is well defined but the fields are moderately granular. Primarily toned golden-brown with sea-green in protected regions. Listed on page 74 of the 2015 *Guide Book*.

Original Bar Copper, XF45  
Breen-1145, W-8520

- 3051 (1785) Bar Copper XF45 PCGS. Breen-1145, W-8520, R.4. A pleasing, natural brown example with bits of olive patina in the protected areas. A couple of minor bumps are noticed about the obverse periphery and an ancient dig is located just above the S in USA. Listed on page 74 of the 2015 *Guide Book*. Ex: FUN Signature (Heritage, 1/2002), lot 5156; Baltimore Signature (Heritage, 7/2003), lot 5050. PCGS# 599

- 3052 1787 Immunis Columbia Piece, Eagle Reverse Fine 15 NGC. W-5680, High R.4. A walnut-brown representative with clear legends and types. The fields are moderately granular and free from abrasions. Likely struck at the Rahway Mills private mint in New Jersey after circa-1788. Listed on page 55 of the 2015 *Guide Book*. PCGS# 841

- 3053 (1792-94) Kentucky Token, Engrailed Edge MS62 Brown PCGS. Breen-1162, W-8805, R.6. Alternatively described as reeded, gripped, or engrailed, the present Kentucky token edge variety is much rarer than the plain edge W-8800. This is a splendid example with a full strike and lovely light golden-brown surfaces. A faint obverse spot is noted at 6:30. Listed on page 75 of the 2015 *Guide Book*. Population: 5 in 62 Brown, 6 finer (12/14). PCGS# 617

Kentucky Token, MS65 Brown  
Scarce LANCASTER Edge Variety

- 3054 (1792-94) Kentucky Token, LANCASTER Edge MS65 Brown PCGS. Breen-1156, W-8810, R.5. Much rarer than the Plain Edge W-8800. Kentucky tokens can also be found with an engrailed edge, and very rare BEDWORTH, FIELDINGS, and PARKER lettered edge variants are known. The present Gem is well struck and splendidly free from abrasions. Mostly toned light chocolate-brown, but the initial peach-gold lingers in the legends. A minute spot beneath the R in STRENGTH provides an identifier. Listed on page 75 of the 2015 *Guide Book*. PCGS# 623

1794 Franklin Press Token  
MS63 Red and Brown  
W-8850, Plentiful Mint Red

- 3055 1794 Franklin Press Token MS63 Red and Brown PCGS. Breen-1165, W-8850, R.1. Mint red outlines the letters and press. The open fields and high points are medium brown. Unlike often seen, no break is present on the press. A lovely, better grade example of the popular Franklin Press token, named after the esteemed Pennsylvanian diplomat and inventor, who briefly used it prior to the Revolution. Listed on page 76 of the 2015 *Guide Book*. PCGS# 631

1796 Gold Castorland Medal, MS64  
Paris Mint Restrike, W-9160

- 3056 1796 Castorland Medal, Gold, Paris Mint Restrike, MS64 PCGS. Rulau NY-A33, W-9160. Struck from the original obverse die with the A in CASTOR low, and the TO touching. Struck from a restrike reverse die with repunching near the E in PARENS and a die line above the cornucopia. The edge is plain aside from a bee edge mark and OR. The bee edge mark was used at the Paris Mint between Nov. 1860 and Dec. 1879. Triple struck with a spread evident on the dentils. A fully struck and prooflike example with minor field hairlines. We have offered four gold Castorland medals according to our online auction archives, which date to 1993. Among those, only lot 8070 in our New York ANA Signature is confirmed to have a bee mint director's hallmark on the edge. One had a cornucopia hallmark indicating a late 19th century striking, another was a 20th century restrike from a copy obverse die, and the final example was struck from the original obverse die but the edge hallmark was concealed by the holder. PCGS# 535046

**1820 North West Token  
W-9250, Brass**

- 3057** 1820 North West Company Token, Brass, Holed, PCGS Genuine. Breen-1083, W-9250, R.4. Engrailed Edge. The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen that has environmental damage. Both sides are evenly worn with mild corrosion. The coin is holed at 12 o'clock, as is diagnostic of nearly all known examples of this issue. The North West Company tokens were used in the Indian trade in the Pacific Northwest, and were frequently holed so that they could easily be strung together on a string or cord. Only two pieces are known without a hole. This piece is pleasing for the issue, as almost all known examples exhibit moderate environmental impairments. Listed on page 78 of the 2015 *Guide Book*. PCGS# 662

**1820 North West Company Token  
VF Details, Copper**

- 3058** 1820 North West Company Token, Copper, NGC Details. VF. Breen-1083, W-9250, R.4. Trappers in the Pacific Northwest used these tokens at the North West Company store. All but two known examples are holed. Most show evidence of environmental exposure from burial. The present deep russet-brown example is granular, particularly on the lower obverse. Most of the portrait, beaver, and reverse legend are clear. Listed on page 78 of the 2015 *Guide Book*.

**1791 Washington Liverpool Halfpenny, MS65; and a  
1793 Lancashire - Liverpool Halfpenny, AU55  
Struck With Same Reverse Die**

- 3059** 1791 Washington Liverpool Halfpenny, Copper AU55 PCGS, Baker-17, W-10650, R.6; and a 1793 Lancashire - Liverpool Halfpenny Conder Token MS65 NGC, D&H-107. Both tokens were struck by the same reverse die, which has a fairly large break near 12 o'clock. The break is larger on the 1791 Washington halfpenny, which indicates it was struck after the 1793 Conder token. An AU55 PCGS example of the 1791 Washington halfpenny appeared as lot 3082 in our November 2012 Signature and realized \$6,462.50. (Total: 2 coins) PCGS# 698

**1795 Washington Grate Halfpenny, MS63 Brown  
Scarce Baker-29, Large Buttons, Lettered Edge**

- 3060** 1795 Washington Grate Halfpenny, Large Buttons, Lettered Edge MS63 Brown PCGS. Baker-29, W-10990, R.6. Reportedly the die work was done by Thomas Wyon and the coins were struck in Birmingham. A popular Conder token, this is the scarce Reeded Edge variety in attractive, Select Uncirculated condition. Ample brick-red highlights shine through smooth umber-brown overtones. A boldly struck example on the obverse, with weakness on the reverse at LONDON. The edge reads PAYABLE AT LONDON LIVERPOOL OR BRISTOL. A nice piece for the collector of colonial Washingtonia or the Conder specialist. Population: 3 in 63 Brown, 6 finer (12/14). PCGS# 743

- 3061** 1795 Washington Liberty & Security Halfpenny, Plain Edge AU58 PCGS. Baker-31C, W-11000, High R.6. An unmarked example that retains hints of faded mint red in protected areas, especially on the reverse. The remainder of the surfaces are olive-brown. A small spot is near the E in LIBERTY. The strike shows occasional incompleteness, as always for the issue. Scarcer than the usual LONDON edge (Baker-31) variety. Listed on page 84 of the 2015 *Guide Book*. PCGS# 752

- 3062** Undated Washington Liberty & Security Penny, Plain Rims, Baker-30, W-11050, R.2, MS62 Brown PCGS. Undated, but struck circa 1795. These were produced in quantity and circulated widely in England. The present Mint State survivor is well-struck with minimal abrasions for the grade. Tinges of lighter reddish-brown in the recesses highlight the smooth auburn surfaces. Listed on page 84 of the 2015 *Guide Book*. Population: 14 in 62 Brown, 50 finer (12/14). PCGS# 767

**Washington Liberty & Security Penny, MS64 Brown  
Lustrous Baker-30 Plain Rims Example**

- 3063** Undated Washington Liberty & Security Penny MS64 Brown PCGS. CAC. Baker-30, W-11050, R.2. Plain Rims. A nice, lustrous near-Gem Brown example of this available Washington issue, far finer than typically seen. The golden-brown, powder-blue, rose-red, and sea-green surfaces show few signs of contact. Listed on page 84 of the 2015 *Guide Book*. Population: 24 in 64 (1 in 64+) Brown, 5 finer (12/14). PCGS# 767

- 3064** 1795 Washington North Wales Halfpenny, Plain Edge, One Star at Each Side of Harp AU55 PCGS. Baker-34, W-11150, R.3. The North Wales halfpenny was intended to appear worn even when new, to facilitate acceptance in circulation. Thus, portions of the harp and bust of Washington are lightly impressed on all examples. This problem-free chestnut-brown example has seen minimal circulation, since die lines are apparent on both fields. Listed on page 84 of the 2015 *Guide Book*. Population: 4 in 55, 3 finer (12/14). PCGS# 770

**1795 North Wales Halfpenny, AU50  
Rare Lettered Edge Variety, W-11155**

- 3065** 1795 Washington North Wales Halfpenny, Lettered Edge, One Star at Each Side of Harp AU50 PCGS. Baker-34A, W-11155, High R.6. The Lettered Edge variety (PAYABLE IN LANCASTER LONDON OR BRISTOL) is much rarer than the Plain Edge variety. A medium brown example with nearly unmarked surfaces. The strike shows softness on Washington's hair and opposite on the lower left portion of the harp, characteristic of the issue. The blurry definition on the obverse peripheral legend, and the granular texture on the reverse field, are as made and caused by a late die state. Listed on page 84 of the 2015 *Guide Book*. PCGS# 773

**(1781) Libertas Americana Medal, Copper  
AU Details, Betts-615**

- 3066** (1781) Libertas Americana Medal, Copper — Mount Removed — NGC Details. AU. Betts-615, Loubat-14. Struck at the Paris Mint, the Libertas Americana medal commemorates the surrender of the British armies at Saratoga and Yorktown. It is arguably the single most famous medal, and it greatly influenced the obverse of the Liberty Cap half cent and cent. Only 100 to 125 examples in copper are known today. The present chocolate-brown representative appears unworn but displays scattered minor to moderate marks. No mount removal is readily evident, although the edge is obscured by the NGC holder. PCGS# 151815

**HALF CENTS**

**1793 C-3, B-3 Half Cent, AG3  
First Year of Coinage**

- 3067** 1793 C-3, B-3, R.3, AG3 PCGS. The central design motifs are worn smooth but fully outlined on this pleasing piece, with the date, LIBERTY, and statutory legend all readable. Attractive blue overtones reside on the smooth brown surfaces of this pleasing half cent. Our EAC grade AG3. PCGS# 35009 Base PCGS# 1000

**1793 C-4 Half Cent, VG Details  
Challenging Single-Year Type**

- 3068** 1793 C-4, B-4, Low R.3 — Rim Damage — PCGS Genuine. VG Details. A nicely detailed lavender-brown and aquamarine half cent with glossy and lightly porous surfaces. Both sides have several small to moderate rim dings, and we also note a tick on the L in HALF and a hair-thin horizontal lamination at the obverse exergue. A very scarce single year and introductory year type. Our EAC grade AG3. PCGS# 35012 Base PCGS# 1000

**1794 Half Cent, VF25  
C-9, High Relief Head**

- 3069** 1794 High Relief Head, C-9, B-9, R.2, VF25 PCGS. Manley Die State 1.0, "rare." Without the usually seen obverse crack from the rim at 9:30 to the cap. Clash marks outline portions of the portrait. A medium brown example with pleasing sharpness except on HALF CENT, which is often faint on this high relief variety. Marks are minor aside from an interrupted faint vertical line above the 7, a thin mark on the lower right reverse border, and a few wispy abrasions between the UN in UNITED. Our EAC grade Fine 15. PCGS# 35063 Base PCGS# 35054

**1794 C-9 Half Cent, AU50**

- 3070** 1794 High Relief Head, C-9, B-9, R.2, AU50 PCGS. CAC. Manley Die State 3.0 with a rim die break on the reverse at 6:30. Substantial mint gloss shimmers across this briefly circulated and impressive half cent. Richly defined aside from minor softness on the CE in CENT. The scattered tiny marks are invariably inoffensive. Much nicer than is usual for this early date. Our EAC grade VF30. PCGS# 35063 Base PCGS# 35054

**1795 No Pole C-6a Half Cent, VF30  
Plain Edge, Thin Planchet  
Visible Talbot, Allum & Lee Undertype**

- 3071** 1795 Plain Edge, No Pole, Thin Planchet, C-6a, B-6c, R.2 — Overstruck — VF30 NGC. A well defined chocolate-brown example. Free from any verdigris. Each side has a few wispy thin marks. Overstruck on a rolled out Talbot, Allum & Lee token, as were most if not all examples of C-6a. The undertype date is visible on the obverse at 7:30, and portions of CENT from the token are evident at 9:30 on the reverse. Our EAC grade Fine 15. PCGS# 35089 Base PCGS# 1018

**1796 Half Cent, Good Details  
C-2, B-2, With Pole**

- 3072** 1796 With Pole, C-2, B-2, High R.4 — Damage — PCGS Genuine. Good Details. Only two varieties of this low-mintage (1,390 coins) issue are known, C-2 being the slightly more available, but still scarce. This example is a typical representative, showing moderate wear and minor granularity in the fields that prevents a numerical grade from PCGS. The obverse is well-defined, with clear lettering and a boldly outlined bust, though the reverse grows slightly weaker throughout the right side. A slight reddish tint brightens the deep brown surfaces. An important chance for the specialist to acquire this elusive variety in a slightly more affordable condition. Our EAC grade Fair 2. PCGS# 35098 Base PCGS# 1027

**1797 C-1 Half Cent, AU53  
1 Above 1, TAL Undertype**

- 3073** 1797 1 Above 1, C-1, B-1, R.2, AU53 NGC. Manley Die State 4.0. The obverse die is failing in several places. Traces of the Talbot, Allum & Lee token undertype are evident near the base of Liberty's pole and the ERI in AMERICA. A well defined tan-brown and lavender example without a hint of verdigris. A few minor marks are noted on the obverse near 9 o'clock. Our EAC grade VF35. PCGS# 35101 Base PCGS# 1042

- 3074** 1802/0 Reverse of 1802, C-2, B-2, R.3, VG10 PCGS. Manley Die State 2.0. A medium brown representative with attractive surfaces. One small planchet flaw noted on the obverse near 3 o'clock. All legends are bold except for HALF CENT, which is often weak on C-2. Our EAC grade Good 6. PCGS# 35125 Base PCGS# 1057

**1802/0 Cent, Fine 15  
C-2, Reverse of 1802  
Large Cent Undertype**

- 3075** 1802/0 Reverse of 1802, C-2, B-2, R.3, Fine 15 PCGS. Manley Die State 2.0. Overstruck on a cut-down off-center large cent. The 1 in the date, and the shoulder curl, are evident from the undertype near the left loop of the wreath ribbon. An arc of dentils from the undertype (and an associate planchet fissure) extends from the IT in UNITED to the left border of the right wreath stem. A chocolate-brown example with pleasing surfaces and good eye appeal. Our EAC grade VG8. PCGS# 35125 Base PCGS# 1057

**1804 Half Cent, AU50  
C-5, B-4, 'Spiked Chin'**

- 3076** 1804 Spiked Chin, C-5, B-4, R.4, AU50 NGC. Crosslet 4. Manley Die State 4, a rare die state with the bisecting reverse crack bold and no sign of the later crack that extends down from the O in OF. This is the famous "Spiked Chin" variety, with a heavy die flaw projecting from Liberty's chin. Numerous lighter, parallel die lines are seen in the field below. This variety is most often seen in the mid to lower-circulated grades, and is seldom seen in pleasing AU or Mint State condition. This example shows sharp detail and smooth, auburn-brown patina over glossy surfaces. Our EAC grade VF30. PCGS# 35152 Base PCGS# 1075

**1804 C-10, B-9 Half Cent, MS64 Brown  
The Usual Late Die State**

- 3077** 1804 Crosslet 4, Stems, C-10, B-9, R.1, MS64 Brown NGC. Manley Die State 3.0, the usual late die state for this variety. An attractive Choice Mint State example, this 1804 half cent exhibits lovely olive-brown surfaces with traces of extremely faded mint red on each side. Our EAC grade MS60. PCGS# 35158 Base PCGS# 1069

- 3078** 1804 Crosslet 4, No Stems, C-12, B-11, R.2, MS62 Brown NGC. This is a well-struck example of this moderately available variety, with glossy auburn-brown and amber-red hues blended over both sides. Minor clash marks are evident behind Liberty's hair curls, and slight die erosion is observed in the obverse fields. These characteristics are present on virtually all known examples of this die pairing. Our EAC grade AU50. PCGS# 35175 Base PCGS# 1072

**1804 C-13 Half Cent, MS64 Brown  
Plain 4, No Stems**

- 3079** 1804 Plain 4, No Stems, C-13, B-10, R.1, MS64 Brown PCGS. Manley Die State 2.0. A lustrous mahogany-brown near-Gem with peripheral glimpses of sea-green, plum-red, and cobalt-blue. Lustrous and beautiful. Well struck except for the dentils on the obverse and upper reverse. Unobtrusive thin marks are noted on the field near the chin and across the O in OF. Our EAC grade AU55. PCGS# 35176 Base PCGS# 1063

- 3080** 1805 Small 5, Stems, C-2, B-2, FS-301, High R.5, Good 6 PCGS. The ST is STATES is close, one method of attributing the rarest 1805 half cent die variety. A steel-gray and mahogany-brown example that shows the usual softness on HALF CENT. The other legends are bold. Small spots are noted near OF and the 2 in 200. Our EAC grade Good 4. PCGS# 35182 Base PCGS# 1087

**1806 C-1, B-3 Half Cent, MS63 Brown  
Small 6, No Stems**

- 3081** 1806 Small 6, No Stems, C-1, B-3, R.1, MS63 Brown NGC. Obverse clash marks are constant on this plentiful variety. Lustrous bluish steel-brown surfaces show splashes of maroon patina on the obverse, with intermingled olive and tan on the reverse. Most details are sharp, although the lower obverse and upper reverse border details are faint. Our EAC grade AU50. PCGS# 35191 Base PCGS# 1093

**1807 Half Cent, C-1, B-1, MS63 Brown  
Exceptional Eye Appeal**

**3082** 1807 C-1, B-1, R.1, MS63 Brown PCGS. CAC. Manley Die State 3.0 with minimal dentilation and an orange peel texture (as made) on the obverse field. Although peripheral legends show some distortion due to the late die state, the major motifs are well struck. The lustrous chocolate-brown surfaces are unmarked and exceptionally appealing for the given grade. A small spot between the LF in HALF provides an identifier. Our EAC grade AU50. PCGS# 35203 Base PCGS# 1104

**3083** 1808 C-3, B-3, R.1, AU58 NGC. Manley Die State 4.0. A distinctive variety, since the second 8 in the date was formed by stacking two impressions of the denominator zero punch. A deep mahogany-brown example with noticeable luster and minimal marks. The dies are widely rotated. Our EAC grade XF40. Ex: *St. Louis Central States (Heritage, 5/2005)*, lot 5060. PCGS# 35206 Base PCGS# 1107

**1809 Half Cent, VF25  
Scarce Cohen-1 Variety**

**3084** 1809 C-1, B-2, FS-301, High R-5. VF25 NGC. The reverse shows a berry under the upright of the T in UNITED, while the leaf point is below the left base of I in UNITED. The 1 in the date is slightly higher than the 809, which are in a virtually straight line. A sometimes-overlooked variety, still "cherrypicked" on occasion despite its scarcity. This example displays rich, dark chocolate-brown color with smooth, lightly marked surfaces and strong rims. Nice detail remains. Our EAC grade Fine 15. PCGS# 35218 Base PCGS# 1123

**3085** 1809 C-3, B-4, R.1, MS64 Brown NGC. Manley Die State 1.0. A richly toned lavender-brown near-Gem. Lustrous and crisply struck with exemplary surfaces. Although an available variety in well circulated grades, Cohen-3 becomes decidedly rare in present quality. Our EAC grade MS60. PCGS# 35224 Base PCGS# 1123

**1811 C-2, B-2 Half Cent, XF40  
Close Date**

**3086** 1811 Close Date, C-2, B-2, R.3, XF40 PCGS. This intermediate die state, Manley State 2.0, has light clash marks behind the head and elsewhere. Chocolate-brown surfaces exhibit orange-tan patina on this smooth and pleasing half cent key. Both sides exhibit unidentified residue within various design elements, including stars and letters. Our EAC Grade VF20. PCGS# 35242 Base PCGS# 1135

**1825 C-2, B-2 Half Cent, MS64 Brown  
Lustrous Eye Appeal**

**3087** 1825 C-2, B-2, R.1, MS64 Brown NGC. CAC. The date is closely spaced, and the 5 is to the right of Liberty's hair curl. Pleasing medium-brown patina covers the well-preserved surfaces, which have microscopic die rust visible on both sides. Several stars show weak centrils and a few leaves are softly struck. Our EAC grade AU55. Census (all varieties): 22 in 64 Brown, 36 finer (11/14). Ex: *Los Angeles Signature (Heritage, 8/2009)*, lot 37. PCGS# 35249 Base PCGS# 1141

**3088** 1834 C-1, B-1, R.1, MS64 Brown NGC. Manley Die State 3, with extensive clash marks on both sides, the scarcest die state known. This piece is well-struck, with vibrant mint luster shining through deep burgundy toning. No major abrasions are present. Our EAC grade MS60. PCGS# 35285 Base PCGS# 1165

**3089** 1835 C-1, B-1, R.1, MS64 Red and Brown PCGS. CAC. Manley Die State 2.0. A well struck Choice half cent with dynamic luster and only incidental contact. Minor carbon is all that limits the grade. Certified in a first generation holder. Our EAC grade MS64. PCGS# 35289 Base PCGS# 1169

## PROOF BRAIDED HAIR HALF CENTS

1848 Half Cent, PR63 Brown  
B-1, Original Striking

- 3090 1848 Original PR63 Brown PCGS. CAC. B-1, Low R.6. There are three varieties of 1848 proof half cents. B-1 original proofs have large wreath berries. B-2 and B-3 are restrikes with small berries on the wreath. This fully struck specimen displays attractive apple-green toning with hints of faded red in protected regions. A tiny tick beneath the L in HALF provides an identifier. The obverse exhibits a partial wire rim, as made. Our EAC grade PR60. NGC ID# 26ZJ, PCGS# 1296

1857 Half Cent, PR64  
B-2, Proof-Only Variety

- 3091 1857 PR64 Brown PCGS. CAC. B-2, R.4. A proof-only variety identified by reverse die doubling on the ribbon and ONE CENT, especially prominent near the right base of the letter T. This reverse die was used to coin proof half cents of various dates. The present fully struck specimen is deep mahogany-brown but offers olive-green and lilac undertones. A tiny spot on the jaw, and another on the field near the hairbun, correspond to the grade. Our EAC grade PR60. NGC ID# 26ZY, PCGS# 1332

## LARGE CENTS

1793 AMERI. Chain Cent, AG Details  
The Reverse Central Device Shows Clearly

- 3092 1793 Chain, AMERI., S-1, B-1, R.4 — Tooled — PCGS Genuine. AG Details. Brown surfaces show the right side of Liberty's portrait outlined and the eye with a modicum of detail. What appear to be a couple of intentionally placed small marks are visible in the central obverse. The BE in LIBERTY show faintly, but the central reverse design shows clearly. Some roughness is visible on the reverse. Our EAC grade Fair 2. PCGS# 35432 Base PCGS# 1340

1793 Chain Cent, AG Details  
S-3, AMERICA

- 3093 1793 Chain, AMERICA, S-3, B-4, Low R.3 — Damage — Genuine PCGS. AG Details. ONE CENT and the chain are bold, and Liberty's profile down to the bust tip is clear. The 793 in the date is readable, as is a majority of UNITED STATES OF AMERICA. The mahogany-brown surfaces are evenly granular and a spot is noted on the chain above the N in ONE. The edges and rims are problem-free. Our EAC grade Basal State 1.

1793 Chain Cent, Fine Details  
S-3, AMERICA

- 3094 1793 Chain, AMERICA, S-3, B-4, Low R.3 — Environmental Damage — NGC Details. Fine. All legends are bold on this nicely defined Chain cent. The deep russet-brown surfaces are granular, particularly on Liberty's upper hair and the reverse border near 6 o'clock. Marks are few and far between, although a tick above the N in ONE provides an identifier. Our EAC grade Good 5.

1793 S-6 Cent, VF Details  
Vine and Bars Edge

- 3095 1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3 — Rim Damage — PCGS Genuine. VF Details. The Y of LIBERTY is above the forelock and a straight bulge extends from the edge at 9 o'clock to the hair — but not yet to the jawline — indicating Breen Die State 1. An edge dent beneath the Small Date as well as a gathering of other small edge imperfections determines the assigned net-grade. The surfaces are a bit microgranular, with flatness from wear and strike on the central portion of Liberty's hair, but otherwise this deep-brown example displays pleasing detail on both sides with no further problems and substantial appeal. Our EAC grade Good 6. PCGS# 35450 Base PCGS# 1347

- 3096** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3 — Environmental Damage — PCGS Genuine. Good Details. Although PCGS designates the coin as Good Details, the definition appears sharper in places, particularly on the date, trefoil, and UNITED STATES OF AMERICA. The deep brown and steel-gray surfaces are granular, and the reverse has a couple of pits near 5 o'clock. Our EAC grade Good 5. PCGS# 35456 Base PCGS# 1347

1793 Wreath Cent, Fine 15  
Vine and Bars Edge, S-9

- 3097** 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2, Fine 15 PCGS. A charming lavender-brown Wreath cent type coin. The legends are fully readable, although occasional letters are faint. Lightly abraded overall despite a minor obverse edge knock at 2 o'clock. A slender lamination (as made) passes through the E in ONE and the T in CENT. Our EAC grade VG10. PCGS# 35459 Base PCGS# 1347

1793 Wreath Cent, VF Details  
Vine and Bars Edge, S-10

- 3098** 1793 Wreath, Vine and Bars Edge, S-10, B-10, R.4 — Corrosion — NGC Details. VF. A nicely defined representative. The types are clear and all legends are bold except for LIBERTY, which is faint but readable. The deep lavender-brown surfaces are granular, as seen on many if not most examples of the date. Each side has a couple of small rim marks but no other detractors are evident. Our EAC grade Good 6.

1793 S-13 Liberty Cap Cent  
Good Details, Readable Legends

- 3099** 1793 Liberty Cap, S-13, B-20, Low R.4 — Smoothed — PCGS Genuine. Good Details. Although designated as Good Details, the legends are fully readable and most of the dentils are present. The blended sea-green and gunmetal surfaces have been burnished to reduce granularity from environmental exposure. No marks are apparent. On 1793 cents, the Liberty Cap type is much rarer than its Flowing Hair predecessor. Our EAC grade Fair 2. PCGS# 35489 Base PCGS# 1359

1793 Liberty Cap Cent, VG Details  
S-13, Rare First-Year Type

- 3100** 1793 Liberty Cap, S-13, B-20, Low R.4 — Scratched — NCS. VG Details. The BERT in LIBERTY is close and level. The Liberty Cap design is the rarest type on 1793 cents. The present deep brown example has full legends. LIBERTY, the date, the fraction, and most letters of the reverse legends are bold. The surfaces are moderately granular, and the obverse exhibits several lengthy, straight pinscratches, accompanied by smoothing on the portrait. Our EAC grade AG3.  
*Ex: Thrifty Scot Collection (Heritage, 9/2009), lot 47. PCGS# 35489 Base PCGS# 1359*

1794 S-26 Cent, AU53  
Head of 1794  
Partial Luster

- 3101** 1794 Head of 1794, S-26, B-16, R.2, AU53 NGC. Breen Die State VII with the die failing near the C in CENT. A clashed, cracked, and broken die state, but not yet terminal. A lovely chocolate-brown representative. No remotely consequential marks are apparent. Luster illuminates the hair and wreath. The eye appeal is substantial. Our EAC grade VF35. PCGS# 35543 Base PCGS# 901374

**1794 Cent, MS62 Brown  
S-26, Head of 1794**

- 3102 1794 Head of 1794, S-26, B-16, R.2, MS62 Brown NGC.** Breen Die State IV. A clashed intermediate die state with a chip above the I in AMERICA but no radial crack through the first S in STATES. A lustrous Liberty Cap cent with exceptionally pleasing surfaces. Toned medium brown with sea-green undertones. Unabraded except for a minor tick on the cheek and a thin mark concealed in the hair above the ear. Housed in an old pre-hologram holder. Our EAC grade AU50.  
*Ex: F.D. Taylor Collection (Henry Chapman, 6/1908), lot 27; Howard Newcomb Collection, Part I (J.C. Morgenthau, 2/1945), lot 38; L. Ward Hicks; Robert Bender; Cincinnati ANA Signature (Heritage, 7/1988), lot 47. PCGS# 35543 Base PCGS# 901374*

**1794 Head of 1794 Cent, XF40  
S-31, 'Marred Field' Variety**

- 3103 1794 Head of 1794, S-31, B-13, R.1, XF40 PCGS. CAC.** A well defined and problem-free sophomore-year cent with unabraded mahogany-brown surfaces. A good candidate for a quality Early American type set. The "Marred Field" variety with a slender vertical die break in the field beneath the cap. The lowest shoulder curl is repunched. Our EAC grade VF25. PCGS# 35558 Base PCGS# 901374

**1794 S-41 Cent, VF30  
Head of 1794  
Well-Defined Type Coin**

- 3104 1794 Head of 1794, S-41, B-30, R.3, VF30 PCGS.** Heavy radial cracks on the reverse at 9 and 11 o'clock promptly attribute this midgrade second-year cent. A well defined walnut-brown example, smooth save for granularity beneath the bust tip and on the leaf pair northeast of the T in CENT. Abrasions are essentially absent except for a hair-thin horizontal mark near the eye. Our EAC grade Fine 15. PCGS# 35588 Base PCGS# 901374

**1794 S-48 Starred Reverse Cent, AG3  
A Newly Discovered Example**

- 3105 1794 Starred Reverse, S-48, B-38, R.5, AG3 NGC.** This delightful Starred Reverse cent was consigned as a regular 1794 large cent with plans to be sold in one of our weekly Internet sales. However, our staff numismatists, who are always working for the benefit of our consignors, noticed the tiny stars visible on the reverse from 6 to 10 o'clock.

Although the reverse is worn nearly smooth, typical of the variety, this piece has splendid olive surfaces that are above average. The obverse is easily VG8, and the reverse is Fair 2. In his photo book, Bill Noyes records 48 Starred Reverse large cents, including one with Choice surfaces, two Average Plus, 12 Average, 18 Average Minus, and 15 Scudzy. We believe that the surfaces of this piece are among the 15 top examples. Our EAC grade Good 4. PCGS# 35705 Base PCGS# 1374

**1794 S-57 Cent, Choice XF  
Head of 1794, Buckled Dies**

- 3106 1794 Head of 1794, S-57, B-55, R.1, XF45 PCGS.** Linear depressions in the field near the profile attribute this interesting Sheldon variety. The reverse die is moderately buckled in several places. A nicely defined walnut-brown and gunmetal-gray example with lightly granular and minimally abraded surfaces. The curls, wreath, and legends exhibit glimmers of luster. Our EAC grade VF30. PCGS# 35633 Base PCGS# 901374

- 3107 1794 Head of 1794, S-59, B-57, R.3, VF25 PCGS.** A die crack across the lower reverse aids identification of the Sheldon marriage. Deep lavender fields contrast with tan-brown high points. Refreshingly free from detractors except for a small rim nick on the reverse at 4 o'clock. Our EAC grade Fine 15. PCGS# 35639 Base PCGS# 901374

**1794 Head of 1794 Cent, VF30  
S-65, Later Die State**

- 3108 1794 Head of 1794, S-65, B-51, R.1, VF30 NGC.** Breen Die State VII. The Shielded Hair variety, also attributable in the present die state by the linear breaks near the second S in STATES, the final A in AMERICA, and the 1 and 9 in the date. An attractive deep brown cent with minimally abraded and only mildly granular surfaces. Our EAC grade Fine 15. PCGS# 35654 Base PCGS# 901374

**1795 Plain Edge Cent, Well-Defined XF40**

- 3109 1795 Plain Edge, S-78, B-8, R.1, XF40 NGC.** One of the more available Plain Edge varieties, distinguished by the T in LIBERTY appearing over the curl and the Y over the forehead. Reddish-brown patination covers both sides of this XF large cent, and each exhibits well-defined design elements, including clear detail in Liberty's eye. The surfaces on each side are quite clean. Our EAC grade VF25. Census for the variety: 3 in 40, 7 finer (12/14). PCGS# 35729 Base PCGS# 1380

**1796 Liberty Cap Cent, VF30**  
**Very Scarce Sheldon-82**

- 3110** 1796 Liberty Cap, S-82, B-3, R.5, VF30 PCGS. Sheldon-82 ranks among the rarest 1796 Liberty Cap varieties. The present medium brown example is well defined, especially on the curls behind Liberty's neck. Verdigris is minimal, although close inspection reveals several thin marks near the profile and the right side of the wreath. Our EAC grade VF20. PCGS# 35753 Base PCGS# 1392

- 3111** 1796 Reverse of 1797, S-94, B-30, Low R.6 — Reverse Damage, Corroded — NCS. VF Details. A rare Sheldon marriage, interesting for its clash marks beneath the chin and hair ribbon. This deep brown example has a diagonal scratch on the reverse, and both sides are evenly granular. Sharper than most known, with substantial hair definition. Our EAC grade Good 6.  
*Ex: Public Auction Sale (Stack's, 10/1982), lot 620; Wes Rasmussen Collection (Heritage, 1/2005), lot 3107, which realized \$2,300. PCGS# 35843 Base PCGS# 1407*

**1796 Cent, Fine Details**  
**Rare S-95, Reverse of 1795**  
**Ex: Jules Reiver**

- 3112** 1796 Reverse of 1795, S-95, B-35, High R.5 — Corroded — NCS. Fine Details. Breen Die State II. A deep gunmetal-gray cent with unabraded but evenly granular surfaces. Well defined except for weakness on OF. A very difficult variety to locate in any grade. Our EAC grade Good 6.  
*Ex: Denis W. Loring, 4/1972; Jules Reiver Collection (Heritage, 1/2006), lot 19272, which realized \$2,530. PCGS# 35819 Base PCGS# 1401*

- 3113** 1796 Reverse of 1797, S-114, B-42, Low R.5 — Corroded — NCS. VF Details. Breen Die State I, R.5. This is the earliest obverse die state, without rim breaks or die cracks. OF and the bust tip are lightly brought up but the remainder of the design is well defined. A pair of hair-thin horizontal marks above CENT, and the deep gray surfaces are moderately granular. Our EAC grade VG8.  
*Ex: ANA Sale (Abe Kosoff, 8/1953), lot 128; Dr. Charles Ruby (Superior, 2/1975), lot 107; Charles Blood; 1985 Early American Coppers Sale, lot 128; Wes Rasmussen Collection (Heritage, 1/2005), lot 3130, which realized \$2,070. PCGS# 35858 Base PCGS# 1407*

**1797 S-134 Cent, Choice VF**  
**Reverse of 1797, Stems**

- 3114** 1797 Reverse of 1797, Stems, S-134, B-4, R.4, VF35 PCGS. A late die state with a heavy crack through the E in AMERICA, a large die lump on the field beneath the chin, and a rim cud near the bust tip. A pleasing walnut-brown example with minor granularity and a few faded hair-thin field marks. Our EAC grade VF20.  
*Ex: Orlando FUN Signature (Heritage, 1/2009), lot 197, which realized \$2,530. PCGS# 35933 Base PCGS# 1422*

**1797 S-140 Cent, AU50**  
**Reverse of 1797, Stems**

- 3115** 1797 Reverse of 1797, Stems, S-140, B-22, R.1, AU50 PCGS. The obverse die is sinking at the borders, creating cracks and bulges. OF is weak due to metal flow into the swollen bust tip area of the obverse. This medium brown cent has pleasing surfaces, and is well struck given the late die state. Marks are absent aside from ticks west of the hair ribbon and above the N in ONE. Our EAC grade XF45. PCGS# 35951 Base PCGS# 1422

- 3116** 1798 Second Hair Style, S-166, B-32, R.1, XF45 PCGS. The heavy diagonal reverse die crack between 5:30 and 9 o'clock confirms the distinctive Sheldon variety. Medium to deep gunmetal and olive toning embraces lightly abraded and partly lustrous surfaces. Our EAC grade VF25. PCGS# 36068 Base PCGS# 1434

- 3117** 1798 Second Hair Style, S-166, B-32, R.1, XF45 PCGS. Promptly attributed by the heavy diagonal crack between the fraction and the E in UNITED. A small planchet defect is located atop the E in LIBERTY. Luster emerges from the hair and wreath, and the medium brown toning occasional cedes to tan. A scarce issue in better circulated grades. Our EAC grade VF25.  
*Ex: Dallas Signature (Heritage, 10/2009), lot 79. PCGS# 36068 Base PCGS# 1434*

**1798 S-166 Large Cent, MS63 Brown  
Second Hair Style, Large 8  
Recognized Condition Census Coin**

- 3118 1798 Second Hair Style, S-166, B-32, R.1, MS63 Brown PCGS.** Breen Die State IV. A long and distinguished pedigree accompanies our offering of this renowned Sheldon-166 cent. The list of owners ranges from Howard R. Newcomb to Jim McGuigan, with the coin changing hands a few times at auction, and many times by private treaty. It is listed second in the Breen Condition Census and tied for third in the Noyes Census.

A diagonal die crack on the reverse from the rim through E(D) of UNITED, to the leaves, stem, ribbon, numerator, and final 0 of the fraction, and to the rim is diagnostic of the variety, which is extremely rare without the crack. A slight bulge in the field behind the Liberty's curls and multiple areas of die clashing combine with a rim break above ST of STATES and a chip out of E(D) to confirm the late die state. The obverse is minimally off-center north, with resultant weakness at LIBERTY. The surfaces are beautifully smooth, lustrous, and iridescent with light and dark-olive patina. A small nick on the second S of STATES and a thin planchet defect from E of LIBERTY to the eye do not diminish the exceptional quality of this early cent. The reverse is plated in *Early American Cents* and in *Penny Whimsy*. Our EAC grade MS60.  
Ex: Howard R. Newcomb; Morgenthau Sale #458 (2/1945), lot 229; James Kelly; Celina Coin Co. Sale #21 (3/1947), lot 2041; James Kelly; Hollinbeck Kagin; C. Douglas Smith; Louis Helfenstein; Lester Merkin Sale (8/1964), lot 16; C. Douglas Smith; Bob Shalowitz; Ken Pines; Mike Rubin; Mike Lessans; Greg Holloway; Julian Leidman; Jim McGuigan. PCGS# 36068 Base PCGS# 1434

- 3119 1798 Second Hair Style, S-179, B-37, R.2, XF40 NGC.** This die marriage pairs the "high 98" obverse with the "blundered E" reverse. A die crack rises from atop Liberty's hair to between IB and a die chip in the field below L. This lovely coin is medium-brown with pewter highlights. The upper rims are a bit weak on both sides, but the strike is robust and there are minimal marks to quibble about. Our EAC grade VF30.

Ex: George Ramont (9/20/1969); Jules Reiver Collection (Heritage, 1/2006), lot 19423. PCGS# 36104 Base PCGS# 1434

- 3120 1798 Second Hair Style, S-187, B-40, R.1, XF40 NGC.** Ex: Jules Reiver Collection. Sharply defined for the designated grade with luster throughout the curls, wreath, and legends. The deep tan-brown surfaces are minimally marked aside from a subtle rim ding on the obverse at 7 o'clock. Our EAC grade VF30.

Ex: Jules Reiver Collection (Heritage, 1/2006), lot 19439; Orlando FUN Signature (Heritage, 1/2009), lot 207. PCGS# 36128 Base PCGS# 1434

**1799 S-189 Cent, VG Details  
Struck 30% Off Center**

- 3121 1799 S-189, B-3, R.2 — Repaired, Struck 30% Off Center — PCGS Genuine. VG Details.** A number of off center large cents are known, but a widely off center 1799 is unlikely to appear again in the market for many years. 30% off toward 11:30, with LIBERTY, UNITED, and the fraction absent from the coin. Both sides exhibit a broad arc of unstruck surface. Designated as Repaired by PCGS, but the glossy medium brown and cobalt-blue surfaces are better described as pitted and burnished. The pits display glimpses of aqua verdigris. Liberty's hair is well defined for the VG level, and the reverse legends (where present) are sharp. Our EAC grade Good 4. PCGS# 36140 Base PCGS# 1443

- 3122 1801 3 Errors, S-219, B-11, R.2, Genuine PCGS.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been cleaned. The deep tan-brown surfaces are attractive to the unaided eye, but a loupe reveals myriad faint field hairlines. A popular *Guide Book* variety with a blundered fraction, missing right stem, and inverted and repunched U in UNITED. Our EAC grade Fine 12.

**1802 S-232 Cent, Choice AU  
Impressive Eye Appeal**

- 3123 1802 S-232, B-12, R.1, AU55 PCGS.** The sizeable cud above the AT in STATES promptly attributes this cent as S-232. A well defined medium chocolate-brown example with exemplary surfaces and excellent eye appeal. Metal flow into the reverse cud during the strike causes minor weakness opposite near the 1 in the date, as made. Our EAC grade XF40. PCGS# 36305 Base PCGS# 1470

- 3124 1802 No Stems, S-241, B-20, R.1, XF45 PCGS.** Although the famous "Three Errors" variety is the reverse shared by S-218 and S-219, the S-241 equally deserves the nickname. The stems are absent, there are two fraction bars, and the second S in STATES is widely repunched. The letter M from AMERICA is clashed into the obverse at 4 o'clock. A medium brown cent with luster in Liberty's hair and vein detail on the leaves near the E in ONE. Our EAC grade VF25. Population: 5 in 45, 7 finer (12/14).  
*Ex: Long Beach Signature (Heritage, 9/2009), lot 59. PCGS# 36347 Base PCGS# 1476*

**1803 S-254 Cent, MS60 Brown  
Small Date and Fraction**

- 3125 1803 Small Date, Small Fraction, S-254, B-13, R.1, MS60 Brown NGC.** A multiply clashed but nonetheless early die state, without any cracks. Faded red outlines design elements, although this satiny example is principally medium brown. Essentially unabraded except for a couple of thin marks on Liberty's neck. The reverse peripheral legend has defective Ts, missing the right foot on that letter. Defective Ts, likely from the same punch, are present on the reverses of all 1803/2 half eagles. Our EAC grade AU50. PCGS# 36377 Base PCGS# 1482

**1803 S-258 Cent, AU55  
Large Fraction, Small Date**

- 3126 1803 Small Date, Large Fraction, S-258, B-17, R.1, AU55 PCGS.** The arc-shaped crack on the field near the hair ribbon, and a spur from the D in UNITED, are characteristic of the collectible S-258. The usual clashed die state. A chocolate-brown and olive cent with unmarked surfaces. Liberty's curls exhibit substantial luster. Our EAC grade XF45. PCGS# 36398 Base PCGS# 1485

**1803 S-258 Cent, MS61 Brown  
Small Date, Large Fraction  
Ample Mint Red**

- 3127 1803 Small Date, Large Fraction, S-258, B-17, R.1, MS61 Brown PCGS.** A highly pleasing Draped Bust type coin. The surfaces are lustrous, smooth, and well struck. Although designated as Brown, substantial mint red lingers in design crevices, especially on the reverse. The remainder of the cent is olive-gold and lime-green. Marks are absent aside from two thin lines, one each on the cheek and beneath the AT in STATES. Our EAC grade XF45. PCGS# 36398 Base PCGS# 1485

- 3128 1804 S-266c, B-1, R.2 — Repaired — PCGS Genuine. Fine Details.** The die break above MERIC is tooled. The break above RTY was left as is, but the obverse is burnished and shows a thin horizontal mark above the date. The obverse margin is pitted at 3 and 4 o'clock. The reverse is moderately granular. A key date. Our EAC grade Good 4. PCGS# 36422 Base PCGS# 1504

**1806 Draped Bust Cent, MS62 Brown  
S-270, The Only Variety of the Year**

- 3129 1806 S-270, B-1, R.1, MS62 Brown PCGS.** *Ex: Joshua and Ally Walsh.* A low- to mid-Condition Census coin, the dark olive-brown surfaces retain much glossiness on each side, and are essentially mark-free. A bit softly struck on the lowest hair curls, and on a few of the peripheral letters, otherwise well-balanced and sharp. Our EAC grade AU55. Population for specified and non-specified S-270 cents: 3 in 62 Brown, 2 finer (11/14).  
*Ex: Joshua and Ally Walsh Collection of United States Cents / FUN Signature (Heritage, 1/2006), lot 575.*  
*From The Ally Collection.* PCGS# 36436 Base PCGS# 1513

1809 S-280 Cent, AU53  
Advanced Die State

- 3130** 1809 S-280, B-1, R.2, AU53 NGC. Breen Die State VII. A single die pair produced the entire mintage, with multiple stages of wear and die deterioration visible by die state. Deep walnut-brown toning embraces this late dies example. The fields are impressively void of most abrasions, and the portrait has only a few faint marks. Classic Head cents are notoriously difficult to secure in quality grades, and this lightly circulated piece will satisfy the devoted specialist. Our EAC grade VF35.  
Ex: FUN Signature (Heritage, 1/2009), lot 247. PCGS# 36466 Base PCGS# 1546

1809 S-280 Cent, AU58  
Conditionally Rare Date

- 3131** 1809 S-280, B-1, R.2, AU58 NGC. Breen Die State V with a diagonal crack through the E in STATES and a ridge through star 11. A walnut-brown cent with attractive surfaces. The strike is bold except on the left borders. A small flan depression is noted on the cheek. The only known dies for this conditionally rare date. Our EAC grade VF35. PCGS# 36466 Base PCGS# 1546
- 3132** 1810 S-282, B-3, R.2, XF40 NGC. Ex: Jules Reiver Collection. A lovely deep brown representative with moderate high point wear and problem-free surfaces. The obverse is misaligned a few degrees toward 10 o'clock. Our EAC grade VF20.  
Ex: George Ramont (2/17/1995); Jules Reiver Collection (Heritage, 1/2006), lot 19635. PCGS# 36475 Base PCGS# 1549

1810 S-284 Cent, MS62 Brown  
Smooth Mahogany Surfaces

- 3133** 1810 S-284, B-5, R.3, MS62 Brown NGC. S-284 is the scarcest die marriage of the date, and is readily attributed by the placement of the second S in STATES relative to the leaf below. The present satiny cent displays deep mahogany-brown toning. The strike is crisp except on the upper left stars, and marks are confined to a few wispy lines near an obverse spot at 10:30. Our EAC grade XF45. PCGS# 36481 Base PCGS# 1549

1811 S-287 Cent, MS61 Brown

- 3134** 1811 S-287, B-1, R.2, MS61 Brown NGC. A type that is quite challenging to locate in the finer circulated and Mint State grades, since most examples were struck on inferior quality planchets. But the present coin has pleasing deep mahogany-brown surfaces. Satiny and well struck with a small spot at 6:30 and a few minor marks above the N in ONE and beneath the E in CENT. Struck slightly off center toward 2 o'clock, but only dentil width is affected. Our EAC grade AU55.  
Ex: Denver Signature (Heritage, 8/2006), lot 168. PCGS# 36496 Base PCGS# 1555

1812 Cent, MS62 Brown  
Small Date, S-290  
Important Conditional Rarity

- 3135** 1812 Small Date, S-290, B-2, R.1, MS62 Brown NGC. The dramatic die erosion above STATES is diagnostic for S-290. Deep, consistent walnut-brown toning embraces this satiny Classic cent. Essentially unabraded aside from a slender and brief mark above the 8 in the date. A hint of granularity is noted near the ME in AMERICA. The strike is good, although 5 through 7 are incompletely impressed. Our EAC grade MS60.  
Ex: Long Beach Central States (Heritage, 5/2009), lot 72, which realized \$8,625. PCGS# 36499 Base PCGS# 1561
- 3136** 1814 Crosslet 4, S-294, B-1, R.1, XF45 PCGS. The two die pairs used to coin 1814 cents are readily distinguished by the style of the 4 in the date (crosslet versus plain 4). Uniform brown-lavender toning resides on the minimally abraded surfaces of this well-defined large cent. Our EAC grade XF40. PCGS# 36520 Base PCGS# 1573
- 3137** 1816 N-2, R.1, MS64 Brown PCGS. CAC. An intermediate die state with faint cracks on the reverse legend, but no rim breaks between stars 11 and 12. Generally toned olive-green, but many remnants of mint red cling to letters and stars. Our EAC grade MS60. PCGS# 36526 Base PCGS# 1591

**1816 N-2 Cent, MS65 Brown  
Smooth Fields, Booming Luster**

- 3138 1816 N-2, R.1, MS65 Brown PCGS. CAC.** All examples of N-2 have a rim break between stars 8 to 10, but the present Gem is a later die state with a second rim break at 4 o'clock. The N in ONE is recut. Lustrous and minimally marked with ample mint red outlining design elements. Olive-green and lavender are also prevalent. A few left-side stars are incompletely impressed. Higher quality than most Randall Hoard representatives. Our EAC grade MS60. PCGS# 36526 Base PCGS# 1591

- 3139 1819 Small Date, N-9, R.1, MS64 Brown PCGS.** A chocolate-brown near-Gem that boasts sweeping luster and a good strike. The reverse is essentially devoid of marks, and the left obverse displays only inconsequential contact. The early die state with the TA in STATES connected, and strong repunching on the R in AMERICA. Our EAC grade MS60. PCGS# 36652 Base PCGS# 1606

- 3140 1820 Large Date, N-13, R.1, MS65 Brown PCGS. CAC.** A lustrous and unspotted walnut-brown, sea-green, and powder-blue cent. The reverse is devoid of abrasion, and the left obverse exhibits only pinpoint marks. N-13 is the most prevalent variety from the Randall Hoard, but the coin is nonetheless desirable as a Gem example of the Matron Head type. Our EAC grade MS60. PCGS# 36673 Base PCGS# 1615

**1823 Restrike Cent, MS64 Red and Brown  
N-3, Middle Die State**

- 3141 1823 Restrike, N-3, R.2, MS64 Red and Brown PCGS.** A Newcomb-2 1823 obverse die was muled with an S-293 1813 reverse and privately struck during the 19th century. The rusted and broken dies were initially sold by the Mint as scrap metal. The dies still exist and are in possession of the American Numismatic Association museum. A middle die state for N-3, without the cud above star 7, the radial obverse crack at 7:30, or the curved crack above ONE. Many examples show tooling on the obverse cud, but the present piece has not been tampered with. It also retains substantial mint red, although the portrait high points and central reverse are powder-blue. Our EAC grade MS63. PCGS# 81629

**1826 Large Cent, MS66 Brown  
Arguably the Finest-Known N-6  
Bold Strike With Cartwheel Luster**

- 3142 1826 N-6, R.2, MS66 Brown PCGS. CAC.** Ex: Naftzger Collection. Lustrous, medium-brown surfaces flash with blue, magenta, and olive-gold accents over the boldly struck surfaces. From an early state of the dies, with diagnostic areas of die rust near star 4, behind the ear, and adjacent to the first A in AMERICA, although other evidence of rust includes scattered pinpoint lumps and pits that are visible with a glass and distributed across both sides.

As expected for the Premium Gem grade, the visual impact of this outstanding cent is impressive. Mint luster rolls across the surfaces in cartwheel fashion, revealing iridescent shades over the deep-seated, rich patina. The central strike is particularly bold on Liberty, the wreath, and ONE CENT. Some rounding of stars 6 through 9 is evident, but none of the associated rim crumble. Tied for Condition Census #1 in the Noyes census, and alone as finest-known by Bland. Our EAC grade MS65.

Ex: Hall; Virgil M. Brand; New Netherlands Coin Company; Emmanuel Taylor 10/1960; Naftzger Collection (Goldberg, 2/ 2009), lot 176. PCGS# 36826 Base PCGS# 1645

**1833 N-4 Cent, MS64 Red and Brown  
Ex: Naftzger, Among Finest Known**

- 3143 1833 N-4, R.4, MS64 Red and Brown PCGS.** Ex: Naftzger Collection. Attributed by: the bases of ER in LIBERTY joined, a dot high between TA in STATES, and a crack from ICA through the lower ribbon. Considerable orange-gold luster remains on both sides, each of which exhibits sharply struck design elements. The surfaces reveal just a couple minute grade-consistent marks and are devoid of mentionable spots. Pleasing overall eye appeal. Our EAC grade MS62. Population for the variety: 1 in 64 Red and Brown, 0 finer (12/14).

Ex: GENA Sale (Pine Tree Auctions, 9/1973), lot 147; Julian Leidman; Myles Z. Gerson; Purchased by Naftzger from Stanley Kesselman, 7/1980; Naftzger Collection (Ira & Larry Goldberg, 2/2009), lot 284. PCGS# 37028 Base PCGS# 1697

**1837 N-7 Cent, MS67 Brown  
Plain Cords, Medium Letters  
Ex: John Jay Pittman**

- 3144 1837 Plain Cords, Medium Letters, N-7, N-8, R.1, MS67 Brown NGC.** Ex: Pittman. The later, lapped die state (Newcomb's #7). The die crack across STATES OF is bold. A beautiful Superb Gem with vibrant luster and unabraded surfaces. Blended sea-green and chocolate-brown toning is uniform aside from glimpses of the initial fire-red in recessed areas of the right reverse. The present coin was cataloged by David Akers for its Pittman auction appearance as "literally flawless," although for pedigree purposes we note a tiny spot on the rim near star 12. Our EAC grade MS60+.

Ex: John Jay Pittman Collection, Part One (David Akers, 10/1997), lot 227; Milwaukee Central States Signature (Heritage, 4/2010), lot 76. PCGS# 37162 Base PCGS# 1735

**1839 N-9 Silly Head Cent  
MS65 Red and Brown  
Important Unlisted Early Die State**

- 3145 1839 Silly Head, N-9, R.2, MS65 Red and Brown PCGS.** CAC. A splendid and exceptionally preserved Gem that retains ample orange-gold color. Well struck except for the dentils. The delicate diagonal crack on the portrait allows prompt attribution. The die lines near star 7 are also identifiers. The reverse border displays heavy curved die lines, particularly heavy near the M in AMERICA. The reverse die was lapped early in its life, removing those die lines, which are undescribed in the Noyes, Wright, and Newcomb references. Our EAC grade MS64. PCGS# 37235 Base PCGS# 1749

- 3146 1839 Booby Head, N-11, R.1, MS64 Brown PCGS.** CAC. This chocolate-brown and steel-gray Booby Head cent has satin luster and a good strike. Faint thin marks are noted at the top of the neck and on the lower right reverse quadrant. Our EAC grade AU55. Ex: Fort Worth ANA Signature (Heritage, 3/2010), lot 147. PCGS# 37246 Base PCGS# 1751

**1839 Booby Head Cent, MS66 Brown  
Ex: Dupont-Oechsner-Rasmussen**

- 3147 1839 Booby Head, N-11, R.1, MS66 Brown NGC.** Late Die State. Ex: Rasmussen. The borders on both sides are weak, with considerable rim crumbling and a small rim break on the obverse adjacent to stars 2 and 3. Attractive olive and steel color with considerable orange mint luster. In the Dupont catalog, Sheldon gave this cent a similar description: "mint red and light olive. Borders weakly struck up, and one insignificant nick near eleventh star, but choice." This example is tied with a few others for fourth finest known of the die marriage. Our EAC grade MS63. Ex: Charles Dupont; Stack's (9/54), lot 805; Herbert Oechsner (Stack's, 9/88), lot 166; John J. Nicholas (Superior, 2/92), lot 622; Wes Rasmussen Collection / FUN Signature (Heritage, 1/2005), lot 3726. PCGS# 37246 Base PCGS# 1751

---

1840 N-6 Large Cent, MS64 Red and Brown  
Large Date, Mostly Red

**3148** 1840 Large Date, N-6, R.1, MS64 Red and Brown PCGS. CAC. Ex: Naftzger Collection. The surfaces are predominantly a vibrant mint red, with umber-brown shades on the high points of the devices and creeping into the lustrous fields. A thin, struck-trough line touches the upper points of star 4 from the edge and extends at the forelock, as made and described in Noyes. Faint evidence of an obverse fingerprint is in the same area. Struck from a later state of the die but with repunching on the 40 still clear. Called MS65 and ranked second in the Noyes census, and #3 in the Grellman census. Our EAC grade MS63.

Ex: Dr. George P. French; B. Max Mehl 1929 *Fixed Price List*; lot 603-B; Max Mehl (4/1947); *The Ted Naftzger Collection* (Goldberg, 9/2009), lot 610. PCGS# 395835 Base PCGS# 1821

1842 N-8 Large Date Cent, MS64+ Red  
Early Die State  
Among the Finest Known

**3149** 1842 Large Date, N-8, R.1, MS64+ Red PCGS. Prominent die lines in various directions connect the letters of ONE CENT on the reverse of this early die state cent. While N-8 is a plentiful variety of 1842 large cents, few examples are as fine as this piece. Even for the date, examples with full Red mint luster are nearly impossible to locate, PCGS has only certified eight examples with the Red designation. During the past two decades, we have only example 10 Red 1842 cents, and none of those are from the N-8 die pair. This example is finer than the Dan Holmes coin that Grellman called tied for CC#7, and it is visually finer than the Naftzger coin that he called tied for CC#3. Our EAC grade MS63. PCGS# 1837

---

**1842 Large Date Cent, MS66 Red and Brown  
N-8, Condition Census**

- 3150 1842 Large Date, N-8, R.1, MS66 Red and Brown PCGS.** Grellman Die State B. A diagonal point from the upper right foot of the N in ONE attributes the variety. The Large Date is readily distinguished from its Small Date counterpart, since the 4 in the date has a crosslet on the former and is plain on the latter. This well struck and splendidly preserved Gem has substantial original crimson color on each side, while the exposed fields and portrait have lilac color on the obverse and turquoise hues on the reverse. Our EAC grade MS63. Population for all Red and Brown Large Dates: 2 in 66 Red and Brown, 0 finer (11/14).  
Ex: Joshua and Ally Walsh Collection of United States Cents / FUN Signature (Heritage, 1/2006), lot 3034.  
From The Ally Collection. PCGS# 405825 Base PCGS# 1836

**1844 N-6 Large Cent, MS62 Brown  
Struck 15% Off-Center**

- 3151 1844 N-6, R.3 — Struck 15% Off-Center — MS62 Brown NGC.** This important large cent error is off-center toward 4 o'clock, 15% per the NGC holder, and we agree with that assessment. Both sides have satiny medium brown surfaces with traces of red, and a few small splashes of corrosion on the obverse. Our EAC grade AU50. PCGS# 397734 Base PCGS# 1856

**1847 N-15 Cent, MS64 Red**

**Finest Known Example**

**Ex: Newcomb-Starr-Naftzger Collections**

- 3152 1847 N-15, High R.4, MS64 Red PCGS.** Ex: Naftzger Collection. The 7 in the date is repunched southeast. The 1 in the date is repunched south. A distinctive and scarce Newcomb marriage. This lustrous peach-gold high-grade example has a good strike. A spot above star 1 provides an identifier, and the only abrasion is a trivial tick on the obverse rim at 11:30. Both Grellman and Noyes grade it MS65 and rank it as CC#1. The Noyes photo is #31435. Our EAC grade MS64.  
Ex: Howard R. Newcomb; Floyd T. Starr (Stack's, 6/1984), lot 517; R.E. Naftzger, Jr. (Ira & Larry Goldberg, 9/2009), lot 776. PCGS# 37306 Base PCGS# 1879

- 3153 1848 N-31, R.2, MS65 Brown PCGS. CAC.** Grellman Die State b. Newcomb-31 is distinctive for its die erosion throughout the reverse periphery. This coruscating olive-brown Gem shows glimmers of mint red in protected regions. Virtually void of contact, although tiny spots are west of the C, and north of the E, in CENT. Our EAC grade MS60. PCGS# 406521 Base PCGS# 1883

**1848 Cent, MS66 Red and Brown  
N-35, Mark-Free Surfaces**

- 3154 1848 N-35, R.2, MS66 Red and Brown PCGS.** Grellman Die State b. A point from the hair beneath star 6 is characteristic of N-35. The present high grade representative has a full Red reverse. The obverse margin is also chiefly Red, although the portrait and open field are Brown. Lustrous and unabraded with a good strike and minimal carbon. Our EAC grade MS63. PCGS# 406529 Base PCGS# 1884

- 3155 1850 N-7, R.2, MS65 Red and Brown PCGS. CAC.** A shallow lump on the throat under jawline and a lump on the upright of E in CENT confirm the variety. Considerable orange-gold luster is evident on the tan surfaces of this Gem. The design elements are well-struck except for the usual softness in the star centers. Devoid of mentionable marks or spots. Our EAC grade MS63. Population for the variety: 3 in 65 Red and Brown, 1 finer (12/14). PCGS# 405881 Base PCGS# 1890

- 3156 1851/81 N-3, R.1, MS64 Red and Brown PCGS.** Grellman Die State b. A middle to late die state that shows remnants of the inverted date near the ball of the 5 and right of the upright of the second 1. A magnificently toned fire-red, sea-green, powder-blue, and olive-brown near-Gem. The strike is sharp, abrasions are absent, and only a small spot beneath star 5 limits the grade. Our EAC grade MS63. PCGS# 400139

1857 Cent, MS65 Red and Brown  
N-4, Small Date, Virtually Unabraded

- 3157 1857 Small Date, N-4, R.1, MS65 Red and Brown PCGS. CAC. Grellman Die State a, "scarce." Orange-gold outlines design elements of this splendidly preserved Gem. The high points and open fields are steel-gray. A mint-made strike-through is east of the T in CENT, but both sides are virtually void of contact. An exceptional example from the waning days of the large cent. Our EAC grade MS64. PCGS# 403970 Base PCGS# 1932

1857 N-4 Small Date Large Cent  
MS66 Red and Brown

- 3158 1857 Small Date, N-4, R.1, MS66 Red and Brown PCGS. Grellman Die State a to b. An unlisted intermediate die state without clash marks or a die line from star 1. An unabraded and spot-free high grade type cent. The reverse is orange-red except for the brown high points. The obverse is mostly steel-blue but shows fire-red in design recesses. A strike-through (as made) is noted east of the E in ONE. Our EAC grade MS63. PCGS# 403970 Base PCGS# 1932

## PROOF LARGE CENT

1857 Large Cent, PR66 Brown  
Small Date, N-3

- 3159 1857 Small Date PR66 Brown PCGS. N-3, Low R.5. A bold die line (as made) on Liberty's bust truncation confirms the proof-only variety. The dentils and stars are needle-sharp and LIBERTY is fully struck. The glossy chocolate-brown surfaces are beautifully preserved and devoid of contact. For pedigree purposes we note a trio of minute flecks near the edge of the neck. The 1857 is more available in proof format than earlier large cent dates, but most survivors are clustered in PR63 to PR65 grades. Our EAC grade PR60. Combined N-3 and N-5 Population: 4 in 66 Brown, 1 finer as 66 Red and Brown (4/14).  
Ex: *New York Bullet* (Heritage, 11/2003), lot 74. NGC ID# 2275, PCGS# 2000

## FLYING EAGLE CENTS

1857 Flying Eagle Cent, MS65  
Luminous, Shimmering Surfaces

- 3160 1857 MS65 NGC. The 1857 is the most often seen issue in the short-lived Flying Eagle cent series, if only slightly more plentiful than the 1858, but Gem and finer coins are nonetheless elusive. This piece displays satiny, bronze-gold luster and is devoid of mentionable abrasions. Some minor weakness on the eagle's tailfeathers and the corresponding portion of the wreath is not unusual for the issue, while the rest of the design elements are well brought up. NGC has seen 14 numerically finer representatives (12/14). NGC ID# 2276, PCGS# 2016

1857 Flying Eagle Cent, MS65  
Generous Luster

- 3161 1857 MS65 PCGS. Eagle Eye Photo Seal, card included. Beautiful luster emanates from orange-tan surfaces on each side, with a bold central strike and some weakness around D STA on the obverse periphery. A small die crack on the reverse runs from the wreath at 2:30 to the rim. A great-looking example of this classic early type, seldom seen in higher numeric grades. PCGS shows only 16 in MS66 (12/14). NGC ID# 2276, PCGS# 2016

1857 Flying Eagle Cent, Lovely Gem

- 3162 1857 MS65 PCGS. Eagle Eye Photo Seal, card included. The obverse of this piece is nicely struck, medium brown but showing some glints of lighter luster at the rim and in the eagle's midsection. There are no flecks above the minuscule level. The reverse shows a similar appearance save that there is more-abundant luster on each side of the wreath. This lovely Gem is certified in an early small-size PCGS green-label holder. PCGS shows only 14 numerically finer (12/14). NGC ID# 2276, PCGS# 2016

- 3163** 1857 Obverse Die Clash with Seated Half, Snow-9, FS-402, MS64 ANACS. The inverted outline of a seated Liberty is apparent on the right obverse field. One of three curious clashes from other denominations available on 1857 Flying Eagle cents. A satiny and minimally abraded walnut-brown near-Gem. Housed in an old small-size holder with the obsolete *Cherrypickers'* attribution FS-003. PCGS# 37375

**1857 Flying Eagle Cent, Snow-9, MS65  
Obverse Clashed Against a Seated Half Die**

- 3164** 1857 Obverse Die Clash with Seated Half, Snow-9, FS-402, MS65 PCGS. Eagle Eye Photo Seal, card included. The 1857 Flying Eagle cents with obverse die clashes against various other denominations — known for 1857 are clashes from Liberty Head quarters and half dollars (as here), and Liberty Head double eagles — are a fascinating series of error coins. Their production can teach us much about varieties and which coin series used which dies in the respective hammer (upper) and anvil (lower) positions, as Chris Pilliod has demonstrated in the April 1996 *Numismatist*. The whole subject receives excellent coverage in Rick Snow's *Guide Book of Flying Eagle and Indian Head Cents* on pages 58-62.

The obverse of the cent here shows what looks like an extremely bold die crack along its extreme right side, but it is, in fact, the clash of the right (facing) arm of Liberty and a small upper portion of rock beneath. The long slope of Liberty's left (facing) leg connects the underside of the eagle's wing with the upper beak, for a bit of added cognitive dissonance.

This is a lovely, lustrous medium orange-tan Gem example of this mind-boggling error, one showing top-notch eye appeal, a bold strike, and no mentionable distractions. Population: 5 in 65 (1 in 65+), 0 finer (12/14). PCGS# 37375

**1858 Flying Eagle Cent, MS65  
Large Letters Obverse**

- 3165** 1858 Large Letters MS65 PCGS. High Leaves Reverse, Closed E in ONE. Lustrous light tan surfaces exhibit splashes of violet and gold toning on each side of this satiny Gem. The eagle's beak is slightly weak with all other details sharper. A few minor carbon flecks require a loupe to view. PCGS has only certified 29 numerically finer examples (12/14).  
From *The Mile High City Collection*. NGC ID# 2277, PCGS# 2019

- 3166** 1858 Small Letters MS64 PCGS. Low Leaves, Open E in ONE. A splendid example that boasts a sharp strike and sweeping luster. The peach-gold surfaces are only slightly mellowed and display minimal carbon and contact. Boldly clashed on the upper obverse from the wreath. NGC ID# 2279, PCGS# 2020

**1858 Small Letters Cent, Attractive MS65  
Conditional Rarity**

- 3167** 1858 Small Letters MS65 PCGS. Eagle Eye Photo Seal, card included. Low Leaves, Open E in ONE. Copious luster appears on this orange-tan Gem 1858 Small Letters cent, a coin that will see considerable interest from series specialists. The surfaces are quite clean for the grade. There are some faint die clash marks above and to the rear of the upper wing on the obverse, and the reverse die is rotated about 40 degrees counterclockwise from normal coin turn. A sharply struck and thoroughly attractive coin. Population: 72 in 65, 9 finer (12/14). NGC ID# 2279, PCGS# 2020

**PROOF FLYING EAGLE CENTS**

**1856 Flying Eagle Cent, PR30  
Snow-9, Problem-Free**

- 3168** 1856 Snow-9 PR30 PCGS. CAC. The first small cent date is also the key to a date collection of the denomination. A famous mint rarity since the late 1850s, when every American numismatist aspired to own at least one example. The Snow-9 dies are associated with proofs, but the present specimen made its way into circulation and displays wear on the eagle's breast and tail. The chocolate-brown surfaces are nonetheless only lightly abraded. PCGS# 147890 Base PCGS# 2037

**1856 Flying Eagle, Snow-9, PR63  
Tack-Sharp and Attractive**

- 3169 1856 Snow-9 PR63 PCGS.** Snow-9 is the most plentiful variety for this issue, likely produced during the restrike period from late 1857 to 1860. This variety is also the most plentiful among those 1856 Flying Eagle cents that have been attributed as proofs, which corresponds well with the proposed striking period. A thin die line in the eagle's forward wing feathers and a small die gouge at the tip of the left ribbon end identify the die pair. This Select example is fully struck, with moderately reflective fields and satiny bronze-gold luster. No discernable marks are observed, though some well-masked hairlines in the fields likely account for the grade. The obverse die is minutely out of alignment toward the lower-right, with an unusually thick rim along the upper-left periphery and thinly struck denticles around the lower-right from the date to the first A in AMERICA. A highly appealing coin for the grade. PCGS# 147890 Base PCGS# 2037

**1858 Flying Eagle Cent, PR63 Cameo  
Lustrous, Seldom-Seen Proof**

- 3170 1858 PR63 Cameo PCGS. Snow-PR1.** Eagle Eye Photo Seal, card included. High Leaves reverse. A tiny spicule projecting upward from a denticle below the 5 in the date is the attributing marker for the Snow-PR1 obverse die — if any were needed; the mirrored fields, sharp inner rim, and razor-sharp strike characterize this as an unmistakable proof example. Generous luster dominates the orange-gold surfaces on each side. Population: 1 in 63 Cameo, 10 finer (12/14). PCGS# 82042

**1858 Small Letters Cent, PR64 Cameo  
Low Leaves Reverse, Snow-PR2**

- 3171 1858 Small Letters PR64 Cameo NGC. Snow-PR2.** Low Leaves Reverse. Close E in ONE. In 2001, Rick Snow wrote that PR2 was "probably included in the 12-piece pattern sets." Approximately 75 to 100 12-piece pattern sets were issued to collectors, a departure from the usual Mint practice of retaining or destroying such pieces. The 1858 Small Letters proof is significantly rarer than its 1856 predecessor, but trades at a lower price due to a prevalent business equivalent. The present caramel-gold near-Gem displays impressive field reflectivity with strong contrast seen against the frosted devices. While outstanding from a technical perspective, the market grade is determined by a lamination on the eagle, a lesser lamination on the field beneath STATES, and a cane-shaped lintmark through the C in AMERICA. PCGS# 2044

## INDIAN CENTS

- 3172 1859 MS64 PCGS. CAC.** This remarkable example is well-struck with only a touch of weakness observed on the reverse wreath. The warm bronze coloration is imbued with pleasing champagne accents. The lustrous surfaces are impressively preserved and free of distractions. An important one-year type with a distinct reverse design. NGC ID# 227E, PCGS# 2052

**1859 Indian Cent, MS65  
Excellent Gem Type Coin**

- 3173 1859 MS65 NGC.** A sharply struck, bronze-gold Gem, this satiny 1859 Indian cent is free of carbon spotting or noticeable marks, and is quite simply eye-appealing. This issue is scarce in MS65 and finer grades, and is also widely popular at this level due to its status as a one-year type. NGC has encapsulated only 11 numerically finer representatives (12/14). NGC ID# 227E, PCGS# 2052

**1859 Indian Cent, MS65  
Essential One-Year Type Coin**

- 3174 1859 MS65 NGC.** Golden-tan patina bathes both sides of this copper-nickel Gem, and sharply struck throughout, save for minor weakness on the feather tips. All four diamonds are crisp. Light granularity is visible at 3 o'clock on the obverse rim. NGC has certified 11 pieces finer (12/14).  
*Ex: Long Beach Signature (Heritage, 2/2009), lot 279; Baltimore Signature (Heritage, 3/2009), lot 177. NGC ID# 227E, PCGS# 2052*

**1860 Indian Cent, MS66+  
Incredibly Eye-Appealing**

- 3175 1860 MS66+ PCGS. CAC.** Rounded Bust, as usual. Few examples of this issue survive at the Premium Gem and finer grade levels, and by extension few are extant with eye appeal that rivals that of the present coin. Vibrant mint bloom cartwheels unrestricted around each side, showcasing seemingly pristine surfaces and razor-sharp design elements. Shades of bronze-gold and coppery-orange blend over both sides. Population: 46 in 66 (3 in 66+), 9 finer (12/14). NGC ID# 227F, PCGS# 2058
- 3176 1861 MS66 PCGS.** Eagle Eye Photo Seal and card included. Soft tan color adorns the lustrous surfaces of this Premium Gem. The devices are well-struck, including all four diamonds. The feather tips are soft as typical. A few minor obverse flecks are visible. Population: 61 in 66 (2 in 66+), 13 finer (12/14). NGC ID# 227G, PCGS# 2061

**1861 Indian Cent, MS66  
Lustrous Almond-Tan Surfaces**

- 3177 1861 MS66 PCGS. CAC.** Lustrous almond-tan surfaces are free of dark flecks and major signs of contact on this elegant Premium Gem 1861 cent, surpassed in numeric grade by only 13 submissions at PCGS (12/14). A single scrape on the jawline appears under a loupe, and the strike is good overall while blunt on some feather tips. NGC ID# 227G, PCGS# 2061
- 3178 1863 MS65+ PCGS. CAC.** Rainbow toning decorates the obverse of this well-struck, highly lustrous Gem. No distracting marks are evident on either side of this remarkably attractive example, and flyspecks are minimal. An ideal representative for type or date purposes. NGC ID# 227J, PCGS# 2067

**1863 Cent, Impeccable MS66**

- 3179 1863 MS66 PCGS.** Eagle Eye Photo Seal, card included. The color ranges from almond-tan to pale orange on each side, but the surfaces on each side are extremely sharply struck and well-preserved. The strike is sharp even on the feather tips, and there are simply no distractions on this impeccable coin. Population: 43 in 66 (2 in 66+), 0 finer (12/14). NGC ID# 227J, PCGS# 2067
- 3180 1863 MS66 NGC.** A delightful Premium Gem struck at the height of the Civil War, with well-detailed design elements and virtually pristine surfaces that radiate vibrant mint luster. The 1863 Indian cent is rarely seen with this combination of high technical quality and outstanding eye appeal. Census: 21 in 66 (1 in 66 ★), 1 finer (12/14). NGC ID# 227J, PCGS# 2067

**1864 Copper-Nickel Cent, MS66  
Only One Finer at PCGS**

- 3181 1864 Copper-Nickel MS66 PCGS Secure.** The Mint changed the cent's composition in 1864 from the short-lived copper-nickel alloy to one of bronze, which brought the coin's intrinsic value well below its face value and discouraged the massive hoarding of small cents that took place during the Civil War. More than 13 million copper-nickel cents were produced before the change occurred, but examples surviving in higher-than-Gem grades are seldom seen. This Premium Gem boasts seemingly unblemished bronze-gold luster, with no noticeable surface abrasions. A lens reveals the beginning signs of die erosion near the obverse borders, though the strike is nonetheless razor-sharp. Population: 21 in 66 (1 in 66+), 1 finer (12/14). NGC ID# 227K, PCGS# 2070

- 3182 1864 L On Ribbon MS64 Red PCGS.** This well-detailed MS64 example shows a touch of softness on the central obverse and slightly granular original red surfaces with vibrant mint luster throughout. The L on Ribbon variety is much scarcer than its bronze or No L copper-nickel predecessors. Population: 46 in 64 Red, 37 finer (12/14). NGC ID# 227M, PCGS# 2081

- 3183 1864 L on Ribbon, Snow-5, FS-2304, MS65 Red and Brown PCGS. CAC.** The 18 in the date are nicely repunched north. This pleasing Gem displays ample fire-red within the legends. The open fields and high points are medium brown. Unabraded and spot-free.  
*From The College Collection.* PCGS# 37403 Base PCGS# 2080

- 3184 1865 Plain 5, Repunched Date, Snow-1, FS-301, MS64 Red PCGS.** Eagle Eye Photo Seal, with card. Remnants of the undertype numerals are evident on all four digits of the date on this popular issue, which was once believed to be a 5/4 overdate. This sharply detailed Choice specimen offers lustrous red surfaces with just a few minor contact marks. Population: 2 in 64 Red and Brown, 0 finer (12/14). PCGS# 37434 Base PCGS# 92084

- 3185 1866 MS65 Red and Brown PCGS.** Whispers of light brown reside on the lustrous gold surfaces. Sharply struck design elements include all four diamonds and the feather tips. Mentionable marks and spots are lacking. Population: 83 in 65 (2 in 65+) Red and Brown, 4 finer (12/14). NGC ID# 227P, PCGS# 2086

**1867 Cent, MS66 Red and Brown  
Substantial Red Remaining**

- 3186 1867 MS66 Red and Brown PCGS. CAC.** A lovely matte-like texture is seen on each side of this sharply struck Premium Gem. The surfaces are lustrous and attractively toned in shades of red, gold, and burgundy, with near-pristine preservation. This is the sole finest certified Red and Brown examples at PCGS, rivaled only by a numerically equal Brown coin and another in Red (11/14).  
*Ex: Palm Beach Signature (Heritage, 3/2006), lot 120.* NGC ID# 227R, PCGS# 2089

- 3187 1867 MS64+ Red PCGS.** Eagle Eye Photo Seal with card. Sharply struck with bright mint frost and beautiful light coloration. Unmarked and nearly free of carbon on both sides. Population: 68 in 64 (1 in 64+) Red, 22 finer (12/14). NGC ID# 227R, PCGS# 2090

**1867/67 Cent, MS64 Red and Brown  
FS-301, Mark-Free Surfaces**

- 3188 1867/67 Snow-1, FS-301, MS64 Red and Brown PCGS.** The final two date digits are blatantly repunched north. Fire-red and apple-green grace unabraded and lustrous surfaces. A late-state near-Gem with clash marks on the obverse field and a mattelike obverse appearance, all as made. The strike is typical on the date and the top of the shield. PCGS# 37460 Base PCGS# 92089

**1867/67 FS-301 Cent  
MS64+ Red and Brown**

- 3189 1867/67 Snow-1, FS-301, MS64+ Red and Brown PCGS. CAC.** The 67 in the date is strongly repunched north. Among the more popular RPD varieties in the series. This well struck and lustrous near-Gem retains the initial orange-gold on the obverse border and reverse field. The high points and open obverse field are brown. A single hair-thin mark is noted above the ON in ONE.  
*From The College Collection.* PCGS# 37460 Base PCGS# 92089

- 3190 1869 MS65 Red and Brown PCGS.** Eagle Eye Photo Seal. A truly gorgeous Gem Indian cent with sharp strike definition and attractive, rich reddish-brown coloration. A loupe is necessary to see any of few minute marks, and spots are also minimal. A great coin, housed in an old green label PCGS holder.  
*From The Rawlin "Mac" McInelly Collection. NGC ID# 227T, PCGS# 2095*

**1869 Indian Cent, MS65 Red  
Seldom Seen With Full Red Color**

- 3191 1869 MS65 Red PCGS.** Snow-4. Slight repunching is evident above the bottom of the 9, called "very scarce" in the Snow reference. The 1869 is another scarce early issue in Gem condition and with full red color, even though 6.4 million pieces were produced. Bright orange-red color overall with a shimmering, semi-prooflike obverse field. Fully struck and an immaculate example of this popular and widely collected date. Population: 27 in 65 Red, 7 finer (11/14).  
*Ex: Santa Clara Signature (Heritage, 11/2002), lot 5227; Central States Signature (Heritage, 5/2007), lot 1072. NGC ID# 227T, PCGS# 2096*

**1870 Cent, MS65 Red  
Low-Mintage Semikey**

- 3192 1870 MS65 Red PCGS.** Bold N. A rose-red and apple-green Gem. Fully struck and lustrous with minute carbon flecks and a mark-free appearance. At least three sets of clash marks are prominent, especially near the C in CENT. Population: 36 in 65 (1 in 65+) Red, 7 finer (11/14).  
*Ex: FUN Signature (Heritage, 1/2005), lot 5054, which realized \$3,565. NGC ID# 227U, PCGS# 2099*

**1870 Cent, MS66 Red  
Ex: Walsh Collection**

- 3193 1870 MS66 Red PCGS.** Snow-16. *Ex: Joshua and Ally Walsh.* Bold N. When William Barber took over the job of chief engraver after James B. Longacre's death in 1869, he made slight modifications to the reverse hub of the Indian cent. The N in ONE was strengthened. 1870 cents exist with either a Shallow or Bold N, and sometimes the Bold N is hubbed over a Shallow N. The present shows die doubling localized to the N in ONE and the E in CENT. The 18 in the date is also lightly repunched. Nicely struck and lustrous with slightly mellowed fire-red and olive surfaces. Population: 7 in 66 Red, 0 finer (11/14).  
*Ex: Joshua and Ally Walsh Collection (Heritage, 1/2006), lot 3054, which realized \$25,300. NGC ID# 227U, PCGS# 2099*

- 3194 1871 MS65 Brown PCGS.** Eagle Eye Photo Seal, card included. A melange of olive-gold, crimson, sky-blue, and yellow-gold patina adorns both sides of this Gem Brown cent. The design elements are sharply struck, including the diamonds and feather tips. No marks or spots blemish the nicely preserved surfaces. Population: 12 in 65 Brown, 1 finer (12/14). NGC ID# 227V, PCGS# 2100

**1871 Cent, MS64+ Red  
Early Semikey Issue**

- 3195 1871 MS64+ Red PCGS.** Eagle Eye Photo Seal, card included. Bold N. The 1871 Indian cent has long been regarded as a semikey issue in the series, with only the 1877 and the two San Francisco issues boasting lower mintages. In full Red Mint State condition it is exceedingly scarce. This Plus-graded near-Gem displays radiant peach-red luster over each side, with boldly struck devices and a lack of noticeable surface flaws. Population: 25 in 64 (1 in 64+) Red, 18 finer (12/14). NGC ID# 227V, PCGS# 2102

- 3196 1871 Shallow N, FS-901, MS64 Red and Brown PCGS.** Eagle Eye Photo Seal with card. The "Shallow N" in ONE was from the reverse design used in 1869, and 1871-dated coins with this reverse are quite rare. This impressive Choice example is well-detailed and lustrous with well-preserved original red surfaces that have mellowed to light brown in some areas. Population: 3 in 64 Red and Brown, 1 finer (12/14). PCGS# 404550 Base PCGS# 2101

**1872 Indian Cent, Shallow N, MS65 Brown  
FS-901, Incredible Eye Appeal**

- 3197 1872 Shallow N, Snow-10b, FS-901, MS65 Brown PCGS.** Eagle Eye Photo Seal, card included. The Shallow N reverse (N in ONE) was largely abandoned in 1870 for the Bold N design, but a few leftover reverse dies were reused through 1872. Rick Snow comments in his second edition, volume 3 of the *Attribution Guide*:

"Although listed as varieties, the Shallow N type should be viewed as a separate design change within the series. This means that a collection would not be considered complete without both the Bold N and Shallow N designs for the years 1870, 1871, and 1872."

This is a beautiful and well-struck Gem of the Shallow N reverse, showing pale blue-brown color on both sides and top-notch eye appeal. The Snow-10b reverse, beyond the Shallow N, shows a small die chip on the lower half of the T in CENT and a die crack running from the wreath to the rim at 8:30. It is difficult to imagine a lovelier example of this increasingly popular variety. Population: 3 in 65 Brown, 1 finer (12/14). PCGS# 404546

**1873 Closed 3 Cent, MS65 Red and Brown  
Lustrous and Sharply Struck**

- 3198 1873 Closed 3 MS65 Red and Brown PCGS.** Eagle Eye Photo Seal, card included. Rick Snow estimates a mintage of about 2.5 million coins for the 1873 Closed 3, which would make it a lower-mintage variety than the better-known 1872, a celebrated conditional rarity. This lustrous Gem boasts a range of colors on surfaces that are well-preserved and sharply struck, save for the EN in CENT. A wispy die crack connects all the date digits. Population: 36 in 65 Red and Brown, 2 finer (12/14). NGC ID# 227X, PCGS# 2110

**1873 Closed 3 Cent, MS64+ Red  
Splendid Cartwheel Luster**

- 3199 1873 Closed 3 MS64+ Red PCGS.** CAC. Eagle Eye Photo Seal, card included. Only 25% or so of the 1873 Indian cents are of the Close 3 or Closed 3 variety. This is a splendid orange-tan example showing radiant cartwheel luster and nicely frosted surfaces with a good strike. A few small flecks appear on the obverse under a loupe, and the upper-right corner of the shield on the reverse is softly struck. Double clash marks appear on the reverse. Population: 17 in 64 (1 in 64+) Red, 17 finer (12/14). NGC ID# 227X, PCGS# 2111

**1873 Indian Cent, MS63 Red and Brown  
Doubled LIBERTY, Snow-1, FS-101  
Impressive Series Rarity**

- 3200 1873 Doubled LIBERTY, Snow-1, FS-101, MS63 Red and Brown PCGS Secure.** This satiny and nicely struck Select example displays variegated olive-brown and brick-red color. LIBERTY is strongly die doubled northeast. Other areas of doubling include the eye and the lines in the headdress. Only minor marks are evident, though we note a small strike-through (as made) near the first T in STATES. Perhaps the most famous *Guide Book* variety of the series, and key to a complete collection, along with the 1888/7. Population: 10 in 63 Red and Brown, 10 finer (12/14). PCGS# 37505 Base PCGS# 2116

**3201 1876 MS65 Red PCGS.** The 1876 cent circulated extensively, leaving most known examples in worn condition. Gems are elusive and higher-grade specimens are rare. Orange-gold luster abounds over both sides of this sharply struck, nicely preserved example. Population: 35 in 65 Red, 14 finer (12/14). NGC ID# 2283, PCGS# 2126

**3202 1877 VF30 PCGS. CAC.** Both sides of this key-date representative are toned medium brown and each is quite clean. The design elements are appropriately defined. NGC ID# 2284, PCGS# 2127

**3203 1877 XF45 NGC.** Mahogany surfaces on this piece show distributed, even wear and a bit of residue buildup in a few letters. Scattered stray marks are confined largely to the obverse. Higher-circulated-grade 1877 Indian cents are always quite popular, and this attractive coin will see considerable interest. NGC ID# 2284, PCGS# 2127

**3204 1877 — Cleaning — PCGS Genuine. AU Details.** Reddish-purple, olive, and gold coloration visits both sides of this relatively defined key-date representative. A few small marks do not unduly detract. Both sides have been lightly cleaned. NGC ID# 2284, PCGS# 2127

### 1877 Indian Cent, AU55 Popular Key Date

**3205 1877 AU55 NGC.** A lovely Choice AU example, this piece displays rich mahogany brown color on both sides, providing this coin with a lovely appearance. As expected at this grade level, scattered marks are present, but they are all extremely minor and pose no distraction at all. NGC ID# 2284, PCGS# 2127

### 1877 Indian Cent, Unc Details Popular Key Date

**3206 1877 — Improperly Cleaned — NGC Details. Unc.** This key-date cent has met with misadventure in its past, most notably a cleaning that has left unusual copper-pink hues on the surfaces along with a measure of retoning. Even so, any 1877 cent showing no wear would have thousands of collectors willing to take it regardless of other impairment, and this decently detailed example would fit well in the right collection.

### 1877 Indian Cent, MS64 Red and Brown Lustrous, Lightly Toned Key Date Example

**3207 1877 MS64 Red and Brown PCGS. CAC.** Well-balanced burgundy and orange-gold hues intermingle over both sides of this Choice Red and Brown example. Above-average striking definition is seen throughout the headdress feathers and the wreath, while the N in ONE remains shallow on its lower-right corner — a diagnostic of genuine 1877 Indian cents. This key date is highly sought-after in all grades, and is seldom available finer than the MS64 grade level. NGC ID# 2284, PCGS# 2128

**3208 1878 MS65 Red PCGS. CAC.** Eagle Eye Photo Seal with card. Blazing red surfaces show a few areas of light brown toning on this attractive Gem specimen. The design elements are sharply detailed and a small obverse rim bruise at 4 o'clock is the only mark of note. Housed in an old green label holder. Population: 50 in 65 Red, 15 finer (12/14). NGC ID# 2285, PCGS# 2132

**3209 1881 MS66 Red PCGS.** Splashes of crimson, sky-blue, and orange-gold visit the center of this Premium Gem. The devices display razor-sharp detail. A very attractive, well preserved piece. Population: 25 in 66 (2 in 66+) Red, 4 finer (12/14). NGC ID# 2288, PCGS# 2141

### 1882 Cent, MS66 Red Remarkable Light, Even Red Color

**3210 1882 MS66 Red PCGS.** Even though 38.5 million cents were struck this year, remarkably few have survived in both high grade and with the original mint red color still intact. This Premium Gem displays light red color, unmellowed by time. The strike is complete in all areas and there are no mentionable abrasions. Population: 21 in 66 Red, 2 finer (12/14). NGC ID# 2289, PCGS# 2144

**1886 Type One Cent, MS65 Red  
Even, Cherry-Red Color**

- 3211 1886 Type One MS65 Red PCGS.** Ex: Richard. Final year for this hub, the design was altered the next year so the lowest feather in the headdress points between the C and A of AMERICA rather than between the I and C as it does on this earlier type. The Type One coins are the more plentiful of the two types, but that is a relative statement as only 22 Gems have been certified by PCGS with two finer (12/14). The surfaces on this piece have an even cherry-red coloration and the striking details are sharply defined throughout. A lovely, high-grade example of this pivotal year in the Indian cent series.  
Ex: *FUN Signature (Heritage, 1/2004)*, lot 4312. NGC ID# 228D, PCGS# 2156

**1886 Type Two Cent, MS66 Red and Brown  
Tied for Finest at PCGS**

- 3212 1886 Type Two MS66 Red and Brown PCGS.** Eagle Eye Photo Seal, card included. The Type Two 1886 cents show the lowest feather tip between CA rather than IC. Rick Snow's series *Guide Book* estimates that around 20% of the original 17.6 million-coin mintage was the scarcer Type Two coins. This is a well-struck Premium Gem gleaming with luster and just slightly, narrowly "over the border" from a Red designation. Population: 2 in 66 Red and Brown, 0 finer (12/14). NGC ID# 228E, PCGS# 92155

- 3213 1887 MS65 Red PCGS.** Eagle Eye Photo Seal with card. The design elements of this attractive Gem are well-detailed and the lustrous red surfaces show no mentionable distractions. Population: 60 in 65 Red, 21 finer (12/14). NGC ID# 228F, PCGS# 2159

- 3214 1888/7 Snow-1, FS-301, — Environmental Damage — PCGS Genuine. XF Details.** Key to a *Guide Book* collection of business strike Indian cents, the 1888/7 shows the "ear" and a "dash" of an underdigit 7 near the final date digit. A die break above the E in UNITED provides a further diagnostic. A well defined dark gray example with a moderately granular lower reverse. PCGS# 37543 Base PCGS# 2169

- 3215 1888 MS65 Red PCGS.** Eagle Eye Photo Seal with card. A spectacular Gem Indian cent, with lustrous red surfaces that radiate vibrant mint luster and show few signs of contact. The design elements are well-detailed and eye appeal is outstanding. Population: 31 in 65 Red, 15 finer (12/14). NGC ID# 228G, PCGS# 2168

**1888 Indian Cent, MS66 Red  
Radiant Luster, Repunched Date**

- 3216 1888 MS66 Red PCGS. Snow-5a.** Rick Snow lists two varieties of this repunched date, featuring two different reverse dies paired to the common obverse. The final two 8s in the date are repunched, most noticeable on the last digit. This variety is not particularly scarce in comparison to many of the other varieties for this issue, but it is still of interest to the specialist.

The present example is deeply frosty, with vibrant coppery-red luster and bold design elements. Only a few tiny carbon specks are detectable upon magnified examination, and the eye appeal is exceptional. The reverse is extensively cracked throughout the wreath leaves, and a heavy crack through the top of the shield is diagnostic of this reverse. Population (all 1888 Indian cents): 14 in 66 (1 in 66+) Red, 1 finer (12/14). NGC ID# 228G, PCGS# 2168

- 3217 1891 MS65+ Red PCGS. CAC.** This high-end Gem offers sharply detailed design elements and well-preserved original red surfaces with vibrant mint luster on both sides. Overall eye appeal is outstanding. Population: 69 in 65 (1 in 65+) Red, 10 finer (12/14). NGC ID# 228K, PCGS# 2180

**1893 Cent, MS66 Red  
Eagle Eye Photo Seal**

- 3218 1893 MS66 Red PCGS.** Eagle Eye Photo Seal. Peach-gold and jade-green hues encompass this thoroughly lustrous and nicely struck high grade cent. We note only trivial obverse grazes and a small speck above the upper arrowhead. Certified in a green label holder. Population: 27 in 66 (1 in 66+) Red, 1 finer (11/14).  
Ex: *Robert R. Rollins Collection, Part Three (Heritage, 7/2008)*, lot 1113, which realized \$3,220. NGC ID# 228M, PCGS# 2186

---

**1894 Cent, MS66 Red  
Conditionally Elusive**

**3219 1894 MS66 Red PCGS.** Eagle Eye Photo Seal and Card. The 1894 Indian cent saw a large mintage exceeding 16 million pieces, but most either fail the Red test or have too many abrasions (or are outright circulated) to grade nearly as high as this Premium Gem Red example. This recently encapsulated piece shows uniformly brick-red surfaces with rich mint luster and a strike that is close to full, save for a couple of the forward feather tips. A few brown flecks near the rim are neither carbon nor distracting. A Registry Set prize. Population: 28 in 66 (2 in 66+) Red, 0 finer (2/14). NGC ID# 228N, PCGS# 2189

**3220 1895 MS66 Red PCGS. Snow-8.** The lower loops of the 8 and 5 are repunched. The variety is unlisted on the PCGS insert. A magnificent orange, olive, and ruby-red Premium Gem. Well struck and thoroughly lustrous. Population: 46 in 66 (3 in 66+) Red, 4 finer (11/14). NGC ID# 228P, PCGS# 2192

**3221 1895 MS66 Red NGC.** Eagle Eye Photo Seal. A spectacular Premium Gem with blazing original red surfaces and sharply detailed design elements throughout. Impeccably preserved, with terrific eye appeal. Census: 33 in 66 Red, 8 finer (12/14). NGC ID# 228P, PCGS# 2192

---

**1896 Cent, MS66 Red  
Attractive, Conditional Rarity**

**3222 1896 MS66 Red PCGS. CAC.** Despite a mintage of nearly 40 million coins, only a minuscule quantity survive so well-preserved. Vibrant luster rolls over the splendid copper-red surfaces of this Premium Gem cent. The diamonds on Liberty's hair ribbon are fully defined, and minimal carbon is confined to the reverse. Population: 14 in 66 Red, 2 finer (10/14). NGC ID# 228R, PCGS# 2195

---

**1897 Cent, Stunning MS66 Red  
With Eagle Eye Photo Seal**

**3223 1897 MS66 Red PCGS.** Eagle Eye Photo Seal, card included. A flaming orange-red Premium Gem example of this high-mintage date, struck to the extent of more than 50 million coins yet seldom seen at this grade level. A stunning coin equally in its strike, its surfaces, and its preservation. Population: 17 in 66 (1 in 66+) Red, 2 finer (12/14). NGC ID# 228S, PCGS# 2198

**3224 1898 Misplaced Date, Snow-5, FS-402, MS66 Red PCGS.** Eagle Eye Photo Seal. The top of an errant 9 is plainly visible in the dentils, below the primary digit. This delightful Premium Gem exhibits sharply detailed design elements and pristine original red surfaces with vibrant mint luster. Population: 1 in 66 Red, 0 finer (12/14). PCGS# 37605 Base PCGS# 2201

**3225 1898 Misplaced Date, Snow-5, FS-402, MS66 Red NGC.** Eagle Eye Photo Seal with card. From a mintage of nearly 50 million pieces, the 1898 Indian cent is rarely seen finer than this sharply detailed Premium Gem, with impeccably preserved original red surfaces. Census: 25 in 66 (1 in 66+) Red, 9 finer (12/14). PCGS# 37605 Base PCGS# 2201

---

**1903 Cent, MS66+ Red  
Bold and Lustrous**

**3226 1903 MS66+ Red PCGS. CAC.** Medium rose-tan and copper-orange surfaces show top-notch eye appeal on this bold and lustrous MS66 Red PCGS-certified cent. All four diamonds appear powerfully impressed on the ribbon of this sharply struck coin. Common-date Premium Gem Red Indian cents with the CAC approval sticker appear to be great bargains in today's numismatic marketplace. Population: 72 in 66 (4 in 66+) Red, 7 finer (12/14). NGC ID# 228Y, PCGS# 2216

1905 Indian Cent, MS66+ Red  
Only One Numerically Finer at PCGS

- 3227 1905 MS66+ Red PCGS. CAC.** Eagle Eye Photo Seal, card included. A few tiny flecks of deeper color appear on both sides of this handsome Premium Gem specimen, exhibiting even orange-red color overall. The strike is sharp and the luster strong. The few marks present are minuscule. Population: 48 in 66 (2 in 66+) Red, 1 finer (12/14).  
Ex: *Bowers and Merena* (9/2009), lot 274. NGC ID# 2292, PCGS# 2222

- 3228 1908-S MS65 Red PCGS. CAC.** Orange and straw-gold shades embrace this lustrous and unmarked semikey Gem. Carbon is essentially absent, and the eye appeal is formidable. The 1908-S was the lowest mintage of any issue since 1877, although the following year 1909-S had an even smaller production. PCGS reports only 38 Red pieces numerically finer (12/14). NGC ID# 2296, PCGS# 2234

- 3229 1909 MS66 Red PCGS. CAC.** Beautiful gold-orange luster endows this Premium Gem cent. The design elements are sharply struck, including all four diamonds and the wreath. No significant marks or spots are noted. NGC ID# 2297, PCGS# 2237

- 3230 1909-S MS64 Red and Brown PCGS.** Whispers of olive, ice-blue, and tan toning do not completely cover the lustrous surfaces of this near-Gem. The design elements are well-defined except for the usually seen weakness in the feather tips. NGC ID# 2298, PCGS# 2239

- 3231 1909-S MS64 Red and Brown PCGS. CAC.** Hazy brownish-gold surfaces show a mattelike texture and soft luster on this low-mintage last-year Indian cent. A noticeable dark spot appears midwreath on the reverse but the eye appeal elsewhere is excellent. NGC ID# 2298, PCGS# 2239

- 3232 1909-S MS64 Red PCGS.** This well-detailed Choice example represents the final year of the popular Indian design. The original red surfaces display radiant mint luster and only minor signs of contact. From a low mintage of 309,000 pieces. NGC ID# 2298, PCGS# 2240

1909-S Indian Cent, MS65 Red  
Low-Mintage Collector Favorite

- 3233 1909-S MS65 Red PCGS.** A lustrous orange and olive-gold Gem. The strike is bold, and no marks are of any consequence. Infrequent minor carbon precludes an even finer grade. The lowest mintage issue of the series, though saved by many as the last of its kind. Housed in a green label holder. NGC ID# 2298, PCGS# 2240

PROOF INDIAN CENTS

1859 Cent, PR66 Cameo  
Unimprovable Quality

- 3234 1859 PR66 Cameo PCGS.** The one-year-type 1859 Indian cent was struck in an amount estimated at 800 coins, but far fewer survive today in the Premium Gem Cameo level of this charming proof, where PCGS has certified only seven pieces. Nicely preserved, distraction-free medium orange surfaces contrast well against the slightly darker raised devices, and the needle-sharp strike shows four diamonds on the ribbon and clear tips in all the feathers. The reverse is equally well-maintained, although a loupe shows a couple of faint brownish toning flecks that are not carbon. Unimprovable quality. PCGS# 82247

- 3235 1860 PR65 NGC.** Only 250 or so 1860 proofs were struck from the hub with the rounded bust point, and as few as 50 pieces are estimated to exist today in all grades. This sparkling Gem proof displays deeply mirrored fields and good aesthetic balance with a light overlay of reddish patina and a few specks of carbon. Census: 15 in 65, 14 finer (12/14).

Ex: *Mark Van Deusen Collection / Baltimore Signature* (Heritage, 7/2003), lot 5401. NGC ID# 229A, PCGS# 2253

**1861 Cent, Near-Gem Proof  
Short-Lived Copper-Nickel Series**

- 3236 1861 PR64 PCGS.** A charming copper-nickel cent from the second of five such proof issues with the Oak Wreath reverse. Distinctive peach and lavender hues give both sides considerable vibrancy, though a few flyspecks on the reverse, most visibly above the ON of ONE, contribute to the grade. Population: 64 in 64, 25 finer (11/14). NGC ID# 229B, PCGS# 2256
- 3237 1861 PR64 PCGS.** The gold proof surfaces of this near-Gem exhibit well-struck design features, including the feather tips. Both sides have been nicely cared for. Population: 64 in 64, 25 finer (12/14). NGC ID# 229B, PCGS# 2256

**1862 Indian Cent, PR66  
Deeply Mirrored Example**

- 3238 1862 PR66 PCGS.** This incredibly attractive Premium Gem proof displays deep pink and lilac color on the obverse and pale tan on the reverse. The fields are deeply mirrored, and the devices fully lustrous. Housed in a green-label PCGS holder. Population: 26 in 66, 1 finer (11/14).  
*Ex: Estate of Robert R. Rollins Collection, Part One / Long Beach Signature (Heritage, 5/2008), lot 2351. NGC ID# 229C, PCGS# 2259*
- 3239 1862 PR65 Cameo PCGS.** The 1862 is generally considered the type coin of the copper-nickel series, but few actual Gems are available to collectors, especially with cameo contrast. This well-produced coin displays deeply mirrored, flashy fields and even reddish-golden color — actually more suggestive of a bronze coin than one with a copper-nickel composition. Unlike the previous year's proofs, this piece is typical of most 1862s, showing razor-sharp definition on all design elements. An irregular planchet flake appears in the lower left obverse field, before the point of the bust truncation. Population: 22 in 65, 27 finer (12/14). PCGS# 82259

**1862 Cent, PR66 Cameo  
Scarce With Field-Motif Contrast**

- 3240 1862 PR66 Cameo PCGS.** Boldly struck with lovely tan-gold and rose color. The fields are pleasantly mirrored and provide noticeable contrast with the devices. A powerful loupe locates inconsequential flyspecks, but there are no handling marks. Population: 24 in 66 (3 in 66+), 3 finer (12/14).  
*Ex: Jones Beach Estate, Part II (Heritage, 11/2003), lot 5224; Central States Signature (Heritage, 5/2007), lot 1150; ANA Signature (Heritage, 7/2008), lot 1133; Houston Signature (Heritage, 12/2008), lot 118. PCGS# 82259*

**1862 Indian Cent, PR66 Cameo  
Popular Proof Issue**

- 3241 1862 PR66 Cameo PCGS. CAC.** Eagle Eye Photo Seal, card included. Flashy fields provide this Premium Gem Cameo example with immediate eye appeal. Among the colors present are light orange, faint blue, red-plum, and bright yellow-gold. Tiny carbon flecks appear, primarily on the obverse. Population: 24 in 66 (3 in 66+), 3 finer (12/14). PCGS# 82259

---

**1863 Cent, Sharply Struck PR66**

- 3242 1863 PR66 PCGS.** The golden-tan surfaces of this Premium Gem proof cent display modest field-motif contrast when the coin is rotated slightly beneath a light source. The design elements are sharply struck, including all four diamonds, the feather tips, and the shield. There are no mentionable spots or marks on either side. Population: 7 in 66, 1 finer (12/14). NGC ID# 229D, PCGS# 2262

---

**1864 Bronze No L Cent  
Glowing PR66 Red and Brown**

- 3243 1864 Bronze No L PR66 Red and Brown PCGS.** CAC. Eagle Eye Photo Seal, card included. While the bronze No L proof cents of 1864 are less common than their copper-nickel cousins, they are certainly more available than the bronze proofs that bear Longacre's initial. This glowing reddish-tan proof is among the finest survivors from an estimated mintage of 150 specimens, boldly impressed and immensely appealing. Population: 12 in 66 Red and Brown, 1 finer (12/14).  
Ex: FUN Signature (Heritage, 1/2007), lot 573; Central States Signature (Heritage, 5/2007), lot 1154; Summer FUN Signature (Heritage, 7/2007), lot 117; Central States Signature (Heritage, 3/2009), lot 1180. NGC ID# 229F, PCGS# 2277

---

**1864 Bronze No L Cent, PR64 Red Cameo  
Rare With Red Color**

- 3244 1864 Bronze No L PR64 Red Cameo PCGS.** CAC. Eagle Eye Photo Seal, card included. These coins are called Bronze or No L by different collector groups, to distinguish them from the copper-nickel and With L cents, respectively. Rick Snow gives a mintage figure of 300 in his series reference. This Red Cameo near-Gem proof is quite rare as such, showing light orange-tan surfaces with glints of iridescent color and bold contrast between the deeply mirrored fields and lightly frosted devices. A few brownish flecks appear on each side, mostly visible only with a loupe, but this is a beautiful and sharply struck coin with good overall eye appeal. Population: 8 in 64 Red Cameo, 6 finer (12/14). PCGS# 82278

---

**1865 Cent, PR64 Red Cameo  
Low Proof Mintage**

- 3245 1865 PR64 Red Cameo PCGS.** Plain 5. The brick-red centers are framed by orange-gold. A prominently mirrored Choice cent with precisely struck devices and attractively preserved fields. A scarce proof date, with a Guide Book mintage of 500+ pieces. Population: 8 in 64, 3 finer (11/14).  
Ex: St. Louis Central States (Heritage, 5/2007), lot 1157, which realized \$2,760. PCGS# 82284

**1865 Cent, PR65 Red Cameo  
Bold Contrast, Condition Rarity**

- 3246 1865 PR65 Red Cameo PCGS. CAC.** The Mint struck a reported 500 proofs in 1865 (all with the Plain 5), and the issue is one of the more elusive dates in the early Indian Head cent series. In *A Guide Book of Flying Eagle and Indian Head Cents*, Richard Snow remarks: "Full red examples are very hard to locate, especially without spots or problems. Cameos are very rare." PCGS has certified only three examples in PR65 Cameo, and none are reported finer with that designation. Additionally, this is the sole PR65 Red Cameo representative with a green label CAC approval sticker (11/14). Bold contrast, fully struck devices, and vivid orange-gold coloration contribute to the essentially unrivaled visual appeal. Expect spirited bidding when this Registry candidate crosses the auction block. PCGS# 82284

**1866 Cent, PR66 Red  
Sharp and Deeply Mirrored**

- 3247 1866 PR66 Red PCGS.** A fully struck, gleaming representative with bright, lemony-red color that exhibits just a touch of deeper tone over each side. Noticeable mint frost blankets the devices, and this coin falls just shy of a Cameo designation from PCGS. As a date, this issue is only available in Brown to Red and Brown grades — Red examples are scarce, and Cameos are extremely rare. Population: 3 in 66 Red, 0 finer (12/14). NGC ID# 229J, PCGS# 2287
- 3248 1868 PR64 Cameo PCGS.** Beautifully reflective bright-orange fields contrast nicely against the brownish devices on this attractive near-Gem Cameo proof. The reverse is rotated nearly close to medal turn, a phenomenon frequently seen on this issue. A few flecks appear under a loupe, mostly in the lower obverse field. Population: 3 in 64 Cameo, 7 finer (12/14). PCGS# 82293
- 3249 1869 PR64 Red PCGS. CAC.** A well struck rose-red and orange near-Gem. Hints of sea-green outline protected areas, and the portrait displays a glimpse of lilac. Just 600+ proofs were issued, and relatively few among those remain full Red. Population: 22 in 64 Red, 17 finer (11/14).  
*Ex: Richard Collection (Heritage, 1/2004), lot 4454. NGC ID# 229M, PCGS# 2296*

**1870 Cent, PR65 Red Cameo  
Rare With Field-Motif Contrast**

- 3250 1870 PR65 Red Cameo PCGS. CAC.** An enchanting early proof that is almost devoid of surface distractions. Lustrous with orange-red color, the boldly struck features reveal modest brightness as the coin turns into the light, and the frosted devices are splendidly contrasted over the reflective fields. There are a number of scattered flyspecks on the obverse, along with a small group of wispy lintmarks (as struck) on Liberty's cheek, but the reverse seems virtually pristine. This piece is tied with just two others as the finest Red Cameo certified by PCGS, and also ranks as the only one of the three awarded a CAC endorsement (11/14).  
*Ex: Long Beach Signature (Heritage, 1/2004), lot 5190. PCGS# 82299*

1871 Indian Cent, PR66 Red  
Tied for Finest-Graded

- 3251 1871 PR66 Red PCGS.** Eagle Eye Photo Seal, card included. Type One Reverse, shallow N in ONE. "Scarce," according to Rick Snow (1992). The appealing tan-gold and reddish coloration exhibited on both sides of this impeccably preserved specimen helps to ensure the splendid eye appeal of the piece. The design details are crisply produced, although the diamonds are, typically, not full. A lovely Premium Gem that should please even the most demanding collector. Population: 3 in 66 Red, none finer at either service (12/14).  
Ex: ANA Signature (Heritage, 7-8/2008), lot 1144. NGC ID# 229P, PCGS# 2302

1872 Cent, Sharp PR66 Red

- 3252 1872 PR66 Red PCGS.** The notable scarcity of the 1872 Indian cent in high-grade circulation-strike format makes the proof issues doubly popular. Pale cherry-red field color on both sides and a sharp strike make this a standout coin. A bit of carbon appears in the shield on the reverse. This piece is one of only six in PR66 Red at PCGS and, as expected, none are finer (12/14). NGC ID# 229R, PCGS# 2305

1873 Closed 3 Cent, PR66 Red  
Satin Mint Luster

- 3253 1873 Closed 3 PR66 Red PCGS.** This beautiful peach-red Premium Gem proof offers a powerful strike on surfaces that show copious satin luster. Study beneath a lens fails to find any marks, and carbon is essentially absent save for a small obverse fleck near 12 o'clock. This proof date features a heavy right pendant on the T in CENT, and die lapping has effaced some detail around the eye socket and mouth of Liberty. Only about 25% of the 1873 cents have the Closed 3 style, although all of the proofs are of that type. Population: 3 in 66 Red, 0 finer (12/14).  
Ex: FUN Signature (Heritage, 1/2009), lot 401. NGC ID# 229S, PCGS# 2308
- 3254 1875 PR66 Red and Brown PCGS.** A desirable date, even more desirable in such an excellent state of preservation. Flashy surfaces gleam with original luster. The bust has a slightly matte appearance, giving a great contrast against fully reflective fields. Minuscule lines of little consequence can be detected with magnification. Population: 10 in 66 Red and Brown, 0 finer (12/14). NGC ID# 229U, PCGS# 2313
- 3255 1876 PR65 Red Cameo PCGS.** The surfaces display prevailing honey-gold color, save for a small area of orange at 12 o'clock on the obverse. Radiant devices and legends contrast well against smooth, reflective fields. A needle-sharp Gem Cameo proof, virtually perfect. Population: 7 in 65 Cameo, 2 finer (12/14). PCGS# 82317

**1877 Cent, PR64 Red and Brown  
Bold Colors**

- 3256 1877 PR64 Red and Brown PCGS.** With its mintage of 900 proofs, the 1877 cent would attract little nonspecialist notice if not for its famous business-strike counterpart. This near-Gem specimen is boldly toned blue and violet over much of each side but with considerable peripheral gold and peach to ensure its Red and Brown status. NGC ID# 229W, PCGS# 2319

**1877 Indian Cent, PR64 Red  
Popular Proof Issue**

- 3257 1877 PR64 Red PCGS.** The preeminent key date status of its business strike counterpart makes the 1877 proof Indian cent a highly-coveted and popular issue by association; and it boasts a lower mintage of just 900 coins. This is a pleasing, sharply struck specimen with a slight woodgrain finish over mostly mint-red surfaces. A couple of tiny nicks are noted on the reverse. Population: 40 in 64 Red, 32 finer (11/14). NGC ID# 229W, PCGS# 2320

**1877 Cent, PR65 Red Cameo  
Attractive and Well-Contrasted**

- 3258 1877 PR65 Red Cameo NGC.** Flame-orange fields are splendidly well-mirrored and contrast nicely against the frosted devices on this sharply struck Gem Red Cameo proof. This piece even under a loupe shows no mentionable signs of contact or other distractions. An extremely attractive example of this key-date proof issue. PCGS# 82320

- 3259 1878 PR66 Red PCGS.** A beautiful pumpkin-orange Premium Gem with prominently mirrored fields and noticeable cameo contrast. The 1878 is a low mintage date, and high grade proofs are under strong demand. Encapsulated in a green label holder. Population: 8 in 66 Red, 1 finer (11/14).  
*Ex: Robert R. Rollins Collection, Part Two (Heritage, 6/2008), lot 232, which realized \$1,840. NGC ID# 229X, PCGS# 2323*

**1878 Cent, PR65 Red Cameo  
Nicely Contrasted**

- 3260 1878 PR65 Red Cameo PCGS.** Stunning cameo contrast greets the viewer of this Gem proof, and exquisitely struck devices enhance this variance. Copper-orange surfaces are imbued with traces of lilac and ice-blue, and are devoid of significant contacts or spots. Population: 9 in 65, 6 finer (11/14).  
*Ex: Baltimore Signature (Heritage, 3/2009), lot 236. PCGS# 82323*

**1878 Cent, PR66 Red Cameo  
Deep Orange, Reflective Fields**

- 3261 1878 PR66 Red Cameo PCGS.** The 1878 proof Indian cents are a bit easier to find with Red color and Cameo designation, but it is still a happy combination when they come together; PCGS has seen only six such with none finer (12/14). Deep orange field color and excellent reflectivity complement the slightly deeper-textured devices, and the surfaces boast a sharp strike and no mentionable distractions. Population: 6 in 66 Red Cameo, 0 finer (12/14). PCGS# 82323

**1878 Cent, PR65 ★ Red Ultra Cameo  
Splendidly Mirrored**

- 3262 1878 PR65 ★ Red Ultra Cameo NGC.** Splendidly mirrored surfaces are pale tan-orange in the fields and medium orange on the devices, setting up strong contrast and excellent eye appeal. A bit of smudging in the left obverse field is consistent with the grade. This Star-designated piece is the sole Ultra Cameo in any grade at NGC (11/14). PCGS# 92323

---

**1879 Cent, PR67 Red  
Green Label Holder**

**3263 1879 PR67 Red PCGS.** A lustrous peach-gold Superb Gem that has the pinpoint-sharp strike expected of a proof Indian cent. More surprising is the complete absence of the flyspecks that usually inundate survivors. Housed in a green label holder, and worthy of the finest set.

*Ex: Robert R. Rollins Collection, Part Three (Heritage, 7/2008), lot 1155, which realized \$3,737.50. NGC ID# 229Y, PCGS# 2326*

---

**1880 Indian Cent, Sharp PR66 Red**

**3264 1880 PR66 Red PCGS. CAC.** A spectacular full Red proof, this 1880 Indian cent displays rich bronze-red and coppery-gold hues over mirrored fields and satiny devices. The strike is tack-sharp throughout the ribbon, headdress feathers, and wreath leaves, and only a couple microscopic specks are detectable with a lens. Population: 15 in 66 Red, 8 finer (11/14). NGC ID# 229Z, PCGS# 2329

---

**1880 Indian Cent, PR67 Red  
Superb, Evenly Colored**

**3265 1880 PR67 Red PCGS.** The 1880 is one of the first dates that can be termed "common" in comparison to dates from the 1860s and 1870s. Besides the present offering, only seven other PR67 Red pieces have been certified by PCGS and one numerically equal coin by NGC, with none finer at either service (12/14). This is a nicely reflective coin that has even coppery-red color over each side. There are no observable defects on either side, even with magnification.

*Ex: FUN Signature (Heritage, 6/2008), lot 238. NGC ID# 229Z, PCGS# 2329*

---

**1880 Indian Cent, PR67 Red  
None Certified Finer**

**3266 1880 PR67 Red PCGS.** A remarkable example with stunning, fiery red color and impeccably preserved surfaces that are free of any noticeable hairlines. The strike is full, as should be expected of a proof, and the overall appearance is simply breathtaking. A few coins exist that match this coin's technical grade, but a finer coin in terms of aesthetic appeal is difficult to imagine. Population: 8 in 67 Red, 0 finer (11/14).

*Ex: FUN Signature (Heritage, 1/2004), lot 4494. NGC ID# 229Z, PCGS# 2329*

---

**1881 Cent, PR67 Red  
Rich Red Surfaces, None Finer**

**3267 1881 PR67 Red PCGS.** Gorgeous cherry-red, orange, and apple-green endow this colorful Superb Gem. The design elements are sharply struck. A few microscopic flecks occur on each side, but do not distract. Population: 3 in 67 Red, 0 finer (11/14).

*Ex: Pittsburgh Signature (Heritage, 8/2004), lot 5242, which realized \$5,750; FUN Signature (Heritage, 1/2010), lot 263. NGC ID# 22A2, PCGS# 2332*

**3268 1882 PR67 Brown PCGS.** *Ex: The Larry Shepherd Collection.* Medium-intensity bluish-tan patina bathes both sides of this Superb Gem each of which shows razor-sharp devices. The glowing surfaces are immaculately preserved. Population: 14 in 67 Brown, 0 finer (12/14). NGC ID# 22A3, PCGS# 2333

---

**1883 Cent, PR66 Red  
Green Label Holder**

- 3269 1883 PR66 Red PCGS.** An intricately struck Premium Gem with rich peach-red surfaces. The cheek and upper left obverse add glimpses of olive-green. No marks are noticed, and any carbon is microscopic. Proof 1883 cents are available, but are rarely encountered with such outstanding eye appeal. Certified in a green label holder. Population: 5 in 66 (1 in 66+) Red, 1 finer (11/14).  
*Ex: Robert R. Rollins Collection, Part Two (Heritage, 6/2008), lot 244; Long Beach Signature (Heritage, 9/2009), lot 136, which realized \$3,220. NGC ID# 22A4, PCGS# 2338*

---

**1884 Cent, PR67 Red  
Outstanding Proof Type Coin**

- 3270 1884 PR67 Red PCGS. CAC.** Eagle Eye Photo Seal, no card included. This orange-red Superb Gem has remarkably consistent color and is void of contact. A loupe shows only microscopic carbon. As an identifier, we note a small spot at the southeast corner of the E in CENT. Population: 11 in 67 Red, 1 finer as 67 Red Cameo (11/14). NGC ID# 22A5, PCGS# 2341
- 3271 1885 PR66 Red and Brown PCGS.** This beautifully patinated Premium Gem proof offers rich dark-green and golden-red color on surfaces that boast a razor-sharp strike on each side. Highly reflective surfaces are virtually pristine. Population: 49 in 66 (1 in 66+) Red and Brown, 22 finer (12/14).  
*Ex: Melrose Bay Collection / San Francisco ANA Signature (Heritage, 7/2005), lot 5198. NGC ID# 22A6, PCGS# 2343*
- 3272 1885 PR66 Red and Brown PCGS. CAC.** Eagle Eye Photo Seal. Rich pink highlights add to the visual appeal on both sides of this pleasing Premium Gem proof, displaying brilliant, lustrous surfaces. The obverse legend exhibits attractive Longacre doubling. A few small toning spots are present. Population: 49 in 66 (1 in 66+) Red and Brown, 22 finer (12/14). NGC ID# 22A6, PCGS# 2343

---

**1885 Cent, PR66 Red Cameo  
Sole Cameo Certified at PCGS**

- 3273 1885 PR66 Red Cameo PCGS.** While many proof 1885 cents display unsightly toning streaks from an improperly mixed alloy in the planchet, this high quality Gem is evenly colored in crimson-red luster. Slightly deeper magenta-tinged undertones are also evident around the borders, along with a razor sharp strike that leaves no feather tip ill-defined. The elusiveness of high-grade business strike 1885 cents adds even more to the desirability of this smooth, virtually pristine proof. Population: 1 in 66, 0 finer (12/14).  
*Ex: ANA Signature (Heritage, 7/2005), lot 5200; Dallas Signature (Heritage, 11/2005), lot 262. PCGS# 82344*

---

**1886 Cent, PR65 Red  
Type One Obverse**

- 3274 1886 Type One PR65 Red PCGS.** The lowest feather points to the C in AMERICA on the Type One 1886 cents, while the Type Two coins can be distinguished by the feather pointing between the C and A. This proof issue is scarce in full Red grades, and is rare at the Gem level within this category. No Cameo Type One coins have been certified at PCGS (12/14). The present example is fully struck, with complementary orange-gold and coppery-red colors. A few flecks are noted on the lower reverse. Population: 19 in 65 Red, 13 finer (12/14). NGC ID# 22A7, PCGS# 2347

---

**1886 Type One Cent, PR66 Red**

- 3275 1886 Type One PR66 Red PCGS.** This cherry-red Premium Gem proof possesses razor-sharp strike detail over all design elements. Shimmering reflectivity from the proof finish is readily evident, and neither side reveals any blemishes that would call into question the assigned grade. The 1886 Type One is the more common of the two variants of this proof cent, but this piece is tied for the finest certified at both NGC and PCGS. Population: 13 in 66 Red, 0 finer (12/14). NGC ID# 22A7, PCGS# 2347

**3276 1886 Type Two PR64 Red PCGS.** Bowers' *Guide Book of Flying Eagle and Indian Cents* estimates that perhaps 40% of the total proofs for this year were of the new Type Two hub variety, introduced this year and lasting through the end of the series. Only in 1954 did collectors begin discriminating between the two variants. This piece displays plenty of dusky orange-red coloration, with some waves of light olive toning in the left obverse field. Seldom seen finer. Population: 10 in 64 Red, 3 finer (12/14).  
*Ex: Long Beach Signature (Heritage, 9/2008), lot 325; Houston Signature (Heritage, 12/2008), lot 133; Baltimore Signature (Heritage, 3/2009), lot 244. NGC ID# 22A8, PCGS# 92347*

**1887 Cent, PR67 Brown  
 Beautifully Patinated**

**3277 1887 PR67 Brown NGC.** The rose-red portrait accompanies an olive-gold field and a broad aquamarine margin. The reverse has an arc of orange-red along the right border, separated from a larger deep ocean-blue area by a narrow band of plum-mauve. In *A Guide Book of Flying Eagle and Indian Cents*, Rick Snow notes that "many 1887 cents are found with pale tan-golden planchets. Many others have toned to brown, sometimes with vivid iridescent blue toning, which is worth a significant premium." Housed in a prior generation holder. Census: 4 in 67 Brown, none finer (11/14).  
*Ex: New York Eye Appeal Collection, Part Three (Heritage, 1/2008), lot 2699. NGC ID# 22A9, PCGS# 2348*

**1887 Cent, PR66 Red  
 Eagle Eye Photo Seal  
 Tied for Highest Graded**

**3278 1887 PR66 Red NGC.** Eagle Eye Photo Seal, card not included. The old saying about "hen's teeth" comes to mind, as in "rarer than." NGC and PCGS have each graded two PR66 Red coins of this issue, from the original proof mintage of 2,960 pieces. It is seldom indeed that Indian cents from the 1880s are found in such pristine condition with fully red surfaces. Nonetheless this is one such piece, with lustrous salmon-pink surfaces that are virtually devoid of carbon or other post-strike imperfections.  
*Ex: Long Beach Signature (Heritage, 5/2007), lot 204. NGC ID# 22A9, PCGS# 2350*

**3279 1888 PR64 Red PCGS.** Orange-red dominates but the left borders are green-gold. Sharply struck and deeply mirrored with distributed pinpoint obverse carbon. Encased in a green label holder. NGC ID# 22AA, PCGS# 2353

**1899 Indian Cent, PR66 Red  
 Tied for the Finest Certified**

**3280 1899 PR66 Red PCGS.** Both sides are ablaze with copper-golden luster, although a splash of ruby-red visits the lower right obverse. The design elements are exquisitely well struck, and the surfaces are devoid of apparent marks. PCGS has certified just eight coins at this level, and NGC has seen only two pieces, with none graded higher by either service (12/14).  
*Ex: San Francisco ANA Signature (Heritage, 7/2005), lot 5205, which realized \$4,888. NGC ID# 2732, PCGS# 2356*

**1891 Cent, PR66 Red  
 Eagle Eye Photo Seal  
 Ex: Heathgate Collection**

**3281 1891 PR66 Red PCGS.** Snow-PR1. Eagle Eye Photo Seal, no card included. A peach-gold Premium Gem with reflective fields and a good strike. A lens reveals only microscopic carbon and a small strike-through beneath the M in AMERICA. Minor repunching is present on the 89 in the date.  
*Ex: Heathgate Collection of Indian Head Cents (Ira & Larry Goldberg, 2/2001), lot 1136. NGC ID# 22AD, PCGS# 2362*

---

**1892 Cent, PR67 Red and Brown  
Beautiful Myriad Toning**

**3282 1892 PR67 Red and Brown PCGS. CAC.** This Superb Gem is nearly full Red on the obverse, showing vivid cherry-red peripheral hues around bright sun-gold centers, though the reverse is more deeply colored in shades of forest-green, ruby-red, and orange-gold. This piece ranks as the sole finest Red and Brown example certified at PCGS, rivaled only by two numerically equal coins in the Red category (11/14). NGC ID# 22AE, PCGS# 2364

**3283 1894 PR66 Red NGC.** This 1894 Premium Gem Red proof cent is one of the 14 finest seen by NGC and PCGS. Orange-gold luster radiates from blemish-free surfaces that exhibit sharply struck design elements. Tremendous overall eye appeal. This piece is encapsulated in a very rare NGC 8 holder featuring tiny certification numbers, a slab that was used for only about one month in August-September 2000. Census: 5 in 66 Red, 0 finer (12/14). Ex: Long Beach Signature (Heritage, 6/2002), lot 5232; Pittsburgh Signature (Heritage, 8/2004), lot 5249; Long Beach Signature (Heritage, 9/2005), lot 967. NGC ID# 22AG, PCGS# 2371

---

**1896 Indian Cent, PR65 Red Cameo  
Registry Set Candidate**

**3284 1896 PR65 Red Cameo PCGS.** A cameo-like effect is established as the well-struck devices on both sides are nicely set off by moderately reflective fields. The bright copper-gold surfaces are well preserved, showing no significant contact marks or copper spots. Population: 4 in 65, 1 finer (11/14). Ex: Long Beach Signature (Heritage, 2/2007), lot 2293. PCGS# 82377

---

**1898 Indian Cent, PR67 Red Cameo  
Stunning Top-Graded Coin**

**3285 1898 PR67 Red Cameo PCGS.** The surfaces on this stunning Superb Gem proof are a light orange-gold in the fields, ceding occasionally to bright orange blushes on each side and contrasting markedly against the well-frosted devices throughout. The needle-sharp proof strike has brought up all four diamonds on the ribbon, and the fine details of the wreath and shield. The mintage of 1898 Indian cent proofs was 1,795 pieces, down about 10% from both the previous and succeeding years' totals. In any case, few of the survivors can approach either the Superb Gem or Cameo designations of this piece. PCGS shows only seven non-Cameo Red proofs, and this piece is one of only two Cameo proofs with none finer (10/14). An amazing coin for a fine set. PCGS# 82383

---

---

**1901 Indian Cent, PR67 Red and Brown  
Remarkable Preservation**

- 3286 1901 PR67 Red and Brown PCGS.** The 0 and 1 in the date are lightly repunched east. Iridescent rose-violet and magenta color fills the centers, while the margins offer bright peach hues. This razor-sharp Superb Gem is immaculate aside from an occasional microscopic flyspeck. Population: 11 in 67 Red and Brown, 0 finer (11/14).

Ex: *Central States Signature* (Heritage, 5/2004), lot 5553; *Long Beach Signature* (Heritage, 2/2005), lot 5346; *ANA Signature* (Heritage, 8/2010), lot 3937. NGC ID# 22AP, PCGS# 2391

- 3287 1904 PR65 Red Cameo PCGS.** The obverse presents a bright copper-gold appearance with mint-green accents, while the reverse is a mixture of rich gold and crimson-magenta color that deepens at the border. Great Cameo eye appeal with minor carbon away from the portrait. Population: 6 in 65, 3 finer (12/14).

Ex: *Palm Beach Signature* (Heritage, 3/2006), lot 162; *Summer FUN Signature* (Heritage, 7/2010), lot 3110. PCGS# 82401

- 3288 1907 PR66 Red NGC.** Orange-red and olive-gold shades endow this coruscating and fully struck Premium Gem. A small spot on the E in LIBERTY and a few minute flecks near the denomination are all that limit the grade. Certified in a prior generation holder. From *The Free Tilly Collection*. NGC ID# 22AW, PCGS# 2410

- 3289 1909 PR66 Red PCGS.** Crimson and yellow-gold surfaces exhibit sharply struck design elements. Both sides have been well cared for. Housed in a green label holder. Population: 16 in 66 Red, 2 finer (12/14). NGC ID# 22AY, PCGS# 2416

---

**LINCOLN CENTS**

- 3290 1909-S VDB — Questionable Color — PCGS Genuine. Unc. Details.** A lustrous and beautiful example of the famous low mintage key. The dappled wheat-gold surfaces appear void of contact. The high points of the portrait are ruby-red. Boldly struck, customary for the briefly coined issue. NGC ID# 22B2, PCGS# 2426

- 3291 1909-S VDB MS64 Brown NGC.** An attractive key date example with well-struck design elements and a mixture of copper-red, mint-green, and sky-blue toning over the obverse. Copper-red, brown, and gold are seen across the reverse. A handful of wispy marks on the obverse limit the grade. NGC ID# 22B2, PCGS# 2426

- 3292 1909-S VDB MS64 Red and Brown NGC.** Vibrant fiery-red red toning adorns each side of this key date example. Sharply struck with bold, shimmering mint luster and clean, well-preserved surfaces. A lovely near-Gem example that will appeal to many collectors. NGC ID# 22B2, PCGS# 2427

- 3293 1909-S VDB MS64 Red and Brown PCGS.** Whispers of light tan patina visit the gold surfaces of this near-Gem that display well-struck design elements. A few minute flecks are visible on the obverse. NGC ID# 22B2, PCGS# 2427

- 3294 1909-S VDB MS64 Red and Brown PCGS.** Muted blue-brown patina is intermixed with substantial portions of original mint red on each side. The strike is complete and there are no mentionable abrasions on this always-popular low-mintage key. NGC ID# 22B2, PCGS# 2427

- 3295 1909-S VDB MS64 Red and Brown PCGS. CAC.** Both sides of this key-date near-Gem Red and Brown cent display a mixture of gold luster and reddish-brown patination, and each exhibits well-struck design elements, including the VDB initials. No mentionable marks or spots are evident. NGC ID# 22B2, PCGS# 2427

---

**1909-S VDB Cent, MS65 Red and Brown  
Very Scarce in Finer Grades**

- 3296 1909-S VDB MS65 Red and Brown PCGS.** The 1909-S VDB cent has been many collectors' first exposure to the idea of a key-date coin, and this Red and Brown Gem could be the fulfillment of someone's lifelong dream. Considerable remaining red-aligned hues on each side render the color designation accurate. PCGS has graded just 36 finer Red and Brown examples (11/14). NGC ID# 22B2, PCGS# 2427

- 3297 1909-S VDB MS64 Red NGC.** Only 484,000 examples were struck of this unchallenged key date, in the first year of the new Lincoln cent design. This is a lovely near-Gem with rich red toning and sharp strike definition. A couple of nicks on the obverse and a few milky spots on the upper reverse account for the lack of a higher grade. NGC ID# 22B2, PCGS# 2428

---

**1909-S VDB Lincoln Cent, MS65 Red  
Impressive, Delightful Example  
Ex: Pittman**

- 3298 1909-S VDB MS65 Red PCGS.** Ex: Pittman. From the superb Pittman collection comes this impressive, visually appealing Gem example of the preeminent Lincoln cent key issue; housed in a green label PCGS holder bearing the name of the famous collection that it was once a part of. Well-struck and lustrous, with few spots and just a couple of faint marks near the temple. Both sides host a delightful array of variegated colors. Ex: *Pittman I* (Akers, 10/1997), lot 295. NGC ID# 22B2, PCGS# 2428

---

**1909-S VDB Cent, MS65 Red  
The Iconic Collector Coin**

- 3299 1909-S VDB MS65 Red PCGS.** Popular and in-demand from the time they were made, the 1909-S VDB cents have been numismatic treasures for more than a century. Red Gem representatives are particularly prized, and this coin retains considerable vibrancy on surfaces where copper-gold is the predominant color. Minor flyspecks contribute to the grade. NGC ID# 22B2, PCGS# 2428

---

**1909-S VDB Lincoln Cent  
Gem Full Red Example**

- 3300 1909-S VDB MS65 Red PCGS.** An always in-demand issue, due to its key date status, but seldom seen above the Gem full Red grade level. This piece is softly satiny, with varying shades of honey-gold, lilac, and coppery-red overlapping each side. The strike is sharp, and only a few tiny specks are discernable with loupe. NGC ID# 22B2, PCGS# 2428

---

**1909-S VDB Lincoln Cent, MS65 Red  
Luminous, Shimmering Surfaces**

- 3301 1909-S VDB MS65 Red PCGS.** Always in demand, the 1909-S VDB Lincoln cent is challenging in full Red grades finer than MS65. This piece is devoid of noticeable abrasions, and also exhibits bold design definition. Glowing orange-gold, bronze, and pale olive hues encompass each side, with a few faint specks scattered over the upper reverse. A pleasing example of this key Lincoln cent issue. NGC ID# 22B2, PCGS# 2428

- 3302 1909-S MS66+ Red and Brown PCGS. CAC.** The 1909-S Lincoln cent is a low-mintage first-year key, and this high-end Premium Gem exhibits vibrant mint luster and vivid copper-orange surfaces with a few hints of light brown patina. Population: 8 in 66 (1 in 66+) Red and Brown, 0 finer (12/14).  
*From The College Collection.* NGC ID# 22B4, PCGS# 2433

---

**1911-D Cent, MS66 Red  
Underrated Condition Rarity**

- 3303 1911-D MS66 Red PCGS. CAC.** This first D-mint cent is an undeniable condition rarity, as PCGS has seen only 24 submissions in MS66 Red (one in 66+), with one finer (12/14). The burnt-orange color over the satiny surfaces of this piece is typical, and the obverse shows some die fatigue around the date and mintmark area. A few light flecks appear in the left obverse field; the reverse is trouble-free. NGC ID# 22B8, PCGS# 2446

---

**1912-D Cent, MS66 Red  
Registry-Quality Blazer**

- 3304 1912-D MS66 Red PCGS. CAC.** An important Registry Set candidate, this Premium Gem 1912-D Lincoln cent is tied with just 17 others as the finest certified at PCGS (12/14). The preservation is exceptional, with satiny copper-red luster engulfing both sides. Struck from worn dies, as usual, but retaining strong detail on the obverse bust. NGC ID# 22BB, PCGS# 2455

---

**1913 Lincoln Cent, MS66+ Red  
Luminous, Satiny Surfaces**

- 3305 1913 MS66+ Red PCGS. CAC.** The Lincoln cent connoisseur will appreciate the vibrant, coppery-red luster and the sharp strike that this high-end Premium Gem possesses. The surfaces have a distinct matte-like appearance, and exhibit only a few tiny specks upon magnified examination. An important coin for the Registry Set specialist or the casual series collector. Population: 66 in 66 (1 in 66+) Red, 7 finer (12/14). NGC ID# 22BD, PCGS# 2461

---

**1913-D Lincoln Cent, MS65 Red**  
**Elusive in Full Red Grades**

- 3306 1913-D MS65 Red PCGS.** This piece exhibits pale coppery-gold color overall, with deeper hues in an arc at the upper reverse. A well-defined and delightfully textured Red Gem example of this conditionally elusive Denver issue. Only a few tiny specks are detected upon close examination. PCGS has graded just 18 numerically finer Red representatives (11/14).  
*Ex: Chicago Signature (Heritage, 8/2011), lot 3187. NGC ID# 22BE, PCGS# 2464*

---

**1914 Cent, MS66 Red**  
**Sharp, Luminous Motifs**

- 3307 1914 MS66 Red NGC.** Dazzling cartwheel luster sweeps this pumpkin-gold and cherry-red Premium Gem. The reverse exergue displays a few dashes of olive iridescence. The strike is impressive, since any incompleteness is relegated to portions of the rims. Imposing quality for this unexpectedly scarce early Philadelphia issue. Census: 17 in 66 Red, 0 finer (11/14).  
*Ex: Dallas Signature (Heritage, 10/2006), lot 300. NGC ID# 22BG, PCGS# 2470*

---

**1914-D Cent, Red and Brown Near-Gem**  
**A Collector Classic**

- 3308 1914-D MS64 Red and Brown PCGS. CAC.** The 1914-D cent had a mintage more than twice that of its 1909-S VDB predecessor, but it did not have the same publicity. As a result, while decent Mint State 1909-S VDB cents are readily available for those with a few thousand dollars, quality 1914-D cents in the same grades are much harder to come by. This MS64 Red and Brown example is only slightly mellowed with only one flyspeck of significance at 3 o'clock on the obverse. Small cuts at Lincoln's forehead, left beard, and shoulder contribute to the grade, but as the CAC sticker shows, the MS64 Red and Brown assessment is fair. PCGS has certified just 48 examples in numerically finer Red and Brown grades (11/14). NGC ID# 22BH, PCGS# 2472

---

**1914-D Cent, MS64 Red and Brown**  
**Attractive Key-Date Lincoln**

- 3309 1914-D MS64 Red and Brown PCGS. CAC.** This is an extremely attractive example of this key-date issue, still quite lustrous on well-struck surfaces that are just slightly over the border from a full Red designation, chiefly pinkish-orange with some pale blue in the left obverse and lower reverse fields. A loupe reveals some tiny contact marks on the portrait, undistracting and consistent with the grade. NGC ID# 22BH, PCGS# 2472

---

**1914-D Cent, MS65 Red and Brown**  
**Attractive and Well-Struck**

- 3310 1914-D MS65 Red and Brown PCGS.** The surfaces on this piece when viewed under a loupe are subtly striated diagonally, creating a slight woodgrain appearance more commonly seen on the cents of 1909. The sharp strike is characteristic of this issue, one that largely went unsaved at its production. Lincoln's coat and hair are brought up to nice effect, as are all reverse design elements. The tan-brown obverse and brick-red reverse are equally free of distractions on this key-date cent, a piece that would fit equally well into a Brown or Red and Brown set at a fraction of the cost of a full Red example. Population: 48 in 65 (1 in 65+) Red and Brown, 0 finer (12/14). NGC ID# 22BH, PCGS# 2472

**1914-D Cent, MS65+ Red and Brown  
No Finer Red and Brown at PCGS**

- 3311 1914-D MS65+ Red and Brown PCGS. CAC.** Unlike the 1909-S VDB cent, which was saved in quantity and indeed a target of speculation on its debut, the 1914-D was largely neglected and today is far more available in circulated grades than Mint State. This is an uncommonly marvelous example, luminous with a mix of pumpkin-orange, brick-red, violet, magenta, and mahogany hues on each side, a classic Red and Brown appearance. The lines of the wheat ears are sharp and the details of the portrait are above-average. Add in a notable lack of marks and the overall eye appeal is amazing. Population: 48 in 65 (1 in 65+) Red and Brown, 0 finer (11/14). NGC ID# 22BH, PCGS# 2472

**1914-S Cent, MS64+ Red  
Challenging Any Finer**

- 3312 1914-S MS64+ Red PCGS. CAC.** While the 1914-D cent is far more famous, specialists in Lincoln cents know better than to overlook the year's San Francisco issue, for it is a rarity in MS65 Red and better grades. This MS64+ Red piece is the next best thing, surprisingly vibrant with ruddy copper surfaces and only a handful of scattered flyspecks. PCGS has graded just 37 finer Red representatives (11/14). NGC ID# 22BJ, PCGS# 2476

- 3313 1915-D MS65 Red PCGS. CAC.** Copper-orange luster drapes over the nicely preserved surfaces of this Gem. Sharply struck design elements add to the coin's eye appeal, aptly recognized by CAC. Difficult to locate any finer; PCGS has seen fewer than 30 examples better (12/14). NGC ID# 22BL, PCGS# 2482

**1915-D Cent, MS66 Red  
Complete Definition Throughout**

- 3314 1915-D MS66 Red PCGS. CAC.** In MS66 and with full red color still intact, the 1915-D is a truly rare coin, in spite of a mintage in excess of 22 million pieces. This is a remarkably bright almost reddish-yellow example with no mellowing of the surfaces. The strike is intricately detailed with full whiskers on the beard of Lincoln. Population: 28 in 66 Red, 1 finer (12/14). NGC ID# 22BL, PCGS# 2482

**1915-S Cent, MS66 Red  
Among the Finest Known**

- 3315 1915-S MS66 Red NGC.** The 1915-S Lincoln cent is a slightly better date in all grades, but becomes notably elusive in Mint State. In full Red grades, this date is genuinely scarce. NGC has certified only 33 full Red examples in all grades, with the current offering tied with one other for the finest; PCGS has seen only five pieces in this grade, also with none finer (11/14). Both sides display radiant, satiny luster in shades of coppery-gold and deeper red. The design elements are sharply struck, and only a couple microscopic flecks are observed with a lens. A beautiful coin, of obvious importance to Registry Set collectors. NGC ID# 22BM, PCGS# 2485

**Gem 1916-D Lincoln Cent  
Scarce Original Red Example**

- 3316 1916-D MS65 Red PCGS.** The 1916-D Lincoln cent is readily available in lower grades, but examples in Gem condition, with original red surfaces are quite elusive. The present coin is a well-detailed Gem, with vibrant mint luster and red surfaces that are seemingly carbon-free. Population: 50 in 65 (2 in 65+) Red, 15 finer (11/14).  
*Ex: Beverly Hills Signature (Heritage, 11/2011), lot 3082.* NGC ID# 22BP, PCGS# 2491

---

**1916-D Cent, Red Gem  
Excellent Detail**

- 3317 1916-D MS65 Red PCGS.** The coveted Red label has been applied to only a tiny fraction of the 1916-D cents certified by the major services. This pumpkin-orange Gem has considerable charm thanks to its texture and detail. A faint fingerprint fragment is noted at the top left part of the reverse. Population: 50 in 65 (2 in 65+) Red, 15 finer (12/14). NGC ID# 22BP, PCGS# 2491

---

**1916-D Cent, MS65 Red  
Seen Seldom at This Level**

- 3318 1916-D MS65 Red PCGS.** After the notably low mintage of the 1914-D cent, production of that denomination at Denver rebounded and in 1916 it approached 36 million pieces. Even so, Red Gem representatives like this one are conditionally rare today. This copper-gold example has only a few flyspecks and an area of mellowing at STATES and AMERICA. Population: 50 in 65 (2 in 65+) Red, 15 finer (12/14). NGC ID# 22BP, PCGS# 2491

- 3319 1916-D MS65 Red PCGS.** Early branch mint Lincoln cents with full mint Red surfaces are hard to come by. This Gem representative displays strong luster and intense brick-red coloration over each side. The strike detail is above-average, as many coins were struck from widely spaced dies. Population: 50 in 65 (2 in 65+) Red, 15 finer (12/14). NGC ID# 22BP, PCGS# 2491

---

**1916-D Cent, MS65 Red  
Scarce in This Grade**

- 3320 1916-D MS65 Red PCGS.** The issue's mintage of nearly 36 million coins does not allude to the scarcity of Gems with original Red coloration. This representative offers satiny luster and well-struck devices over copper-orange surfaces. The obverse fields show some flowlines from die fatigue, along with scattered charcoal color. Population: 50 in 65 (2 in 65+) Red, 15 finer (12/14). NGC ID# 22BP, PCGS# 2491

---

**1917-D Cent, Sharply Struck MS65 Red  
Rare With This Level of Detail**

- 3321 1917-D MS65 Red PCGS.** Red mint luster exudes from both sides of this Gem, each of which exhibits sharply struck design elements. In fact, design detail is way above average for this issue of which Bowers (2008) says: "A sharply struck original-color gem is a rare bird indeed! Most range from below average to wretched in terms of sharpness. Exceptions exist but are very rare, especially in higher grades."

This coin is one of the rare exceptions with respect to strike. Lincoln's beard and bowtie are sharp, as are all lines and grains in the wheat stalks. Several small spots are noted, but these are also typical for this issue. Nevertheless, they are over-balanced by the sharp strike. Population: 44 in 65 Red, 6 finer (11/14). NGC ID# 22BT, PCGS# 2500

- 3322 1918 MS66+ Red PCGS. CAC.** A splendidly preserved example of this early Lincoln cent issue, showing unimpeded mint luster and lovely orange-red obverse and almond-tan reverse. Population: 14 in 66+ Red, 24 finer (12/14). NGC ID# 22BV, PCGS# 2506

---

**1918 Lincoln Cent, MS67 Red  
Only One Numerically Finer at PCGS**

- 3323 1918 MS67 Red PCGS.** Flashy mint luster emphasizes the smooth, orange-red patina and essentially full details of this Superb Gem cent. A single tiny carbon mark is hidden in the seam behind Lincoln's shoulder and is visible at an angle with a glass. This piece is tied numerically with the example in the current highest-rated Registry Set. Population: 23 in 67 (2 in 67+) Red, 1 finer (11/14). NGC ID# 22BV, PCGS# 2506

---

**1918-D Cent, Boldly Struck MS65 Red**

**3324 1918-D MS65 Red PCGS.** The eye appeal of this Gem 1918-D cent is considerable for the issue, with needle-sharp design definition and deeply satiny, coppery-orange mint luster. No carbon spots are observed on the reverse, and the surfaces are free of major abrasions. A small area of dulled luster behind Lincoln's head is noted and a few related flecks at LIBERTY. Population: 30 in 65 Red, 8 finer (12/14). NGC ID# 22BW, PCGS# 2509

**3325 1920-D MS65 Red PCGS.** Orange-gold luster enriches both sides of this sharply struck Gem. A crack runs from above the ES in STATES to the rim, and the reverse is rotated a few degrees counterclockwise. Population: 86 in 65 Red, 7 finer (12/14). NGC ID# 22C4, PCGS# 2527

**3326 1921-S MS64 Red PCGS.** Streaks of faint reddish-gold traverse the lustrous surfaces of this well-struck near-Gem. A few minute marks are within the confines of the grade designation. Population: 87 in 64 Red, 17 finer (12/14). NGC ID# 22C7, PCGS# 2536

**3327 1922-D MS65 Red PCGS.** This fire-red Gem provides scintillating luster. The strike is crisp, aside from slight incompleteness on the O in ONE. Minor carbon fails to deny the eye appeal. Certified in a green-label holder. Population: 93 in 65 Red, 10 finer (11/14).  
*Ex: Long Beach Signature (Heritage, 2/2008), lot 3190, which realized \$2,012.50. NGC ID# 22C8, PCGS# 2539*

**3328 1922 No D, Strong Reverse, FS-401, XF40 PCGS.** Medium brown surfaces are devoid of significant marks or spots. The design elements are appropriately defined. A nice key-date representative. PCGS# 37676 Base PCGS# 3285

---

**1922 No D Cent, AU50  
Strong Reverse**

**3329 1922 No D, Strong Reverse, FS-401, AU50 PCGS.** Die Pair 2. The reverse is as sharp as the missing-mintmark obverse is mushy. Medium-brown color on the obverse has a lighter mahogany counterpart over a minority of the reverse. A lightly worn but thoroughly pleasing example of one of the most sought-after Lincoln cent varieties. PCGS# 37676 Base PCGS# 3285

---

**1922 No D Cent, Near-Mint  
The Popular Strong Reverse**

**3330 1922 No D, Strong Reverse, FS-401, AU58 PCGS.** Die Pair 2. The obverse die used to strike this 1922 No D cent should have been replaced, but the reverse die was, creating the popular Die Pair 2. A lightly worn example of the famous Mint mistake, pale violet and brown overall, and still-luminous with scattered small marks but no singularly mentionable faults. Slight color changes appear over the high points. PCGS# 37676 Base PCGS# 3285

---

**1922 No D Weak Reverse, MS62 Red and Brown**

**3331 1922 No D Weak Reverse MS62 Red and Brown PCGS.** Die Pair 3. Bright gold color intermingles with streaks of lilac patina. The borders are not fully struck, mostly due to the die state, but the centers have good definition. Not as highly regarded as the Strong Reverse variety (Die Pair 2) but nonetheless a scarce issue in Mint State with some original mint color. Population: 12 in 62 Red and Brown, 32 finer (11/14).  
*Ex: Central States Signature (Heritage, 5/2004), lot 5685. PCGS# 2541*

---

**1922 Cent, MS63 Red and Brown  
No D, Weak Reverse**

**3332 1922 No D Weak Reverse MS63 Red and Brown PCGS.** Die Pair 3. This scarce variety cent displays ample orange-gold color, although lilac and jade-green shades are also evident. The surfaces are pleasing despite a minor fingerprint near the profile. Rotation beneath a light and loupe reveals a ghostly Denver mintmark beneath the first 2 in the date. Population: 23 in 63 Red and Brown, 9 finer (11/14).  
*Ex: FUN Signature (Heritage, 1/2006), lot 217. PCGS# 2541*

---

1923 Cent, MS67 Red

- 3333 1923 MS67 Red PCGS.** Without the Red designation the 1923 cent is a relatively common issue, but when that color category is combined with a Superb Gem grade, rarity and a significant price are the result. This MS67 Red piece is vibrant peach and copper-gold with only minor spotting below the word LIBERTY and at the lower reverse. Population: 14 in 67 Red, 1 finer (11/14). NGC ID# 22CA, PCGS# 2545

---

1924-D Cent, MS66 Red and Brown  
Tied for Finest in This Color Category

- 3334 1924-D MS66 Red and Brown NGC.** The 1924-D Lincoln cent had a fairly low mintage of only a little more than 2.5 million coins, and is an oft-overlooked semikey date in high grades. This Premium Gem representative displays a well-balanced, three-way blend of olive, burgundy, and coppery-red hues, while the underlying luster is largely devoid of contact marks. The O in ONE is not fully brought up, but the relief elements are otherwise bold. Census: 4 in 66 Red and Brown, 0 finer (11/14). NGC ID# 22CD, PCGS# 2553

---

1924-S Cent, Gem Red and Brown  
Notable to Series Specialists

- 3335 1924-S MS65 Red and Brown NGC.** The 1924-S Lincoln cent issue is a favorite of series specialists, but others might be surprised to learn that it is among the most elusive S-mint issues in Gem Red condition. This Gem Red and Brown example displays an obverse that is about 50% red and 50% medium-brown with a typical strike. The reverse has perhaps 60% original red, though a certain bluntness of detail is the tradeoff. Census: 13 in 65 Red and Brown, 0 finer (11/14).  
Ex: *The Brenda John Collection (Heritage, 6/2010)*, lot 139. NGC ID# 22CE, PCGS# 2556

---

1925-D Cent, MS65 Red  
Old Green Label Holder

- 3336 1925-D MS65 Red PCGS. CAC.** A lovely brick-red Gem with vibrant luster and refreshingly unabraded fields and devices. The strike is generally sharp, despite trivial incompleteness on some peripheral elements. One tiny spot between the O and N in ONE corresponds to the grade. Encased in a green label holder. Population: 47 in 65 Red, 2 finer (11/14).  
Ex: *FUN Signature (Heritage, 1/2009)*, lot 491; *Beverly Hills Signature (Heritage, 11/2011)*, lot 3087. NGC ID# 22CG, PCGS# 2563

**1926-D Cent, MS65 Red  
Attractive, High-End Example**

**3337 1926-D MS65 Red PCGS.** The 1926-D cent is an exceptionally scarce and often overlooked issue in Gem Red condition, barely besting the key 1924-D among Denver issues of the decade in number of high grade survivors. The clean, attractive surfaces of this piece gleam with warm rose-peach hues, and the obverse fields have a smooth, creamy finish. Certified in a green-label holder, this piece shows scattered flecks on both sides. Population: 50 in 65 Red, 4 finer (11/14).

*Ex: Long Beach Signature (Heritage, 9/2002), lot 5585; Portland Signature (Heritage, 3/2004), lot 5231; Long Beach Signature (Heritage, 9/2004), lot 5515; Long Beach Signature (Heritage, 6/2010), lot 144. NGC ID# 22CK, PCGS# 2572*

**3338 1927-D MS65 Red PCGS.** One of the true D-mint keys to the Lincoln cent series. This Gem Red 1927-D displays a better-than-usual strike and flowing mint luster on attractive surfaces with no distractions other than a few scattered flecks seen under a loupe. Population: 53 in 65 Red, 2 finer (12/14). NGC ID# 22CN, PCGS# 2581

**1927-S Cent, Elusive MS65 Red  
Attractive and Carbon-Free**

**3339 1927-S MS65 Red PCGS.** The 1927-S Lincoln cent issue in Gem Mint State is a condition rarity within the series, even if not as celebrated as its older sibling, the 1926-S. This piece offers attractive orange-red surfaces with faint greenish tones. Marks are few and minor, and there is no mentionable carbon. The minor flowlines in the obverse field and the moderate softness on the hair and beard are due to die fatigue, but this piece is nonetheless high-end for the grade and the issue. Certified in a green-label holder. Population: 16 in 65 Red, 0 finer (12/14). NGC ID# 22CP, PCGS# 2584

**1930-S Cent, MS67 Red  
Tied for Finest Certified**

**3340 1930-S MS67 Red PCGS.** An important opportunity for the Registry Set collector, this Superb Gem 1930-S Lincoln cent is tied with just four others for the finest certified, both numerically and within the Red color category, at PCGS; NGC has seen 24 submissions in the MS67 Red grade, also with none finer (12/14). A full grade point finer than the example represented in the current highest-rated Registry Set, this remarkable piece is also visually unsurpassed. The strike is bold and the softly frosted surfaces are devoid of mentionable flaws. Uniform coppery-orange patina engulfs each side, delivering a shimmering radiance. NGC ID# 22CZ, PCGS# 2611

**3341 1933 MS67 Red PCGS.** Rich, even red color characterizes this nearly perfectly preserved cent. The 1933 has a lower Depression-era mintage and few high-grade examples were set aside. Population: 46 in 67 (1 in 67+) Red, 0 finer (12/14). NGC ID# 22D7, PCGS# 2629

1936 Doubled Die Obverse Cent  
MS63 Brown, FS-101

- 3342** 1936 Doubled Die Obverse, FS-101, MS63 Brown PCGS. *Cherrypickers'* lists three different varieties of doubled die obverse 1936 cents, but FS-101 has the strongest doubling and is the variety listed in the *Guide Book*. All obverse legends exhibit a distinct spread. This chocolate-brown example is fully struck and satiny with a few unimportant marks and a faint fingerprint on the lower reverse. *Cherrypickers'* states, "this variety is extremely rare in Mint State." PCGS# 82648

1936 Cent, MS64 Red and Brown  
FS-101, Doubled Die Obverse

- 3343** 1936 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS. CAC. All obverse legends are noticeably shifted to the lower-left. This is one of three highly sought-after doubled die varieties for this issue. This Choice example is well-struck, with fiery-red luster highlighting burgundy and auburn overtones on each side. No significant abrasions are observed. Population: 2 in 64 Red and Brown, 1 finer (12/14). PCGS# 82649

1936 FS-101 Cent, MS64 Red  
Doubled Die Obverse

- 3344** 1936 Doubled Die Obverse, FS-101, MS64 Red PCGS. Strong die doubling on all obverse legends allows FS-101 to achieve separate *Guide Book* listing. The present lustrous peach-gold Choice cent has an intricate strike and a smattering of pinpoint carbon. Marks are confined to delicate grazes on the field near the profile. PCGS# 82650

1936 Doubled Die Obverse Type One, FS-101, MS66  
One of the Best Lincoln Cent  
Doubled Obverse Varieties

- 3345** 1936 Doubled Die Obverse, FS-101, MS66 Red PCGS. One of the most prominent doubled die obverse varieties in the Lincoln cent series, along with the 1955, the 1958, and the 1972. This variety and FS-102 are identified as the most desirable for the date by Bill Fivaz and J.T. Stanton in *The Cherrypicker's Guide to Rare Die Varieties*. John Wexler lists five obverse doubled dies in his book, along with a couple of minor reverse doubled die varieties. A wide spread is noted on all of the obverse legends: most obvious on TRUST, LIBERTY, and the date. This is a lustrous, well-struck example with appealing coloration and clean, carefully preserved surfaces. Population: 6 in 66 Red, 1 finer (11/14). PCGS# 82650

- 3346** 1936 Doubled Die Obverse, FS-102, MS65 Red PCGS. The date is clearly die doubled, as is the RTY in LIBERTY. The peach-red obverse center is encompassed by a broad sea-green border. The reverse displays similar but evenly distributed shades. Lustrous and well struck with exemplary preservation. PCGS# 92650

- 3347** 1936 Doubled Die Obverse, FS-102, MS65+ Red PCGS. CAC. The broken upright on the R of LIBERTY distinguishes FS-102 from the other two *Cherrypickers'* DDO varieties for the date. The date is strongly die doubled, similar to FS-101, though LIBERTY and TRUST show less doubling than on the latter variety. A lustrous peach-red Gem with mark-free surfaces and a good strike. A loupe reveals some localized minute obverse carbon. Population: 18 in 65 (1 in 65+) Red, 13 finer (12/14). PCGS# 92650

**1936-S Lincoln Cent, MS67+ Red  
Sole Finest Certified at Both Services**

- 3348 1936-S MS67+ Red PCGS. CAC.** The importance of this coin to the Registry Set collector cannot be overstated. This piece ranks as the sole finest 1936-S cent certified by PCGS; only 53 coins are encapsulated at the MS67 level, all full Red examples, and this is the only one award a Plus designation (12/14). The green CAC endorsement label only heightens the desirability. The coin is well-struck, with glowing coppery-orange luster. A couple tiny, faint flecks are noticed with a lens, but the preservation is exceptional, overall. NGC ID# 22DG, PCGS# 2656

**1940 Lincoln Cent, MS67+ Red  
Dazzling Visual Appeal**

- 3349 1940 MS67+ Red PCGS. CAC.** This high-end Registry Set candidate is the very definition of a Superb Gem; both sides are vibrant with undisturbed coppery-red luster that fades to a mint-gold halo around the peripheries, while the surfaces are completely devoid of carbon spotting. The strike is sharp and the eye appeal is simply incredible. Only five coins are numerically finer at PCGS (12/14). NGC ID# 22DT, PCGS# 2686
- 3350 1941 Doubled Die Obverse, FS-101, MS65 Red PCGS.** LIBERTY, TRUST, and the 4 in the date exhibit impressive die doubling. A well struck and unmarked orange-gold Gem with a hint of lilac and silver-blue above LIBERTY and on the back of Lincoln's head. A few pinpoint flecks are noted near the date. PCGS# 37780 Base PCGS# 92695
- 3351 1941 Doubled Die Obverse, FS-101, MS65 Red PCGS. CAC.** The doubling is most obvious on the letters in LIBERTY and IN GOD WE TRUST. Both sides of this Gem are awash with orange-gold luster, and the design elements are well-struck. Devoid of significant marks or spots. PCGS# 37780 Base PCGS# 92695

**1941 Cent, MS66 Red  
FS-102, Doubled Die Obverse**

- 3352 1941 Doubled Die Obverse, FS-102, MS66 Red PCGS.** This variety displays broad doubling on IN GOD WE TRUST and on the 4 in the date. Each side of this example exhibits fiery-red coloration with emanating luster throughout. The strike shows strong detail and magnification reveals only a handful of well-hidden marks that do not detract. Population: 19 in 66 (1 in 66+) Red, 0 finer (12/14). PCGS# 37783 Base PCGS# 92695

**1941 Doubled Die Obverse Cent  
MS65 Red, FS-103**

- 3353 1941 Doubled Die Obverse, FS-103, MS65 Red PCGS.** The central obverse is die doubled with a fairly wide spread, evident on the earlobe, the 19 in the date, and the TY in LIBERTY. Nicely struck and lustrous with even orange color aside from minor carbon near the wheat ears and an inconspicuous spot above Lincoln's shoulder. Population: 2 in 65 Red, 3 finer (11/14). PCGS# 37786 Base PCGS# 92695
- 3354 1942-S MS67+ Red PCGS. CAC.** The golden surfaces of this high-end Superb Gem are awash in booming luster. Both sides are well-struck and have been very well cared for. The eye appeal is outstanding. PCGS# 2710

**1943-S Steel Cent, MS68  
Dazzling Luster and Appeal**

- 3355 1943-S MS68 PCGS. CAC.** The San Francisco is the scarcest 1943 steel cent issue overall, and it is rarely seen above the MS67 grade level. This superb, CAC-endorsed MS68 coin is vibrant in frosty, ice-blue luster, with sharp design elements and very nearly flawless surfaces. This piece is tied for the finest certified at both major grading services. Population: 54 in 68, 0 finer (12/14). PCGS# 2717

---

**1944-D/S Cent, MS65 Red  
FS-511, *Guide Book Variety***

**3356 1944-D/S FS-511 MS65 Red PCGS. CAC.** The *Guide Book* variety with the upper curve of an S above the Denver mintmark. The obverse and upper reverse are orange-red, while the lower reverse is olive-green. Lustrous and sharply struck with a couple of tiny tan freckles on the reverse and a few delicate grazes on the right obverse field. PCGS# 37834 Base PCGS# 2728

**3357 1945-S MS67+ Red PCGS.** Fiery orange surfaces are imbued with a splash of steel-blue on the obverse of this high-end Superb Gem. Both sides are virtually flawless and sharply struck. NGC ID# 22EJ, PCGS# 2740

---

**1946 Lincoln Cent, MS67 Red  
Tied for Finest at Both Services**

**3358 1946 MS67 Red PCGS.** Registry Set specialists are sure to recognize the importance of this immaculately preserved Superb Gem, exhibiting fiery-red coloration and sharp strike definition throughout. The surfaces are essentially flawless with only a few carbon specks noted on each side. PCGS reports 20 grading events (likely including resubmissions) in MS67 Red and no examples finer (11/14). NGC ID# 22EK, PCGS# 2743

---

**1946 Lincoln Cent, MS67 Red  
Vibrant Red Color**

**3359 1946 MS67 Red PCGS.** Rich coppery-red and rose hues blend across the radiant obverse, while the reverse showcases strong copper-gold luster. Virtually free of carbon and abrasions, this beautiful Superb Gem is tied for the finest certified at PCGS (12/14), and is also numerically equal to the coin represented in the current highest-rated Registry Set. NGC ID# 22EK, PCGS# 2743

---

**1947 Cent, MS67 Red  
Tied for Finest at Both Services**

**3360 1947 MS67 Red PCGS. CAC.** Spectacular copper-orange color and radiant mint luster blend over each side to endow this Super Gem with enviable visual appeal, as affirmed by the green CAC label. This well-struck coin shows only a few minute ticks visible with magnification and is one of just 20 examples certified MS67 Red by PCGS, with none finer (12/14). NGC ID# 22EN, PCGS# 2752

---

**1948 Lincoln Cent, MS67 Red  
Lustrous and Beautifully Toned**

**3361 1948 MS67 Red PCGS.** Intense, frosty mint luster complements sharply struck design elements on this Superb Gem representative. The surfaces are clean and attractively toned, with deep orange-red coloration throughout each side. An important opportunity for the Registry Set collector, as PCGS has seen only 16 examples in this grade, and none finer (12/14). NGC ID# 22ES, PCGS# 2761

---

**1948 Cent, MS67 Red  
Deep Original Patina**

**3362 1948 MS67 Red PCGS.** Mercurial mint luster shifts and alters the visual palette of pink, orange, and ruby-red toning for this Superb Gem cent when viewed from different angles, or when rotated under light. A full strike is confirmed by the lofty grade. Just a few light freckles populate the reverse, but this coin is remarkably clean and smooth with undeniable eye appeal. Population: 16 in 67 Red, 0 finer (12/14). NGC ID# 22ES, PCGS# 2761

**1948 Cent, MS67 Red**  
**Registry-Quality Representative**

- 3363 1948 MS67 Red PCGS. CAC.** Wisps of lilac and rose accent fiery copper-red mint bloom on each side, while the devices are well-defined and the surfaces are essentially free of abrasions. A couple minute carbon specks are observed with a lens, though the appeal is uninhibited to the unaided eye. Tied with just 15 others as the finest certified at PCGS (12/14). NGC ID# 22ES, PCGS# 2761

**1949 Cent, MS67 Red**  
**None Certified Finer by PCGS or NGC**

- 3364 1949 MS67 Red PCGS.** From an original mintage of well over 200 million coins comes this conditionally rare Superb Gem, one of just 56 pieces rated MS67 Red by PCGS and NGC and none finer. Sharply struck with beautiful mint-red coloration and lovely, shimmering luster. Some interesting, horizontal die striations are noted on the reverse, but post-strike surface flaws are virtually nonexistent on both sides of this impressive example, destined for a top-notch Registry Set collection. Population: 18 in 67 Red, 0 finer (12/14). NGC ID# 22EV, PCGS# 2770

**1949 Cent, MS67 Red**  
**Rich Mint Luster**

- 3365 1949 MS67 Red PCGS. CAC.** Frosty, coppery-red mint bloom illuminates boldly struck devices on each side of this well-preserved Superb Gem representative. A few faint freckles are noted on both sides upon close examination, though the appeal is hardly inhibited. This piece is tied for the finest certified at PCGS (12/14). NGC ID# 22EV, PCGS# 2770

**1952-S Cent, MS67+ Red**  
**Above-Average Strike**

- 3366 1952-S MS67+ Red PCGS.** Both sides of this high-end Superb Gem are awash with orange-gold luster. The design elements are better-struck than usually seen on this issue, including Lincoln's bowtie and the lines and grains in the wheat stalks. A few minute marks are within the parameters of the designated grade. Neither service has graded any numerically finer (12/14). NGC ID# 22F8, PCGS# 2803

- 3367 1953-D MS67 Red PCGS.** This gorgeous representative offers satiny luster over unimpaired surfaces with faint lime-green color. Red Premium Gems from this issue are fairly available. However, the certified population data dramatically declines at the Superb Gem level. From an original mintage of over 700 million coins, PCGS has certified a mere 30 examples in 67 Red, and none finer (12/14). NGC ID# 22FA, PCGS# 2809

- 3368 1955 Doubled Die Obverse, FS-101, AU55 NGC.** This is the most dramatic and highly-sought of all Lincoln cent doubled die varieties. This example displays satiny-smooth surfaces and appealing reddish-brown toning. A few minor, inoffensive marks are noted on the obverse. A lovely Choice AU example of this famous variety. PCGS# 37910 Base PCGS# 2825

- 3369 1955 Doubled Die Obverse, FS-101, AU58 PCGS.** A pleasing medium brown example with tinges of original orange luster on the obverse. Attractive surfaces retain nearly full cartwheel luster on each side.  
*Ex: Long Beach Signature (Heritage, 9/2010), lot 3373. PCGS# 37910 Base PCGS# 2825*

- 3370 1955 Doubled Die Obverse, FS-101, AU58 PCGS. CAC.** An appealing example of the most important doubled die variety of the Lincoln cent series. The mahogany-red surfaces are glossy and clean, with minimal wear noted on a few of the high points. PCGS# 37910 Base PCGS# 2825

- 3371 1955 Doubled Die Obverse, FS-101, MS61 Brown NGC. CAC.** One of the most famous and glaringly obvious Mint blunders in all of 20th century numismatics, the 1955 Doubled Die Obverse cent is a popular issue in all grades. This glossy piece is mildly abraded, as the grade suggests, but retains pleasing eye appeal, as is evidenced by the green CAC approval label. PCGS# 37910 Base PCGS# 2825

- 3372 1955 Doubled Die Obverse, FS-101, MS63 Brown PCGS.** Rich olive-brown toning blankets this key date doubled die cent, although hints of the original mint red cling to obverse recesses. Satiny and nearly unmarked with good eye appeal. PCGS# 37910 Base PCGS# 2825

**1955 Doubled Die Cent, MS64 Brown  
A Lincoln Cent Icon**

- 3373** 1955 Doubled Die Obverse, FS-101, MS64 Brown NGC. The iconic doubled die that inspired a generation of collectors, offered here as a rich medium-brown near-Gem with faint violet and gold accents. The doubling is crisp, particularly on the date, though Lincoln's portrait is softer. Finer Brown examples are conditionally rare.

Ex: Dallas Signature (Heritage, 10/2006), lot 345. PCGS# 37910 Base PCGS# 2825

**1955 FS-101 Cent, MS64 Brown  
Doubled Die Obverse**

- 3374** 1955 Doubled Die Obverse, FS-101, MS64 Brown PCGS. CAC. Blended chocolate-brown and sea-green toning encompass this coruscating and virtually unabraded near-Gem. The reverse displays a few pinpoint flecks. Well struck and vastly superior in quality to most survivors. The most famous of all doubled die varieties. PCGS# 37910 Base PCGS# 2825

**1955 Cent, MS64 Red and Brown  
Doubled Die Obverse**

- 3375** 1955 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS. CAC. This is the widely popular *Guide Book* variety, with bold die doubling on all obverse lettering. This variety is especially challenging in Mint State grades with remaining red color. The current representative displays satiny, glowing orange-red luster with just a scattering of light burgundy color. The design elements are unusually well-defined for the issue. PCGS has certified only seven numerically finer Red and Brown examples (12/14). PCGS# 37911 Base PCGS# 2826

**1955 Doubled Die Obverse Cent  
MS64 Red**

- 3376** 1955 Doubled Die Obverse, FS-101, MS64 Red PCGS. Most examples of the famous 1955 doubled die cent are predominantly brown, but the present lustrous near-Gem is peach-red. The sharply struck surfaces exhibit minimal carbon, and marks are inconsequential aside from a pair of brief parallel lines on the cheek. PCGS# 37912 Base PCGS# 2827

**1955 Doubled Die Cent, MS64 Red  
Impressive High-Grade Example**

- 3377** 1955 Doubled Die Obverse, FS-101, MS64 Red PCGS. This is the most noteworthy of all Lincoln cent doubled die varieties. The current near-Gem example is conditionally scarce in this high grade, and rare any finer. An impressively struck piece with vibrant luster and lovely mint red surfaces. A couple of small spots and a handful of minor abrasions on the obverse prevent an even finer grade assessment. PCGS# 37912 Base PCGS# 2827

**1960 Lincoln Cent, Large Date, MS67 Red  
Conditionally Rare With Registry Set Potential**

- 3378** 1960 Large Date MS67 Red PCGS. A supremely lustrous Superb Gem cent with rich, even cherry-red toning and razor-sharp strike definition. Other than a couple of tiny specks in the lower right obverse field, both sides of the piece are carbon-free. A beautifully preserved coin with impressively clean surfaces, worthy of the finest Lincoln cent set. Population: 10 in 67 Red, 0 finer (12/14). NGC ID# 22FW, PCGS# 2860

---

1962 Lincoln Cent, MS67 Red  
Essential for a Registry Set

- 3379 1962 MS67 Red PCGS. This late-date cent looks essentially like it did the day it left the Mint. The surfaces are bright and show dazzling orange-red color. Each side is remarkably clean and problem-free with no distracting specks of carbon. Remarkably few examples have attained such a high grade in spite of the mintage in excess of 609 million pieces. Population: 12 in 67 (1 in 67+) Red, 0 finer (12/14). NGC ID# 22G3, PCGS# 2878

---

1962 Lincoln Memorial Cent, MS67 Red  
Registry Set Candidate

- 3380 1962 MS67 Red PCGS. Despite the 609 million-plus mintage of this issue, only an even dozen submissions have made the Superb Gem Red grade-color levels at PCGS. This fortunate exception boasts excellent preservation and luster on brick-red surfaces with a few scattered faint brownish flecks and a decent strike. Population: 12 in 67 (1 in 67+) Red, 0 finer (10/14). NGC ID# 22G3, PCGS# 2878
- 3381 1963-D MS66+ Red PCGS. Radiant orange-gold surfaces of this high-end Premium Gem display a couple splashes of ice-blue on the reverse. Both sides are well-struck and free of mentionable marks or spots. NGC ID# 22G6, PCGS# 2887

---

1970-S Doubled Die, Large Date Cent, MS65 Red  
FS-101, A Very Rare Variety

- 3382 1970-S Large Date, Doubled Die Obverse, FS-101, MS65 Red NGC. This very rare issue is listed in the *Guide Book of United States Coins*. The 2009 *Cherrypickers' Guide* states: "To this point, fewer examples are known than the previous listing, the 1969-S. However, this variety has not received the publicity as the previous, thus the lower values." To underscore the rarity of this variety, we have no comparable coins to list for price history under the new PCGS variety number.

Doubling is seen on the date but is most significant on the left sides of LIBERTY and on IN GOD WE TRUST. Glowing red luster emanates from both sides of this Gem, each of which exhibits sharply struck design elements. Impeccably preserved surfaces are free of mentionable marks or spotting. A great find for the Lincoln cent collector.

---

**1972-D Lincoln Cent, MS67 Red  
Significant Registry Set Condition Rarity**

**3383 1972-D MS67 Red PCGS.** A blazing Red Registry Set contender, this satiny Superb Gem delivers radiant luster and well-defined motifs. A few tiny specks are noted on each side with a loupe, though the surfaces are otherwise devoid of noticeable flaws. PCGS has certified only 12 coins in this grade (1 in 67+), with none finer (11/14). NGC ID# 22GV, PCGS# 2956

**3384 1983 Doubled Die Reverse, FS-801, MS67 Red PCGS.** The Lincoln Memorial and the reverse legends are broadly die doubled north. The most spectacular of several doubled die varieties known for the issue. An essentially immaculate cherry-red and lemon-gold Superb Gem. As usual for the variety, the surfaces are granular, as made and caused by minute gas bubbles beneath the copper plate. Housed in a green label holder. PCGS# 38063 Base PCGS# 3056

**3385 1983 Doubled Die Reverse, FS-801, MS67 Red PCGS.** One of the strongest doubled die varieties of the Lincoln cent series. All legends exhibit a similar prominent shift to the north. The obverse is orange-red, and the reverse is pumpkin-gold aside from a blush of sea-green and russet along the right margin. PCGS# 38063 Base PCGS# 3056

**1984 Doubled Ear Cent, FS-101, MS68 Red  
Remarkable Near-Impeccable Example**

**3386 1984 Doubled Ear, FS-101, MS68 Red PCGS.** A remarkable example of this *Cherrypicker's* variety that shows prominent doubling on Lincoln's earlobe. Fully struck with near-impeccable surfaces and numerous as-struck "bubbles" on each side. A small spot is noted in the far right obverse field. A conditionally scarce example that should draw attention from Registry Set collectors. Population: 17 in 68 Red, 0 finer (11/14). PCGS# 38088 Base PCGS# 3062

**3387 1995 Doubled Die Obverse, FS-101, MS69 Red NGC.** A practically perfect example of this popular Lincoln cent doubled die, one of the most widely reported varieties ever to appear in the mainstream press. Pale copper-gold and pink surfaces are all but flawless. For the variety, Census: 37 in 69 Red, 2 finer (12/14). PCGS# 38105 Base PCGS# 3127

**3388 1995 Doubled Die Obverse, FS-101, MS69 Red NGC.** Excitement over this variety was the hobby story of 1995, as dealers sold sealed bags of cents for collectors to search for examples. Many were found, but not in the present pristine quality. A lustrous orange-gold early die state example. Census: 19 in 69 Red, 0 finer (11/14). Ex: *Pittsburgh Signature (Heritage, 10/2011)*, lot 3238. PCGS# 38105 Base PCGS# 3127

**3389 1995 Doubled Die Obverse, FS-101, MS69 Red NGC.** Strong doubling is visible on the letters of LIBERTY and IN GOD WE TRUST. Orange-gold luster emanates from the immaculately preserved surfaces that display crisply defined design elements. Tied for the finest graded. Census: 19 in 69 Red, 0 finer (12/14). PCGS# 38105 Base PCGS# 3127

**PROOF LINCOLN CENTS**

**3390 1909 PR65 Red and Brown PCGS. CAC.** Sandy-tan areas intermingle with pale orange and mint-green patina on this lustrous and sharply struck 1909 matte proof. A couple of faint flecks appear only under a loupe, minor in the extreme. NGC ID# 22KS, PCGS# 3304

**1909 Lincoln Cent, PR66 Red and Brown  
Last of Three Designs for the Year**

**3391 1909 PR66 Red and Brown PCGS. CAC.** The third and final design for cents in 1909, represented by a marvelous Red and Brown Premium Gem. The dominant color is mahogany, though close inspection at a tilt under light reveals marvelous colors, particularly on the reverse where green, blue, violet, and peach elements are prominent. Minor spotting appears below OF AMERICA. Population: 37 in 66 (2 in 66+) Red and Brown, 4 finer (11/14). From *The College Collection*. NGC ID# 22KS, PCGS# 3304

**3392 1909 PR64 Red PCGS. CAC.** A gleaming, nicely preserved, orange-red near-Gem of this second proof issue in the Lincoln cents, after the famous VDB coins. The matte surfaces show a nice bold strike and good eye appeal despite the presence of a few light flecks that appear only under a loupe. NGC ID# 22KS, PCGS# 3305

**3393 1910 PR66 Brown PCGS.** Generous orange-gold luster is still visible on the obverse of this Premium Gem while the reverse is toned deep brownish-purple. All design elements are razor sharp. Population: 6 in 66 Brown, 2 finer (12/14). NGC ID# 22KT, PCGS# 3306

**1912 Cent, PR66 Brown  
Above-Average Eye Appeal**

**3394 1912 PR66 Brown PCGS. CAC.** Whispers of golden-orange luster peek through the brown patination at the margins and in some of the recessed areas of this Premium Gem proof cent. Crisp detail is apparent on the design elements, including Lincoln's hair and bowtie, and the grains and lines in the wheat stalks. Close inspection reveals no mentionable abrasions or spots. The CAC label affirms the coin's above-average eye appeal. Population: 19 in 66 (3 in 66+) Brown, 0 finer (12/14). NGC ID# 22KV, PCGS# 3312

---

**1913 Cent, Collectible PR66 Red**

- 3395 1913 PR66 Red PCGS. CAC.** This nicely struck Premium Gem Red proof shows much original reddish-orange texture on both sides with some small areas of lilac on the highest points of each side. The surfaces show no mentionable contact or other impairment, a well-preserved and highly collectible example of this issue. Population: 32 in 66 Red, 6 finer (12/14). CAC shows four in 66 Red and one finer. NGC ID# 22KW, PCGS# 3317
- 

**1913 Cent, Fiery PR66 Red  
Attractive and Sharply Struck**

- 3396 1913 PR66 Red PCGS. CAC.** Fiery red-orange surfaces show generous eye appeal and a lack of mentionable distractions on this high-end Premium Gem matte proof 1913 cent. Even under a loupe there are no singular flecks or mentionable signs of contact. An extremely attractive and sharply struck example of this issue. Population: 32 in 66 Red, 6 finer (12/14). One of four at CAC with the green approval label. NGC ID# 22KW, PCGS# 3317
- 

**1914 Lincoln Cent, PR66 Red  
Bright Orange Color**

- 3397 1914 PR66 Red PCGS. CAC.** Finely textured matte surfaces range from bright orange prevailing on the obverse to slightly mellowed orange on the reverse, with some faint brushes of pale brown still well within the Red designation. A few undistracting flecks appear on the portrait, and the strike is nice and sharp throughout. Population: 19 in 66 Red, 9 finer (12/14). NGC ID# 22KX, PCGS# 3320
- 

---

**1916 Lincoln, Matte PR64 Red and Brown  
Attractive Midgrade Example**

- 3398 1916 PR64 Red and Brown PCGS.** The surfaces on the obverse are fiery red but the reverse is a more demure medium reddish-brown, and the needle-sharp proof strike is in evidence both on the devices and at the rims on each side. There is little sign of contact, but a couple of small dark flecks on the obverse help account for the grade while not being overly distracting. Population: 47 in 64 Red and Brown, 71 finer (10/14). NGC ID# 22KZ, PCGS# 3325
- 

**1936 Satin Finish Cent, PR65+ Red  
Sharply Struck Throughout**

- 3399 1936 Type One — Satin Finish PR65+ Red PCGS. CAC.** The fields on each side are bright orange and the devices are sharply struck throughout, but some brownish accents appear on the high points of the Lincoln portrait on the obverse. The reverse is bright orange throughout, and both sides are well-preserved, free of carbon or obvious contact. This is currently the sole PR65+ Red at PCGS. Population: 58 in 65 (1 in 65+) Red, 28 finer (12/14). NGC ID# 22L2, PCGS# 3332
- 

**1936 Type One — Satin Finish Cent, PR66 Red  
Virtually Unobtainable Any Finer**

- 3400 1936 Type One — Satin Finish PR66 Red PCGS.** Well struck and carefully preserved, with lovely orange-gold color and seemingly contact-free surfaces. The reverse displays a small light-brown spot, between the N and T of CENT, and a small number of scattered flyspecks in the right reverse fields. Population: 27 in 66 (2 in 66+) Red, 1 finer (12/14).  
*Ex: Dallas Signature (Heritage, 11/2005), lot 388.* NGC ID# 22L2, PCGS# 3332
-

**1936 Type Two — Brilliant Finish Cent  
Well-Struck PR65 Red**

- 3401 1936 Type Two — Brilliant Finish PR65 Red NGC.** Both sides of the Type Two cent have fully brilliant fields and devices. The orange-gold luster of this fully Red Gem appears to reach out to the observer. The design elements are well-struck and neither side reveals significant marks or spots. Census: 49 in 65 (2 in 65 ★) Red, 12 finer (12/14).  
From *The Free Tilly Collection*. NGC ID# 22L3, PCGS# 3335

**1936 Type Two Brilliant Finish Cent, PR65 Red  
Great Eye Appeal**

- 3402 1936 Type Two — Brilliant Finish PR65 Red NGC.** The brilliant finish of the 1936 Type Two proof Lincoln cents displays mirrored fields and satiny, reflective devices, all of which are sharply defined. This fiery orange-red Gem is kept from an even finer grade by just a few ticks. Great eye appeal is seen throughout. Census: 49 in 65 (2 in 65 ★) Red, 12 finer (11/14)..  
From *The Free Tilly Collection*. NGC ID# 22L3, PCGS# 3335

**1936 Cent, PR66 Red  
Brilliant Finish**

- 3403 1936 Type Two — Brilliant Finish PR66 Red PCGS. CAC.** Probably, more Type Two, brilliant finish proof cents were coined than their Type One counterparts, the satin finish variety. However, many have been mishandled or improperly stored over the years, and few remain as pristine as the present Premium Gem. Predominantly peach-gold with a blush or two of lime-green on the obverse field. A small lint mark (as struck) between the EN of CENT provides an identifier. Population: 40 in 66 (1 in 66+) Red, 2 finer (11/14).  
Ex: *I.S. Memorial Collection (Heritage, 7/2003)*, lot 5768, which realized \$4,625. NGC ID# 22L3, PCGS# 3335

- 3404 1938 PR66 Red Cameo PCGS.** The reverse is rotated about 30 degrees counterclockwise on this gleaming orange-red Premium Gem proof cent. Exuberant luster and reflectivity appear throughout, although a small area of oilslick iridescence shows on Lincoln's coat under a loupe. Population: 15 in 66 Cameo, 2 finer (12/14). NGC ID# 22L5, PCGS# 83341

**1953 Cent, PR68 Red Cameo  
Important Registry Set Contender**

- 3405 1953 PR68 Red Cameo PCGS.** This superb Registry-quality proof is tied with just two others as the finest-certified Cameo at PCGS (11/14). Deep orange-gold toning yields the occasional wisp of deeper red color, while the fields are fully mirrored and the sharp devices exhibit satiny luster. An important offering for the advanced proof Lincoln cent specialist or Registry Set collector. NGC ID# 22LD, PCGS# 83368

**1970-S Cent, PR69 Red Ultra Cameo  
Elusive Small Date Variant**

- 3406 1970-S Small Date, FS-1402, PR69 Red Ultra Cameo NGC.** Although the 7 in the date appears to be slightly higher on the Small Date, the shape of the T in LIBERTY is probably the easiest way to distinguish this variety from the Large Date. On the Small Date, the T is relatively weak, while it is bold on the far more available Large Date. This needle-sharp and radiant orange-red specimen has imposing cameo contrast and essentially immaculate surfaces. The motifs appear to float over the deep watery fields. Census: 3 in 69, 0 finer (11/14).  
Ex: *ANA Signature (Heritage, 7/2005)*, lot 5372; *FUN Signature (Heritage, 1/2010)*, lot 401. PCGS# 38180 Base PCGS# 93426

**1990 No S Cent, PR68 Red Deep Cameo  
Rare Modern Mint Error**

- 3407 1990 No S, FS-101, PR68 Red Deep Cameo PCGS.** The rare No S variety was created when a Mint worker failed to place a mintmark on the obverse of a proof cent die. The error can no longer occur, since mintmarks are now part of the master die. The present needle-sharp pumpkin-gold specimen is pristine except for a small spot beneath the A in STATES.  
Ex: *Pittsburgh Signature* (Heritage, 10/2011), lot 3269. PCGS# 408239 Base PCGS# 93506

**1990 No S Cent, PR69 Red Ultra Cameo  
Important Guide Book Rarity**

- 3408 1990 No S, FS-101, PR69 Red Ultra Cameo NGC.** Although the Mint inadvertently issued No S proof dimes in 1968, 1970, 1975, and 1983, only a single rare No S proof cent variety is known. A number of examples display verdigris on the rims or edge from long-time residence in humidity-trapping Mint-issued holders. The present specimen ranks among the finest known. It exhibits a full strike, uniform orange-gold color, and exquisitely multi-faceted fields. Census: 22 in 69 Ultra Cameo, none finer (11/14). PCGS# 408239 Base PCGS# 93506

**TWO CENT PIECES**

**1864 Small Motto Two Cent  
MS65 Red and Brown**

- 3409 1864 Small Motto, FS-401, MS65 Red and Brown PCGS.** The introductory Small Motto subtype comprises a small minority of the first-year mintage. The present fully struck Gem displays variegated fire-red and gunmetal surfaces. Carbon is minimal, and contact is absent aside from a tick above the C in CENTS. Certified in a green label holder. PCGS# 38233 Base PCGS# 3580

- 3410 1864 Large Motto MS64 Red PCGS. CAC.** The gold surfaces of this near-Gem display whispers of soft red color and sharply struck design elements. Two moderate spots are visible in the right obverse.  
From *The Millford Collection, Part II*. NGC ID# 22N9, PCGS# 3578

**1864 Large Motto Two Cent, MS66 Red  
Ideal Type Coin**

- 3411 1864 Large Motto MS66 Red PCGS.** The odd-denomination two cent series saw its highest mintage in 1864, the first year of issue. This is an attractive and still-Red Premium Gem representative of the most popular date for type collectors with only a few scattered flyspecks, including one at the D of GOD. Population: 55 in 66 Red, 1 finer (11/14). NGC ID# 22N9, PCGS# 3578

**1864 Large Motto Two Cent, MS66 Red  
One of Few With CAC Approval**

- 3412 1864 Large Motto MS66 Red PCGS. CAC.** The motto IN GOD WE TRUST appeared on a regular-issue U.S. coin for the first time in 1864, on the newly adopted two cent piece, with both Large and Small Motto varieties known for the date. The Large Motto is more available than its Small Motto counterpart. This delightful Premium Gem Large Motto example displays lustrous medium-red surfaces and sharply detailed design elements, showing outstanding eye appeal. Population: 55 in 66 Red, 1 finer (10/14), but CAC shows only 11 MS66 Red pieces with the CAC green approval sticker between PCGS and NGC combined. NGC ID# 22N9, PCGS# 3578

- 3413 1865 Plain 5 MS66 Red and Brown PCGS. CAC.** A high grade example. Primarily peach-gold but slightly mellowed. The strike is crisp, and the smooth surfaces display coruscating luster. From a tumultuous year in American history.  
From *The College Collection*. PCGS# 38248 Base PCGS# 3583

- 3414 1865 Plain 5 MS64 Red PCGS. Flynn-KF-P10-RPD.** The 6 in the date is clearly repunched within its loop. The attribution is via Kevin Flynn's reference *Getting Your Two Cents Worth*. A lovely orange-gold near-Gem, ideal save for a small spot at the D in UNITED. Housed in a green label holder.  
From *The Millford Collection, Part II*. PCGS# 38249 Base PCGS# 3584

- 3415 1869 MS65 Red and Brown PCGS. CAC.** The well-preserved original red surfaces have mellowed to light brown in some areas, but much original mint luster remains intact and no large or distracting flaws are evident. Population: 54 in 65 Red and Brown, 3 finer (12/14). NGC ID# 22ND, PCGS# 3604

---

**1872 Two Cent, MS62 Brown  
Deeply Colored Patina**

- 3416 1872 MS62 Brown NGC.** The 1872 two cent piece is by far the scarcest business strike issue overall, and is especially sought-after in Mint State. This luminous example displays vivid violet, burgundy, and auburn-brown hues over glossy surfaces, rendering exceptional eye appeal for the grade. Some of the finer design elements are slightly soft, though the strike is otherwise pleasing. Census: 17 in 62 Brown, 24 finer (11/14). NGC ID# 22NG, PCGS# 3612

---

**1872 Two Cent Piece, MS64 Brown  
Scarce, Final-Year for Circulation Strikes**

- 3417 1872 MS64 Brown PCGS.** Only 64,000 pieces were produced of the two cent piece in this final year of production for circulation strikes. Predictably, proofs are much easier to find than high-grade business strikes. This is a reddish-brown example that in no way resembles a dull proof. Slight striking softness is noted on the high points of the design. Population: 12 in 64 Brown, 2 finer (12/14). NGC ID# 22NG, PCGS# 3612

---

**1872 Two Cent, MS64 Red and Brown  
Conditional Rarity, Late Die State**

- 3418 1872 MS64 Red and Brown PCGS. CAC.** The 1872 business strike two cent is the last in the series — all of the 1873s were struck in proof format — and a conditional rarity, given that only 65,000 were produced. This near-Gem boasts muted luster on mahogany-olive surfaces with good eye appeal overall. The weak strike around the reverse periphery and extensive die cracks, some bold, in those areas indicate die fatigue and failure rather than simply a weak strike. The die crack above UNIT is especially bold, an area that appears as though it would soon cleave off of the remainder of the die. Population: 33 in 64 (1 in 64+) Red and Brown, 16 finer (12/14). Five in this grade at both service combined have the CAC approval sticker. NGC ID# 22NG, PCGS# 3613

---

**1872 Two Cent Piece, MS65 Red and Brown  
Elusive Series Rarity**

- 3419 1872 MS65 Red and Brown PCGS.** The two cent series contains two major keys: the 1864 Small Motto and the 1872. Both are elusive in both Red, and Red and Brown grades, but in each category the 1872 is about twice as scarce overall. This Gem example of the 1872 issue displays a distinct two-sided color exchange, showing nearly full Red on the obverse and much deeper burgundy over the reverse. The strike is sharp overall, but particularly so on the reverse bow knot which is fully delineated. No mentionable abrasions are noted, and only a few tiny flecks are detected in unobtrusive locales. An impressive example of the rarest business strike in the series. Population: 15 in 65 (2 in 65+) Red and Brown, 1 finer (12/14). NGC ID# 22NG, PCGS# 3613
-

**1872 Two Cent Piece, MS65 Brown  
Doubled Die Obverse  
Low-Mintage Key**

- 3420** 1872 Doubled Die Obverse, FS-101, MS65 Brown NGC. Close to 20,000,000 two cent pieces were struck in 1864, the first year of the denomination. Mintages then declined annually, without exception, until the "Crime of 1873" ended production. The 1872 business production was just 65,000 pieces. The present Gem exhibits minor die doubling on WE TRUST. A fully struck and satiny example with mahogany-brown and forest-green toning. Both sides are void of contact, although pinpoint flecks are noted near UNITED. PCGS# 38292 Base PCGS# 3612

**PROOF TWO CENT PIECES**

**1864 Large Motto Two Cent Piece  
Nicely Reflective PR66 Red and Brown**

- 3421** 1864 Large Motto PR66 Red and Brown PCGS. CAC. While the most common date as a business strike, the Large Motto proofs from 1864 are remarkably scarce. Only 100 or so were struck in proof format. This piece is called Red and Brown, but there is little brown evident, mostly it takes the form of multicolored speckles of color on each side. The surfaces are mostly bright mint red with strong mirrors in the fields. Population: 13 in 66 Red and Brown, 1 finer (12/14). NGC ID# 274T, PCGS# 3622
- 3422** 1865 PR65 Red and Brown NGC. CAC. Splashes of crimson and cobalt-blue visit the coppery-gold surfaces of this Gem that exhibits sharply struck devices. A few light flecks, more so on the reverse, do not disturb. Census: 31 in 65 Red and Brown, 12 finer (12/14). NGC ID# 274U, PCGS# 3628

**1869 Two Cent, PR65 Red  
Vivid Orange Color**

- 3423** 1869 PR65 Red PCGS. CAC. Vivid orange color and bright luster on both sides complement a decent strike and excellent preservation on this Gem Red proof. A loupe reveals no mentionable contact, and carbon is absent throughout. PCGS shows 42 in PR65 Red with 12 finer (12/14). This is one of five in PR65 Red at CAC with the green approval sticker, a figure that would include both PCGS- and NGC-certified coins. NGC ID# 274Y, PCGS# 3641
- 3424** 1869 PR65 Red and Brown Cameo NGC. NGC has certified more than 200 1869 proof two cent pieces, only three of which are designated as Cameo. The present Gem is the only coin assigned Red and Brown Cameo by NGC (12/14). Copper-gold luster in the fields accentuates the sharply struck, bluish design elements. Both sides are devoid of mentionable contacts or spots. Incredible eye appeal. PCGS# 83641
- 3425** 1870 PR65 Red PCGS. The coppery-gold surfaces of this Gem display modest field-motif contrast when the coin is tilted slightly beneath a light source. Razor-sharp detail shows over both sides. Occasional minute flecks are noted. Population: 42 in 65 (1 in 65+) Red, 12 finer (12/14). NGC ID# 274Z, PCGS# 3644
- 3426** 1870 PR65 Red NGC. This Gem proof is deeply reflective beneath rich coppery-orange patina that yields the occasional cherry-red hue. The strike is bold and the surfaces are free of any perceptible carbon spotting. Census: 27 in 65 (3 in 65+) Red, 15 finer (12/14). NGC ID# 274Z, PCGS# 3644
- 3427** 1871 PR65 Red and Brown PCGS. CAC. A sharply struck Gem with a beautiful orange-gold obverse. The reverse is equally undisturbed but displays variegated chestnut and lavender toning. TRUST is die doubled counter-clockwise, as seen on all proofs for the date. Housed in a first generation holder. NGC ID# 22NH, PCGS# 3646

**1871 Two Cent Piece, PR66 Red  
Tied for Finest in Full Red at PCGS**

- 3428** 1871 PR66 Red PCGS. CAC. The majority of surviving 1871 proof two cent pieces reside in the Red and Brown color category. Full Red examples are scarce in all grades and are rare above the Gem level, and Cameos are almost nonexistent. This Premium Gem Red example displays a crisp strike and deep, glassy fields. Tinges of cherry-red accent fiery orange-gold surfaces, delivering a high degree of eye appeal. A few specks of deep burgundy color reside along the obverse periphery. Population: 14 in 66 Red, 0 finer (12/14). NGC ID# 22NH, PCGS# 3647

**3429 1872 PR65+ Red and Brown NGC.** All proof 1872 two cent pieces are struck from perfect dies without the reverse die crack at the top of UNIT that is seen on business strikes. This Gem proof displays considerable red luster with delicate blue overtones. Census: 78 in 65 (2 in 65+) Red and Brown, 44 finer (12/14). NGC ID# 2752, PCGS# 3649

**1872 Two Cent Piece, PR66 ★ Red and Brown  
Attractively Patinated**

**3430 1872 PR66 ★ Red and Brown NGC.** The scarcity of high-grade business strikes puts extra date pressure on the proof 1872 two cent piece. This Premium Gem example is fully struck, with deep mirrors underlying blended sun-gold, cherry-red, and pale olive hues. A few tiny specks are noted upon close examination, though the eye appeal is hardly affected. Census: 39 in 66 (1 in 66 ★) Red and Brown, 5 finer (11/14). NGC ID# 2752, PCGS# 3649

**1873 Two Cent Piece, PR64 Brown  
Earlier Closed 3 Variety**

**3431 1873 Closed 3 PR64 Brown PCGS.** Differentiating between the proof 1873 Closed 3 two cent pieces and their Open 3 counterparts can be difficult for the novice, but this piece is undoubtedly correctly attributed as a Closed 3 example. Glossy burgundy-brown toning blankets each side, with a few tinges of coppery-red in the revices on each side. The strike is bold and there are no distracting contact marks. Population: 45 in 64 (1 in 64+) Brown, 23 finer (12/14). NGC ID# 2753, PCGS# 3651

**1873 Closed 3 Two Cent, PR64 Red and Brown  
Earlier Date Logotype**

**3432 1873 Closed 3 PR64 Red and Brown NGC.** The 1873 two cent issue has two distinct logotypes and no business strikes. This example bearing the earlier Closed 3 date logotype has generous copper-orange elements at the margins with mahogany and violet-brown predominant in the centers. Small scattered flyspecks contribute to the grade. NGC ID# 2753, PCGS# 3652

**1873 Two Cent Piece, PR65 Red and Brown  
Closed 3, Original Striking**

**3433 1873 Closed 3 PR65 Red and Brown PCGS. CAC.** The Closed 3 date variant is often referred to as the Original 1873. Originals all have strong horizontal shield lines, while the Open 3 Restrikes show softness in the center of the shield. The surfaces of this piece are bright and retain a significant amount of original red with scattered areas of mellowed brown. The mirrored fields flash strongly when angled beneath a light. NGC ID# 2753, PCGS# 3652

**1873 Two Cent Piece, PR66 Brown  
Open 3 Variant**

**3434 1873 Open 3 PR66 Brown PCGS. CAC.** Easily attributed by the weak shield lines on the obverse shield, it is estimated that around 500 restrikes were coined sometime after the initial emission of Original Closed 3 proofs. While labeled Brown, the surfaces, especially the fields are bright and retain significant underlying mint red. Population: 4 in 66 (1 in 66+) Brown, 0 finer (12/14). NGC ID# 2754, PCGS# 3654

**THREE CENT SILVER**

**1851-O Three Cent Silver, MS66  
Sole New Orleans Issue**

**3435 1851-O MS66 PCGS.** The 1851-O ranks as the only branch mint issue in the entire silver three cent series, and is also a notable semikey in the finer Mint State grades. This Premium Gem example is well-struck and frosty. Both sides display a pale ice-blue and golden hue, with small areas of amber, red, and forest-green around the peripheries. Population: 25 in 66 (1 in 66+), 0 finer (12/14). NGC ID# 22YY, PCGS# 3665

**1857 Three Cent Silver, MS66  
Light but Colorful Toning**

**3436 1857 MS66 PCGS. CAC.** The smallest silver coin ever issued for the United States, the three cent silver, had a brief heyday before the Civil War drove even it from circulation. This Premium Gem of the 1857 issue, mintage slightly over 1 million pieces, has a mix of gold, peach, steel-blue, and violet patina. Clash marks from the shield appear within the III of the reverse. Population: 6 in 66, 1 finer (11/14). NGC ID# 22Z6, PCGS# 3673

**3437 1859 MS66+ NGC.** Medium-intensity multicolored toning resides on the lustrous surfaces of this high-end Premium Gem. A nicely struck example save for the often seen softness on the upper star point and some of the leaves. Census: 18 in 66 (1 in 66+, 2 in 66 ★), 2 finer (12/14). NGC ID# 22Z8, PCGS# 3677

**3438 1861 MS66 PCGS.** Vivid shades of cobalt-blue, lavender-gray, and golden-brown toning visit the well-preserved surfaces of this delightful Premium Gem. The design elements are well-detailed and some interesting clash marks are evident on both sides. Population: 80 in 66, 30 finer (12/14). NGC ID# 22ZA, PCGS# 3679

**3439 1865 MS63 PCGS.** Considerable luster percolates upward from beneath the surfaces decorated with a melange of mint, gold, copper, and gray patina. This attractive coin is held back from a higher grade by a small triangular flaw just above the star on the obverse. Only 8,000 pieces were struck of this mid-Type Three issue. Population: 14 in 63, 39 finer (12/14). NGC ID# 22ZF, PCGS# 3685

**3440 1865 MS64 ANACS.** With a mintage of just 8,000 pieces, this is a scarce issue at the current grade level and it is rare any finer. This near-Gem is deeply toned over each side, primarily in shades of deep reddish-purple and deep red-brown. It is sharply struck with clash marks evident on the obverse. Surface blemishes are minimal. NGC ID# 22ZF, PCGS# 3685

**3441 1871 MS64 PCGS. CAC.** A thick layer of Mint frost blankets the surfaces of this richly toned near-Gem. The low business-strike mintage of 3,400 pieces was trivial except to collectors, who benefit from the scarcity of the issue to this day. A bold strike enhances the appeal, although luster is a bit subdued beneath the rich patina. Population: 28 in 64 (1 in 64+), 48 finer (12/14). *From The College Collection.* NGC ID# 22ZM, PCGS# 3692

**PROOF THREE CENT SILVER**

**3442 1859 PR65 PCGS.** The Mint boosted proof mintages in 1859 as a way to build collector and dealer interest in proof coinage, although proofs remained available at face value. Starting in 1860, the Mint charged a premium for proofs according to the recent research of John Dannreuther. This boldly struck example displays a thin veil of cerulean-blue and peach-gold toning over deeply mirrored surfaces. Orange-gold accents add to the eye appeal. NGC ID# 27C6, PCGS# 3708

**3443 1862 PR65 PCGS.** Attractively patinated in iridescent shades of powdery blue and gold, this sharply detailed Gem exhibits intense visual appeal. Only 550 proof trimes were minted in 1862. Population: 17 in 65, 14 finer (12/14). NGC ID# 27C9, PCGS# 3711

**3444 1863/2 PR67 ANACS. Breen-2944.** The star point is above the left border of the 6 in the date, an important diagnostic for this rare proof variety. The contested overdate is listed in the *Guide Book* but absent from *Cherrypickers'*. Fully struck and flashy with apple-green and straw-gold toning. NGC ID# 22ZP, PCGS# 3713

**3445 1863 PR65 Cameo PCGS.** The fields on each side are deeply reflective and set up a strong contrast against the frost on the devices. The combination of both yields the pronounced cameo effect that gives so much of the eye appeal to this important Civil War type coin. Essentially brilliant, it is only with strong magnification that one can see a few light streaks of color. Only 460 proofs were struck. Population: 7 in 65, 8 finer (12/14). *Ex: Dallas Signature (Heritage, 10/2008), lot 289.* PCGS# 83712

**1863 Three Cent Silver, PR66 Cameo  
Bold Contrast and Sharp Motifs**

**3446 1863 PR66 Cameo PCGS.** A beautiful Cameo proof with sharp design elements and deep mirrors. The devices are frosty and essentially devoid of color, though subtle hues of aquamarine and amber in the fields further contribute to the high level of contrast. The proof 1863 three cent silver had a low mintage of only 460 coins, the lowest proof total in the entire series. Population: 4 in 66, 4 finer (11/14). PCGS# 83712

**3447 1864 PR65 Cameo PCGS.** Sharply struck, frosty devices stand out against the mirrored fields of this Gem. Light planchet flakes are visible over both sides. Population: 15 in 65, 9 finer (12/14). PCGS# 83714

**1864 Three Cent Silver, PR65 Deep Cameo  
One of Only Two Deep Cameos at PCGS**

**3448 1864 PR65 Deep Cameo PCGS.** The proof 1864 three cent silver had a mintage of only 470 coins, the second-lowest proof mintage of the series, trailing only the 1863 at 460 pieces. This Gem Deep Cameo representative is fully struck, with frosty devices that boldly contrast with the deeply reflective fields. A fully brilliant example. PCGS has certified only two Deep Cameo representatives, both PR65 coins (11/14). PCGS# 93714

---

**1865 Three Cent Silver, PR66 Cameo  
Rare This Well-Contrasted**

- 3449 1865 PR66 Cameo PCGS.** Cameos represent only a small fraction of the certified proof 1865 three cent silver population, and are highly sought-after by specialists. This Premium Gem example displays boldly struck, frosty devices set against reflective fields that showcase vivid gold, violet, blue, and russet toning. Population: 5 in 66, 3 finer (11/14). PCGS# 83715

---

**1865 Three Cent Silver, PR67 Cameo  
None Finer at NGC**

- 3450 1865 PR67 Cameo NGC.** A jewel-like Superb Gem three cent silver, with richly patinated mirrors in steel-blue and russet-red shades and gold accents. The proof die broke during mintage and was replaced with a new die showing the T and E of STATES joined by a faint line and die file marks at 12 o'clock on the reverse. Census: 4 in 67, 0 finer (12/14). PCGS# 83715

---

**1866 Three Cent Silver, PR67  
None Finer at PCGS**

- 3451 1866 PR67 PCGS. CAC.** By 1866, the three cent silver was on its way out, though the denomination persisted in proof format through 1873. Only 22,000 business strikes were produced in 1866, and for most collectors a proof is the only collectible alternative. The devices are sharply struck on this Superb Gem. The proof mirrors gleam brightly beneath significant blue-green and rose toning on the obverse and vivid colors shine forth beneath soft-gray patina on the reverse when viewed under light. Population: 2 in 67, 0 finer (12/14).  
Ex: Long Beach Signature (Heritage, 9/2007), lot 465; Chicago Signature (Heritage, 8/2011), lot 3290. NGC ID# 27CC, PCGS# 3716

- 3452 1866 PR64 Deep Cameo PCGS. CAC.** The present specimen, one of 725 pieces struck for this post-war issue, has uncommonly dramatic contrast for a proof of this series. The frost on the ivory-white devices is rich, and the delicately gold-tinged fields offer dramatic mirrors. Though a handful of faint hairlines appear on each side, the overall visual appeal is undeniably strong. Population: 3 in 64, 2 finer (12/14). PCGS# 93716

- 3453 1867 PR65 Cameo NGC.** The 1867 Type Three three cent circulation strikes are seldom seen in high grade, struck to the extent of only 4,000 pieces. This is a well-mirrored survivor of the proof complement of 550 coins, pinkish-gold with scattered tiny flecks and good device frost. Census: 9 in 65, 14 finer (12/14). PCGS# 83717

---

**1867 Three Cent Silver, PR66+ Cameo  
Sharp and Beautifully Toned**

- 3454 1867 PR66+ Cameo PCGS. CAC.** Cameos represent just a small portion of the surviving 1867 proof three cent silver population, and Deep Cameos are almost nonexistent. The present Cameo showcases a remarkable full strike, with deeply mirrored fields and noticeable frost over the devices. Pale lavender-gold centers yield to more vivid rainbow circles around the margins, giving this high-end proof an intense visual appearance. Population: 15 in 66 (2 in 66+), 5 finer (12/14). PCGS# 83717

- 3455 1868 PR66 NGC.** Deeply reflective mirrors surround frosted devices, with the reverse a bit less intense than the vibrant obverse, which glitters with iridescent colors. Peach-gold and ocean blue yield to magenta accents around the motifs. Just 600 proofs were struck, and few survive with the considerable appeal of this Premium Gem. Census: 18 in 66, 6 finer (12/14). NGC ID# 27CE, PCGS# 3718

---

**1868 Three Cent Silver, PR66 Cameo  
Full Design Definition**

- 3456 1868 PR66 Cameo PCGS. CAC.** This sensational Premium Gem has a perfect blend of cameo contrast, deeply mirrored fields, lustrous devices, and gorgeous toning. Both sides have light emerald at the center with peripheral blue, violet, and iridescent toning. Population: 6 in 66, 2 finer (12/14).  
Ex: Baltimore Signature (Heritage, 3/2009), lot 404. PCGS# 83718

**3457 1869 PR66 PCGS. CAC.** Proof three cent silvers seem mighty underrated today in this cataloger's opinion. Witness this impeccable "blue beamer," accented with mint and showing no mentionable distractions. The last one we handled in this grade and service sold for \$2,115 — more than two years ago. Population: 20 in 66 (1 in 66+), 3 finer (12/14). NGC ID# 22ZR, PCGS# 3719

**3458 1870 PR66 NGC. CAC.** According to Mint records, 1,000 proof three cent silver pieces were struck in 1870, but some examples undoubtedly went unsold and were melted after the end of the year. This attractive Premium Gem displays a cameo-like effect. The fields are a glassy aquamarine, and the design features are sharply impressed. Census: 26 in 66, 8 finer (12/14). NGC ID# 27CF, PCGS# 3721

---

**1870 Three Cent Silver, PR65 Cameo**  
**Sharp and Boldly Contrasted**

**3459 1870 PR65 Cameo PCGS.** A ring of crimson-russet peripheral toning frames the silver-gray centers of this lightly toned Gem. Both sides reveal modest cameo contrast, and the design elements are fully brought up. The proof 1870 three cent silver is in high demand among date collectors, as its business strike counterpart is significantly more rare and expensive in high grades. Population: 5 in 65, 10 finer (11/14).

*Ex: Long Beach Signature (Heritage, 10/2000), lot 5985.  
From The A. James Evans Collection, Part II. PCGS# 83721*

---

**1870 Three Cent Silver, PR65 Cameo**

**3460 1870 PR65 Cameo PCGS.** A generous mintage of 1,000 proof three cent silver pieces was achieved in 1870, making the issue reasonably available, in the context of the series. This impressive Gem offers sharply detailed design elements and well-preserved reflective fields, with a few hints of pale gold and blue toning. Population: 5 in 65 Cameo, 10 finer (12/14). PCGS# 83721

---

**1872 Three Cent Silver, PR67 Cameo**  
**Glittering Type Three Example**

**3461 1872 PR67 Cameo PCGS. CAC.** A sparkling, glittering Superb Gem proof of this late-series Type Three trime, struck in just about equal numbers as business strike and proof, 1,000 of the former and 950 of the latter. The fields are reflective mirrors, silver-white, and contrast nicely against the frosted grayish central devices. The rim features a thin crescent of copper-russet and pale metallic blue patina. The surfaces are exemplary and show simply great eye appeal, a piece that would fit well into a top-notch type or date set with equal ease. Population: 2 in 67, 0 finer (12/14). PCGS# 83723

**3462 1873 PR64 PCGS.** Powder-gray and gold surfaces show scattered accents of pale gold on this attractive last-year-of-type issue. A glancing blow appears under a loupe on the lower-left star border, not all that distracting. PCGS shows 73 numerically finer (12/14). NGC ID# 27CJ, PCGS# 3724

**1873 Three Cent Silver, PR66  
Impressive Final-Year Specimen**

**3463 1873 PR66 PCGS.** This odd denomination issue came to a close in 1873 with a small proof-only mintage of 600 pieces. Due to extensive hoarding of this type, it was replaced by the three cent nickel, although the two types existed side-by-side for nine years. This is a sharply struck example with glassy fields and mark-free surfaces. Both sides are adorned in shades of sea-green and gold-orange iridescence. Population: 13 in 66, 3 finer (12/14). NGC ID# 27CJ, PCGS# 3724

**1873 Open 3 Three Cent Nickel, MS65  
Seldom Seen in Finer Grades**

**3466 1873 Open 3 MS65 PCGS. CAC.** This CAC-approved Gem features the Open 3 variety, which replaced the Closed 3 variant partway through the year. The former variety claims a mintage of 390,000 coins — just over half the number of Closed 3 examples struck. Each side shows swirling luster and well-struck devices, though mild incompleteness is noted through LIBERTY. The eye appeal is strong. Population: 39 in 65 (2 in 65+), 2 finer (10/14). PCGS# 3740

**THREE CENT NICKELS**

**1868 Three Cent Nickel, MS67  
Tied for Finest Certified at Both Services**

**3464 1868 MS67 NGC.** The availability of this date declines significantly at the Gem grade level, and finer pieces are decidedly rare. This Superb Gem is tied with just three others as the finest certified at NGC; PCGS has seen only one coin in this grade, also with none finer (12/14). The design elements are sharply struck, illuminated by shimmering, light golden luster. No distinctive surface flaws are observed upon close examination. NGC ID# 2756, PCGS# 3734

**1885 Three Cent Nickel, MS62  
Lowest Mintage of the Series**

**3467 1885 MS62 NGC.** One of the big keys to the series, the 1885 three cent nickel had a low mintage of only 1,000 coins, and is a rarity in Mint State. This piece is well-struck and the surfaces are remarkably clean for the grade. Dusky pewter-gray toning slightly mutes the luster, likely contributing NGC's assessment. Census: 2 in 62, 23 finer (12/14). NGC ID# 275G, PCGS# 3753

**3468 1888 MS67 PCGS.** A veneer of soft violet visits the lustrous surfaces of this Superb Gem. The design elements are well impressed. An occasional minute fleck does not detract. Population: 41 in 67, 1 finer (12/14). NGC ID# 275H, PCGS# 3757

**1871 Three Cent Nickel, MS67  
Conditionally Rare This Fine**

**3465 1871 MS67 NGC.** An earlier three cent nickel struck during the transitional period before the denomination's silver counterpart was canceled in the great coinage cleanup (alias "Crime") of 1873. A modestly toned Superb Gem, it is primarily pale nickel-gray with occasional hints of color in the fields. Census: 2 in 67, 0 finer (11/14). NGC ID# 22NN, PCGS# 3737

**1889 Three Cent Nickel, MS67  
Tied for Finest at PCGS**

**3469 1889 MS67 PCGS.** Frosty, blazing luster shimmers vibrantly as it illuminates beautifully preserved surfaces, as well as a touch of light golden toning in the margins. The strike is sharp and the coin is simply an eye-catcher and a joy to look at — much more lustrous than is typically seen on this type. A numerically unsurpassed final-year type coin. Population: 13 in 67, 0 finer (12/14). NGC ID# 275J, PCGS# 3758

## PROOF THREE CENT NICKELS

- 3470** 1865-1889 Three Cent Nickel Set, (no 1887) PR63-65 (mostly) Cameo PCGS. This all-PCGS, mostly Cameo set of proof three cent nickels is complete, except for the 1887 non-overdate. Only four pieces are non-Cameo. The pieces are either brilliant or lightly toned. Included are:

1865 PR63 Cameo; 1866 PR63 Cameo; 1867 PR63 Cameo; 1868 PR63 Cameo; 1869 PR63 Cameo; 1870 PR64 Cameo; 1871 PR63 Cameo; 1872 PR63 Cameo; 1873 Closed 3 PR64 Cameo; 1874 PR65 Cameo; 1875 PR64 Cameo; 1876 PR63 Cameo; 1877 PR63; 1878 PR63 Cameo; 1879 PR64 Cameo; 1880 PR64 Cameo; 1881 PR64 Cameo; 1882 PR64; 1883 PR64 Cameo; 1884 PR63 Cameo; 1885 PR63 Cameo; 1886 PR63 Cameo; 1887/6 Strong Overdate PR63; 1888 PR63 Cameo; and an 1889 PR65. (Total: 25 coins)

- 3471** 1866 PR66 Cameo PCGS. CAC. A lovely specimen from the second year of three cent nickel production, strongly mirrored with subtle golden overtones across the fields and essentially ivory-white devices. Strongly detailed with considerable contrast for a three cent nickel proof. Population: 15 in 66, 2 finer (12/14).  
Ex: Baltimore Signature (Heritage, 3/2009), lot 439. PCGS# 83762

### 1866 Three Cent Nickel, PR66 Rare Deep Cameo Specimen

- 3472** 1866 PR66 Deep Cameo PCGS. CAC. This delightful Premium Gem exhibits sharply detailed design elements throughout. The devices are richly frosted creating intense cameo contrast with the deeply reflective fields. The well-preserved surfaces show a few hints of pale gold toning and eye appeal is outstanding. Population: 9 in 66, 2 finer (12/14). PCGS# 93762

- 3473** 1867 PR66 ★ Cameo NGC. CAC. The mirrored fields of this Premium Gem proof three cent nickel with the coveted Star designation offer pronounced contrast with the frosted devices. The design elements are sharply struck, save for minor weakness in the lower middle stand of the III. Both sides are well-preserved. Census: 67 in 66 (1 in 66+, 5 in 66 ★) Cameo, 5 finer (12/14).  
Ex: Long Beach Signature (Heritage, 5/2008), lot 1173. PCGS# 83763

### 1867 Three Cent Nickel, PR66 Elusive Deep Cameo Example

- 3474** 1867 PR66 Deep Cameo PCGS. CAC. From a small proof mintage of 625 pieces, this spectacular Premium Gem exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast profoundly with the frosty devices. No mentionable distractions are evident and eye appeal is outstanding. Population: 6 in 66 (1 in 66+), 0 finer (12/14). PCGS# 93763

- 3475** 1868 PR65 Deep Cameo PCGS. CAC. An untoned and extraordinarily well-mirrored specimen that adds a remarkable amount of contrast between the fields and devices. Early three cent nickel proofs are rarely found with such flash and technical merit. For future identification purposes, a couple of microscopic, curving lintmarks are seen on Liberty's cheek, but they are of no detriment to the overall appeal. Population: 12 in 65 (2 in 65+), 8 finer (12/14).  
Ex: New York Signature (Heritage, 7/2004), lot 5388; FUN Signature (Heritage, 1/2007), lot 1998; Pittsburgh Signature (Heritage, 10/2011), lot 3326.. PCGS# 93764

### 1869 Three Cent Nickel Premium Gem Deep Cameo

- 3476** 1869 PR66 Deep Cameo PCGS. CAC. A sharply struck Deep Cameo, this Premium Gem proof exhibits frosty design elements set against a deeply mirrored back drop, with only a few tiny strike-throughs (as made) on Liberty's cheek. The coin appears brilliant at first glance, though closer examination reveals a hint of golden color over each side. PCGS has certified only 36 Deep Cameo examples in all grades, with 12 in PR66 (1 in 66+), and none numerically finer (12/14). PCGS# 93765

- 3477** 1877 PR63 PCGS. A more affordable example of this low-mintage key to the three cent nickel series. Lightly cleaned at one time, the fields are brightly reflective and there is even a moderate amount of contrasting frost over the devices. Light, even toning over each side. NGC ID# 275X, PCGS# 3773

**1877 Three Cent Nickel, PR66 Cameo  
Scarce, Proof-Only Issue**

- 3478 1877 PR66 Cameo NGC.** Pale champagne and nickel-white zones merge into one another on this charming Cameo coin, from a proof-only mintage of just 900 pieces, by far the scarcest of all the proof-only coins in the series. A well-struck coin, with gleaming mirrors beneath the patina and readily appreciable contrast. This is the sole three cent nickel of the year for date collectors, and an issue that always draws strong hands into the bidding.  
*Ex: U.S. Coins Signature (Heritage, 10/2009), lot 225. PCGS# 83773*

**1877 Three Cent Nickel, PR66 Cameo  
An Important Key Date**

- 3479 1877 PR66 Cameo PCGS.** Only 900 three cent nickels were produced in 1877, all proofs, making this key date the most popular and sought-after issue in the entire series. Strong field-motif contrast is apparent over both sides of this Premium Gem Cameo, each of which exhibits sharply struck design features, including all lines in the III denomination. The surfaces are free of mentionable marks or spots. Population: 42 in 66 (1 in 66+), 9 finer (12/14). PCGS# 83773

**1879 Three Cent Nickel, PR68  
Flashy, Among the Finest Certified**

- 3480 1879 PR68 NGC.** Struck from Breen's "third die" on the obverse, paired with the reverse die of 1880 with the disconnected ribbon and leaves. The obverse is delicately toned ice-blue and apricot, while the reverse has light but uniform sun-gold patina. An unabraded, exquisitely struck, and virtually carbon-free specimen that has a satiny obverse and a flashy reverse. Census: 6 in 68 (1 in 68 ★), 0 finer (12/14). NGC ID# 275Z, PCGS# 3775

**1884 Three Cent Nickel, PR66 Deep Cameo  
Strong Field-Device Contrast**

- 3481 1884 PR66 Deep Cameo PCGS.** This Deep Cameo Premium Gem proof is the sole finest example of its category graded by PCGS (12/14). Both sides are clearly contrasted with only hints of blue and gold-rose color to the fields. A small planchet depression on Liberty's cheek should not be taken for post-striking damage. PCGS# 93780

**SHIELD NICKELS**

- 3482 1866 Rays MS65 PCGS.** An important first-year issue of the With Rays Shield nickel type. The obverse is sharply struck while the reverse exhibits softness on the stars and glory of rays. A pleasing, lustrous Gem with light olive-gray coloration and minimal surface marks. NGC ID# 22NX, PCGS# 3790

**1866 With Rays Shield Nickel  
Lightly Toned Premium Gem**

- 3483 1866 Rays MS66 PCGS.** More than 14.7 million Shield nickels were coined in 1866, but Gem or finer survivors are scarce. This Premium Gem representative is well-struck, if only slightly soft on a few of the reverse stars. A touch of light golden toning accents satiny luster on each side, and the preservation is excellent. Both sides show the usual array of fine peripheral die cracks. Population: 38 in 66 (2 in 66+), 0 finer (12/14). NGC ID# 22NX, PCGS# 3790

- 3484 1871 MS65 PCGS. CAC. Fletcher-1.** Repunched date. An impressive Gem example of this scarce repunched date variety, with lustrous surfaces that are visited by soft shades of green-gray and russet color. Fully struck with the typically-seen obverse die cracks. Both sides are distraction-free. Housed in a green label holder. NGC ID# 22P5, PCGS# 3798

- 3485 1872 MS66 PCGS.** This high-mintage issue is rare at the current MS66 grade level, and rare any finer. This is a lustrous, boldly struck Premium Gem with several wispy die cracks noted on the obverse and a shallow planchet flaw observed on the upper reverse periphery, between S and OF. Splendidly preserved with lovely light toning and unabraded surfaces. Population: 21 in 66 (1 in 66+), 1 finer (11/14). NGC ID# 22P6, PCGS# 3799

**1881 Nickel, MS66**  
**Just 68,800 Business Strikes Made**

**3486 1881 MS66 PCGS.** For a five-year span from 1877 through 1881, nickel mintages were either nonexistent or limited to five figures. This Premium Gem from the final date in the range has a surprisingly fresh nickel-white appearance with only a few tiny toning flecks scattered on the obverse. The reverse stars are sharp. Population: 16 in 66, 5 finer (12/14). NGC ID# 276F, PCGS# 3811

**3487 1883/2 FS-303 AU58 PCGS.** The 2 underdigit is shifted far west of the 3, with its lower-left portion nearly touching the right side of the 8. Cherrypickers' notes that this die may represent as much as 75% of all five 1883/2 overdates. This is an attractive pinkish-gray representative with essentially all of its original mint luster remaining. PCGS# 38414 Base PCGS# 3814

**3488 1883/2 FS-303 MS63 PCGS.** The secondary 2 is seen to the west of the primary 3. What is of additional interest on this piece is the die cud at the rim below the 18 in the date. Rich rose colored toning is seen over each side with good underlying mint luster. PCGS# 38414 Base PCGS# 3814

**1883/2 FS-303 Nickel, MS65+**

**3489 1883/2 FS-303 MS65+ PCGS.** Much of the underdigit 2 is apparent between the 83 in the date. A middle die state with a rim-to-rim crack through the 18 in the date. A highly lustrous Gem with exemplary ice-blue and straw-gold surfaces. The strike is bold aside from the obverse margin. Among the finest certified of the variety. PCGS# 38414 Base PCGS# 3814

**1883/2 Nickel, Bright MS67 ★**

**3490 1883/2 FS-304 MS67 ★ NGC.** On the present FS-304 overdate, a diagonal remnant of the 2 is prominent to the left of the 3. Secondary digits are also visible in the double 8s of the date. Some of the letters in IN GOD WE TRUST also display busyness.

Bright luster shows on the untoned surfaces over both sides of this Superb Gem, each of which exhibits sharply struck design elements, including all shield lines and the star centers. Most of the leaf veins of the wreath are also strong. Close examination reveals very well cared for surfaces. No die cracks are evident. Census: 3 in 67 (1 in 67 ★), 0 finer (12/14). PCGS# 38415 Base PCGS# 3814

**1883/2 Shield Nickel, FS-304, MS67  
Tied for Finest at PCGS**

- 3491 1883/2 FS-304 MS67 PCGS. CAC.** We cannot say it any better than *Cherrypickers*': "The secondary 2 on this variety is weak but visible to the west of the primary 3. This is similar to the [FS-303], but the 2 is not quite as far west. The lower-left curve of the 2 is most evident. Secondary digits are also visible on the two 8s." The present piece is an immaculately preserved piece, nearly untuned save for a slight suggestion of heather patina. This Superb Gem is to our knowledge the second in this grade at PCGS; we offered the first in our San Francisco Signature (Heritage, 3/2014), lot 10130, where it brought \$14,100. PCGS# 38415 Base PCGS# 3814

**PROOF SHIELD NICKELS**

- 3492 1866 Rays PR65 PCGS.** Essentially a one-year type coin, the Rays design is generally only available in this year as the 1867 is so rare. Somewhere between 125 and 200 proofs were struck of this scarce and popular issue. The surfaces are brilliant and the devices show considerable mint frost, which sets up a strong cameo contrast on each side. Deep, watery proof mirrors shimmer over each side.  
*Ex: Long Beach Signature (Heritage/ 2/2002), lot 5371. NGC ID# 276G, PCGS# 3817*

**1866 With Rays Shield Nickel, PR66 Cameo  
Boldly Defined and Contrasted**

- 3493 1866 Rays PR66 Cameo PCGS. CAC.** With Deep Cameo examples prohibitively rare, high-end Cameos are about as nice as is usually available for this first-year proof issue. This piece is fully struck and equally well-mirrored, with frosty devices and just a suggestion of light golden color. An especially well-made proof, despite the Mint's difficulty in coining the hard nickel alloy in the early years of this design. Population: 29 in 66, 3 finer (12/14). PCGS# 83817

**1866 Rays Shield Nickel, PR67 Ultra Cameo**  
Among the Finest Certified

**3494 1866 Rays PR67 Ultra Cameo NGC.** The mintage of the proof 1866 Shield nickel is unknown, as production of this type did not begin until after most of the 1866 silver proof sets had already been sold. Its production total is likely limited to 125 silver proof sets distributed later in the year, plus an unknown number of minor proof sets sold during the same period. Estimates have been as high as 1,200 coins, but reality is probably closer to the 600-coin mark.

Surviving examples are scarce with cameo contrast and are extremely rare with an Ultra Cameo designation. NGC has so-graded only eight coins at all levels of preservation, with four in this grade (2 in 67+), and none numerically finer (12/14). This piece is razor-sharp, with deeply mirrored fields and just a hint of light golden color. Slight doubling is evident on the stars and the 5, a diagnostic of this die pair. An impressive and deeply contrasted example, the epitome of perfection for the proof Shield nickel series. PCGS# 93817

**3495 1867 No Rays PR65 NGC.** Second year of issue and a transitional one for the Shield nickel, this year omitting the rays device from the reverse. This is a nicely mirrored proof with pale golden toning over each side. Pinpoint strike definition. Census: 62 in 65 (3 in 65 ★), 9 finer (12/14). NGC ID# 22PF, PCGS# 3821

**3496 1867 No Rays PR65 Cameo PCGS.** The sharply detailed frosty design elements of this impressive Gem contrast boldly with the deeply reflective fields, creating stark cameo contrast. From a tiny proof mintage of 600 pieces. Population: 62 in 65, 16 finer (12/14). PCGS# 83821

**1867 No Rays Shield Nickel, PR66 Cameo**  
None Certified Numerically Finer at PCGS

**3497 1867 No Rays PR66 Cameo PCGS.** Mint records report 600 proof 1867 No Rays Shield nickels having been sold as part of silver proof sets, though a small number of additional pieces were likely also distributed through minor proof sets. This issue is scarce in Cameo grades, and is rarely seen at the Premium Gem level with that designation. The devices are well-contrasted, with deep mirroring in the fields and warm amber-gold toning over each side. A razor-sharp strike completes the appeal. Population: 16 in 66, 0 finer (11/14). PCGS# 83821

**1867 No Rays Shield Nickel**  
Lightly Toned PR66 Cameo

**3498 1867 No Rays PR66 Cameo PCGS. CAC.** A deeply contrasted proof, displaying bold, satiny design elements set against fully mirrored fields. A uniform, light golden veil masks any grade-consistent hairlines, leaving this piece with exceptional appeal and technical quality. Cameo representatives form only a small portion of the surviving 1867 No Rays proof nickel population. Population: 16 in 66, 0 finer (12/14). PCGS# 83821

**1867 No Rays Shield Nickel**  
Rare PR66 Ultra Cameo

**3499 1867 No Rays PR66 Ultra Cameo NGC.** Struck with reverse die style D, per Q. David Bower's *A Guide Book of Shield and Liberty Head Nickels*, with the star pointing between the A and M in AMERICA. As a date, this issue is obtainable, but Cameo representatives are scarce, and Ultra Cameo coins are the very definition of rare. NGC has certified only three Ultra Cameo coins in all grades, with 2 in PR66 (1 in PR66 ★), and one PR67 coin finer (12/14). This representative is boldly contrasted, with sharp, frosty devices and fully mirrored fields. The design elements exhibit bold definition throughout each side. PCGS# 93821

**1867 No Rays Nickel, Pattern Reverse, PR65 Cameo  
Reverse Die of 1866 Judd-507 Pattern**

- 3500 1867 No Rays, Pattern Reverse, PR65 Cameo PCGS.** The Pattern Reverse die refers to the Judd-507-509 (1866 No Rays) and Judd-573 (1867 No Rays) nickels, those struck from the reverse die showing two consecutive stars pointing in CENTS between E-N and between T-S, respectively; on the regular 1867 No Rays nickels, those same stars point directly down on top of the E and T in CENTS. Although PCGS has certified more than 200 submissions of the 1867 No Rays proof nickels, it shows only seven certified with the Pattern Reverse. USPatterns.com opines that "Regular 1867 proof nickel examples, from this reverse die, are extremely rare with only about 2 dozen believed to exist." This example is well-struck and nicely mirrored, with silver-white surfaces showing a light golden cast. A few dark flecks are scattered around the obverse. PCGS# 519407 Base PCGS# 519406

- 3501 1870 PR66 Cameo PCGS. CAC.** Whispers of yellow-gold color visit the surfaces of this Premium Gem Cameo. Well-defined design features stand out from the reflective fields. This is a well-preserved specimen. Population: 20 in 66 (3 in 66+), 1 finer (12/14). PCGS# 83824

- 3502 1871 PR66 Cameo PCGS. CAC.** A hint of nearly imperceptible champagne color resides on the surfaces of this Premium Gem Cameo. Well-struck devices and impeccable preservation rounds out the pleasing eye appeal of this example. Population: 25 in 66 (4 in 66+), 0 finer (12/14). PCGS# 83825

**1872 Shield Nickel, PR67 Cameo  
Tied for Finest Certified**

- 3503 1872 PR67 Cameo PCGS.** The lofty PR67 grade seems almost conservative for this remarkable Cameo; no contact marks are present, and a person can count on one hand the number of almost imperceptible hairlines that are present in the fields. The strike is complete and the contrast is bold. A light golden hue is seen over each side. Population: 4 in 67, 0 finer (12/14). PCGS# 83826

**1873 Closed 3 Nickel, Lightly Toned PR67**

- 3504 1873 Closed 3 PR67 NGC.** 1873 proof nickels are available through Gem but Superb Gems such as this offering are extremely rare with a mere eight pieces seen by the two major services. Soft yellow-gold at the margins frames ice-blue centers and the design elements are well-impressed. Both sides are impeccably preserved. Census: 5 in 67, 0 finer (12/14). NGC ID# 276P, PCGS# 3827

**1873 Closed 3 Nickel, PR66 Cameo  
Pleasing Contrast**

- 3505 1873 Closed 3 PR66 Cameo PCGS. CAC.** Proof shield nickels of 1873 can be located without too much difficulty through the Gem level of preservation. Cameos are a different story, however. PCGS has graded fewer than 85 pieces with this finish. Both sides of this Premium Gem yield pleasing field-motif contrast and sharply struck devices. A few minuscule flecks are visible but do not unduly detract. A couple of lintmarks are seen on the reverse. Well deserving of the CAC endorsement. Population: 26 in 66, 1 finer (11/14). PCGS# 83827

**1873 Closed 3 Nickel, Lightly Toned PR66 Cameo**

- 3506 1873 Closed 3 PR66 Cameo PCGS. CAC.** All proof nickels of 1873 show the Closed 3 in the date. Whispers of light gold visit both sides of this Premium Gem Cameo, each of which has been very well cared for. The design elements are well-struck, including the shield lines, veins in the leaves, and the star centers. Population: 26 in 66, 1 finer (12/14). PCGS# 83827

**1874 Shield Nickel, PR66 Cameo**  
**Remarkably Deep Mirrors**

**3507 1874 PR66 Cameo PCGS. CAC.** This date is especially scarce with cameo contrast, and only a single Deep Cameo example has been certified by PCGS (12/14). This high-end Cameo representative displays bold, satiny devices and deeply reflective fields. A tinge of pale amber-gold toning accents the obverse, though the reverse is brilliant. Population: 17 in 66 (1 in 66+), 3 finer (12/14). PCGS# 83828

**3508 1875 PR66 PCGS.** The palest gold and ice-blue hues accent the surfaces that appear otherwise untuned and nicely lustrous, sharply struck, and immensely appealing. The obverse on its own would garner a Cameo designation. Population: 15 in 66, 0 finer (12/14). NGC ID# 276S, PCGS# 3829

**3509 1875 PR65 Cameo PCGS. CAC.** Brilliant throughout with remarkable white-on-black cameo contrast between the devices and fields. Pinpoint strike details are expected on a proof, but not always the case, but it is certainly seen on this Gem. Population: 19 in 65, 11 finer (12/14). PCGS# 83829

**3510 1876 PR66+ Cameo PCGS. CAC.** Hints of gold-tan and an occasional blush of soft violet reside on the well-preserved surfaces of this high-end Premium Gem. Sharply struck design features further enhance the coin's eye appeal. Population: 37 in 66 (5 in 66+), 6 finer (12/14). PCGS# 83830

**1876 Shield Nickel, PR67 Cameo**  
**Immaculately Preserved**

**3511 1876 PR67 Cameo PCGS. CAC. Ex: Gardner.** Striking quality is sometimes lacking on this issue, and finding a piece that is deeply mirrored on both sides is even more challenging. The motifs on this example, however, exhibit razor-sharp definition and the fields are deeply-reflective. The coin is essentially brilliant, showing bright silver-gray toning that is slightly more pale on the frosted devices. An exquisite Superb Gem specimen with distraction-free, immaculately preserved surfaces. Population: 6 in 67 (1 in 67+), 0 finer (11/14). Ex: Purchased from Legend Numismatics (10/2012). PCGS# 83830

**3512 1876 PR65+ Ultra Cameo NGC. CAC.** The sole PR65+ Ultra Cameo example of this issue certified by NGC, with just eight numerically finer Ultra Cameo coins at that service (12/14). Excellent contrast with just a hint of gray patina in the gleaming fields and rich frost over the central devices. A touch above even Gem standards. Ex: Houston Signature (Heritage, 12/2010), lot 3328. PCGS# 93830

**1877 Shield Nickel, Select Proof**  
**No Corresponding Business Strike**

**3513 1877 PR63 PCGS.** The 1877 five cent is a proof-only classic with a mintage not precisely known but somewhere north of the officially listed 510 pieces. This Select proof has pale olive-gold patina over the otherwise nickel-gray surfaces. Lightly hairlined with a few contact marks in the reverse fields but a pleasing coin for the grade. NGC ID# 276U, PCGS# 3831

**1877 Shield Nickel, PR64**  
**An Essential Date Representative**

**3514 1877 PR64 PCGS.** While there are several key and semikey issues in the Shield nickel series, few are as important to the date collector as the 1877 proof. This proof-only issue was only produced to the extent of 900 pieces, and an example of the small surviving population is essential for a complete date set. This Choice representative is boldly struck, with a touch of ice-blue color in the mirrored fields. No contact marks or major hairlines are present. NGC ID# 276U, PCGS# 3831

**1877 Shield Nickel, MS64**  
**Low-Mintage Series Key**

**3515 1877 PR64 PCGS.** Subtly reflective beneath a coating of milky steel-gray patina. A few small flecks of carbon affect the reverse. While 1877 silver coins were struck in substantial quantities at the Philadelphia Mint, the remaining minors had minimal productions. Among proofs in the Shield nickel series, the 1877 is only outshined by the proof 1866 and 1867 Rays issues. Ex: Long Beach Signature (Heritage, 6/2006), lot 605. NGC ID# 276U, PCGS# 3831

**1877 Shield Nickel, PR64+  
Mandatory for a Complete Date Set**

- 3516 1877 PR64+ PCGS. CAC.** No business strike Shield nickels were produced in 1877, making the proof variant essential for a complete date set of this series. The present Plus-designated representative is boldly struck, with highly reflective fields. A faint golden hue accents each side, while the design elements display softly frosted luster. No contact marks or significant hairlines are present. NGC ID# 276U, PCGS# 3831

**1877 Shield Nickel, PR65 Cameo  
Sought-After Proof-Only Issue**

- 3517 1877 PR65 Cameo PCGS. CAC.** From a proof-only mintage of 900 pieces, this delightful Gem displays sharply detailed design elements and deeply mirrored fields, with a dramatic black-on-white cameo flash when the coin is tilted in the light. Eye appeal is terrific. Population: 42 in 65, 48 finer (12/14). PCGS# 83831

**1877 Shield Nickel, PR66 Cameo  
Essential for Date Representation**

- 3518 1877 PR66 Cameo PCGS. CAC.** This proof-only issue had a limited mintage of only 900 coins, an example of which is essential for a complete date set. This Premium Gem Cameo is boldly struck and carefully preserved, showing just a touch of gold toning over each side. With only one Deep Cameo example certified by PCGS, high-end Cameos, such as the present coin, are in high demand. Population: 41 in 66 (1 in 66+), 7 finer (12/14). PCGS# 83831

**1877 Nickel, Razor-Sharp PR67 Cameo  
Key to the Series**

- 3519 1877 PR67 Cameo NGC.** This key to the Shield nickel series was struck only in proof format. Soft champagne patina is just a touch deeper on the reverse of this Superb Gem Cameo. Razor-sharp definition is apparent on all of the design elements which are highlighted by the deep mirrored fields. Great overall eye appeal. Census: 6 in 67 (1 in 67 ★), 0 finer (12/14). PCGS# 83831

- 3520 1878 PR65 PCGS.** Both sides of this proof-only issue are immediately appealing and exhibit golden-brown toning intermingled with greenish accents. Sharply struck and carefully preserved, this pleasing Gem proof is distraction-free. NGC ID# 276V, PCGS# 3832

- 3521 1878 PR65 PCGS. CAC.** This issue from an original proof-only mintage of 2,350 pieces is not rare, but it is subject to extra market pressure due to the absence of business strikes. This Gem example is sharply struck with well-preserved surfaces that only reveal a couple of trivial grade-consistent marks in the reverse fields. NGC ID# 276V, PCGS# 3832

- 3522 1878 PR65 PCGS. CAC.** This Gem 1878 Shield nickel proof is certified in a first-generation small-size PCGS holder. An underdigit appears in the lower loop of the last digit. Breen notes the "rare earliest state ... has shaft of 7 in lower loop of last 8" but this is the second one in a row we have cataloged today. This is a lovely bluish-gray Gem proof that today might be worthy of a Cameo designation. NGC ID# 276V, PCGS# 3832

- 3523 1878 PR67 NGC.** This golden-gray Superb Gem proof 1878 Shield nickel shows remnants of metal in the lower loop of the last 8 ... Breen's *Proof Encyclopedia* calls this a "rare early state" with underdigit 7, but we believe that most show this feature. The second proof-only mintage in the series. An attractive and interesting coin. Census: 21 in 67, 0 finer (12/14). NGC ID# 276V, PCGS# 3832

**1878 Shield Nickel, PR67 Cameo  
Eye-Catching Radiance**

- 3524 1878 PR67 Cameo PCGS. CAC.** The second of two proof-only issues in the Shield nickel series, essential for a complete date collection. This Superb Gem Cameo displays a balance of radiant luster and mirrorlike reflectivity, leaning slightly toward the latter in the fields and the former on the devices. The strike is bold and the coin is devoid of distractions. Population: 4 in 67, 0 finer (12/14). PCGS# 83832

- 3525 1879/8 PR66 Cameo PCGS. CAC.** Attribution of this variety is aided by the appearance of a tiny spike at the top right of the ball over the date. This is a lovely golden-gray Premium Gem proof with good eye appeal and excellent preservation. Population: 35 in 66 (1 in 66+), 8 finer (12/14). One of 12 in this grade with the CAC sticker. PCGS# 83834

**1879 Shield Nickel, PR68  
Sole Example at Either Service**

- 3526 1879 PR68 NGC.** A total of 3,200 proof Shield nickels were struck in 1879 plus 25,900 circulation strikes, and today the finest-graded survivors of the circulation strikes are three in MS67, all at NGC. For the proof strikes, this is the sole PR68 example graded at either service (12/14). The surfaces are gray with the palest hint of lavender, and they appear fully worthy of a Cameo designation as well, although there is none. The strike is remarkably sharp and the subsequent preservation is impeccable. NGC ID# 22PG, PCGS# 3833

**1880 Nickel, Toned PR68**

- 3527 1880 PR68 NGC.** A melange of violet, yellow, orange, and ice-blue patination cascades over this lovely proof. The design elements are sharply struck, including the horizontal shield lines that are sometimes weak. There is modest contrast when the coin is tilted slightly under a light source. Immaculately preserved throughout. Census: 1 in 68, 0 finer (12/14). NGC ID# 276W, PCGS# 3835

- 3528 1881 PR67 Cameo PCGS. CAC.** This Superb Gem Cameo proof displays considerable nickel-white-on-black contrast. Both sides are sharply struck and carefully preserved. Great eye appeal. Population: 24 in 67 Cameo, 0 finer (12/14). PCGS# 83836

- 3529 1881 PR67 Cameo PCGS. CAC.** Strong field-motif contrast is apparent over both sides of this sharply struck Superb Gem. Flawless, untuned surfaces further enhance the overall eye appeal. Population: 24 in 67, 0 finer (12/14).  
*From The College Collection.* PCGS# 83836

**1881 Shield Nickel, PR67 Ultra Cameo  
Unimprovable Quality**

- 3530 1881 PR67 Ultra Cameo NGC.** Only 3,575 proof Shield nickels were struck in 1881, near the tail end of the series, and this PR67 Ultra Cameo is tied for finest in the designation with one at PCGS (12/14). The surfaces are virtually ice-white with no more than a hint of color, astoundingly mirrored and free of the smallest distraction. The full strike and excellent preservation make this a coin of unimprovable quality. PCGS# 93836

**1882 Nickel, Razor-Sharp PR68**

- 3531 1882 PR68 NGC.** An amazing state of preservation shows on each side of this Superb specimen. Deeply mirrored, the details are struck up with razor-sharp precision. There are no distracting marks or spots whatsoever. One of the highest-graded examples of this proof date, and worthy of a premium bid. Census: 4 in 68, 0 finer (12/14).  
*Ex: Central States Signature (Heritage, 4/2005), lot 5947.* NGC ID# 276Y, PCGS# 3837

- 3532 1882 PR67 Cameo NGC.** Dazzling luster and an intricate strike combine with delicate gold toning to ensure exemplary eye appeal. A wonderful representative of this penultimate proof issue. Census: 28 in 67 (4 in 67 ★), 0 finer (12/14).  
*Ex: FUN Signature (Heritage, 1/2009), lot 676.*  
PCGS# 83837

**1883 Shield Nickel, Pastel-Toned PR68  
Sole Finest Certified**

- 3533 1883 PR68 NGC.** This impeccably preserved 1883 Shield nickel proof shows pale gold and pastel mint-green colors predominating on each side. Each side is reflective and fully struck, several of the peripheral letters and numbers showing frost in their interiors. A gorgeous coin from this transitional year, and the sole finest proof certified at either leading service (12/14). NGC ID# 276Z, PCGS# 3838

## LIBERTY NICKELS

### 1883 No Cents Nickel, MS67 Well-Struck Type Coin

- 3534 1883 No Cents MS67 PCGS Secure.** A sumptuous Superb Gem example of the famous (or infamous) “racketeer nickel,” the No Cents Liberty nickel of 1883 was gold-plated and passed off by sharpsters seeking a quick buck. This frosty piece is well-struck with light accents of color a bit more prominent on the reverse. The strike is quite sharp overall, save for stars 9-11. A great type coin. Population: 22 in 67, 0 finer (11/14).  
From *The Ally Collection*. NGC ID# 2772, PCGS# 3841

### 1883 With Cents Nickel, MS66+ Sharply Struck

- 3535 1883 With Cents MS66+ PCGS.** The With Cents 1883 nickel is far more elusive in high grade than the No Cents; the present MS66+ With Cents is one of five such at PCGS and only two are finer. The pinkish-gray surfaces show subtle color and are close to a full strike, save for the lower-left ear of corn on the reverse. A beautiful coin and a Registry Set essential.  
From *The Ally Collection*. NGC ID# 22PH, PCGS# 3844

### 1884 Liberty Nickel, MS66+ None Finer at PCGS

- 3536 1884 MS66+ PCGS Secure. CAC.** This second-year Liberty nickel has largely nickel-white surfaces with a small streak of reddish-orange crossing the TE of UNITED. The reverse is in a later state with a die crack connecting the D of UNITED with the ST of STATES, while the obverse shows even more extensive cracking, particularly in the area of the coronet and to the left of the date. The stars are surprisingly sharp. Population: 30 in 66 (4 in 66+), 0 finer (11/14).  
From *The Ally Collection*. NGC ID# 22PJ, PCGS# 3845

- 3537 1885 MS60 NGC.** This technical-Mint State 1885 Liberty nickel may pose a grand opportunity for some forthright bidder. The strike is well brought up on the obverse and most of the reverse save for the lower-left ear of corn, and the surfaces show good eye appeal, for the most part. A few ticks and scrapes show on the obverse, however, along with three small dark toning spots, and they combine with some die cracks and other signs of a late-state die. A coin that should be viewed in person. NGC ID# 2773, PCGS# 3846

- 3538 1885 MS61 PCGS.** Wisps of gold-tan color visit both sides of this sharply struck nickel. A darkish debris buildup is visible around some of the stars and reverse letters. NGC ID# 2773, PCGS# 3846

### 1887 Nickel, Stunning MS66+ With CAC Approval

- 3539 1887 MS66+ PCGS. CAC.** This stunning MS66+ 1887 Liberty nickel features brilliant frosty luster beneath beautiful gold toning. The ear of corn in the left branch of the wreath presents virtually full details. In fact, this piece would qualify for the “Full Corn” designation if such a thing existed, but more importantly, the strike is full throughout both side. A light wash of pinkish color prevails on both sides, with a thin stripe of deeper orange on the lower reverse/ Population: 22 in 66 (2 in 66+), 1 finer (11/14). One of 12 in MS66 with the CAC green approval sticker.  
From *The Ally Collection*. NGC ID# 22PL, PCGS# 3848

---

**1888 Nickel, Moderately Toned MS66  
Sharp and Lustrous**

- 3540 1888 MS66 PCGS Secure. CAC.** Splendid luster wafts from each side of this moderately and beautifully toned Premium Gem, alternating golden-tan and pale mint shades on each side. A bold strike and copious eye appeal are abundantly evident. PCGS records 17 in MS66 with a single MS66+ finer (11/14).  
*From The Ally Collection. NGC ID# 2774, PCGS# 3849*

- 3541 1889 MS66 PCGS.** Whispers of champagne-gold color visit the lustrous surfaces of this Premium Gem. The design elements are well-struck except for the often seen weakness in some of the star centers and the corn ear left of the bowknot. Population: 22 in 66 (1 in 66+), 0 finer (12/14). NGC ID# 2775, PCGS# 3850

---

**1889 Liberty Nickel, Satiny MS66+  
None Finer at PCGS**

- 3542 1889 MS66+ PCGS Secure.** Satiny, pristine, and well-struck surfaces show a lavish display of light pinkish-orange coloration throughout both sides, accompanied by a laudable absence of distractions. The lower-left corn ear is softly struck, more design defect than any deficiency on the coin. Population: 22 in 66 (1 in 66+), 0 finer (11/14).  
*From The Ally Collection. NGC ID# 2775, PCGS# 3850*

---

**1890 Nickel, MS66+  
Boldly Struck With Generous Luster**

- 3543 1890 MS66+ PCGS Secure.** It is tempting to call this MS66+ 1890 nickel fully struck, as it is ever so close, but the center of star 1 is not absolute. Even the lower-left ear of corn on the reverse appears full. Generous luster emanates from beneath the tan-pink patina liberally coating each side. Population: 16 in 66 (4 in 66+), 0 finer (11/14).  
*From The Ally Collection. NGC ID# 22PM, PCGS# 3851*

- 3544 1892 MS66 PCGS.** Ebullient luster shows through the veneer of soft violet and gold patina. The design features are well-struck and both sides have been well cared for. Population: 20 in 66 (4 in 66+), 0 finer (12/14). NGC ID# 2777, PCGS# 3853

---

**1892 Liberty Nickel, Flashy MS66+**

- 3545 1892 MS66+ PCGS.** One of only four in this top grade of MS66+ at PCGS, this Premium Gem boasts near-impeccable preservation on pinkish-toned surfaces that are boldly struck overall, save for minor softness on a few of the obverse star radials. Flashy luster and top-notch eye appeal more than compensate. Population: 20 in 66 (4 in 66+), 0 finer (11/14).  
*From The Ally Collection. NGC ID# 2777, PCGS# 3853*

---

**1892 Nickel, Well-Preserved MS66**

- 3546 1892 MS66 PCGS Secure. CAC.** Despite a copious mintage of more than 11.6 million pieces, the 1892 nickel is difficult to find with clean surfaces and a sharp strike. This well-preserved, boldly lustrous Premium Gem with CAC approval shows a light layer of golden patina with scattered orange accents, but even on this piece some of the star centers are only rudimentary. Nonetheless, this piece is one of the finest available in overall quality. Population: 20 in 66 (4 in 66+), 0 finer (11/14).  
*From The Ally Collection. NGC ID# 2777, PCGS# 3853*

- 3547 1893 MS66 PCGS Secure.** Engaging mint frost enlivens each side of this Premium Gem 1893 nickel, showing few marks but a soft strike on some of the lower stars on the obverse and that pesky ear of corn on the reverse. A nice example for the grade and date. Population: 21 in 66 (1 in 66+), 1 finer (12/14).  
*From The Ally Collection. NGC ID# 2778, PCGS# 3854*

**1894 Nickel, Top-Notch MS66+  
Tied With One Other for Finest at PCGS**

- 3548 1894 MS66+ PCGS Secure. CAC.** A “pop 2/0” coin at PCGS, this MS66+ 1894 nickel shares the top Registry Set spot with only one other so fine. The 1894 is a lower-mintage date due to the Panic of 1893, and mintages fell sharply in its aftermath. Alternating gray and golden-pink areas appear on surfaces that are both sharply struck (save for a couple of star centers) and well-preserved. A few faint flecks on the obverse are trivial in context with the high quality on display. Population: 28 in 66 (2 in 66+), 0 finer (11/14).  
*From The Ally Collection. NGC ID# 2779, PCGS# 3855*

- 3549 1895 MS65 NGC. CAC.** Champagne-gold color runs over the lustrous surfaces that are devoid of mentionable marks or spots. The design elements are well-struck save for the usual softness in some of the star centers and the corn ear left of the bowknot. Census: 44 in 65 (2 in 65 ★), 11 finer (12/14). NGC ID# 277A, PCGS# 3856

- 3550 1895 MS65 NGC. CAC.** Peach and gold-orange hues cover much of each side, though pale nickel-gray elements are also present. A luminous Gem with above-average detail, even on the typically weak lower wreath. Census: 44 in 65 (2 in 65 ★), 11 finer (12/14). NGC ID# 277A, PCGS# 3856

**1895 Nickel, Fully Struck MS66  
Elusive Date So Fine**

- 3551 1895 MS66 PCGS Secure.** Deep brownish-gold toning complements a marvelous full strike, showing weakness neither on any of the star centers nor that pesky lower-left ear of corn. The luster is lavish, making a second criterion that separates this piece from the vast majority of its cohort. The search for another example as well-struck and problem-free would be long and perhaps fruitless. Population: 16 in 66, 0 finer (11/14).  
*From The Ally Collection. NGC ID# 277A, PCGS# 3856*

- 3552 1896 MS65 PCGS. CAC. Ex: Friend.** This date has long been considered among the scarcest in the entire Liberty nickel series, although price levels are not up to those of the 1885 issue. In Gem condition, this date is equally elusive, if not more so. The surfaces have soft, frosty gray color with wisps of gold on the obverse and bluish-violet color on the reverse. It is remarkably sharp, including full details in the ear of corn at the lower left part of the wreath. Population: 67 in 65 (2 in 65+), 15 finer (12/14). NGC ID# 277B, PCGS# 3857

**1896 Nickel, Impeccable MS66**

- 3553 1896 MS66 PCGS Secure.** One of our favorites in this marvelous complete Registry Set of Liberty nickels. The surfaces display impeccable quality and copious luster under a moderate layer of brownish-gold patina with glints of pale blue near the obverse rim. The strike is full save for the lower-left ear of corn, and you can blame that on Charles Barber rather than the coiner, for placing this area opposite the highest points of Liberty's hair on the obverse. Population: 14 in 66 (2 in 66+), 0 finer (11/14).  
*From The Ally Collection. NGC ID# 277B, PCGS# 3857*

**1897 Nickel, MS66+  
Challenging Issue and a Full Strike**

- 3554 1897 MS66+ PCGS.** Around five years ago, a friend of the present writer was attempting to assemble a nice, top-grade Mint State Registry Set of Liberty nickels. He had the 1912-D and 1912-S in good shape, a Gem 1885 and 1886, most of the usually challenging dates from the 1880s. The most difficult issues for him to find in nice shape were the 1897 and 1902. For the 1897, many of the 20 million struck were made from worn dies and show detail weakness. This MS66+ example is at the top of the heap both technically and aesthetically. showing pale blue-green central patina on each side framed by light gold at the rims. The strike is as full as one will ever see on this date, and a bit of planchet roughness on the reverse, as made, is trivial in context. Population: 17 in 66 (4 in 66+), 1 finer (11/14).  
*From The Ally Collection. NGC ID# 22PN, PCGS# 3858*

**1897 Nickel, MS66+  
Top-Notch Eye Appeal**

- 3555 1897 MS66+ PCGS. CAC.** Beautiful surfaces on this Premium Gem range from olive-gold to copper-gold on the obverse, with the reverse adding a dollop of pale ice-blue. The preservation is pristine and the strike adequate save in the usual areas, the two uppermost stars on the obverse and that left ear of corn opposite on the reverse. The eye appeal is top-notch. Population: 17 in 66 (4 in 66+), 1 finer (12/14). NGC ID# 22PN, PCGS# 3858

---

**1899 Nickel, Impeccable, Untoned MS66+  
One Numerically Finer at PCGS**

**3556 1899 MS66+ PCGS Secure. CAC.** This sparkling Premium Gem is untoned save for the faintest hint of color in the central reverse. All star radials are full and the hair above Liberty's head is fully struck up, but the reverse shows the usual sole area of weakness. The surface preservation is outstanding. Population: 70 in 66 (4 in 66+), 1 finer (11/14).

*From The Ally Collection. NGC ID# 22PR, PCGS# 3860*

---

**1900 Nickel, Satiny MS67  
Tied for Finest Graded**

**3557 1900 MS67 PCGS Secure.** Gorgeous satiny luster complements a bold strike and blatant eye appeal throughout both sides of this Superb Gem 1900 Liberty nickel. PCGS reports only six in this ultimate grade with none finer (11/14). Golden and mint patina is as irresistible as the excellent preservation. Although the turn-of-the-century 1900 nickels were struck in the amount of 27 million-plus coins, most were on the light side of high-quality. Planchet problems and poor strikes are typical plagues on the issue, making the present example a praiseworthy exception.

*From The Ally Collection. NGC ID# 22PS, PCGS# 3861*

---

**1902 Nickel, Exceptional MS67  
Heather and Pale Blue Patina**

**3558 1902 MS67 PCGS Secure.** Consider that of the 31.5 million Liberty nickels struck in 1902, PCGS has graded 0.000016% of them at the Superb Gem top level. One can guess the usual problems that preclude the top grade, among them poor planchets, often-miserable strikes, circulation wear for the vast majority of survivors, and excessive surface marks even on most Mint State pieces extant. This virtually flawless, exceptional coin displays a needle-sharp strike in all areas, amid flashy luster on heather- and pale-blue-toned surfaces.

*From The Ally Collection. NGC ID# 277D, PCGS# 3863*

---

**3559 1903 MS66+ PCGS. CAC.** This high-end Premium Gem 1903 nickel exhibits well-detailed design elements and lustrous pristine surfaces, with light gold and olive-gray patina. PCGS has certified eight submissions in MS66+ with two finer, both MS67 (12/14).

*From The Ally Collection. NGC ID# 277E, PCGS# 3864*

**3560 1904 MS66+ PCGS.** Bright, coruscating mint luster characterizes this Plus-graded Premium Gem. The strike is strong throughout and there are no obvious or mentionable abrasions. Population: 91 in 66 (6 in 66+), 0 finer (12/14). NGC ID# 277F, PCGS# 3865

**3561 1904 MS66+ PCGS Secure. CAC.** Gorgeous cartwheel luster emanates from each side of this nicely preserved Premium Gem. The surfaces show beautiful olive-gold color and excellent eye appeal, but several of the obverse stars are softly struck in their centers. The lower-left wreath on the reverse is similarly soft. This is one of only six in MS66+ at PCGS and none are finer (12/14).

*From The Ally Collection. NGC ID# 277F, PCGS# 3865*

---

**1905 Nickel, Flashy MS66+  
Registry Set Essential**

**3562 1905 MS66+ PCGS Secure.** A melange of heather, copper, gold, and pale brown toning on well-struck surfaces showing flashy luster make this an extremely appealing representative of this late-date issue. A few tiny dark flecks are largely inconsequential. A Registry Set essential in this grade. Population: 79 in 66 (3 in 66+), 0 finer (11/14).

*From The Ally Collection. NGC ID# 277G, PCGS# 3866*

**1906 Nickel, MS66+  
Sole Example So Graded at PCGS**

**3563 1906 MS66+ PCGS Secure. CAC.** A well-struck, frosty example of this late-series issue, showing pinkish-gold patina amid copious luster and a notable paucity of mentionable marks. All obverse stars show their radials, although a touch of softness shows in the hair and that pesky ear of corn. The overall preservation nonetheless makes this a "pop 1/0" coin. Population: 21 in 66 (1 in 66+), 0 finer (11/14). *From The Ally Collection. NGC ID# 277H, PCGS# 3867*

**1907 Liberty Nickel, Sharp MS66+  
Sole Finest at PCGS**

**3564 1907 MS66+ PCGS Secure. CAC.** Some of the kernels of corn show on those two lower ears, marking this as a sharply struck example of the 1907 issue, as does the full detail present in most of the stars on the obverse. Softly lustrous pinkish-gray surfaces show splendid preservation and excellent eye appeal. The sole finest graded at PCGS, essential for a top Registry Set. Population: 29 in 66 (1 in 66+), 1 finer (11/14). *From The Ally Collection. NGC ID# 277J, PCGS# 3868*

**1908 Nickel, MS66  
Well-Struck Throughout**

**3565 1908 MS66 PCGS Secure.** Waves of tan and gold patina enhance each side of this nicely preserved and boldly struck 1908 Liberty nickel, one of only 19 in this grade at PCGS; a single MS66+ is marginally finer (11/14). The star radials, most of Liberty's hair, and much of the wreath on the reverse are well struck up, and the eye appeal is excellent. *From The Ally Collection. NGC ID# 22PT, PCGS# 3869*

**1909 Nickel, Flashy MS66+  
Sole Finest at PCGS, Elusive Late Date**

**3566 1909 MS66+ PCGS Secure.** This is as fully struck an example of this elusive late-date Liberty nickel as can be imagined, showing good details on the ears of corn and full details otherwise throughout each side. The pinkish-tan surfaces show accents of gold and sumptuous eye appeal, due not only to the flashy luster but also to the excellent preservation. The sole finest certified at PCGS. Population: 27 in 66 (1 in 66+), 0 finer (11/14). *From The Ally Collection. NGC ID# 277K, PCGS# 3870*

**1910 Liberty Nickel, MS66  
Only One Numerically Finer at PCGS**

**3567 1910 MS66 PCGS.** The 1910 Liberty nickel is an available late-series date, popular among type collectors, but even this issue becomes rare at the Premium Gem grade level. The present offering is radiantly satiny, with a pale golden hue over each side. A few insignificant, grade-consistent ticks are present, but are undetectable to the unaided eye. The corn ear to the left of the wreath bow is softly struck, as usual, with slight softness also seen on the corresponding portion of Liberty's hair curls, but the stars are sharp and the eye appeal is excellent. Population: 18 in 66 (3 in 66+), 1 finer (11/14). NGC ID# 277L, PCGS# 3871

**1910 Nickel, Knockout MS66+  
Rainbow Iridescence**

**3568 1910 MS66+ PCGS Secure. CAC. Ex: Baxi.** Knockout eye appeal is produced by the incredible patina, heather in the centers with arcs of rainbow iridescence at the upper obverse and lower reverse. The strike is quite sharp overall save for the lower wreath, and there are no mentionable marks other than a few grayish flecks, inconsequential compared to the blatant quality. Population: 18 in 66 (3 in 66+), 1 finer (11/14). *From The Ally Collection. NGC ID# 277L, PCGS# 3871*

- 3569 1911 MS66+ PCGS Secure. CAC.** Attractive olive-green and citrine hues enliven each side of this nicely preserved Premium Gem nickel. There are minimal signs of contact but the strike is soft on the lower-left wreath and CE(NTS) below, and oppositely at stars 6-8, as much a design flaw as a strike deficiency. Population: 43 in 66 (2 in 66+), 2 finer (12/14).  
*From The Ally Collection. NGC ID# 277M, PCGS# 3872*

**1912 Nickel, Intensely Toned MS66+  
Sole Finest at PCGS**

- 3570 1912 MS66+ PCGS Secure. CAC.** Deep orange-red with hints of green on the obverse contrast with a tan-gold reverse accented in pale blue on this intensely patinated 1912 Liberty nickel. A thorough examination reveals no mentionable marks and an adequate strike. A prize for lovers of intense color, and the sole finest at PCGS. Population: 30 in 66 (1 in 66+), 0 finer (11/14).  
*From The Ally Collection. NGC ID# 277N, PCGS# 3873*

**1912-D Nickel, Toned MS66  
Show-Stopper Semikey Issue**

- 3571 1912-D MS66 PCGS Secure.** Pale but thoroughgoing patina runs over each side of this bold Premium Gem 1912-D, mint-green, heather, and gold patina complementing the excellent preservation and flashy luster radiating from the satiny surfaces. The strike is essentially full throughout both sides, a crucial consideration for prospective bidders. An important semikey in the complete Liberty nickel set, the 1912-D is unknown in finer grades at PCGS. Population: 35 in 66, 0 finer (11/14).  
*From The Ally Collection. NGC ID# 277R, PCGS# 3874*

**1912-S Nickel, Attractively Toned MS65**

- 3572 1912-S MS65 PCGS.** Light mint-green central toning cedes to pale amber near the rims on each side of this attractive Gem 1912-S nickel, and in-demand key date in the series along with its sibling 1912-D issue. This piece shows no mentionable contact, but the strike is soft on the lower three stars on the obverse as well as the usual area on the reverse. NGC ID# 277R, PCGS# 3875

**1912-S Liberty Nickel, Satiny MS65+  
Rarely Encountered Finer**

- 3573 1912-S MS65+ PCGS.** The sole San Francisco issue in the series and an important semikey. This high-end Gem exhibits satiny luster beneath uniform golden-gray toning that shows the occasional wisp of lavender and sky-blue. The lower-left wreath leaves and the corresponding portion of Liberty's hair are slightly soft, as usual, though the eye appeal is above-average for this seldom lustrous issue. Only 19 coins are numerically finer at PCGS (12/14). NGC ID# 277R, PCGS# 3875

**1912-S Nickel, Lightly Toned MS65+**

- 3574 1912-S MS65+ PCGS Secure. CAC.** Untoned silver areas alternate with golden and tan patina closer to the rims on each side of this key-date Liberty nickel. The surfaces show no mentionable marks but possess the usual glossy appearance. The moderate strike softness on the hair above the forehead and on the ears of corn on the reverse are part and parcel of the issue. Population: 39 in 65+, 18 finer (11/14).  
*From The Ally Collection. NGC ID# 277R, PCGS# 3875*

**PROOF LIBERTY NICKELS**

**1883 No Cents Liberty Nickel, PR67 Cameo  
A Type Set of One, Ex: Groman**

- 3575 1883 No Cents PR67 Cameo PCGS. Ex: Groman.** The leadoff piece to a former PCGS Registry award-winning set and it looks the part. Crisply detailed and generally untuned but with clear contrast seen between the fields and devices, this piece has no visible post-striking faults. A marvelous Cameo Superb Gem proof of its one-year type. Population: 16 in 67 Cameo, 0 finer (11/14). PCGS# 83878

**1885 Nickel, PR67 ★  
Stunning Eye Appeal**

- 3576 1885 PR67 ★ NGC.** The 1885 date, whether in proof or business-strike format, needs no introduction to Liberty nickel series enthusiasts. This is a stunning Superb Gem proof with pinkish-gold centers on each side, ringed by pale blue and mint at the margins, a reflective coin (and quite a well-struck one) aptly deserving of NGC's Star accolade for superior eye appeal. NGC ID# 277T, PCGS# 3883

**1885 Nickel, PR67+  
Delicate, Attractive Toning**

- 3577 1885 PR67+ PCGS. CAC.** Due to the rarity of high-grade business strikes, the proof 1885 Liberty nickel is in high demand among date collectors. This high-end Superb Gem representative is deeply mirrored in the fields and satiny on the devices, creating subtle cameo contrast. Traces of pale champagne and lavender accent cool ice-blue toning overall. Population: 17 in 67 (3 in 67+), 1 finer (12/14). NGC ID# 277T, PCGS# 3883

**1885 Nickel, Lightly Toned PR68  
Among the Four Finest Known**

- 3578 1885 PR68 NGC.** Proof 1885 Liberty nickels are quite popular because of the relative scarcity of their business strike counterpart. A mere 3,790 proofs were struck, and neither NGC nor PCGS has certified any pieces finer than the present coin. In fact, just four pieces have been certified at the PR68 level by both services combined, and it is possible that that number represents resubmissions of the same coin.

Soft gold and violet tints accent the light gray surfaces of this impeccably preserved specimen. A tiny as-made planchet defect between the 1 and the 8 in the date is mentioned only for future identification purposes. The first two stars are a trifle soft, but the rest of the details are fully struck. This specimen would make a spectacular addition to a registry set. Census: 3 in 68, 0 finer (12/14).

Ex: *Central States Signature* (Heritage, 9/2008), lot 680. NGC ID# 277T, PCGS# 3883

- 3579 1885 PR66+ Cameo PCGS. CAC.** The 1885 proof Liberty nickel is an issue whose demand increases from the paucity of the circulation-strike coins. This lovely Premium Gem proof offers deeply contrasted surfaces with a full strike throughout — even on the lower-left ear of corn on the reverse. Beautiful golden-rose color and a lack of distractions make this a standout example. Population: 52 in 66 Cameo (3 in 66+), 11 finer (12/14). PCGS# 83883

**1886 Nickel, PR67 ★  
Sharply Struck and Lightly Toned**

- 3580 1886 PR67 ★ NGC.** This sharply struck Superb Gem has beautiful peach, apricot, and powder-blue colors. The fields are more satiny than mirrored, and a small lamination above the final star is fully retained and of mint origin. The 1886 is the second key to the business strike Liberty nickel series, and the elusive nature of quality Uncirculated survivors contributes significantly to the demand for high grade proofs. Census: 20 in 67 (1 in 67+, 3 in 67 ★, 1 in 67+★), 0 finer (12/14). Ex: *Pittsburgh Signature* (Heritage, 8/2004), lot 5492. NGC ID# 277U, PCGS# 3884

**1887 Nickel, Softly Toned PR67**

- 3581 1887 PR67 NGC. CAC.** The 1887 nickel proof is from a production of nearly 3,000 pieces. The present Superb Gem is one of the nine finest seen by NGC and PCGS. A veneer of soft violet is imbued with hints of yellow-gold. The design elements are sharply struck, including all of Liberty's hair, the star centers, and the corn and wheat ear left of the bowknot. Both sides are impeccably preserved. Census: 4 in 67, 0 finer (12/14). NGC ID# 277V, PCGS# 3885

- 3582 1890 PR66 Cameo PCGS.** Ex: *Groman*. A remarkable example with razor-sharp strike definition and a mixture of gold, sea-green, terra cotta and rose toning on the obverse. The reverse exhibits blended apple-green, gold, and lavender-rose toning. Both side of the coin are well-preserved and nearly blemish-free. Population: 20 in 66 (3 in 66+), 1 finer (11/14). PCGS# 83888

---

**1891 Liberty Nickel, PR66 Deep Cameo**  
**One of the Finest-Known Examples**

- 3583 1891 PR66 Deep Cameo PCGS Secure.** Despite a substantial mintage of 2,350 pieces, the 1891 proof Liberty nickel is rarely encountered with Deep Cameo surfaces. This spectacular Premium Gem displays intense cameo contrast between the deeply mirrored fields and the sharply detailed, frosty design elements. A few wisps of pale orange toning accent the impeccable surfaces. Population: 8 in 66 (3 in 66+), 0 finer (12/14).  
Ex: ANA Signature (Heritage, 10/2012), lot 3440. PCGS# 93889

---

**1893 Liberty Nickel, PR66**  
**Bold Ultra Cameo Representative**

- 3584 1893 PR66 Ultra Cameo NGC.** Stark white-on-black contrast is the first thing the viewer notices about this deeply mirrored Premium Gem, and the razor-sharp strike and excellent preservation become evident upon closer examination. NGC has encapsulated only six examples of this proof issue in Ultra Cameo grades, with four in PR66 and just one PR67 coin numerically finer (12/14). PCGS# 93891

---

**1894 Nickel, PR67 Cameo**  
**Radiant Brilliance**

- 3585 1894 PR67 Cameo NGC.** Proof nickels of 1894 are often available in the absolute sense, but cross over into a search for Cameo representatives, and this issue becomes substantially more difficult to locate. NGC has certified only 35 Cameos in all grades, with eight in PR67 (2 in 67 ★) and none numerically finer (11/14). This piece is deeply reflective and dazzling, with brilliant fields and frost-white devices that yield fully defined details. A beautiful date or type representative. PCGS# 83892

---

**1895 Nickel, Pastel-Toned PR67**  
**Fully Struck With Remarkable Eye Appeal**

- 3586 1895 PR67 PCGS.** Pale heather and blue hues dominate most of each side, but a thin sliver of iridescence tops off the broad eye appeal on this Superb Gem proof. The full strike is remarkable (even that pesky ear of corn), and only a single small mark appears on the reverse, below the last S in STATES. A beautiful example of this midseries date. Population: 1 in 67, 0 finer (12/14). NGC ID# 2785, PCGS# 3893

---

**1896 Liberty Nickel, PR66 Deep Cameo**  
**Rarely Seen With Deep Cameo Contrast**

- 3587 1896 PR66 Deep Cameo PCGS. CAC.** The limpid mirrors on this silver-white Premium Gem have a quicksilver appearance, with deeply frosted devices and no discernible trace of color. This piece is fully struck throughout, with a loupe required to notice a few flecks of dark-gray toning. One of the finest survivors of the proof issue of 1,862 coins, and unusual as a Deep Cameo Liberty nickel. Population: 1 in 66, 1 finer (11/14). PCGS# 93894

---

**1897 Nickel, Toned PR68**  
**One of the Three Finest**

- 3588 1897 PR68 NGC.** This Superb Gem proof boasts incredible iridescent color in a melange of sage, sunset-orange, gold, violet, and emerald-green, with excellent reflectivity despite the deep colors. This coin might easily have gotten the NGC Star designation, but in any case it is one of the three finest graded, and a prize for color aficionados. Census: 2 in 68, 0 finer (12/14). NGC ID# 2787, PCGS# 3895

**1897 Nickel, PR67 Cameo**  
**Delicate Golden Toning**

**3589 1897 PR67 Cameo PCGS.** The 1897 is one of the more plentiful proof issues in the series with cameo qualities, ideal for the type collector. Many of the early 20th century issues are available, but are also scarce with a Cameo designation. This lovely piece is boldly struck and deeply mirrored, with warm sun-gold toning over both sides. Population: 19 in 67 (4 in 67+), 0 finer (12/14). PCGS# 83895

**1897 Nickel, PR67+ Cameo**  
**Lightly Toned and Appealing**

**3590 1897 PR67+ Cameo PCGS.** Delicate lavender and pastel blue hues blend together over both sides of this high-end Superb Gem, with a faint touch of pale champagne also residing over much of the reverse. The strike is bold, and the contrast between the satiny devices and deeply mirrored fields is pronounced. Population: 19 in 67 (4 in 67+), 0 finer (12/14). PCGS# 83895

**1897 Nickel, PR67 Cameo**  
**Deeply Contrasted Example**

**3591 1897 PR67 Cameo PCGS. CAC.** This is a quicksilver piece with just a bit of light golden toning on Liberty's lower neck. The coin is fully struck, as expected but not always achieved for proofs of the issue. The bold contrast and lack of any visible abrasions further contribute to the exceptional eye appeal. Among the finest certified at PCGS, although a single PR68 non-Cameo is numerically superior.  
*Ex: FUN Signature (Heritage, 1/2010), lot 536. PCGS# 83895*

**1898 Nickel, PR67+ Cameo**  
**Tied for Finest Certified Cameo at PCGS**

**3592 1898 PR67+ Cameo PCGS.** Cameos comprise only a fraction of the 1898 proof nickel population, and are genuinely rare in Superb Gem condition. This piece is boldly struck and delicately preserved. Both sides exhibit pronounced sunset-gold and amber-red hues, with a few lilac and mint-green tinges intermingled around the peripheries. Population: 7 in 67 (2 in 67+), 0 finer (12/14). PCGS# 83896

**1900 Liberty Nickel, PR68 ★**  
**Delicate Rainbow Toning**

**3593 1900 PR68 ★ NGC. CAC.** Statistically this is a coin that should not exist in so high a grade, but this piece is one of those rare numismatic happenstances, where excellent production values meet loving postproduction preservation. Both NGC and CAC have fittingly awarded extra recognition to the piece. Liberty faces westward into a sunset of orange and gold, while her head and behind are tinged with heather and lilac hues. The reverse offers similar shades in an even more dramatic fashion, while adding a sliver of pale jade-green. The strike is as bold as the coloration, and both sides are expectedly free of even the remotest distraction. Census: 1 in 68 (1 in 68 ★), 0 finer (11/14).  
*Ex: Central States Signature (Heritage, 4/2008), lot 2252. NGC ID# 278A, PCGS# 3898*

**3594 1901 PR67 Cameo NGC.** Luminous lemon color fills the centers, while rose and lime-green hues adorn the margins. This beautifully toned Superb Gem proof is splendidly preserved. A mint-made diagonal die line from the N in UNITED does not affect the condition, which is immaculate aside from a couple of nearly microscopic carbon flecks. Census: 9 in 67 Cameo (1 in 67 ★), 0 finer (12/14).  
*Ex: Palm Beach Signature (Heritage, 11/2004), lot 5903, which brought \$4,025. PCGS# 83899*

**1901 Nickel, PR67 Deep Cameo  
Tied for Finest Certified**

**3595 1901 PR67 Deep Cameo PCGS.** The proof Liberty nickel collector's dream coin, this boldly contrasted, deeply mirrored Superb Gem is tied with one other for the finest of just five Deep Cameo representatives certified by PCGS; NGC has only encapsulated two Ultra Cameo coins, none above PR66 (12/14). The design definition on this piece is as impressive its preservation and eye appeal, and the surfaces are nearly brilliant, save for a faint golden hue that attests the originality of the surfaces. A beautiful example of this unexpected condition rarity, from a mintage of 1,985 coins. PCGS# 93899

**3596 1902 PR67 NGC.** This is a brilliant silver-white, glittering Superb Gem proof with no mentionable distractions visible to the naked eye, a beautiful coin with a good (if not absolute) strike and lots of eye appeal. NGC ID# 278C, PCGS# 3900

**3597 1903 PR67 Cameo NGC.** This fully struck proof exhibits profound contrast between the frosted central devices and the deeply reflective fields. A virtually pristine Superb Gem, conditionally rare at this lofty grade level. Census: 14 in 67 (1 in 67 ★), 2 finer (11/14). PCGS# 83901

**1903 Nickel, PR67 Cameo  
Clearly Contrasted**

**3598 1903 PR67 Cameo PCGS.** Gleaming nickel-white surfaces overall with a prominent patch of orange at the bottom left reverse margin and a faint echo on the left struck of the V within the wreath. Intricately detailed and carefully preserved with just a hint of orange-peel texture in the mirrored fields that carry the coin's contrast. Population: 15 in 67 (4 in 67+), 1 finer (11/14). PCGS# 83901

**1904 Nickel, PR67+ Cameo  
Uniquely Toned in Pastel Hues**

**3599 1904 PR67+ Cameo PCGS. CAC.** Due to the way the proof dies were prepared during this period, Cameo examples of the 1904 nickel are major rarities within an otherwise plentiful issue. This example is distinctly contrasted, with fully mirrored fields that showcase an icy-blue reflection on the obverse and a blend of pastel lavender, gold, and sky-blue on the reverse. PCGS has certified only eight Cameos in all grades, and this representative is the sole finest (12/14). PCGS# 83902

**3600 1905 PR66 Cameo NGC.** Light champagne patina graces each side of this Premium Gem proof. The fields are moderately reflective and combine with the delicately frosted devices for significant contrast. Census: 4 in 66 Cameo, 3 finer (12/14). Ex: *Dallas Signature* (Heritage, 10/2006), lot 483. PCGS# 83903

**1906 Liberty Nickel, PR67 Cameo  
Untoned and Fully Struck**

- 3601 1906 PR67 Cameo PCGS. CAC.** This is a beautiful and virtually flawless example of the 1906 Liberty nickel issue. Both sides of the piece are fully struck and entirely untuned, showing good reflectivity in the fields and lovely light frost on the devices. Population: 19 in 67 Cameo (1 in 67+), 2 finer (12/14).  
Ex: Dallas Signature (Heritage, 11/2007), lot 265, realized \$4,312.50;  
Scott Rudolph Collection /FUN Signature (Heritage, 1/2009), lot 765, brought \$2,990. PCGS# 83904

**1906 Liberty Nickel, PR67 Cameo  
Delicate Multicolor Toning**

- 3602 1906 PR67 Cameo PCGS. CAC.** An attractively mirrored, pleasingly contrasted specimen from this issue of 1,725 proofs. Delicate aqua, green-gold, and lilac-blue tints run over both sides of this Superb Gem. Fully struck throughout. Virtually flawless eye appeal. Population: 19 in 67 (1 in 67+), 2 finer (12/14).  
Ex: Central States Signature (Heritage, 4/2008), lot 407; Baltimore Signature (Heritage, 7/2008), lot 1322; FUN Signature (Heritage, 1/2010), lot 544. PCGS# 83904

**1908 Liberty Nickel, PR67+  
Subtle Field-Motif Contrast**

- 3603 1908 PR67+ PCGS. CAC.** Wisps of sky-blue shine through delicate sun-gold toning over each side of this Plus-designated Superb Gem proof, with the occasional dash of deeper lavender also seen in the margins. The wreath is well-defined and the preservation is exceptional. This issue is rare in PR67 condition, with or without a Cameo designation on the holder. Population: 16 in 67 (2 in 67+), 0 finer (12/14). NGC ID# 278J, PCGS# 3906

- 3604 1908 PR66 Cameo PCGS.** Sharply detailed central devices offer pleasing cameo contrast with the deeply mirrored fields of this well-preserved Premium Gem, while a light golden hue warms each side. Population: 23 in 66 (2 in 66+), 7 finer (12/14). PCGS# 83906

- 3605 1908 PR66 Cameo PCGS.** Glowing golden surfaces and a full proof strike make this an extremely attractive example of this late-series issue, showing significant contrast and excellent eye appeal. Population: 23 in 66 Cameo (2 in 66+), 7 finer (12/14). PCGS# 83906

- 3606 1908 PR66 Cameo PCGS.** Stunning field-device contrast and sharply struck design features stand out on this Premium Gem Cameo. Well-preserved throughout. Population: 23 in 66 (2 in 66+), 7 finer (12/14). PCGS# 83906

**1909 Nickel, PR68 Cameo  
Immaculately Preserved**

- 3607 1909 PR68 Cameo NGC.** The frosted motifs stand out against the the fields at virtually all angles. A sharp strike characterizes the design elements except for the usually seen softness in a few star centers and the ear of corn left of the bowknot. Soft champagne patina covers the immaculately well preserved surfaces. Census: 8 in 68 (2 in 68 ★), 0 finer (12/14). PCGS# 83907

**1910 Nickel, PR68  
Unsurpassed Visual Appeal**

- 3608 1910 PR68 PCGS. CAC.** What's not to like about this coin? The only thing it seems to lack is an official Cameo designation and, in fact, there is moderate contrast between the fields and devices. Each side has a visually pleasing mixture of rich, multicolored patina. The surfaces appear perfect even under a loupe. Amazing quality. Population: 3 in 68, 0 finer (12/14).  
Ex: Dallas Signature (Heritage, 10/2009), lot 267. NGC ID# 278L, PCGS# 3908

**1910 Liberty Nickel, PR68 ★  
Delicately Toned**

- 3609 1910 PR68 ★ NGC. CAC.** Bold design definition and glassy mirrors beautifully compliment blended sunset-red, lemon-gold, and mint-green hues blanketing each side. The preservation is exceptional and the eye appeal is well-deserving of the Star designation. NGC has certified only five non-Cameo proofs at the PR68 grade level with none numerically finer, and this piece is one of just two examples to receive a Star designation (12/14). NGC ID# 278L, PCGS# 3908

**1910 Nickel, PR68 Cameo  
Beautiful Pastel Toning**

- 3610 1910 PR68 Cameo PCGS. CAC.** The 1910 Liberty nickel is neither particularly common nor particularly rare as a proof, unsurprising given its nominal mintage of 2,405 pieces. PCGS has certified one PR67+ and three PR68 submissions. There are also three in PR68 Cameo including this piece, and the finest Deep Cameo at PCGS is a single PR67 Deep Cameo. This is currently the sole PR68 Cameo certified at PCGS (12/14). This piece is close to a full strike and beautifully toned in pastel citrine and heather shades, but not so deep as to diminish the perceptible contrast between fields and devices. PCGS# 83908

**1911 Nickel, PR67 Cameo  
Lightly Toned Overall**

- 3611 1911 PR67 Cameo PCGS. CAC.** A curiously toned example, this Superb Gem proof displays a blanket of blended lavender, gold, and mint-green hues over the obverse, while the reverse shows deeper hues of the same over the lower half and brighter mint-green and sky-blue shadings over the upper portion. The strike is bold, and the heavily frosted devices do not disappoint in regards to contrast with the mirrored fields. Population: 12 in 67, 0 finer (12/14). PCGS# 83909

- 3612 1912 PR67 PCGS.** Bands of rainbow iridescence encompass each side of this nicely mirrored Superb Gem proof, yellow, green, and orange prevailing on the obverse against pale blue and pink on the reverse. A fully struck proof, this piece shows some tiny flecks in the obverse field under a loupe. Population: 6 in 67, 0 finer (12/14). NGC ID# 278N, PCGS# 3910

**BUFFALO NICKELS**

- 3613 1913-S Type One MS66+ NGC. CAC.** Rainbow-like toning runs over the lustrous surfaces of this high-end Premium Gem. This sharply struck coin is marvelously well preserved. Census: 56 in 66 (2 in 66+), 18 finer (12/14). NGC ID# 22PY, PCGS# 3917

**1913 Type Two Buffalo Nickel, MS67  
None Certified Numerically Finer**

- 3614 1913 Type Two MS67 NGC.** The Type Two 1913 Buffalo nickel is significantly scarcer than its Type One counterpart, as fewer examples of this issue were saved as first-year issue representatives. This Superb Gem displays rich, satiny luster, with blended sky-blue, mint-gold, and pale lavender toning over each side. Well-struck and beautifully preserved. Census: 11 in 67 (5 in 67 ★), 0 finer (11/14). NGC ID# 22PZ, PCGS# 3921

- 3615 1913-D Type Two MS66 PCGS.** Soft champagne-gold patina takes on deeper shades on the reverse, where it is joined with a splash of lavender in the lower right quadrant. Both sides exhibit frosty luster, and each is nicely preserved. Sharp definition is evident on the design features. Population: 69 in 66, 13 finer (12/14). NGC ID# 22R2, PCGS# 3922

**1913-S Type Two Nickel, MS65**  
**Popular Low-Mintage Issue**

- 3616 1913-S Type Two MS65 PCGS.** This satiny Gem displays iridescent rose-gold and silvery-gray color over each side, with light pastel-green shades on portions of the obverse. The strike is generally pleasing overall, including the peripheral details, with the high point of the hair braid and the fur atop the bison's head exhibiting the only notable weakness. Scattered minute flecks of carbon appear on both sides and a few small laminations are present on the reverse. PCGS has awarded higher numeric grades to only 34 examples (12/14). NGC ID# 22R3, PCGS# 3923

**1913-S Type Two Nickel, MS66**  
**Fully Lustrous and Well-Struck**

- 3617 1913-S Type Two MS66 PCGS. CAC.** Fully lustrous with brilliant nickel-gray surfaces and wisps of pale rose toning. The faintest traces of peripheral gold color add to the overall eye appeal of this remarkable nickel. The design elements are well-struck, including the braid and bison's horn and tail. There are no mentionable marks or spots. Well-deserving of the CAC endorsement. Population: 30 in 66, 4 finer (11/14).  
*Ex: New York Signature (Heritage, 6/2005), lot 5274; Central States Signature (Heritage, 4-5/2009), lot 1470. NGC ID# 22R3, PCGS# 3923*

**1914 Buffalo Nickel, Impeccable MS67**

- 3618 1914 MS67 PCGS. CAC.** This is an incredibly attractive Superb Gem example of this high-mintage issue, struck in an amount exceeding 20.6 million pieces. The reverse is a consistent quicksilver color, while the obverse shows alternating heather and pale pink hues. The strike and preservation are impeccable. Population: 22 in 67, 0 finer (12/14). NGC ID# 22R4, PCGS# 3924

- 3619 1914/3 FS-101 AU58 PCGS.** The top stroke of the underdigit 3 is apparent on this momentarily circulated representative. Ocean-blue and golden-brown compete for territory across satiny and exemplary surfaces. Population: 16 in 58, 34 finer (11/14).  
*Ex: Long Beach Signature (Heritage, 9/2008), lot 725, which realized \$2,990. PCGS# 147844 Base PCGS# 93924*

**1914/3 Nickel, MS62**  
**Scarce Philadelphia Overdate**

- 3620 1914/3 FS-101 MS62 NGC.** The *Cherrypickers' Guide* states "the overdate is seen as the straight top bar of an underlying 3 at the top of the 4, and the start of the diagonal of the 3 on the upper right outside of the 4." Streaks of walnut-brown toning overlie dusky dove-gray surfaces. Satiny and unabraded with a typical strike. PCGS# 147844 Base PCGS# 93924

**1915 Nickel, MS67+**  
**None Numerically Finer**

- 3621 1915 MS67+ PCGS. CAC.** Light gold and pink overtones give this otherwise nickel-white example a touch of color. The bison's horn is crisp, though a touch of softness affects the shoulder. Only a few flyspecks stand in the way of an even finer designation. Population: 42 in 67 (3 in 67+), 0 finer (11/14). NGC ID# 22R7, PCGS# 3927

**1915 Buffalo Nickel, MS67+**  
**Unrivalled Visual Appeal**

- 3622 1915 MS67+ PCGS. CAC.** The 1915 Buffalo nickel is a conditionally scarce date at the MS67 grade level, and none have been certified numerically finer. This piece displays fresh, intensely luminous mint bloom shining through delicate shades of lavender-blue and champagne toning. The strike is bold and the eye appeal is simply remarkable. Population: 43 in 67 (3 in 67+), 0 finer (12/14). NGC ID# 22R7, PCGS# 3927

---

**1915 Two Feathers Nickel, Sharply Struck MS64**

- 3623 1915 Two Feathers MS64 PCGS. FS-401.** The obverse die was heavily polished, resulting in the innermost feather nearly missing, hence the nickname "Two Feathers." The grayish surfaces of this near-Gem display hints of light gold. The design elements are sharply struck, including the Indian's braid, date, and bison's fur, horn, and tail. A small spot is visible on the right side of the Indian's neck. PCGS# 38433

---

**1916 Doubled Die Nickel, Good 4  
FS-101, Guide Book Key**

- 3624 1916 Doubled Die Obverse, FS-101, Good 4 PCGS.** Rarer than the 1918/7-D nickel, the 1916 Doubled Date variety is the stopper to a complete *Guide Book* collection. Despite the coin's numerical grade, the 9 and 6 from the initial hubbing is undisputable, located southeast of the date from the second hubbing. The gunmetal and tan-brown surfaces are problem-free aside from a few minute gray spots on the bison's flank. PCGS# 145628 Base PCGS# 3931

---

**1916-S Nickel, MS66  
Beautifully Toned and Highly Lustrous**

- 3625 1916-S MS66 NGC.** The 1916-S is another early Buffalo nickel that has low availability in high grades. This in spite of the fact that 11.8 million were minted. This piece is clearly superior, as seen from the thick mint frost that covers each side. The luster shines brightly through the amazing lavender and rose toning on the obverse, as well as the even golden toning on the reverse. As one would expect, there are no mentionable marks on either side. The striking details are just a bit soft, most notably on the tips of the feathers, which is commonly seen on this issue.  
*Ex: Long Beach Signature (Heritage, 6/2010), lot 393. NGC ID# 22RC, PCGS# 3933*

---

**1917 Nickel, MS67  
Only Two Numerically Finer at PCGS**

- 3626 1917 MS67 PCGS.** The preservation of this satiny, glowing piece is undeniably superb, complementing soft golden, lavender, and sky-blue hues blending over each side. A touch of striking softness is noted the hair immediately above the Indian's braid, but the design definition is otherwise sharp. Population: 19 in 67 (1 in 67+), 2 finer (12/14). NGC ID# 22RD, PCGS# 3934

---

**1917-S Nickel, MS66  
Exceptional, Fully Struck Example**

- 3627 1917-S MS66 NGC.** The 1917-S is well known as an early strike rarity, but this coin is certainly the exception. The strike is full all the way to the knot in the Indian's braid, the reverse shows complete definition on the bison's head and tail. The luster is softly frosted and each side has a light, even overlay of golden patina. A wondrously clean and attractive example of this difficult issue. Census: 11 in 66 (1 in 66 ★), 1 finer (11/14). NGC ID# 22RE, PCGS# 3936

- 3628 1918/7-D FS-101 Fine 15 NGC.** The downstroke of the 7 is blatant within the 8 in the date. A collector coin of this desirable overdate, one of the two keys to the series along with the 1916 DDO. The present stone-gray example is well defined for its grade and lacks relevant marks. A small spot is noted on the reverse at 9 o'clock. PCGS# 38446 Base PCGS# 3939

---

**1918/7-D Nickel, Well-Defined VF35**

- 3629 1918/7-D FS-101 VF35 NGC.** The horizontal crossbar of the underdigit 7 and its broad downstroke within the 8 identify this popular and sought-after variety. The light gray surfaces exhibit appropriately defined design features. A few tiny flecks on each side do not detract. This piece will fit nicely in a mid-to high-grade Buffalo nickel collection. PCGS# 38446 Base PCGS# 3939

---

**1918/7-D Buffalo Nickel Overdate, XF40  
Popular Collector Coin**

- 3630 1918/7-D FS-101 XF40 PCGS.** This XF40 PCGS example of the über-popular 1918/7-D overdate is sure to be a hit with collectors, a high-grade circulated coin certified in an early-era green-label holder. The overdate feature is of course blatant at this grade level, and the pinkish-gray surfaces elsewhere are free from major postmint distractions. Metal flowlines in the fields in each side are from die erosion that has softened the detail somewhat. The tiny diagnostic die line connecting the area above the braid tie to the cheek is plain as well. The many collectors of this popular series should be on alert to win this coin, as most circulated examples are not nearly so nice, usually averaging only Very Good to Fine. PCGS# 38446 Base PCGS# 3939

---

**1918-D Buffalo Nickel, MS66  
Lustrous and Lightly Toned**

- 3631 1918-D MS66 PCGS.** Radiantly lustrous surfaces display a delicate meld of powder-blue, beige-gold, and lilac. The design elements are generally well-defined, and both sides are devoid of distracting marks. Only 31 examples have been assigned the Premium Gem grade by PCGS and NGC, and a solitary piece has graded finer (11/14). Ex: *National Money Show Signature* (Heritage, 3/2007), lot 265; *Long Beach Signature* (Heritage, 6/2010), lot 399. NGC ID# 22RH, PCGS# 3938

---

**1919 Nickel, MS67  
Eye-Catching Mint Bloom**

- 3632 1919 MS67 PCGS.** This blazing Superb Gem exhibits unusually sharp definition for the issue, with minimal evidence of die fatigue in the recesses on each side. The surfaces are deeply frosty, with just a blush of light golden color on the reverse. The 1919 Buffalo nickel is generally available overall, but it becomes distinctly rare above the MS66 grade level. Population: 14 in 67 (1 in 67+), 0 finer (11/14). NGC ID# 22RL, PCGS# 3941

- 3633 1919 Two Feathers MS64 PCGS. FS-401.** There are now more than a dozen Two Feathers varieties in PCGS's Complete Variety Buffalo nickel Registry Set. Attractive grayish-gold to greenish-gold patina and good surface preservation make this coin a keeper for series aficionados. PCGS# 520163

- 3634 1919-D MS64 PCGS.** Violet, lavender, and champagne-gold patina cover the lustrous surfaces of this near-Gem. Well-struck save for the typical softness in the fur atop the bison's head. NGC ID# 22RM, PCGS# 3942

---

**1920-D Nickel, MS65  
Above-Average Strike**

- 3635 1920-D MS65 PCGS.** The 1920-D nickel is more difficult to locate than the large mintage approaching 10 million pieces might suggest. Gems especially are elusive and higher-grade coins are excessively rare. Lustrous golden-tan surfaces exhibit better detail than usually seen on this issue, including the braid, LIBERTY, date, and the bison's horn and tail, though the fur on the animal's head is weak. Population: 65 in 65 (3 in 65+), 3 finer (11/14). NGC ID# 22RR, PCGS# 3945

---

**1920-D Buffalo, MS65  
Boldly Toned**

- 3636 1920-D MS65 PCGS.** Pale blue covers the portrait, giving way to darker tones before exiting the rim with a yellow-brown color. There are a few ticks in the center and the surfaces at the periphery are smooth. Gold graces the high points of the reverse. Population: 67 in 65 (3 in 65+), 3 finer (12/14). NGC ID# 22RR, PCGS# 3945

---

**1920-S Nickel, MS64**  
**Typically Struck for the Issue**

- 3637 1920-S MS64 PCGS.** Both sides of this near-Gem display lustrous reddish-gold surfaces. The design elements are “typically struck;” that is, according to Bowers (2007) about 60 percent of examples fall into this category between “weakly struck” (25 percent) and “sharp” (15 percent). The braid is strong, as is the date, horn, and mintmark, but the bison’s fur and tail are weak. Overall, a nice example for the issue and grade. PCGS has seen only 20 finer (11/14). NGC ID# 22RS, PCGS# 3946

- 3638 1923 MS66+ PCGS.** The 1923 is somewhat scarcer than most other Philadelphia issues in top grades. This Premium Gem example displays luminous luster emanating from minimally marked and generally well-struck surfaces. A touch of softness is noted above the bison’s horn and on the central obverse hair strands. PCGS reports only 14 numerically finer pieces (12/14). NGC ID# 22RV, PCGS# 3949

---

**1923-S Nickel, MS65**  
**Conditionally Rare in High Grade**

- 3639 1923-S MS65 NGC.** This San Francisco coin is exceptional both for its high grade and excellent strike. The satiny fields are smooth and subtly reflective, bathed in uniform clear reddish golden toning. The obverse presents a faint sheen but the coin displays little of the die erosion that is often seen for this date. This piece is close to the top rank of the grading roster. Census: 35 in 65, 8 finer (11/14). NGC ID# 22RW, PCGS# 3950

- 3640 1924 MS66 PCGS. CAC.** Soft rose, gold, and sky-blue patina visits the highly lustrous surfaces of this Premium Gem. The design elements are sharply struck and both sides have been well cared for. NGC ID# 22RX, PCGS# 3951

---

**1924-D Nickel, Lightly Toned MS65**  
**Scarce in Gem Condition**

- 3641 1924-D MS65 PCGS. CAC.** One of the most fiendish Buffalo nickel dates to collect in better Mint State grades, the 1924-D has historically been a rarity in MS65, though today it is merely “scarce” at that level with only four finer coins known to PCGS (11/14). This Gem is blanketed in rich orange and peach toning with occasional elements of nickel-gray.  
*Ex: Long Beach Signature (Heritage, 6/2010), lot 413. NGC ID# 22RY, PCGS# 3952*

---

**1925-S Buffalo Five Cent, MS64 ★**  
**Attractive, Strike-Challenged Issue**

- 3642 1925-S MS64 ★ NGC.** Matching halos of wheat-gold toning surround steely-blue visages of the Indian chief and the bison on this visually impressive nickel. While the eye appeal is striking, the actual impression from the dies was somewhat less, with weakness at the date and a nearly indecipherable mintmark. The center high points are typically soft for this San Francisco issue, which asked too much from the dies while achieving a mintage of more than 6.25 million pieces. NGC ID# 22S4, PCGS# 3956

1926-S Nickel, MS64  
Well-Known, Low-Mintage Rarity

- 3643 1926-S MS64 PCGS.** As the only regular-issue Buffalo nickel with a sub-million mintage, the 1926-S has received plenty of attention from collectors over the years, and in a wide range of grades. The 1926-S is accessible in grades through MS63 and is available for a price even in near-Gem, though anything finer is a definite condition rarity. This MS64 example has a golden overtone across broadly luminous surfaces that show a quicksilver element. Both sides are nicely detailed for the issue, and the portrait has a dab of lavender close to the feathers. PCGS has graded just 14 coins as MS65 or better (11/14). NGC ID# 22S7, PCGS# 3959

1927-D Nickel, MS65+  
Conditionally Challenging

- 3644 1927-D MS65+ PCGS. CAC.** Although not quite to the extent of the immediately preceding issues from this mint, the 1927-D Buffalo nickel is a problematic issue when it comes to striking quality. Worn dies were the cause of much of the weakness, especially on the reverse since those dies were frequently used longer than the obverses, but the fact that so many of these nickels are consistently weak in the centers, even if struck with fresh dies, suggests that the Denver Mint spaced the dies slightly too far apart, likely to increase the speed with which coins could be struck. As a result, few examples of the 1927-D are sharp enough to qualify for Gem status, which is boldly reflected in the certified population numbers which plummet dramatically at this threshold.

The present coin is slightly weak in the centers, as expected, but is nonetheless above-average for the issue. Just a touch of pastel toning blankets each side, and the surfaces are free of any major abrasions. An important opportunity for the advanced Buffalo nickel specialist. Population: 63 in 65 (4 in 65+), 5 finer (12/14). NGC ID# 22S9, PCGS# 3961

**1927-S Nickel, MS64  
Above-Average Strike**

- 3645 1927-S MS64 NGC.** Similar to the quarter dollar from this year and mint, the 1927-S Buffalo nickel is a notable strike rarity. Most Mint State survivors are in the MS64 and lower range, and finer pieces are distinctly rare. This Choice example displays satiny golden-gray luster, and is unusually well-struck for the issue — the horn is full, and there is only slight weakness detected on the bison's shoulder and the hair above the Indian's braid. Struck from worn dies, with evidence of die fatigue in the recesses. Only 26 coins are numerically finer at NGC (11/14).  
*From The Free Tilly Collection. NGC ID# 22SA, PCGS# 3962*

**1927-S Nickel, Nicely Toned MS65  
Seldom Seen in Gem or Finer Grades**

- 3646 1927-S MS65 NGC.** One of a notable string of mintmarked condition rarities among the 1920s Buffalo nickels, the 1927-S is available for a price in any grade through MS64 but availability falls off a cliff any finer. This MS65 example is modestly toned with ample luster and an above-average strike on the bison's head. The coin's few marks, though grade-defining, are scattered and generally small. Census: 21 in 65 (3 in 65 ★), 5 finer (11/14). NGC ID# 22SA, PCGS# 3962

**1928 Nickel, MS67  
A Registry Collecting Dream**

- 3647 1928 MS67 PCGS. CAC.** Above-average detail and vastly above-average preservation make this 1928 nickel a coin to remember. Struck from moderately eroded dies that show in the surface texture, the piece is minimally toned and essentially carbon-free. Truly a coin that is more than its (impressive) numeric grade. Population: 16 in 67, 0 finer (11/14). NGC ID# 22SB, PCGS# 3963

**1928-S Nickel, Delicately Toned MS65  
Uncharacteristically Sharp**

- 3648 1928-S MS65 NGC.** The design definition on this Gem 1928-S nickel is superb — far better than is typically seen, despite minor die erosion in the peripheral recesses. Warm lemon-gold toning around the borders beautifully frames lavender-gray and powder-blue centers, giving this well-preserved piece exceptional eye appeal. This issue is available in grades through MS64, but Gem examples are scarce, and finer pieces are rare. Census: 46 in 65 (1 in 65 ★), 10 finer (11/14).  
*From The Free Tilly Collection. NGC ID# 22SD, PCGS# 3965*

**1928-S Buffalo Nickel, Sunset-Toned MS65  
Outstanding Eye Appeal**

- 3649 1928-S MS65 NGC. CAC.** The bison is framed in the vivid colors of the sun setting in the Western skies, with cerulean-blue and teal shades surrounding a flame-orange, pink, and sun-gold center. The obverse toning is equally intense and beautiful. Struck with liquid reflectivity from polished dies, the strike was lightly compressed with the resultant blending of some details on the Indian's hair and the bison's shoulder. Still, this is an amazingly toned Gem without any serious marks and outstanding eye appeal. Census: 46 in 65 (1 in 65 ★), 10 finer (12/14). NGC ID# 22SD, PCGS# 3965

---

**1929 Nickel, Exceptional MS66**

- 3650 1929 MS66 PCGS. CAC.** This Premium Gem comes as close to a fully struck 1929 Buffalo nickel as can be expected. We classify its strike as "Sharp," accounting for a mere 10 percent of surviving examples, according to Bowers (2007). Fully struck coins are virtually unknown. The Indian's braid, the date, all lettering on both sides, and the bison's horn and tail are boldly delineated. Moreover, a melange of soft orange-gold, crimson, violet, and bluish-green patina resides on the highly lustrous surfaces that are impeccably preserved. Well-deserving of the CAC endorsement. While PCGS and NGC have graded a mere seven coins numerically finer (10/14), a coin possessing this particular combination of attributes will be extremely difficult to duplicate. NGC ID# 22SE, PCGS# 3966

---

**1929-D Superb Gem Five Cent  
Outstanding Eye Appeal  
One of Two Finest Certified**

- 3651 1929-D MS67 NGC.** The present 1929-D Buffalo nickel offering is truly special. Not only is it one of the two finest certified examples (one each by NGC and PCGS), but it exudes outstanding eye appeal, resulting from the synergistic combination of its luster, color, strike, and surface condition. Thick, satiny luster over both sides appears to reach out to the observer, as does the veneer of soft ice-blue and lilac patina imbued with warm yellow-gold accents. And while the issue has the reputation of being weakly struck, this Superb Gem is crisply defined, including strong detail on the Indian's braid and the bison's tail. Finally, close examination with a loupe reveals no marks or spots either in the fields or concealed within the motifs. This is a great coin that will satisfy the most discriminating collector. NGC ID# 22SF, PCGS# 3967

- 3652 1934 MS67 NGC.** After a brief intermission during the Great Depression, nickels were produced again in 1934 with just over 20 million pieces coined in Philadelphia. Few of those equal the present specimen that exhibits satiny light gray surfaces and delicate gold toning. Census: 12 in 67 (1 in 67+, 5 in 67 ★, 1 in 67+★), 0 finer (11/14). NGC ID# 22SL, PCGS# 3972

---

**1934 Nickel, MS67+  
One of Two So Graded by PCGS**

- 3653 1934 MS67+ PCGS. CAC.** Faint gold-peach, pink, and blue overtones add color to this surprisingly unmarked late-date Philadelphia Buffalo nickel. Detail is crisp on the horn with only minor softness on the shoulder and braid. A few flyspecks on the obverse are the only demerit and these generally are visible only under a glass. Population: 26 in 67 (2 in 67+), 0 finer (11/14). NGC ID# 22SL, PCGS# 3972

---

**1935-D Five Cent, MS67  
Rare This Fine**

- 3654 1935-D MS67 NGC.** Despite a mintage of more than 12 million pieces, the 1935-D nickel is a clear condition rarity at the Superb Gem level. The combined certified population in MS67 is just 11 pieces with none finer (11/14). This piece, struck from an eroded obverse die, has distinctive gold-orange and nickel-blue overtones with occasional colors in between. NGC ID# 22SP, PCGS# 3975

---

**1935-S Nickel, Conditionally Rare MS67  
Above-Average Strike**

- 3655 1935-S MS67 PCGS.** The 1935-S nickel, from a mintage of 10.3 million pieces, is a relatively common issue. It is conditionally rare at the MS67 level of preservation, however, where PCGS and NGC have graded only 35 examples and none finer. Bright luster radiates from both sides, each of which displays soft champagne-gold and violet color. The design elements are much better detailed than often seen. Population: 33 in 67 (1 in 67+), 0 finer (11/14). *From The Free Tilly Collection.* NGC ID# 22SR, PCGS# 3976
-

**3656 1936-D/S FS-511 MS66 PCGS.** An S undermintmark was originally struck into the die, followed by two D overpunches, making this a D/D/S variety. *Cherrypickers'* comments that the variety "has received a fairly large amount of publicity, yet few have been found." This pristine pale-blue- and champagne-tinged example is the sole finest at PCGS (12/14). The last Gem we offered, in February 2014, realized \$2,115. PCGS# 38473

**3657 1936-D 3 1/2 Leg, FS-901, VF20 NGC.** The right front leg is ghostly on FS-901, one of the few lapped die varieties listed in the *Guide Book*. The variety is undesignated on the NGC holder. A slate-gray representative with attractive surfaces for the VF level. PCGS# 38471 Base PCGS# 93978

**3658 1936-D 3 1/2 Leg, FS-901, VF35 PCGS.** Much scarcer than the more celebrated FS-901 1937-D Three Legged nickel. Both varieties are the result of a lapped reverse die that removed detail of the bison's foreleg. A cream-gray example with moderate wear and a couple of thin marks on the motifs. PCGS# 38471 Base PCGS# 93978

**3659 1936-D 3 1/2 Leg, FS-901, VF35 NGC.** The right front leg of the bison is diminished by excessive die polishing. This variety is very scarce relative to its better-known 1937-D Three-Legged cousin. This evenly worn silver-gray example displays minimally abraded surfaces.

*Ex: Dustinn (Dusty) Lee Gibson Collection (Heritage, 3/2011), lot 3264. PCGS# 38471 Base PCGS# 93978*

#### 1937 Buffalo Nickel, MS68 None Numerically Finer at NGC

**3660 1937 MS68 NGC.** As befits the high mintage of 79.4 million pieces, this is one of the most available dates in the Buffalo nickel series, but few examples can match the quality and eye appeal of the present coin. This specimen displays delicate iridescent ice-blue, gold-beige, and lilac patina over pristine surfaces that exhibit dazzling luster. Boldly detailed with immense visual appeal. Census: 8 in 68 (3 in 68 ★), 0 finer (11/14).

*Ex: CSNS Signature (Heritage, 4/2006), lot 1127, which realized \$7,475; FUN Signature (Heritage, 1/2007), which realized \$9,200. NGC ID# 22SV, PCGS# 3980*

**3661 1937-D Three-Legged, FS-901, MS61 NGC.** The *Cherrypickers'* Guide lists 3 1/2-Leg varieties for the 1913, 1917-D, 1927-D, and 1936-D, but the 1937-D FS-901 is the sole variety with a completely absent middle portion of the front leg. The present lustrous green-gold and lilac example is smooth aside from a mark near the bison's forehead. PCGS# 38475 Base PCGS# 3982

**3662 1937-D Three-Legged, FS-901, MS61 NGC.** The wheat-gold centers are framed by sea-green borders. A lustrous and unblemished example of the perennially favored Three-Legged nickel. All diagnostics are present, notably the granular back leg, and the die erosion on the field beneath the bison's flank. PCGS# 38475 Base PCGS# 3982

#### 1937-D Three-Legged Buffalo, MS63 Popular Collecting Variant

**3663 1937-D Three-Legged, FS-901, MS63 NGC.** Thanks to a quick discovery by the Beebes, the 1937-D Three-Legged nickels were known to collectors early on and saved in quantity even in mint condition. This Select Mint State piece has olive toning over satin luster on both sides. Darker mottling appears at the obverse and reverse peripheries, especially obvious below the date. Housed in a former generation holder.

*Ex: Orlando FUN Signature (Heritage, 1/2012), lot 5341. PCGS# 38475 Base PCGS# 3982*

#### 1937-D Three Legged Nickel, Well-Defined MS64

**3664 1937-D Three-Legged, FS-901, MS64 PCGS.** This popular variety was created when a Denver Mint employee attempted to polish off a clashmark or other defect from a reverse die, removing the right foreleg of the bison and creating a three-legged animal. Several hundred Mint State coins exist, especially in the MS60 to MS64 range. Gems are very scarce and higher-grade pieces are rare. Light gold, violet and ice-blue patina assumes slightly darker hues on the reverse of this lustrous near-Gem and the design elements are well-defined. Minute marks on the bison preclude Gem classification. PCGS# 38475 Base PCGS# 3982

#### 1937-D Three-Legged Nickel, MS64 Attractively Toned

**3665 1937-D Three-Legged, FS-901, MS64 PCGS. CAC.** The granular back leg and the trail of die lumps beneath the flank are as diagnostic as the missing middle third of the foreleg. The steel-blue motifs and caramel-gold fields shimmer with luster. Marks are essentially absent except for a solitary vertical tick on the bison's flank. PCGS# 38475 Base PCGS# 3982

**1938-D Buffalo Nickel, MS68 ★  
Beautifully Toned and Preserved**

- 3666 1938-D MS68 ★ NGC.** The 1938-D Buffalo nickel is one of the most plentiful dates in the series, but the collector who desires only the best will find quite a challenge in locating one of the few pieces certified at the MS68 grade level. This frosty, well-struck representative displays vivid multicolor toning around the peripheries, with warm golden hues in the central areas. NGC has certified only 17 examples in this lofty numeric grade, and the present coin is one of just nine that have been awarded a Star designation; none have been granted a Plus designation, and none are numerically finer (12/14). NGC ID# 22SZ, PCGS# 3984

**PROOF BUFFALO NICKELS**

**1913 Type One Buffalo Nickel, PR64  
Fully Struck and Attractive**

- 3667 1913 Type One PR64 PCGS.** Golden and powder-gray patina intermingle to good effect on this near-Gem Type One 1913 Buffalo nickel proof, an attractive representative of James Earle Fraser's original design intent. The fully struck surfaces contrast nicely against the textured fields, and there are no mentionable abrasions on either side. NGC ID# 278R, PCGS# 3988

**1913 Type One Nickel, PR66  
Bold, Sculptural Definition**

- 3668 1913 Type One PR66 PCGS. CAC.** Proof Type One Buffalo nickels are perhaps the most bold and rugged representation of James Earle Fraser's iconic Indian head and bison design. This piece is a prime example, showcasing needle-sharp definition beneath the coarse matte proof finish. Pale golden toning yields tinges of deeper cherry, olive, and lavender hues, stretching across each side in a faintly marbled pattern. A beautiful example of this short-lived type. PCGS has seen 56 numerically finer submissions (11/14). NGC ID# 278R, PCGS# 3988

**1913 Type One Nickel, PR67  
Single-Issue Type**

- 3669 1913 Type One PR67 NGC.** The original Fraser design for the Buffalo nickel with the eponymous animal atop a cliff rather than a plain is represented in proof by only this issue. This sharply struck Superb Gem proof has marvelous texture and occasional pink-and-gold tints across each side. Census: 39 in 67 (2 in 67 ★), 3 finer (11/14).  
From The Free Tilly Collection. NGC ID# 278R, PCGS# 3988

- 3670 1913 Type Two PR65 PCGS.** Attractive surfaces are lightly gold-toned and offer excellent eye appeal with their bold proof strike. A moderate carbon spot appear on the buffalo's flank but the surfaces otherwise are near-pristine. NGC ID# 278S, PCGS# 3990

**1913 Type Two Buffalo Nickel, PR66  
Scarce First-Year Issue**

- 3671 1913 Type Two PR66 PCGS.** This issue is the second-rarest among the early matte proof Buffalo nickels, despite having the second-highest mintage among that group, at 1,514 pieces. This is a wonderfully preserved specimen with lovely light toning and full striking definition. Destined for a high-end collection, and ensconced in a green label PCGS holder. NGC ID# 278S, PCGS# 3990

**1913 Buffalo Nickel, PR67  
Popular Type Two Design**

- 3672 1913 Type Two PR67 NGC.** A breathtaking matte proof Buffalo nickel, tinted bright rose with flashes of iridescent crimson and lilac color on the reverse. This coin is superbly crafted, very well struck, and exceptionally clean. A better coin would be virtually impossible to locate. Census: 36 in 67 (1 in 67 ★), 6 finer (11/14).  
Ex: Long Beach Signature (Heritage, 9/2004), lot 6027.  
From The Free Tilly Collection. NGC ID# 278S, PCGS# 3990

**1913 Type Two Buffalo Nickel  
Bold, Superb Gem Proof**

- 3673** 1913 Type Two PR67 NGC. A beautifully preserved, tack-sharp matte proof of the Type Two design. These early proofs are among the most well-made and boldly rendered representatives of this design type, and are always in high demand. This piece is lightly toned golden, with superior eye appeal. Census: 36 in 67 (1 in 67 ★), 6 finer (12/14). NGC ID# 278S, PCGS# 3990

- 3674** 1914 PR66 NGC. Rich autumn-gold toning endows this intricately struck and high grade specimen. A strong loupe reveals infrequent minuscule flecks. Certified in a former generation holder. Ex: Orlando FUN Signature (Heritage, 1/2006), lot 1572. From The Free Tilly Collection. NGC ID# 278T, PCGS# 3991

**1914 Buffalo Nickel, Matte PR67  
Engaging Second-Year Proof**

- 3675** 1914 PR67 PCGS. CAC. Pale golden-pink and bluish-gray tones enhance the lustrous surfaces on each side of this Superb Gem proof, a piece that is fully struck and fully engaging to the alert viewer. A nice example of this second-year proof issue. Population: 80 in 67 (4 in 67+), 11 finer (12/14). NGC ID# 278T, PCGS# 3991

**1914 Nickel, PR67  
Lightly Toned, Bold Buffalo**

- 3676** 1914 PR67 PCGS. CAC. The proof issues from 1913 to 1916 are about as bold and exact a representation of James Earle Fraser's rugged Indian head and buffalo design as is obtainable in the entire series. This Superb Gem 1914 specimen does not disappoint in that regard, showing crisp detail and satiny, glowing surfaces. A touch of light golden color accents both sides, attesting to the originality of the seemingly flawless surfaces. Population: 80 in 67 (4 in 67+), 11 finer (12/14). NGC ID# 278T, PCGS# 3991

- 3677** 1915 PR66 NGC. The needle-sharp devices stand out on this semibright, untoned Premium Gem. Impeccably preserved surfaces further enhance the coin's overall eye appeal.

From The Free Tilly Collection. NGC ID# 278U, PCGS# 3992

- 3678** 1915 PR66 PCGS. CAC. The strike is razor-sharp, as expected on a matte proof. Additionally, the surfaces exude a satiny glow beneath the rich palette of rose, green, and lilac toning that covers each side. One of only 1,050 proofs struck. NGC ID# 278U, PCGS# 3992

- 3679** 1916 PR64 PCGS. A crisply struck olive-green and tan-gold near-Gem. The central obverse displays a few pinpoint flecks. The rarest proof issue with a mintage of just 600 pieces. Housed in an old green label holder. NGC ID# 278V, PCGS# 3993

**1916 Nickel, PR66  
Warm Golden Coloration**

- 3680** 1916 PR66 NGC. Ex: Richmond Collection. Soft matte luster and tack-sharp, rugged features impart eye-catching appeal on this Premium Gem proof Buffalo. Collector dissatisfaction with the matte finish gradually reduced proof production each year, with the result that only 600 proof nickels were struck in 1916. This issue is by default the rarest of the early (1913 - 1916) proofs. Both sides exhibit warm sun-gold toning that deepens toward the peripheries, with seemingly pristine underlying surfaces. Census: 54 in 66 (1 in 66 ★), 22 finer (11/14).

Ex: Richmond Collection, Part II (David Lawrence, 11/2004), lot 1297.

From The Free Tilly Collection. NGC ID# 278V, PCGS# 3993

**1916 Nickel, Premium Gem Proof  
Last Official Issue for 20 Years**

- 3681** 1916 PR66 PCGS. CAC. Mint officials, having been convinced through correspondence with the public (some of it reprinted in Roger Burdette's *Renaissance of American Coinage*) that making proof coins was a drain on finances and waste of time, halted production in 1916 after a run of cents and nickels, just 600 each. This sharp Premium Gem proof has the usual satin texture and gold-to-olive overtones on medium-gray surfaces. PCGS has graded 36 pieces finer (11/14).

From The Millford Collection, Part II. NGC ID# 278V, PCGS# 3993

- 3682** 1936 Type One — Satin Finish PR66 PCGS. CAC. The deep golden-orange obverse cedes light gray and gold on the reverse. This is a sharply struck marvelously preserved example. NGC ID# 278X, PCGS# 3994

**3683 1936 Type One — Satin Finish PR66 PCGS. CAC.** The coinage of proofs was interrupted in 1916 by World War One, and they would not be struck again at the Philadelphia Mint until 1936. One of two types produced that year, the Satin Finish specimens closely resembled the matte proofs struck from 1913 to 1916. A hint of light yellow toning accents the crisply struck devices. Both sides are virtually pristine save for a few tiny reverse flecks.

Ex: *Long Beach Signature* (Heritage, 9/2008), lot 838. NGC ID# 278X, PCGS# 3994

**3684 1936 Type One — Satin Finish PR67 NGC.** Splendid lemon-gold, fire-red, and olive-green shades illuminate this lustrous and crisply struck Superb Gem. An aesthetic treat for the proof type collector. Housed in a former generation holder.

Ex: *Plymouth Collection* (Heritage, 1/2009), lot 885.

From *The Free Tilly Collection*. NGC ID# 278X, PCGS# 3994

**3685 1936 Type One — Satin Finish PR67 PCGS.** This beautifully toned steel-blue proof has glowing satiny surfaces that are free from any traces of carbon spotting. A shimmering example of this scarce and all-too-often misunderstood proof variant from early 1936.

Ex: *Portland Signature* (Heritage, 3/2004), lot 5427.

From *The Free Tilly Collection*. NGC ID# 278X, PCGS# 3994

**3686 1936 Type One — Satin Finish PR67 PCGS.** A caramel-gold and pearl-gray Superb Gem. Well struck, lustrous, and immaculate aside from two pinpoint obverse flecks at 5 and 7 o'clock. Housed in a green label holder. NGC ID# 278X, PCGS# 3994

**3687 1936 Type One — Satin Finish PR67 NGC.** Beautifully toned with a cornucopia of multicolored iridescence overall, this original proof has glowing satiny surfaces that are free from any traces of carbon spotting. An especially attractive example.

Ex: *New York Signature* (Heritage, 7/2004), lot 5674. NGC ID# 278X, PCGS# 3994

**3688 1936 Type One — Satin Finish PR67 PCGS. CAC.** A medley of gold, violet, and ice-blue patina cascades over the well preserved surfaces of this Superb Gem proof. Sharply struck throughout. NGC ID# 278X, PCGS# 3994

#### 1936 Type One Buffalo Nickel, PR67+ Pristine and Fully Struck

**3689 1936 Type One — Satin Finish PR67+ PCGS. CAC.** To our eyes, the Satin Finish variety of 1936 proof Buffalo nickels is more in keeping with designer James Earle Fraser's original artistic intent than the shiny Brilliant Finish proofs that followed. This pristine, fully struck Satin Finish example is all a picky numismatist could want, pinkish-gray in the centers with glints of gold and jade near the rims. NGC ID# 278X, PCGS# 3994

#### 1936 Type One Nickel, PR68 Luminous, Satin Surfaces

**3690 1936 Type One — Satin Finish PR68 NGC.** When proof nickel production resumed in 1936, following a 20-year gap in production, the Mint came out with yet again another finish for its proof coins. The matte surfaces of the earlier 1913 to 1916 nickels had proven unpopular with collectors, so a change had to be made to ensure sales. The new satin finish, however, ended up being nearly as unpopular with collectors, who thought the coins looked too much like normal business strikes. The result was a complete revision to the old polished, brilliant finished of the pre-1913 issues later in the year, which has been in production ever since.

This example of the Type One Satin proof of 1936 displays a bold strike and seemingly flawless, glowing surfaces. A tinge of light champagne toning around the peripheries adds a trace of color to the surfaces, delivering pronounced visual appeal. Although not popular at the time of issue, this satin proof type is now highly sought-after by series specialists. Census: 28 in 68 (2 in 68 ★), 0 finer (12/14). NGC ID# 278X, PCGS# 3994

**3691 1936 Type Two — Brilliant Finish PR65 PCGS.** Gold toning dominates the reflective surfaces of this lovely Gem, highlighted on the obverse margin with slivers of rose, cobalt-blue, and lime-green. The design features are razor sharp. A few minute flecks are visible on the obverse periphery.

From *The Free Tilly Collection*. NGC ID# 278Y, PCGS# 3995

**3692 1936 Type Two — Brilliant Finish PR65 NGC.** Stunning green, gold, and lavender patina liberally covers each side of this Gem proof Type Two Buffalo nickel proof. A few tiny flecks appear under a loupe but fail to defeat the excellent eye appeal. NGC ID# 278Y, PCGS# 3995

**3693 1936 Type Two — Brilliant Finish PR65 NGC. CAC.** The bright surfaces of this Gem exhibit sharply struck motifs. No significant marks or spots are visible on either side. NGC ID# 278Y, PCGS# 3995

**3694 1936 Type Two — Brilliant Finish PR65 PCGS. Gold CAC.** The elusive Gold CAC seal is awarded to this well struck and essentially pristine proof type coin. Pastel gold and ice-blue toning contributes further to the eye appeal. Encapsulated in an old green label holder.

Ex: *Ft. Lauderdale FUN Signature* (Heritage, 1/2005), lot 5957. NGC ID# 278Y, PCGS# 3995

**3695 1936 Type Two — Brilliant Finish PR66 PCGS. CAC.** Variegated medium plum-mauve and autumn-gold toning encompasses this well struck Premium Gem. The fields are flashy but also display subtle cartwheel luster. Devoid of carbon or other visible detractors. Encapsulated in an old green label holder. NGC ID# 278Y, PCGS# 3995

**3696 1936 Type Two — Brilliant Finish PR67 NGC.** The reflective, brilliant surfaces of this Superb Gem display needle-like detail. Both sides are magnificently well preserved.

From *The Free Tilly Collection*. NGC ID# 278Y, PCGS# 3995

---

**1936 Nickel, PR67+  
Type Two, Brilliant Finish**

- 3697** 1936 Type Two — Brilliant Finish PR67+ PCGS. CAC. A magnificently preserved specimen of the first brilliant proof nickel striking in decades, one of just two for the Buffalo nickel series. As indicated by the Plus designation, this coin has tremendous eye appeal. The piece displays intense gleaming luster with a chrome finish. NGC ID# 278Y, PCGS# 3995

---

**1936 Type Two Nickel, PR67+  
Flashy Brilliance**

- 3698** 1936 Type Two — Brilliant Finish PR67+ PCGS. CAC. A brilliant, flashy coin that delivers impressive eye appeal even at arm's length. The strike is bold and the preservation is excellent. This brilliant finish reflects the Mint finally giving up on its attempts at introducing a new finish on its proof coins, and yielding to the desires of collectors who much preferred the old, mirrored surfaces. Matte proofs in 1907 to 1916 were short-lived and little-liked by the public, and a short run of satin proof nickels in early 1936 just resulted in the ultimate production of the present Type Two proof. PCGS has only certified seven numerically finer representatives (12/14). NGC ID# 278Y, PCGS# 3995

---

**1937 Buffalo Nickel, PR67+  
Beautifully Preserved**

- 3699** 1937 PR67+ PCGS. Glassy fields frame rugged, boldly rendered design elements on each side of this high-end Superb Gem proof. A flash of golden color is reveal when tilted beneath a light, unrestrained by hairlines or contact marks. This is the final proof issue in the Buffalo nickel series, struck to the extent of 5,769 pieces. Only 18 examples are numerically finer at PCGS (11/14). NGC ID# 278Z, PCGS# 3996

- 3700** 1937 PR67 NGC. CAC. A stunning quicksilver-white Superb Gem proof of this second-year issue, completely untoned and showing top-notch eye appeal. The certified populations in the next grade higher are less by an order of magnitude: NGC shows 46 in PR68 (12/14). NGC ID# 278Z, PCGS# 3996

- 3701** 1937 PR67+ PCGS. CAC. Just a light wisp of gold color is visible on the back of the bison. The otherwise brilliant surfaces exhibit razor-sharp definition and impeccable preservation. NGC ID# 278Z, PCGS# 3996

---

**1937 Buffalo Nickel, PR68  
Brilliant and 'As Struck'**

- 3702** 1937 PR68 NGC. A glittering, untuned specimen with deeply reflective fields, pinpoint sharpness over the high points, and a total lack of carbon. The "as struck" appearance of this proof Buffalo is matched by its superlative technical merits. Census: 46 in 68 (4 in 68 ★), 0 finer (11/14).  
Ex: New York Signature (Heritage, 6/2005), lot 5308.  
From The Free Tilly Collection. NGC ID# 278Z, PCGS# 3996

---

**1937 Buffalo Nickel, PR68  
Final Year for Proofs**

- 3703** 1937 PR68 NGC. Though proofs returned from a two-decade hiatus in 1936, there was time only to add two proof Buffalo nickel dates (three varieties, accounting for the satin and brilliant finishes of 1936) to the matte proofs at the start of the series. This PR68 from the final issue is modestly toned pink-gold with gorgeous detail and magnificent preservation. Census: 42 in 68 (4 in 68 ★), 0 finer (11/14). NGC ID# 278Z, PCGS# 3996

## JEFFERSON NICKELS

- 3704** 1939 Quadrupled Die Reverse, FS-802, MS67 PCGS. The reverse legends are quadrupled, perhaps most prominently on STATES and CENTS. Lustrous and nearly brilliant with pristine fields and a solitary faint mark on Jefferson's cheekbone. PCGS# 38484 Base PCGS# 894003

### 1942-S Nickel, MS67 Full Steps Surprisingly Sharp War Nickel

- 3705** 1942-S MS67 Full Steps PCGS. In 1942, San Francisco was the only mint not to strike nickels in the pre-war alloy, a reversal of the striking pattern of the 1942-D. This first-year war nickel is magnificently preserved with minimal patina and surprisingly sharp detail on Monticello's steps. A notable coin for the Registry collector. Population: 22 in 67 Full Steps, 0 finer (11/14). NGC ID# 22TN, PCGS# 84017

### 1944-D Nickel, MS68 Full Steps Cardinal Registry Set Candidate

- 3706** 1944-D MS68 Full Steps PCGS. This remarkable Superb Gem is tied with just three others as the finest certified Full Steps example (11/14), and is a full grade point finer than the piece in the current highest-rated Registry Set. The satiny surfaces are seemingly pristine, and the design elements are boldly brought up. Light green-gold and amber peripheral toning fades to iridescent lavender-blue in the centers, giving this coin immense visual appeal. NGC ID# 22TV, PCGS# 84023

- 3707** 1944-S MS67 Full Steps PCGS. This is a sensational example from the mint facility in San Francisco. Well-struck with slight softness noted on PLURIBUS, but strong Full Steps on Monticello. The well-preserved surfaces exhibit blended pastel hues of gold-tan and green. Population: 44 in 67 (7 in 67+) Full Steps, 0 finer (11/14). NGC ID# 22TW, PCGS# 84024

### 1945-P Doubled Die Reverse Nickel MS65 Five Steps, FS-801

- 3708** 1945-P Doubled Die Reverse, FS-801, MS65 Five Steps ANACS. An impressive Doubled MONTICELLO variety, listed in the *Guide Book* and more prominently doubled than either FS-803 or FS-804. The spread widens from west to east across the lower reverse. A lustrous and well struck Gem with light lemon-gold toning. No marks are consequential. Certified in an old small-size ANACS holder. PCGS# 38506 Base PCGS# 84173

- 3709** 1946-D MS67 Full Steps PCGS. Pastel gold, green, and lavender hues grace satiny luster on each side of this boldly struck, exceptionally well-preserved Superb Gem. PCGS has certified only 11 Full Steps pieces in MS67 (1 in 67+), with none finer (12/14), making the present offering an important opportunity for the Registry Set collector. NGC ID# 22U3, PCGS# 84029

### 1947 Nickel, MS67 Full Steps Tied for Finest Certified

- 3710** 1947 MS67 Full Steps PCGS. This satiny, beautifully preserved Superb Gem is one of just four so-graded Full Steps 1947 nickels at PCGS (12/14), and is a full grade point finer than the coin in the highest-rated Registry Set. Soft olive-gold toning spreads across the surfaces, while faint lavender and ice-blue accents are seen over each side. NGC ID# 22U5, PCGS# 84031

### 1948-S Nickel, Rare MS67 Full Steps Tied With Two Others for Finest at PCGS

- 3711** 1948-S MS67 Full Steps PCGS. Essentially brilliant centers yield to warm golden peripheral toning on this boldly struck, well-preserved Superb Gem. PCGS and NGC combined have certified only four Full Steps pieces in this lofty grade (three at PCGS and one at NGC), with none finer (12/14). As one of the finest known of the date, this coin ranks a full grade point finer than the piece represented in the current highest-rated Registry Set. NGC ID# 22UA, PCGS# 84036

**1949-D Nickel, MS67 Full Steps  
Rare at This Lofty Grade Level**

- 3712 1949-D MS67 Full Steps PCGS.** A single glance at the population reports shows why this issue is so challenging in the highest grades. PCGS and NGC combined have certified just six examples in MS67 Full Steps and none in a higher numeric grade (12/14). Prospective bidders will be competing with Registry Set enthusiasts for this immaculate Full Steps representative. A whisper of golden translucence covers lustrous, satin-silver surfaces. There are no surface distractions. Population: 4 in 67 Full Steps, 0 finer (12/14). NGC ID# 22UC, PCGS# 84038

**1952-D Nickel, MS67 Full Steps  
Nearly Six Complete Steps**

- 3713 1952-D MS67 Full Steps PCGS.** As the numismatic hobby approaches 30 years of third-party certification, the online population data provides a clear indication of the relative rarity for every series, with the understanding that the data is biased toward higher grade and rarer coins. PCGS has certified 850 1952-D Jefferson nickels, with just 100 of those assigned the Full Steps designation. Understanding that a Full Steps example is more likely to be submitted in the first place is important when considering the relative rarity of these coins. This brilliant Superb Gem, with delicate champagne toning over frosty mint luster, just misses six complete steps on the reverse. PCGS has only certified two examples as MS67 Full Steps, with none finer (12/14). NGC ID# 22UL, PCGS# 84047

**1953-D Nickel, MS66+ Full Steps  
Tied With One Other Coin for PCGS Finest**

- 3714 1953-D MS66+ Full Steps PCGS.** A highly lustrous Premium Gem with an expectedly full strike for the Full Steps designation. The entirely untuned surfaces feature radiant luster and are devoid of any marks visible without magnification. This is the finest example we have offered, and Registry Set specialists should bid accordingly. Population: 17 in 66 (2 in 66+) Full Steps, 0 finer (12/14). NGC ID# 22UP, PCGS# 84050

- 3715 1954-S MS64 Full Steps PCGS.** A rare find in the series with Full Steps. And the steps are remarkably strong from side to side. Each side has a slight accent of golden patina with strong underlying mint frost. Population: 15 in 64 Full Steps, 9 finer (12/14). NGC ID# 22UU, PCGS# 84054

**1964-D Nickel, MS66 Full Steps  
Important Registry Set Coin**

- 3716 1964-D MS66 Full Steps PCGS.** A common date in the absolute sense, but scarce with Full Steps definition. This Premium Gem example exhibits a bold strike, with satiny luster that displays just a touch of light golden toning. No obtrusive abrasions are present. Tied with just six others as the finest-certified Full Steps example at PCGS (12/14). NGC ID# 22VH, PCGS# 84076

**PROOF JEFFERSON NICKELS**

- 3717 1938 PR68 NGC.** A sharp strike and outstanding eye appeal endow this PR68 nickel. The brilliant surfaces are immaculately well preserved. Census: 12 in 68 (1 in 68 ★), 0 finer (12/14). *From The Free Tilly Collection.* NGC ID# 279W, PCGS# 4175

- 3718 1942-P Type Two PR65 PCGS.** Gold CAC. A beautiful lemon-gold Gem. Well struck and prominently mirrored. The sole silver alloy proof issue. Certified in a first generation holder. *From The Millford Collection, Part II.* NGC ID# 27A4, PCGS# 4180

**1958 Nickel, PR68 Deep Cameo**

- 3719 1958 PR68 Deep Cameo PCGS.** Despite a mintage of well over 800,000 proofs, the 1958 nickel almost never appears with Deep Cameo-level contrast; in fact, *any* such coin is a condition rarity according to the combined certified population (11/14). This PR68 Deep Cameo piece, tied with four others for finest at PCGS, has clear contrast between glassy mirrors and well-frosted devices. NGC ID# 27A8, PCGS# 94190

- 3720 1971 No S PR69 Ultra Cameo NGC.** The usual estimate for this No S proof Jefferson nickel error is 1,655 pieces, but the figure is irrelevant given that this is one of a small handful of the finest numerically graded at NGC and PCGS combined, as well as with the Ultra Cameo designation. The gray-white surfaces are, of course, entirely distraction-free and with no suggestion of color. An incredible example of this popular error coin. Census: 5 in 69 Ultra Cameo, 0 finer (12/14). NGC ID# 22YN, PCGS# 94204

**1974-S Nickel, PR70 Deep Cameo  
One of Five for Registry Collectors**

- 3721 1974-S PR70 Deep Cameo PCGS.** With just five 1974-S nickels assigned the ultimate PR70 Deep Cameo grade by PCGS (11/14), the appearance of such a coin is hard to ignore for the top-tier Jefferson nickel Registry enthusiast. This example has the flawless mirror-and-frost beauty one would expect for the grade. A great opportunity. NGC ID# 27AM, PCGS# 94207

**1975-S Nickel, PR70 Deep Cameo  
Unimprovable Registry Coin**

- 3722 1975-S PR70 Deep Cameo PCGS.** Though more than 2.8 million of these proofs were struck, the relevant number is six, as in Population: 6 in PR70 Deep Cameo (11/14). This is the perfect coin for a registry collector tackling the modern Jefferson nickel proofs, minimally patinated with maximum contrast and unimprovable post-striking surfaces. NGC ID# 27AN, PCGS# 94208

- 3723 1986-S PR70 Deep Cameo PCGS.** A perfect ice-white example of this conditionally challenging date (if you don't think it is, crack open a few thousand 1986 proof sets and give it a shot), showing absolutely no distractions of any kind. Population: 32 in 70 Deep Cameo (12/14). NGC ID# 27B2, PCGS# 94221

**EARLY HALF DIMES**

**1794 Half Dime, Well-Struck VF35  
V-4, LM-4**

- 3724 1794 V-4, LM-4, R.4, VF35 NGC.** The leaf tip below the left side of U in UNITED and one berry under the I confirm the variety. Splashes of cobalt-blue, reddish-orange, and yellow-gold visit both sides of this Choice VF Flowing Hair Half dime, and the well-centered design elements are well-defined. A faint vertical mark between the 1 and 7 in the date might help to identify the coin, but does not detract in the least. Census for the variety: 1 in 35, 5 finer; (12/14). PCGS# 38584 Base PCGS# 4250

**1795 Half Dime, XF40  
V-5, LM-8, Gray Patina**

- 3725 1795 V-5, LM-8, R.3, XF40 NGC.** Deep cream-gray toning blankets this nicely defined Flowing Hair half dime. The eagle's wings display faint parallel adjustment marks, but the surfaces are otherwise smooth aside from a faded thin abrasion on the cheek. LM-8 features a Y-shaped die crack from Liberty's nose and a die scratch between the TA in STATES. PCGS# 38592 Base PCGS# 4251

**1795 Flowing Hair Half Dime, XF45  
V-5, LM-8; No Berries Beneath Left Wing**

- 3726 1795 V-5, LM-8, R.3, XF45 NGC.** Crisply struck and minimally abraded, this early half dime is both attractive and technically sharp. A distinctive die crack travels from the rim through the Y of LIBERTY to the bridge of Liberty's nose. The reverse shows no berries beneath the eagle's left (facing) wing. Seven main curls make up the flowing hair of Liberty, with star 1 almost touching curl 2. The L of LIBERTY sits lower than the letters I and B, which are spaced widely apart and distant from the L. Lilac-gray toning shows glimpses of rose-gold highlights, and the motifs are nicely detailed on this Choice XF coin. PCGS# 38592 Base PCGS# 4251

1797 Half Dime, V-2, LM-1, XF40  
Well-Detailed Example

- 3727** 1797 15 Stars, V-2, LM-1, R.3, XF40 NGC. The 1797 Draped Bust half dime claims a mintage of 44,527 pieces, with four die varieties known for the date. This coin represents the LM-1 variety, with 15 stars and the outer berry between N and I in UNITED. This lightly worn example retains much original design detail in the hairlines. The lightly abraded surfaces display shades of pale gold and lavender-gray toning. PCGS# 38597 Base PCGS# 4258

1797 Half Dime, AU53  
15 Stars, V-2, LM-1

- 3728** 1797 15 Stars, V-2, LM-1, R.3, AU53 PCGS. The only 1797 marriage with 15 stars. This suggests it was the first variety struck for the year, before a 16th star was added to represent Tennessee, and also before the Mint decision to revert to 13 stars. Otherwise, the small diameter of the half dime would be inundated by stars as the Union expanded westward. This is a lightly toned and exquisite example. Chestnut patina fills the right obverse margin and makes occasional inroads across the otherwise pearl-white surfaces. The centers show incompleteness of strike but the remainder of the coin is bold. Luster emerges from design elements and no marks are consequential. PCGS# 38597 Base PCGS# 4258

1797 V-3, LM-3 Half Dime, AU Details  
16 Stars Crowd the Obverse

- 3729** 1797 — Scratch — 16 Stars, V-3, LM-3, R.5, PCGS Genuine. AU Details. The LM-3 die pair is the only attempt by the Mint to squeeze 16 stars onto a half dime, caused by the admission of Tennessee to the Union. It was soon apparent a star could not be added for every new state, and the sensible solution was reached for a 13-star obverse. This bright white coin shows bold AU details, but a pair of small scratches are seen in the right obverse field, with the upper scratch extending all the way from the left stars, across Liberty's portrait, almost to the right-hand stars. Die clashing is noticeable on both sides. PCGS# 38599 Base PCGS# 4259

1797 Half Dime, Fine 15  
Rare 13 Stars, V-1, LM-4

- 3730** 1797 13 Stars, V-1, LM-4, R.5, Fine 15 PCGS. The sole 1797 die marriage with 13 Stars, V-1 secures a separate *Guide Book* listing and is approximately as rare as the vastly more expensive 1802. The present silver-gray example is well defined for its designated grade and is surprisingly unabraded. The obverse exhibits clash marks near the bust tip and upper curls. An important acquisition for the specialist. PCGS# 38600 Base PCGS# 4260

1797 13 Stars Half Dime, VF25  
V-1, LM-4

- 3731** 1797 13 Stars, V-1, LM-4, R.5, VF25 PCGS. Russet-brown and aquamarine freckles adorn the margins of this otherwise pearl-gray rare variety Small Eagle half dime. Well-defined for the grade, and void of any consequential marks. One small area of minor granularity is noted on the cleavage. Population: 4 in 25, 14 finer (11/14). Ex: *Central States Signature* (Heritage, 4-5/2010), lot 453. PCGS# 38600 Base PCGS# 4260

1800 Half Dime, V-1, LM-1, Choice VF  
Pleasing Middle-Grade Example

- 3732** 1800 V-1, LM-1, R.3, VF35 PCGS. CAC. Of the four known die varieties, LM-1 is one of the two more plentiful (the other is LM-3), and it is often encountered in type specialists' cabinets. This was the first use of the Heraldic Eagle reverse on the denomination, and some examples were likely saved as curiosities. The coin displays deep teal and violet toning in the recesses beneath pale battleship-gray patina overall. Light wear is consistent with the grade, and the problem-free surfaces are void of adjustment marks. The rim grows weak near 12 o'clock on the obverse and at the corresponding portion of the reverse, but all lettering remains clear. PCGS# 38601 Base PCGS# 4264

- 3733 1800 LIBEKTY, V-2, LM-3, R.4, Fine 12 PCGS.** A scarce variety with the broken R that makes the obverse legend read LIBEKTY. This evenly worn Fine 12 specimen retains some interior detail in the hair, but some lines have been worn smooth. The surfaces are lightly abraded and problem-free. PCGS# 38603 Base PCGS# 4265

## BUST HALF DIMES

### 1829 Capped Bust Half Dime V-3, LM-2; Frosted Premium Gem

- 3734 1829 V-3, LM-2, R.1, MS66 NGC.** The repunched top on I of UNITED helps identify this variety, along with a double denticle to the outside of star 1. Light die clashing shows on the reverse above the denomination and around various parts of the eagle. This boldly struck example was one of 1.2 million pieces minted to mark the first half dimes produced since 1805. Thickly frosted surfaces are lustrous and attractive, with a freckling of golden gray toning and glints of lilac. Census (all varieties): 23 in 66, 6 finer (11/14). PCGS# 38613 Base PCGS# 4276

### 1829 Bust Half Dime, MS65 V-12, LM-13.1; No Die Clashing Visible

- 3735 1829 V-12, LM-13.1, R.1, MS65 PCGS.** Struck from fresh die pair, with no prior usage of either the obverse or the reverse dies. Frosted fields and devices are brilliant and lustrous at the centers, with emerging blue and gray toning at the margins. Lavender highlights over the central motifs add significant visual appeal. As expected from the new dies, the strike is especially full and satisfying. Housed in a green label holder. PCGS# 38628 Base PCGS# 4276

### 1832 Half Dime, V-8, LM-5, MS67 Superb Type Representative

- 3736 1832 V-8, LM-5, R.1, MS67 PCGS. CAC.** This is an available variety of this equally plentiful date, an ideal combination for type representation. Both aspects of this issue's availability, however, cease to be a factor at the Superb Gem grade level. All varieties included, PCGS has certified only 11 1832 half dimes in MS67, with just a single MS68+ coin numerically finer (11/14). The current example is simply exemplary in both eye appeal and technical preservation. The frosty, essentially untuned surfaces are seemingly devoid of even minor disruptions in the luster. The stars are sharp, and only a few of Liberty's hair curls show any degree of detectable striking softness. An intensely lustrous, extraordinary type coin. PCGS# 38667 Base PCGS# 4279

**1833 Bust Half Dime, MS67**  
**Tied for Finest at Either Service**  
**V-3, LM-4.3; Late Die State**

**3737 1833 MS67 PCGS. V-3, LM-4.3, R.2.** A broadly repunched O in OF on the reverse and a doubled star 6 on the obverse are the primary identifiers of this die pair. It is the Valentine-3 variety, although a late die state that Valentine did not realize as existing. Strong die clashing on the obverse in front of Liberty's nose, chin, and neck combine with several reverse die cracks and a retained cud above the scroll above UM of UNUM to confirm the die state.

This Superb Gem example displays semiprooflike fields and bold silver luster, with a slight hint of lilac and lemon-gold toning at the margins. A full strike attends the devices despite the advanced state of the dies. No examples of the issue are certified numerically finer at either service. Population: 11 in 67 (1 in 67+), 0 finer (12/14). NGC ID# 232F, PCGS# 4280

**3738 1835 Small Date, Small 5C, V-7, LM-10, R.1, MS65 PCGS.** A well-struck, beautifully preserved example, but with slight die fatigue evident on the obverse bust. The surfaces are satiny beneath a blanket of pale champagne and olive-gray hues on the obverse, with deeper aquamarine and amber-gold on the reverse. A very pleasing example of this available variety. PCGS# 38719 Base PCGS# 4285

## SEATED HALF DIMES

**1837 No Stars Seated Half Dime, MS66**  
**Vividly Toned Large Date Example**

**3739 1837 No Stars, Large Date (Curl Top 1) MS66 NGC.** The 1837 is the more available of the two No Stars Seated Liberty half dime issues, and the Large Date variant is the more often seen of the two 1837 varieties, ideal for type representation. This Premium Gem representative showcases vibrant, frosty luster beneath deep toning in shades of aquamarine, violet, and olive-gold. The strike is crisp throughout, and the surfaces are devoid of any major abrasions. Census: 80 in 66 (1 in 66+, 1 in 66 ★), 19 finer (12/14). NGC ID# 232M, PCGS# 4311

1837 Seated Half Dime, MS67  
No Stars, Large Date  
Multicolor Patina

- 3740** 1837 No Stars, Large Date (Curl Top 1) MS67 NGC. V-1, Flynn MPD-001. Cherry-red, aquamarine, and pumpkin-gold toning endows this fully struck and flashy Superb Gem. The early die state with blatant repunching beneath all four date digits. The V-1 dies were also used to strike proofs, of which a couple dozen are known. The present high grade business example appears free from abrasions, even when inspected beneath a loupe. The eye appeal is formidable. A single-year type coin at Philadelphia, although a very scarce No Stars variety was coined at New Orleans in 1838. Census: 17 in 67 (1 in 67 ★), 2 finer (11/14).  
*Ex: Milwaukee Central States Signature (Heritage, 4/2010), lot 470.*  
NGC ID# 232M, PCGS# 4311

1837 Half Dime, MS67  
V-6A; Small Date, No Stars

- 3741** 1837 No Stars, Small Date (Flat Top 1) MS67 NGC. V-6A. Straight Small Date, Flat Top 1 in Date. Reverse radial die cracks at the As and the R in AMERICA suggested to Valentine that the V-6A variety was actually struck in 1838, since the same reverse was used for 1838 half dimes in an earlier state. A diagnostic crack from Liberty's heel through the rock support to the edge confirms the die pair.  
This deeply frosted, Superb Gem half dime is one of the finest-known, with only a single coin graded numerically higher by PCGS and NGC combined. Intense mint luster plays off the fully struck frosted elements and shines through rich, golden copper tones with lavender highlights. The toning mimics some beautiful copper-nickel cents we have seen, yet this is a silver half dime of exquisite quality and lavish appeal. Census: 4 in 67, 0 finer (12/14). NGC ID# 232M, PCGS# 4312

**1838 Large Stars, No Drapery Half Dime  
Conditionally Scarce MS66**

- 3742 1838 Large Stars, No Drapery MS66 PCGS. CAC.** Stars were added to the Seated half dimes in 1838 (though the New Orleans 1838 issue retained the No Stars design). The lustrous surfaces of this Premium Gem display soft gold color and exhibit sharply struck design elements. Both sides have been nicely cared for. Great overall eye appeal. This issue is conditionally scarce in MS66 and rare any finer. Population: 20 in 66 (1 in 66+), 8 finer (10/14). NGC ID# 2TXX, PCGS# 4317

**1839 Half Dime, MS67 ★  
Only One Finer at NGC**

- 3743 1839 No Drapery MS67 ★ NGC.** The Stars obverse, No Drapery design for the Seated half dimes was only issued from 1838 through 1840, and few survive as fine as this Superb Gem. NGC has certified 39 examples of the type in MS67 and two pieces in MS68. Only three of the 39 MS67 coins have also received the Star (★) designation. This lovely piece has frosty luster with lightly toned silver at the centers, within a deeply toned and attractive periphery. Census: 1 in 67 ★, 1 finer (11/14). NGC ID# 232S, PCGS# 4319
- 3744 1839-O No Drapery MS63 PCGS.** A well-preserved and sharply struck example of this short-lived No Drapery type. The obverse displays intermingled shades of sun-gold, violet, and blue-gray toning, while the reverse exhibits lighter olive-gold and pastel hues. Population: 9 in 63, 8 finer (12/14). NGC ID# 232T, PCGS# 4320
- 3745 1844-O XF45 PCGS. CAC.** Medium O. Despite a reported mintage of 220,000 pieces, the 1844-O half dime is rare. In fact, it is rarer than the much promoted 1844 dime, which has a mintage of 72,500 pieces. This unmarked example has mottled sea-green and rose-red toning and exhibits inconsistency of strike. NGC ID# 2336, PCGS# 4334
- 3746 1846 VF25 PCGS.** An attractive example of this low-mintage key half dime, struck to extent of only 27,000 pieces. Intermingled pale blue, gold, brown, gray, and heather patina enlivens surfaces that show no major marks. Population: 10 in 25, 37 finer (12/14). NGC ID# 2338, PCGS# 4336
- 3747 1847 MS65 PCGS. CAC.** The 1847 Seated half dime is a better date in Gem condition despite the mintage exceeding 1.2 million coins. This example offers a full strike on both sides with mint-green centers ceding to lovely copper-gold at the rims. Population: 20 in 65 (1 in 65+), 19 finer (12/14). This Gem is one of five at CAC. From *The Millford Collection, Part II*. NGC ID# 2339, PCGS# 4337

**1847 Seated Half Dime, MS66  
Variegated Toning Accents**

- 3748 1847 MS66 PCGS. CAC.** The unmarked fields display a semiprooflike sheen that reflects varying shades of royal-blue, teal, and straw-gold from the attractive obverse, and more-pronounced, variegated shades of the same colors with violet accents added on the reverse. A full strike adds substance to the motifs. This issue is scarce in Premium Gem condition, although not always recognized as such, making the date an exceptional type selection as well as a topline example for series specialists. Population: 14 in 66, 5 finer (12/14). NGC ID# 2339, PCGS# 4337

- 3749 1850 MS66 PCGS.** An available date in the context of the series, ideal for type representation. This Premium Gem example is well-struck, with frosty luster that exhibits just a hint of light golden toning. No mentionable abrasions are present. Population: 19 in 66, 11 finer (12/14). NGC ID# 233F, PCGS# 4345

**1850-O Half Dime, MS66  
High-End for the Issue**

- 3750 1850-O MS66 PCGS.** The 1850-O half dime is scarce in all grades and genuinely rare in Mint State. This Premium Gem representative is well-struck, with frosty mint luster that exhibits just a touch of light golden color. PCGS has encapsulated only 19 coins in all Mint State grades, with two in MS66 and just one numerically finer (12/14). NGC ID# 233G, PCGS# 4346

**1851 Half Dime, MS67**  
**Ideal Stars Obverse Type Candidate**

- 3751 1851 MS67 PCGS Secure.** Ex: Simpson. Struck to the extent of 781,000 coins, the 1851 half dime is one of the more available coins in the series, though examples are very rare in this remarkable state of preservation. Each side is almost entirely brilliant save the for slightest trace of golden overtones. A sharp strike overall reveals only minor softness on the bow. Tiny ticks are inconsequential. Population: 6 in 67 (1 in 67+), 0 finer (10/14). NGC ID# 233H, PCGS# 4347

**1858 Half Dime, MS67**  
**Lustrous and Colorful**

- 3752 1858 MS67 PCGS.** The 1858 half dime is a reasonably plentiful issue in most grades, though by the Superb Gem level it becomes a condition rarity. This lustrous and colorful MS67 piece has primarily blue-green hues with peripheral peach, sea-green, and violet elements. Population: 13 in 67 (1 in 67+), 1 finer (11/14). NGC ID# 233U, PCGS# 4367
- 3753 1858 MS67 NGC.** This richly toned Superb Gem reveals smooth, untouched surfaces on each side in shades of olive, sun-gold, and amber. The coin's satiny luster is pleasing to the eye, if not spectacular. The strike definition is bold overall, if a trifle weak over the centers and on the top of Liberty's head. Census: 26 in 67 (3 in 67 ★), 4 finer (12/14). NGC ID# 233U, PCGS# 4367

**1859 Seated Liberty Half Dime, MS68**  
**Tied for Finest at NGC**

- 3754 1859 MS68 NGC. V-4.** All four digits of the date are repunched, boldly on the 189, less obviously on the 5. This phenomenal specimen boasts brilliant silvery centers that complement the bands of peripheral rose and aqua toning on each side, with vibrant mint luster, a bold strike, and enormous eye appeal. While the 1859 is considered a common date, with a pre-Civil War mintage of 340,000 coins, this piece in extraordinary condition is tied with three other NGC-graded examples, and none are numerically finer (11/14). Superlative condition for the finest collection or Registry Set. Ex: *Milwaukee Signature* (Heritage, 8/2007), lot 1608. NGC ID# 233W, PCGS# 4371

**1859 Half Dime, Vividly Toned MS68  
None Certified Numerically Finer**

**3755 1859 MS68 PCGS. CAC. V-3.** Ex: Larry Shapiro, Gardner. The 1859 half dime was Mint Assistant Engraver Anthony Paquet's first work to reach actual production. This remodeling of Gobrecht's original design is most often noted for the hollow centers in the stars, a design element not found on any other U.S. coin. Perhaps because the figure of Liberty itself was not well-executed, or because he did not wish another engraver doing his work, Chief Engraver James Longacre remodeled the half dime again in 1860, after only 340,000 pieces of the Paquet design had been struck at the Philadelphia Mint. The uniqueness of this design earns it one-year type status, long an oversight with collectors assembling type sets.

This scintillating Superb Gem is bathed in concentric turquoise, rose-violet, and russet iridescence. Both the strike and surface quality appear to leave little room for improvement. PCGS shows five submissions in the numeric grade of MS68, of which three are Plus-graded coins; NGC reports four MS68 coins (11/14).

Ex: ANA Signature (Heritage, 4/2006), lot 366; Bowers and Merena (2/2007), lot 214. NGC ID# 233W, PCGS# 4371

**1860 Half Dime, MS67  
High-End and Conditionally Rare**

**3756 1860 MS67 PCGS. CAC.** A popular issue for type representation, but conditionally rare at the MS67 grade level. This superb example displays frosty luster that illuminates each side without interruptions. Pale golden-gray centers yield to brighter lemon-gold and mint-green peripheries. Light clash marks are observed in the fields. Population: 40 in 67, 4 finer (12/14). NGC ID# 2347, PCGS# 4377

**1862 Half Dime, MS67  
Delicately Toned on Both Sides**

**3757 1862 MS67 PCGS. CAC.** Similar to the 1860, the 1862 Seated Liberty half dime is available in most Mint State grades, but is seldom seen as fine as MS67. This representative is well-struck, albeit lightly clashmarked, with frosty luster shining through a blanket of pale lavender-gray and sun-gold hues. Population: 53 in 67 (5 in 67+), 3 finer (12/14). NGC ID# 234B, PCGS# 4381

**1863 Half Dime  
Superb Gem, Low-Mintage Issue**

**3758 1863 MS67 PCGS. CAC. V-1, RPD-001.** A pearlescent beauty with ivory-silver, frosted surfaces and radiant mint bloom. Fully struck, the devices are unmarked and razor sharp. Just 18,000 business strikes were produced during the period when all silver was hoarded. The 1 and 8 of the date are strongly repunched from the single die pair used to strike the date. Some proofs do not show this feature, and are considered to be restrikes from circa 1870. Population: 16 in 67 (1 in 67+), 3 finer (12/14). NGC ID# 234C, PCGS# 4382

---

**1864 Half Dime, MS65**

**Rare This Fine**

- 3759 1864 MS65 PCGS. CAC.** Though minor silver coins largely did not circulate during the Civil War, the Philadelphia Mint nonetheless produced 48,000 business strike half dimes in 1864. This is one of the better-preserved survivors, toned silver-gray in the centers with deeper steel hues at the margins and crevices. On the obverse, die clashes and subsequent cracks add interest. Population: 4 in 65, 11 finer (11/14).  
*From The College Collection. NGC ID# 234E, PCGS# 4384*

---

**1866 Seated Half Dime, MS67**

**Exceptional, Struck From Proof Dies**

- 3760 1866 MS67 PCGS. CAC. V-1.** A pristine, heavily frosted example overlaid in fine speckles of golden and turquoise toning with a window of brilliance at the center of the reverse. Just 10,000 business strikes were produced, all struck from proof dies and — of perhaps 100 Mint State survivors — only a handful could possibly match the quality of this Superb Gem. Population: 3 in 67 (1 in 67+), 0 finer (12/14).  
*Ex: Long Beach Signature (Heritage, 6/2005), lot 5718. NGC ID# 234J, PCGS# 4388*

- 
- 3761 1872-S Mintmark Above Bow MS66 PCGS. CAC.** Fully struck and problem-free throughout. The bright mint luster flashes strongly through the deep layers of aqua, orange, and red toning that is splashed irregularly across each side. Population: 19 in 66 (1 in 66+), 5 finer (12/14). NGC ID# 234Z, PCGS# 4402

---

**PROOF SEATED HALF DIMES**

**1837 Seated Half Dime, PR62**

**No Stars, Large Date**

**Misplaced Date**

- 3762 1837 No Stars, Large Date, PR62 PCGS. CAC. V-1, Flynn MPD-001.** A rare early proof issue. All four date digits are obviously repunched, most prominently beneath the 8. The strike is intricate at the centers, although Liberty's hair, the first T in STATES, and the left ribbon end show incompleteness. A loupe reveals moderate field hairlines beneath medium almond-gold and cream-gray toning. Encapsulated in a green label holder.  
*Ex: Whitney P. Sunderland Collection (Bowers and Merena, 3/1994), lot 1010; Milwaukee Central States Signature (Heritage, 4/2010), lot 2050. NGC ID# 2355, PCGS# 4407*
-

**1850 Seated Half Dime, PR62**  
**Extremely Rare in Proof Format**  
**One of Only Six Pieces Confirmed to Exist**

**3763 1850 PR62 NGC.** Valentine lists just one die variety (V-2) for proofs, although Walter Breen describes two additional obverses for this extremely rare issue. The present coin is a match to Breen's second proof variety, unlisted in Valentine — the heavy die lines along the right-hand border are not present, but light die lines below the date are; the date is also minutely further left than on the V-2 obverse.

The number of proofs struck altogether is unknown, though a popular estimate is as few as seven to 10 pieces. This seems consistent with the number of survivors known to exist, numbering just six confirmed specimens by our analysis of auction appearances and other references. Only four coins have been certified, all by NGC, including two PR65 coins, a PR64 piece, and the current PR62 coin. The two Gems are known to be separate coins, and it is conceivable that the Choice example is also a different coin, and not just the product of a resubmission. This coin is a newly certified piece, as it did not appear on the *Census Report* when we last offered the Pittman coin in our February 2014 ANA Signature auction.

Both sides exhibit a blend of olive and golden-gray hues, while the reverse also shows areas of more vivid violet-red in the recesses. The strike is full, and the surfaces are remarkable devoid of mentionable contact marks. Any grade-limiting hairlines are well-hidden by the rich patina.

This is only the third time we have offered a proof 1850 half dime, and this coin represents only the second individual specimen we have handled. With such a low survival and with such rare auction appearances, the importance of this offering cannot be overstated.

**Roster of 1850 Proof Seated Liberty Half Dimes (12/2014)**

1. **PR65 NGC.** The Kaufman piece. David Bullowa (5/1952); John Jay Pittman (David Akers, 10/1997), lot 484; FUN Signature (Heritage, 1/2008), lot 3033; ANA Signature (Heritage, 2/2014), lot 3801.
2. **PR65 NGC.** Orlando Sale (Stack's, 1/2009), lot 217.
3. **Gem Brilliant Proof, Uncertified.** Virgil Brand; New Netherlands Coin Co. (52nd Sale, 12/1958), lot 379; Goldberg Coins (2/2003), lot 303; Medio Collection (Stack's, 6/2004), lot 4194. The cataloger for New Netherlands notes the variety was unknown to Valentine, identified by the numerous parallel die scratches below and right of the date: "The only one we have seen from these dies, though about four or five other proofs are known from the dies of V-2."
4. **PR62 NGC.** The present coin.
5. **Proof.** Will W. Neil (B. Max Mehl, 6/1947), lot 1628; Public Auction Sale (Stack's, 6/1998), lot 1148.
6. **Proof.** Numisma '95 (Stack's, 11/1995), lot 1162.

**Additional Appearances:**

- A. **Proof.** Valentine plate. Only the obverse is plated in Valentine.
- B. **Proof.** Heman Ely (W. Elliot Woodward, 1/1884), lot 959; John Work Garrett; Johns Hopkins University (Stack's, 3/1976), lot 109.
- C. **Proof.** Golden I (Kreisberg Schulman, 2/1962), lot 910
- D. **Proof.** Numisma (7/1954)
- E. **Proof.** NN34: 463, impaired. PCGS# 4426

**3764 1860 PR65 PCGS. CAC.** Deep sea-green, lavender, and violet-gold coloration covers the obverse of this appealing Gem proof. Vibrant reddish-gold toning dominates the reverse. A pleasing, fully struck, well-preserved example of this scarce proof issue. Population: 14 in 65, 15 finer (11/14). NGC ID# 235V, PCGS# 4443

**3765 1862 PR66 PCGS.** The strike definition is complete in all areas of this high-grade proof, one of only 550 pieces produced. Each side is toned in rich colors around the margins with much lighter centers. Nicely reflective fields. Population: 16 in 66 (1 in 66+), 2 finer (12/14). NGC ID# 235X, PCGS# 4445

**1863 Half Dime, PR66+ Cameo  
Only 460 Pieces Struck**

**3766 1863 PR66+ Cameo NGC. CAC.** The design elements of this high-end Premium Gem are sharply detailed and richly frosted, creating bold cameo contrast with the deeply mirrored fields. The date shows light recutting, most prominent on the 1. A few hints of pale gold toning enhance the seemingly pristine surfaces. Census: 6 in 66 (1 in 66+), 3 finer (12/14). PCGS# 84446

**3767 1865 PR65 Cameo PCGS.** The 1865 is a popular date in proof format, due to the paucity of business strikes produced. Lovely pinkish-gray toning appears on both sides, yet it covers the peripheries more extensively than the centers and fails to dampen the considerable mint luster. Neither does it delimit the sharp contrast between the frosty devices and the brilliant fields. Population: 6 in 65 (1 in 65+), 14 finer (12/14). Ex: *Central States Signature* (Heritage, 5/2007), lot 251. PCGS# 84448

**1866 Half Dime, PR65 Deep Cameo  
Rarely Seen This Nice**

**3768 1866 PR65 Deep Cameo PCGS. CAC.** Repunched Date. A popular date as a proof because of the low mintage of business strikes (10,000 pieces). Brilliant and deeply mirrored in the fields with a sharp cameo contrast between the fields and devices. A touch of cloudiness in the right obverse field is not a hindrance to the assigned grade level or the excellent eye appeal. Population: 2 in 65, 3 finer (12/14). Ex: *Dallas Signature* (Heritage, 11/2005), lot 847. PCGS# 94449

**1868 Half Dime, PR64 Deep Cameo  
Scarcely Available With Bold Contrast**

**3769 1868 PR64 Deep Cameo PCGS.** Mostly brilliant with noticeably frosted devices set against watery fields. From a mintage of 600 proofs, only a tiny percentage of survivors could possibly qualify under the Deep Cameo category. A few glimpses of orange toning skim the rim. A few delicate hairlines mix with the normal die polish lines. Population: 1 in 64, 5 finer (12/14). Ex: *FUN Signature* (Heritage, 1/2005), lot 6084. PCGS# 94451

**1869 Half Dime, PR67  
Attractive Crimson and Blue Toning**

**3770 1869 PR67 PCGS.** PCGS and NGC have certified a fairly large number of the 600-piece 1869 proof half dime mintage. A mere 12 of these, however, attain the Superb Gem level, and only one coin is finer (11/14). Golden-orange patina is accented with splashes of sky-blue and crimson and the strike is full over all the design elements. Both sides yield a degree of field-motif contrast at various angles. Population: 2 in 67, 0 finer (11/14). NGC ID# 2366, PCGS# 4452

**3771 1869 PR64+ Deep Cameo PCGS. CAC.** A glittering jewel of this Reconstruction-era date, struck in proof format to the extent of 600 pieces. The silver-white surfaces show faint hints of champagne near the rims, along with a sharp strike and optimal field-device contrast. From *The Millford Collection, Part II*. PCGS# 94452

**3772 1870 PR65+ PCGS.** Sharply struck with variegated layers of green, mauve, plum, and gray patina over both sides. A well-preserved Gem proof example with splendid eye appeal. Population: 21 in 65 (1 in 65+), 16 finer (11/14). NGC ID# 2367, PCGS# 4453

**3773 1870 PR66 Cameo NGC. CAC.** Warm lavender-gold and pale amber hues blanket both sides of this Premium Gem Cameo proof. The frosty devices are sharply impressed and the field-motif contrast is pleasing. Census: 7 in 66 (1 in 66+), 3 finer (12/14). PCGS# 84453

**3774 1871 PR66 NGC.** Blended sea-green and pale golden hues blanket mirrored fields on each side of this Premium Gem proof. Liberty's figure shows moderate die rust, but the strike is nonetheless well-executed. From a mintage of 960 pieces. Census: 15 in 66 (1 in 66+), 7 finer (12/14). NGC ID# 2368, PCGS# 4454

**1871 Half Dime, PR67+ Cameo**  
**Sole Finest Certified at PCGS**

**3775 1871 PR67+ Cameo PCGS. CAC.** In the context of proof Seated Liberty half dimes, the 1871 is not particularly notable for its rarity, and a number of Cameos are known when compared to other dates of the period. What makes this coin special, however, is that it ranks as the single finest-certified example at PCGS, Cameo and non-Cameo representatives included; PCGS reports just three Cameos in PR67, with this piece being the only Plus-graded of the group, and just two PR67 non-Cameo coins, neither awarded a Plus designation — no numerically finer representatives have been certified at that service (12/14).

Both sides display deep, glassy fields and sharp, satiny devices. The reverse is blanketed in uniform mint-green toning, while the obverse shows more varied hues of ocean-blue, violet, and sun-gold. An impressive coin and one that will please the most discerning collector. PCGS# 84454

**EARLY DIMES**

**3776 1796 JR-1, R.3 — Repaired — PCGS Genuine. VG Details.** The left obverse field has a repair beneath the ribbon. The right obverse field is smoothed. The reverse has a small repair beneath the left (facing) wingtip, on the eagle's right shoulder, and on the right edge of the right wing. The stone-gray and russet surfaces are granular. A very scarce two-year introductory type. PCGS# 38742 Base PCGS# 4461

**3777 1796 JR-2, R.4, AG3 PCGS.** A silver-gray first year dime that has a bold date and no mentionable marks. The legends are partial but most reverse letters are discernible. LIBERTY and the left-side stars are well worn. PCGS# 38743 Base PCGS# 4461

**1796 JR-2 Dime, VF30**  
**Traces of Luster**

**3778 1796 JR-2, R.4, VF30 PCGS.** Golden-brown and cobalt-blue peripheries frame stone-gray fields and devices. Well defined for the VF30 grade, and traces of luster reside within the wings and hair. No marks are consequential except for a brief line before OF. A scarce first-year die variety. All denominations ever coined at the First Philadelphia Mint were issued in 1796, although the half cent, quarter, and half dollar are rarities. PCGS# 38743 Base PCGS# 4461

**3779 1800 JR-1, R.4, VF20 PCGS.** All major design elements are intact in outline and much interior detail remains, but the left side of the drapery is indistinct. The pleasing dove-gray surfaces are lightly abraded and show hints of steel-blue and amber. PCGS# 38754 Base PCGS# 4470

**1802 JR-4 Dime, VF Details**  
**Better Draped Bust Date**

**3780 1802 JR-4, R.4 — Cleaning — PCGS Genuine. VF Details.** An unmarked example of this scarce Draped Bust date. The centers are lightly brought up, as is usual for JR-4, but peripheral elements are fairly sharp. The surfaces are mildly bright and display vibrant apple-green and apricot-gold toning. The *Guide Book* reports a mintage of just 10,975 pieces. PCGS# 38761 Base PCGS# 4472

**1805 Draped Bust Half Dime, MS62  
JR-1; Wide A's, Five Berries**

- 3781 1805 5 Berries, JR-1, R.3, MS62 NGC.** Just two varieties are known for the 1805 issue, the most available date of all the Draped Bust dimes. The JR-1 die pair is scarcer than the JR-2 Four Berries variety — particularly in high grades — but variety collectors have a relatively easy time completing the 1805 sequence. Attractive Mint State examples are not so readily found, making this lustrous MS62 coin extremely desirable for both series and type collectors. Peach-gold and lemon-yellow tones predominate over the iridescent surfaces. The strike is a trifle soft at the centers and a short scrape beneath the right (facing) wing define the grade. Eye appeal is excellent. Census: 4 in 62, 3 finer (12/14). PCGS# 38768 Base PCGS# 4478

**1805 JR-2 Dime, AU50  
Four Berries Reverse**

- 3782 1805 4 Berries, JR-2, R.2, AU50 PCGS.** Jade-green, golden-brown, and azure-blue toning adorns this lightly circulated Heraldic Eagle type coin. The coin is sharply detailed although weak at the obverse stars, a characteristic of the later die state, and we note unobtrusive marks near the 5 in the date and the second S in STATES. A slender retained lamination near the L in LIBERTY is as made. The visual appeal far exceeds the technical grade. PCGS# 38769 Base PCGS# 4477

**1805 Draped Bust Dime, MS62  
JR-2; Four Berries, Narrow A's**

- 3783 1805 4 Berries, JR-2, R.2, MS62 PCGS.** A sharply original and attractively toned early dime, the second of two varieties known for the date. Eye appeal is on full display over both sides of this originally toned dime. Gunmetal-blue and orange-gold hues interplay with teal and yellow-gold shades. A bit of blending on Liberty's highest hair strands and flatness on the stars comes suggests minor incompleteness of strike. The diagnostic die line from the flag of 5 into Liberty's drapery is typical of all 1805 dimes. PCGS# 38769 Base PCGS# 4477

**1807 JR-1 Dime, AU50  
Early Die State**

- 3784 1807 JR-1, R.2, AU50 NGC.** A well defined steel-blue, chestnut-gold, and apple-green example. Free from any mentionable marks. A relatively early die state with only a "beard" clash mark beneath the chin. The reverse die was hardy, and struck 1805, 1806, and 1807 quarter eagles before coining the JR-1 1807 dime. PCGS# 38770 Base PCGS# 4480

**1807 JR-1 Dime, AU58  
Normal Late Die State**

- 3785 1807 JR-1, R.2, AU58 NGC.** Strong die clashing on the obverse surrounds the portrait, with a noticeable die bulge at stars 12 and 13. Left stars flat as always. This near-Mint example shows a sharp central strike, though, with few abrasions or other post-mint marks. Copper-orange toning and reflective fields provide generous eye appeal. Struck from the sole die pair for the issue, hard-used for the entire 165,000 piece production. PCGS# 38770 Base PCGS# 4480

**1807 JR-1 Dime, MS62**

- 3786 1807 JR-1, R.2, MS62 NGC.** The sole die marriage for the final Heraldic Eagle date. A coruscating and brilliant representative. As usual for JR-1, the obverse field exhibits heavy clash marks, as made. Well struck except for moderate incompleteness on the left-side stars. Liberty's neck and the field beneath the bust tip display a texture unusual for the issue. PCGS# 38770 Base PCGS# 4480

## BUST DIMES

### 1821 Capped Bust Dime, MS65 JR-8; Small Date

- 3787** 1821 Small Date, JR-8, R.2, MS65 NGC. The position of the second 1 in the date well beneath Liberty's curl differentiates this Small Date variety from all others. A noticeable die bulge at stars 1 through 3 is equally diagnostic. More than 1.1 million 1821 dimes were struck from 10 varieties, and most examples are of the Large Date type. Small Date coins command a slight premium in all grades.

This lustrous Gem combines steel-blue toning at the margins with peach-gold centers. The strike is sharp but not full, with weakness noted on about half of the obverse stars, some of which is the result of the bulging die. The eye appeal is that of a no-questions Gem. Census: 4 in 65, 3 finer (12/14). PCGS# 38798 Base PCGS# 94496

- 3788** 1829 Small 10C, JR-4, R.2, MS63 PCGS. Wheat-gold and stone-gray centers cede to cobalt-blue and ruby-red borders. This intricately struck and semiprooflike Select representative is devoid of discernible contact. PCGS# 38829 Base PCGS# 4511

- 3789** 1830 Small 10C, JR-2, R.1, MS64 NGC. The design elements of this attractive Choice specimen are sharply detailed and some interesting die cracks show on both sides. Pleasing shades of sea-green and bluish-gray toning blanket both sides, with strong mint luster underneath. Census: 36 in 64, 7 finer (12/14). PCGS# 38846 Base PCGS# 4517

### 1830/29 Dime, JR-5, MS64 Beautiful Multihued Peripheral Toning

- 3790** 1830/29 JR-5, R.2, MS64 NGC. The overdate feature is faint, but the underdigits 2 and 9 are visible above the upper loop of the 0 and to the right of the lower loop of the 3. This variety shares its reverse die with JR-6, and its obverse with JR-4, the other die pairing that, together with JR-5, comprises the overdate *Guide Book* variety. This Choice Mint State example is sharply struck, with well-preserved, satiny surfaces. The central regions display pale golden hues that fade to full brilliance, while the peripheries showcase more vivid ocean-blue, amber, and olive-gold toning in concentric bands. An especially attractive example in every respect. PCGS# 38848 Base PCGS# 4519

## SEATED DIMES

- 3791** 1838-O No Stars AU55 NGC. Fortin-101. The mintmark is repunched south, and there are two obverse rim cuds. Only two issues are available of the No Stars type, the 1837 and 1838-O. The latter is by far the scarcer of the two, especially in higher grades. This is a mostly brilliant coin with lightly abraded surfaces. Census: 11 in 55, 52 finer (12/14). NGC ID# 237T, PCGS# 4564

### 1838-O No Stars Dime, MS64 Fortin-102; Scarce Two-Year Type

- 3792** 1838-O No Stars MS64 NGC. Fortin-102, R.3. The 1838-O dime offers multiple levels of desirability for collectors. No Stars dimes were struck in Philadelphia (dated 1837) and in New Orleans (dated 1838-O), and no more were made without obverse stars. The Fortin-102 variety is thought to have been struck in January, 1839 — the first dime produced at that Mint, and the only No Stars branch mint issue. It was also the final striking of the No Stars type. This example is untoned with lustrous, stone-gray silver appeal. The surfaces are lightly granular from a combination of die wear and rust — primarily on the obverse, and near the margins on the reverse — a characteristic of the die pair, also seen on Fortin's plate coin. Scarce in this near-Gem grade. Census: 9 in 64, 6 finer (12/14). NGC ID# 237T, PCGS# 4564

**1840 Seated Dime, MS62**  
**Fortin-101, Rare in Mint State**

- 3793 1840 Drapery MS62 NGC. Fortin-101. R.4.** A deeply toned example of the first-year Robert Ball Hughes “Drapery” obverse, and a seemingly unappreciated rarity. Gerry Fortin explains, “A difficult date to locate in any grade and rare in EF or better. In Mint State, this date is very underrated as few examples are known.” The present coin is sharply struck with strong head detail on Liberty and a bold bow knot on the reverse. Dusky, gunmetal-gray toning blankets both sides, with underlying iridescence visible in strong light. Census: 2 in 62, 3 finer (12/14). NGC ID# 2383, PCGS# 4578

**1842 Seated Dime, MS66**  
**Tied for Finest at PCGS**

- 3794 1842 MS66 PCGS. Fortin-106, R.2.** A scarce early With Drapery Seated dime issue, rarely seen in Gem or finer condition. This is tied with just three others as the finest certified at PCGS (12/14). Both sides display just a hint of light golden color over frosty, delicately preserved surfaces. The strike is sharp, with the diagnostic die lines through Liberty’s elbow for this variety clear. This piece is from an earlier die state than the plate coin on the Fortin website, with no crack visible from the rim to the E in STATES. NGC ID# 2386, PCGS# 4581

**1842 Seated Dime, MS66**  
**Ex: Simpson Collection**

- 3795 1842 MS66 PCGS Secure. CAC. Ex: Simpson Collection.** This plentiful variety has a short die crack from the right stem end to the rim. Both sides of this sharply defined Premium Gem have pristine surfaces that exhibit wisps of gold toning over frosty and highly lustrous silver brilliance. Population: 4 in 66, 0 finer (12/14). NGC ID# 2386, PCGS# 4581

- 3796 1845 MS65 PCGS. Fortin-103, R.3.** Triple-punched 5, repunched 4. A lovely Gem example of this scarce Fortin variety. Both sides exhibit pearl-beige coloration with faint champagne overtones, and beautiful shimmering mint luster. The design motifs are sharply struck and surface distractions are nonexistent. NGC ID# 238B, PCGS# 4586

**1852-O Seated Dime, MS63**  
**Conditionally Rare at This Level**  
**Ex: Pittman**

- 3797 1852-O MS63 NGC. Fortin-102, R.5. Ex: Pittman.** Despite a mintage of 430,000 pieces, the 1852-O Seated Liberty dime is surprisingly rare in pleasing Mint State condition. This beautifully toned example displays vivid amber, gold, and aquamarine peripheral toning around light champagne centers. Some typical lightness of strike is seen on the upper wreath and the central figure of Liberty, but is well-balanced by semiprooflike mirroring in the fields around the borders. A beautiful coin from an historic collection. Census: 6 in 63, 11 finer (12/14).  
*Ex: Numismatic Gallery (5/1948), sold as part of lot 291; John Jay Pittman Collection, Part I (Akers, 10/1997), lot 613. NGC ID# 238P, PCGS# 4598*

**1853 Arrows Seated Dime**  
**Satiny Superb Gem**

- 3798 1853 Arrows MS67 NGC.** The reduction of weight for the 1853 silver coinage (except for the dollar, which was used primarily for foreign trade) necessitated the addition of arrowheads on each side of the date to identify the new standard. The Arrows type lasted for two years before reverting to the previous design. This Superb Gem dime is a wonderful example of the type, with frosted, satiny surfaces and a bold strike throughout. Cartwheel mint luster beams beneath translucent, champagne gold toning. Few 1853 Arrows dimes exceed this exceptional coin. It is likely a Fortin “hubbed” variety, with a faint die crack across the left arrowhead toward the base of the 1, although no exact Fortin match was located for this early die state coin. Census: 11 in 67 (1 in 67 ★), 5 finer (12/14). NGC ID# 2398, PCGS# 4603

**1858-S Dime, Mint Details  
Only 60,000 Pieces Struck**

- 3799 1858-S — Improperly Cleaned — NGC Details. Unc.** A meager mintage of 60,000 pieces, combined with a high attrition rate along the West Coast, ensures that the 1858-S is a formidable rarity with full design definition. The present cream-gray and tan-brown example has a complete strike and is free from mentionable marks. Careful rotation reveals a patch of hairlines on the right obverse field. NGC ID# 2393, PCGS# 4618

- 3800 1860 MS65 PCGS. Gold CAC. Fortin-112, R.5.** The Fortin plate coin and discovery coin for the die marriage. A prooflike Gem with flashy fields and an intricate strike. Attractive golden-brown, sky-blue, and plum-red toning graces the peripheries. Diagonal die polish lines cross the reverse field, as made.  
*From The Millford Collection, Part II.* NGC ID# 239D, PCGS# 4631

**1861 Seated Dime, MS66+  
Lustrous and Attractively Toned**

- 3801 1861 MS66+ PCGS. Fortin-113, R.3.** A Type Two Obverse variety. This example is deeply frosty beneath original toning on each side that displays vivid ocean-blue around the peripheries and warm lavender-gold in the centers. This date is available in the absolute sense, but rare at the Premium Gem grade level. Population: 12 in 66 (2 in 66+), 0 finer (12/14). NGC ID# 239F, PCGS# 4633

- 3802 1863 MS63 PCGS. Fortin-101a.** A meager 14,000 pieces were struck for this elusive Civil War issue. A prooflike and unmarked peach-gold and lilac example. 1863 proofs and business strikes were coined from the same die pair. Encapsulated in a green label holder. Population: 10 in 63, 17 finer (11/14). NGC ID# 239K, PCGS# 4637

**1865-S Seated Dime, MS62  
Extremely Rare in Mint State**

- 3803 1865-S MS62 NGC. Fortin-101a, R.7.** An extremely rare late die state variety, featuring a large planchet depression, possibly caused by a filled die, to the lower-left of the rock. A similar depression is observed on the lower-left maple leaf on the reverse. Extensive weakness on Liberty's head and the corresponding wreath bow is seen on virtually all examples of this die pairing, even the earlier die state coins without the depression by the shield.

The present coin appears to be the finest example of this die state variety discovered, which is distinct as the rarest variety listed on Gerry Fortin's website. Both sides are satiny and untuned, with fewer abrasions than are expected for the MS62 grade level. Undoubtedly, the striking weakness that is characteristic of this variety contributes to the limited numerical grade. Overall, an important coin for the student of Seated Liberty dime varieties, but also for the regular date collector, as the 1865-S dime is rare in all grades and extremely so in Mint State. NGC has certified only 25 examples of this date in all grades, with one in MS62 and just three numerically finer (12/14). The specialist should bid accordingly. NGC ID# 239R, PCGS# 4642

**1866 Seated Dime, MS66  
Rare, Lavishly Toned**

- 3804 1866 MS66 NGC. Fortin-102b, R.6.** The reverse is heavily clashed, with bold marks visible to the right of the E in ONE, below the ME in DIME, to the left of and around the D, and between the upper ends of the wreath, with the outline of the obverse date numerals visible in the field above. Fortin lists this late die state variety as the rarest of the issue, and it is surprising to find an example that is also among the finer-known representatives of the date. The 1866 dime had a low mintage of just 8,000 coins, and scarce in all grades and rare in Mint State. This piece ranks as one of just five Premium Gems at NGC (1 in 66 ★), with only three numerically finer (12/14). Semiprooflike fields showcase sharply struck design elements. Warm orange-gold centers deliver a soft glow amid deeper violet, blue, and mint-green peripheral bands. NGC ID# 239S, PCGS# 4643

**1867-S Dime, MS62**  
**Fortin-102, Scarce in Mint Condition**

- 3805 1867-S MS62 PCGS. Fortin-102, R.4.** The left flag of the 1 is right of the shield point, and the pendant is left of the center of the 6. The mintage of the 1867-S dime was only 120,000 pieces, and most of those likely circulated in the West, where the tradition of hard money was alive and well after the Civil War. Greer's series reference notes the issue is rare in Mint State.

This piece offers original pinkish-gold toning with glints of ice-blue near the rims on each side. The A in STATES is nearly filled in, and the peripheral strike is fairly soft at the bowknot and the upper left wreath, where an interesting raised die line appears. Marks are minimal, however, and the originality and eye appeal mark this coin as a prize for the specialist.

Ex: Fort Worth Signature (Heritage, 3/2010), lot 610. NGC ID# 239V, PCGS# 4646

**1869 Dime, Well-Preserved MS66**  
**Long Flag on 1, Fortin-105a**

- 3806 1869 MS66 PCGS. Fortin-105a, R.4.** The die pair was used to strike both proofs and business strikes, identified by a Long Flag on the 1, a high, upsloping date, and die lines and defects in the shield. Two date logotypes were employed for the 1869 issue, with varieties known with a Short Flag as well as a Long Flag. This Premium Gem business strike is prooflike over the fields, contrasted with frosted devices. Light-gold toning on the rims and margins surrounds silver centers. A fully struck and attractive example, with only a few pieces finer. Population: 6 in 66 (1 in 66+), 4 finer (12/14). NGC ID# 239Y, PCGS# 4649

- 3807 1869-S MS65 NGC.** Nearly flawless overall, this impressive Gem is lustrous and well-preserved, with sharply struck motifs and blemish-free surfaces. From an original mintage of 450,000 coins, this piece is one of the better-known examples. Census: 18 in 65, 4 finer (11/14). NGC ID# 239Z, PCGS# 4650

- 3808 1871-CC — Repaired — PCGS Genuine. XF Details.** The 1871-CC, a key issue in the Seated dime series, had a low mintage of 20,100 pieces. This example shows plenty of detail for the grade, with light amounts of patina and a few minor scratches and abrasions. Several areas on the coin show evidence of attempted repair, including the lower field area beneath DIME on the reverse. NGC ID# 23A5, PCGS# 4654

- 3809 1872-CC — Repaired — PCGS Genuine. XF Details.** Light rose-gray toning covers each side, as dusky green accents visit the peripheries. Several of the field areas show evidence of smoothing. This issue is an important key date in the Seated dime series. NGC ID# 23A8, PCGS# 4657

**1873 Arrows Dime, MS65**  
**Sharp, Carefully Preserved**

- 3810 1873 Arrows MS65 NGC. Fortin-102a, R.2.** Struck from a retired proof die pair, with the diagnostic die lumps visible on Liberty's thigh near the upper-right corner of the shield. As a date, this issue is moderately available in grades through MS64, but Gems are rare. This example is satiny and lustrous, with a touch of dusky golden toning over each side. The strike is sharp and the surfaces are devoid of significant distractions. Census: 17 in 65, 5 finer (12/14). NGC ID# 23BG, PCGS# 4665

**1873-CC Arrows Dime, VG10**  
**Scarce in All Grades**

- 3811 1873-CC Arrows VG10 PCGS. Fortin-101, High R.4 in VG.** A well-circulated and proportionately affordable example of this key Carson City issue. Deep olive-gray patina yields the occasional hint of deep lavender, while the figure of Liberty retains pleasing detail for the grade. The diagnostic die crack through the mintmark is indistinct, due to the extent of the wear. Population: 6 in 10, 46 finer (12/14). NGC ID# 23BH, PCGS# 4666

**1873-CC Arrows Dime, VF35**  
**Better Than Typically Seen**

- 3812 1873-CC Arrows VF35 PCGS. Fortin-101, R.5 in VF.** This is a decidedly well-detailed coin for the grade, much better than is typically seen for this rare key date. The diagnostic die crack through the mintmark is discernable for authentication purposes. Both sides show deep olive-gray patina, with hints of gold and lilac throughout. An important coin for the Seated Liberty dime collector. This issue is rare in all grades, and is prohibitively rare finer than the VF grade level. Population: 8 in 35, 11 finer (12/14). NGC ID# 23BH, PCGS# 4666

**1873-CC Dime, AU Details**  
**One of the Keys to the Seated Dime Series**

- 3813 1873-CC Arrows — Environmental Damage — NGC Details. AU.** As one of the lowest mintage issues in the Seated dime series, the 1873-CC is in constant demand by collectors in all grades. This is a particularly high-grade survivor that is limited in desirability by its uniformly porous surfaces. Well-detailed, however. Each side shows irregular patches of charcoal-gray that alternates with areas of near-brilliance. NGC ID# 23BH, PCGS# 4666

**1873-S Arrows Dime, MS64+**  
**Extremely Rare Any Finer**

- 3814 1873-S Arrows MS64+ PCGS. CAC. Fortin-101, R.4.** The 1 in the date is lightly repunched south. All dimes struck at the San Francisco Mint in 1873 were of the new weight standard, and thus feature the arrows on either side of the date. This issue is scarce in all grades, as only 455,000 pieces were struck and the attrition rate was unusually high. Over half of the certified Mint State population is in the sole numeric grade of MS64, and it is more than a little likely that a number of these are the result of resubmissions in hopes for a Gem grade — PCGS and NGC combined have certified only six examples above the MS64 level (12/14), creating much incentive for crack outs. This Plus-graded MS64 coin is the only so-designated example of this date at PCGS, and displays excellent striking quality and preservation. Satiny luster underlies light golden toning, granting this piece a high degree of eye appeal. Population: 13 in 64 (1 in 64+), 2 finer (12/14). NGC ID# 23BJ, PCGS# 4667

**1875-CC Mintmark Above Bow Dime, MS66+**  
**Richly Toned**

- 3815 1875-CC Mintmark Above Bow MS66+ NGC.** The individually punched mintmarks on 1875-CC dimes created the Mintmark Above and Below varieties for the year. Of the two, the Above Bow is slightly more accessible. This MS66+ piece is impressively lustrous through a layer of silver-blue, azure, and sea-green patina. Census: 12 in 66 (1 in 66+), 4 finer (11/14). NGC ID# 23AE, PCGS# 4673

**1876 Dime, MS67**  
**Rich Obverse Patina**  
**Fortin-Unlisted Variety**

- 3816 1876 MS67 NGC. Type One Reverse.** A virtually pristine Superb Gem that has a good strike and a lightly toned reverse. The obverse displays deep blue-green and plum-red borders. A Fortin-unlisted die variety that shows repunching on the base and top of the 1 in the date, a die lump on the E in ONE, a die scratch on the M in DIME, and a lightly hubbed IM. NGC ID# 23AH, PCGS# 4679

**1876-CC Seated Dime, MS67  
Tied With Three Others for Finest at PCGS**

- 3817 1876-CC MS67 PCGS. Fortin-103, R.4.** Type One Reverse. This variety exhibits bold doubling on ONE DIME, with the spread most evident on the two E's. The 1 in the date is also mildly repunched south, with the underlying numeral visible on the top edge of the flag of the primary digit. As a date, the 1876-CC dime is easily obtainable in all grades shy of MS67 (more than 8 million examples were struck), but at this level the collector will usually have to wait a long time for an example to become available.

This rare offering features a beautifully preserved, boldly struck representative with frosty mint bloom. Each side exhibits peripheral hues of teal and sea-green toning around soft lavender-gold central regions. PCGS has encapsulated just four submissions in this grade, and none finer (12/14), making this coin truly special not only in aesthetic appeal, but in rarity. NGC ID# 23AJ, PCGS# 4680

- 3818 1885-S VF25 PCGS.** The last great low-mintage key in the Seated dime series, the 1885-S saw a production of 43,690 pieces. This is a well-circulated pinkish-gray example that shows extensive wear but no singular distractions. Population: 6 in 25, 50 finer (12/14). NGC ID# 23B2, PCGS# 4695

- 3819 1885-S VF35 PCGS.** The low mintage 1885-S is a key issue in the Seated Liberty dime series. Only 43,690 pieces were struck, and survivors are sought in all grades by collectors. This light golden-brown example shows nicely detailed design elements, save for weakness on portions of the wreath and Liberty's head. There are no marks of consequence. Population: 11 in 35, 35 finer (12/14). NGC ID# 23B2, PCGS# 4695

- 3820 1886 MS65 PCGS. CAC.** Navy-blue and lime-green patina dominate the obverse. The reverse is lightly toned aside from arcs of golden-brown and aquamarine on the upper margin. Housed in a green label holder.

*From The Millford Collection, Part II.* NGC ID# 23B3, PCGS# 4696

- 3821 1886 MS67 NGC. Fortin-103a, R.2.** This high-mintage issue, produced to the extent of more than 6.3 million pieces, becomes a notable condition rarity at the Superb Gem grade level. This vividly colored example displays frosty luster amid splashes of gold, amber, aquamarine, and mint-rose toning. The strike is sharp, and close examination fails to reveal any noteworthy abrasions. Census: 11 in 67 (1 in 67 ★), 0 finer (12/14). NGC ID# 23B3, PCGS# 4696

- 3822 1887 MS66 PCGS. CAC. Fortin-Unlisted.** Variety unlisted by Fortin. The 1 in the date is directly centered over two denticles, with the tip of the flag in line with the point of the shield. The 7 is centered between two denticles, positioned slightly closer to the base than to the border. There are several faint die cracks on the reverse, hidden within the upper wreath leaves, the most prominent connecting the uppermost branches at 12 o'clock. The coin is deeply frosty, with a light golden peripheral hue being the only trace of color. The strike is sharp and there are no significant marks. Population: 30 in 66 (2 in 66+), 4 finer (12/14). NGC ID# 23B5, PCGS# 4698

**1889-S Seated Dime, MS65  
Fortin-101; Medium S Mintmark**

- 3823 1889-S MS65 PCGS. Fortin 101, R.3.** The Medium S variety occurs on just two die pairs and is scarce, particularly so in Mint State. This frosted Gem example is lightly patinated in lilac-gold shades with silver luster beneath the toning, which is deeper at the obverse legend. A thin, curving line in the right obverse field is the only notable mark. A typical San Francisco Mint strike for the issue, with slight blending on Liberty's head and cap. Population: 6 in 65, 2 finer (12/14). NGC ID# 23BA, PCGS# 4703

- 3824 1891-O MS65 NGC. CAC.** Deep cobalt-blue and purple peripheral toning frames the champagne centers of this Gem dime. Both sides are very well preserved and exhibit sharply struck design elements, further enhancing the coin's eye appeal, aptly recognized by CAC. Census: 26 in 65, 15 finer (12/14). NGC ID# 23BE, PCGS# 4707

## PROOF SEATED DIMES

- 3825 1858 PR64 PCGS. CAC. Fortin-101.** Vivid aqua and pale lavender patina compete to good effect on each side of this near-Gem proof 1858 dime. The downward-sloping date and die line from the M in AMERICA to the rim attribute this piece as struck from the Fortin-101 proof dies. Population: 30 in 64 (1 in 64+), 14 finer (12/14). NGC ID# 23CC, PCGS# 4747

### 1858 Seated Dime, PR66 Among the Finest at PCGS

- 3826 1858 PR66 PCGS. CAC. Fortin-101, R.5.** A diagnostic diemaker's mark above the M in AMERICA confirms the Fortin-101 die pair, as were all 1858 proof coins for the year. The medium-sized date logotype slopes downward. The proof mintage is estimated at slightly over 300 pieces, and although Mint records are scant, new research by John Dannreuther suggests proofs were still sold at face value in 1858. As a result, dealers and collectors could speculate by buying proofs without risk, which they did with gusto. Accordingly, 1858 proof production was substantially higher than the preceding years. This Premium Gem example displays steel-blue and reddish-gold tones over deeply mirrored surfaces. The motifs are sharply struck and lightly frosted. A highly appealing, well-preserved proof from the 1850s — always in demand. Population: 5 in 66, 0 finer (12/14). NGC ID# 23CC, PCGS# 4747

### 1859 Dime, Brilliant PR65 Final Year for the Stars Obverse Type

- 3827 1859 PR65 NGC.** Collectible as the final year of the Stars Obverse type. The official mintage of 800 proofs is misleading as a number of pieces were melted as unsold at year's end, making the 1859 scarcer than it would seem from an initial glance at the mintage. This is an all-brilliant, deeply cameoed example with essentially problem-free surfaces. Census: 33 in 65, 35 finer (12/14). NGC ID# 23CD, PCGS# 4748

### 1859 Seated Dime, PR66+ Strong Visual Appeal Just One Coin Numerically Finer

- 3828 1859 PR66+ PCGS. CAC.** John Dannreuther's recent research suggests the Mint "primed the pump" for future proof sales by offering the 1859 proofs at face value, explaining the big jump in proof production to 800 pieces for the year (even though not all sold). Attractive multicolor toning and reflective fields provide this high-end Premium Gem representative with strong eye appeal. The hues include yellow, gold, green, red, and lavender on the obverse. More subtle toning is present on the reverse, with pale shades of lavender, yellow, and orange. The strike is sharp overall, with minor blending of the dentils on portions of the obverse. Population: 18 in 66 (1 in 66+, the present coin), 1 finer (12/14). NGC ID# 23CD, PCGS# 4748

**1863 Dime, Incredible PR67 Deep Cameo**  
**Sole Finest at PCGS**

**3829 1863 PR67 Deep Cameo PCGS. CAC.** We are unsure which will prove more appealing, the mid-Civil War date or the intense, sparkling appearance of this coin itself. The surfaces are entirely untuned silver-white, possessed of optimal contrast, a full strike, and pristine preservation (a couple of small, dotline indents in the planchet on the obverse are undoubtedly as made at the Mint). All the details of Liberty's head, gown, shield, and rock are clear, as are all wreath details on the reverse. Finally, the fields are looking-glass-clear, furnishing top-notch contrast against well-frosted devices. An incredible survivor from the mintage of 460 pieces. Population: 1 in 67 Deep Cameo, 0 finer (12/14). PCGS# 94756

**3830 1869 PR66+ NGC.** An incredible Premium Gem proof, this Seated dime has fully mirrored fields and lustrous devices, all visible through the deep blue and violet toning. The toning prevents an otherwise well-deserved Cameo designation. Census: 7 in 66 (1 in 66+), 5 finer (12/14). NGC ID# 23CT, PCGS# 4762

**1870 Dime, Toned PR67**  
**One of the Two Finest at PCGS**

**3831 1870 PR67 PCGS. CAC.** The present offering is one of the two finest 1870 proof dimes certified by PCGS (12/14). Soft cobalt-blue clinging to the margins frames deep bluish-gray and reddish-gold patination in the centers. The design elements are sharply defined and these, along with the impeccably preserved surfaces enhance the coin's overall eye appeal. NGC ID# 23CU, PCGS# 4763

**1873 No Arrows Dime, Toned PR67 Cameo**

**3832 1873 No Arrows PR67 Cameo PCGS.** Frosty, golden-tan motifs are highlighted by deeply toned cobalt-blue fields. The design elements are well-impressed and both sides have been very well cared for. PCGS and NGC have graded only five pieces at this level and none finer. Population: 2 in 67, 0 finer (12/14). PCGS# 84766

**3833 1879 PR67 Cameo NGC.** This delightful Superb Gem exhibits sharply detailed design elements and deeply mirrored fields that contrast boldly with the frosty devices. A few highlights of pale gold toning visit the impeccably preserved surfaces. Census: 15 in 67 (2 in 67 ★), 0 finer (12/14). PCGS# 84776

**3834 1882 PR66+ Cameo PCGS. CAC.** The 1882 dime had one of the larger proof mintages with 1,100 pieces struck. A couple of dozen high-grade proofs are known. This is one of the more visually interesting ones. Blue-green patina is scattered irregularly over each side, and the cameo contrast is strongly evident even through the substantial toning. The strike is pinpoint-sharp and there are no obvious contact marks on either side. Population: 18 in 66 (2 in 66+), 7 finer (12/14). PCGS# 84779

---

1883 Seated Dime, Toned PR67

- 3835** 1883 PR67 NGC. Fortin-103, R.3. Deep toning in shades of royal-blue, mint-green, violet, and sun-gold vividly blankets both sides of this deeply reflective Superb Gem proof. The upper-left portion of the wreath exhibits the usual striking softness, though the design elements are otherwise sharply impressed. The Mint struck a moderate total of 1,039 proof dimes in 1883, but few survive in the Superb Gem grade range. Census: 19 in 67, 3 finer (11/14). NGC ID# 23D8, PCGS# 4780

- 3836** 1886 PR66 Cameo NGC. The surfaces are mostly untoned silver-white but show a thin crescent of champagne-gold on the obverse, a bit more prominent on the reverse. Good field reflectivity and moderate mint frost are sufficient for the Cameo designation. The grade comprises a couple of tiny field ticks on the obverse, but this is a most attractive example of the issue. Census: 13 in 66 (2 in 66 ★) Cameo, 15 finer (12/14). PCGS# 84783

---

1887 Dime, PR66 Cameo  
Rare Proof Die Marriage

- 3837** 1887 PR66 Cameo PCGS. CAC. Fortin-117, R.6. A recently rediscovered, rare proof die variety, with circular die lines in the recesses of Liberty's gown. Walter Breen originally recorded this variety, but it was unconfirmed to exist until an example was discovered in the Eugene H. Gardner Collection. Here we offer another representative, this one beautifully preserved at the PR66 grade level with stark cameo contrast. Liberty's head and the corresponding wreath bow are not fully defined, though the strike is otherwise sharp. A touch of light golden toning accents the deeply mirrored fields. Population: 6 in 66, 3 finer (12/14). PCGS# 84784

---

1889 Seated Dime, PR67  
Beautifully Toned

- 3838** 1889 PR67 PCGS. A mere 711 proofs were struck in 1889, and perhaps half of those coins still exist, but most are graded between PR62 and PR66. Only 15 pieces are rated at PR67 by the two major grading services, and just two coins are graded even higher, both at NGC. This is a fully struck specimen that displays gorgeous toning over each side, in hues of deep purple, mint-green, and champagne. The surfaces are highly reflective and virtually flawless, as expected for a Superb Gem. Population: 7 in 67, 0 finer (11/14). NGC ID# 23DE, PCGS# 4786

- 3839** 1889 PR65 Ultra Cameo NGC. Fortin-101. The design elements of this delightful Gem are sharply detailed and richly frosted, creating stunning cameo contrast with the deeply mirrored fields. The surfaces are essentially brilliant and flawless. Census: 1 in 65 Ultra Cameo, 0 finer (12/14). PCGS# 94786

- 3840** 1891 PR66 PCGS. Gorgeously reflective surfaces on each side show mint-green and amber-gold prevailing amid excellent preservation and loads of eye appeal. The strike is quite sharp if just a tad short of full on the high points. Population: 19 in 66, 9 finer (12/14). NGC ID# 23DG, PCGS# 4788

---

1891 Seated Dime, PR67+ Cameo  
Outstanding Color and Eye Appeal

- 3841** 1891 PR67+ Cameo PCGS. CAC. Fortin-130, R.3. Ex: Newman. A veneer of cobalt-blue, sky-blue, yellow-gold, and orange patination combines with the pronounced field-motif contrast of this high-end Superb Gem. Sharply struck design elements and impeccably preserved surfaces further enhance the outstanding eye appeal. Population: 7 in 67 (3 in 67+), 0 finer (12/14). Ex: Eric P. Newman Numismatic Education Society. PCGS# 84788

## BARBER DIMES

### 1892 Dime, Superb Gem First Year of Barber Design

**3842 1892 MS67 PCGS. CAC.** Even a design that is not particularly popular usually enjoys a first-year bump in availability as examples were saved by the curious. Even so, the 1892 Barber dime is a rarity in Superb Gem Mint State. This example is attractively toned in cool hues ranging from rose-violet to sapphire-blue with hints of sea-green. Population: 21 in 67 (2 in 67+), 0 finer (11/14). NGC ID# 23DK, PCGS# 4796

### 1892 Barber Dime, Pristine MS67+ Formidable Registry Set Contender

**3843 1892 MS67+ PCGS. CAC.** With no coins certified higher than MS67 by either service, this example with the PCGS Plus designation (and with the CAC endorsement) must be considered among the "finest of the fine." Certainly, few rivals could claim more extraordinary toning or greater eye appeal. Brilliant mint luster bolsters vivid, royal-blue at the margins and peach-gold centers. The fields and devices are immaculately preserved and, as expected, fully struck. Population: 21 in 67 (2 in 67+), 0 finer (12/14). NGC ID# 23DK, PCGS# 4796

### 1892-S Barber Dime, MS66 Conditionally Rare Issue

**3844 1892-S MS66 PCGS.** In the first year of Barber's Liberty Head dime, production of the denomination at the San Francisco Mint dipped below 1 million coins, a significantly smaller mintage than was accomplished at the Philadelphia and New Orleans facilities. As a result, the San Francisco issue of this year is the scarcest of the three 1892 issues in virtually all grades, though the contrast is especially prevalent at the MS66 grade level; PCGS has certified some 91 examples of the Philadelphia issue in this grade (4 in 66+) and 21 finer, 10 examples of the New Orleans issue (3 in 66+) and one finer, but only four representatives of the San Francisco issue (1 in 66+), this time with none finer (11/14).

The connoisseur will find much to love about this coin; the frosty luster attractively illuminates soft lavender, gold, and aquamarine hues on each side, while the strike is boldly executed. NGC ID# 23DM, PCGS# 4798

**1893/2 Barber Dime, MS64  
Strong Underdigit**

- 3845 1893/2 MS64 PCGS.** The diagonal downstroke of the underdigit is clear within the lower loop of the 3. This is a lightly frosted example with a few small, unobtrusive marks scattered about. The strike is uncommonly strong for this issue, which is normally found weakly defined. Lightly and evenly toned. Population: 11 in 64 (1 in 64+), 10 finer (12/14). NGC ID# 23DP, PCGS# 4799

**1893 Barber Dime, Brilliant MS67  
Tied for Finest at PCGS and NGC**

- 3846 1893 MS67 PCGS. CAC.** A mintage of over 3.3 million Barber dimes was realized in 1893, the second year of issue in the series. This amazing example is one of only four coins awarded a Superb Gem designation at PCGS (plus one in MS67+). Both PCGS and NGC have failed to certify an example numerically finer (10/14). Thick mint frost blankets the entirely brilliant surfaces. The design elements are fully struck, and a couple of minute ticks on the reverse are all that preclude an even higher grade. NGC ID# 23DN, PCGS# 4800

**1894 Dime, Impressive MS67**

- 3847 1894 MS67 PCGS. CAC.** Deep aqua-green and olive-gray patina on each side with impressive preservation and a bold strike throughout make this one of the most attractive survivors imaginable of this issue. PCGS shows only this sole MS67 with one MS68 finer — interestingly, that coin, depicted on CoinFacts, has a similar coloration (12/14). NGC ID# 23DT, PCGS# 4803

**1896-S Barber Dime, MS65  
Delicate Multicolor Toning**

- 3848 1896-S MS65 PCGS.** With a low mintage of little more than 575,000 pieces, the 1896-S dime is a notable semikey date in all grades, but it becomes genuinely rare in Gem and finer condition. This example shows fully struck design elements, with softly frosted, radiant luster that exhibits only a few minute ticks on the obverse. Beautiful multicolor toning blankets both sides in shades of lavender-gray, powder-blue, sun-gold, mint-green, and pale russet, with the brighter colors largely restricted to the margins. Population: 21 in 65, 19 finer (11/14). NGC ID# 2300, PCGS# 4811

- 3849 1898-O MS65 NGC.** Deep electric-blue, gold-orange, and purple toning cascades over the lustrous surfaces of this sharply struck Gem. No mentionable marks are visible on either side. Census: 15 in 65, 2 finer (12/14). PCGS# 4816

**1898-O Dime, MS65  
Satin and Nicely Struck**

- 3850 1898-O MS65 PCGS. CAC.** Silver centers accented with copper-russet deepen around part of the obverse rim to cobalt-blue on this satiny and nicely struck Gem 1898-O dime. A wispy die crack runs from the forward bust truncation to the rim nearby. PCGS has seen eight submissions in this grade, and this is one of six with the CAC green approval sticker between both services combined (12/14). PCGS# 4816

**1900 Barber Dime, MS67  
None Numerically Finer at PCGS or NGC**

- 3851 1900 MS67 PCGS. Ex: Lily Nicole Collection.** The 1900 Barber dime claims a large mintage of 17.6 million pieces, and this spectacular Superb Gem is one of the finest survivors. The exceptional surfaces offer razor-sharp definition on all design elements and impeccably preserved, lustrous fields and devices, under attractive shades of lavender, rose, and pale-gold toning. Population: 6 in 67 (1 in 67+), 0 finer (12/14). NGC ID# 23EC, PCGS# 4821

- 3852 1904 MS66 NGC.** A superior example, boldly struck with riveting detail. Attractive gunmetal-blue and antique-gold colors are seen at the borders on each side. The majority of the Mint State examples of this date range from MS62 to MS64. Census: 7 in 66 (1 in 66 ★), 0 finer (12/14).  
Ex: *Central States Signature* (Heritage, 4/2006), lot 1300. NGC ID# 23ER, PCGS# 4833

**1905-O Micro O Dime, AU58  
Original Surfaces**

- 3853 1905-O Micro O AU58 PCGS. CAC.** This popular *Guide Book* variety is significantly scarcer overall than the normal mintmark 1905-O dime, and is genuinely rare in Mint State. This near-Mint example has all the eye appeal of a lower-grade Uncirculated piece, but just a touch of wear over the highest points of the design precludes such a designation from PCGS. Satiny luster remains in the recesses, with uniform olive-gray and pale golden hues encompassing each side. Population: 5 in 58, 7 finer (12/14). PCGS# 94836

- 3854 1907-O MS66 PCGS. CAC.** Both sides of this Premium Gem display lustrous surfaces and lovely toning. The intermingled shades include gold, olive-green, red, orange, and jade-green. The strike is sharp overall, adding to the appeal. Population: 15 in 66 (2 in 66+), 2 finer (12/14). NGC ID# 23F5, PCGS# 4844

**1911-D Barber Dime, MS67  
Remarkably Well-Preserved and Vibrant**

- 3855 1911-D MS67 PCGS.** Despite having a significantly higher mintage (more than 11.2 million coins versus just 3.5 million), the 1911-D Barber dime is remarkably similar in rarity to its San Francisco counterpart in Gem and finer grades. PCGS has seen only 11 MS67 examples of the 1911-D, and eight so-graded examples of the 1911-S (1 in 67+), both with none finer (12/14). This piece displays vibrant, frosty luster beneath pastel shades of ice-blue, lemon-gold, mint-gray. The coin is attractive to the unaided eye, but when studied under a lens the eye appeal increases ten-fold, as the details are boldly struck and the surfaces are seemingly undisturbed. Even Liberty's face and neck are completely devoid of flaws. An important condition rarity and upper-end for the lofty grade. NGC ID# 23FK, PCGS# 4858

- 3856 1915-S MS66 NGC.** The 1915-S Barber dime had a marginally low mintage of only 960,000 pieces, and is scarce in Mint State. This high-end, Premium Gem representative displays radiant, satiny luster beneath a veil of light golden toning. The strike is bold, and there are no obtrusive abrasions. Census: 7 in 66, 5 finer (12/14).  
From *The Free Tilly Collection*. NGC ID# 23FX, PCGS# 4869

**PROOF BARBER DIMES**

**1893 Barber Dime, PR68  
Attractive Multicolor Toning**

- 3857 1893 PR68 PCGS.** Whereas the reverse is toned in dominant apricot-gray shades, the obverse is mostly brilliant with hints of champagne-gold and an arc of vibrant cobalt-blue at the right border. There is some modest cameo contrast on the obverse, and both sides are smooth from rim to rim. A sharp and unquestionably original example for the Superb proof type collector. Population: 2 in 68, 0 finer (12/14).  
Ex: *Long Beach Signature* (10/2000), lot 7420; *Long Beach Signature* (Heritage, 9/2002), lot 6302. NGC ID# 23G4, PCGS# 4877

**1893 Barber Dime, Superb Gem Cameo Proof  
A Second-Year Stunner**

- 3858 1893 PR67 Cameo NGC.** Enthusiasm for the Barber silver design faded quickly, as seen by the rapid fall in proof mintages between 1892 and 1893. This is an unusually well-preserved specimen of the latter year's dime issue with light dappled gold-to-gray patina over parts of the fields but strong contrast nonetheless. Census: 12 in 67 (3 in 67 ★), 7 finer (11/14). PCGS# 84877

- 3859 1896 PR66+ Cameo PCGS.** The profound cameo contrast creates immediate eye appeal. The motifs are fully struck and light coppery coloration adorns the reverse, while the obverse is essentially brilliant. A lovely, well-preserved proof with distraction-free surfaces. Population: 23 in 66 (6 in 66+), 8 finer (11/14). PCGS# 84880

**1897 Dime, PR67  
Generous Original Toning**

- 3860 1897 PR67 PCGS. CAC.** Extensively toned, this Superb Gem proof showcases hints of the contrast that appears on the best specimens of the time. Pale green-to-gold toning graces the obverse margins and interior reverse, while vivid blue and violet hues prevail over the rest of each side. Population: 18 in 67, 3 finer (12/14). NGC ID# 23GA, PCGS# 4881

**1897 Barber Dime, PR68 ★ Cameo  
Beautiful, Conditionally Rare Specimen**

- 3861 1897 PR68 ★ Cameo NGC. CAC.** An early proof issue in this turn-of-the-century dime series, the otherwise easily obtainable 1897 is not well-represented in today's market at the PR68 level of preservation. In addition to smooth, pristine surfaces, this untoned example possesses bold cameo contrast that only enhances the coin's exceptional eye appeal. There are no ill-defined features, and no mentionable disruptions to the silky-smooth sheen of this marvelous Superb Gem. The CAC endorsement is also a plus. Census: 5 in 68 (2 in 68 ★), 0 finer (12/14).  
*Ex: FUN Signature (Heritage, 1/2006), lot 1850, which realized \$6,670. PCGS# 84881*

- 3862 1900 PR67 NGC.** This beautiful and fully struck Superb Gem is lavishly toned in golden-brown, aquamarine, ruby-red, and straw-gold. A scant 912 proofs were struck; most survivors are in lesser grades and lack the dramatic patina of the present specimen. Census: 19 in 67 (1 in 67+, 1 in 67 ★), 6 finer (12/14). NGC ID# 23GD, PCGS# 4884

**1900 Dime, PR67 Cameo  
Needle-Sharp, Frosty Motifs**

- 3863 1900 PR67 Cameo NGC.** A tack-sharp, fully mirrored Superb Gem, this starkly contrasted Cameo is devoid of contact marks and any perceptible hairlines. Just a suggestion of light golden color precludes full brilliance, and the eye appeal is exceptional. The 1900 proof Barber dime had a substantial mintage for the period (912 proofs), and is an ideal choice for type representation. Census: 10 in 67, 4 finer (12/14). PCGS# 84884

**1901 Dime, Razor-Sharp PR67**

- 3864 1901 PR67 NGC.** Lushly patinated in ocean-blue, orange-gold, and rose-red. A razor-sharp Superb Gem with undisturbed fields and devices. A marvelous representative that will surely soon grace the cabinet of the toned silver connoisseur. Only 813 proofs were struck. Census: 14 in 67 (1 in 67 ★), 2 finer (12/14).  
*Ex: FUN Signature (Heritage, 1/2009), lot 2222. NGC ID# 23GE, PCGS# 4885*

- 3865 1901 PR66 Cameo NGC.** Though this turn-of-the-century issue has a high overall survival rate, surprisingly few Cameo specimens appear in the certified population. This spectacularly mirrored, minimally toned Premium Gem offers incredible contrast, particularly on the reverse. Census: 11 in 66 Cameo, 7 finer (12/14).  
*Ex: Long Beach Signature (Heritage, 5/2008), lot 156. PCGS# 84885*

**1904 Dime, Superb Gem Proof  
Elegantly Toned**

- 3866 1904 PR67 NGC.** With 670 proofs struck, the 1904 dime issue is defined by collector demand for the final proof Morgan dollars of the same year. This elegantly toned Superb Gem proof has rich blue-to-violet toning over much of each side with latent sea-green and peach elements. Census: 8 in 67 (2 in 67 ★), 2 finer (11/14). NGC ID# 23GH, PCGS# 4888

- 3867 1906 PR67 NGC.** Iridescent patina and deep luster complement each side of this piece, the obverse largely pinkish-gold with a bluish crescent, the reverse mostly mint-green. A thin mark runs from behind Liberty's eye across the floral headdress. Census: 19 in 67 (4 in 67 ★), 4 finer (12/14). NGC ID# 23GK, PCGS# 4890

**1907 Barber Dime, PR67+  
Vivid Multicolor Toning**

- 3868 1907 PR67+ NGC.** This high-end Superb Gem proof exhibits strong contrast between the mirrored fields and the frosty, razor-sharp devices, but deep multicolor toning over each side precludes a Cameo designation from NGC. The colors include fiery orange-gold and mint-green in the margins, surrounding deeper violet and ocean-blue hues in the centers. No contact marks are observed and any faint hairlines in the fields are masked by the rich patina. Census: 20 in 67 (3 in 67+, 1 in 67 ★), 1 finer (12/14). NGC ID# 23GM, PCGS# 4891

- 3869 1910 PR67 NGC.** A deeply mirrored example of this popular, late-date proof Barber dime. While 551 proofs were struck, only 27 pieces have been certified by both services at the PR67 level plus another seven finer. The obverse and reverse of this piece are quite different in appearance. The obverse has rich reddish patina in the center with deep blue around the margin. The reverse, on the other hand, is almost completely brilliant with just a hint of peripheral golden-brown. A seemingly flawless Superb proof dime. Census: 14 in 67, 4 finer (12/14).

*Ex: Long Beach Signature (Heritage, 5/2008), lot 163; Long Beach Signature, Heritage, 9/2008), lot 1731; Houston Signature (Heritage, 12/2008), lot 1158; Long Beach Signature, Heritage, 2/2009), lot 981. NGC ID# 23GR, PCGS# 4894*

1910 Dime, Patinated PR67

- 3870 1910 PR67 PCGS. CAC.** Unusual but attractive patina on this Superb Gem proof dime appears as streaks of gold, pink, green, blue-gray, and heather, all intermingled on sharply struck surfaces that show no sign of contact. Good luster and contrast are present, despite the intense color. Population: 13 in 67, 3 finer (12/14). NGC ID# 23GR, PCGS# 4894

1911 Dime, PR67 Cameo  
Exceptional Quality in So Many Ways

- 3871 1911 PR67 Cameo PCGS. CAC.** This upper-end proof has appeal from several directions at once. The fields are extraordinarily deep with frosted devices set against them. Then there is the toning that is in wide swath on the left side of the obverse with a brilliant right side, the reverse is monochromatic light blue. Simply amazing quality and sure to bring a premium for a high-grade type set. Population: 5 in 67, 3 finer (12/14). PCGS# 84895

- 3872 1912 PR66 Cameo NGC. Ex:** Childs/Hugon. Pastel tan freckles visit the obverse border, but this prominently mirrored specimen is otherwise brilliant. The white-on-black contrast is formidable. *Ex: Purchased from the Mint by C.F. Childs; Walter H. Childs Collection (Bowers and Merena, 8/1999), lot 231; John C. Hugon Collection (Heritage, 1/2005), lot 4096; Long Beach Signature (Heritage, 9/2005), lot 2478. From The Free Tilly Collection. PCGS# 84896*

1914 Barber Dime, Richly Toned PR67  
Lowest Proof Mintage of the Series

- 3873 1914 PR67 PCGS. CAC.** Lowest proof mintage of the series with only 425 pieces struck, the 1914 is always in demand by type collectors who want a coin with "something extra." This is a deeply reflective proof that is covered with several layers of rich blue, rose, and yellow toning. Problem-free, of course. Population: 10 in 67, 1 finer (12/14). NGC ID# 23GV, PCGS# 4898

1915 Dime, Multicolored PR67  
One of the Finest Known

- 3874 1915 PR67 NGC.** Only 450 proofs were struck of this late-date Barber dime, next to the lowest in the series. This is a lovely, brightly mirrored example with speckled, multicolored toning over the obverse, the reverse is more traditional with a rose center surrounded by deep blue at the margin. Census: 14 in 67 (1 in 67 ★), 0 finer (12/14). NGC ID# 23GW, PCGS# 4899

1915 Dime, PR67+ Cameo  
A Registry Collection Must

- 3875 1915 PR67+ Cameo PCGS. CAC.** The last proof Barber dimes (and indeed the last official proof dimes for two decades) were dated 1935 and bore the Barber design. This colorful and clearly contrasted coin has delightful soft-rainbow outer bands enveloping broad silver-white centers. The single finest PCGS-graded example. Population: 1 in 67 (1 in 67+), 0 finer (11/14). PCGS# 84899

MERCURY DIMES

- 3876 1916 MS67+ Full Bands PCGS. CAC.** Splashes of reddish-gold patina visit the lustrous surfaces of this high-end Superb Gem. Well struck throughout and impeccably preserved. NGC ID# 23GX, PCGS# 4905

1916 Mercury Dime, MS68 Full Bands  
None Numerically Finer

- 3877 1916 MS68 Full Bands NGC.** This magnificent first-year Mercury dime offers sharply detailed design elements throughout, with Full Bands definition on the fasces. The impeccably preserved brilliant surfaces radiate vibrant mint luster and show faint hints of pink and gold toning at certain angles. Eye appeal is incredible. Census: 14 in 68 (2 in 68 ★) Full Bands, 0 finer (11/14). *From The Free Tilly Collection. NGC ID# 23GX, PCGS# 4905*

---

1916-D Dime, VF35  
Pleasing Mid-Grade Example

**3878 1916-D VF35 NGC.** This key date dime shows even wear over the high points and generally problem-free surfaces. Both sides are light gray with an overlay of pale pinkish patina. The 1916-D is much in demand by date and mintmark collectors and a pleasing mid-grade coin such as this one will fit well into many sets. NGC ID# 23GY, PCGS# 4906

---

1916-D Mercury Dime, XF40  
Pleasing Collectible Example

**3879 1916-D XF40 PCGS.** This first-year key is typically only seen in well-circulated grades, with the occasional Mint State piece appearing at auction. XF and AU representatives are seldom offered. This piece shows just slight wear, with natural pewter-gray and golden hues over each side. The mintmark is clear and the central devices are well-defined. NGC ID# 23GY, PCGS# 4906

---

1916-D Dime, AU55  
A 'Dream Coin'

**3880 1916-D AU55 PCGS.** One of the defining key dates of many a young (and not-so-young!) collector's dreams, this 1916-D dime will make a dream come true for its next lucky owner. Silver-blue surfaces have excellent remaining luster despite light wear across the high points. A decently struck and decidedly appealing coin. NGC ID# 23GY, PCGS# 4906

---

1916-D Dime, Choice AU  
Popular Key Date

**3881 1916-D AU55 NGC.** Light silver-gray background patina contrasts against smoky charcoal-gray color seen on the central devices on each side. The light high-point wear is seen most clearly on the the forward edges of Liberty's wings and hair and the upper fascies on the reverse. Examples of the 1916-D from Very Fine to Choice AU are in intense demand, as there are never enough to go around. NGC ID# 23GY, PCGS# 4906

---

1916-D Mercury Dime, Appealing MS63

**3882 1916-D MS63 PCGS.** This is a coin with a lot of pizzazz for the grade, showing central bands on the reverse that fall short, by the barest of margins, of a Full Bands designation, but the strike is well brought up throughout, including on the band diagonals, the letter tops, and all the details in Liberty's winged headdress. Appealing patina includes mostly untuned silver areas contrasting against blue, green, and russet hues outlining the devices front and back. This coin would be a super acquisition to provide the capstone to a fine compete set of Mercury dimes. Population: 19 in 63, 14 finer (11/14). NGC ID# 23GY, PCGS# 4906

**1916-D Dime, AU58 Full Bands**  
**Just the Slightest Bit of Friction Evident**

**3883 1916-D AU58 Full Bands PCGS.** The 1916-D Mercury dime is by far the series key, due both to its initial low mintage of 264,000 pieces and also because most survivors circulated rather heavily. Of course, there were a few original rolls at one time that likely survived through serendipity, explaining the few Mint State pieces that exist today. Examples grading from AG to VG are ubiquitous at most coin shows, although even pieces in Good condition command several hundred dollars. It is in the grade range from Very Fine through AU, however — particularly the upper end of that range — where the shortage of nice 1916-Ds is most acute. Many collectors who are working on mostly Mint State sets will opt for an XF or AU 1916-D over the hefty cost of a Mint State example, and such coins can be extremely appealing aesthetically, as well.

This piece has the best of all possible worlds for a collector of high-end circulated dimes. Just the slightest hint of friction is evident and the bands are still complete. Even gray-rose toning covers each side with strong underlying mint luster. NGC ID# 23GY, PCGS# 4907

**1916-S Mercury Dime, MS67 Full Bands**  
**Boldly Struck, Beautifully Toned**

**3884 1916-S MS67 Full Bands PCGS. CAC.** Among the finest 1916-S dimes extant, this Superb Gem is tied with just 19 other Full Bands coins at the top of the PCGS population chart (12/14). The strike is bold on the horizontal and diagonal bands, as well as Liberty's hair curls, and border legends show none of the weakness that often affects the peripheral regions. Broad, squared rims encircle vivid cherry-red, sun-gold, and olive toning in the margins, while the centers show lightly mottled golden-gray and lavender hues. An eye-catching coin and one of unsurpassed technical quality. NGC ID# 23GZ, PCGS# 4909

**1917-D Dime, MS65 Full Bands**  
**Scarce and Overlooked Second-Year Issue**

**3885 1917-D MS65 Full Bands PCGS.** The 1917-D is quite scarce in Mint State, and is very much underrated in relation to its D-mint predecessor. This sharply struck Gem has variegated green, orange, crimson, purple and gray toning, and there are no obvious surface marks on either side. A splendid example of this early Mercury dime issue. Population: 42 in 65 Full Bands, 10 finer (11/14). Ex: *November Signature* (Heritage, 11/2003), lot 6056. NGC ID# 23H3, PCGS# 4913

**1917-D Dime, MS65 Full Bands**  
**Scarce Early D-Mint, Nicely Toned**

**3886 1917-D MS65 Full Bands PCGS.** A challenging Denver issue, especially in higher grades, with only a few dozen Gem and better coins known. This is an exceptionally attractive example that exhibits subtle pinkish centers that are surrounded by lime-green and rose toward the margins. Bright mint luster shines beneath the layers of toning. A problem-free coin. Population: 42 in 65 Full Bands, 10 finer (12/14). NGC ID# 23H3, PCGS# 4913

- 3887 1918-D MS64 Full Bands PCGS.** The 1918-D is widely recognized as one of the scarcest D-mint Mercury dimes, and there is little dispute that at the Gem level it is the most challenging Denver dime with Full Bands. At the MS64 level, this piece represents an excellent value. Few abrasions appear, and the luster is bright and satiny. This brilliant piece, lightly tinged with gold, is upper-end for the grade, with most of the eye appeal of a Gem. Population: 78 in 64 (3 in 64+) Full Bands, 30 finer (12/14).  
*Ex: Long Beach Signature (Heritage, 6/2001), lot 8058. NGC ID# 23H6, PCGS# 4919*

**1918-D Dime, MS64+ Full Bands**  
**Frosty, Upper-End for the Grade**

- 3888 1918-D MS64+ Full Bands PCGS. CAC.** The 1918-D Mercury dime is available in the absolute sense, but Full Bands representatives are scarce in the finer Mint State grades. This Plus-graded Choice example shows frost-white luster that reveals only the most minute disruptions as it cartwheels around each side. Some minor softness is noted around portions of the extreme outer peripheral legends, but the central strike is sharp. PCGS has seen 30 numerically finer representatives (12/14). NGC ID# 23H6, PCGS# 4919

- 3889 1918-S MS66+ PCGS. CAC.** Diffuse gold and blue overtones, richer on the reverse, enhance the eye appeal of this MS66+ example. The reverse bands are flat, but otherwise this coin permits no significant quibbles. Population: 14 in 66 (2 in 66+), 1 finer (12/14). NGC ID# 23H7, PCGS# 4920

- 3890 1919 MS66 Full Bands PCGS.** Freckles of deep violet run over the lustrous surfaces of this Premium Gem. Sharply struck design elements and nicely preserved surfaces add up to great eye appeal. Population: 80 in 66 (3 in 66+) Full Bands, 14 finer (12/14). NGC ID# 23H8, PCGS# 4923

**1919-D Dime, Sharp MS64 Full Bands**

- 3891 1919-D MS64 Full Bands PCGS.** The frosty silver surfaces on this dime are accented with a diffuse but noticeable burgundy color on the upper portrait and the right obverse field. The sharp strike produces clear separation and definition on all fascies. A beautiful example of this strike rarity. Population: 74 in 64 (3 in 64+) Full Bands, 18 finer (12/14). NGC ID# 23H9, PCGS# 4925

**1921 Dime, MS65 Full Bands**  
**Frosty and Delicately Preserved**

- 3892 1921 MS65 Full Bands PCGS.** The allure of Full Bands 1921 Mercury dimes is heightened by the issue's status as a semikey overall. This Gem example displays bold definition on the horizontal and diagonal bands, and is awash in frosty, light golden luster. Close scrutiny with a loupe fails to reveal any significant abrasions. PCGS has certified 46 numerically finer Full Bands representatives (12/14). NGC ID# 23HE, PCGS# 4935

**1921 Mercury Dime, MS65 Full Bands**  
**Low-Mintage Key**

- 3893 1921 MS65 Full Bands PCGS. CAC.** A delightful Gem representative of this popular date, with well-detailed design elements that show Full Bands definition on the fascies. The well-preserved brilliant surfaces display vibrant mint luster throughout, with terrific eye appeal. Population: 70 in 65 (1 in 65+) Full Bands, 46 finer (12/14). NGC ID# 23HE, PCGS# 4935

**1921-D Dime, Challenging MS65 Full Bands**

- 3894 1921-D MS65 Full Bands PCGS.** From a low mintage of just over 1 million pieces, the 1921-D Mercury dime is a challenging issue in the series. The present coin is a lustrous Gem with delicate almond-gold and ice-blue toning. Well struck throughout. Housed in an old green label holder. Population: 63 in 65 Full Bands, 20 finer (12/14).  
*Ex: Long Beach Signature (Heritage, 5/2008), lot 193; Long Beach Signature (Heritage, 9/2010), lot 3827. NGC ID# 23HF, PCGS# 4937*

**3895 1923-S MS66 PCGS.** From a nominal mintage of 6.4 million pieces, few high-quality examples were saved by contemporary collectors. This well-detailed, brightly lustrous Premium Gem shows hints of greenish-gold, amber, and ice-blue toning, with no mentionable distractions. Population: 7 in 66, 0 finer (12/14). NGC ID# 23HH, PCGS# 4940

**3896 1923-S MS66 PCGS.** Sharply detailed in most areas, this delightful Premium Gem shows some blending of the central bands on the fasces. The well-preserved surfaces display shades of pale gold toning, with no mentionable distractions. Population: 7 in 66, 0 finer (12/14). NGC ID# 23HH, PCGS# 4940

---

**1925-D Dime, MS65 Full Bands  
Conditionally Scarce**

**3897 1925-D MS65 Full Bands PCGS.** Full Bands examples of this Denver issue are difficult to locate in Gem or finer condition. The present piece is lightly toned golden, with frosty underlying luster and delicately preserved surfaces. Both the horizontal and diagonal bands are sharply impressed. Population: 33 in 65 (1 in 65+) Full Bands, 30 finer (12/14). NGC ID# 23HN, PCGS# 4951

---

**1925-S Dime, MS65 Full Bands  
Boldly Struck Throughout**

**3898 1925-S MS65 Full Bands PCGS Secure.** The 1925-S is considered by many to be the most poorly made date in the Mercury dime series, plagued by heavy die polishing and a generally weak strike (Lange, 2005). The present Gem offering is a refreshing exception. A solid strike transcends fullness in the middle bands to include boldness on the diagonal bands and the peripheral reverse letters, elements that are often weak. Lustrous surfaces are covered with golden-brown, gray, olive, and sky-blue patina and are impeccably preserved. Population: 63 in 65 Full Bands, 23 finer (11/14). NGC ID# 23HP, PCGS# 4953

**3899 1926-S MS64 PCGS.** The 1926-S Mercury dime issue has a mintage not much larger than the more-famous keys of 1921 and 1921-D. This powder-gray piece is lightly tinged with gold and shows good eye appeal for the grade, although the central bands are not fully brought up. Population: 53 in 64, 27 finer (12/14). NGC ID# 23HT, PCGS# 4958

---

**1927-D Dime, MS66+  
Delicately Toned**

**3900 1927-D MS66+ PCGS. CAC.** Both sides of this branch-mint 1920s dime display well with faint hints of bluish patina over shining silver surfaces. The strike is incomplete on the reverse bands, yet the overall level of detail is pleasing and the 1927-D issue is seen seldom this fine. Population: 13 in 66 (1 in 66+), 0 finer (12/14). NGC ID# 23HV, PCGS# 4962

**3901 1928 MS67 Full Bands PCGS. CAC.** A fairly plentiful date with Full Bands definition, but conditionally rare at the MS67 grade level. This frosty, boldly struck representative shows traces of light golden color over seemingly pristine surfaces. Exceptional eye appeal. Population: 34 in 67 (2 in 67+) Full Bands, 1 finer (12/14). NGC ID# 23HX, PCGS# 4967

**3902 1928 MS67 Full Bands PCGS. CAC.** Even a relatively plentiful issue such as the 1928 dime, which saw more than 19 million pieces struck, becomes a condition rarity in high enough grade. This Full Bands Superb Gem fills the bill with shimmering, creamy luster that remains silver in the centers with green-gold and reddish-tan toning around. Population: 34 in 67 (2 in 67+) Full Bands, 1 finer (12/14). NGC ID# 23HX, PCGS# 4967

**3903 1928-D MS65 Full Bands PCGS.** This is a frosty, untuned silver-white Gem example of this conditional rarity, one seldom seen with the Full Bands designation. The surfaces are high-end and appealing, despite a bit of streaky gray toning in the reverse field. The strike is razor-sharp on the central bands and throughout both sides, save for the last 8 in the date. Population: 75 in 65 Full Bands, 22 finer (12/14). NGC ID# 23HY, PCGS# 4969

---

**1929 Mercury Dime, MS67+ Full Bands  
Tied for Finest Certified at PCGS**

- 3904 1929 MS67+ Full Bands PCGS. CAC.** The advanced Mercury dime collector will find much to love about this high-end Superb Gem. Both the horizontal and diagonal bands on the reverse are sharply delineated, and hair curls and cap wings on the observed exhibit bold definition. Close examination fails to reveal any grade-limiting abrasions, while the frosty cartwheel luster shows just a blush of pale iridescent pastel color. Population: 84 in 67 (5 in 67+) Full Bands, 0 finer (11/14). NGC ID# 23J2, PCGS# 4973

---

**1929-S Dime, MS67 Full Bands  
Gorgeous Toning and Luster**

- 3905 1929-S MS67 Full Bands PCGS. CAC.** More than just a Registry-attention-getting numeric grade, this Full Bands Superb Gem 1929-S dime has powerhouse eye appeal. Vibrant luster shines through a mix of peach and blue-violet hues with a broad area of pearl-gray at Liberty's face and wings. Population: 42 in 67 Full Bands, 0 finer (11/14). NGC ID# 23J4, PCGS# 4977

---

**1930-S Dime, MS67+ Full Bands  
One of Two Top Registry Pieces**

- 3906 1930-S MS67+ Full Bands PCGS. CAC.** The 1930-S dime comes from an era where the Mint prized economy over quality in its coins, and on many examples this attitude shows. This MS67+ Full Bands example is a notable exception, not least for the clear and deep line between the central bands on the fasces. Broad and bright luster has a silver-blue cast through much of the centers with reddish-orange fire dappling the margins, the colors a touch deeper on the obverse where mahogany is intermixed on the left. A remarkable coin for the Registry collector. Population: 14 in 67 (2 in 67+) Full Bands, 0 finer (11/14).  
*From The College Collection.* NGC ID# 23J6, PCGS# 4981

- 3907 1931-D MS67 Full Bands PCGS. CAC.** A boldly struck, frosty example of this conditionally elusive Denver issue. Diagonal ribbons of pale tan-gold toning stretch across the obverse, accented by the occasional blue and amber hue, while the reverse is more mottled in pastel shades of orange-gold, lemon, and lime-green.  
*From The College Collection.* NGC ID# 23J8, PCGS# 4985

- 3908 1935-S MS67+ Full Bands PCGS.** A dazzling, frosty Superb Gem, this Full Bands 1935-S dime is boldly struck and in a seemingly perfect state of preservation. Just a suggestion of light golden color accents each side, complementing the already superior eye appeal. Population: 98 in 67 (3 in 67+) Full Bands, 1 finer (12/14). NGC ID# 23JE, PCGS# 4997
- 3909 1939-D MS68 Full Bands PCGS. CAC.** Lime-green, orange, and reddish patina run over the lustrous surfaces of this boldly struck dime. Immaculately preserved throughout.  
*From The College Collection.* NGC ID# 23JS, PCGS# 5019
- 3910 1939-D MS68 Full Bands PCGS. CAC.** The visual appeal of the present MS68 example is arguably unrivaled by that of any other representative of this issue. Deeply frosted luster showcases seemingly pristine surfaces and razor-sharp devices. The obverse is awash in vivid sun-gold, crimson, forest-green, and subtle amber toning, while the reverse is largely a pale champagne hue with occasional splashes of olive, amber, and sky-blue. A truly superb coin from both a technical and aesthetic viewpoint. Only 16 coins are numerically finer at PCGS (12/14). NGC ID# 23JS, PCGS# 5019
- 3911 1941-D MS68 Full Bands PCGS.** A remarkable specimen with radiant luster and brilliant, flawlessly preserved surfaces. Just the faintest traces of gold color are detected near the peripheries. A splendid example of this late Denver mint Mercury dime. Population: 25 in 68 Full Bands, 0 finer (11/14). NGC ID# 23JY, PCGS# 5031

**1942/1 Mercury Dime, MS62  
Speckled Multicolored Toning**

- 3912 1942/1 FS-101 MS62 NGC.** Both the 1942/1 and 1942/1-D overdate Mercury dimes are rated as a 5, the highest level, for interest and liquidity by the *Cherrypickers' Guide*. Translated for those who lack the secret handshake, this means that collectors avidly seek examples of each variety and will pay readily for nice specimens, particularly in the Mint State grades where they become quite elusive. The Philadelphia overdate, in particular, is seldom seen in Mint State with Full Bands. This is a surprising result, given that some 205 million-plus examples were made of the 1942 Philadelphia dime. The surfaces on this piece are bright with speckled multicolored patina. The underdigit is strong, as always. Census: 33 in 62, 38 finer (11/14). PCGS# 145473 Base PCGS# 5036

- 3913 1942/1 FS-101 AU55 Full Bands PCGS.** Straw-gold and steel-blue patina endows this satiny and sharply struck overdated dime. A trace of friction on the bands denies a higher grade. There are no remotely relevant marks. PCGS# 145474 Base PCGS# 5037
- 3914 1942/1-D FS-101 AU58 NGC.** This popular 20th century overdate has a hint of wear on the highpoints, and retains partial mint luster. Silver-gray surfaces display undertones of ice-blue and beige patina.  
*Ex: Long Beach Signature (Heritage, 6/2005), lot 5912.* PCGS# 145475 Base PCGS# 5040
- 3915 1942-S Inverted Mintmark, FS-501, MS65 PCGS.** The mintmark is inverted on this rare *Cherrypickers* variety, with the more oval shaped lower loop of the S in the top position. The design elements are sharply detailed throughout, with Full Bands definition and vibrant mint luster. Population: 1 in 65, 0 finer (12/14). PCGS# 511113 Base PCGS# 5042
- 3916 1945-S MS67+ Full Bands PCGS. CAC.** Vibrant, frosty luster underlies splashes of iridescent sun-gold, aquamarine, and translucent violet on each side, with any faint surface marks fully hidden by the eye-catching patina. PCGS has certified only four numerically finer representatives (12/14). NGC ID# 23KG, PCGS# 5061

**1945-S Dime, MS67 Full Bands  
Popular Micro S Variety**

- 3917 1945-S Micro S, FS-512, MS67 Full Bands PCGS.** This *Guide Book* variety has proven quite popular, especially in the finer Mint State grades, where it is scarce. The mintmark punch is distinct, but tiny, the only known use of this punch style during the 1940s. This Superb Gem Full Bands representative is boldly struck, with vibrant, frosty luster. The reverse displays just a touch of golden color around the periphery, while the obverse is more deeply toned in pine-green, gold, and pale lavender hues. Population: 31 in 67 (1 in 67+) Full Bands, 2 finer (12/14). PCGS# 145415 Base PCGS# 5063

## PROOF MERCURY DIMES

### 1936 PR67 Mercury Dime First Year of the Modern Proofs

- 3918 1936 PR67 NGC.** A razor-sharp impression of this coin, important because it is the first year of the modern proof issues. This example is essentially perfect, with no hairlines or contact marks whatsoever. Toned in an iridescent purple-rose color on the obverse, with golden-orange hints near the lower border area, while the reverse displays creamy pastel shadings. Highly recommended to the discriminating collector of this series. Census: 91 in 67, 2 finer (11/14).  
*Ex: Long Beach Signature (Heritage, 9/2005), lot 2573.*  
*From The Free Tilly Collection.* NGC ID# 27DG, PCGS# 5071

### 1937 Dime, Stunning PR68+ Quicksilver Appearance

- 3919 1937 PR68+ PCGS Secure. CAC.** This is a visually stunning coin with a quicksilver appearance, one that gives new meaning to the term "Mercury dime." The surfaces show little contrast and are untuned in the center, surrounded by a thin ring of the palest rainbow iridescence on each side. A fully struck feast for the eyes and apparently the sole finest at PCGS. Population: 29 in 68 (1 in 68+), 0 finer (12/14). NGC ID# 27DH, PCGS# 5072
- 3920 1938 PR68 NGC.** Peripheral multicolored toning and razor-sharp devices stand out on this proof. Immaculately preserved as might be expected of the grade. Census: 43 in 68 (4 in 68 ★), 1 finer (12/14). NGC ID# 27DJ, PCGS# 5073
- 3921 1940 PR68 ★ NGC.** This beautiful proof Mercury has pale yellow centers with thin bands of deep iridescence around the margins. Bright, reflective fields and highly attractive. Census: 45 in 68 (5 in 68 ★), 2 finer (12/14).  
*From The Free Tilly Collection.* NGC ID# 27DL, PCGS# 5075

### 1941 Mercury Dime, PR68 None Certified Numerically Finer

- 3922 1941 PR68 PCGS.** Proof 1941 dimes are usually obtainable, but pieces grading as high as the PR68 level are distinct rarities. This example is boldly struck, with deeply reflective fields that showcase tinges of sun-gold toning around the peripheries. No marks or discernable hairlines are present. Population: 21 in 68, 0 finer (12/14). NGC ID# 27DM, PCGS# 5076
- 3923 1941 PR68 ★ NGC.** A beautifully patinated Superb Gem proof, this piece displays brilliant centers, with concentric bands of midnight-lavender, sun-gold, ruby-red, and pine-green toning on both sides. The strike is full, complementing deeply mirrored fields. Census: 58 in 68 (11 in 68 ★), 0 finer (12/14).  
*From The Free Tilly Collection.* NGC ID# 27DM, PCGS# 5076
- 3924 1942 PR68 PCGS. CAC.** *Ex: Simpson.* A stunningly toned final-year proof Mercury dime with pale blue inner toning and reddish-orange peripheral color as a ring on the obverse and patches on the reverse. Excellent detail and eye appeal. Population: 59 in 68 (2 in 68+), 0 finer (11/14).  
*From The Free Tilly Collection.* NGC ID# 27DN, PCGS# 5077

## ROOSEVELT DIMES

### 1946-S Dime, MS68 Full Bands Among the Finest Certified

**3925 1946-S MS68 Full Bands PCGS.** Trumpet Tail S. This radiant Registry-quality Superb Gem is tied with just eight others as the finest certified at PCGS (11/14). The strike is bold, yielding to pale golden and amber-gray hues in the centers, while the peripheries exhibit more vivid multicolor toning. A beautifully preserved and important piece for the advanced Registry Set competitor. NGC ID# 23KL, PCGS# 85084

**3926 1953 MS67 Full Bands PCGS.** This frosty Superb Gem 1953 dime shows full separation on the both pairs of fasces bands on the reverse. The surfaces are largely silver-white but show occasional glimpses of gold and pinkish-gray patina. Population: 6 in 67 Full Bands, 1 finer (12/14). NGC ID# 23L8, PCGS# 85103

**3927 1957-D MS68 ★ Full Bands NGC.** A bold strike and exceptional surface preservation are among the pleasing attributes this high-end Superb Gem possesses, though the true appeal lies in the rich toning; the reverse showcases concentric rings of copper-red, olive-gold, lime-green, royal-blue, violet, and golden-orange toning around a pale gray center, while the obverse shows tinges of olive and turquoise around the dusky gray center. This Registry-quality piece is tied with just two others as the finest certified (12/14). NGC ID# 23LL, PCGS# 85115

**3928 1960-D MS67+ Full Bands PCGS.** Exceptional, deep toning is seen over each side of this near-perfectly preserved dime. Strong mint luster enhances the color. Population: 29 in 67 (4 in 67+) Full Bands, 0 finer (12/14). NGC ID# 23LT, PCGS# 85121

**3929 1961 MS67 Full Bands PCGS.** The 1961 Roosevelt dime issue is a notable strike rarity, seldom seen at the Superb Gem Full Bands level. This frosty example is silver-white with light pinkish-gold accents on the reverse and full separation on both pairs of bands. Population: 8 in 67 (1 in 67+) Full Bands, 0 finer (12/14). NGC ID# 23LU, PCGS# 85122

## PROOF ROOSEVELT DIME

### 1950 Dime, PR68 Deep Cameo One of the Three Finest at PCGS

**3930 1950 PR68 Deep Cameo PCGS.** This year saw the first proof of the Roosevelt dime series, and is the lowest-production of the series with just a little over 51,000 pieces. The issues of 1950 also marked the beginning of the modern frosted proof era. With more than 2,800 examples seen by PCGS and NGC, 1950 dime proofs can be located without too much trouble. The two services have graded only 32 Deep/Ultra Cameo coins, however, seven PR68s being the finest seen.

Frosty devices stand out against the deeply mirrored fields, and the design elements are sharply impressed. This immaculately preserved coin is seldom seen this nice. A fantastic find for the Roosevelt dime specialist. Population: 3 in 68, 0 finer (11/14). PCGS# 95225

*End of Session One*

## SESSION THREE

### TWENTY CENT PIECE

1876 Twenty Cent, MS65  
Lustrous, Appealing Representative

- 4513** 1876 MS65 NGC. BF-2, R.2. The 1876 is a sought-after issue in business strike format, as only 14,600 were struck and the date is proportionately elusive in high grades. This Gem example is deeply satiny, with unblemished surfaces that display just a touch of light golden tone. A bold strike produces strong eye appeal. Census: 36 in 65, 20 finer (11/14).  
*From The A. James Evans Collection, Part II. NGC ID# 23R8, PCGS# 5299*

### PROOF TWENTY CENT PIECES

1875 Twenty Cent Piece, Brilliant PR64  
First Year of Issue

- 4514** 1875 PR64 PCGS. First year of this four-year type, the surfaces are brilliant throughout with a slight cameo contrast seen against the frosted devices. The devices are fully struck in all areas, even the top of the eagle's left (facing) wingtip. Population: 63 in 64, 32 finer (12/14).  
*Ex: Central States Signature (Heritage, 4/2001), lot 6364. NGC ID# 27GZ, PCGS# 5303*

1876 Twenty Cent Piece, PR64  
Well-Preserved Example

- 4515** 1876 PR64 PCGS. The public did not embrace the twenty cent piece, but numismatists did, and the Mint executed proof strikes during each year of the denomination. Still, many collectors did not carefully save their "double dimes," and over two-thirds of the proof population falls at the PR63 level or lower. Population: 84 in 64, 35 finer (12/14). NGC ID# 27H3, PCGS# 5304

1877 Twenty Cent Piece, PR64  
Lowest-Mintage Proof in the Series

- 4516** 1877 PR64 PCGS. A set of proof twenty cent pieces comprises only four dates, and the present coin, with the lowest mintage among the proofs, is an enterprising start. The central devices boldly emerge from mirrored fields, and blemishes are minimal save for a hidden mark within Liberty's gown at the left (facing) knee. PCGS Population: 58 in 64, 39 finer (12/14). NGC ID# 27H4, PCGS# 5305

1878 Twenty Cent Piece, PR64  
Final Proof-Only Mintage

- 4517** 1878 PR64 PCGS. Only 600 proof twenty cent pieces were struck in 1878, the final year of the denomination. This attractive Choice example offers sharply detailed design elements and reflective fields under shades of powder-blue and lavender toning. Housed in a green label holder. PCGS has graded 39 numerically finer examples (11/14). NGC ID# 27H5, PCGS# 5306

## EARLY QUARTERS

### 1796 Quarter, VG Sharpness Better B-1 Variety

- 4518 1796 B-1, R.4 — Damage — PCGS Genuine. VG Details.** The rarer of the two die marriages known for this challenging type coin. 1796 is the only quarter date with a Small Eagle design, and ranks as one of the most desirable silver types, along with its half dollar counterpart. Deeply iridescent lavender-red, apple-green, and powder-blue patina blanket the present example. The peripheral stars and letters are mostly bold though UNI and the top of OF have faded. Designated by PCGS as Damage, but collectors may decide that the abrasions near the 17 in the date, along with a few other scattered tiny digs, are acceptable for the VG level. PCGS# 38919 Base PCGS# 5310

### 1796 B-2 Quarter, A Decent AG3

- 4519 1796 B-2, R.3, AG3 PCGS.** The high 6 in the date almost touching the bust and the space between the TY in LIBERTY confirm the variety. While the reverse is well worn with the left part of the design elements worn smooth, the obverse displays some Good characteristics, such as parts of the eye, ear and neck curl, as well as the stars, date, and LIBERTY. The light- to medium-gray surfaces are quite clean for a coin having seen heavy circulation. As such, this is a nice lower-grade specimen for the type collector on a limited budget. PCGS# 38920 Base PCGS# 5310

### 1796 B-2 Quarter, VF Details A Key Design Type for a Type Set

- 4520 1796 B-2, R.3 — Repaired — PCGS Genuine. VF Details.** The 6 in the date is high, the T and Y in LIBERTY do not touch (but happen to be connected by a die crack), and the last star is distant from the bust. Extensive smoothing is visible in the fields over both sides and parts of Liberty's figure have been re-worked. The reverse fields in between the letters have also been worked, most obviously between STATES OF and below the bow knot. Some interesting die cracks are seen in the upper-right obverse quadrant. The impairments aside, the 1796 quarter is necessary to complete an advanced type set. PCGS# 38920 Base PCGS# 5310

### 1804 B-1 Quarter, Good 4 Unblemished Collector Coin

- 4521 1804 B-1, R.3, Good 4 PCGS.** Tompkins Die State 1/1. The obverse border is blue-green, and the lower right reverse displays tan-brown, but most of this early quarter is stone-gray. The peripheral legends are bold except for ERICA. There are no consequential marks. Bullion depositors usually preferred payment in silver dollars, which explains the low mintage and rarity of the 1796 and 1804 quarters. PCGS# 38921 Base PCGS# 5312

### 1804 B-1 Quarter, Good 4 Problem-Free Surfaces

- 4522 1804 B-1, R.3, Good 4 PCGS.** Tompkins Die State 2/2. The die scratch near obverse star 9 confirms the Browning marriage. A walnut-brown and cream-gray example of the very scarce introductory Heraldic Eagle date. The date is bold, as is LIBERTY and the stars. STATES OF is equally sharp, but UNITED and AMERICA are well-worn. No abrasions are consequential. PCGS# 38921 Base PCGS# 5312

### 1804 Quarter, B-1, VG8 Original Two-Tone Patina

- 4523 1804 B-1, R.3, VG8 PCGS.** Tompkins Die State 2/2, with heavy clash marks on both sides, but no evidence of die cracks. The 1804 quarter is an elusive issue with a mintage of only 6,738 pieces, and is widely popular in all grades. This well-worn circulation cameo displays deep gunmetal blue and gray hues in the recesses, while the relief elements display lighter pewter-gray colors. Pleasing detail remains for the grade. The obverse rim is complete, though the reverse denticles grow weak from 3 to 8 o'clock. Overall, an excellent lower-grade example of this key Draped Bust issue. PCGS# 38921 Base PCGS# 5312

**1804 B-1 Quarter, VG10  
Problem-Free, Nicely Defined**

- 4524** 1804 B-1, R.3, VG10 PCGS. CAC. Tompkins Die State 2/2. Deep walnut-brown, powder-blue, and lavender toning blankets this unblemished and impressive key date quarter. The shield lines are separated, and the final nine letters in E PLURIBUS UNUM are clear. Liberty's eye and ear are well defined. Certain to command attention from floor bidders. PCGS# 38921 Base PCGS# 5312

**1805 Quarter, Choice XF  
Better Browning-4 Variety**

- 4525** 1805 B-4, Low R.4, XF45 NGC. CAC. The 5 in 25 overlaps the fletchings, and the nearby C touches the tail feathers. Defective punches, missing the left foot, were used for the T in LIBERTY and the 1 in the date. Such mint blunders increase the appeal of early silver coinage. This scarce variety Draped Bust quarter is refreshingly unabraded and deeply toned sea-green and steel-blue. Ex: Eric P. Newman Numismatic Education Society; Newman Collection Part II (Heritage, 11/2013), lot 33166. PCGS# 38926 Base PCGS# 5313

**1805 Quarter, Rare B-5 Variety, Fine 12**

- 4526** 1805 B-5, High R.5, Fine 12 PCGS. The tip of the 5's flag just touches the bust, and a hair curl is under the left side of E. The reverse shows a missing dentil above the I in AMERICA, together attributing this rare Browning-5 die marriage. The high points of each side are cream-gray with pale mint and copper-orange color around the margins. This piece shows scattered minor marks but the only mentionable one is a scrape in the right reverse field passing through the top pair of olive leaves. PCGS# 38927 Base PCGS# 5313

**1806/5 B-1 Quarter, XF40  
Popular Overdate Variety**

- 4527** 1806/5 B-1, R.2, XF40 PCGS. Tompkins Die State 2/3. The usual clashed and cracked die state. Glimpses of luster fill the legends and curls of this attractive better-grade early quarter. Free from any remotely distracting contact. B-1 is the sole 1806 overdate variety, and displays an obvious underdigit. PCGS# 38938 Base PCGS# 5315

**1806/5 Browning-1 Quarter, XF40  
Obviously Appealing Overdate**

- 4528** 1806/5 B-1, R.2, XF40 NGC. Glimpses of silver luster remain among Liberty's hair strands, making this album-toned, boldly overdated quarter a connoisseur's delight. Any signs of die clashing are softened by wear, as are the few expected abrasions from circulation. A small mark above the 8 of the date is mentioned for accuracy, but all the focus will be on this coin's original appeal with ocean-blue and sea-green highlights at the borders. Census: 7 in 40, 33 finer (12/14). PCGS# 38938 Base PCGS# 5315

**1806/5 Bust Quarter, AU Sharpness  
Browning-1, Bold Overdate**

- 4529** 1806/5 — Repaired — B-1, R.2, PCGS Genuine. AU Details. Struck from a repunched 1805 die, the overdate is bold on this sharply struck example. Iridescent toning with olive-green, orange-gold, and blue shades cover both sides of the coin, covering up some old tooling that is visible with a glass around the date area and obverse margins — perhaps to remove evidence of a rusted die or to remove some other imperfection. The reverse appears to be original. Considerable appeal remains despite the unfortunate handiwork. PCGS# 38938 Base PCGS# 5315

- 4530** 1806 B-5, High R.4, VF30 PCGS. Tompkins Die State 4/5. The cracks are advanced but no cud is above the Y in LIBERTY. A very scarce die marriage. Richly toned sea-green and caramel-gold. Smooth aside from a couple of hair-thin vertical marks on the portrait. Certified in an old green label holder. PCGS# 38931 Base PCGS# 5314

**1806 Quarter, Choice AU  
Very Scarce Browning-7**

- 4531** 1806 B-7, R.5, AU55 PCGS. Tompkins Die State 1/4. Jade-green and autumn-bold fills the borders of this better variety early quarter. Ample glimmers of luster illuminate the motifs. A cursory glance fails to locate any marks, though inspection beneath a lens reveals myriad tiny marks throughout the left and right obverse field. PCGS# 38933 Base PCGS# 5314

**1807 B-1 Quarter, XF40  
Even Charcoal-Gray Toning**

- 4532** 1807 B-1, R.2, XF40 NGC. A charcoal-gray early type coin with pleasing sharpness and an original, undipped appearance. Only lightly abraded aside from a pair of minor marks west of the date. Liberty's hair has a small gray spot, and minor flaking is noted on the field below the ribbon. The more available of just two die varieties for the final Draped Bust date. PCGS# 38939 Base PCGS# 5316

**BUST QUARTERS**

**1815 B-1 Quarter, AU58  
Virtually Mint State**

- 4533** 1815 B-1, R.1, AU58 PCGS. CAC. No one would quibble with a grade that is two or three points higher for this attractive, near-Mint quarter. Abundant luster remains. A bold strike shows just slight weakness on Liberty's forecurl and on the talons, but nearly imperceptible wear on the high points. A few scattered marks do not detract from the impressive eye appeal, with rich, amber-gold toning at the margins and glowing silver centers. CAC endorsed for its notable quality. Population: 5 in 58, 43 finer (11/14). From *The Millford Collection, Part II*. PCGS# 38942 Base PCGS# 5321

**1818/5 B-1 Quarter, Near-Mint**

- 4534** 1818/5 B-1, R.2, AU58 NGC. Medium straw-gold toning visits partially lustrous Borderline Uncirculated example. The strike is sharp at the borders, although the curls and Liberty's neck show softness. No marks are remotely consequential, and the eye appeal is superior for the designated grade. PCGS# 38953 Base PCGS# 5323

**1818 Quarter, VF30  
Rare B-9 Die Marriage**

- 4535** 1818 B-9, High R.5, VF30 NGC. CAC. This is a late die state example of this rare variety, with a bold crack from the rim near the N in UNITED to the eagle's wing, and sharp clash marks above Liberty's head. This piece is lightly circulated, with pale pewter-gray centers that yield to deeper olive, amber, and sun-gold toning around the margins. The borders are strong, with no evidence of adjustment marks. PCGS# 38950 Base PCGS# 5322

**1818 B-10 Quarter, Near-Mint  
Better Browning Marriage**

- 4536** 1818 B-10, R.3, AU58 PCGS. CAC. A lightly toned and moderately prooflike Borderline Uncirculated example. Crisply struck and attractive with relatively minor field marks near the chin, beak, and star 9. Luster illuminates the borders and motifs. A conditionally rare variety seldom offered this close to Mint State. PCGS# 38951 Base PCGS# 5322

1820 Quarter, Choice AU  
Small O, B-4

- 4537 1820 Small O, B-4, R.2, AU55 PCGS. CAC. The obverse field and portrait are stone-gray, but the remainder of this lightly circulated Capped Bust type coin is green-gold. Luster dominates the margins and devices, and abrasions are minor aside from a cluster of small marks beneath the right scroll end. The curls and claws display moderate inexactness of strike. PCGS# 38958 Base PCGS# 5328

1824/2 B-1 Quarter, XF40  
Problem-Free, Solidly Original Example

- 4538 1824/2 B-1, R.3, XF40 NGC. Perfect rims and virtually mark-free surfaces make this mid-grade Capped Bust quarter an outstanding selection for any circulated set. Gunmetal-gray surfaces display attractive, slightly lighter old-silver patina on the motifs. The fields and devices show only honest wear and solid detail for the XF level. A splendid example of a popular 1820s date in the series. Census: 4 in 40, 21 finer (12/14). PCGS# 38972 Base PCGS# 5335

1825/4 Quarter, MS62  
B-2, Richly Toned, High-End Example

- 4539 1825/4(2) B-2, R.2, MS62 PCGS. Lovely light original toning in hues of aquamarine and azure covers the lustrous surfaces, with gold-amber peripheries. Fairly well-struck, with all star centers well defined and Liberty's hair curls sculpted, but a bit of strike bluntness shows on the eagle's wingtips. The grade would be higher except for a light scrape from star 4 upward to the Liberty cap, while a second light scrape is noted to the right of the date. Still high-end in appearance, and an affordable example of this popular type. Ex: *Central States Signature* (Heritage, 4/2006), lot 1477. PCGS# 38975 Base PCGS# 5336

1825/4/2 Quarter, B-2, MS63  
Frosty and Brilliant

- 4540 1825/4/2 B-2, R.2, MS63 NGC. This variety, in the past, has been called everything from 1825/3 to 1825/2 to 1825/4, but modern research by specialists in the series have suggested that all 1825 quarters were struck from dies that exhibit an 1825/4/2 overdate. B-2 is the most plentiful of the three known varieties, ideal for the casual date collector. This piece is nearly devoid of color, with frosty luster that exhibits only minute disruptions. The strike is sharp, but with a slight clockwise die rotation. PCGS# 38975 Base PCGS# 5336

1825/4/(2) Quarter, B-2, MS63  
Blended Original Toning

- 4541 1825/4/(2) B-2, R.2, MS63 NGC. A moderately available *Guide Book* variety, with the 8 in the date recut and the 5 apparently punched over an underlying 4. This Select Mint State example is well-struck, with blended olive, pale amber, and golden-gray hues. The surfaces are smooth, with no obtrusive abrasions — only a few minor marks on the cheek are noted. Soft luster resides beneath the patina, but is slightly muted by the rich overlay. PCGS# 38975 Base PCGS# 5336

- 4542 1825/4/(2) B-3, R.3, AU53 PCGS. Sea-green, stone-gray, and gunmetal toning encompass this lightly circulated and problem-free Bust quarter. The underdigit 4 is readily observed, and traces of a 2 also emerge beneath a lens. PCGS# 38973 Base PCGS# 5336

1828 B-1 Bust Quarter, Lightly Toned MS64

- 4543 1828 B-1, R.1, MS64 NGC. The last 8 well right under Liberty's lowest curl on the obverse, and the 25 high on the reverse with curl base 2, aid in attributing this available die pairing. This near-Gem would make an excellent coin to represent the Capped Bust type, given its glowing luster over lightly toned golden-pink surfaces accented with glints of iridescent color around the device outlines, a completely original and appealing look. PCGS# 38976 Base PCGS# 5342

1828 Quarter, AU Details  
B-3, 25 Over 50C

- 4544** 1828 25 Over 50C, B-3, R.5 — Cleaning — PCGS Genuine. AU Details. A popular *Guide Book* variety, with the errant 50 plainly visible beneath the primary 25 on the lower reverse. PCGS notes signs of cleaning on this example, but a thick overlay of gunmetal-blue and golden-gray toning gives the surfaces a pleasing, deeply toned appearance. The strike is sharp and strong detail remains. PCGS# 38979 Base PCGS# 5343

1828 Quarter, B-4, MS63  
Beautiful Prooflike Fields

- 4545** 1828 B-4, R.3, MS63 NGC. A slightly scarcer variety, particularly in Mint State. This representative is about as visually appealing as a Select Mint State coin can get. The stars and central devices are sharply struck, and the fields exhibit remarkable prooflike mirroring. Original sun-gold, aquamarine, and lavender-gray hues encompass each side, being fully revealed when tilted beneath a light. Tiny, scattered ticks are observed with a lens, but the eye appeal is hardly affected. PCGS# 38978 Base PCGS# 5342

- 4546** 1831 Small Letters, B-2, R.2, MS62 NGC. Die cracks across the reverse periphery aid the attribution of this satiny and well struck quarter. Dusky gunmetal-gray centers are bounded by sea-green peripheries. Minimally abraded and attractive. PCGS# 38981 Base PCGS# 5348

1831 Bust Quarter, MS63  
B-4, Small Letters

- 4547** 1831 Small Letters, B-4, R.1, MS63 PCGS. A fully struck type representative with medium silver-gray and wheat-gold toning. The high points of the portrait exhibit gunmetal hues. The satiny surfaces are only lightly marked. The radial die crack through the C in the denomination is usual for B-4. Encapsulated in a green label holder. PCGS# 38983 Base PCGS# 5348

1831 B-4 Quarter, MS64  
Small Letters Reverse  
Blue and Brown Toning

- 4548** 1831 Small Letters, B-4, R.1, MS64 PCGS. CAC. A deeply patinated Choice type coin with golden-brown borders and navy-blue interiors. Satiny, well struck, and free from noticeable contact. A thin diagonal line on Liberty's neck was on the planchet prior to the strike. The usual die state for B-4 with a radial crack through the C in 25 C. PCGS# 38983 Base PCGS# 5348

1831 B-5, FS-301 Quarter, MS63  
Repunched Date

- 4549** 1831 Large Letters, B-5, FS-301, R.3, MS63 NGC. The first and last 1 in the date are each large, and they are each repunched over small digits. Although the *Guide Book* records the Small Letters and Large Letters reverse types, that reference is mute upon the date repunching. This Select Mint State piece has satiny silver luster beneath rich gold toning. PCGS# 38984 Base PCGS# 5349

1832 B-1 Quarter Dollar, MS63

- 4550** 1832 B-1, R.1, MS63 NGC. This attractive Select Mint State Capped Bust quarter has long, slender arrowheads on the reverse that nearly join the border denticles. Subdued silver luster is visible through a thick coat of gold toning on each side. Census: 8 in 63, 20 finer (12/14), for both 1832 varieties. PCGS# 38987 Base PCGS# 5351

1834 B-1 Quarter, Repunched Legend, MS63  
FS-901 *Cherrypickers'* Variety

- 4551** 1834 O Over F in OF, B-1, FS-901, R.1, MS63 NGC. As listed in the *Cherrypickers' Guide*, this piece shows “the OF ... widely repunched with the letters connected at the top, and the first A in AMERICA is also re-engraved.” There is no period after the denomination. Some of the other peripheral letters show remnants underneath. Fivaz-Stanton further comment that “this is a rare variety, especially if sharp,” which this Select Mint State piece certainly is. The two pale gules (two-line stripes) also help identify this variety. The sharply struck surfaces are lustrous and reflective but somewhat hazy, showing attractive pinkish-gold color and good contrast. PCGS# 38992 Base PCGS# 5353

1834 B-1 Quarter, MS64  
O Over F Variety  
Mildly Prooflike

- 4552** 1834 O Over F in OF, B-1, FS-901, R.1, MS64 PCGS. CAC. Splashes of tan and electric-blue toning enrich this needle-sharp and unblemished near-Gem. A beautiful type coin with mildly reflective fields and good eye appeal. The dies are rotated about 45 degrees clockwise, and a few specks of die rust (as made) are found above the eagle.  
Ex: Long Beach Signature (Heritage, 9/2005), lot 2633; FUN Signature (Heritage, 1/2010), lot 869. PCGS# 38992 Base PCGS# 5353

1834 Quarter, B-2, MS65  
Beautifully Toned With Full Original Luster

- 4553** 1834 B-2, R.4, MS65 NGC. B-2 is one of the scarcer varieties of the 1834 quarter, but it is not quite as challenging as B-5, which is the rarest. At the Gem grade level, however, all varieties are distinctly rare, as the 1834 quarter in general is only moderately available through the Choice level. All varieties included, NGC has encapsulated only 11 pieces in MS65 (1 in 65+), and just 10 numerically finer (11/14). The present coin is sharply struck in the centers, though a few of the obverse stars exhibit weakness on their radial lines. Satiny luster cartwheels beneath a light, and the luminous surfaces are awash in shades of royal-blue, aquamarine, violet, and olive-gold toning. Close examination fails to reveal any noteworthy abrasions. Struck from mildly rotated dies. PCGS# 38993 Base PCGS# 5353

1834 Quarter, B-4, MS63  
Excellent Capped Bust Type Coin

- 4554** 1834 B-4, R.1, MS63 NGC. Star 10 is boldly repunched on this variety, and the reverse exhibits extensive peripheral die cracks. This example is boldly struck, save for stars 1 and 7 which are not fully defined. Radiant luster is activated when turned in-hand, illuminating deep amber and aquamarine peripheral hues on the obverse and a light golden veil on the reverse. Some mint-made die striations are observed on Liberty's neck and cheek, though abrasions are not immediately obvious. PCGS# 38995 Base PCGS# 5353

1837 Bust Quarter, B-2, Appealing MS63

- 4555** 1837 B-2, R.1, MS63 NGC. The 7 is almost completely under Liberty's lowest curl, and star 9 displays minor recutting. The reverse shows the denomination low in the field with the olive branch tip over the right half of the C. The 1837 quarters have a perception of being common but the total mintage was only a quarter-million pieces, and graded survivors average only Choice XF to AU50. This Select Mint State example shows scattered ticks and peck consistent with the grade, but muted luster prevails throughout on appealing copper-gold and pale blue surfaces. PCGS# 39011 Base PCGS# 5356

1837 B-2 Quarter, MS64  
Dusky Multicolor Toning

- 4556** 1837 B-2, R.1, MS64 NGC. CAC. Attractive autumn-gold, silver-blue, and lilac patina encompasses this coruscating and carefully preserved near-Gem. The strike is sharp except on the C in 25 C. Although Seated half dimes and dimes were introduced in 1837, the quarter denomination was ruled solely by the Capped Bust type until 1838. PCGS# 39011 Base PCGS# 5356

SEATED QUARTERS

1846 Quarter, MS64  
Scarce in Mint State

- 4557** 1846 MS64 NGC. Briggs 1-C. An early die state example, before the die cracks develop and with only a couple small rim cud on the reverse near the arrowheads. This issue is one of the more plentiful pre-1853 Seated quarters, but it is hardly available in Mint State. This satiny example exhibits uniform olive-gray and deep amber-violet toning over each side. The devices are well-struck, and the surfaces are devoid of major abrasions. Census: 11 in 64 (1 in 64+), 1 finer (12/14). NGC ID# 23SW, PCGS# 5409

1847 Quarter, MS64  
Bold Doubled Die Reverse

- 4558** 1847 Repunched Date, Doubled Die Reverse, Briggs 2-A, FS-801, MS64 PCGS. CAC. This variety exhibits bold die doubling on all reverse design elements, and on the obverse the date is repunched, with the remnants of an underlying 7 evident to the left of the primary. As a date, this issue is scarce in Mint State, and rare in Choice condition. This piece is boldly struck, with semiprooflike reflectivity in the fields. A touch of light golden toning is the only trace of color. Population: 9 in 64, 2 finer (12/14). PCGS# 395923 Base PCGS# 5410

1849-O Quarter, Elusive AU53  
Key Series Issue

- 4559** 1849-O AU53 NGC. Briggs 1-A. The key-issue 1849-O Seated quarter is an anomaly in that its mintage was included in the 1850-O total, but Larry Briggs estimates that only 16,000 coins were struck, adding further that XF and AU examples are very rare. Stars 6 and 9-12 are recut, and the date slopes downward left to right. This is an attractive, lustrous example with dove-gray and sunset-orange patina, showing a few marks but none overt. Census: 3 in 53, 10 finer (12/14). NGC ID# 23T3, PCGS# 5414

**4560 1850 Misplaced Date MS62 PCGS. Briggs 1-A, FS-301.** The base of a misplaced 1 appears on the rim outside the border denticles below the properly placed 1 of the date. Although not a rare variety, the FS-301 quarter was recently added to the PCGS coin numbering system, and this example is the only one they have certified in any grade (12/14). NGC has also certified a single example that is graded MS65. This pleasing Mint State piece has sea-green toning at the center of the obverse inside a ring of gold, with gold and gray toning on the reverse. PCGS# 395929 Base PCGS# 5415

**4561 1853 Arrows and Rays MS62 PCGS.** This single-year type coin offers delicate almond-gold toning and a sharp strike. Lustrous and minimally abraded with superior eye appeal for the designated grade. Certified in a first generation holder. NGC ID# 23U4, PCGS# 5426

**4562 1853 Arrows and Rays MS63 PCGS.** A pleasing example of this one-year type issue, with sharply struck design elements and lustrous, well-preserved surfaces. Both sides show a slight rose-gray toning. A raised "bar", as struck at the Mint, extends from Liberty's left (facing) elbow to the lower hair curls adjacent to her neck. NGC ID# 23U4, PCGS# 5426

#### 1853 Arrows and Rays Quarter, MS65 Necessary One-Year Type Coin

**4563 1853 Arrows and Rays MS65 NGC.** After much debate in Congress about the reduction of the intrinsic value of subsidiary coinage, the silver content was reduced and the newly coined quarters and half dollars had arrowheads placed on the obverse and a glory of rays on the reverse to indicate this weight reduction. This one-year type is necessary for any 19th century silver type set, and this nearly brilliant piece would be an excellent addition. Just the faintest trace of golden peripheral toning interrupts the otherwise brilliant surfaces of this fully struck Gem. Census: 27 in 65, 11 finer (12/14). NGC ID# 23U4, PCGS# 5426

#### 1853 Arrows and Rays Quarter Partially Toned MS65

**4564 1853 Arrows and Rays MS65 NGC.** The general public recognized the obverse/reverse design changes immediately and numerous examples of the Arrows and Rays type were set aside. However, most of those were circulated or lower-grade Uncirculated coins. Gems remain difficult to locate and are highly prized by type collectors. This is a remarkably lustrous coin with a trace of pinkish-gray on each side with much original mint brilliance still in evidence as well. NGC ID# 23U4, PCGS# 5426

#### 1854-O Quarter, VF30 Huge O Mintmark, FS-501

**4565 1854-O Huge O, Briggs 1-A, FS-501, VF30 NGC.** A scarce variety noteworthy for its oversized, irregular, and high relief mintmark. Presumably, a hardened reverse die arrived in New Orleans without a mintmark, and the Huge O was an attempt by an O-mint worker to salvage the die by adding an O mintmark by hand. The present example has deep gunmetal fields and lighter slate-gray high points. LIBERTY is bold. Smooth save for a few faded thin marks on the right obverse. PCGS# 395933 Base PCGS# 5434

#### 1856 Quarter, MS66 Tied for Finest Certified

**4566 1856 MS66 NGC.** Fire-red, orange-gold, and navy-blue dominate the margins of this lustrous and sharply struck Premium Gem. A beautifully preserved No Motto type coin. Arrows were removed from the design in 1856 after a three-year run, although they would briefly return in 1873. Census: 8 in 66, 0 finer (12/14). Ex: ANA Signature (Heritage, 8/2010), lot 4679. NGC ID# 23TB, PCGS# 5438

**4567 1857 MS65 NGC.** A large mintage of 9.6 million coins makes this issue readily available, but Gems are scarce and high-graded examples are even scarcer. This is a deeply toned piece over both sides, with sharp strike definition overall and outstanding surface preservation. NGC ID# 23TE, PCGS# 5442

**4568 1857 MS65 NGC.** This is a good-looking Gem with bold strike definition and shimmering mint luster. The obverse shows a light champagne cast, while the reverse displays creamy antique-silver coloration and a few grayish spots. A conditionally scarce example of this relatively common issue. NGC ID# 23TE, PCGS# 5442

**1857 Quarter, MS67**  
**Few No Motto Quarters Are Finer**

**4569** 1857 MS67 NGC. CAC. The eye appeal of this Superb No Motto is generated not only by concentric shades of multicolored toning, but also by the coin's dazzling semiprooflike luster. If one is willing to forgive a few wispy contact marks on the obverse, this remarkably appealing 1857 quarter would be difficult to improve upon. Census: 21 in 67 (1 in 67+, 2 in 67 ★), 2 finer (12/14). Ex: *Long Beach Signature* (Heritage, 2/2005), lot 6548. NGC ID# 23TE, PCGS# 5442

**1859 Quarter, Richly Toned MS65**

**4570** 1859 MS65 PCGS. Several dozen 1859 quarters are known today in the various grades of Uncirculated, but the issue becomes rare in Gem condition. This piece is thickly frosted, as usual for the issue, with rich sea-green, rose, gold, and cobalt-blue surfaces (the latter color especially prominent on the reverse). There are only a few minor field marks present that prevent an even higher grade. Population: 8 in 65, 4 finer (12/14). Ex: *Long Beach Signature* (Heritage, 9/2007), lot 1194. NGC ID# 23TL, PCGS# 5448

**1861 Liberty Seated Quarter**  
**Lustrous, Satin-Smooth Gem**

**4571** 1861 MS65 PCGS. Briggs 6-E. Struck with the Type Two reverse (convex eagle's eye, open claws). QUA of QUAR. DOL. is recut and the reverse is cracked beneath QUAR. An attractive, ivory hue attends the brilliant silver surfaces, with vibrant cartwheel luster and a full strike confirming the coin's Gem status. Although more than 4.8 million pieces were struck, few remain in such exceptional condition. Population: 39 in 65, 16 finer (12/14). NGC ID# 23TT, PCGS# 5454

**1862-S Quarter, MS62**  
**Well-Struck Uncirculated Example**

**4572** 1862-S MS62 PCGS. Briggs 1-A. Early San Francisco Seated quarters are especially challenging in higher grades, and the 1862-S is no exception. Lustrous surfaces reveal scattered marks in the obverse field, none inconsistent with the grade, while the reverse is notably free of blemishes for the assigned grade level. The reverse strike is especially strong, and the obverse stars, too, exhibit full centers. PCGS population: 9 in 62, 7 finer (12/14). NGC ID# 23TW, PCGS# 5457

**1864-S Quarter, VF30**

**4573** 1864-S VF30 NGC. CAC. The 20,000 pieces struck for this San Francisco issue swiftly vanished into the maw of local commerce, and today even this VF30 example counts as a condition rarity. All letters of LIBERTY are crisp. Pale silver-blue toning over much of each side has a deeper complement at the margins, particularly the reverse lettering. Census: 2 in 30, 19 finer (11/14). NGC ID# 23TZ, PCGS# 5460

**1873 Closed 3 Quarter, AU55**  
**Considerable Luster Remains**

**4574** 1873 Closed 3 AU55 PCGS. After the early strikings of 1873 coinage made the 3 in the date look like another 8, another Open 3 logotype was produced and implemented. (This problem recurred 50 years later with the Peace dollar, but no such change was made, much to the regret of collectors with weak eyesight.) The coin on offer is a Closed 3 1873 quarter with just a touch of wear on silver-blue surfaces that retain largely intact luster. Population: 4 in 55, 4 finer (11/14). NGC ID# 23UU, PCGS# 5484

- 4575 1875 MS65 PCGS. CAC.** The frosty surfaces are sharply struck throughout both sides and show ample eye appeal with no mentionable distractions. Grayish-gold patina on each side completes the multifaceted list of attractions. Population: 36 in 65, 23 finer (12/14). NGC ID# 23UX, PCGS# 5498

**1876-CC Seated Quarter, MS66  
Frost-White Surfaces, Total Mint Luster**

- 4576 1876-CC MS66 NGC. Briggs 7-G. Type Two Reverse. Large CC.** Extremely frostlike and brilliantly lustrous. This untuned Premium Gem quarter is a credit to the Carson City Mint production and a jewel for any Seated quarter specialist. Struck from a die pair destined for imminent failure, the coin shows extensive cracks that encircle both obverse and reverse. Even so, the strike is bold everywhere except for minor blending on Liberty's head, which also has a tiny mark at the hairline. Census: 11 in 66, 2 finer (10/14). NGC ID# 23V3, PCGS# 5502

- 4577 1877-CC MS65 PCGS.** Deep gold and lavender-gray patination covers both sides of this Gem, each of which exhibits well-struck design elements. No significant marks are evident. Population: 37 in 65, 23 finer (12/14). NGC ID# 23V6, PCGS# 5505

- 4578 1879 MS65 NGC.** Just 13,600 business strikes were produced, and only at Philadelphia. The glistening surfaces of this delightful Gem are highly lustrous and display lovely light toning. A few minuscule marks are found on each side, but they are too small to distract. NGC ID# 23VB, PCGS# 5511

- 4579 1879 MS66 PCGS. Briggs 1-A.** The design elements of this impressive Premium Gem are sharply detailed in most areas, but a touch of softness shows on Liberty's bodice. The well-preserved brilliant surfaces show a mix of satiny mint luster and prooflike reflectivity, with a few wisps of pale gold toning. Population: 35 in 66 (1 in 66+), 22 finer (12/14). NGC ID# 23VB, PCGS# 5511

- 4580 1880 MS64+ PCGS. CAC.** Pale heather, powder-gray, and copper-orange hues invigorate each side of this well-struck and nicely preserved 1880 Seated quarter, a well-known low-mintage issue of only 13,600 strikes for circulation. It is perhaps only the somewhat muted luster that precludes a finer grade. *From The College Collection.* NGC ID# 23VC, PCGS# 5512

- 4581 1883 MS65 PCGS.** Golden-brown and lime hues endow this highly lustrous and sharply struck Gem. This is a well preserved and impressive survivor from the mintage of 14,400 pieces. Population: 11 in 65, 22 finer (12/14). NGC ID# 23VF, PCGS# 5515

**1887 Quarter, Well-Preserved MS66**

- 4582 1887 MS66 PCGS.** Only 10,000 Seated Liberty quarters were struck in 1887, and the issue is quite rare in MS66 Condition. This spectacular Premium Gem offers well-detailed design elements and well-preserved lustrous surfaces with attractive shades of pale gold toning. Population: 33 in 66 (3 in 66+), 6 finer (12/14). NGC ID# 23VK, PCGS# 5519

**1888 Quarter, MS66  
Rare Any Finer**

- 4583 1888 MS66 PCGS.** The 1888 quarter dollar comes from a low mintage of 10,000 pieces. Premium Gems such as the present example are elusive and finer specimens are very rare. Frosty luster endows both sides, each of which exhibits sharply struck design elements. No mentionable marks are apparent. Population: 67 in 66 (12 in 66+), 9 finer (12/14). NGC ID# 23VL, PCGS# 5520

- 4584 1889 MS65 PCGS.** Primarily known as a low mintage issue struck at the end of the Seated series, the 1889 is also a well-produced issue. This sharply defined example displays mostly brilliant surfaces with occasional dabs of russet patina around the margins. NGC ID# 23VM, PCGS# 5522

**1889 Quarter, MS66  
Low-Mintage Issue**

- 4585 1889 MS66 PCGS. Briggs 1-A.** A sought-after late-series issue, with a mintage of only 12,000 pieces. This Premium Gem example is vibrantly lustrous, with just a touch of light golden toning over each side. The strike is sharp, and the surfaces are devoid of any significant flaws. Few representatives are certified finer. Population: 40 in 66, 44 finer (12/14). NGC ID# 23VM, PCGS# 5522

---

**1889 Seated Quarter, MS66  
Virtually Pristine**

**4586 1889 MS66 PCGS.** This low-mintage issue constituted only 12,000 pieces, but most of them are certified in the lower Mint State grades. This Premium Gem is well but not quite fully struck, showing pinkish-gold and deep blue-gray luster with virtually immaculate preservation. Population: 40 in 66, 44 finer (12/14). NGC ID# 23VM, PCGS# 5522

**4587 1890 MS66 PCGS.** Vibrant luster sweeps this virtually stone-white high grade Seated quarter. The strike is bold except on the right-side stars. Just 80,000 pieces were struck, although Philadelphia dealers such as the Chapman brothers secured a number of Uncirculated examples. Certified in a green label holder. Population: 23 in 66, 23 finer (12/14). NGC ID# 23VP, PCGS# 5523

---

**1890 Quarter, Beautifully Patinated, MS67**

**4588 1890 MS67 PCGS.** This Superb Gem is beautifully patinated in variegated cobalt-blue, gold-orange, lavender, lime-green, and grayish colors. Partially prooflike fields accentuate frosty motifs that are sharply impressed. Marvelously preserved surfaces round out the coin's outstanding eye appeal. Population: 23 in 67 (3 in 67+), 0 finer (12/14). NGC ID# 23VP, PCGS# 5523

**4589 1891 MS66 NGC.** Occasional wisps of cobalt-blue, orange, and lavender make appearances on the lustrous surfaces of this Premium Gem. Sharply struck and impeccably preserved. Census: 50 in 66 (1 in 66 ★), 14 finer (12/14). NGC ID# 23VR, PCGS# 5524

---

**PROOF SEATED QUARTERS**

---

**1857 Quarter, Lightly Toned PR63**

**4590 1857 PR63 NGC.** Mintage estimates have varied widely for the 1857 proof Seated quarters in the past (and continue to do so today), but the sixth edition (2014) of the *Guide Book*, Professional Edition, puts the guess at 40-50 pieces; PCGS' website says 75-100 known. This Select proof show good reflectivity under a light layer of field haze, with golden-pink, powder-gray, and pale blue patina competing for dominance. Scattered ticks account for the grade but are undistracting. Census: 5 in 63, 28 finer (12/14). NGC ID# 23WJ, PCGS# 5553

---

**1860 Quarter, PR65  
Attractively Toned on Both Sides**

**4591 1860 PR65 PCGS. Briggs 9-H.** Type One Reverse. A popular No Motto proof issue, rare in Gem or finer grades. This example is sharply struck and deeply reflective, though true mirroring is muted somewhat by the vivid multicolor toning that blankets both sides in an array of mint-green, royal-blue, violet, and amber. Population: 19 in 65 (1 in 65+), 7 finer (12/14). NGC ID# 23WM, PCGS# 5556

---

**1862 Seated Liberty Quarter, PR66  
Bright Multicolor Toning**

**4592 1862 PR66 PCGS.** Razor-sharp definition is apparent on all design elements and the fields are deeply mirrored under vivid shades of golden-brown and cobalt-blue toning. The devices are richly frosted, but the deep toning reduces what would otherwise be a dramatic cameo effect. Population: 6 in 66, 0 finer (12/14). NGC ID# 23WP, PCGS# 5558

**1863 Quarter, Beautifully Toned PR67**  
**Ex: Floyd T. Starr, Among the Finest Known**

- 4593 1863 PR67 NGC. Briggs 4-D.** This variety shows the date entered with an upward slant, and QUAR. DOL. is lightly die doubled. This is a beautifully toned Superb Gem. Lime-green, cherry-red, and butter-gold patina covers the obverse. The reverse displays deeper aquamarine, orange, and lavender hues. The strike is generally complete, although the dies were slightly misaligned, since the lower obverse and upper reverse dentils show minor incompleteness. Evaluation beneath a loupe reveals fine die polish lines.

The mintage of 460 proofs was the lowest of the series since 1858, the first year that proofs were offered to the general public. Proof mintages of quarters would not drop that low again until 1914. The low mintages of 1862 through 1864 were a Mint reaction to the sizeable number of unsold proof sets from 1860 and 1861. Census: 2 in 67 (1 in 67 ★), 0 finer (11/14).

Ex: William Hesslein (6/1923), lot 1474; Floyd T. Starr Collection (Stack's, 10/1992), lot 653; Central States Signature (Heritage, 5/2004), lot 6976; Raleigh-Durham Collection (Bowers & Merena, 6/2008), lot 697; Slotkin Family Trust Collection (Heritage, 4/2011), lot 5094; purchased from Jason Carter (4/2013); Eugene Gardner Collection, Part I (Heritage, 6/2014), lot 30409. NGC ID# 23WR, PCGS# 5559

- 4594 1864 PR64 NGC.** This lovely near-Gem proof 1864 quarter is mostly untuned, save for a slight cast of gold perceptible on each side. The sharp proof strike produces full device details throughout. A few trivial contact marks in the fields restrict the grade, but copious eye appeal is present. Census: 87 in 64, 26 finer (12/14). NGC ID# 23WS, PCGS# 5560

**1864 Quarter, PR64+ Cameo**  
**Only 470 Proofs Struck**

- 4595 1864 PR64+ Cameo PCGS. CAC. Briggs 3-C.** This near-Gem proof Cameo is deeply mirrored in the fields, while the frosty devices display bold striking sharpness. Both sides are essentially devoid of color, and the surfaces are free of distractions. The 1864 quarter had a scant proof mintage of only 470 pieces, and Cameo survivors are scarce in all grades. Population: 12 in 64 (1 in 64+), 12 finer (12/14). PCGS# 85560

- 4596 1866 Motto PR65 PCGS.** This lovely Gem has delightful heather and champagne toning with excellent eye appeal. The sharply detailed devices exhibit satiny luster with fully mirrored fields that combine to impart noticeable cameo contrast, despite the lack of a Cameo designation. Population: 10 in 65, 3 finer (12/14). NGC ID# 23WX, PCGS# 5565

**1866 With Motto Quarter, PR65**  
**Beautiful Multicolor Patina**

- 4597 1866 Motto PR65 PCGS. CAC. Briggs 2-B.** The proof quarters of 1866 were the first of that denomination to exhibit the motto IN GOD WE TRUST. The two cent pieces of 1864 were the first coins struck bearing the motto, but it wasn't until 1866, following the end of Civil War, that it was mandated to appear on other denominations. Only 725 proof quarters were struck in 1866, and few survive in high states of preservation. This Gem example is boldly struck, with vivid rivers of ocean-blue, violet, and sun-gold melting into the deeply mirrored fields. Nearly full cameo contrast is seen on both sides. Population: 10 in 65, 3 finer (11/14). NGC ID# 23WX, PCGS# 5565

**1866 With Motto Seated Quarter  
Dazzling PR66+ Deep Cameo**

**4598 1866 PR66+ Deep Cameo PCGS. CAC. Briggs 2-B.** In March 1865, Congress passed legislation mandating the inclusion of the motto IN GOD WE TRUST on all gold and silver denominations of a size large enough to incorporate the inscription without crowding the other design elements. Implementation of the mandate took effect the following year in 1866. Among the coins changed was the quarter dollar, and aside from a unique No Motto representative struck under special circumstances, all the proof quarters produced in 1866 exhibit the beloved motto.

For the collector, finding an example of this issue is not prohibitively difficult in the absolute sense, but a search for a piece with Deep Cameo contrast will prove long and tiresome. PCGS has certified just nine Deep Cameo examples in all grades, with the present coin being the sole finest (11/14). Both sides showcase bold white-on-black contrast, with deep mirrors and heavily frosted devices. The obverse is largely untuned, saved for a peripheral ring of blue and violet, while the reverse exhibits a deeper array of same with intermingled sun-gold and mint-green hues. An incredibly eye-appealing proof Seated quarter. PCGS# 95565

**1867 Quarter, PR65 Deep Cameo  
Remarkable Color and Contrast**

**4599 1867 PR65 Deep Cameo PCGS Secure. CAC. Briggs 2-B.** Ex: Bruce Scher. The 1867 date is challenging for the Seated quarter collector, as only 20,000 business strike examples were coined and proof production was limited to only 625 pieces. The appeal of the present Gem proof is further heightened by its deeply mirrored fields and razor-sharp, frosty devices. PCGS has encapsulated only six Deep Cameo coins in all grades, with four in PR65 and none numerically finer (11/14). A wide crescent of varying blue and violet hues surrounds the left-hand region of both sides from 6 to 1 o'clock, with warm sun-gold toning over the remainder of the surfaces. Any grade-limiting hairlines beneath the patina are of no concern to the eye appeal. PCGS# 95566

**1868 Quarter, PR65  
Only 600 Pieces Struck**

**4600 1868 PR65 PCGS. CAC. Briggs 2-B.** Spectacularly toned in shades of cobalt-blue and greenish-gold, this impressive Gem possesses terrific eye appeal. The design elements are sharply detailed and the deeply reflective fields shine through the toning. No mentionable distractions are evident. From a modest proof mintage of 600 pieces. Population: 11 in 65 (1 in 65+), 6 finer (11/14). NGC ID# 23WZ, PCGS# 5567

1870 Seated Quarter, PR66  
Only One Numerically Finer Coin at PCGS

- 4601** 1870 PR66 PCGS Secure. CAC. Briggs 2-B. Ex: Bruce Scher. A generous mintage of 1,000 proof Seated Liberty quarters was accomplished in 1870, but few survivors can match the quality and eye appeal of this delightful Premium Gem. The design elements exhibit razor-sharp definition throughout and the deeply mirrored fields are blanketed in vivid shades of cerulean-blue and pale gold toning. Population: 4 in 66 (1 in 66+), 1 finer (11/14). NGC ID# 23X3, PCGS# 5569

1871 Seated Quarter, PR66  
Richly Toned

- 4602** 1871 PR66 PCGS Secure. Ex: Bruce Scher. Intensely toned green, blue, and violet on the obverse with a small window of silver-frost hints at strong field-device contrast. The reverse has similar hues, better reflectivity, and additional peach color. A Premium Gem proof with great charm. Population: 5 in 66 (1 in 66+), 0 finer (12/14). NGC ID# 23X4, PCGS# 5570
- 4603** 1872 PR65 NGC. Flashy patina in shades of copper-gold and mint-green complements generous luster and well-frosted devices on this Gem proof, which to our eyes verges on a Cameo designation. Census: 29 in 65, 11 finer (12/14). NGC ID# 23X5, PCGS# 5571

1873 No Arrows Quarter, PR67 Cameo  
Among the Finest Certified at PCGS

- 4604** 1873 No Arrows PR67 Cameo PCGS Secure. CAC. Briggs 1-A. Ex: Simpson. The 1873 No Arrows proof quarters were struck early in the year before the date was changed to the so-called Open 3 logotype. Only 600 pieces were produced, with some ending up in circulation. Still, this issue is available in grades through MS64, and Gems can be found with searching, but finer pieces are rare. Only three Superb Gems have been certified by PCGS — all Cameos — including two PR67 coins and one PR67+ example (11/14).  
This piece exhibits sharply struck, satiny devices set against mirrored fields that display tinges of lavender-gold and aquamarine toning, with a few mint-green accents around the extreme outer peripheries. The preservation is exceptional, with no contact marks or discernable hairlines in the fields. PCGS# 85572

- 4605** 1873 Arrows PR63 NGC. CAC. This attractive Select specimen exhibits sharply detailed design elements and reflective fields with a few minor hairlines and contact marks. Subtle highlights of cerulean-blue and champagne-gold toning add to the considerable eye appeal. Census: 34 in 63, 82 finer (12/14).  
*From The A. James Evans Collection, Part II.* NGC ID# 23XR, PCGS# 5574

**1873 Arrows Quarter, PR64 Cameo  
Brilliant and Starkly Contrasted**

- 4606 1873 Arrows PR64 Cameo PCGS.** Only a slight weight gain was necessary for dimes, quarters, and half dollars to conform to metric standards. While probably unnecessary, the Mint recycled their 1853-1855 idea of placing arrowheads on each side of the date to indicate the weight change. This is a brilliant proof that displays deeply reflective mirrors in the fields with strongly contrasting frosted devices. Population: 15 in 64, 6 finer (12/14). PCGS# 85574

**1874 Arrows Quarter, Richly Toned PR65**

- 4607 1874 Arrows PR65 PCGS.** Second of only two years for the Arrows type, this is a richly toned example that displays thick layers of maroon and blue color over both sides. The proof mirrors are abundantly evident when the coin is angled beneath a light. Sharply defined overall. Population: 27 in 65, 31 finer (12/14). NGC ID# 23XS, PCGS# 5575

- 4608 1875 PR65 Cameo NGC.** Type One Reverse. Frosty motifs and legends rise in full detail above the glassy fields. A trace of gold toning adorns this undisturbed and appealing Gem. A mere 700 proofs were issued. PCGS# 85576

**1875 Quarter, PR68 ★ Cameo  
Repunched Date, Type One Reverse  
Numerically Tied for Finest Certified**

- 4609 1875 PR68 ★ Cameo NGC. Briggs 4-E. Type One Reverse.** The flag of the 7 in the date is repunched, as is the lower right curve of the 5. Type One Reverse is readily identified by wide feet on the A in STATES. A coin of unsurpassed quality, this sharply detailed specimen does show a little softness on the stars; Larry Briggs notes that they are always weakly struck. The frosty devices contrast boldly with the deeply mirrored fields under attractive shades of champagne-gold and cerulean-blue patina. This combination of the highest available technical quality and spectacular eye appeal is seldom encountered in today's market.

The 2015 *Guide Book* lists the mintage of 1875 proof Seated Liberty quarters as 700 pieces, to conform to the number of silver proof sets issued that year. However, Walter Breen believed the quarter was a bit rarer than the other silver denominations and suggested that only 630 pieces were actually struck, 550 during the first quarter of the year and 80 in the third quarter. Breen speculated that the balance of the proof sets might have included 1874-dated quarters, or that the 700 proof set figure was in error. Whether Breen's theories have merit or not, the 1875 is among the scarcest proof Seated quarter dates of the 1870s and 1880s.

This piece is the single finest certified at NGC. Census: 1 in 68 (1 in 68 ★), 0 finer (11/14).

Ex: New York Signature (Heritage, 12/2011), lot 3486; Eugene Gardner Collection, Part I (Heritage, 6/2014), lot 30412. PCGS# 85576

**1876 Quarter, PR66**  
**Ex: Eliasberg**

- 4610 1876 PR66 PCGS Secure. CAC. Ex: Eliasberg.** Type One Reverse. Delightful shades of cobalt-blue and greenish-gold patina blanket the surfaces of this spectacular Premium Gem. Pedigreed to perhaps the most famous U.S. coin collection of all time. The design elements are sharply rendered and the surfaces are nicely mirrored. *Ex: Louis E. Eliasberg, Sr. Collection (Bowers & Merena, 4/1997), lot 1514. NGC ID# 23X8, PCGS# 5577*

- 4611 1876 PR64 Deep Cameo PCGS. CAC.** Type One Reverse. A brilliant specimen whose luminous devices and mirrored fields are nearly free from hairlines, although a few pinpoint flecks are noted near OF and the E in AMERICA. *Ex: Orlando FUN Signature (Heritage, 7/2011), lot 3522, which realized \$1,725. PCGS# 95577*

**1876 Quarter, PR66 Deep Cameo**  
**Exemplary White-on-Black Contrast**

- 4612 1876 PR66 Deep Cameo PCGS Secure. CAC.** Type Two Reverse. Icy-white frost endows the devices and legends of this brilliant and high grade specimen. The strike is razor-sharp and the eye appeal is formidable. One small lint mark (as coined) noted on the reverse border at 7:30. Population: 4 in 66, 0 finer (12/14). PCGS# 95577

**1877 Seated Liberty Quarter, PR66 Cameo**  
**Seldom Seen Finer**

- 4613 1877 PR66 Cameo PCGS. CAC.** From a nominal proof mintage of 880 pieces, the 1877 Seated Liberty quarter is a condition rarity in PR66 condition, with cameo surfaces. This delightful Premium Gem displays sharply detailed design elements throughout, with frosty devices that provide bold cameo contrast with the deeply reflective fields. Population: 3 in 66, 3 finer (12/14). PCGS# 85578

**1878 Quarter, PR66**  
**Bright Mirrors, Deep Toning**

- 4614 1878 PR66 PCGS.** A popular year for type collectors, Gem proofs are available with some searching but few are known finer. The mirrors in the fields display illimitable depth of reflectivity and flash strongly through the thick layers of multicolored iridescence. Close examination shows if the toning were factored out of this coin it would undoubtedly be a cameo. Population: 10 in 66 (2 in 66+), 1 finer (12/14). NGC ID# 23XA, PCGS# 5579

**1878 Quarter, PR66+**  
**Mintage 800 Proofs**

- 4615 1878 PR66+ PCGS Secure. CAC. Ex: Bruce Scher.** The 1878 minor silver proofs saw a rebound in mintages from the previous year, though the 800 pieces produced seem a pittance compared to modern production. This faintly contrasted example is richly toned with outer green-to-blue and inner orange-to-gold colors that come alive at the correct angle to the light. Population: 10 in 66 (2 in 66+), 1 finer (12/14). NGC ID# 23XA, PCGS# 5579

**1879 Quarter, Toned PR66**

- 4616 1879 PR66 PCGS Secure.** The 2015 *Guide Book* lists 1,100 proof quarters struck in 1879. Briggs (1991), however, writes: "Mint records show proof mintage of 250 while 1,100 proof sets were issued. Many of the 1,100 are presumed to be other dates or business strikes." However, as PCGS and NGC have graded more than 660 examples, it appears the 1,100 figure is more accurate. The champagne-gold centers of this Premium Gem display whispers of electric-blue and lavender at the margins. The design elements are sharply impressed and both sides are nicely preserved. Population: 15 in 66, 1 finer (12/14). NGC ID# 23XB, PCGS# 5580

1880 Seated Liberty Quarter, PR66  
Vividly Toned With Subtle Contrast

- 4617** 1880 PR66 PCGS. CAC. Briggs 2-B. Type One Reverse. From a mintage of 1,355 pieces, proof 1880 Seated Liberty quarters are scarce in all grades today, and examples in PR66 condition are rare. The present coin is spectacularly toned in shades of greenish-gray and lavender-blue on the obverse, while the reverse shows only wisps of gold over intensely reflective fields. The field-device contrast on the reverse makes this coin resemble a one-sided cameo. Population: 35 in 66 (2 in 66+), 10 finer (11/14). Ex: *Boston Signature* (Heritage, 8/2010), lot 4764. NGC ID# 23XC, PCGS# 5581

1880 Quarter, Sharp PR67 ★

- 4618** 1880 PR67 ★ NGC. Orange-gold, red, violet, and yellow-green patination cascades over both sides of this Superb Gem, and a solid strike imparts sharp detail to the design elements. Rotating the coin slightly under a light source results in modest field-motif contrast. This is a wonderfully preserved specimen. Census: 15 in 67 (3 in 67 ★), 5 finer (12/14). NGC ID# 23XC, PCGS# 5581

1880 Seated Liberty Quarter, PR68  
None Numerically Finer at Either Service

- 4619** 1880 PR68 NGC. Briggs 2-B. A generous mintage of 1,335 proof Seated Liberty quarters was accomplished in 1880, to accompany a small business-strike production of 13,600 examples. Two different dies were used to strike the proof mintage, and this coin exhibits the Type 1 Reverse, identified by the short cut in the left shield lines. The Type 1 Reverse was also used to strike business-strike examples. This magnificent PR68 specimen offers sharply detailed design elements and flawless, deeply mirrored fields, under vivid shades of greenish-gold and cerulean-blue toning. The surfaces are impeccably preserved and eye appeal is extraordinary. Census: 5 in 68 (1 in 68+), 0 finer (11/14). NGC ID# 23XC, PCGS# 5581

1881 Quarter, Toned PR66 Cameo  
Elusive at This Level

- 4620** 1881 PR66 Cameo PCGS Secure. Ex: Benson Collection. The silver centers of this Premium Gem Cameo cede to deep cobalt-blue, lavender, and gold-orange around the borders. This sharply struck example has been very well cared for. This issue is fairly available though Cameos are more elusive, especially in the higher numerical levels. Population: 20 in 66 (3 in 66+), 9 finer (12/14). PCGS# 85582

**1881 Quarter, PR68 Cameo**  
**Remarkable Technical Quality**

- 4621 1881 PR68 Cameo NGC. Briggs 2-B.** Both 8s are recut within the loops, and there are a pair of short die scratches (as produced) from the top of Liberty's right (facing) knee into the drapery; diagnostic features of the proof dies of this issue. The magnificent coin offered in this lot is among the finest Cameo proof specimens certified by either of the major grading services. It displays lovely red-russet color at the margins, which is heavier and all the more attractive on the reverse. Frosted design elements reveal a sharp strike, and offer a pronounced contrast with deeply mirrored fields. Close inspection shows no distracting marks, and just one tiny nick on Liberty's cheek as a potential pedigree identifier. Census: 2 in 68 (1 in 68 ★), 0 finer (12/14).

*Ex: Long Beach Signature (Heritage, 5/2007), lot 899. PCGS# 85582*

**1882 Seated Quarter, PR67**  
**Among the Finest Certified at PCGS**

- 4622 1882 PR67 PCGS. Briggs 2-B.** The proof 1882 Seated quarter experiences strong demand among date collectors due to the scarcity of high-grade business strikes, though its comparable availability plummets above the PR66 grade level. PCGS has certified only 11 non-Cameo examples in PR67, with none numerically finer (11/14). This piece reveals deeply reflective fields around frosty, boldly struck devices, with subtle cameo contrast on both sides. Peripheral rings of sea-green, blue, and violet beautifully frame the warm sun-gold centers. NGC ID# 23XE, PCGS# 5583

**1882 Quarter, PR66+ Cameo**  
**Lovely Original Patina**

- 4623 1882 PR66+ Cameo PCGS. CAC. Briggs 2-B.** The 1882 is always of interest, as are most of the dates from the 1880s, because of the impressively low mintage of business strikes. This, of course, places increased pressure on proofs, of which 1,100 were struck in this year. This is a nicely reflective example that shows good mint frost over the devices. Each side is mostly brilliant with a lovely two-toned, blue and russet, ring of toning around each side. Splendidly preserved surfaces. Population: 16 in 66 (6 in 66+), 3 finer (11/14). PCGS# 85583

- 4624 1883 PR65 PCGS.** A richly toned, fully struck representative of this well-produced issue. Deep electric-blue, rose, and champagne-gold toning adorns both sides. A couple of small grazes are visible left of star 12, nevertheless an exceptionally attractive example of this Seated quarter proof date. Population: 40 in 65, 33 finer (12/14). NGC ID# 23XF, PCGS# 5584

- 4625 1883 PR65 PCGS.** Beautiful aqua toning visits both sides of this Gem proof, complementing copper-gold and heather toning on the obverse and deep heather on the reverse. This is a sharply struck proof with no observable signs of contact. Population: 40 in 65, 33 finer (12/14). NGC ID# 23XF, PCGS# 5584

**1883 Quarter, PR67  
Toned and Sharply Struck**

- 4626** 1883 PR67 PCGS. CAC. Deep cobalt-blue and reddish-gold toning in the centers of this Superb Gem cedes to soft champagne at the margins. The design elements are sharply struck throughout and both sides are impeccably preserved, enhancing the coin's overall eye appeal, appropriately recognized by CAC. Population: 9 in 67, 0 finer (12/14). NGC ID# 23XF, PCGS# 5584

**1885 Seated Quarter, PR67  
Gorgeous Eye Appeal**

- 4627** 1885 PR67 NGC. Briggs 3-B. An exceptional piece, this Superb Gem exhibits lustrous surfaces and splendid toning in shades of golden-orange, red-pink, teal, and pale green. Though not designated as such, this piece displays pronounced contrast between the fields and devices, with the reverse fields exhibiting flashy mirrors. The piece is well-defined overall, save for some minor softness on a few of the stars. A thin vertical hair thin mark in the right obverse field poses minimal distraction, if any. Census: 14 in 67, 9 finer (12/14). NGC ID# 23XH, PCGS# 5586

**1885 Seated Quarter, PR67+  
Sole Finest Non-Cameo Certified**

- 4628** 1885 PR67+ PCGS. CAC. Briggs 3-B. Ex: Simpson. This delicately toned Superb Gem ranks as the sole finest non-Cameo proof 1885 quarter, and is one of only two Superb Gems certified at PCGS (11/14). Lemon-gold and kiwi-green peripheral bands surround pale lavender and blue hues in the centers, with deeply mirrored underlying fields and sharp devices. A beautiful type or date representative. NGC ID# 23XH, PCGS# 5586

- 4629** 1885 PR66 Cameo PCGS. Frosty, sharply struck motifs appear to float over the deep, watery mirrors of this Premium Gem. Untoned surfaces are remarkably well preserved. Population: 12 in 66, 8 finer (12/14). PCGS# 85586

**1886 Quarter, Toned PR66**

- 4630** 1886 PR66 PCGS. CAC. Briggs 2-B. This beautiful Premium Gem proof displays subtle field-device contrast, even beneath deep royal-blue and violet central toning, fading to brighter green-gold around the peripheries. Several of the left-hand stars are not fully struck, though the design elements are otherwise crisp, displaying frosty surfaces. Population: 26 in 66, 9 finer (11/14). NGC ID# 23XJ, PCGS# 5587

- 4631** 1887 PR66 PCGS. The 1887 is one of the popular issues struck between 1879 and 1890. Only 710 proofs and 10,000 business strikes were produced and high grade survivors are always in demand by collectors. This is a brightly reflective example that has rose centers that are surrounded by thalo-blue around the peripheries. An exceptionally attractive proof 1887 quarter. Population: 26 in 66, 4 finer (12/14).  
Ex: Long Beach Signature (Heritage, 9/14), lot 6381. NGC ID# 23XK, PCGS# 5588

**1887 Quarter, Richly Toned PR68  
Among the Finest Known**

- 4632 1887 PR68 NGC. Briggs 2-B.** This variety is characterized by fine die scratches, die rust, and evidence of considerable rework/retouching appear on each side of the dies. This pristine Superb Gem proof should garner much attention, a lovely and deeply toned piece with a pinkish-gold center on the obverse ceding to pale pastel blue-green patina near the edge. The latter color dominates the reverse on this crisply struck and thoroughly attractive coin.

The 1887 date is very scarce both as a proof and business strike, and this piece certainly approaches the upper end of the Condition Census. This late-series Superb Gem proof is certified in an old-style NGC "no-line fatty" holder, popular with many collectors. Census: 3 in 68, 1 finer (11/14).

*Purchased by Eugene Gardner from Aspen Park Rare Coins (2/2007); Gardner Collection, Part 1 (Heritage, 6/2014), lot 30415. NGC ID# 23XK, PCGS# 5588*

- 4633 1888 PR65 NGC.** Deep cobalt-blue, lavender, and champagne-gold patina runs over the well preserved surfaces of this Gem. The design elements are well-impressed. Census: 35 in 65, 26 finer (12/14). NGC ID# 23XL, PCGS# 5589

- 4634 1889 PR66 PCGS.** Gorgeous intermingled shades of light and dark cobalt-blue vie for attention on each side of this sharply struck Premium Gem, along with splashes of salmon color near the centers. The glassy fields are vibrantly reflective, and the delicate proof surfaces are defect-free. With only 12,000 business strikes produced, the proofs from this year (711 pieces struck) were destined to be a collector favorite. Population: 12 in 66, 3 finer (12/14).  
*Ex: Long Beach Signature (Heritage, 6/2006), lot 1368. NGC ID# 23XM, PCGS# 5590*

- 4635 1889 PR65 Cameo NGC.** The sharply struck, frosty devices of this Gem seem to float over the watery fields, yielding pronounced contrast. A veneer of soft champagne color covers each side. Census: 12 in 65, 16 finer (12/14). PCGS# 85590

**1889 Seated Quarter, PR67 Cameo  
Deeply Contrasted**

- 4636 1889 PR67 Cameo PCGS.** Sharply detailed in most areas, this impressive Superb Gem exhibits a touch of softness on the star centers. The fields are deeply reflective and contrast noticeably with the frosty devices. Shades of cerulean-blue and pale gold toning blanket both sides. Population: 4 in 67, 0 finer (12/14). PCGS# 85590

- 4637 1889 PR64 Ultra Cameo NGC.** The 1889 is characterized by a low total mintage for both business strikes and proofs. This is an all-brilliant example that has deeply reflective fields and sharply contrasting frosted-white devices. Census: 2 in 64, 5 finer (12/14). PCGS# 95590

**1890 Seated Quarter, Standout PR66 Cameo**

- 4638 1890 PR66 Cameo NGC. CAC.** Frosty, creamy-white centers cede to thin rings of iridescent patina on each side of this stunning Premium Gem Cameo proof. The proof strike is full and the preservation appears flawless, but it is the eye appeal that puts this piece over the top into the standout category. Census: 10 in 66 Cameo (1 in 66+), 19 finer (12/14). PCGS# 85591

**1891 Quarter, PR66  
Attractive Final-Year Proof**

- 4639 1891 PR66 PCGS. CAC. Briggs 1-A.** The proof 1891 Seated quarter is always in high demand among type collectors due to its status as the final issue of this long-running series. The present example is beautifully preserved, showing deep, glassy fields beneath a blanket of aquamarine toning on the obverse and concentric bands of mint-green, blue, and orange-gold on the reverse. The radial lines on the stars are incomplete, but the central devices show crisp detail. Population: 18 in 66 (1 in 66+), 5 finer (11/14). NGC ID# 23XP, PCGS# 5592

## BARBER QUARTERS

- 4640** 1892 MS66 PCGS. CAC. Type Two Reverse. An outstanding Premium Gem example of this first-year issue. Fully struck with blemish-free surfaces and strong satiny luster. The obverse displays a mixture of plum, sea-green, and gold toning. The reverse shows more subdued dark-olive and creamy tan patina. NGC ID# 23XT, PCGS# 5601

### 1892 Barber Quarter, MS68 ★ Registry Set Essential

- 4641** 1892 MS68 ★ NGC. Type One Reverse. The 1892 Barber quarter is always in demand from first-year type collectors and its substantial mintage of 8.2 million pieces makes it a reasonably available issue. Few examples can match the high-technical quality and tremendous eye appeal of the present coin, however. This magnificent MS68 example is spectacularly toned in natural shades of violet, lavender-gray, and apple-green toning, with well-detailed design elements and vibrant mint luster underneath. The impeccably preserved surfaces are free of noticeable distractions and visual presentation is terrific. This coin is tied with one other piece with the star designation for finest-certified honors at NGC. Census: 6 in 68 (2 in 68 ★), 0 finer (11/14). NGC ID# 23XT, PCGS# 5601

### 1892 Barber Quarter, MS68 Ideal First-Year Type Coin

- 4642** 1892 MS68 NGC. CAC. Type Two Reverse. This magnificent first-year MS68 Barber quarter possesses extraordinary eye appeal to complement the highest available technical grade. The design elements are fully struck and vibrant mint luster shines through iridescent shades of gold, blue, gray, and amber toning. The impeccably preserved surfaces show no post-strike flaws, but a spidery die crack connects the 2 in the date with the point of the bust and star 13. Some of the stars show evidence of recutting.

The Barber design, named after its creator, Chief Engraver Charles Barber, made its debut on the half dollar, quarter, and dime denominations in 1892. A large mintage of more than 8.2 million quarters was struck, making the date plentiful in high grades and a favorite choice of type collectors. This delightful specimen is among the finest survivors and should find a home in a top-shelf collection or Registry Set. Census: 6 in 68 (2 in 68 ★), 0 finer (12/14).

Ex: *Pittsburgh Elite Auction (Superior, 8/2004)*, lot 329. NGC ID# 23XT, PCGS# 5601

**1892-S Quarter, MS65  
Well-Struck, Mark-Free Reverse**

- 4643 1892-S MS65 NGC.** Type Two Reverse. Medium lavender and cream-gray toning graces the fields and devices. The borders display freckles of blue-green and tan-brown. A lustrous and well struck Gem. The reverse appears pristine and the portrait shows only wispy marks. The 1892-S is much scarcer than its Philadelphia and New Orleans cousins. Census: 6 in 65, 3 finer (11/14). NGC ID# 23XV, PCGS# 5603

**1892-S Barber Quarter, MS66+  
Low-Mintage First-Year Issue**

- 4644 1892-S MS66+ PCGS. CAC.** Only 964,079 Barber quarters were struck at the San Francisco Mint in 1892, the first year of the design. Although the hub was changed later in the year, this coin shows the older reverse with the crossbar on the E in UNITED still visible near the eagle's wing. The 1892-S is a popular issue with series specialists and mintmark type collectors alike.

The present coin is a high-end Premium Gem with sharply detailed design elements and vibrant mint luster under shades of lavender and pale gold toning. Well-preserved surfaces add to the terrific eye appeal. Population: 6 in 66 (1 in 66+), 2 finer (12/14). NGC ID# 23XV, PCGS# 5603

- 4645 1893-O MS65 PCGS.** The lustrous surfaces of this Gem display hints of golden-gray and exhibit well-struck design elements except for the usual softness in the arrow feathers. Nicely preserved throughout. Population: 17 in 65 (1 in 65+), 12 finer (12/14). NGC ID# 23XX, PCGS# 5605

- 4646 1894-O MS65 NGC.** This is a wonderful Gem example of this better-date Barber quarter, showing satiny silver surfaces complementing a bold strike. A slight hint of peripheral gold is noted, more prominent on the reverse. Light clash marks appear on each side. Pleasing and high-end for the grade. Census: 7 in 65 (1 in 65 ★), 8 finer (12/14). NGC ID# 23Y2, PCGS# 5608

- 4647 1894-S MS65 NGC.** Whispers of sky-blue and violet-purple visit the silver-gray lustrous surfaces of this sharply struck Gem. A handful of minute, unobtrusive marks might preclude an even finer grade. Census: 11 in 65, 3 finer (12/14). NGC ID# 23Y3, PCGS# 5609

- 4648 1895 MS65 PCGS.** This frosty and sharply struck Gem exhibits brilliant silver luster beneath delicate gold toning on the obverse, and rich reddish-gold toning on the reverse. A lovely representative. Population: 41 in 65, 13 finer (12/14). NGC ID# 23Y4, PCGS# 5610

- 4649 1895-O MS65 NGC.** Dusky bluish-gray patination imbued with reddish hues runs over both sides of this Gem quarter that exhibits sharply struck devices. Pleasing luster emanates from well cared for surfaces. Census: 11 in 65, 5 finer (12/14). NGC ID# 23Y5, PCGS# 5611

*Chief Engraver Charles E. Barber*

**1895-S Barber Quarter, MS68  
Tied for Finest Certified**

- 4650 1895-S MS68 NGC. DL-101.** Ex: Eliasberg. A leading Baltimore banker, Louis Eliasberg, Sr. could afford to purchase any 1895-S quarter for his collection, and claimed the present virtually pristine Superb Gem as his own. The satiny surfaces are well struck and exhibit golden-brown centers. The borders offer lilac-red and blue-green toning. The mintmark is clearly repunched west, a variety currently unlisted in *Cherrypickers'* although it certainly belongs in that useful reference. As of (11/14), NGC has certified only two examples as MS68, with none finer. The other MS68 appeared as lot 7114 in our August 2011 Chicago Signature. PCGS has certified one piece as MS67 with none finer.

Ex: Purchased directly from the San Francisco Mint by John M. Clapp in November 1895; John H. Clapp, Clapp Estate, Louis Eliasberg, Sr. in 1942, via *Stack's*; Eliasberg Collection, Part II (Bowers and Merena, 4/1997), lot 1557. NGC ID# 23Y6, PCGS# 5612

**1899-O Barber Quarter  
Conditionally Rare Gem Example**

- 4651 1899-O MS65 NGC.** For the Barber quarter dollar aficionado, this Gem Mint State example will be a pleasure to own. The surfaces are fully brilliant and, aside from the fletchings, the design detail is boldly defined. Just ten numerically finer examples have been certified by PCGS and NGC combined, and we cannot imagine any with finer aesthetic appeal (12/14).

Ex: Palm Beach Signature (Heritage, 3/2006), lot 610; FUN Signature (Heritage, 1/2009), lot 2482. NGC ID# 23YH, PCGS# 5623

- 4652 1901-O MS63 PCGS.** This scarce New Orleans issue had a mintage of 1.6 million coins, and Mint State survivors are elusive. The present Select Mint State example has mottled gold and iridescent toning that subdues the frosty luster. Population: 7 in 63, 25 finer (12/14). NGC ID# 23YP, PCGS# 5629

**1901-S Quarter, Problem-Free Good 6**

- 4653 1901-S Good 6 PCGS. CAC.** This Good 6 key-date example shows all of the L and Y in LIBERTY along with parts of the I and T. Additionally, Liberty's jawline is complete and the eye and ear show. The rim is complete on both sides, being a bit stronger on the obverse, and the letters RIBU and UN on the ribbon are complete. The sides of the shield are separate from the eagle and all peripheral reverse letters are strong. Each side is toned in two natural shades of gray, to which some gold is imbued in the reverse field. The surfaces are remarkably devoid of significant marks for a coin that has seen heavy circulation. All in all, a really nice, problem-free 1901-S quarter. NGC ID# 23YR, PCGS# 5630

**1901-S Quarter, VG8  
Famous Barber Key**

**4654 1901-S VG8 PCGS.** Of the three key Barber quarter dates struck at San Francisco, the 1901-S has the right combination of low mintage (the 1896-S saw more than double the number minted) and little notice (many collectors saved examples of the 1913-S, mintage 40,000 pieces) to become the top key of the series. This VG8 example has four complete letters and two halves visible in LIBERTY. The generally gray surfaces show a series of long, shallow marks crossing the portrait that are unsurprising on a well-worn coin but influence the grade nonetheless. NGC ID# 23YR, PCGS# 5630

**4655 1902-O MS64 PCGS.** Nearly imperceptible soft violet and olive patina rests on the lustrous surfaces of this near-Gem. The design elements are well-struck save for the usual softness in the upper-right shield corner. Population: 23 in 64 (2 in 64+), 19 finer (12/14). NGC ID# 23YT, PCGS# 5632

**4656 1902-S MS65 NGC.** Blazing luster embraces each side of this magnificent Gem. The design elements are well struck except for the often seen weakness in the upper right shield corner, and whispers of barely discernible light tan patina make occasional visits to both sides. Light grade-consistent marks on the obverse do not distract. Census: 9 in 65, 6 finer (12/14). *FUN Signature* (Heritage, 1/2005), lot 4132; *Central States Signature* (Heritage, 4-5/2009), lot 469; *Houston Signature* (Heritage, 12/2009), lot 563. NGC ID# 23YU, PCGS# 5633

**1905-O Quarter, Appealing MS65  
Extremely Underrated Series Issue**

**4657 1905-O MS65 NGC. CAC.** Struck to the extent of only 1.23 million pieces, the 1905-O Barber quarter issue is underrated and seldom found in grades above the Gem condition of the present piece. Appealing mint, ice-blue, citrine, and copper hues decorate each side of this nicely preserved and well-struck coin. Census: 2 in 65, 3 finer (12/14). NGC ID# 23Z3, PCGS# 5640

**1906 Barber Quarter, MS66+  
Nearly Unavailable Any Finer**

**4658 1906 MS66+ PCGS. CAC.** The 1906 quarter was not particularly well-saved and by the Premium Gem level it is a certified condition rarity. This MS66+ piece is minimally toned and solidly struck with faint glimmers of gold and a few specks of gunmetal-gray. Population: 25 in 66 (1 in 66+), 2 finer (11/14). NGC ID# 23Z5, PCGS# 5642

**1907-O Quarter, MS68  
Ex: Eliasberg, Hugon  
Single Finest Certified**

**4659 1907-O MS68 NGC. Ex: Eliasberg.** David Lawrence called the 1907-O "the poorest struck coin in the series. Some coins have 'mumps,' some show small depressions in the cheek, others are simply distorted." However, the present coin has a good strike, with only unimportant incompleteness on the right shield corner and the base of the fletchings. As noted in the Eliasberg catalog, "this coin is far better than normally seen." In fact, it is the single finest certified, and displays exquisite fire-red, apple-green, golden-brown, and dove-gray toning. A loupe reveals only infrequent incidental contact. *Ex: Louis E. Eliasberg, Sr. Collection* (Bowers and Merena, 4/1997), lot 1592; *John C. Hugon Collection* (Heritage, 1/2005), lot 4146. NGC ID# 23ZA, PCGS# 5647

- 4660 1909-S MS65 NGC.** The intensely lustrous surfaces of this Gem display hints of soft gold color at the margins under magnification. A couple of grade-consistent marks are visible on each side. Census: 8 in 65, 17 finer (12/14). NGC ID# 23ZK, PCGS# 5656

**1913-D Quarter, MS67  
Tied for Finest at PCGS, Ex: Eliasberg**

- 4661 1913-D MS67 PCGS.** Frosty mint luster shines through light golden patina on each side, as small russet accents dot the periphery. The strike is sharp, the preservation excellent. This coin offers outstanding eye appeal. The nominal mintage of 1.4 million pieces makes the 1913-D one of the slightly better dates in the Barber series. Of course, like all other Barber quarters, the 1913-D is a condition rarity at the MS67 level. This coin was once a highlight of the famous Eliasberg Collection, and it will be a prize for the advanced collector or Registry Set enthusiast. Population: 2 in 67, 0 finer (12/14).

*Ex: Louis Eliasberg, Sr.; Eliasberg Collection (Bowers and Merena, 4/1997), lot 1610; unknown intermediaries; purchased directly from John Feigenbaum at David Lawrence (11/2001). NGC ID# 23ZV, PCGS# 5665*

- 4662 1913-S VG8 NGC.** The letters L and Y of LIBERTY are clear on the headband, as are fragments of the I and T. The two sides of this key-date quarter show markedly different patina; the obverse is light gray with deep charcoal-blue suggestions around the devices, while the reverse shows only the devices and rims in the former color, the latter hue being dominant in the fields. The surfaces of both sides are remarkably clean for a coin having seen heavy circulation.
- Ex: Long Beach Signature (Heritage, 2/2009), lot 1144. NGC ID# 23ZW, PCGS# 5666*

**1914-S Quarter, MS64  
Delicately Toned Example**

- 4663 1914-S MS64 PCGS. CAC.** The silver-white surfaces show a light cast of golden and pale lavender color, and a loupe reveals a few grade-determining marks on the head of Liberty. The strike is soft on the lower claws and tail feathers of the eagle, yet only slightly weak on the right shield corner. Population: 21 in 64, 19 finer (11/14). NGC ID# 23ZZ, PCGS# 5669

- 4664 1916-D MS66 PCGS. CAC.** The high-mintage 1916-D quarters, struck in excess of 6.5 million pieces, were responsible both for the rarity of the 1916 Standing Liberty quarters and the 1916-D Mercury dimes, as their production delayed the production and launch of both other designs. This Premium Gem boasts generous luster over sandy-gold surfaces. PCGS shows only 14 numerically finer (12/14). NGC ID# 2426, PCGS# 5674

**1916-D Quarter, Radiant MS67 ★**

- 4665 1916-D MS67 ★ NGC.** Premium Gem 1916-D Barber quarters can be acquired with a degree of effort, but collectors seeking MS67 specimens face a major challenge; the two major services have graded a mere 26 pieces. The present offering is one of the two MS67s given the Star designation by NGC.

Dazzling luster radiates from remarkably well preserved surfaces that display deep electric-blue, crimson, and orange-gold peripheral toning. The design features are sharply defined, including all of the shield lines. Only the right (facing) claw and adjacent arrow feathers are a tad soft, as typically seen on this issue. Census: 12 in 67 (2 in 67+, 2 in 67 ★), 2 finer (12/14). NGC ID# 2426, PCGS# 5674

**PROOF BARBER QUARTERS**

- 4666 1892 PR65 Deep Cameo PCGS.** Type Two Reverse. The virtually brilliant surfaces are fully struck and flashy. The portrait and eagle are icy. The sole imperfection is a hair-thin line to the east of Liberty's ear.

*Ex: Santa Clara Signature (Heritage, 11/2002), lot 7073, which realized \$2,070. PCGS# 95678*

- 4667 1893 PR66 NGC.** Peripheral cobalt-blue and reddish-gold patina is more extensive on the obverse of this Premium Gem. The design elements are sharply defined. Census: 54 in 66 (1 in 66 ★), 33 finer (12/14). NGC ID# 2428, PCGS# 5679

**1893 Barber Quarter, PR67 Cameo  
Second Year of Barber Coinage**

- 4668 1893 PR67 Cameo PCGS. CAC.** This piece is an absolutely gorgeous coin. The specimen possesses chromium mirrored fields and sharply delineated devices, resulting in a beautiful Cameo effect. The combination of high technical grade and stunning eye appeal makes this coin worthy of a place in the most advanced collection. Population: 13 in 67, 6 finer (12/14).

*Ex: Central States Signature (Heritage, 5/2004), lot 7042; Scott Rudolph Collection / FUN Signature (Heritage, 1/2009), lot 2583; ANA Signature (Heritage, 8/2010), lot 5635. PCGS# 85679*

**1894 Barber Quarter, PR67  
Intermingled Iridescent Toning**

- 4669 1894 PR67 NGC.** Just under 1,000 proof Barber quarters were minted in 1894, and few survivors equal this Superb Gem. Both sides have lightly lustrous devices and fully mirrored fields, all beneath delicate intermingled iridescence. Census: 26 in 67 (2 in 67 ★), 5 finer (12/14). NGC ID# 2429, PCGS# 5680

**1894 Quarter, Mirrored and Toned PR67**

- 4670 1894 PR67 NGC.** This spectacular Superb Gem proof is toned in shades of emerald-green, violet-blue, and gray, with deeply mirrored fields shining through the toning. The design elements are sharply detailed throughout. A somewhat generous mintage of 972 proof Barber quarters was accomplished in 1894, making this early date a popular one for type purposes. Census: 26 in 67 (2 in 67 ★), 5 finer (12/14). NGC ID# 2429, PCGS# 5680

**1894 Barber Quarter, Untoned PR67**

- 4671 1894 PR67 NGC.** This third-year proof issue in the Barber quarter series, the 1894, was struck in the amount of 972 pieces, and the Superb Gem proof grade of the present piece is seldom surpassed at auction. This piece is completely untoned silver-white, showing essentially perfect preservation and a full strike. Census: 26 in 67 (2 in 67 ★), 5 finer (12/14). NGC ID# 2429, PCGS# 5680

- 4672 1894 PR66 Cameo NGC. CAC.** Splashes of cobalt-blue and lavender concentrate at the obverse borders of this Premium Gem Cameo, while whispers of light golden-tan make occasional visits to the reverse. An attentive strike sharpens the design elements, except for localized softness on the shield. Some faint hairlines mix with die polish lines on Liberty's cheek and neck. Census: 14 in 66 (1 in 66+), 16 finer (12/14).  
Ex: ANA Signature (Heritage, 3/2008), lot 541. PCGS# 85680

- 4673 1895 PR66 PCGS.** Variegated multicolored toning runs over both sides of this Premium Gem. Sharply struck devices contrast with the reflective fields when the coin is rotated slightly under a light source. Population: 20 in 66, 16 finer (12/14). NGC ID# 242A, PCGS# 5681

- 4674 1895 PR66 NGC.** From a proof mintage of 880 pieces, this sharply detailed Premium Gem displays deeply mirrored fields under shades of pale gold and powder-blue toning. Both sides have been well cared for. Census: 31 in 66, 28 finer (12/14). NGC ID# 242A, PCGS# 5681

**1895 Quarter, PR68 Cameo  
Remarkably Appealing**

- 4675 1895 PR68 Cameo NGC.** Cameos certified at the PR68 numeric level are the epitome of desire for the collector seeking an example of the proof 1895 Barber quarter, but are only rarely available. This representative is seemingly perfect in terms of preservation, with heavily frosted devices set against deep mirrors. The coin appears brilliant at first glance, though close examination reveals a faint suggestion of pale champagne color. Census: 17 in 68 (4 in 68 ★, 1 in 68+★), 1 finer (12/14). PCGS# 85681

**1895 Barber Quarter, PR68 Cameo  
None Certified Finer at PCGS**

**4676 1895 PR68 Cameo PCGS. CAC.** The 1895 proof Barber quarter is sometimes overshadowed by its more famous Morgan dollar counterpart of that date, but both issues claim the same 880 piece mintage. If anything, the quarters are somewhat more elusive. Few survivors of either denomination can match the incredible technical quality and visual appeal of the present coin. This magnificent PR68 example exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces are enhanced by vivid shades of champagne-gold and cerulean-blue toning. The deeply mirrored fields contrast boldly with the frosty devices, creating an intense cameo effect. Population: 6 in 68, 0 finer (11/14). PCGS# 85681

**4677 1896 PR66 PCGS.** From a mintage of 762 proofs, this high-end near-Gem showcases full sharpness of the motifs and deep mirroring in the fields. The obverse is awash in eye appeal with peripheral blue and violet rings encircling vivid lemon-gold margins and a soft champagne center; the reverse is more traditionally toned in uneven shades of aquamarine, amber, and milky-tan patina. An incredible coin, with just a few wispy hairlines precluding Superb Gem status. Population: 22 in 66 (1 in 66+), 22 finer (12/14). NGC ID# 242B, PCGS# 5682

**1896 Quarter, PR67 Cameo  
Richly Toned**

**4678 1896 PR67 Cameo PCGS. CAC.** The proof Barber quarter specialist will appreciate the nearly flawless surfaces and needle-sharp design definition which this piece possesses. Splashes of ocean-blue, lavender, forest-green, and amber-gold toning encompass each side, while the underlying fields exhibit a profound depth of mirroring. Population: 8 in 67 (1 in 67+), 2 finer (12/14). PCGS# 85682

**1896 Quarter, PR68 Ultra Cameo  
Stunning Contrast**

**4679 1896 PR68 Ultra Cameo NGC.** Many collectors consider the proofs of 1896-1898 to be a high mark for the U.S. Mint, and after one glance at this PR68 Ultra Cameo quarter it would be hard to disagree for the first of those years at least. Stunningly frosted devices stand out from gleaming mirrors that show only a hint of golden-peach color at the lower reverse and a small spot of toning near the E on the ribbon the eagle holds in its beak. A high-grade coin that also displays well, welcome traits for the wise collector who knows the two all-too-frequently do not go hand-in-hand. Census: 11 in 68 (1 in 68 ★), 3 finer (11/14). PCGS# 95682

**1898 Quarter, PR67 Deep Cameo  
Lovely Toning and Eye Appeal**

- 4680 1898 PR67 Deep Cameo PCGS Secure.** The field-device contrast is exceptional, and accentuated by a warm champagne-gold glaze over each side. The frosty motifs and the mirrored fields are not inhibited by the patina, and the striking definition is impeccable. An eye-catching Superb Gem that is superior in both technical and aesthetic appeal. Population: 10 in 67, 10 finer (12/14). PCGS# 95684

- 4681 1900 PR65 PCGS.** A sharply struck Gem proof from a mintage of 912 pieces. Deep shades of lavender, rose, and sea-green patina cover the obverse, while the reverse exhibits equally deep hues of rose-brown, gold, and electric-blue. A well-preserved example with immense eye appeal. Population: 28 in 65, 36 finer (11/14). NGC ID# 242F, PCGS# 5686

**1900 Quarter, PR68 ★  
Dazzling Eye Appeal  
Sole Finest Non-Cameo at NGC**

- 4682 1900 PR68 ★ NGC.** This eye-appealing Superb Gem delivers surprisingly noticeable field-motif contrast, though the obverse is perhaps a trifle weak in that regard for NGC to award the appropriate designation. Traces of light golden color accent otherwise brilliant surfaces, while a hint of sky-blue is seen in the fields when tilted beneath a light. The strike is tack-sharp throughout and the preservation is in line with the immense visual appeal. NGC has encapsulated only seven non-Cameo coins in this numerical grade with none finer, and the present example is the only one to receive a Star designation (11/14). NGC ID# 242F, PCGS# 5686

**1900 Barber Quarter, PR66 Cameo**

- 4683 1900 PR66 Cameo PCGS. CAC.** Vivid shades of golden-brown and cerulean-blue toning blanket the surfaces of this delightful Premium Gem, with sharply detailed design elements and deeply reflective fields, under the patina. No mentionable distractions are evident and eye appeal is terrific. Population: 17 in 66, 16 finer (12/14). PCGS# 85686

- 4684 1901 PR66 NGC.** A debut issue at the Third Philadelphia Mint on Spring Garden Street, this Premium Gem proof has exceptional eye appeal with deeply mirrored fields and sharply detailed devices beneath lovely iridescent toning. Census: 30 in 66 (1 in 66+), 33 finer (12/14). NGC ID# 242G, PCGS# 5687

- 4685 1902 PR66 NGC.** Deeply toned blue-violet and emerald on the obverse. A touch of gold on the cap points to the lighter tones to be found on the reverse interior. Great eye appeal for this issue with a "lucky" mintage of 777 pieces. Census: 40 in 66 (1 in 66+, 1 in 66+★), 21 finer (12/14). NGC ID# 242H, PCGS# 5688

- 4686 1903 PR65 Cameo PCGS. CAC.** The surfaces are untuned save for a slight golden cast. The sharp proof strike and lack of mentionable contact give this lovely Gem proof broad eye appeal. Population: 16 in 65 Cameo (1 in 65+), 32 finer (12/14). PCGS# 85689

- 4687 1904 PR66+ NGC.** A pleasingly toned specimen with variegated iridescent hues of lilac, lavender, rust-gold and sea-green noted over clean, mark-free surfaces. Fully struck with highly reflective fields and gorgeous eye appeal. Census: 37 in 66 (1 in 66+, 1 in 66★), 39 finer (12/14). NGC ID# 242K, PCGS# 5690

**1904 Quarter, PR67 Cameo  
Exceptional Contrasted Example**

- 4688 1904 PR67 Cameo NGC.** Cameo examples of this issue are rare in any grade, and the present coin is remarkably close to the top of the condition census. Just a suggestion of light golden toning accents the deep mirrors and satiny devices, while the strike is needle-sharp and the preservation is simply outstanding. Census: 5 in 67 (1 in 67+), 1 finer (11/14). PCGS# 85690

- 4689 1905 PR66 NGC.** Considerable silver brilliance remains with delicate gold toning over much of the obverse and reverse. This lovely piece has noticeable contrast, although insufficient for a Cameo designation. Census: 38 in 66 (1 in 66+), 26 finer (12/14). NGC ID# 242L, PCGS# 5691

- 4690 1905 PR66 PCGS.** Remarkable orange-gold, lavender, apple-green, and cobalt-blue toning endows this intricately struck high grade proof type coin. An aesthetic treat for the connoisseur. Housed in an old green label holder.  
*Ex: New York Signature (Heritage, 12/2011), lot 3532.* NGC ID# 242L, PCGS# 5691

- 4691 1905 PR66 NGC. CAC.** The obverse displays outrageously iridescent orange, violet, green, and gold, while the reverse offers more conventional golden-brown and aqua-blue patina. A well struck and carefully preserved Premium Gem proof from the issue of just 727 pieces. Census: 38 in 66 (1 in 66+), 26 finer (12/14). NGC ID# 242L, PCGS# 5691

**1905 Quarter, PR67+  
Modest Contrast**

- 4692 1905 PR67+ NGC. CAC.** Ex: Eric P. Newman Collection. This high-end Superb Gem displays a fair amount of field-motif contrast for a non-Cameo proof. The strike is strongly brought up over all the design elements, and each side reveals no mentionable distractions. Census: 23 in 67 (1 in 67+), 2 finer (11/14). Ex: Eric P. Newman Numismatic Education Society. NGC ID# 242L, PCGS# 5691

- 4693 1906 PR65 NGC.** A splendid Gem example from this low proof mintage of 675 pieces. Fully struck and free of distractions. A deep coating of rich purple-red and green patina covers each side. NGC ID# 242M, PCGS# 5692

- 4694 1906 PR66 PCGS.** Deeply and distinctly toned with blue-to-green outer shades and yellow-to-silver interiors. Mildly contrasted, sharply struck, and strongly appealing. Population: 39 in 66 (2 in 66+), 25 finer (12/14). NGC ID# 242M, PCGS# 5692

**1908 Quarter, PR67  
Gorgeously Toned**

- 4695 1908 PR67 NGC.** A marvelously toned Superb Gem representative from the later low-contrast era of proof Barber coinage. Ample waves of blue-to-violet drape the fields, while deep green elements visit the margins. Sharply struck and amply appealing. Census: 24 in 67 (3 in 67 ★), 6 finer (12/14). NGC ID# 242P, PCGS# 5694

- 4696 1910 PR65 Cameo PCGS.** A glittering, untuned jewel of this proof issue, silver-white throughout both sides and with a full strike and bold field-device contrast. Population: 19 in 65 Cameo, 28 finer (12/14). PCGS# 85696

- 4697 1911 PR66 NGC.** Orange, reddish-gold, and lime-green patination is more extensive and takes on deeper hues on the reverse of this Premium Gem. This sharply struck proof is marvelously well preserved. Census: 33 in 66 (1 in 66 ★), 29 finer (12/14). NGC ID# 242T, PCGS# 5697

**1911 Quarter, PR66+ Cameo  
Beautifully Toned and Reflective**

- 4698 1911 PR66+ Cameo PCGS. CAC.** Dueling palettes are equally compelling on this lovely Premium Gem proof, showing shades of copper, mauve, and silver-gold on the obverse with mint and aqua on the reverse. Abundant luster and generous reflectivity radiate from beneath each side, and the proof strike is all one could hope for. PCGS# 85697

- 4699 1914 PR66 Cameo NGC.** Soft champagne patina dominates this Premium Gem Cameo, joined by blushes of cobalt-blue and lavender on the obverse. The design elements are sharply struck and both sides are marvelously well preserved. Census: 12 in 66, 6 finer (12/14). PCGS# 85700

**1915 Quarter, Pristine PR67**

- 4700 1915 PR67 NGC.** This reflective Superb Gem proof displays pleasing blue, pink, and gray patina on each side amid immaculately preserved, fully struck-up surfaces and excellent eye appeal. From the mintage of 450 pieces, only about two dozen achieve this grade at NGC and PCGS combined (12/14). NGC ID# 242X, PCGS# 5701

**1915 Quarter, PR68  
High-Grade Series-Ender**

- 4701 1915 PR68 NGC.** By 1915 Mint officials openly were looking forward to replacing Charles Barber's designs for minor silver coinage, and Barber's being forced to oversee said replacement was a source of considerable conflict. The officials were not the only ones, however; proof production was small in the final two years of the Barber silver design. This 1915 quarter, one of just 450 proofs for its year, has bold golden-champagne border toning around partially pearl-gray fields. Census: 4 in 68 (1 in 68 ★), 0 finer (11/14). NGC ID# 242X, PCGS# 5701

## STANDING LIBERTY QUARTERS

### 1916 Standing Liberty Quarter, Affordable VG8

- 4702** 1916 VG8 NGC. The bottom half to three-quarters of each date digit is visible, but even if the date were effaced, there are numerous telltales including the split reel at the top of Liberty's head. The surfaces show merely extensive wear in keeping with the grade, but one thin mark across Liberty's torso is the only mentionable contact. An affordable and pleasing example of this key date. NGC ID# 242Y, PCGS# 5704

### 1916 Standing Liberty Quarter, VG8 A Nice Collectible Example

- 4703** 1916 VG8 NGC. Lower-grade circulated examples of this important key date were the object of young collectors' desire in the 1930s and '40s, when it was still possible to find one in circulation if you were lucky enough, and they remain in strong demand among budget-minded collectors. The present piece is well-circulated, with natural steel-gray patina and problem-free surfaces. The top portion of the date is weak, as is typical at this grade level, though the numerals remain clearly identifiable. NGC ID# 242Y, PCGS# 5704

### 1916 Quarter, Key-Date AU Details

- 4704** 1916 — Improperly Cleaned — NGC Details. AU. The bright surfaces of this key-date representative display a splash of brownish color in the upper-left part of Liberty and below the B in LIBERTY. The outer shield is somewhat better defined than typically seen, including all rivets. The only mentionable mark occurs in the right reverse field. This piece is really not all that bad despite the NGC disclaimer. NGC ID# 242Y, PCGS# 5704

### 1916 Standing Liberty Quarter, AU53 Short-Lived Type One Design

- 4705** 1916 AU53 PCGS. CAC. **Type One.** The 1916 Standing Liberty quarter was not struck until late in the year, and not officially released into circulation until the following January. Only 52,000 examples were struck at the Philadelphia Mint, and none were produced at the branch mints, because of late start. The Type One design was modified partway through the year in 1917, creating a short, two-year design type that is extremely popular with type collectors. Accordingly, the 1916 Standing Liberty quarter is always in high demand from collectors of several different disciplines.

The present coin is an attractive AU53 specimen, with just a trace of wear on the well-detailed design elements. The lustrous, lightly abraded surfaces show attractive shades of greenish-gold and pink toning. Eye appeal is quite strong for the grade. NGC ID# 242Y, PCGS# 5704

**1916 Standing Liberty Quarter, AU53  
First-Year, Low-Mintage Key**

- 4706 1916 AU53 PCGS. CAC.** The 1916 Standing Liberty quarter has a reported mintage of 52,000 pieces, an extremely low production total for any 20th century United States coin. Some examples were saved by contemporary collectors for their novelty value, but not as many as might be expected for this first-year issue, making the 1916 the sought-after key to the Standing Liberty series. The short-lived Type One design makes the issue important for advanced type collectors, as well.

This attractive AU53 example shows just a trace of actual wear on the well-detailed design elements and the lightly abraded surfaces retain much of their original mint luster. Hints of golden-tan and lavender-gray toning enhance the visual appeal. NGC ID# 242Y, PCGS# 5704

- 4707 1917 Type One MS66+ Full Head PCGS.** Areas of attractive yellow-gold, amber, and red-brown patina appear on both sides of this high-end Premium Gem representative. In addition to the Full Head details, all of the shield rivets appear and display strong definition overall. Rich luster is an additional attribute of this lovely piece. Population: 18 in 66+ Full Head, 76 finer (12/14). *From The College Collection.* NGC ID# 242Z, PCGS# 5707

- 4708 1917 Type One MS66+ Full Head PCGS. CAC.** Delicate gold toning resides on both sides of this sharply detailed Premium Gem. The surfaces exhibit underlying frosty mint luster. PCGS has only certified 76 finer examples of this issue (12/14). *From The College Collection.* NGC ID# 242Z, PCGS# 5707

**1917 Type One Quarter, MS67 Full Head  
Fully Struck and Lightly Toned**

- 4709 1917 Type One MS67 Full Head PCGS.** The 1917 Type One quarters are remarkable for their full strikes, an attribute that was unfortunately abandoned in the Type Two redesign. This Superb Gem displays honey-gold central patina with marginal accents in a range of pastel colors, a beautiful coin and an excellently preserved one, to boot. Population: 76 in 67 (4 in 67+) Full Head, 0 finer (12/14). NGC ID# 242Z, PCGS# 5707

- 4710 1917-D Type One MS66 Full Head NGC.** This gorgeous Premium Gem features a full strike with bold head and shield details on the obverse, and sharp eagle details on the reverse. Both sides are full brilliant and untoned, exhibiting frosty silver luster. Census: 73 in 66 (5 in 66+) Full Head, 26 finer (12/14). NGC ID# 2432, PCGS# 5709

**1917-D Type One Quarter, MS66+ Full Head  
Rare in Finer Full Head Grades**

- 4711 1917-D Type One MS66+ Full Head PCGS.** Only four Type One Standing Liberty quarter issues were produced, one of them the key to the series. The 1917-D Type One issue is scarce but still available for a price even in MS66 Full Head, though finer coins are rare. This example adds a Plus to the grade and offers bold amber and blue-violet patina over most of the obverse with a broad window of light silver-gray at the central reverse. PCGS has graded just 22 pieces finer with Full Head (11/14). *From The College Collection.* NGC ID# 2432, PCGS# 5709

---

**1917-D Type One Quarter, Intensely Lustrous  
MS66+ Full Head**

**4712** 1917-D Type One MS66+ Full Head PCGS. CAC. Intense luster radiates from both sides of this Type One quarter offering, each of which displays whispers of soft champagne-gold color with faint purplish highlights. Crisp detail transcends the full head to include all rivets, the vertical stripes of the inner shield, and most of the eagle's breast feathers. Both sides are remarkably well preserved. Population: 134 in 66 (6 in 66+) Full Head, 22 finer (12/14). NGC ID# 2432, PCGS# 5709

**4713** 1917-S Type One MS66 PCGS. CAC. Wisps of electric-blue and violet gravitate to the margins of this lustrous Premium Gem. The design elements are well-struck, including the rivets and vertical stripes of the inner shield. Population: 19 in 66, 2 finer (12/14). *From The College Collection.* NGC ID# 2433, PCGS# 5710

**4714** 1917-S Type One MS65 Full Head NGC. Deep orange-brown patination clings to the margins of this Gem. The solid strike transcends the Full Head to include strong detail on the rivets and vertical lines of the shield. A highly attractive piece. NGC ID# 2433, PCGS# 5711

---

**1917-S Type One Quarter, MS66 Full Head  
Sumptuous Strike and Surfaces**

**4715** 1917-S Type One MS66 Full Head PCGS. The surfaces are fully struck and untuned save for a slight golden cast on both sides of this sumptuous Superb Gem Full Head example. A loupe is required to locate even the most abstruse signs of contact. The 1917-S is the most elusive of the 1917-PDS Type One issues at this grade level. Accompanied by an MS66 Full Head NGC sticker. NGC ID# 2433, PCGS# 5711

---

**1917 Type Two Quarter, Brilliant MS67  
A Great Piece for a High-Grade Type Set**

**4716** 1917 Type Two MS67 NGC. CAC. A well struck and very attractive example of the Type Two design type. The surfaces are brilliant and heavily frosted with no mentionable abrasions. The strike is very close to full with nearly all of the detail complete on Liberty's head. An outstanding type coin. Census: 6 in 67 (1 in 67 ★), 0 finer (11/14). *Ex: FUN Signature (Heritage, 1/2006), lot 2469.* NGC ID# 2434, PCGS# 5714

**4717** No lot.

---

**1918/7-S Quarter, AU53  
Significant 20th Century Overdate**

**4718** 1918/7-S FS-101 AU53 PCGS. The 1918/7-S quarter is one of the major keys in the Standing Liberty series, arguably rarer and more sought-after than even the well-known 1916. The number struck is uncertain, but it was most likely minuscule, as this issue is rare in comparison to the demand. This example displays uniformly bright, silver-gray color, with only slight wear over the high points of the design — much of the central weakness is due to striking deficiency, not circulation. The date numerals are weak, but the overdate feature is plain. PCGS# 395949 Base PCGS# 5726

---

**1919 Quarter Dollar, MS66 Full Head  
Sharply Struck Throughout**

**4719 1919 MS66 Full Head NGC.** The 1919 quarter dollar sports a hefty mintage exceeding 11 million pieces, and can be located through near-Gem with relatively little difficulty. Full Head Premium Gem examples such as the current offering become more challenging. Vibrant luster emanates from the nearly untoned surfaces and sharply struck design elements transcend the fullness seen on Liberty's head. All shield rivets and the chain mail are strong and most lines in the inner shield show. Just a few trivial, unobtrusive marks likely preclude an even higher numeric grade. Great overall eye appeal. Census: 48 in 66 Full Head, 17 finer (10/14). NGC ID# 243B, PCGS# 5729

**4720 1919 MS66 Full Head PCGS.** Ebullient luster exudes from the untoned surfaces of this Premium Gem. The design elements are sharply struck and both sides are impeccably preserved. Population: 75 in 66 (11 in 66+) Full Head, 26 finer (12/14). NGC ID# 243B, PCGS# 5729

**4721 1919-D MS64 PCGS.** Copious luster runs on each side of this near-Gem 1919-D quarter, showing few marks for the grade and silvery surfaces with an attractive, light bluish-gold tint visible under a light. All but a couple of shield rivets are visible, and only one mentionable mark shows on the eagle's upper wing. NGC ID# 243C, PCGS# 5730

**4722 1919-D MS64 NGC.** Autumn-gold and jade-green enrich the borders of this lustrous near-Gem. Splendidly free from marks, and the grade seems conservative despite a hint of struck-in grease above the R in QUARTER. The head is dished but the waist and date are bold. Census: 45 in 64, 44 finer (12/14). NGC ID# 243C, PCGS# 5730

**4723 1919-S MS63 NGC.** Lustrous surfaces exhibit well-struck design elements and have a veneer of soft golden-gray color. A couple of small obverse marks limit the grade. NGC ID# 243D, PCGS# 5732

---

**1920 Standing Liberty Quarter, MS67+  
Spectacular Peripheral Toning**

**4724 1920 MS67+ PCGS. CAC.** The 1920 Standing Liberty quarter is one of the most well-struck issues in the series, as even non-Full Head coins are available with sharp central definition. This high-end Superb Gem is an exceptional coin in that regard, showing bold shield rivets and stars, with sharp feather detail along the leading edge of the eagle's left (facing) wing. Liberty's head is nearly full, with just a trifle of weakness at the temple precluding the coveted designation. The silver centers are ringed by vivid shades of burnt-orange, greenish-gold, and magenta toning, with vibrant mint luster underneath. This issue is a significant rarity at the MS67 grade level, regardless of striking quality, and none are certified numerically finer. Population: 20 in 67 (5 in 67+), 0 finer (12/14). NGC ID# 243E, PCGS# 5734

---

**1920 Quarter, MS66 Full Head  
Seldom Seen So Fine**

- 4725 1920 MS66 Full Head PCGS.** The 1920 quarter is a tricky enough issue in any Mint State grade, but as a Full Head Premium Gem it is a distinct condition rarity and anything better is extremely rare. This MS66 Full Head piece has dappled red-to-gold patina along the margins, most visibly at the bottom right reverse. The strike is sharp not only on Liberty's head but the rivets of her shield. Population: 28 in 66 (1 in 66+) Full Head, 5 finer (11/14). From *The College Collection*. NGC ID# 243E, PCGS# 5735

**1920 Quarter, MS66 Full Head  
Lustrous Surfaces, Medium Density Toning**

- 4726 1920 MS66 Full Head PCGS. CAC.** The head and shield of this elusive coin are both sharply detailed. Frosty silver surfaces shine through medium ivory, gold, and iridescent toning on both sides. Hints of blue are also evident on the reverse. Full Head examples of this date, especially in Premium Gem or finer condition, are highly elusive. Population: 28 in 66 (1 in 66+) Full Head, 5 finer (11/14). Ex: *Long Beach Signature* (Heritage, 9/2007), lot 1338. NGC ID# 243E, PCGS# 5735

**1920-D Quarter, MS66+  
Delicately Toned**

- 4727 1920-D MS66+ PCGS. CAC.** This delightful Denver quarter has a delicate silver-blue tint across much of each side and bold underlying luster. Though the detail falls short of Full Head and a few reverse stars are flat, the all-around eye appeal is remarkable. Population: 30 in 66 (1 in 66+), 2 finer (11/14). From *The College Collection*. NGC ID# 243F, PCGS# 5736

**1920-D Quarter, MS65 Full Head  
Incredibly Sharp Throughout**

- 4728 1920-D MS65 Full Head PCGS. CAC.** Although not quite as rare as its San Francisco counterpart, the 1920-D Standing Liberty quarter is a challenging date in Full Head, and is decidedly rare with such at the Gem grade level. This example is not only a Full Head candidate, but also exhibits bold definition on the shield rivets, the stars, and the central gown folds. The connoisseur will also appreciate the bold date numerals and the sharp detail on the eagle's left (facing) wing, both of which are frequently soft on this Denver issue. Light champagne toning deepens to warm olive-gold around the peripheries, while satiny underlying luster is largely undisturbed by surface abrasions. Population: 33 in 65 Full Head, 14 finer (12/14). NGC ID# 243F, PCGS# 5737

**1920-S Standing Liberty Quarter MS64  
Well-Detailed Full Head Specimen**

- 4729 1920-S MS64 Full Head PCGS.** Mottled toning, in light shades of gray, gold, and green appears on the obverse of this near-Gem. The reverse displays just a touch of toning along with attractive frosty luster. All of the shield rivets are present, though not fully defined. Population: 36 in 64 Full Head, 23 finer (11/14). NGC ID# 243G, PCGS# 5739

- 4730 1921 MS64 NGC.** There is no trace of toning on either side of this Choice Mint State semi-key date quarter dollar. Strong shield details and nearly full head details characterize this exceptional example. NGC ID# 243H, PCGS# 5740

- 4731 1921 MS64 PCGS. CAC.** A sharply struck Choice Mint State piece, this scarce Standing Liberty quarter has frosty ivory surfaces with full mint luster and excellent eye appeal. The head is partially detailed and all of the shield rivets are evident. NGC ID# 243H, PCGS# 5740

---

**1921 Quarter, Well-Struck MS64**

- 4732 1921 MS64 PCGS. CAC.** This well-struck near-Gem displays strong chain mail, rivets, and vertical lines of the inner shield. Glowing luster emanates from the silver-gray surfaces that reveal just a couple of grade determining marks on the eagle. The 1921 is popular as a relatively low mintage piece less than 2 million. NGC ID# 243H, PCGS# 5740

---

**1921 Quarter, Satiny and Untoned MS65  
Elusive Low-Mintage Date**

- 4733 1921 MS65 NGC.** Even though this coin lacks sufficient definition to be classified as a Full Head example, the remainder of each side shows a pleasing amount of detail remaining: The shield rivets are all perceptible if not bold, each digit of the date is complete, and the eagle is decently detailed on the wings while soft on the breast. This silver-white coin is satiny and untoned, showing good eye appeal despite a couple of small marks that delimit the grade. NGC ID# 243H, PCGS# 5740

---

**1921 Quarter, MS65 Full Head  
Important Key Date**

- 4734 1921 MS65 Full Head PCGS. CAC.** This low-mintage Philadelphia issue is well-known as a key date in all grades, but Full Head examples are the most highly prized by specialists. The head and shield details on this piece are sharp, and bold definition is also seen on the eagle's breast and wing feathers. The date numerals are weakly defined, however, a characteristic to which this specific issue is unusually prone; the first 1 is barely discernable, but the 921 are readily identifiable, if still flat. Still, there are no singular signs of contact, and the surfaces boast delightful golden-silver toning over splendid luster. Population: 51 in 65 (1 in 65+) Full Head, 20 finer (12/14). Ex: *Boston Signature* (Heritage, 8/2010), lot 4107. NGC ID# 243H, PCGS# 5741

---

**1923 Standing Liberty Quarter, MS65  
Elusive Example With Full Head Definition**

- 4735 1923 MS65 Full Head PCGS.** A highly lustrous and essentially untuned Gem that has strong definition on the devices. Only a few scattered marks are present on the surfaces. Despite a mintage of over 9.7 million pieces, a comparatively small percentage of pieces attain Full Head status. Population: 42 in 65 Full Head, 37 finer (12/14). Ex: *FUN Signature* (Heritage, 1/2007), lot 4192; *Dallas Signature* (Heritage, 10/2008), lot 759. NGC ID# 243J, PCGS# 5743

---

**1923-S Quarter, MS63  
Nice Head Detail**

- 4736 1923-S MS63 PCGS.** A well-struck example of this popular key date, though Liberty's head is just a trifle too soft to warrant a Full Head designation from PCGS. The surfaces show satiny luster, with tinges of lavender-gold color overall. A few deeper russet hues are seen periodically around the peripheries. Minimal abrasions are present. NGC ID# 243K, PCGS# 5744

---

**1923-S Quarter, MS64  
Above-Average Strike**

- 4737 1923-S MS64 PCGS.** All three sprigs are present on Liberty's head, though the hairline grows just a bit too weak over the ear to qualify for the Full Head designation. The date is bold and the leading edge of the eagle's left (facing) wing is sharp. Mottled golden toning accents each side, but is deeper on the obverse. This key San Francisco issue is always in strong demand in all grades, with or without Full Head detail. NGC ID# 243K, PCGS# 5744

---

**1923-S Standing Liberty Quarter, MS65  
A Key Date of the Series**

- 4738 1923-S MS65 PCGS.** The 1923-S Standing Liberty quarter claims a low mintage of 1.3 million pieces and is a sought-after key date in the series. Rich satin luster emanates from the surfaces of this appealing Gem. The coin has a light golden overall appearance, with scattered areas of deeper toning appearing primarily at the outer edges. NGC ID# 243K, PCGS# 5744

---

**1923-S Quarter, MS62 Full Head  
Satiny, Well-Struck Representative**

- 4739 1923-S MS62 Full Head NGC.** The key date status of the 1923-S quarter increases demand for the limited supply of Full Head representatives. This is a pleasing example in a collectible grade, showing a sharp Full Head and bold date numerals. The surfaces are only minimally abraded for the numeric level. A pale champagne hue blankets each side, with the margins exhibiting additional tinges of deeper gold and sky-blue. NGC ID# 243K, PCGS# 5745

---

**1924 Standing Liberty Quarter, MS66 Full Head  
Vivid Peripheral Toning**

- 4740 1924 MS66 Full Head PCGS.** The 1924 is one of the more easily obtainable pre-1925 Type Two issues in Full Head, though the population of such pieces thins considerably at the Premium Gem grade level, and finer representatives are genuinely rare. The obverse of this piece exhibits deep forest-green, maroon, and olive-gold peripheral toning, while the reverse displays a faint golden hue. Struck from mildly rusted dies, with matte-like luster, though the design definition is nonetheless bold throughout. Population: 44 in 66 (6 in 66+) Full Head, 11 finer (11/14). NGC ID# 243L, PCGS# 5747

---

**MS66 Full Head 1924 Quarter  
Exposed Date Subtype**

- 4741 1924 MS66 Full Head PCGS.** This is an amazingly attractive example of this design-challenged subtype, with the exposed date that was not recessed until the following year, 1925. Not only the exposed date but also the shield rivets, the head details, and the eagle's breast are all present, at least, if not bold. Lustrous powder-gray centers cede to iridescent hues, more prominent on the reverse. Population: 44 in 66 (6 in 66+) Full Head, 11 finer (12/14). Ex: Long Beach Signature (Heritage, 9/2011), lot 3464. NGC ID# 243L, PCGS# 5747

---

**1924 Quarter, MS66+ Full Head  
Lightly Toned and Lustrous**

- 4742 1924 MS66+ Full Head PCGS.** A carefully preserved, sharply struck example of this unusually challenging Philadelphia issue. Frosty luster shines through a tint of light golden color, with sharp stars and shield rivets. The date numerals are clearly defined, while the upper obverse shows just a touch of the usual die rust that affects this issue. Population: 44 in 66 (6 in 66+) Full Head, 11 finer (12/14). NGC ID# 243L, PCGS# 5747

---

**1924 Quarter, MS67 Full Head  
Phenomenal Sharpness and Luster**

- 4743 1924 MS67 Full Head NGC.** A spectacular Superb Gem, this Full Head 1924 Standing Liberty quarter exhibits remarkable definition not only Liberty's head, which is sharp, but also on the shield lines and rivets, the stars, the central gown folds, and the date numerals. Vibrant, satiny luster illuminates a delicate golden hue over each side. Close examination reveals areas of die rust, most notably in the obverse recesses, but also in the central and upper reverse fields. This issue is frequently seen with areas of die rust, with many examples appearing almost matte-like in texture. All in all, this piece is a remarkable example of this pre-1925 Philadelphia issue. Census: 14 in 67 (1 in 67+ Full Head, 1 in 67 ★) NGC ID# 243L, PCGS# 5747

---

**1924-S Standing Liberty Quarter, MS66  
Only Two Finer Coins at PCGS**

- 4744 1924-S MS66 PCGS.** Oh so close to Full Head status, this piece would make a fine addition to a sharply struck, but not technically fully struck set of Standing Liberty quarters. Bright mint luster is seen over each side, and most of the obverse and reverse is brilliant except for the occasional dab of color. Population: 34 in 66 (1 in 66+), 2 finer (11/14). NGC ID# 243N, PCGS# 5750

---

**1924-S Quarter, MS66  
Frosty Luster**

- 4745 1924-S MS66 PCGS. CAC.** Though the 1924-S quarter is available for a price in grades through Gem, finer pieces are scarce with our without a Full Head. Though this Premium Gem lacks the ear-hole necessary for Full Head status, it is a beautiful coin nonetheless with frosty silver luster. Population: 34 in 66 (1 in 66+), 2 finer (11/14).  
*From The College Collection.* NGC ID# 243N, PCGS# 5750

- 4746 1925 MS66 Full Head PCGS.** This crisply defined Premium Gem displays soft champagne toning on its lustrous surfaces. Both sides are impeccably preserved. Population: 64 in 66 (1 in 66+) Full Head, 9 finer (12/14). NGC ID# 243P, PCGS# 5753

---

**1926 Quarter, MS66+ Full Head  
Above-Average Central Definition**

- 4747 1926 MS66+ Full Head PCGS.** The 1926 is surprisingly almost as difficult to locate with a sharp strike as is the San Francisco issue from this year. The present piece is boldly defined on the head, shield rivets, and stars, with sharp detail also noted on the leading edge of the eagle's left (facing) wing, which is almost always weak. Pastel shades of mint-gold and lavender blanket each side, growing deeper toward the borders. Population: 37 in 66 (5 in 66+) Full Head, 2 finer (12/14). NGC ID# 243R, PCGS# 5755

- 4748 1927-S AU50 NGC.** Semibright silver surfaces display appropriately defined design elements after factoring in high-point wear. No significant marks are evident. The 1927-S is a well-known key date. NGC ID# 243W, PCGS# 5764

---

**1927-S Quarter, Key-Date AU55**

- 4749 1927-S AU55 NGC.** This key-date quarter shows a low mintage of 396,000 pieces. Moreover, less than one percent are struck with Full Heads. This Choice AU specimen displays a whisper of gold color at the peripheries and retains a good amount of luster. The surfaces on both sides are quite clean. NGC ID# 243W, PCGS# 5764

- 4750 1928 MS66 Full Head NGC.** A visually pleasing representative with full head definition and soft, satin luster. Only the eagle's breast feathers and a couple of shield rivets are somewhat weak. Olive, tan, and amber coloration is seen near the lower obverse periphery. Well preserved and essentially free of coin-to-coin contact. Kline says that: "Many coins of this date and mintmark will please the most exacting connoisseur of the Standing Liberty Quarter series." Census: 15 in 66 Full Head, 13 finer (12/14). NGC ID# 243X, PCGS# 5767

---

**1928-D Quarter, MS65+ Full Head  
Sharp Head and Shield**

- 4751 1928-D MS65+ Full Head PCGS.** The 1920s were hardly a banner decade for good striking definition, particularly at the branch mints. The 1928-D quarter is part of the trend, making this MS65+ Full Head example all the more remarkable. It has sharp detail not only on Liberty's head but the rivets of her shield. The surfaces are silver-white aside from a touch of peach at the upper left obverse. Population: 28 in 65 (1 in 65+) Full Head, 20 finer (11/14). NGC ID# 243Y, PCGS# 5769

---

**1928-S Quarter, MS67 Full Head**  
**Remarkably Well-Preserved**

- 4752** 1928-S MS67 Full Head NGC. CAC. Medium intensity electric-blue, purple, and gold patination is more extensive on the obverse border of this Superb Gem. Lustrous surfaces exhibit bold definition in addition to the Full Head, including the chain mail and vertical stripes of the inner shield. Only a couple of rivets adjacent to Liberty reveal the usual softness. Remarkably well-preserved. Elusive at this level. Census: 39 in 67 (1 in 67+ Full Head, 2 in 67 ★) NGC ID# 243Z, PCGS# 5771

---

**1929-S Quarter, Vibrant MS67 Full Head**

- 4753** 1929-S MS67 Full Head NGC. Both sides of this remarkable, sharply struck Superb Gem have vibrant frosty luster beneath a thin layer of lovely, nearly imperceptible champagne toning. The only design weakness that is evident will be seen at the lower left part of the shield, where three rivets are poorly defined, a typical characteristic of the issue. Census: 31 in 67 (6 in 67 ★) Full Head, 1 finer (11/14).  
Ex: FUN Signature (Heritage, 1/2009), lot 2715. NGC ID# 2444, PCGS# 5777

---

**1930-S Quarter, MS67 Full Head**  
**Tied for Finest Certified at PCGS**

- 4754** 1930-S MS67 Full Head PCGS. A frosty, beautifully preserved high-end 1930-S representative. The figure of Liberty and the eagle's feathers are well-struck. Pale champagne centers yield to more vivid peripheral toning of mint-green, gold, amber, and cherry-red hues. This issue is always in strong demand in high grades, as it is somewhat scarcer than its Philadelphia counterpart overall. Population: 20 in 67 Full Head, 0 finer (12/14). NGC ID# 2446, PCGS# 5781

---

**WASHINGTON QUARTERS**

---

**1932 Quarter, MS66+**  
**Surprisingly Rare Any Finer**

- 4755** 1932 MS66+ PCGS Secure. The original intent for the Washington quarter was a one-year-only commemorative design, though John Flanagan's obverse has (with modifications) survived for 82 years and counting. The mintmarked coins bearing this date are famously low-mintage, yet the 1932 itself is a condition rarity any finer than this example's MS66+, with just three MS67 coins better in the PCGS *Population Report* (11/14). Blue, violet, and peach-gold rings cover much of the obverse, but on the reverse they stick to the margins, in both cases fading to faintly white-dappled silver centers. NGC ID# 2447, PCGS# 5790

- 4756** 1932 MS66+ PCGS. CAC. In the first year of the venerable Washington quarter dollar series, the Philadelphia Mint struck just more than 5.4 million examples, more than 10 times the mintage at either Denver or San Francisco. Easily the best choice for first-year type purposes, this Premium Gem representative should serve the needs of the high-end date or type specialist in this immensely popular series. This piece is somewhat softly struck but boasts immaculately clean surfaces and soft, shimmering mint luster. The silver-gray coloration is enhanced by light accents of gold and reddish-tan on both sides. Population: 18 in 66+, 3 finer (12/14). NGC ID# 2447, PCGS# 5790

- 4757** 1932-D MS64 PCGS. Well-struck and untoned, with blazing luster and shimmering silver-white surfaces. A few scattered ticks and small milky spots are all that separate this lovely piece from Gem status. A key Washington quarter issue with an original mintage of only 436,800 pieces.  
Ex: Dallas Signature (Heritage, 10/2006), lot 1048. NGC ID# 2448, PCGS# 5791

- 4758** 1932-D MS64 PCGS. CAC. Deep olive and brown toning visits parts of the borders of this lustrous near-Gem. This sharply struck piece has been well cared for. Higher-grade coins are difficult to locate. NGC ID# 2448, PCGS# 5791

---

**1932-D Quarter, MS65**  
**First-Year Key**

- 4759** 1932-D MS65 NGC. The mintmarked Washington quarters dated 1932 are famously low-mintage (fewer struck per issue than the famous 1909-S VDB cents) and notoriously elusive in Gem and better states. This MS65 Denver coin has only a hint of pink and blue patina over bold silver luster. Census: 25 in 65, 0 finer (11/14). NGC ID# 2448, PCGS# 5791

**1932-D Washington Quarter, MS65  
Outstanding Key Date Example**

**4760 1932-D MS65 PCGS.** An impressive Gem example of this first-year Washington quarter key issue. The lustrous surfaces are essentially brilliant, with just the faintest wisps of champagne color noted in the fields and near the borders. A few minor surface marks are consistent with the MS65 grade designation. Population: 74 in 65 (1 in 65+), 1 finer (11/14). NGC ID# 2448, PCGS# 5791

**1932-D Quarter, MS65  
Famous First-Year Key**

**4761 1932-D MS65 PCGS. CAC.** The 1932-D quarter, like its San Francisco counterpart of the same year, is a famous first-year key of a design that was intended at first to be a one-off commemorative but later was extended into its own series. A mere 436,800 pieces were struck and few were saved by collectors or the general public during this Depression-era year. This Gem has two green labels, one the PCGS holder and the other a CAC sticker. Generous luster filters through pastel peach, blue, and lavender-violet patina with windows of silver-gray. Population: 74 in 65 (1 in 65+), 1 finer (11/14). NGC ID# 2448, PCGS# 5791

**1932-S Quarter, MS65  
Key-Date Condition Rarity**

**4762 1932-S MS65 NGC.** The three Washington quarter issues of 1932 were intended to be one-off (circulating) commemoratives, though after a one-year break for 1933 it was the Washington design, not the Standing Liberty, that saw issue. This key-date S-mint Gem has significant luster through silver-blue and violet patina with hints of apricot and peach. NGC and PCGS combine for just nine coins numerically finer (11/14). NGC ID# 2449, PCGS# 5792

**1934 Heavy Motto Quarter, MS67  
Delightful Toning**

**4763 1934 Heavy Motto, FS-403, MS67 PCGS Secure. CAC.** Though the Heavy Motto is the least costly variety of the several for 1934 quarters, nonetheless it is a significant condition rarity in MS67. This Superb Gem is delightfully toned gold, orange, and umber around the margins, most visibly at the top of the obverse, while the centers remain delightful frosty silver. Population: 10 in 67 (3 in 67+), 0 finer (11/14). PCGS# 146001 Base PCGS# 85794

**4764 1935 MS67+ NGC.** Hints of soft violet and champagne color rest on the lustrous surfaces of this high-end Superb Gem. This is a well-struck and nicely cared for specimen. NGC ID# 244D, PCGS# 5797

**1935 Quarter, MS67+  
Just One Finer at PCGS**

**4765 1935 MS67+ PCGS. CAC.** By 1935 the novelty of the Washington quarter was well over, though it is unsurprising that an issue of almost 32.5 million pieces should be available for a price even in Superb Gem. This frosty and minimally toned MS67+ example with a green CAC label represents a cut above even the usual standard. PCGS has graded only coin as MS68 or better (11/14). NGC ID# 244D, PCGS# 5797

**4766 1935-D MS67 NGC.** The 1935-D is a scarce, semikey issue from the the Denver mint. This splendid coin is one of the finest-known examples from a mintage of 5,780,000 pieces. An intensely lustrous Superb Gem with only a slight degree of toning noticeable mainly on the reverse, and impressively preserved surfaces that are nearly flawless. Census: 13 in 67, 0 finer (11/14). NGC ID# 244E, PCGS# 5798

**4767 1936-D MS66 PCGS.** Well-struck with a touch of golden toning. The surfaces display very minor abrasions and the obverse fields exhibit substantial reflectivity. An original Gem example of this conditionally scarce issue.  
*Ex: Central States Signature (Heritage, 4/2006), lot 1743.* NGC ID# 244H, PCGS# 5801

**1936-S Quarter, MS67  
Condition Rarity**

**4768 1936-S MS67 NGC. CAC.** With just over 3.8 million pieces struck, the 1936-S quarter is reasonably available even in most Mint State grades, though Superb Gems pose a challenge. This MS67 example has considerable band-and-patch rose-violet and auburn-gold toning on the obverse, though the reverse remains largely pearl-gray. Census: 9 in 67 (2 in 67 ★), 0 finer (11/14). NGC ID# 244J, PCGS# 5802

**1936-S Quarter, Superb Gem  
Rewarding Registry Coin**

**4769 1936-S MS67 PCGS Secure. CAC.** A little-saved issue of fewer than 4 million pieces, the 1936-S quarter is a rarity at the Superb Gem level and unobtainable any better. This MS67 piece has generous luster and eye appeal. The obverse has considerable gold and peach patina, while similar colors appear only at the margins on an otherwise silver-gray reverse. Population: 34 in 67 (2 in 67+), 0 finer (11/14). NGC ID# 244J, PCGS# 5802

**1939 Quarter, MS68  
A Registry Essential**

**4770 1939 MS68 PCGS. CAC.** It was only chance that let this 75-year-old Washington quarter survive in MS68 condition, but a Registry collector will be thankful for that chance. Faint green-gold peripheral elements yield to softly frosted silver interiors. The whole is marvelous. Population: 7 in 68, 0 finer (12/14). NGC ID# 244R, PCGS# 5808

**4771 1939-S MS67+ NGC. CAC.** The Registry Set specialist should take note of this offering. It is a remarkable, well- struck, highly lustrous example, essentially brilliant on the obverse with light, speckled russet toning over the reverse. Both sides reveal virtually impeccable preservation and the absence of any noticeable marks. Census: 39 in 67 (1 in 67+, 2 in 67 ★), 0 finer (11/14). NGC ID# 244T, PCGS# 5810

**1940 Quarter, MS68**  
**One of Two at PCGS, None Finer**

**4772 1940 MS68 PCGS. CAC.** PCGS has graded exactly two MS68 1940 quarters and none finer (12/14), which is by itself reason enough for many Registry collectors to pursue this piece with fervor. For those who simply like a gorgeous silver Washington quarter, this coin's delicate green-gold tints against pale white and blue luster offer plenty of appeal. Detail is generally strong, though as usual with these issues there is a degree of softness on the wig and the eagle's feathers. A CAC green label reaffirms the magnificent surface preservation. A coin whose simple beauty will lodge in the mind. NGC ID# 244U, PCGS# 5811

**4773 1940-S MS67+ NGC. CAC.** This high-end Superb Gem offers razor-sharp definition on all design elements, with vibrant mint luster on both sides and terrific eye appeal. The 1940-S Washington quarter is a scarce issue in MS67 condition and NGC has certified only two numerically finer examples (12/14). NGC ID# 244W, PCGS# 5813

**1941-D Quarter, MS67+**  
**Bright Surfaces, Lovely Color Scheme**

**4774 1941-D MS67+ PCGS Secure.** With just one numerically finer example certified by both services combined (11/14), this MS67+ coin will be a major asset to any Washington quarter Registry set. Bold, dappled toning ranges from pale orange to deeper peach, mauve, and plum with broad areas of remaining silver and ample luster underneath. NGC ID# 244Y, PCGS# 5815

**1942-D Washington Quarter, MS67+**  
**Tied for Finest at PCGS**

**4775 1942-D MS67+ PCGS Secure.** Fewer than 17.5 million 1942-D quarters were struck and the time and place were not conducive to examples being saved. This is one of a handful of pieces tied at the top with frosty silver over much of each side with multicolored bands around most of the obverse margins and all of the reverse. Population: 42 in 67 (3 in 67+), 0 finer (11/14). NGC ID# 2453, PCGS# 5818

**4776 1942-D Doubled Die Obverse, FS-101, AU58 PCGS.** Doubling is apparent on the date, LIBERTY, and IN GOD WE TRUST. This is a sharply struck coin with creamy luster and only a handful of minute marks on the satiny surfaces. An outstanding near-Mint example of this noteworthy doubled die variety. Population: 12 in 58, 11 finer (11/14). PCGS# 145011 Base PCGS# 95818

**1942-D FS-101 Quarter, MS65**  
**Doubled Die Obverse**  
**Single Finest Certified**

**4777 1942-D Doubled Die Obverse, FS-101, MS65 NGC.** Very thick letters in the obverse legends confirm this dramatic and conditionally rare *Guide Book* doubled die variety. A lightly toned almond-gold Gem. Highly lustrous and crisply struck with a pristine reverse and unimportant obverse field grazes. A small mark is noted on Washington's jaw. The single finest certified by either major service (11/14). PCGS# 145011 Base PCGS# 95818

**1943-S Quarter, MS67  
Doubled Die Obverse**

- 4778** 1943-S Doubled Die Obverse, FS-101, MS67 NGC. Bold die doubling is present on all obverse lettering, most notably on IN GOD WE TRUST and the date. This is a well-known and popular Washington quarter variety, but is decidedly rare at the Superb Gem grade level. NGC has attributed only two examples in this grade, with none numerically finer (11/14). This piece is sharply detailed, with frosty luster shining through iridescent lavender-gold and pale mint-green hues. The surfaces are seemingly devoid of abrasions. PCGS# 145154 Base PCGS# 5823

**1945-S Quarter, MS67+  
A Registry Collection Essential**

- 4779** 1945-S MS67+ PCGS. CAC. Just over 17 million Washington quarters were struck at San Francisco in 1945, but only six of them have been certified as MS67+ by PCGS and that service recognizes none finer (11/14). This piece not only has the grade, it is backed up by a CAC label. Two small patches of color, gunmetal on Washington's cheek and gold-green on the eagle's left (facing) wing are obvious, while similar, lesser hues grace the margins on this bright and decently detailed beauty. NGC ID# 245D, PCGS# 5829

**1947 Quarter, MS67+  
Just One Finer at NGC**

- 4780** 1947 MS67+ NGC. CAC. This post-World War II Philadelphia issue saw a substantial mintage of more than 22.5 million pieces, yet the date remains genuinely scarce in Superb Gem and better grades. This notable MS67+ piece has a mix of silver shades across each side with touches of pale apricot and deeper peach along the borders. NGC has graded just one numerically finer example (11/14). NGC ID# 245H, PCGS# 5833

**1949-D Washington Quarter, MS67+  
Just Two Finer at PCGS**

- 4781** 1949-D MS67+ PCGS Secure. No particular effort was made to save examples of the 1949-D quarter, which saw a mintage of just over 10 million pieces, and so the survival of coins as high-grade as this MS67+ beauty was up to chance. Both sides are frosty with largely silver centers and considerable border toning that ranges from gold to peach and plum with a few splashes of mauve near the date. Population: 52 in 67 (6 in 67+), 2 finer (11/14). NGC ID# 245R, PCGS# 5840

**1950-D/S Washington Quarter, MS65  
Popular FS-601 Variety**

- 4782** 1950-D/S FS-601 MS65 PCGS. CAC. The remnants of an undertype S are visible below the primary D mintmark on this popular *Cherrypickers* variety. The design elements are sharply rendered and the well-preserved surfaces radiate vibrant mint luster. Eye appeal is outstanding. Population: 18 in 65 (1 in 65+), 10 finer (12/14). PCGS# 145638 Base PCGS# 5843

- 4783** 1950-S/D FS-601 MS66 PCGS. CAC. The underlying D mintmark is visible beneath the primary S. The brilliant surfaces of this Premium Gem display pleasing frosty luster, and the design elements are well-struck. A few minute marks are consistent with the grade designation. Highly popular among Washington quarter collectors. Population: 36 in 66 (3 in 66+), 5 finer (12/14). PCGS# 145639 Base PCGS# 5845

- 4784** 1952-D MS67 PCGS Secure. CAC. Splashes of variegated lime-green, crimson, yellow-gold, and grayish patina cascade over the lustrous surfaces of this Superb Gem. The design elements are nicely struck. Population: 11 in 67, 0 finer (12/14). NGC ID# 2462, PCGS# 5850

- 4785** 1953-D MS67 PCGS. Olive-green and russet toning occurs sporadically at the margins with the remaining surfaces brilliant. All devices are boldly impressed and only a tiny tick in the hair on Washington's head is mentioned for accuracy. No finer examples certified at either PCGS or NGC (12/14). NGC ID# 2465, PCGS# 5853

- 4786** 1953-D MS67 PCGS Secure. CAC. A lovely Superb Gem that is tied for the finest certified, this example has satiny silver luster shining through delicate gold and iridescent toning that is enriched along the obverse border. Population: 26 in 67, 0 finer (12/14). NGC ID# 2465, PCGS# 5853

- 4787** 1954-D MS67 PCGS. A swath of multicolored toning resides on the lower obverse. Lustrous well-preserved surfaces exhibit sharply defined devices. Population: 13 in 67 (1 in 67+), 0 finer (12/14). NGC ID# 2468, PCGS# 5856

**4788 1954-D MS67 PCGS. CAC.** An impressive Superb Gem, this Denver Mint quarter has gold toning at the lower obverse with bluish-gray over the balance of the obverse and reverse surfaces. An exceptional example that is tied for the finest certified. Population: 13 in 67 (1 in 67+), 0 finer (12/14). NGC ID# 2468, PCGS# 5856

**1955-D Quarter, MS67 ★  
Lone Star-Certified Example This Fine**

**4789 1955-D MS67 ★ NGC. CAC.** A captivating and colorful Superb Gem example of this 90% silver issue, the only Star-certified example at that grade level in NGC's *Census Report* with no MS68 or better pieces in the combined certified population (11/14). Bold luster radiates through silver-blue patina that takes on multicolored dappled hues near the borders. NGC ID# 246A, PCGS# 5859

**1959 Quarter, Vibrant MS67  
Among the Finest Certified**

**4790 1959 MS67 PCGS.** Mint State Washington quarters of 1959 are readily available through Premium Gem after which the certified population declines precipitously. Neither PCGS nor NGC has graded any finer than MS67. Vibrantly lustrous surfaces display a sliver of light gold toning around the obverse margin that cedes to deeper rainbow coloration at the reverse periphery. Both sides are sharply struck and impeccably preserved. Population: 9 in 67, 0 finer (11/14). NGC ID# 246H, PCGS# 5866

**1959 Quarter, Pastel-Toned MS67**

**4791 1959 MS67 PCGS.** Pale pastel mint, gold, and heather hues accent the obverse fields on this frosty Superb Gem 1959 quarter, while the reverse shows a slight golden cast. Impeccable preservation and impressive eye appeal are both on abundant display on this Registry Set essential. Population: 9 in 67, 0 finer (12/14). NGC ID# 246H, PCGS# 5866

**4792 1960 MS67 PCGS.** Fully struck, highly lustrous, and impressively preserved, this lovely Superb Gem displays radiant surfaces that are mostly brilliant, with the addition of speckled reddish-brown and olive patina near the margins. An obvious candidate for the finest Registry Set of Washington quarters. Population: 14 in 67, 0 finer (11/14). NGC ID# 246K, PCGS# 5868

**1960-D Quarter, MS67  
None Finer at PCGS, CAC Label**

**4793 1960-D MS67 PCGS. CAC.** Despite a mid-eight-figures mintage, the 1960-D is tricky to find in the Superb Gem range. PCGS has graded just ten MS67 coins, none with the Plus designation, and zero finer (11/14). This Superb Gem has a CAC green label to back up the grade, and one glance shows why. Smooth and shimmering surfaces are silver-white with gold-to-mauve borders and tiny amber dots across Washington's portrait. On the reverse the eagle's breast feathers are faint but visible, not a guarantee on this Denver issue. NGC ID# 246L, PCGS# 5869

**1960-D Quarter, MS67  
Deeply Toned Obverse, Lightly Toned Reverse**

**4794 1960-D MS67 PCGS. CAC.** Deep burgundy, copper, and emerald hues appear on the obverse of this Superb Gem quarter while the reverse is untuned silver-white with a thin ring of pale gold. The preservation puts this piece in a distinct minority of the large mintage, however, showing only a couple of faint pecks on the bust of Washington. Population: 10 in 67, 0 finer (12/14). One of seven in this grade at CAC. NGC ID# 246L, PCGS# 5869

**1962-D Quarter, MS67  
None Numerically Finer**

**4795 1962-D MS67 PCGS.** Strong silvery-white luster yields to traces of light golden toning around the borders on this nearly pristine Superb Gem. This incredible coin is tied with just eight others at the top of the PCGS population charts (12/14), and ranks nearly half of a grade point finer than the piece represented in the current highest-rated Registry Set. NGC ID# 246R, PCGS# 5873

**1962-D Quarter, Toned MS67+  
Sole Finest at PCGS**

- 4796 1962-D MS67+ PCGS. CAC.** This is an incredible-looking 1962-D quarter with different toning palettes on each side. The obverse features emerald-green, fire-red, sunset-orange, and pale gold, while the reverse exhibits pale orange and mint-green near the periphery with a considerable area of untoned silver-white remaining. The obverse appears completely free of mentionable contact, while the reverse shows three marks in the lower tail feathers and the wreath below. Of the nine submissions in MS67 at PCGS, this is the sole MS67+ there, a “pop 1/0” coin as none are finer (12/14). NGC ID# 246R, PCGS# 5873

- 4797 1963 MS67 PCGS.** One wonders how many hundreds — or thousands? — of Mint State rolls would have to be searched to come across such an impeccable “modern” issue — one of only 13 1963 quarters in the ultimate MS67 PCGS grade, including one MS67+ (12/14). Silver surfaces are completely untoned and show just a couple of stray, faint marks. NGC ID# 246S, PCGS# 5874

**1969 Quarter, Superb Gem  
A Post-Silver Registry Key**

- 4798 1969 MS67 PCGS.** Despite a nine-figure mintage, this cupro-nickel issue is surprisingly challenging as a Superb Gem. The present MS67 piece, housed in an early blue-label PCGS holder, is bright and largely free of color. A handful of tiny marks are grade-consistent, a minor nick on the eagle's left (facing) leg the most visible among them. Population: 5 in 67 (1 in 67+), 0 finer (11/14). NGC ID# 2473, PCGS# 5883

**PROOF WASHINGTON QUARTERS**

- 4799 1936 PR66 NGC.** A captivating example with pastel green, rose, and speckled russet patina over both sides. Fully struck and well-preserved, with near-flawless surfaces.  
*From The Rawlin “Mac” McNelly Collection.* NGC ID# 27HN, PCGS# 5975

**1942 Quarter, Reflective PR67+  
Incredible Eye Appeal**

- 4800 1942 PR67+ PCGS. CAC.** The silver centers are reflective and unperturbed, accented by thin crescents of iridescence on each side, an incredibly eye-appealing example of this last-year Washington quarter proof from the early years of the series. PCGS reports only eight in the PR67+ grade and six finer, all PR68 (12/14). NGC ID# 27HV, PCGS# 5981

## EARLY HALF DOLLARS

**1794 Half Dollar, O-101, Fine 15**  
Excellent Eye Appeal for the Grade

**4801 1794 O-101, R.4, Fine 15 PCGS.** The star 1 piercing Liberty's lowest hair curl, the star 9 distant from the Y in LIBERTY, and the leaf pair on the reverse between OF are sufficient to attribute the very scarce O-101 variety. This is the earlier die state of the reverse, lacking the die crack from a leaf to (O)F to the rim but showing the crack to a pair of leaves below the first S in STATES. This is a lovely example of the die marriage, showing few mentionable signs of contact despite the 45 points of wear. Attractive pale blue, gold, and heather hues appear under a loupe. Showing excellent eye appeal, this piece is certified in a green-label holder. PCGS# 39200 Base PCGS# 6051

**1794 Half Dollar, O-104, VG10**  
Deep Charcoal-Gray Patina

**4802 1794 O-104, R.5, VG10 PCGS.** Star 1 piercing the lowest curl at its left point and the reverse showing nine berries left, 10 right, are sufficient to attribute this variety. The O-104 is what we would call "normally rare" in that it is ranked R.5 and thus is of about median rarity within the series. The prevailing deep charcoal-gray tones are accented with glimpses of golden patina around some of the device edges. The surfaces are relatively unabraded save for a small patch of scrapes on the lower reverse, mostly left of the eagle's lower left (facing) leg. Population: 3 in 10, 0 finer (12/14). PCGS# 39204 Base PCGS# 6051

**1795 Half Dollar, VF30**  
**O-102, Two Leaves**  
Problem-Free, Lightly Toned

**4803 1795 2 Leaves, O-102, R.4, VF30 NGC.** A cream-gray example with glimpses of tobacco-brown on the obverse margin. No marks are conspicuous, and hints of luster fill the curls and outline the letters. A splendid collector coin of the scarce and popular introductory type. 32 die varieties are known for the 1795, and most range in rarity between High R.3 and R.5. PCGS# 39215 Base PCGS# 6052

**4804** 1795 2 Leaves, O-104, R.4 — Surfaces Smoothed — PCGS Genuine. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been whizzed. Pearl-gray centers and fields cede to autumn-brown borders. Both sides are uniformly whizzed and smoothing is evident on the upper left obverse field and on the reverse field above and below the eagle's beak. The reverse is granular near 8 o'clock. PCGS# 39219 Base PCGS# 6052

**4805** 1795 2 Leaves, O-106, R.6, Fine 12 PCGS. The sole 1795 die variety with the berries arranged 9 x 10. Equally diagnostic is the prominent diagonal break through the eagle's neck, likely the reason for the rarity of O-106. The deep walnut-brown surfaces are surprisingly unabraded despite a small obverse rim nick at 2 o'clock. Light mint-made obverse adjustment marks are noted near the ear and star 11. PCGS# 39222 Base PCGS# 6052

---

**1795 Flowing Hair Half Dollar, Fine 15  
Late Die State O-107a**

**4806** 1795 2 Leaves, O-107a, R.5, Fine 15 PCGS. The late die state of O-107, recognized by the bisecting die crack from the rim through T in UNITED, all the way across to the rim between OF and AMERICA. Most of the top hairlines are worn smooth on this pleasing Fine 15 specimen, but some interior detail remains on the lower hair and the curl tips are all distinguishable. The dove-gray surfaces are lightly abraded. PCGS# 39224 Base PCGS# 6052

**4807** 1795 2 Leaves, O-108, R.4 — Cleaning — PCGS Genuine. VF Details. This nicely detailed Flowing Hair type coin displays blended peach-gold and olive-green toning, except for slender peripheral arcs of cream-gray near 2:30 on the obverse and 5 o'clock on the reverse. PCGS# 39225 Base PCGS# 6052

---

**1795 2 Leaves Half, A Over E in STATES, AU50  
O-113a, Possible Condition Census Coin**

**4808** 1795 2 Leaves, A Over E in STATES, O-113a, R.4, AU50 NGC. The 1795 2 Leaves, A over E in STATES reverse die blunder is a popular one but still unlisted in the *Guide Book*; if it ever does achieve a separate listing, its popularity will skyrocket. The lumpish die break between the 5 in the date and the last star identify the obverse, here in its later state showing a wispy die crack connecting the letters in LIBERTY. This piece is nicely detailed and shows some luster remaining under orange-gray surfaces on each side that are free of major contact. This piece may reside within or just outside of the Condition Census for the variety. PCGS# 39254 Base PCGS# 39252

---

**1795 O-117a Half Dollar, XF40  
Two Leaves Reverse**

**4809** 1795 2 Leaves, O-117a, R.4, XF40 NGC. A short die crack connects the rim to the bust between the 5 and the final star on this late die state. The sharply repunched CA in AMERICA identifies the reverse. An attractive example, this half dollar has rich blue-steel and champagne toning with exceptional eye appeal. PCGS# 39234 Base PCGS# 6052

**4810** 1795 2 Leaves, O-119, R.4, Fine 12 PCGS. A cream-gray Flowing Hair type coin with lavender and powder-blue undertones. Liberty's hair and the eagle's right (facing) wing plumage are nicely defined. No marks are noticeable. PCGS# 39236 Base PCGS# 6052

**1795 Flowing Hair Half Dollar, AU Details  
O-122, Elusive Variety**

**4811** 1795 — Repaired — 2 Leaves, O-122, R.5, PCGS Genuine. AU Details. The O-122 die pair is known for a large, curving die crack on the reverse, capturing the right (facing) wing tip, olive leaves and legend from M of AMERICA to the right bow end. In later states, the die sinks and virtually eliminates the lettering within the break. Despite the tooling and repair work done on this half dollar, the state of the early die state is still well detailed. Of special interest is die clashing beneath Liberty's chin and as series of angled die lines from the neck, through the hair, and extending into the left obverse field. Few examples of the O-122 show this feature, although all retain some of the die lines within the hair that remain visible when in high enough grade. This coin has sharp detail but is lacks the original patina and luster due to the handwork, accounting for the assigned net grade. PCGS# 39238 Base PCGS# 6052

**1801 O-101 Half Dollar, VF35  
Rich Original Toning**

**4812** 1801 O-101, R.3, VF35 NGC. The two reverse dies for this scarce first year issue are distinguished by the presence or lack of a large 'tail' on the R in LIBERTY. O-101, which has the tail, is somewhat less scarce. The variety also features two teardrop-shaped die lumps near the arrowheads. A nicely defined example without consequential marks. Toned deep dove-gray aside from russet freckles on the lower left portion of the reverse. Ex: St. Louis Central States Signature (Heritage, 5/2005), lot 7103. PCGS# 39267 Base PCGS# 6064

**1801 O-101 Half, Deeply Toned, Lustrous XF40**

**4813** 1801 O-101, R.3, XF40 NGC. The date is large and close, the first A in AMERICA is clear of the wing feathers, and a couple of large die-defect lumps appear on the reverse. Few marks appear for the grade on this deeply toned orange-gray piece with blue rim accents. Some luster still percolates upward from beneath the toning. PCGS# 39267 Base PCGS# 6064

**1802 Draped Bust Half, VF30  
O-101, Sole Die Pair for the Issue**

**4814** 1802 O-101, R.3, VF30 PCGS. Dusky-gold borders merge into warm, fawn-gold centers with glimpses of mint luster remaining among the devices of this moderately circulated early half. Some well-hidden, light adjustment marks angle across the field stars, clouds, and shield, but do not disturb the substantial visual appeal. Always in demand by Overton collectors and date specialists alike as the sole die pair of the issue. A low-mintage date with just 29,890 pieces struck. PCGS# 39269 Base PCGS# 6065

1802 O-101 Half, XF Details  
Scarce Low-Mintage Date

- 4815** 1802 O-101, R.3 — Scratch — PCGS Genuine. XF Details. A pair of parallel pinscratches extend from the L in LIBERTY to the shoulder curl. The upper left obverse is hairlined, but the remainder of the coin is attractive. Golden-brown, navy-blue, orange-gold, and slate-gray toning consumes both sides. Overton-101 is the sole variety for this challenging and low mintage date. PCGS# 39269 Base PCGS# 6065

1805 O-109 Half Dollar, XF45  
Conditionally Scarce Type

- 4816** 1805 O-109, R.3, XF45 PCGS. Deep olive-green, stone-gray, and mahogany-brown toning encompasses this well defined early half dollar. Marks are unimportant aside from a couple of faint diagonal lines on the shield. A few small mint-made lint marks are noted near the profile and branch. Moderate adjustment marks on the upper reverse are as made. PCGS# 39282 Base PCGS# 6069

1805 O-111 Half Dollar, AU53  
Unlisted 'Early' Die State

- 4817** 1805 O-111, R.2, AU53 PCGS. Rich golden-brown, apple-green, and plum-mauve toning blankets this partially lustrous Draped Bust type coin. Marks are minimal aside from unobtrusive clusters beneath the hair ribbon and shoulder curl. The die state is earlier than usually seen, without the crack to the right wing between the AM in AMERICA. Nonetheless, the dies display several cracks and clashes. PCGS# 39285 Base PCGS# 6069

1806 Half Dollar, Choice AU  
No Stem, Pointed 6, O-109  
Superior Surfaces

- 4818** 1806 Pointed 6, No Stem, O-109, R.1, AU55 NGC. The usual multiply clashed die state without the crack from star 12 toward the neck. A well struck and satiny type representative. Bathed in deep shades of golden-brown, powder-blue, and lavender. Minimally abraded and unquestionably desirable. On O-109, the absence of a stem makes the branch appear to be growing from the eagle's claw. PCGS# 39310 Base PCGS# 6073

1806 Pointed 6, No Stem Half, O-109, AU55  
Popular *Guide Book* Variety

- 4819** 1806 Pointed 6, No Stem, O-109, R.1, AU55 PCGS. The sole die marriage with a Pointed 6 and No Stem Through Claw, a popular *Guide Book*-listed variety (one of eight for the date 1806). The die crack from star 12 into the field that would characterize O-109a is in its nascent stage but not yet fully formed. This is an attractive, untuned silver-white example with lots of luster. PCGS# 39310 Base PCGS# 6073

1806 O-109 Half Dollar, MS62  
Pointed 6, No Stem Through Claw

- 4820** 1806 Pointed 6, No Stem MS62 NGC. O-109, R.1. This lovely Draped Bust half dollar exhibits full satin luster beneath delicate gold, russet, and sky-blue toning on the obverse, with similar but richer toning on the reverse. The popular No Stem Guide Book variety, the 1806 O-109 is also ideal for an early 19th century silver type set. PCGS# 39310 Base PCGS# 6073

**1806 Half Dollar, MS63  
Very Scarce O-114  
Pointed 6, Stem**

**4821** 1806 Pointed 6, Stem, O-114, R.5, MS63 NGC. The present O-114 half dollar rests atop the Condition Census for the variety. It is decidedly prooflike, although undesignated as such by NGC. The strike is bold except on the left-side obverse stars. The breast feathers have nearly full definition. The flashy surfaces display rich peach-gold, blue-green, and stone-gray toning. No marks are remotely consequential. The toning pattern on the right obverse suggests a possible fingerprint. Tied for the finest certified of the die marriage with the O-114a example from the Eric P. Newman Collection, auctioned by Heritage in November 2013. PCGS# 39315 Base PCGS# 6071

**4822** 1806 Pointed 6, Stem, O-114a, R.4, XF40 PCGS. The later die state with a bold die crack between the E in AMERICA and the left (facing) wingtip. Rotation beneath a light reveals powder-blue, lilac, and olive-green toning. A small flan flaw is noted on the obverse near star 3. PCGS# 39316 Base PCGS# 6071

**1806 Half Dollar, Choice AU  
O-116, Pointed 6, Stem  
Rich Border Toning**

**4823** 1806 Pointed 6, Stem, O-116, R.3, AU55 PCGS. Splashes of golden-brown, lavender, and navy-blue toning grace the peripheries of this partly lustrous and nicely struck representative. Minimally abraded aside from delicate hairlines. Interesting die cracks and clashes attribute the somewhat scarce Overton variety. From *The College Collection*. PCGS# 39319 Base PCGS# 6071

**1806 O-118a Half Dollar, AU55  
Pointed 6, With Stem**

**4824** 1806 Pointed 6, Stem, O-118a, R.3, AU55 NGC. The reverse of this late die state O-118a half dollar has a die crack from the border through the tops of ITED, continuing through the wing and through STATE. A radial crack bisects the O in OF, and another joins the border to the arrows at the claw. Both sides of this Choice AU half dollar exhibit grayish-gold toning over satin luster. PCGS# 39322 Base PCGS# 6071

**4825** 1806 Pointed 6, Stem, O-119, R.3, XF40 NGC. A middle die state, clashed but without the later reverse peripheral crack. A minimally abraded gunmetal-gray half dollar that shows moderate inexactness of strike near the hair ribbon and opposite on the left (facing) wing. PCGS# 39323 Base PCGS# 6071

**4826** 1806 Pointed 6, Stem, O-119a, R.3, XF45 PCGS. Lightly toned in golden-gray color, this Draped Bust example has substantial bright luster and only one relevant mark, a light horizontal pinscratch near 3 o'clock. A pair of parallel retained laminations are noted near star 12. The strike shows softness near the hair ribbon and opposite on the left (facing) wing. The reverse has several bold peripheral die cracks; the heaviest journeys in a radial direction through the U in UNITED. Ex: *Dallas Signature* (Heritage, 12/2005), lot 779. PCGS# 39324 Base PCGS# 6071

**1806 Pointed 6, Stem Half, Attractive MS62  
O-120, Extensive Die Cracks on Each Side**

**4827** 1806 Pointed 6, Stem, O-120, R.3, MS62 NGC. Extensive die cracks on each side of this scarce variety aid in attribution, chief among them those on the left-side stars arcing into the hair, and on the reverse one often seen from the top of the first A in AMERICA down through M and near the scroll end. There are five berries on the reverse, of which only the lowest two on the outside bear stems. This is an exemplary coin for the grade, showing good luster remaining underneath attractive bluish-gray and pinkish-gold patina. PCGS# 39325 Base PCGS# 6071

**4828** 1807 Draped Bust, O-102, R.2, XF45 PCGS. Wheat-gold toning graces the margins of this otherwise pearl-gray representative. No marks are distracting. Both sides display delicate hairlines commensurate with the grade. PCGS# 39339 Base PCGS# 6079

**4829** 1807 Draped Bust, O-110a, R.3, XF45 NGC. Apple-green and golden-brown peripheral patina encompasses untuned centers. The luster extent is exceptional for the Choice XF level, although the strike is incomplete near the beak, and marks are noted near the hair ribbon and right-side reverse stars. PCGS# 39352 Base PCGS# 6079

**1807 Draped Bust Half, O-110a, AU58  
Extensive Die Cracks  
Lustrous and Largely Untoned**

**4830** 1807 Draped Bust, O-110a, R.3, AU58 PCGS. An extensive network of die cracks covers each side of this scarce late-state die variety. Most notable among them are the pair of cracks meandering through the date, and the arcing die crack above TES that intersects with the cloud between ES OF. This is a nice, lustrous, scarcely circulated coin, untuned silver-white save for a touch of gold at the rims. The strike is bold throughout with one notable exception, the lower hair curls on the obverse and the left-side stars-eagle's head area on the reverse. PCGS# 39352 Base PCGS# 6079

**BUST HALF DOLLARS**

**4831** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, XF45 PCGS. CAC. A pearl-white and almond-gold first year Capped Bust half with evenly defined and problem-free surfaces. Traces of luster illuminate the legends. The reverse with a blundered denomination, shared with the rare "Bearded Goddess" O-111. PCGS# 39356 Base PCGS# 6086

**4832** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU53 NGC. The popular 50 Over 20 blundered-error reverse, here on a nicely toned and lightly circulated example, showing copper-gray and pale ice-blue patina. Faint clash marks appear on each side. Excellent eye appeal. PCGS# 39356 Base PCGS# 6086

**1807 Capped Bust Half, AU55  
O-112, 50 Over 20 Variety**

**4833** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU55 PCGS. This *Guide Book* variety exhibits the remnants of an underlying 2 beneath the 5 in 50C. This Choice AU representative retains substantial luster in the border recesses amid peripheral hues of warm amber and gold. The centers are more lightly toned in pale golden-gray, with slight wear over the high points of the devices. No significant abrasions are noted. PCGS# 39356 Base PCGS# 6086

**1807 Capped Bust Half, AU55  
50 Over 20, O-112 Variety**

**4834** 1807 Capped Bust, Large Stars, 50 Over 20 AU55 NGC. O-112, R.1. The undertype 2 shows plainly beneath the primary 5 in the denomination, identifying the popular O-112 variety. This pleasing Choice AU specimen shows just a touch of wear on the sharply detailed design elements and some interesting clash marks are evident in the right obverse field. The lightly abraded surfaces show traces of original mint luster. PCGS# 39356 Base PCGS# 6086

**1807 Capped Bust Half Dollar, AU58  
50 Over 20, Large Stars, O-112  
Substantial Mint Luster**

- 4835** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU58 PCGS. A popular first-year Capped Bust variety. An absent-minded die worker began the denomination as 25 C, then lightly lapped the blundered die before entering the correct 50 C. The present coruscating example has light ocean-blue borders. The fields are lightly toned in tan and lilac shades. Clashed but minimally abraded. The curls and eagle's head show a trace of wear.  
*From The College Collection.* PCGS# 39356 Base PCGS# 6086

- 4836** 1808/7 O-101, R.1, AU53 PCGS. Rich medium brown toning blankets this well defined and exceptionally smooth overdated half dollar. Peach, rose-red, and sea-green peripheral shades are illuminated with underlying luster. PCGS# 39378 Base PCGS# 6091

- 4837** 1809 Normal Edge, O-103, R.1, AU58 PCGS. CAC. Grayish-violet and champagne-gold patination runs over both sides of this near-Mint half. Sharply struck devices and minimally abraded surfaces heighten the eye appeal. Population for the variety: 3 in 58, 1 finer (12/14).  
*From The College Collection.* PCGS# 39392 Base PCGS# 6092

**1810 O-102 Half Dollar, MS63  
Blue-Green Toning**

- 4838** 1810 O-102, R.1, MS63 PCGS. CAC. The variety is technically in-between O-102 and O-102a. The reverse peripheral die crack is present but ends over STATES, while on O-102a, the crack continues across OF AM. O-102 lacks a reverse crack. This satiny example has deep ocean-blue centers bounded by lighter shades of straw-gold and rose-red. No marks are consequential. The strike is good except on the left (facing) wing. PCGS# 39406 Base PCGS# 6095

**1810 O-104 Half, MS62  
Conditionally Rare Variety**

- 4839** 1810 O-104, R.3, MS62 PCGS. CAC. Chestnut-gold and forest-green borders encompass stone-gray centers. This coruscating example appears unabraded aside from minor grazes beneath the left (facing) wing. The strike is precise except on the uppermost stars. Highly attractive for the designated third party grade. Among the finest known examples of the variety.  
*From The College Collection.* PCGS# 39409 Base PCGS# 6095

- 4840** 1810 O-109, R.3, MS62 NGC. Medium to deep golden-brown and plum-mauve toning graces this coruscating Bust half dollar. The strike is sharp on the major motifs but the upper stars are incompletely brought up. Well preserved aside from a small cluster of faint marks beneath the left (facing) wing. Although numerous clashes and cracks are present, the coin lacks the crack to Liberty's eye that would make it O-109a. The dies are rotated 60 degrees clockwise from coin turn. PCGS# 39418 Base PCGS# 6095

**1811/10 O-101 Half, AU55  
Border Toning, Few Marks**

- 4841** 1811/10 O-101, R.1, AU55 PCGS. A "Spiked Cap" and "Dotted Date" Overton marriage, better remembered for the curve of a 0 to the east of the final date digit. Deep golden-brown, cobalt-blue, and cherry-red toning adorns the borders, but the centers display only gunmetal and cream shades. A minimally abraded and partly lustrous example of a popular *Guide Book* variety. PCGS# 39421 Base PCGS# 6099

1811/10 Half Dollar, O-101, AU58  
Lustrous Pearl-Gray Example

- 4842** 1811/10 O-101, R.1, AU58 NGC. This obverse shows the left-side stars flatter than the right-side, and spike protrudes from the front cap top. The reverse attribution is more difficult because die erosion/fatigue has effaced most of the dentilation on each side, but the tiny die centering dot between crossbars 4 and 5 in the shield does the trick. This is a nicely lustrous, scarcely circulated, pearl-gray example of this variety with no mentionable drawbacks. PCGS# 39421 Base PCGS# 6099

1811/10 Capped Bust Half, MS62  
Popular O-101 Overdate

- 4843** 1811/10 O-101, R.1, MS62 PCGS. A small spine near the top of Liberty's cap and a dot between the 8 and second 1 in the date identifies the popular O-101 variety. This attractive MS62 example displays sharply detailed design elements and lightly marked lustrous surfaces with a few hints of lavender-gray toning. Population: 3 in 62, 2 finer (12/14). PCGS# 39421 Base PCGS# 6099

1811 Half Dollar, MS62+  
Small 8, O-105

- 4844** 1811 Small 8, O-105, R.4, MS62+ NGC. The "Spots on Shield" variety, as designated by Dr. Peterson in his attribution reference to the Capped Bust half series. The present example displays multiple sets of clash marks but lacks the die crack associated with O-105a. It is lustrous and minimally abraded with delicate straw-gold and ice-blue toning. The strike is crisp except on the upper right stars. PCGS# 39427 Base PCGS# 6097

1811 Half Dollar, MS62  
O-108, Small 8

- 4845** 1811 Small 8, O-108, R.2, MS62 PCGS. This example shows heavy clash marks and substantial die fatigue on both sides, but the late die state crack through UNITED on the reverse has not yet formed. The surfaces exhibit vibrant luster, shining through a veil of light golden toning. Stars 5 through 7 are weakly defined, but the strike is otherwise sharp. A few small marks limit the grade, though none are individually detracting. A pleasing example for the grade. PCGS# 39431 Base PCGS# 6097

1811 O-109 Half Dollar, MS64  
Small 8, Fully Patinated

- 4846** 1811 Small 8, O-109, R.2, MS64 PCGS. CAC. Rich golden-brown and gunmetal-blue toning encompasses this satiny and unabraded near-Gem. The high points show minor incompleteness. A heavy radial die crack along the first S in STATES is characteristic of this collectible and distinctive Overton variety. The obverse periphery displays three lengthy semicircular cracks. Presumably, all these cracks occurred when the die was hardened, since they are invariably present on O-109. PCGS# 39433 Base PCGS# 6097

1811 Small 8 Bust Half, MS63  
O-111a, Brilliant and Lustrous

- 4847** 1811 Small 8, O-111a, R.1, MS63 PCGS. Identified by a series of die lumps beneath the ear. Small center dots are seen both on the obverse (neck) and reverse (between the 4th and 5th horizontal shield lines), and IT of UNITED is solidly joined at the top. This late die state coin is brilliant and lustrous — a characteristic of many 1811 Mint State halves. The strike is bold except at the rims, where the milling is weak due to die state. An attractive, Select Uncirculated example, sure to please the next owner. PCGS# 39437 Base PCGS# 6097

**1811 Small 8 Half Dollar, MS65  
Possibly Finest Overton-111a**

**4848** 1811 Small 8, O-111a, R.1, MS65 NGC. The present lot may be the finest certified O-111 or O-111a, since the Stephen J. Herrman Autumn 2014 revision is headed by a prior appearance of the present example. This remarkably unabraded representative is satiny and boldly struck with dusky chestnut-gold, olive-green, and champagne-rose toning. PCGS# 39437 Base PCGS# 6097

**4849** 1812 Large 8, O-110, R.1, AU58 PCGS. Dusky golden-brown and dove-gray encompass this satiny and minimally marked Capped Bust type coin. A hint of high point wear on the curls and the top of the eagle's head. Struck from multiply clashed dies. PCGS# 39457 Base PCGS# 6100

**4850** 1815/2 O-101, R.2 — Graffiti — PCGS Genuine. VF Details. Both sides display several pinscratches, some of which approximate letters. The deep cream-gray and gunmetal surfaces reveal ocean-blue and tan-brown toning once rotated beneath a light. The key to a date set of Capped Bust halves. PCGS# 39491 Base PCGS# 6108

**1815/2 Capped Bust Half, AU53  
Low-Mintage Key Date, O-101a**

**4851** 1815/2 O-101a, R.3, AU53 NGC. All 1815-dated half dollars were struck from overdated obverse dies of 1812. This pleasing AU53 example shows the die crack through the denomination and some clash marks in the left obverse field that identify the late die state O-101A. Clash marks are present on the reverse, as well, and only a touch of wear shows on the design elements. The lightly abraded silver-gray surfaces retain traces of original mint luster. Census for O-101A: 2 in 53, 2 finer (12/14). PCGS# 39492 Base PCGS# 6108

**1817/3 O-101a Half, AU58  
Collectible Bold Overdate**

**4852** 1817/3 O-101a, R.2, AU58 NGC. Splendid cobalt-blue, peach-gold, and plum-red endow this boldly clashed but exceptionally unabraded half dollar. The underdigit 3 is obvious, and the ascending die crack through 50 C confirms the later die state. Moderate wear on the curls and forehead confirms light circulation. PCGS# 39512 Base PCGS# 6111

**1817/3 Half Dollar, O-101a, MS61**

**4853** 1817/3 O-101a, R.2, MS61 PCGS. A lustrous overdated half dollar with butter-gold and steel-gray toning. The borders are well struck but the curls near the shoulder are incomplete. Devoid of marks except for a hair-thin vertical line on the right obverse field. The middle die state with a light ascending die crack on the lower reverse, but without chips at the crack near the top of the 5 in 50 C. Struck from multiply clashed dies. PCGS# 39512 Base PCGS# 6111

**4854** 1817 181.7, O-103, R.2, AU58 NGC. A dusky walnut-brown and steel-gray Borderline Uncirculated representative. The satiny surfaces are lightly clashed but appear unabraded. The Overton variety with a die lump between the 17 in the date. On later strikes (O-103a) the lump has been lapped away. PCGS# 39510 Base PCGS# 6110

**4855** 1818/7 Large 8, O-101, R.1, AU58 NGC. An obvious overdate with two "horns" from the top of the 7 above the second 8 in the date. A lovely Borderline Uncirculated half dollar, draped in medium olive-green and stone-gray toning. Only trivial marks are detected. PCGS# 39540 Base PCGS# 6115

**1818/7 Half Dollar, AU58  
Small 8, O-102a**

- 4856** 1818/7 Small 8, O-102a, R.2, AU58 PCGS. Overdates sprinkle the Bust half series, prominently so in the present case as the corners of the underdate protrude from the final digit. Gray toning presents pleasing contrast with lighter shades in the protected areas. There are hints of russet at the peripheries, especially on the reverse. The O-102 variety is distinguished by the small 8 and the overdate, and the partially filled loop of the last digit characterizes the die state. PCGS# 39537 Base PCGS# 6114

**1818 O-107 Half Dollar, MS63  
Lustrous and Unmarked**

- 4857** 1818 O-107, R.1, MS63 PCGS. A coruscating cream-gray half dollar with hints of autumn-brown toning across the margins. Exceptionally free from marks, although each side has a few small charcoal freckles. The available O-107 is frequently attributed by the diagonal line inside the base of the T in LIBERTY. PCGS# 39523 Base PCGS# 6113

- 4858** 1818 O-109a, R.1, AU58+ PCGS. CAC. Both 1s in the date are higher than either 8, and the first 1 is distant from the other digits on this distinctive obverse that carries the nickname Jumping 1s. This late die state piece has a reverse crack through the tops of TED STATE. Both sides are brilliant with delicate champagne toning over nearly complete luster.  
*From The College Collection.* PCGS# 39526 Base PCGS# 6113

**1818 O-111 Half Dollar, MS64  
Rich Multicolor Patina**

- 4859** 1818 O-111, R.1, MS64 PCGS. A splendidly toned Choice Bust half dollar. Rich sea-green and golden-brown shades dominate, although the portrait displays gunmetal-gray. Boldly struck and refreshingly free from abrasions. O-111 is noted for its small spike or tine from the top of Liberty's cap.  
*From The College Collection.* PCGS# 39528 Base PCGS# 6113

**1818 O-113 Half Dollar, Toned MS62**

- 4860** 1818 O-113, R.3, MS62 NGC. The obverse is cracked through star 7 to the headband, as usual. That crack continues through the hair to star 11. Patches of deep electric-blue and champagne-gold cascade over both sides of this well struck half dollar. A handful of unobtrusive marks do not disturb. PCGS# 39531 Base PCGS# 6113

**1819/8 Bust Half, MS62  
O-101, Small 9  
Green Label Holder**

- 4861** 1819/8 Small 9, O-101, R.1, MS62 PCGS. CAC. The sole Small 9 Overton variety. Traces of the underdigit are obvious near the lower curve of the 9. A lustrous stone-gray half dollar with few marks and a consistently sharp strike. The reverse border displays lengthy cracks, usual for O-101. Certified in a green label holder.  
*From The College Collection.* PCGS# 39555 Base PCGS# 6118

**1819/8 Half Dollar, MS63  
Large 9, O-102**

- 4862** 1819/8 Large 9, O-102, R.2, MS63 PCGS. Rich apple-green, almond-gold, steel-blue, and lilac toning invigorates this satiny and crisply struck Capped Bust half. No marks are remotely relevant aside from a few wispy lines beneath the lowest arrowhead. O-102 and the rarer O-103 are similar, but O-103 has a corner notch on both Ts in STATES, and also shows a gap between dentils beneath the 0 in 50 C.  
*From The College Collection.* PCGS# 39556 Base PCGS# 6119

**1819/8 Half Dollar, O-106, MS63  
Large 9, Scarce**

- 4863** 1819/8 Large 9, O-106, R.4, MS63 PCGS. CAC. One of the finest examples of this very scarce variety to appear on the auction block in a decade, and a coin with a significant claim to being the finest available. Light abrasions on Liberty's portrait have surprisingly little influence on the eye appeal, for they are overwhelmed by green-gold, silver-blue, and lavender-pink patina across warm luster. PCGS# 39562 Base PCGS# 6119

**1819 O-109 Half Dollar, Well-Preserved MS62**

- 4864** 1819 O-109, R.2, MS62 NGC. Large stars close to the milling, die defect lines joining both the top and bottom of TE in STATES, and the I in PLURIBUS centered under the bottom-left serif of the second T confirm the variety. Soft cobalt-blue and reddish-gold patination resides on the lustrous surfaces of this sharply struck half. The surfaces of both sides have been well cared for for the grade designation. PCGS# 39545 Base PCGS# 6117

- 4865** 1820/19 Curl Base 2, O-102, R.1, AU53 PCGS. The underlying 19 is plainly visible beneath the 20 in the date. Deep electric-blue and purple peripheral toning frames the light- to medium-gray patina in the centers. This sharply struck example is minimally abraded and yields pleasing overall eye appeal. Population for the variety: 1 in 53, 10 finer (12/14).  
*From The College Collection.* PCGS# 39574 Base PCGS# 6126

**1820 Half Dollar, Lightly Toned AU58  
O-105, Square Base-Knob 2, Large Date**

- 4866** 1820 Square Base 2, Large Date, Knob, O-105, R.1, AU58 PCGS. CAC. The distinctive widely spaced date is among the most expansive in the entire Capped Bust series, and recutting on star 2 creates two distinctive extra points. The reverse shows a triple segment below an olive leaf pair. This is a lovely, lightly toned example with just a touch of high-point wear, perfect for a matched set of AU58-CAC coins. Population: 1 in 58, 3 finer (12/14). PCGS# 39567 Base PCGS# 6122

**1821 Capped Bust Half, MS64  
Obverse Die Crack, O-103a**

- 4867** 1821 O-103a, R.4, MS64 PCGS. CAC. The 1821 Capped Bust half dollar claims a mintage of more than 1.3 million pieces, with seven die varieties for the date. This coin represents the somewhat scarce O-103a variety, with the distinctive die crack through the date and curl into the right obverse field. This well-detailed Choice example displays vibrant mint luster and vivid shades of gold, gray, and violet toning. Population: 20 in 64, 5 finer (11/14). PCGS# 39579 Base PCGS# 6128

**1823 O-103 Half Dollar, MS64  
Exceptional Eye Appeal**

- 4868** 1823 O-103, R.2, MS64 PCGS. Cluster of delicate die lines beneath the eagle's beak and Liberty's chin identify the collectible Overton-103. The present highly lustrous half dollar has light golden-brown borders and brilliant centers. The strike is bold except on the upper stars. Nearly pristine aside from a solitary vertical hairline on the cheek.  
*From The College Collection.* PCGS# 39606 Base PCGS# 6131

**1823 Capped Bust Half, MS64+  
O-103, Bold and Attractive**

- 4869** 1823 O-103, R.2, MS64+ PCGS. Close to the top of the Condition Census for the variety, this borderline Gem coin is difficult to fault in any aspect of its strike, surfaces, or eye appeal. Virtually full details are seen on the motifs front and back, and intense luster flows across the surfaces. Gunmetal-blue rims frame the natural wheat-gold patina. Liberty's lips, chin, and neck are boldly strike-doubled. PCGS# 39606 Base PCGS# 6131

**4870 1824 Over Various Dates, O-103, R.1 AU55 PCGS. CAC.** A distinctive variety that illustrates the charm of early U.S. coins produced at the first Philadelphia Mint, this half dollar is an overdate. However, nobody has positively identified exactly what the date is punched over. Some have described the variety as 1824 over 2 over 0, while the current description of 1824 Over Various Dates is the most accurate. This Choice AU example has lovely blue, turquoise, and magenta toning over considerable luster. *From The College Collection.* PCGS# 39646 Base PCGS# 6138

**4871 1824 O-106, R.3, MS61 NGC.** Star 13 nearly touching the bust and RI on the reverse touching (and even) are sufficient to attribute this Normal Date variety. This is a lustrous copper-pink-toned example with lots of eye appeal and few marks for the grade. PCGS# 39626 Base PCGS# 6137

---

**1825 O-116 Half Dollar, MS63  
Dusky Orange Toning, Smooth Fields**

**4872 1825 O-116, R.3, MS63 PCGS. CAC.** Dusky orange-gold and cream-gray toning encompasses this lustrous Select half dollar. The strike is bold aside from the left-side margins. The fields appear pristine, and only a tick on the cheekbone and a faint mark on the jaw precludes a finer grade. The relatively scarce O-116 can be attributed by the tine from the upper corner of the left scroll end. *Housed in an old green label holder.* *From The College Collection.* PCGS# 39663 Base PCGS# 6142

---

**1826 O-112a Half Dollar, MS64  
Exceptional Eye Appeal**

**4873 1826 O-112a, R.2, MS64 PCGS.** A die chip above the diagonal of the N in UNITED confirms the later die state. Honey-gold borders cede to pearl-gray fields and motifs. Lustrous and uncommonly smooth with superior eye appeal for the MS64 level. Generally well struck, although the left (facing) claw and star 7 show inexactness. *From The College Collection.* PCGS# 408532 Base PCGS# 6143

---

**1827 Half Dollar, XF40  
Rare O-137 Variety**

**4874 1827 Square Base 2, O-137, R.6, XF40 PCGS.** A rare die variety, easily identified by the presence of several shallow die marks in the field adjacent to the eagle's right (facing) wing below the RI in AMERICA, possessing the appearance of being extra wing feathers. This feature is unique to O-137, despite this reverse also being used for the O-109 and O-110 varieties. On the obverse, stars 12 and 13 are spaced closer than are any of the others. This is a well-detailed example, showing just a touch of wear over the high points of the design. Deep olive and amber-gray hues complement tinges of teal on each side, with subtle remnants of luster observed in the recesses when tilted beneath a light. An important coin for the Overton variety specialist. PCGS# 39736 Base PCGS# 6144

**4875 1827 Square Base 2, O-141, R.3, MS61 NGC.** A die line closes the opening of the C in 50 C, attributing the conditionally rare O-141. The present russet-brown, dove-gray, and olive-green representative is refreshingly unabraded. The strike is bold on the major devices, although several stars are incompletely impressed. PCGS# 39741 Base PCGS# 6144

**4876 1828 Square Base 2, Small 8s, Large Letters, O-122, R.3, AU58 PCGS. CAC.** Die lines left of the date help identify the variety. Grayish-violet patination dominates the remarkably clean surfaces, accented with yellow-gold and lavender. Well-struck save for the usual weakness in some of the letters in the ribbon motto. Population for the variety: 1 in 58, 1 finer (12/14). PCGS# 39778 Base PCGS# 6151

**1828 O-122 Bust Half, MS65**  
Tied for Finest of the Variety

- 4877 1828 Square Base 2, Small 8s, Large Letters, O-122, R.3, MS65 PCGS.** Tied atop the Condition Census for O-122 with a few other examples certified as MS65 by either NGC or PCGS. A satiny and essentially unabraded Gem draped in dusky steel-gray, sea-green, and rose-gold shades. The strike is full except on the stars. From an early state of the dies, without the obvious diagnostic rim break outside of stars 5 and 6, but with slight weakness in the dentilation there, and the beginnings of twin radial cracks from the dentils to the closest points of the stars. PCGS# 39778 Base PCGS# 6151

**1829 O-115 Half Dollar, MS64**  
Small Letters, Richly Toned

- 4878 1829 Small Letters, O-115, R.1, MS64 PCGS. CAC.** A satiny Choice example with sea-green fields and dove-gray high points. The borders display glimpses of rose-red. Intricately struck, and smooth except for a faded wispy field mark near the chin. The pick-up point for O-115 is the lowest arrowhead, which is repunched above the shaft.  
*From The College Collection. PCGS# 39800 Base PCGS# 6154*

**1830 O-117 Half, MS64**  
Small O, Mark-Free Surfaces

- 4879 1830 Small O, O-117, R.2, MS64 PCGS. CAC.** Medium olive-green, dove-gray, and rose-red toning endows this coruscating and refreshingly unabraded Choice half dollar. Boldly struck and of significant interest to the specialist. Among the finest examples of O-117, attributable by the repunched upright on the 5 in 50 C. PCGS# 39828 Base PCGS# 6156

**1830 Half Dollar, MS64+**  
Large O, O-123  
Smooth and Lustrous

- 4880 1830 Large O, O-123, R.1, MS64+ PCGS. CAC.** A delicate horizontal die crack from star 6 is one method of attributing the collectible O-123. The present lustrous near-Gem has lovely peripheral autumn-brown toning and light slate-gray fields and motifs. Well struck and lustrous with exemplary preservation. As nice as the variety can be obtained.  
*From The College Collection. PCGS# 39834 Base PCGS# 6157*

**1831 Half Dollar, MS65**  
Blue-Toned O-102, Only Six Finer For the Date

- 4881 1831 O-102, R.1, MS65 PCGS.** Obverse color alternates between blue and gray with dappled brown in the left field and within Liberty's protected areas. The reverse shares similar toning, but in different proportion, as lighter tones predominate above the eagle and beneath the wing pits. The O-102 variety is marked by the gradual separation of the center and right vertical lines in the first set of reverse stripes, and the filled upper portion of N in UNITED. Population: 58 in MS65 (1 in MS65+), and 5 higher. PCGS# 39838 Base PCGS# 6159

- 4882 1831 O-109, R.1, MS62 PCGS. CAC.** Golden-brown borders frame the stone-gray centers of this lustrous and refreshingly unabraded type representative. The eye appeal is superior for the designated grade. The strike is crisp at the centers, although several stars are incompletely impressed. PCGS# 39845 Base PCGS# 6159

- 4883 1831 O-111, R.1, MS63 PCGS.** The die crack through the base of the date is the pick-up point for Overton-111. Blended golden-brown and dove-gray toning blankets this satiny and well preserved Select half dollar. The strike is crisp at the centers but incomplete throughout the borders. PCGS# 39848 Base PCGS# 6159

**1831 Half Dollar, O-112, MS64  
Late Die State Example**

**4884** 1831 O-112, R.3, MS64 PCGS. An extremely late die state example, heavily lapped on both sides and showing moderate die fatigue around the peripheries. The central strike is sharp, however, and the surfaces are free of any major abrasions. A small, mint-made planchet flaw is noted in the field near Liberty's mouth. Pale lavender-gold toning covers both sides, with deeper olive and lilac also seen in the obverse margins. PCGS# 39849 Base PCGS# 6159

**1832 Half Dollar, MS65  
O-103, Small Letters**

**4885** 1832 Small Letters, O-103, R.1, MS65 NGC. The upright of the 5 is repunched, the most significant identifier for the collectible Overton-103. Rich lavender and autumn-brown toning blankets this lustrous Gem type coin. The strike is crisp aside from minor blending on the high points of the major motifs. The fields are smooth, and the portrait shows only unobtrusive contact on the chin and neck. PCGS# 39860 Base PCGS# 6160

**4886** 1832 Small Letters, O-107, R.2, MS63 NGC. Light honey-gold and stone-gray toning adorns this lustrous and unabraded Capped Bust type coin. The strike is bold except on the upper stars and Liberty's eyebrow. A vertical tine from the right shield corner is the pick-up point for the collectible Overton-107. PCGS# 39865 Base PCGS# 6160

**1832 Half Dollar, MS64  
Small Letters, O-108  
Old Pre-Hologram Holder**

**4887** 1832 Small Letters, O-108, R.3, MS64 NGC. CAC. Autumn-gold toning embraces the borders of this lustrous near-Gem. Unmarked and lustrous with an unobtrusive spot on the obverse margin at 3 o'clock. A late, unlisted die state with all the outer star points drawn to the edge. Well struck on the major devices except for the upper horizontal shield lines, characteristic of O-108. Housed in an old pre-hologram holder. PCGS# 39866 Base PCGS# 6160

**1832 Small Letters Half Dollar, MS64  
Sharply Struck and Lustrous, O-111**

**4888** 1832 Small Letters, O-111, R.1, MS64 PCGS. CAC. The date shows a broad number 1 with a tiny serif at the top. On the reverse shield, there are two die dots between crossbars 4 and 5, and the I in PLURIBUS is nearly centered under the second T in STATES. Champagne and sky-blue toning is joined on the reverse by splashes of orange-gold and crimson. The design elements are sharply struck save for minor softness on the left-border stars. The CAC endorsement affirms the pleasing overall eye appeal of this lustrous example. Population for the variety: 1 in 64, 0 finer (12/14). PCGS# 39869 Base PCGS# 6160

**1834 O-105 Half Dollar, MS64  
Large Date, Small Letters**

**4889** 1834 Large Date, Small Letters, O-105, R.1, MS64 PCGS. Golden-brown toning adorns the margins of this otherwise pearl-gray near-Gem. Coruscating and unabraded with a crisp strike except on the left-side stars. A pleasing example that likely merits a position high within the Condition Census for the variety. O-105 displays minor repunching on the crossbar of the 4 in the date, and the lower half of the second S in STATES. From The College Collection. PCGS# 39909 Base PCGS# 6165

**1834 Half Dollar, MS64  
O-106, Small Reverse Letters**

**4890** 1834 Large Date, Small Letters, O-106, R.1, MS64 PCGS. CAC. The left upright of the M in AMERICA is recut and curved, a helpful aid in attributing this available variety. The present piece is lightly toned in pale golden hues, with vibrant luster shining through. The stars are poorly defined, as usual, though the central devices are well-detailed. No major abrasions are present. Housed in an old green label holder. PCGS# 39910 Base PCGS# 6165

1834 O-109 Half Dollar, MS65  
Small Date, Small Letters

**4891** 1834 Small Date, Small Letters, O-109, R.1, MS65 NGC. CAC. The upper right stars are repunched, most prominently on star 10. Splendid orange, cream, and aquamarine toning encompasses this satiny and well struck Capped Bust type coin. Uncommonly devoid of marks, and among the highest graded examples of the Overton variety. PCGS# 39913 Base PCGS# 6166

**4892** 1836 Lettered Edge, O-104a, R.3, MS63 PCGS. Dusky dove-gray toning blankets the obverse, while the equally original reverse displays blended sea-green, gold, and aqua-blue. A satiny and unmarked example with a crisp strike and obvious eye appeal. In an old green label holder.

Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 826, which realized \$1,782.50. PCGS# 39942 Base PCGS# 6169

## REEDED EDGE HALF DOLLARS

1836 Reeded Edge Half, GR-1, AU53  
Ex: Jules Reiver Collection

**4893** 1836 Reeded Edge, GR-1, R.2, AU53 NGC. Ex: Jules Reiver Collection. Struck from a late stage of the reverse die, with a die break and crack between STATES OF and a lump within the top of E in STATES. Glossy, slightly iridescent surfaces display silver-gray centers and traces of electric-blue at the peripheries. The design details are sharp, and the surfaces are devoid of significant marks for the assigned grade.

Ex: Jules Reiver Collection (Heritage, 1/2006), lot 23358. PCGS# 531046 Base PCGS# 6175

1837 Half Dollar, MS64  
Reeded Edge, GR-2 Example

**4894** 1837 GR-2, R.3, MS64 NGC. The 7 in the date shows signs of recutting and there is a depressed circle in the crossbars of the shield on the reverse, identifying the GR-2 variety. This sharply detailed Choice specimen exhibits lightly marked lavender-gray surfaces, with some golden-brown highlights and satiny mint luster under the patina. Census: 98 in 64 (2 in 64+), 56 finer (12/14). PCGS# 531048 Base PCGS# 6176

**4895** 1837 GR-12, R.2, MS62 PCGS. CAC. Considerable luster remains on the dusky golden-gray surfaces of this MS62 example. Well-struck except for the typical softness in some of the star centers. Both sides are nicely preserved. Housed in a prior generation green label holder.

From The College Collection. PCGS# 531058 Base PCGS# 6176

**4896** 1838 GR-2, R.3, MS62 PCGS. Beautifully toned with aquamarine margins and autumn-brown interiors. The satiny surfaces are mark-free save for a single hair-thin field hairline near the profile. A small die lump between the UN in UNITED is characteristic of the Graham marriage. Certified in an old green label holder. PCGS# 531081 Base PCGS# 6177

1838 Reeded Edge Half Dollar, MS64  
Sharply Detailed GR-6 Example

**4897** 1838 GR-6, R.3, MS64 PCGS. The obverse of this attractive Choice specimen shows a die crack from star 1 through the date, and the reverse displays some die lines in the dentils below LF in HALF, identifying the GR-6 variety. This sharply detailed Choice example offers lustrous lavender-gray surfaces with only a few minor signs of contact. Population: 55 in 64 (3 in 64+), 10 finer (12/14). PCGS# 531087 Base PCGS# 6177

**4898** 1838 GR-15, R.3, MS62 PCGS. Two die cracks near star 7 allow attribution of the die marriage. Light chestnut-gold toning graces this lustrous and attractive two-year type coin. Abrasions are minor for the designated grade, but we note a few wispy marks near star 13 and a line that passes through the ER in LIBERTY. The reverse is essentially unabraded. PCGS# 531096 Base PCGS# 6177

**1839-O Reeded Edge Half, MS62  
Popular GR-1 New Orleans Issue**

- 4899** 1839-O GR-1, R.1, MS62 NGC. The New Orleans Mint struck 116,000 Reeded Edge half dollars in 1839, most of them (including the present coin) from the GR-1 dies. The reverse of the GR-1 is the same die used to coin the famous 1838-O half dollars and this coin shows an extensive network of die cracks through the reverse legends. The design elements are crisply detailed and the lustrous surfaces show a scattering of minor contact marks under shades of sea-green and lavender toning. Census: 8 in 62, 35 finer (12/14). PCGS# 531106 Base PCGS# 6181

**SEATED HALF DOLLARS**

**1839 With Drapery Half, Sharp MS64**

- 4900** 1839 Drapery MS64 PCGS. CAC. The Seated half dollars were first struck in 1839, and drapery was added beneath the elbow after about half of the annual mintage had been struck. The No Drapery pieces are not scarcer but are popular as a separate design type. This makes the nearly equally elusive With Drapery examples the better value, and despite a high mintage, the 1839 Drapery is difficult to find in the better grades of Uncirculated. PCGS and NGC combined have certified fewer than 30 submissions in MS64, and a mere seven finer (12/14). This specimen displays variegated electric-blue and copper-gold patination. The design elements are sharply impressed, though the eagle's left (facing) leg feathers are soft. A small contact mark is noted on Liberty's neck and another in the midsection, both undistracting. NGC ID# 24GL, PCGS# 6232

**1840 Seated Liberty Half Dollar, MS65  
Small Letters Reverse of 1839**

- 4901** 1840 Reverse of 1839, Repunched Date FS-302, WB-104 MS65 PCGS. The undertype 1 and 8 are visible slightly to the left of the primary digits and a secondary 0 is easily seen above the final numeral on this popular repunched date. The reverse features the Small Letters of 1839. The WB-104 is an underrated issue in most price guides because of its unacknowledged appeal as a Small Letters type coin.

The present coin is an impressive Gem, with sharply detailed design elements throughout. The well-preserved surfaces are blanketed in attractive shades of lavender-gray toning and show minimal signs of contact. Satiny original mint luster shines through the toning. Population: 5 in 65, 6 finer (11/14). PCGS# 392648 Base PCGS# 6234

- 4902** 1840-O MS62 PCGS. WB-104, Die Pair 1. Large O Mintmark. Spidery die cracks encircle the obverse stars and a diagnostic crack runs through the date, where the numerals are somewhat weakly struck (although stronger than many examples of the die pair). The other motifs are bold, including Liberty's head and the star centers. Blushes of auburn-gold toning appear here and there across the lustrous, silver surfaces. A scarce coin in this Mint State condition. Population: 5 in 62, 14 finer (11/14). NGC ID# 24GN, PCGS# 6235 Base PCGS# 6235

**1840-O Half Dollar, MS64  
WB-102, McCloskey-1  
Very Small O Mintmark**

- 4903 1840-O MS64 PCGS. WB-102, McCloskey-1, Die Pair 7, R.2.** Tied for the finest known at PCGS, the Very Small O occurs on only a single die pair, and the variety is distinctly scarce in this near-Gem condition. A substantial New Orleans mintage of 855,100 pieces circulated freely in the 1840s until the discovery of gold in California upset the gold-to-silver market ratio, and most silver coinage disappeared from commerce by 1851. The silver value exceeded the face value, and especially quarters and half dollars were hoarded and melted, explaining why few high-grade coins from the era exist today. This richly patinated example shows deep-olive toning on the obverse with golden highlights. The reverse is lighter, with orange and silver-gray patina. A sharp strike at the centers balances slight weakness on some of the obverse stars. Smooth, somewhat reflective fields are host to only a few scattered, minor marks of no serious consequence. Population: 3 in 64, 0 finer (12/14). NGC ID# 24GN, PCGS# 6235 Base PCGS# 6235

**1842-O Half Dollar, XF40  
Scarcer Small Date Variant**

- 4904 1842-O Small Date, Small Letters XF40 PCGS. WB-101, Die Pair 2, R.5.** The 1842-O Small Date half dollar is somewhat scarcer than its Medium Date counterpart, and is rarely seen above the VF grade level. This example exhibits strong detail for the grade, with rich golden-gray patina that yields hints of lavender and pale blue. Some luster remains in the protected areas, activated when tilted beneath a light. Population: 8 in 40, 15 finer (11/14). NGC ID# 24GV, PCGS# 6238

- 4905 1842-O Medium Date, Rev 1842 MS61 NGC. WB-102, Die Pair 12, R.3.** The Large O mintmark is positioned left beneath the feather tip and centered over the F of OF. Struck from a late die state, with a V-shaped crack between UNITE(D) and S(TATES). Multiple die lines angle from the denticles to the legend, especially above AMERICA. The date is centered on the obverse, with a crack between the left rock point and the edge, while the rock support beneath Liberty's foot is reengraved. Subtle peach-gold toning visits the nice silver luster that shines across the boldly struck surfaces. Minor marks, none serious, define the assigned grade. NGC ID# 24GW, PCGS# 6242 Base PCGS# 6242

**1843 Seated Half, Spectacular MS65**

- 4906 1843 MS65 NGC.** Despite the large mintage exceeding 3.8 million pieces for the 1843 Seated half, most examples are circulated, and the number of Gem or finer pieces certified at NGC and PCGS combined can be counted on both hands. This is a stunning Gem certified by NGC, showing prevailing orange and bluish tints on each side complementing full cartwheel luster and only random scattered, small signs of contact. A remarkable survivor of this early series issue. Census: 3 in 65, 2 finer (12/14). NGC ID# 24GX, PCGS# 6243 Base PCGS# 6243

**1843-O WB-103 Seated Half, MS63  
Doubled Date, Large O Mintmark**

- 4907 1843-O MS63 PCGS. CAC. WB-103, Die Pair 17, R.4.** Ex: Dick Osburn Collection. One of the most interesting die pairs for this New Orleans issue. The date is positioned far to the right and high, with double punching visible on all digits. The point of an underdigit 1 is sharply visible beneath the primary digit, with a tine-like remnant extending from the upright. Both loops of the 8 are recut south. The 4 and 3 are repunched slightly north. Several die cracks hug the legends, traversing the arrows as well as the denomination on the reverse. Lustrous, frosty surfaces display flax-gold toning and a bold strike. This Select Uncirculated coin is CAC endorsed for quality and eye appeal. Population: 15 in 63, 5 finer (11/14). NGC ID# 24GY, PCGS# 6244 Base PCGS# 6244

**1844-O Half Dollar, MS64  
Condition Census Quality  
Better Die Variety**

- 4908** 1844-O MS64 PCGS. WB-105, Die Pair 19, R.5. A well struck and chiefly brilliant Choice New Orleans half. The eagle's shield display tobacco-brown toning. The lustrous surfaces are smooth save for wispy marks left of the date and above the left (facing) wing. The date is lightly repunched, and the reverse exhibits numerous interesting cracks. Population: 5 in 64, 1 finer (11/14). NGC ID# 24H2, PCGS# 6246 Base PCGS# 6246

**1844-O Doubled Date Half Dollar, AU55  
WB-103, Dramatic Doubling on the Digits**

- 4909** 1844-O Doubled Date, WB-103, FS-301, Die Pair 22, R.4, AU55 PCGS. This dramatic repunched date variety became even more famous when it appeared on the cover of the Wiley-Bugert volume, the standard reference to the series. Most examples are well worn, but the present piece has only minor friction on Liberty's legs and other highpoints. Lightly toned and partly lustrous. Population: 3 in 55, 5 finer (11/14).  
*Ex: Long Beach Signature (Heritage, 9/2008), lot 2173. PCGS# 145817 Base PCGS# 6247*

**1845 Seated Half, MS64  
Underrated, Low-Population Issue**

- 4910** 1845 MS64 NGC. WB-101. Some of the most underrated issues in the Federal series can be found in the Seated Liberty half dollar series, where Mint State examples are ridiculously rare in mid-to-high grades for a handful of issues. The 1845 half is one of them. A total population of six coins are listed in MS64 condition, with none finer by either service (10/14). This example is lustrous and original, with variegated shades of blue, orange, and pale-gold covering unmarked fields and devices. The star centers are sharp and Liberty's hair strands boldly defined. Minor blending on the eagle's left (facing) leg and talon prevents a full strike designation. An underrated and appealing coin, perfect for the astute specialist. Certified in an old pre-hologram holder. NGC ID# 24H3, PCGS# 6248

**1846/Horizontal 6 Half, MS62  
Spectacular Mint Blunder, WB-104  
Sharp Mint State Example**

- 4911** 1846 6 Over Horizontal 6, WB-104, FS-301, MS62 NGC. One of the most-famous recut dates in the entire Federal series, and among the most spectacular mint blunders in numismatics. The 6/Horizontal 6 variety (some call it the "lazy 6") shows other anomalies in the date area, including an unfinished area behind the 8 and 4 and double rim cuds beneath 846. While a few Mint State coins exist, they are far outnumbered by variety collectors needing the WB-104 die pair as a cornerstone of their set. This primarily silver-white coin displays blue and gold tones at the margins and a sharp strike. Satiny mint luster glows across the attractive, minimally marked surfaces. Census: 3 in 62, 4 finer (11/14). PCGS# 409888 Base PCGS# 6254

- 4912 1846-O Medium Date MS62 NGC. WB-101, Die Pair 10, R.3.** A network of die cracks near UNI confirms the variety. An untoned and moderately flashy New Orleans antebellum half dollar. The strike is crisp except on the left (facing) claw, and no marks are remotely consequential. NGC ID# 27SW, PCGS# 6255 Base PCGS# 6255

**1846-O Seated Half Dollar, MS62  
WB-101, Medium Date  
Exceptional Quality**

- 4913 1846-O Medium Date MS62 PCGS. Gold CAC. WB-101, Die Pair 14, R.3.** The Medium Date New Orleans issue is often underrated in the Seated half series, with collectors focusing on the Large (Tall) Date variants and the many interesting repunched dates and heavily cracked reverses, while its absolute rarity in Mint State is secondary. A large mintage of more than 2.3 million pieces shows remarkably few Uncirculated pieces surviving.

This exceptional example is notably original and attractive. Thick lilac-gray patina covers the virtually mark-free surfaces, while iridescent areas glow with mint luster around the motifs. A bold strike shows minor weakness on a few stars surrounding Liberty's head and at the foot, where the obverse die was lapped. A prominent die crack splits the eagle's head at the neck. Just five examples are certified numerically higher by PCGS, although this coin is arguably finer than its assigned grade as confirmed by the valued CAC gold label. Housed in an old green label holder. Population: 9 in 62 (1 in 62+), 5 finer (11/14). NGC ID# 27SW, PCGS# 6255 Base PCGS# 6255

C. Gobrecht, eagle with open wings, sketch on mica

**1847/6 Seated Liberty Half, VF35  
Popular Cherrypickers' Variety, FS-301**

- 4914 1847/6 VF35 PCGS. FS-301.** A Choice VF specimen of this popular *Cherrypickers'* variety that shows the remnants of an undertype 6 below and between the last two primary digits of the date. Some wear shows on the design elements, but LIBERTY is sharp and the lightly abraded surfaces are visited by shades of apple-green and lavender-gray toning. Population: 4 in 35, 8 finer (12/14). NGC ID# 24HA, PCGS# 6258 Base PCGS# 6258

- 4915 1847-O MS62 NGC. WB-105, Die Pair 22, State B, R.2.** Ex: Richmond Collection. The lustrous surfaces exhibit light greenish-gray and bronze coloration. The design elements are sharply struck except for some of the obverse stars and the eagle's left (facing) talons. Surface marks are minimal for the grade.

Ex: *Richmond Collection, Part III (David Lawrence, 3/2005)*, lot 1687. NGC ID# 24HB, PCGS# 6259 Base PCGS# 6259

**1848 Half Dollar, MS64+  
Rare in Mint State**

- 4916 1848 MS64+ PCGS. WB-101.** The normal date variety. This issue had a mintage of just 580,000 coins and is decidedly rare in Mint State. This high-end Choice example exhibits satiny mint luster shining through blended olive, lavender, and golden-gray toning. Stars 7 and 8 are slightly soft, but the strike is otherwise sharp. The figure of Liberty is a little rough, exhibiting a mint-made, rust-like texture. Population: 7 in 64 (1 in 64+), 4 finer (12/14). NGC ID# 24HC, PCGS# 6260 Base PCGS# 6260

**1849 Half Dollar, Toned MS65  
Massive Reverse Die Break**

- 4917 1849 MS65 NGC. WB-101.** The 1849 Seated Liberty half dollar was a high-mintage affair struck to an extent exceeding 1.25 million pieces, but graded survivors today average only AU50 or a bit better. As expected, there were a considerable number of dies used for the issue — Wiley-Bugert (1993) identify 14 die marriages from 11 obverses and 12 reverses. This Normal Date example shows no perceptible doubling on the obverse, but on the reverse there is a massive die break from the rim through the bottoms of UNITED S and back to the rim. That crack has another smaller one joining it, running downward through the leaf triplet and the H in HALF. One wonders how many half dollars could have been struck from this reverse die, as the portion above UNITED appears ready to cleave off from the rest. The surfaces on this piece are virtually pristine and show beautiful patina, largely aqua and pinkish gold with some silver areas remaining. Census: 3 in 65, 0 finer (12/14). NGC ID# 24HE, PCGS# 6262 Base PCGS# 6262

**1849 Seated Half, MS65  
Tied for Finest Certified**

- 4918 1849 MS65 NGC. WB-104.** Ex: "Col." E.H.R. Green. The 1849 Seated Liberty half dollar is a better date in the series, from a mintage of 1.2 million pieces. This coin shows a very lightly recut 1 in the date and a die crack through the bottom of the numerals in the date, identifying the WB-104 variety. Randy Wiley and Bill Bugert rate the WB-104 as a High R.7 issue in Mint State.
- This sharply detailed Gem displays vibrant mint luster and mostly brilliant centers, with attractive accents of golden-brown and lavender toning in peripheral areas. The design elements show fine definition on Liberty's foot support and hair, with just the slightest softness on the eagle's left (facing) claw. Census: 3 in 65, 0 finer (12/14).
- Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$7.50; Eric P. Newman Numismatic Education Society. NGC ID# 24HE, PCGS# 6262 Base PCGS# 6262

**1851 Half Dollar, AU58**  
**Attractively Toned and Satiny**

**4919 1851 AU58 PCGS. WB-101.** The 1851 half dollar had a limited mintage of 200,750 coins, and is elusive in all grades. This near-Mint State example is attractively toned in pale mint-gold, aquamarine, lavender, and champagne hues, with well-struck design elements that reveal just a touch of friction over the high points. Population: 8 in 58, 39 finer (12/14). NGC ID# 24HJ, PCGS# 6266 Base PCGS# 6266

**4920 1852 AU58 PCGS. CAC.** An attractive, sharply struck, and scarcely circulated example of this low-mintage date, produced to the extent of 77,000 pieces for circulation. Golden-gray and powder-gray patina complements copious remaining luster. NGC ID# 24HL, PCGS# 6268 Base PCGS# 6268

**4921 1852 MS62 NGC.** A seldom-seen issue, the 1852 half dollars saw a low mintage of 77,130 pieces and a high meltage in the year before the silver content of minor coins was reduced. Ample luster runs over surfaces that show copper-gray patina with a few distributed marks that account for the grade. Census: 15 in 62, 20 finer (12/14). NGC ID# 24HL, PCGS# 6268 Base PCGS# 6268

**1853 Arrows and Rays Half, MS64**  
**Sought-After One-Year Type**

**4922 1853 Arrows and Rays MS64 NGC. WB-101.** The 1853 Arrows and Rays half dollar is not particularly rare compared to other dates of the period, but its status as a one-year type commands unusually strong demand from collectors, especially in the finer Mint State grades. This example displays softly frosted luster beneath light golden highlights. The strike is bold and there are no significant abrasions present. NGC has seen only 26 numerically finer submissions (11/14).  
*From The A. James Evans Collection, Part II.* NGC ID# 24JJ, PCGS# 6275 Base PCGS# 6275

**4923 1853-O Arrows and Rays AU58 NGC. CAC.** Patches of olive-gray visit surfaces that display traces of luster in the recessed areas. This sharply struck AU58 is quite clean for a briefly circulated coin. A popular type coin. Census: 15 in 58, 34 finer (12/14). NGC ID# 24JK, PCGS# 6276 Base PCGS# 6276

**1853-O Arrows and Rays Half, MS64**  
**Conditionally Rare, One-Year Type**

**4924 1853-O Arrows and Rays MS64 PCGS. WB-101, Die Pair 15, R.4.** This is a scarcer die pair attributed by a die crack between stars 10 and 11, a weak die crack through the second A in AMERICA, and diagonal die lines in the drapery below Liberty's elbow. In an attempt to stimulate the circulation of silver subsidiary coins, Congress passed the Act of 1853, reducing the silver weight of half dimes through half dollars. Mint officials added Arrows and Rays to the design to signify the change. The New Orleans facility manufactured over 1.3 million half dollars with the new design, which was implemented for just a single year. The issue is decidedly rare in comparable grades. PCGS reports eight grading events in MS64 and only one submission finer (10/14).

This near-Gem is richly toned in shades of violet, blue, and orange. The obverse motifs are remarkably sharp for an O-mint product, while the reverse devices exhibit typical softness on the eagle and rust lumps throughout. Any abrasions are minor and well-hidden beneath the toning. NGC ID# 24JK, PCGS# 6276 Base PCGS# 6276

**4925** No lot.

**1855-S Arrows Half Dollar, AU55**  
**Among the Finest of This Rare Issue**

- 4926 1855-S Arrows AU55 NGC. WB-101, Die Pair 4, R.5.** The 1855-S is one of the best known keys to the Seated half dollar series. Only 129,950 pieces were struck, and survivors are rare in all grades. High grade examples are especially challenging. This piece shows light wear over the highpoints, and the subdued surfaces are covered with even gray-golden patina. Sure to be a highly contested item by the many collectors of this series. NGC has only certified nine finer examples of this issue (11/14).  
*Ex: Long Beach Signature (Heritage, 5/2005), lot 6258; ANA Signature (Heritage, 7-8/2008), lot 542. NGC ID# 24JR, PCGS# 6284 Base PCGS# 6284*

**1856 Half Dollar, MS65**  
**Frosty and Luminous**

- 4927 1856 MS65 NGC. WB-103.** A small spike on the right side of the 1 in the date attributes this variety. This No Motto issue becomes extremely rare in Gem condition, and finer pieces are prohibitively so. This piece is remarkably frosty for a Seated Liberty half, and the surfaces are free of any noticeable abrasions. Stars 7 through 13 and the eagle's left (facing) talons are deficiently struck, but this is of little distraction to the unaided eye. A light golden glaze warms the shimmering surfaces. Census: 5 in 65, 2 finer (12/14). NGC ID# 24HN, PCGS# 6287 Base PCGS# 6287

**1856-O WB-101 Seated Half, MS65**  
**Ex: Eliasberg**

- 4928 1856-O MS65 PCGS. CAC. WB-101, Die Pair 16, R.3.** A satiny example with lilac-gray patina and subtle gold accents. The strike is bold at Liberty's head and the surrounding star centers, with only minor weakness at the eagle's left (facing) talon. Struck from a late state of the dies, with a radial die crack from the dentil through star 1 to Liberty's hand. An additional crack connects stars 10 through 13. A huge mintage of more than 2.6 million halves has resulted in few Gem or finer examples. This is an original, lustrous coin with an impeccable provenance. Population: 18 in 65, 2 finer (12/14).  
*Ex: Eliasberg Sale (Bowers and Merena, 4/1997), lot 1966. NGC ID# 24HP, PCGS# 6288 Base PCGS# 6288*

**1856-S Seated Half, AU58**  
**WB-101, Scarce San Francisco Issue**

- 4929 1856-S AU58 NGC. WB-101, Die Pair 5, R.4.** Large S. Just 211,000 half dollars were issued in the second year of half dollar production at the San Francisco Mint, and the coinage-starved commerce of the West quickly absorbed the mintage. Remarkably few 1856-S halves survive in Mint State or near-Mint conditions. This largely untuned example shows a glimmer of gold at the margins and a bold strike. Mint luster remains, albeit a bit muted. A few small, ticklike marks suggest the brief circulation. Census: 8 in 58, 4 finer (11/14). NGC ID# 24HR, PCGS# 6289 Base PCGS# 6289
- 4930 1857 MS64 PCGS.** Pleasing luster emanates from both sides of this near-Gem that shows sharply struck devices save for the usual softness in the arrow feathers. Soft champagne color is visible on the well cared for surfaces. Population: 23 in 64, 9 finer (12/14). NGC ID# 24HS, PCGS# 6290 Base PCGS# 6290

---

**1857 Seated Half, Lightly Toned MS65**

**4931 1857 MS65 PCGS. WB-101.** Beautiful gray-gold, olive-gold, and copper hues enliven each side of this Gem Seated half, showing few signs of contact and a decent strike, despite minor softness on a couple of the top obverse stars and on the eagle's left (facing) leg. Population: 7 in 65 (2 in 65+), 2 finer (12/14). NGC ID# 24HS, PCGS# 6290 Base PCGS# 6290

**4932 1859 MS64 PCGS.** The 1859 half dollar had a substantial mintage approaching three-quarters of a million pieces. As a result it is often used as a high-grade example of the No Motto type. This example displays deep, variegated toning over each side. The strike is somewhat irregular, but strong in most areas. Population: 18 in 64, 8 finer (12/14). NGC ID# 24HY, PCGS# 6296 Base PCGS# 6296

---

**1860-O Seated Half, MS65  
WB-105, Recut Mintmark**

**4933 1860-O MS65 PCGS. WB-105, Die Pair 9, R.3.** An intensely toned and lustrous coin, hard to surpass at the MS65 level for eye appeal and visual impact. Rich hues of gunmetal-blue, violet, and rose-gold with a bit of lime-green at the rims cover the surfaces of this outstanding Seated half. Although easily missed under the toning, the fields are almost fully prooflike on both the obverse and reverse. A full strike completes the appeal of this Gem half dollar — a technical grade that is limited by just a single, thin scrape over the HA in HALF. Population: 16 in 65, 7 finer (12/14). NGC ID# 24J4, PCGS# 6300 Base PCGS# 6300

---

**1861 Seated Liberty Half, MS66  
None Numerically Finer at PCGS**

**4934 1861 MS66 PCGS Secure. CAC. WB-101.** A substantial mintage of more than 2.8 million Seated Liberty half dollars was achieved in 1861 at the Philadelphia Mint, making the date relatively available today, in the context of the series. The 1861 is always in demand from series specialists, type collectors, and collectors of Civil War issues alike. This spectacular Premium Gem is sharply detailed in most areas, with just a trace of softness on the upper stars. The well-preserved surfaces radiate vibrant mint luster, with attractive hints of natural green and turquoise toning at the peripheries. Population: 16 in 66 (1 in 66+), 0 finer (12/14). NGC ID# 24J7, PCGS# 6302 Base PCGS# 6302

---

**1861-O Seated Half, MS64  
Struck From Near-Perfect Dies  
Louisiana Issue**

- 4935 1861-O MS64 PCGS. CAC. WB-101, Die Pair 7, R.2.** Boldly struck for the date, this New Orleans issue was produced under the auspices of three different governing authorities: the U.S. government, the State of Louisiana, and the Confederate States of America. Contrary to popularity, the U.S. government issues (struck with the first two die pairs) are by far the scarcest of the varieties. Confederate issues are the most plentiful of the date.

This example is the Wiley-Bugert Die Pair 7, a Louisiana issue characterized by a date that slants uphill and an unusually high mintmark. Struck from an intermediate state of the reverse die — the third use of the die. Otherwise, both the obverse and reverse show no evidence of the die clash, die breaks, or die rust that are seen on many of the issue's die marriages. High rims with bold dentilation surround attractive, pearl-gray surfaces with iridescent highlights. Gold, lilac, blue, and green accents glow with soft luster over smooth fields and devices, with only minimal marks of any kind. Population: 31 in 64 (1 in 64+), 14 finer (12/14). NGC ID# 24J8, PCGS# 6303 Base PCGS# 6303

- 4936 1861-O C.S.A. Obverse, FS-401, VF30 PCGS.** The diagnostic die crack from the bridge of Liberty's nose is just barely visible with a loupe. The surfaces display even wear over the high points and the light gray fields deepen around the devices to charcoal-gray. PCGS# 39968 Base PCGS# 39968

## CONFEDERATE STATES OF AMERICA

**1861 Scott Token, Unc Details  
Important CSA Association Piece**

- 4937 1861 Scott Token — Bent — NGC Details. Unc.** Professional numismatist J.W. Scott acquired the original coinage die for the Confederate half dollar and produced his Scott Restrikes along with these Scott tokens in 1879. The Confederate half dollar die is depicted on one side, with the Scott inscription on the other side, mentioning four Original half dollars, one that is offered elsewhere in the current 2015 FUN sale as part of the Donald Groves Partrick Collection. This Scott token has prooflike gray surfaces with excellent eye appeal.

**'1861' Scott Token, MS64  
Struck Using Original C.S.A. Die**

- 4938 1861 Scott Token MS64 PCGS. CAC.** In 1879 professional numismatist J.W. Scott purchased the original C.S.A. half dollar die from Ebenezer Locke Mason, Jr., who in turn acquired it from Dr. B. F. Taylor, former chief coiner of the New Orleans Mint. Scott overstruck 500 1861-dated halves with the die after planing off the reverses, then paired the C.S.A. die with a "token" die to strike another 500 pieces in white metal. This high-grade example of the latter issue is lightly toned and crisply struck, with smooth prooflike fields. Listed on page 412 of the 2015 *Guide Book*. Ex: *Chicago Central States (Heritage, 4/2011)*, lot 3682. PCGS# 340403

## SEATED HALF DOLLARS

**1861-S Half Dollar, Lustrous MS64  
Rare This Well-Preserved**

- 4939 1861-S MS64 NGC. WB-101, Die Pair 3, R.3.** Both dies are heavily rusted on this variety, with coarse mint frost blanketing both sides. The strike is tack-sharp, even on Liberty's head and the surrounding stars. Close examination with a loupe reveals a few faint, scattered ticks and grazes in the fields and on Liberty's left (facing) arm, but these are virtually swallowed up by the thick luster and the coin has the naked-eye appearance of a full Gem. A light champagne hue warms each side, and the eye appeal of this piece is simply remarkable for the grade. Census: 11 in 64, 5 finer (11/14). NGC ID# 24J5, PCGS# 6306 Base PCGS# 6306

**1863-S Seated Half Dollar**  
**Ivory-Toned, Near-Gem Example**

**4940** 1863-S MS64 NGC. WB-102, Die Pair 3, R.3. A whisper of translucent yellow-gold patina imparts an ivory hue to the otherwise brilliant surfaces of this near-Gem San Francisco half. War or no war, half dollars circulated briskly in the West and were not hoarded to the extent of silver coinage elsewhere in the country.

This sharply lustrous coin approaches a full strike with minimal marks, the most noticeable being a pair of small nicks on Liberty's shoulder and neck. Few high-grade coins survive, as suggested by the combined populations at PCGS and NGC, where just four examples are certified finer. NGC Census: 10 in 64, 3 finer (10/14). NGC ID# 24JC, PCGS# 6310 Base PCGS# 6310

**1865 Half Dollar, MS64**  
**Late No Motto Issue**

**4941** 1865 MS64 PCGS. A gorgeous near-Gem from the last year of Philadelphia No Motto half dollar production, modestly toned silver-blue and gold on the obverse with deeper hues and steel elements on the reverse. Unlike many pieces, this one offers sharp detail on Liberty's head and the nearby stars. Population: 10 in 64, 16 finer (11/14). NGC ID# 24JF, PCGS# 6313 Base PCGS# 6313

**4942** 1865-S AU58 PCGS. WB-103, Die Pair 7, Late Die State "d", R.5. A scarce, extremely late die state S-mint Half and seldom seen with the multiple die breaks and cuds on the reverse. Elsewhere, the coin is sharply defined in the centers with a rich overlay of golden-olive and toning on each side with tangerine-gold accents. An exceptional near-Mint example, housed in an old green label holder.

Ex: Santa Clara Signature (Heritage, 11/2002), lot 7345.. NGC ID# 24JG, PCGS# 6314 Base PCGS# 6314

**4943** 1866-S No Motto XF40 PCGS. WB-101, Die Pair 1, R.5. Struck from an early state of the dies, the lack of die clashing in the lower right corner of the reverse shield confirms the die state. A diagnostic die crack bridges (U)NITED STA(TES). Natural old-silver toning covers both sides, with deeper accents in the recesses of the motifs. Struck from a single die pair, the No Motto halves were produced briefly until new dies arrived with the Motto. Just 60,000 1866-S No Motto halves were minted. This problem-free example is a perfect collector grade — scarce and always in-demand. Population: 18 in 40, 30 finer (11/14). NGC ID# 24JH, PCGS# 6315 Base PCGS# 6315

**1866-S Half Dollar, XF45**  
**Elusive No Motto Variant**

**4944** 1866-S No Motto XF45 PCGS. WB-101, Die Pair 1, R.4. This is the usual late die state example, with a heavy clash mark in the lower-right reverse shield. The San Francisco Mint struck only 60,000 No Motto half dollars in 1866, and this issue is somewhat scarcer than its With Motto counterpart in high grades. This representative exhibits only slight wear over the high points of the design, with mottled olive-gray and dusky silver toning over each side. The strike is sharp and there are no obtrusive abrasions. Population: 15 in 45, 15 finer (11/14). NGC ID# 24JH, PCGS# 6315 Base PCGS# 6315

**1866-S No Motto Half Dollar, Unc Details**  
**Last of the No Motto Business Strikes**

**4945** 1866-S No Motto — Improperly Cleaned — NCS. Unc Details. The slow and spotty communication between Philadelphia and San Francisco saw the latter Mint strike several issues after the main facility ordered a particular design discontinued, including No Motto coins in 1866. This No Motto 1866-S half dollar, one of 60,000 pieces struck, has no trace of wear, though the silver-blue surfaces show disturbed luster from a past cleaning. NGC ID# 24JH, PCGS# 6315 Base PCGS# 6315

**1866 Motto Half Dollar, MS66**  
**Extremely Rare So Fine**

**4946** 1866 Motto MS66 NGC. After several years of experimentation, the motto IN GOD WE TRUST made its debut on the two cent piece in 1864 and other denominations soon followed. This example of the first Motto half dollar issue is a smooth Premium Gem with a mix of silver, gold-gray, and sea-green shadings. Census: 5 in 66, 3 finer (11/14). NGC ID# 24JS, PCGS# 6319 Base PCGS# 6319

1870-CC Seated Half, VF Details  
Chinese Chopmark on Reverse

- 4947** 1870-CC — Chopmark — PCGS Genuine. VF Details. An incuse chopmark with an oval outline is strategically placed above the eagle's left (facing) shoulder. The chopmark flattens a small area on the obverse near the TY in LIBERTY. Slight granularity is seen in the left obverse field, a common occurrence for this scarce Carson City issue. The reverse shows a rim bump at 1 o'clock, but the coin is otherwise nearly unabraded and attractive, with attractive, original silver-gray patina. The chopmark is small but carefully applied — Chinese in origin, apparently the "hsai" symbol meaning to harmonize, reach agreement, and to negotiate, with additional connotations such as "just" or "exactly." An interesting piece for chopmark, counterstamp, and countermark collectors as well as Carson City specialists.

1870-CC Half Dollar, VF30  
Problem-Free Midgrade Example

- 4948** 1870-CC VF30 PCGS. WB-101, Die Pair 5, R.6. The first year Carson City half dollar is even scarcer than suggested by its mintage of 54,617 pieces. A number of 1870-CC silver dollars were set aside as souvenirs, but the half dollars labored in circulation. This is slate-gray and tan-brown example with hints of deeper toning in design recesses. Nicely defined and only lightly abraded. Housed in an old green label holder. NGC ID# 24K2, PCGS# 6328 Base PCGS# 6328

1870-CC Seated Half Dollar, XF45  
Key Seated Half Issue

- 4949** 1870-CC XF45 PCGS. WB-101, Die Pair 5, R.6. It is only in recent years that the majority of Seated Liberty coins seem to have "come into their own" in the numismatic marketplace, although the larger quarters and half dollars are still more popular than dimes and half dimes at shows, as a rule. Key-date issues such as the 1870-CC and some of the other mintmarked issues have seen marked increases in popularity as more and more collectors attempt the challenges of completing sets by date, variety, or all issues.

This first-year Carson City piece is better struck than most of the issue, with softness confined to the E in LIBERTY on the shield, partial drapery (as usual) and a hint of lightness on the eagle's left (facing) leg. Some interesting clash marks show on the reverse, and this well-struck piece shows few singular abrasions. The surfaces are covered with light pinkish-gray patina, and subdued luster emanates from beneath. Population: 7 in 45, 15 finer (11/14).

Ex: ANA Signature (Heritage, 7-8/2008), lot 1696. NGC ID# 24K2, PCGS# 6328 Base PCGS# 6328

- 4950** 1871-CC VF30 PCGS. WB-102, Die Pair 4, R.4. Although somewhat more available than the 1870, 1872, 1873, and 1878 Carson City issues, the 1871-CC half is in-itself scarce, from a mintage of just 153,950 pieces. This golden-gray example displays subtle reddish hues for nice eye appeal. A well-detailed coin, minimally abraded, for the assigned mid-level, circulated grade — a perfect collector coin. Population: 7 in 30, 71 finer (12/14). NGC ID# 24K5, PCGS# 6331 Base PCGS# 6331

**1871-CC Seated Half, XF45**  
**Low-Mintage Carson City Issue, WB-101**

**4951** 1871-CC XF45 PCGS. WB-101, Die Pair 6, R.4. The second-year mintage of half dollars at the Carson City Mint was a limited 153,950 pieces, and the issue is understandably scarce as a result. This Choice XF coin earns high marks for originality and minimal wear. Some roughness exists on the well-struck devices, perhaps an indication of high silver content seen on other 1871-CC halves. Copper was in short supply, and other examples of the issue have tested as high as 97% silver, lacking the proper composition to make the planchets hard and durable. Population: 17 in 45, 24 finer (11/14). NGC ID# 24K5, PCGS# 6331 Base PCGS# 6331

**1872-CC Seated Half Dollar, AU53**  
**WB-101, Better Carson City Date**

**4952** 1872-CC AU53 PCGS. WB-101, Die Pair 2, R.4. Soft mint luster remains beneath the light and pleasingly mottled silver-gray toning of this scarce Carson City issue. Just 257,000 pieces were minted, most of which were largely ignored by early collectors and lost to attrition. A Large CC mintmark — the letters close together and sloping slightly downward — indicate a transitional reverse that was also used in 1870 and 1871. Few marks or abrasions disturb the substantial appeal of this boldly struck half. Housed in a green label holder. Population: 5 in 53, 18 finer (11/14). NGC ID# 24K8, PCGS# 6334 Base PCGS# 6334

**1872-CC Half Dollar, AU53**  
**Scarce Carson City Issue, WB-101**

**4953** 1872-CC AU53 PCGS. WB-101, Die Pair 6, R.4. The mintage of 257,000 pieces seems reasonably high for an early 1870s Carson City issue, yet the issue has always been elusive for collectors. This is an attractive, silver-gray example, with sharp details and a nice amount of remaining mint luster for the grade. Only minor abrasions are seen on the surfaces, with a noticeable planchet flake near the scroll above the eagle's left (facing) wing. A large total of nine different die pairs were used to strike the 1872-CC half. Population: 5 in 53, 18 finer (11/14). NGC ID# 24K8, PCGS# 6334 Base PCGS# 6334

**1873 No Arrows Half, Open 3, VG8**

**4954** 1873 No Arrows, Open 3 VG8 PCGS. The No Arrows, Open 3 half dollars were only produced during the short period of time between the transition from the earlier Closed 3 coins and the introduction of the Arrows coinage due to a minuscule weight increase. This piece offers an attractive appearance with dove-gray surfaces that show no major problems, just the extensive wear expected. Population: 5 in 8, 27 finer (12/14). NGC ID# 24KB, PCGS# 6337 Base PCGS# 6337

**1873-CC No Arrows Half, AU50**  
**Scarce in All Grades**

**4955** 1873-CC No Arrows AU50 PCGS. WB-101, Die Pair 1, R.3. Closed 3. Small CC. All 1873 No Arrows half dollars have the Closed 3, the product of obverse dies shipped in late 1872 to the Carson City Mint. In March, 1873 new dies were shipped with the Open 3 and Arrows added, effectively eliminating the possibility of any Open 3 No Arrows coins. This AU example displays glossy, gunmetal-gray surfaces with few marks and light wear. Just 122,500 pieces were minted of the No Arrows type. Population: 3 in 50, 23 finer (10/14). NGC ID# 24KC, PCGS# 6338 Base PCGS# 6338

**1873 Arrows Half Dollar, MS65  
WB-109, Bold Doubled Die Obverse**

- 4956 1873 Arrows, Quad Stripes, FS-101, WB-109, MS65 NGC.** This Small Arrows variety exhibits arguably the boldest die doubled obverse in the entire Seated Liberty half dollar series. The doubling is easily seen on Liberty's gown folds, fingers, foot, the lower stars, the scroll, and the shield stripes which exhibit four lines each instead of the normal three. This variety is extremely rare in Mint State grades, although the 1873 With Arrows half dollar is a rarity at the Gem grade level regardless of variety. NGC has seen only six pieces in this grade, all varieties included, with just three numerically finer (11/14).

The present coin displays soft, satiny luster beneath intermingled shades of sun-red, olive-green, and gunmetal-gray toning. The strike is sharp and only a few minute ticks on the figure of Liberty preclude an even finer assessment from NGC. An important piece for the advanced Seated half dollar specialist. PCGS# 400136 Base PCGS# 6343

**1873-CC WB-102 Arrows Seated Half  
Sharp, Golden-Toned Choice XF**

- 4957 1873-CC Arrows XF45 PCGS. WB-102, Die Pair 4, R.4.** The CC mintmark is small, closely spaced, and high on the coin, with an upward slant to the letters. The right arrow shaft points below the center of the 3 in the date. The new, higher planchet weight standard took effect on April 1, 1873, and the Carson City Mint produced nearly 215,000 coins, but they circulated extensively in commerce. Perhaps 750 pieces survive today in all grades. This example is boldly struck suffused in originality, with rich-gold toning and frosted-olive accents. A few light marks are hidden in the toning. Excellent mint luster remains. Population: 23 in 45, 59 finer (11/14). NGC ID# 24L8, PCGS# 6344 Base PCGS# 6344

**1875-S Half Dollar, MS65  
Toned Green and Gold**

- 4958 1875-S MS65 NGC. WB-101, Die Pair 8, R.3.** Very Small S. The numerous advanced cracks on the reverse periphery characterize the Wiley-Bugert die variety. Original olive-green and apricot-gold toning endows this satiny and well preserved Gem. Well struck except on the upper left stars. A popular Old West type issue. Census: 29 in 65, 14 finer (11/14). NGC ID# 24KE, PCGS# 6351 Base PCGS# 6351

**1876-S Seated Half, MS62 Prooflike  
Rare Variety**

- 4959 1876-S MS62 Prooflike NGC. WB-103, Die Pair 43, R.7.** Ex: Dick Osburn Collection. The date slants slightly up to the right, small lump on the left (facing) thigh to the right of the horizontal shield lines, very small filled mintmark tilting slightly to the left, and a closed lower bud (per Bugert, 2009). Nearly untuned surfaces yield modest field-motif contrast. Sharply struck throughout and prooflike. The obverse fields are a bit busy with small, numerous ticks and marks.

The die pair is rare, according to the most recent Bill Bugert monograph, where it is rated R-7. In the previous Seated Half reference by Wiley and Bugert, the authors wrote: "All examples of WB-103 have been extremely prooflike and are considered to be possible centennial presentation strikes. This could account for this variety being extremely rare." While this scenario is unconfirmed, there is no doubt special care was taken when striking the coins, and that the die pair is seldom encountered. NGC ID# 24KJ, PCGS# 6354 Base PCGS# 6354

**1876-S Half Dollar, Sharp MS65  
Semiprooflike Fields**

- 4960 1876-S MS65 PCGS. WB-102, Unlisted Die Pair.** This variety is unlisted in Bill Bugert's *Register of Liberty Seated Half Dollar Varieties*, pairing obverse 29 with a previously unknown reverse. The mintmark is positioned high, just beneath the feather tip, in a direct line with the upright of the F in HALF. The eagle's tailfeathers are bold, and the fields display noticeable semiprooflike reflectivity, suggesting an early die state. No diagnostic die lumps or die lines are discernable.

As a date, the 1876-S half dollar is fairly available, due to a mintage of more than 4.5 million coins, but it becomes rare in Gem and finer grades. This piece is boldly struck, with satiny luster. Pale lavender, gold, and pale-gray toning accents each side, complementing the delicately preserved surfaces. Population: 20 in 65, 3 finer (11/14). NGC ID# 24KJ, PCGS# 6354 Base PCGS# 6354

**1877-CC Seated Liberty Half, MS64  
Scarce Die Pair**

- 4961 1877-CC MS64 PCGS. WB-103, Die Pair 9, R.4.** Multiple areas of die clashing are seen on both sides of the coin, and the die pair is easily identified by the medium CC mintmark closely spaced and slanting up, with the second C close to the stem. Spidery die cracks encircle the stars and date on the obverse, with a distinctive, arching clash mark immediately above the date. This brilliant, frosted-white example is fully struck despite the rough condition of the dies. The stars are well-detailed on each side of Liberty's fully featured head. Silver luster covers the surfaces of this near-Gem Carson City issue — an excellent candidate for date collectors, CC specialists, and type collectors alike. NGC ID# 24KL, PCGS# 6356 Base PCGS# 6356

**1877-S Seated Liberty Half, MS65  
WB-101; Micro S, Type One Reverse**

- 4962 1877-S MS65 PCGS. WB-101, Die Pair 1, R.3.** Areas of prooflike flash and colorful iridescence flatter the freckled, olive-gray toning over this Gem, highly lustrous example. The large mintage of 5.3 million pieces make this San Francisco date popular for type collectors and a treasure-trove for variety specialists with 39 different die pairs known (and counting). A distinctive horizontal line through WE in the scroll and an obvious lump in Liberty's gown hem help identify the die pair for this fully struck, vibrant half. Population: 33 in 65 (1 in 65+), 21 finer (12/14). NGC ID# 24KM, PCGS# 6357 Base PCGS# 6357

**1877-S Seated Half, MS65  
WB-104, Closed Bud Beneath Stem**

- 4963 1877-S MS65 PCGS. WB-104, Die Pair 24, R.3.** The Type II Reverse. Scattered bumps and lines in the obverse shield and a crumbling die at the top edge of the eagle's right (facing) wing are obvious diagnostics for the die pair. More than 5.3 million half dollars were produced at the San Francisco Mint in 1877, and while the current Bugert monograph lists 38 die pairs, many more may exist to accomplish such a large mintage. Sky-blue and peach-gold toning blankets both sides of this fully struck Gem. For so many coins struck, high-grade examples are surprisingly scarce. Population: 33 in 65 (1 in 65+), 21 finer (11/14). *From The College Collection.* NGC ID# 24KM, PCGS# 6357 Base PCGS# 6357

**1879 Half Dollar, Gem Mint State  
Just 4,800 Business Strikes Made**

- 4964 1879 MS65 PCGS.** After the passage of the Bland-Allison Act, minor silver coinage became an afterthought as the various Mints struck dollars, dollars, and more dollars. This Gem from the 1879 half dollar's desultory mintage of 4,800 business strikes has a near-silver obverse center with thin blue and peach ring toning around, the last color dominating the reverse. Population: 47 in 65 (1 in 65+), 68 finer (11/14). NGC ID# 24KS, PCGS# 6361 Base PCGS# 6361

**1880 Half Dollar, Untoned MS66**

- 4965 1880 MS66 PCGS. CAC.** The 1880 half dollar comes from a mintage of 8,400 business strikes. Randy Wiley and Bill Bugert, in their Seated Liberty half dollar reference, say this low-mintage issue was "somewhat saved." Saved or not, Premium Gems such as this example are seldom seen. Semiprooflike fields offer a pleasing contrast with the mildly frosted, sharply struck design elements. Color-free surfaces reveal just a few minor luster grazes and wispy marks. Population: 20 in 66, 1 finer (12/14). One of three in MS66 with the CAC green approval sticker. NGC ID# 24KT, PCGS# 6362 Base PCGS# 6362

**1880 WB-102 Seated Half, MS66 ★ Prooflike  
Scarce, High-Grade Business Strike**

- 4966 1880 MS66 ★ Prooflike NGC. WB-102.** The Bland-Allison Act of 1878 ushered in an era of incredible Morgan silver dollar production, while the mintage of half dollars went into hibernation for a decade. Just 8,400 half dollar business strikes were issued from the Philadelphia Mint in 1880. Still, a few examples exist in this Premium Gem grade, where the notable NGC Star (the sole example so-honored in prooflike) indicates exceptional eye appeal. Azure-blue and ruby-red shades surround amber-gold centers, and the fully struck motifs are sharply frosted for nice contrast. Census: 11 in 66 (1 in 66 ★), 7 finer (11/14). NGC ID# 24KT, PCGS# 6362 Base PCGS# 6362

**1882 Half Dollar, MS64**  
**Deeply Toned and Reflective**

**4967 1882 MS64 PCGS. CAC. WB-101.** The 1882 half dollar is one of several low-mintage dates from 1879 through 1890, in this case with a production total of only 4,400 pieces. Mint State examples are in high demand, but are only occasionally made available. This Choice representative displays bold detail and semiprooflike mirroring in the fields. The reverse shows vivid, concentric bands of violet and royal-blue around a sun-gold center, while the obverse is more deeply toned in varying shades of aquamarine and lavender-gray. An exceptional example of the scarce business strike issue. Population: 25 in 64 (3 in 64+), 17 finer (11/14). NGC ID# 24KV, PCGS# 6364 Base PCGS# 6364

**1882 Half Dollar, MS65**  
**Noticeable Field-Motif Contrast**

**4968 1882 MS65 NGC. WB-101.** A popular late-series date with a mintage of only 4,400 coins. This Gem example is noticeably prooflike, with mirrored fields and frosty devices that deliver pronounced cameo contrast. The design elements are boldly struck, with just a hint of light golden color over each side. A few faint, grade-consistent marks are present upon close examination. Census: 9 in 65 (1 in 65 ★), 12 finer (12/14). NGC ID# 24KV, PCGS# 6364 Base PCGS# 6364

**4969 1883 MS63 PCGS.** Bright luster exudes from both sides of this Select half dollar. Whispers of soft blue color are seen under magnification. Nice eye appeal for an MS63. Population: 19 in 63, 59 finer (12/14). NGC ID# 24KW, PCGS# 6365 Base PCGS# 6365

**1884 Seated Half, Superb Gem**  
**Profound Eye Appeal**

**4970 1884 MS67 PCGS.** With a mintage of only 4,400 business strikes, it is clear that the half dollar was not the Philadelphia Mint's priority at the time. (Contrast the legislatively blessed Morgan dollar, which saw more than 14 million pieces produced in Philadelphia alone that year.) While the small output largely was saved, few coins have come through more than a century so well as this Superb Gem. Lush semireflective surfaces have gorgeous patina, with blue-tones pale to electric at the margins and apricot-to-peach interior toning. Crisply detailed and surprisingly mark-free, an all-around delight. Population: 7 in 67 (1 in 67+), 0 finer (11/14). NGC ID# 24KX, PCGS# 6366 Base PCGS# 6366

**1887 Half Dollar, MS66  
Rich Peripheral Toning**

- 4971 1887 MS66 NGC.** This wonderful Premium Gem half displays electric-blue, lavender, and orange-gold patina around the borders, much more extensive and deeper on the obverse. This is a crisply struck, lustrous piece that is devoid of mentionable marks. From a mintage of only 5,000 circulation strikes. Census: 9 in 66, 4 finer (11/14).  
*Ex: October Signature (Heritage, 10/2009), lot 707. NGC ID# 24L2, PCGS# 6369 Base PCGS# 6369*

**1888 Half Dollar, MS66  
Lovely Original Toning**

- 4972 1888 MS66 PCGS. WB-101.** The Mint produced only 12,001 half dollars in 1888, contributing yet again to the series of low-mintage issues that is composed of the final dates in the Seated Liberty type. This Premium Gem representative is frosty and well-preserved, with luminous aquamarine peripheral hues surrounding warm lavender-gold centers. Star 8 is weakly defined, though the definition is otherwise sharp. Population: 28 in 66 (2 in 66+), 5 finer (12/14). NGC ID# 24L3, PCGS# 6370 Base PCGS# 6370

**1888 Half Dollar, MS67  
Among the Finest Certified**

- 4973 1888 MS67 NGC. CAC. WB-101.** A remarkably lustrous Superb Gem, toned in shades of amber-gold, lilac, and pale lavender. Stars 7 and 8, as well as the top of Liberty's head, are slightly soft, but the design elements are otherwise well brought up. An immensely appealing condition census example of this low-mintage date (just 12,001 pieces produced). Census: 11 in 67 (1 in 67+, 1 in 67 ★), 0 finer (12/14). NGC ID# 24L3, PCGS# 6370 Base PCGS# 6370

**PROOF SEATED HALF DOLLARS**

**1858 Half Dollar, PR65  
Fully Struck and Beautifully Toned**

- 4974 1858 PR65 PCGS. CAC.** A full strike throughout both sides and gorgeous concentric toning, comprising electric-blue at the rims and sunset orange and violet in the centers, make this a standout example of this early proof issue. The marvelous quality is aptly recognized by CAC. PCGS reports only six in PR65 with a single PR66 finer (12/14). NGC ID# 27TH, PCGS# 6412

**1859 Seated Half, PR66  
Extraordinary Toning**

- 4975 1859 PR66 NGC.** The *Guide Book* reports a mintage of 800 proofs for the 1859 Seated half dollar, using at least three different die pairs, according to Breen. This Premium Gem proof shows some of the vertical shield lines from the first, fourth, and fifth lines extending upward into the horizontal stripes, but it is not an obvious match for these minor varieties. What is blatant is the tremendous eye appeal evident over pristine, fully struck surfaces. The incredible color includes shades of blue and rose with pinkish-gold and a bit of near-brilliance remaining. The strike is full throughout, another plus. A stunning example of this early proof Seated half. Census: 4 in 66, 5 finer (12/14). NGC ID# 27TJ, PCGS# 6413

**1860 Half Dollar, PR66 Cameo  
Early No Motto Seated Half Issue**

- 4976 1860 PR66 Cameo NGC.** Ex: "Col." E.H.R. Green. This early No Motto proof Seated half dollar shows a full strike and excellent eye appeal throughout both sides. The silver-white, thickly frosted devices in the centers provide abundant contrast against the profoundly mirrored fields. A touch of iridescent rim toning rounds out this thoroughly attractive Premium Gem Cameo proof. Despite the reported proof mintage of 1,000 pieces, Breen reports that 475 were melted, leaving a net distribution of only 525 pieces. This piece is near the top rung of the Condition Census, made only two years after the Mint began publicly marketing proof coins to collectors rather than supplying them clandestinely to the well-connected. NGC has seen four submissions or grading events at the PR66 Cameo level, and three are finer (12/14).

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$15.00; Eric P. Newman Numismatic Education Society. PCGS# 86414

**1861 Seated Half, Contrasted PR64 Cameo**

- 4977 1861 PR64 Cameo PCGS. CAC.** In terms of sheer eye appeal, there is little that separates this upper-end PR64 Cameo from a PR65. In fact, some may prefer this half with its stark black-white contrast and a few small contact marks (a loupe is necessary, though). The surfaces are so close to completely brilliant, just a hint of peripheral golden can be made out around the margins. Population: 10 in 64 Cameo (2 in 64+), 11 finer (12/14). PCGS# 86415

- 4978 1863 PR64 NGC.** A sharply detailed Choice example from a low Civil War proof mintage of just 460 pieces, this coin offers deeply reflective fields with just a few minor hairlines and subtle hints of pale gold toning. Census: 25 in 64, 21 finer (12/14). NGC ID# 27TP, PCGS# 6417

**1865 Seated Half, PR65  
Well-Preserved and Appealing**

- 4979 1865 PR65 PCGS.** This is the final No Motto issue for the type, and only 500 proofs were struck. Approximately 400 coins have been graded by the two major services combined, but only a few dozen are rated finer than PR64. This Gem example is fully struck and exhibits blended hues of olive, lavender, sky-blue, and gold toning across each side. Surface distractions are nonexistent. Population: 13 in 65, 9 finer (10/14). NGC ID# 27TS, PCGS# 6419

1865 Seated Liberty Half Dollar, PR65  
Elusive Cameo Example

- 4980 1865 PR65 Cameo PCGS. WB-101.** A meager proof mintage of 500 Seated Liberty half dollars was accomplished in 1865, the last year of the Civil War, and only a handful of survivors exceed the present coin in terms of high technical quality and outstanding eye appeal. The design elements exhibit razor-sharp definition, with a rich coat of mint frost that contrasts boldly with the deeply mirrored fields to create a stunning cameo effect. The cameo appearance is heightened by the fact that the central devices remain essentially brilliant, while the surrounding fields are shaded greenish-gold, with a few hints of blue. No mentionable distractions are evident. Population: 11 in 65 (1 in 65+), 9 finer (12/14). PCGS# 86419

1866 Motto Half, PR66  
Richly Toned Around the Margins

- 4981 1866 Motto PR66 NGC.** Vivid iridescent hues of gunmetal-blue, purple, and sunset-gold gravitate to the margins on each side of this first-year With Motto issue, leaving the centers a soft champagne-gold. Sharply struck and nicely preserved. Certainly one of the finest survivors from a mintage of 725 proofs. Census: 11 in 66 (1 in 66 ★), 1 finer (11/14).  
*Ex: Central States Signature (Heritage, 5/2000), lot 7403; FUN Signature (Heritage, 1/2009), lot 2896; Baltimore Signature (Heritage, 3/2009), lot 2101. NGC ID# 27TZ, PCGS# 6424*

1866 Seated Liberty Half Dollar, PR66  
First Year With Motto

- 4982 1866 Motto PR66 NGC.** The design of the half dollar was modified in 1866 to include the motto IN GOD WE TRUST on the reverse, making the issue an important one for type collectors. This immaculately preserved Premium Gem displays sharply detailed design elements and deeply mirrored fields under shades of pale gold and cerulean-blue toning. Census: 11 in 66 (1 in 66 ★), 1 finer (12/14). NGC ID# 27TZ, PCGS# 6424

1866 With Motto Half, PR66  
Needle-Sharp and Deeply Toned

- 4983 1866 Motto PR66 NGC.** An immensely popular issue due to its status as the first With Motto proof in the series. This Premium Gem example is profoundly sharp throughout both sides, also showcasing deep mirrors and vivid toning in shades of aquamarine, lavender, and deep orange-gold. A truly eye-appealing coin, with no complaints observed. Census: 11 in 66 (1 in 66 ★), 1 finer (12/14). NGC ID# 27TZ, PCGS# 6424

**1867 Seated Liberty Half Dollar, PR65  
Only 625 Examples Struck**

- 4984 1867 PR65 NGC. WB-102.** Only 625 proof Seated Liberty half dollars were struck in 1867 and examples in Gem condition are rare. This delightful piece exhibits sharply detailed design elements throughout, with some slight recutting on the date. The fields are deeply mirrored and the surfaces are visited by attractive shades of pale gold and cerulean-blue toning. Census: 28 in 65 (1 in 65+), 6 finer (11/14). NGC ID# 27U2, PCGS# 6425

**1867 Half Dollar, PR64 Cameo  
Early With Motto Issue to Find With Contrast**

- 4985 1867 PR64 Cameo PCGS. CAC.** A ring of rich peripheral toning covers much of the obverse. The colors include copper, fuchsia, electric-blue, and green-blue. The same hues appear along portions of the reverse rim although the width is smaller. The design elements reveal bold definition on this lovely near-Gem Cameo example. Population: 11 in 64 (1 in 64+), 15 finer (11/14). PCGS# 86425

**1867 Seated Half, PR65 Cameo  
Sharp and Well-Contrasted**

- 4986 1867 PR65 Cameo PCGS.** Not only is the proof 1867 a conditionally challenging issue that is difficult to locate as a Gem, but it has a low certified population in all Cameo grades. This golden-tan representative displays sharply struck devices set atop glowing fields. As befits the grade, there are no distracting hairlines or contact marks. Population: 9 in 65 Cameo, 6 finer (12/14). PCGS# 86425

- 4987 1869 PR64 PCGS.** Vivid shades of lavender, blue, and champagne-gold toning blanket the surfaces of this attractive Choice example. The design elements are sharply detailed and the fields are deeply mirrored under the toning. Population: 57 in 64 (2 in 64+), 18 finer (12/14). NGC ID# 27U4, PCGS# 6427

- 4988 1869 PR64 Cameo PCGS.** A flashy near-Gem with light yellow-gold color and a reasonable strike (just a bit soft on the head of Liberty and the eagle's claws). An excellent candidate for an advanced proof type set. Only 600 proofs were struck. Population: 5 in 64, 8 finer (12/14).

Ex: *New York Signature* (Heritage, 11/2003), 6530; *Central States Signature* (Heritage, 5/2004), lot 7472. PCGS# 86427

**1871 Half Dollar, Lovely PR65**

- 4989 1871 PR65 NGC.** The peripheral stars on the obverse are all fully struck, as is the lower obverse details, but trivial softness appears on the upper areas of Liberty. The reverse shows a weak strike on portions of the eagle and shield. Lovely electric-blue and copper-gold patina appears on the obverse, while the reverse is well-contrasted and displays light powder-gray patina. There is no mentionable contact on either side. Census: 21 in 65, 10 finer (12/14). NGC ID# 27U6, PCGS# 6429

**1871 Half Dollar, PR66  
Stunning Concentric Patina**

- 4990 1871 PR66 PCGS.** Stunning patina is the hallmark of this Superb Gem proof 1871 Seated half dollar. A thin ring of ice-blue to lavender toning surrounds centers of pinkish-gold and orange, with considerable cameo contrast even though unacknowledged by PCGS. A sharply struck and distraction-free coin. Population: 4 in 66, 1 finer (11/14). NGC ID# 27U6, PCGS# 6429

- 4991 1872 PR63 PCGS. CAC.** An untoned and crisply struck specimen with minor hairlines and good field reflectivity. Both motifs are frosty, but no Cameo designation is possible due to the first generation holder. NGC ID# 27U7, PCGS# 6430

**1872 Half Dollar, PR65  
Richly Toned**

- 4992 1872 PR65 NGC.** This richly toned Gem proof offers dusky yet iridescent patina that reveals pale green-gold and richer electric-blue and amethyst shades at the correct angle to the light. Excellent detail, preservation, and all-around eye appeal. Census: 12 in 65 (1 in 65+), 12 finer (11/14). NGC ID# 27U7, PCGS# 6430

**1872 Half Dollar, PR64 Cameo**  
**Delicately Toned, Deeply Mirrored**

- 4993 1872 PR64 Cameo PCGS. CAC. WB-101.** An available No Arrows proof issue, but rare with any degree of field-motif contrast. This Cameo displays glassy mirroring in the fields and razor-sharp design definition. Lovely violet peripheral toning slowly fades to pale champagne in the centers, giving this Choice proof impressive original eye appeal. PCGS has certified only 31 Cameos in all grades, with seven in PR64 and eight numerically finer (11/14). *From The A. James Evans Collection, Part II.* PCGS# 86430

**1872 Half Dollar, PR65 Cameo**  
**Concentrically Toned and Contrasted**

- 4994 1872 PR65 Cameo PCGS. CAC.** Concentric toning is largely orange-gold in the centers and pale sky-blue near the rims, complementing razor-sharp strike details that include good articulation on Liberty's head and the eagle's neck feathers. The lovely color and excellent field-device contrast give this coin the best of both worlds. Of the 950 proofs reportedly struck, few survive as nice at either service. Population: 6 in 65 Cameo (1 in 65+), 2 finer (12/14). PCGS# 86430

**1873 No Arrows Half Dollar, Toned PR65**

- 4995 1873 No Arrows PR65 NGC.** The 1873 No Arrows proof half dollar saw a production of 600 pieces. NGC has seen fewer than 30 Gems, including 10 Cameos and about 30 pieces numerically finer. Light golden-tan and russet obverse toning with bluish-green accents takes on deeper hues on the reverse. The design features are sharply struck and both sides are free of significant marks. Census: 19 in 65 (1 in 65 ★), 26 finer (10/14). NGC ID# 27U8, PCGS# 6431

**1875 Seated Half, Untoned PR65 Cameo**  
**Sole Example in This Grade at PCGS**

- 4996 1875 PR65 Cameo PCGS. CAC.** This near-untoned Gem proof exhibits seamless, flashy fields and consistent frost throughout the devices. The strike is needle-sharp throughout. Just 700 proofs were made, and few survivors in any grade exhibit noticeable cameo contrast. Population: 1 in 65 Cameo, 1 finer (12/14). PCGS# 86436

- 4997 1877 PR64 NGC.** Deep shades of aquamarine and reddish-gold blanket the obverse. The reverse exhibits equally deep toning in hues that include lavender, olive, and gold. A lovely, fully struck proof, free of surface distractions. Census: 47 in 64, 15 finer (11/14). NGC ID# 27UC, PCGS# 6438

- 4998 1878 PR64 NGC.** This lot offers a golden tinted representative of the low-mintage 1878 proof delivery. The surfaces retain deeply mirrored qualities at all angles, and the fully defined features are readily evident. Census: 65 in 64 (1 in 64+), 43 finer (12/14). NGC ID# 27UD, PCGS# 6439

**1880 Half Dollar, PR66**  
**Lovely Multicolor Toning**

- 4999 1880 PR66 PCGS.** Spectacular lavender-gold, mint-green, and ocean-blue hues intermingle over both sides of this remarkably well-preserved and equally eye-appealing Premium Gem proof. The strike is sharp, and the reverse displays full cameo contrast; the obverse is just a little too deeply toned to warrant a similar assessment. Population: 18 in 66 (2 in 66+), 3 finer (12/14). NGC ID# 27UF, PCGS# 6441

- 5000 1880 PR64 Cameo PCGS.** A few flecks of charcoal-gray appear on Liberty's midsection, but most of the fields on each side are reflective silver with a pale blush of wine-champagne color, quite attractive. The strike is sharp on the obverse but soft on the eagle's neck and left (facing) wing. Population: 25 in 64 Cameo (1 in 64+), 49 finer (12/14). PCGS# 86441

**1880 Half Dollar, PR65 Cameo  
Vivid Obverse Toning**

- 5001 1880 PR65 Cameo NGC.** Spectacular striking definition and deeply mirrored fields confirm this coin's proof status, while the frosty devices and rich multicolor toning in shades of violet, blue, champagne, and lilac produce the immense eye appeal. This proof issue experiences heightened demand due to the scarcity of high-grade business strikes. Census: 21 in 65 (2 in 65+), 16 finer (12/14). PCGS# 86441

**1880 Half Dollar, Gem Cameo Proof  
Rare So Fine as a Cameo**

- 5002 1880 PR65 Cameo PCGS. CAC.** A generous proof mintage of 1,355 Seated Liberty half dollars for 1880 counterbalances a low business-strike production of just 8,400 pieces. This sharply detailed Gem Cameo proof displays attractive violet and golden-brown toning at the peripheries. The frosty devices contrast dramatically with the reflective fields. Population: 26 in 65, 21 finer (11/14). PCGS# 86441

- 5003 1881 PR64 PCGS.** The deeply mirrored brilliant fields of this attractive Choice proof create bold cameo contrast with the sharply detailed frosty design elements. Only a few minor hairlines are evident and eye appeal is outstanding. Population: 77 in 64, 40 finer (12/14). NGC ID# 27UG, PCGS# 6442

**1881 Half Dollar, Delicately Toned PR65**

- 5004 1881 PR65 NGC.** Dusky golden-gray toning blankets much of this Gem proof, but when tilted at an angle beneath a light, vivid hues of lavender-gold, mint-green, and blue are illuminated in the peripheral recesses. The strike is sharp, and just a few small marks on the figure of Liberty preclude an even finer grade. Census: 37 in 65, 28 finer (12/14). NGC ID# 27UG, PCGS# 6442

**1882 Half Dollar, PR66  
Crisp and Colorful**

- 5005 1882 PR66 NGC.** One of every five 1882 half dollars struck was a proof (1,100 proofs versus 4,400 business strikes). This Premium Gem proof has dappled blue-to-violet toning on the obverse with clearer, more ring-like (though not concentric) color formations on the sharply defined reverse. Census: 19 in 66 (1 in 66 ★), 5 finer (12/14). NGC ID# 27UH, PCGS# 6443

- 5006 1882 PR64 Cameo NGC.** An elegant appearance is projected by this lovely, impressive example. Razor-sharp strike definition and clean, nicely preserved surfaces are further enhanced by the stark cameo contrast on each side between bright frosted devices and deeply watery fields. A splendid, conditionally scarce proof Seated half. Census: 17 in 64, 41 finer (11/14). PCGS# 86443

- 5007 1882 PR64 Cameo PCGS.** Field-motif contrast shows at all angles. Patches of cobalt-blue, orange-gold, and lavender gravitate to the margins of this sharply struck piece. Some faint hairlines mingle with die polish lines in the fields. Population: 33 in 64 (4 in 64+), 28 finer (12/14). PCGS# 86443

**1883 Half Dollar, Pastel-Toned PR65**

- 5008 1883 PR65 PCGS.** Beautiful pastel peach, mint, amber, and saffron hues invigorate each side of this splendid Gem proof which, despite its moderate color, seems to our eyes to merit a Cameo designation as well, such is the moderate device frost front and back. A great-looking example of this late-series proof strike. Population: 36 in 65, 16 finer (12/14). NGC ID# 27UJ, PCGS# 6444

**1883 Half Dollar, PR66  
Gorgeous Color**

- 5009 1883 PR66 PCGS.** Layers of champagne-gold and electric-blue patina cover the deeply reflective surfaces of this impressive Premium Gem proof. The design elements are sharply detailed, aside from the slightest touch of softness on the eagle's claws, and no mentionable distractions are evident. Population: 13 in 66 (3 in 66+), 3 finer (12/14). NGC ID# 27UJ, PCGS# 6444

**1884 Seated Half Dollar, PR65  
Beautifully Toned**

- 5010 1884 PR65 PCGS.** During the final decade of production for the Seated Liberty half dollar series mintages were increasingly small for business strikes and proofs alike. This issue had a total production of 875 coins, but the business strike mintage of 4,400 pieces makes it a highly valued commodity at any grade level. This is an attractive, fully struck Gem with gorgeous original patina over both sides. A few shallow nicks and blemishes keep it from an even finer rating by PCGS. Population: 20 in 65, 17 finer (10/14). NGC ID# 27UK, PCGS# 6445

**1884 Seated Half, PR65  
Toned and Sharply Struck**

- 5011 1884 PR65 NGC.** Deep and enduring colors characterize the patina over this impressive Gem specimen. Bold gold-orange centers are most prominent, with successive bands of cerulean, powder-blue, and aqua reaching out to the rims. A few tiny disturbances in the right obverse field are consistent with the grade. Census: 32 in 65, 20 finer (12/14).  
*Ex: Central States Signature (Heritage, 4/2010), lot 2639; ANA Signature (Heritage, 8/2010), lot 5025. NGC ID# 27UK, PCGS# 6445*

- 5012 1885 PR64 Cameo PCGS.** Razor-sharp definition is evident on all design elements of this impressive Choice proof, with bold cameo contrast between the frosty devices and the deeply mirrored fields. Eye appeal is terrific. Population: 25 in 64 (1 in 64+), 19 finer (12/14). PCGS# 86446

**1885 Seated Half Dollar, PR66 ★ Cameo  
An Exquisite Type Issue**

- 5013 1885 PR66 ★ Cameo NGC.** This impressive Premium Gem has brilliant silver surfaces with deeply mirrored fields that frame the highly lustrous devices. Although designated Cameo, this piece is a borderline Deep Cameo example that will appeal to type collectors and specialized Seated collectors alike. Census: 16 in 66 (1 in 66+, 3 in 66 ★), 10 finer (12/14). PCGS# 86446

**1886 Seated Half, Concentric-Toned PR65**

- 5014 1886 PR65 PCGS.** Appealing concentric toning on each side comprises pinkish-gold in the centers and pale ice-blue near the rims, a top-notch example of this Gem proof issue, struck in the memorable quantity of 886 pieces. The surfaces are close to a full strike and show no mentionable contact on either side. Population: 23 in 65, 16 finer (12/14). NGC ID# 27UM, PCGS# 6447

**1886 Seated Liberty Half, PR66  
Unusual Cameo Specimen**

- 5015 1886 PR66 Cameo PCGS. CAC.** Razor-sharp definition is evident on all design elements of this delightful Premium Gem, and the deeply mirrored fields contrast boldly with the richly frosted elements. The well-preserved surfaces show a few hints of champagne-gold and cerulean-blue toning. Population: 4 in 66, 2 finer (12/14). PCGS# 86447

**1887 Half Dollar, Premium Gem Proof  
Gorgeous Patina**

- 5016 1887 PR66 PCGS.** Both sides of this later-date proof Seated half hint at the contrast that must have been present soon after its striking, though rich toning has muted the onetime cameo effect. The patina is spectacular, however, with waves of gold-green fading into blue, violet, and rose with an additional silver core at the central obverse. Population: 10 in 66 (1 in 66+), 2 finer (11/14). NGC ID# 27UN, PCGS# 6448

**1887 Seated Half Dollar, PR64 Deep Cameo**  
**High Contrast, High Eye Appeal**  
**Few are Finer**

- 5017 1887 PR64 Deep Cameo PCGS. CAC. WB-101.** Untoned and winter-white, this highly contrasted near-Gem proof displays glassy mirrors and frosted devices for strong white-on-black appeal. The low business-strike mintage of just 5,000 pieces and a proof issue of 710 coins drives the popularity of the date in both formats. CAC-stickered for quality, this sharp example shows a few delicate hairlines under magnification but not a trace of mishandling or fogginess. The stars are plump and fully centered, Liberty appears perfectly struck, and the eagle is beautifully bold. Population: 1 in 64, 3 finer (11/14). PCGS# 96448

**1887 Seated Half, Flashy PR65 Deep Cameo**

- 5018 1887 PR65 Deep Cameo PCGS.** The fields are blinding mirrors while the devices sport a thick layer of mint frost, producing the desirable "silver on black" contrast of this Deep Cameo piece. The centers are largely untoned while a light rim accent consists of amber-gold on each side. A couple of small areas of deeper color appear on the reverse, along with a diagonal toning line through the eagle's left (facing) wing. A flashy, appealing, and fully struck Gem. Population: 2 in 65 Deep Cameo, 1 finer (12/14). PCGS# 96448

**1888 Half Dollar, PR66+**  
**Marvelous Toning**

- 5019 1888 PR66+ PCGS. CAC.** Deeply toned blue-green and peach overall with the latter color strongest at the lower central obverse and the upper reverse. Though the patina has rendered the contrast obsolete, the preservation and all-around eye appeal are marvelous. Population: 12 in 66 (1 in 66+), 3 finer (12/14). NGC ID# 27UP, PCGS# 6449

**1888 Seated Half, Frosty PR64 Cameo**

- 5020 1888 PR64 Cameo PCGS. CAC.** The proof mintage of Seated Liberty half dollars was a fairly generous 832 pieces in 1888, but few examples survive with dramatic cameo contrast. This attractive Choice example features richly frosted devices with razor-sharp definition and deeply reflective fields. Population: 17 in 64 Cameo, 15 finer (12/14). PCGS# 86449

**1889 Half Dollar, Sharp PR65**  
**Beautiful Late-Series Proof**

- 5021 1889 PR65 NGC.** The surfaces are reflective throughout, showing a light golden cast in the centers of each side bounded by mint, amber-copper, and pale blue at the margins. This piece is quite sharply struck and attractive, a great representative of this final-year Seated half dollar proof. Census: 29 in 65, 25 finer (12/14). NGC ID# 27UR, PCGS# 6450

**1890 Half Dollar, Gem Proof**  
**Lovely Peripheral Toning**

- 5022 1890 PR65 PCGS.** The penultimate proof Seated half dollar issue saw a modest mintage of 590 pieces. This impressively toned Gem proof shows whispers of past contrast, though not to the Cameo level. Blue-to-green outer toning yields to peach-tan and finally near-silver in the centers. Population: 18 in 65 (1 in 65+), 22 finer (11/14). NGC ID# 27US, PCGS# 6451

- 5023 1890 PR64 Cameo PCGS.** Icy devices exhibit exceptional contrast with glassy fields. Perhaps a Deep Cameo designation is denied only by the peach patina that clings to the margins. The surfaces are intricately struck and pristine, save for a single hair-thin mark on each side of star 11. Population: 13 in 64 Cameo (1 in 64+), 17 finer (12/14). PCGS# 86451

- 5024 1891 PR64 PCGS.** Fully struck and well-preserved, this is a lovely near-Gem example from the final year of the Seated half dollar series. The obverse peripheries are decorated in warm shades of cobalt-green and violet-brown, leaving dove-gray fields and centers. The reverse displays a frosty white appearance, also with traces of rich coloration near the borders. Population: 52 in 64, 34 finer (11/14). NGC ID# 27UT, PCGS# 6452

**1891 Seated Half, PR67  
Powerfully Mirrored and Moderately Toned**

- 5025 1891 PR67 NGC.** Medium-depth toning competes against powerfully mirrored fields on this beautiful final-year proof half dollar from the Seated Liberty series, one of only 600 pieces struck. Pale aqua and mint central toning cedes to pale rose around the rims, and the proof strike is sharp overall, despite minor softness on Liberty's forehead. Census: 4 in 67, 1 finer (12/14). NGC ID# 27UT, PCGS# 6452

**BARBER HALF DOLLARS**

**1892 Half Dollar, MS66+  
Frosty, High-End Type Coin**

- 5026 1892 MS66+ PCGS. CAC.** The 1892 Barber half dollar was well-saved as a first-year issue, but its availability declines sharply above the MS65 grade level, and it is genuinely rare finer than MS66. This Plus-graded example boasts thickly frosted luster beneath a veil of iridescent lavender-gray and pale gold toning, with deeper olive-green colors also seen around the obverse peripheries. The strike is bold and there are no noticeable abrasions. Population: 43 in 66 (4 in 66+), 12 finer (11/14). NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

**1892 Micro O Half Dollar, Good 6  
Collectible Example With Original Patina**

- 5027 1892 Micro O, FS-501, Good 6 PCGS.** In circulated grades, the 1892-O is the key regular issue of the Barber half series, but it is common relative to the rare Micro O variety. The die engraver incorrectly used a mintmark punch intended for a quarter. The mistake is more easily understood when one realizes that 1892 was the first year of New Orleans half dollar production since 1861. This well-circulated example displays full rims (except for the dentils), distinct stars, and bold peripheral legends. Liberty's jawline, ear, and wreath are fairly strong, and the letters L and TY of LIBERTY show, as do most of those in E PLURIBUS UNUM. The lighter motifs stand out from the deeper gray fields, especially on the obverse. Some scattered minute marks are noted, but these are fewer and less severe than what might be expected for a coin experiencing heavy circulation. PCGS# 391216 Base PCGS# 6463

- 5028 1892-S MS64 PCGS. CAC.** An attractive Choice example of this popular mintmark type issue from the first year of the Barber design. This coin is sharply detailed throughout and the pinkish-gray surfaces show only minor signs of contact, with highlights of silver and gold at the rims. Population: 33 in 64 (1 in 64+), 16 finer (12/14). From The College Collection. NGC ID# 24LJ, PCGS# 6464

**1895 Barber Half, MS65  
Remarkable Full Strike**

- 5029 1895 MS65 PCGS.** Flashy luster runs underneath the deep, consistent orange-gray patina that covers each side of this Gem 1895 Barber half. This piece's most remarkable feature, however, is the absolutely hammered, full strike that fully brings up all star radials, the fine details in Liberty's hair and wreath, and all details in the shield and eagle feathers on the reverse. Population: 22 in 65 (1 in 65+), 7 finer (12/14). NGC ID# 24LS, PCGS# 6471

**1896 Barber Half, MS65**  
**Appreciable Prooflike Effect**

**5030 1896 MS65 PCGS.** The surfaces on this 1896 Barber half show frosty gold tones on the devices and considerable field reflectivity, an appreciable and beautiful prooflike effect. The dies must have been nice and fresh when this piece was struck, among only 950,000 circulation strike for the issue. A nicely struck and well-preserved example. Population: 16 in 65, 5 finer (12/14). NGC ID# 24LV, PCGS# 6474

**1897 Half Dollar, MS66**  
**Conditionally Rare Type Coin**

**5031 1897 MS66 PCGS. CAC.** Any Barber half dollar certified at the Premium Gem grade level is worth getting excited about, as at this level even common dates become major condition rarities. This 1897 example is thickly frosted, with a sharp strike and clean surfaces. Many casual collectors would call this piece brilliant, though we note a light golden tinge to both sides. Population: 11 in 66 (1 in 66+), 2 finer (12/14). NGC ID# 24LY, PCGS# 6477

**1897-S Half Dollar, MS65**  
**A Condition Rarity**

**5032 1897-S MS65 PCGS.** Outside specialist circles the 1897-S half dollar attracts little attention, but this issue of fewer than a million pieces is a condition rarity in Gem and better. This MS65 example has deep violet-blue and gunmetal hues across much of the obverse and the reverse margins, while the remainder varies from medium-gray to silver-white. Population: 10 in 65, 6 finer (11/14). *From The College Collection.* NGC ID# 24M2, PCGS# 6479

**1898-S Barber Half Dollar, MS64**  
**Rare Issue in High Grade**

**5033 1898-S MS64 PCGS.** Speckled gray-gold and an undercoating of pale orange toning adorn the obverse, while the reverse is closer to brilliant except for some dappled golden highlights near the center. Mint State offerings of this heavily exported issue are quite unusual. Population: 14 in 64, 15 finer (12/14). NGC ID# 24M5, PCGS# 6482

**1900 Half Dollar, Toned MS65**  
**Attractive and Lustrous**

**5034 1900 MS65 PCGS.** Most of the obverse is moderately toned pinkish-gold, while the reverse adds mint and lilac to that palette, both sides quite attractive. The strike is quite sharp throughout each side, and generous cartwheel patina is evident despite the modicum of patina. Seldom seen in finer grades. Population: 37 in 65 (2 in 65+), 10 finer (12/14). NGC ID# 24M9, PCGS# 6486

**1900-O Barber Quarter, MS64**  
**Conditionally Rare in Finer Grades**

**5035 1900-O MS64 PCGS.** Although more than 2.7 million pieces were struck, few Barber half dollar issues can compete with the scarcity of the 1900-O in better Mint State grades. This satiny representative has typical O-mint softness in the centers and is framed in speckled russet and blue toning. Population: 14 in 64, 9 finer (12/14). NGC ID# 24MA, PCGS# 6487

**1900-S Barber Half, Frosty MS64  
Seldom Seen Finer**

- 5036 1900-S MS64 PCGS.** Even though more than 2.5 million pieces were struck of this issue, the 1900-S is seldom seen in Gem condition. This near-Gem PCGS-graded example is untoned, silver-white, and frosty throughout both sides. A stippling of tiny contact marks on Liberty's cheek is undistracting but perhaps precludes an even finer grade. Population: 26 in 64, 11 finer (12/14). NGC ID# 24MB, PCGS# 6488

**1902-O Half Dollar, MS64  
Deeply Satiny and Lightly Toned**

- 5037 1902-O MS64 PCGS.** The 1902-O half dollar is notable within its series for its poor strike and poor luster. That the strike is weak on this piece is self-evident, with a notable lack of detail throughout the centers of the devices. That said, there are no complaints to be had about the quality of this coin's luster; indeed, the heavy cartwheel luster and the warm gold-tan color combine to provide a high degree of eye appeal. A few minor marks on the cheek help to determine the grade. Population: 15 in 64, 7 finer (12/14).  
*Ex: FUN Signature (Heritage, 1/2008), lot 1655; Long Beach Signature (Heritage, 2/2009), lot 1386.* NGC ID# 24MG, PCGS# 6493

- 5038 1904-S VF35 PCGS.** The 1904-S Barber half dollar is a better date, from a low mintage of 553,038 pieces. This Choice VF specimen retains much interior design detail and the pleasing lavender-gray surfaces are lightly abraded. NGC ID# 24MP, PCGS# 6500

- 5039 1904-S — Cleaning — PCGS Genuine. AU Details.** This is an important low-mintage issue of 553,038 pieces, which becomes especially desirable and rare in Mint State. This is a well-struck example with dusky-gray surfaces that display light wear and minimal abrasions. The coin has a somewhat subdued appearance from cleaning. NGC ID# 24MP, PCGS# 6500

**1905 Half Dollar, MS65  
A Condition Rarity**

- 5040 1905 MS65 NGC.** While the 1905 half dollar has a respectable mintage of 662,000 business strikes, there was no particular reason for people to save examples. As a result, even Gems like this one are condition rarities. Both sides are silver-gray in the centers with antique-gold, sea-green, and gunmetal-blue colors around. Census: 8 in 65, 6 finer (11/14). NGC ID# 24MR, PCGS# 6501

**1907 Half Dollar, Conditionally Rare MS66**

- 5041 1907 MS66 NGC.** This is a beautifully frosted Gem with sharp obverse striking definition; the reverse displays the commonly seen softness on the upper right (facing) corner of the shield and adjacent wing feathers, along with the right (facing) leg and claw. Light contact marks are noted on Liberty's cheek and neck. Occasional whispers of delicate golden iridescence are more or less visible at most angles. A conditionally rare representative of this otherwise easily obtainable P-mint issue. Census: 3 in 66, 0 finer (12/14).  
*Santa Clara Signature (Heritage, 11/2001), lot 5957; Atlanta (ANA) Signature (Heritage, 4/2006), lot 738.* NGC ID# 24MY, PCGS# 6508

**1907-D Half Dollar, MS66  
Rare This Well-Preserved**

- 5042 1907-D MS66 NGC.** This is an appealing Premium Gem with golden-brown and iridescent toning over frosty luster on both sides. The strike shows some weakness at the centers, especially on the reverse. This early Denver Mint product has few peers at this grade level. Census: 5 in 66, 3 finer (12/14).  
*Ex: Dallas Signature (Heritage, 4/2007), lot 805.* NGC ID# 24MZ, PCGS# 6509

**5043 1907-O MS65 PCGS.** From a large mintage of nearly 4 million pieces, the 1907-O Barber half dollar is surprisingly difficult to locate at the Gem level. To date, PCGS has certified only 15 examples in MS65 (one in MS65+) with eight finer, while NGC has graded 18 specimens at the Gem level and 10 finer (12/14). The present coin is sharply struck and shows mostly brilliant surfaces, touched here and there with shades of gray and green at the borders. NGC ID# 24N2, PCGS# 6510

**5044 1908-D MS65 PCGS.** Both sides offer prominent, vibrant luster with more than a hint of satin. Pale silver centers yield to gold, orange, peach, violet, and blue patches at the rims. Strongly detailed with just a few shallow marks on Liberty's neck precluding an even finer designation. Population: 28 in 65 (1 in 65+), 13 finer (12/14). Ex: *Houston Signature (Heritage, 12/2010), lot 3711*. NGC ID# 24N5, PCGS# 6513

#### 1908-D Half Dollar, MS66+ The Amazing Norweb-Price Specimen

**5045 1908-D MS66+ PCGS Secure.** Ex: Duckor/Price/Norweb. The obverse has a faint die crack at the bust tip, a small die chip hanging down from the left corner of the bust, a crack at star 5, and another at the tops of OD. The reverse is perfect, with the mintmark close to the eagle's tail, slightly right of center, and canted minutely to the right. Slight weakness is evident at the arrow feathers and claw, with all other design definition bold. Pristine surfaces are frosty and brilliant, with full mint frost beneath delicate gold toning. Only a few trivial blemishes have prevented a higher grade. A few dark spots on the reverse provide pedigree identification.

The Norweb cataloger wrote: "Although the 1908-D is not one of the scarcest varieties in the Barber series, in this elegant preservation the piece must be deemed elusive." A decade later, David Akers wrote: "This is a fairly common issue that is easily obtained below the Gem level, but Gem quality examples are certainly very scarce."

Gem and finer examples of the 1908-D Barber half dollar are elusive but more available than most other issues. PCGS has graded 41 submissions of this issue in MS65 or finer, making it an ideal coin for the type collector. Population: 9 in 66 (2 in 66+), 4 finer (11/14). Ex: *Norweb Collection (Bowers and Merena, 11/1988), lot 3645; Dr. Thaine B. Price (David Akers, 5/1998), lot 175.; Dr. and Mrs. Steven L. Duckor Barber Half Dollar Collection / ANA Signature (Heritage, 8/2010), lot 3224*. NGC ID# 24N5, PCGS# 6513

**5046 1908-O AU58 PCGS.** Soft champagne-gray patination runs over the bot sides of this near-Mint Barber half. The design elements are well-defined for a New Orleans issue. NGC ID# 24N6, PCGS# 6514

#### 1908-O Barber Half Dollar, MS66 Vivid Toning and Vibrant Luster

**5047 1908-O MS66 NGC.** The well-preserved surfaces of this attractive Premium Gem are patinated in shades of gray, golden-brown, and cerulean-blue, creating a dazzling play of colors. The design elements are well-detailed and the surfaces radiate satiny mint luster. Census: 9 in 66 (1 in 66+), 7 finer (12/14). NGC ID# 24N6, PCGS# 6514

#### 1908-S Half Dollar, MS64 Lovely Original Toning

**5048 1908-S MS64 NGC.** David Lawrence believes the 1908-S Barber half dollar is underrated, because of the fairly large mintage of 1.6 million pieces but a disproportionately low survival rate. Examples at the near-Gem level are rare. The present coin displays light, nearly brilliant centers, which turn reddish golden, then cobalt at the rims. Full striking details are evident throughout. Census: 15 in 64 (2 in 64+), 10 finer (12/14). Ex: *FUN Signature (Heritage, 1/2010), lot 3508*. NGC ID# 24N7, PCGS# 6515

#### 1909-S Barber Half Dollar, MS65 Natural Multicolor Toning

**5049 1909-S MS65 PCGS.** The 1909-S half dollar, with over 1.7 million pieces struck, is a scarce and somewhat overlooked issue in better Mint State grades. This original, well frosted example is draped in speckled reddish-orange, sea-green, and violet toning and is well-struck. The coin's lovely toning compensates for a couple of spots on the left side of the reverse. Population: 10 in 65, 14 finer (12/14). NGC ID# 24NA, PCGS# 6518 Base PCGS# 6518

**1910 Half Dollar, MS66  
A Clear Condition Rarity**

- 5050 1910 MS66 PCGS.** Both sides of this later-date Barber half are pale silver-gray with ample luster and occasional dots of toning. The strike is a trifle soft below the shield, though the eagle's talons are sharp. One of just 418,000 business strikes for the issue. Population: 7 in 66 (1 in 66+), 0 finer (11/14). NGC ID# 24NB, PCGS# 6519

**1910-S Half Dollar, Toned MS64**

- 5051 1910-S MS64 PCGS. CAC.** Medium intensity electric-blue, gold, and gray patination runs over the lustrous surfaces of this near-Gem. The design elements are sharply struck, including the upper-right shield corner and the arrow feathers. No significant marks are evident. Population: 22 in 64, 28 finer (12/14). NGC ID# 24NC, PCGS# 6520

- 5052 1911 MS65 PCGS.** Golden-gray surfaces boast a bold strike if not quite full, and generous luster dominates each side. A light peppering of marks appears on Liberty's cheek, headdress, and in the right obverse field, accounting for the grade but not at all overt. NGC ID# 24ND, PCGS# 6521

- 5053 1912 MS65 NGC.** The mint frost is remarkably strong and shines forcefully through the light coating of golden-brown toning on each side. Well-struck throughout and notably clean surfaces. Census: 13 in 65, 1 finer (12/14). NGC ID# 24NG, PCGS# 6524

- 5054 1912-D MS65 NGC.** The nearly color-free lustrous surfaces of this Gem display well struck devices except for the usual softness in the upper-right shield corner and the arrow feathers. Census: 30 in 65, 8 finer (12/14). NGC ID# 24NH, PCGS# 6525

- 5055 1912-D MS65 PCGS.** Attractive luster is present on both sides of this Gem. The obverse remains almost entirely silver, while a faint gold and green patina covers the reverse. The strike is sharp overall, with only minor areas of incompleteness present, including the eagle's left claw and the upper-right shield corner. A few minor marks and grazes preclude an even finer grade. Population: 57 in 65, 16 finer (12/14). NGC ID# 24NH, PCGS# 6525

- 5056 1912-S MS64 NGC.** This well-struck near-Gem displays lustrous surfaces covered with streaks and splashes of deep purple. The only mentionable mark occurs on the lower part of Liberty's nose. Census: 49 in 64 (2 in 64+), 13 finer (12/14). NGC ID# 24NJ, PCGS# 6526

**1913-D Half Dollar, MS66  
None Finer at Either Service**

- 5057 1913-D MS66 NGC.** In 1913 and 1914, none of the five half dollar issues struck reached the million-coin mark. The 1913-D issue saw just over half a million pieces struck, and this is one of fewer than a dozen MS66 coins graded by NGC and PCGS combined to tie for first place (11/14). Bright silver surfaces show few abrasions of any size. The eagle's talons are sharp, though a few of the obverse stars are flat. NGC ID# 24NL, PCGS# 6528

**1914 Barber Half Dollar, MS65  
A Late-Date Condition Rarity**

- 5058 1914 MS65 PCGS. CAC.** The last three years of Barber half dollar production in Philadelphia were desultory, never topping 200,000 coins. Of the three, the 1914 has the lowest mintage at just 124,230 pieces, and Gem and better coins are conditionally rare. This example, housed in a green label holder with CAC sticker, is frosty and light silver with only a hint of patina. Smooth and delightful. Population: 11 in 65 (1 in 65+), 2 finer (11/14). Ex: *FUN Signature* (Heritage, 1/2005), lot 4267. NGC ID# 24NN, PCGS# 6530

**1915 Half Dollar, Gem Mint State  
Low-Six-Figure Mintage**

- 5059 1915 MS65 PCGS.** Deep plum-red, apricot, and olive-brown toning blankets this satiny and crisply struck Gem. Curiously, the three lowest mintage Barber half issues were all struck at Philadelphia during the final three years of the type. Population: 17 in 65 (1 in 65+), 4 finer (12/14). Ex: *Long Beach Signature* (Heritage, 5-6/2007), lot 1163; *ANA Signature* (Heritage, 3/2008), lot 716. NGC ID# 24NR, PCGS# 6532

## PROOF BARBER HALF DOLLARS

### 1892 Barber Half Dollar, PR68 Tied for Finest Certified

- 5060 1892 PR68 NGC.** This gorgeous Superb Gem example of the first-year 1892 proof Barber half is blanketed on both sides by deep shades of electric-blue, rose, and gold toning, along with occasional coral accents. The glassy fields remain deeply reflective when the coin is turned beneath a strong light source. The fully struck surfaces are free of contact marks or other distractions.

This first-year issue had what was easily the highest proof mintage of the entire Barber half dollar series. It is one of the most available issues, if not by a wide margin over some of the other dates from the 1890s. This date was widely hoarded because of its first-year status and is probably the best choice for a proof type collection. Census: 2 in 68, 0 finer (11/14).

Ex: Goldberg's (2/2010), lot 1095; Eugene Gardner Collection, Part I (Heritage, 6/2014), lot 30572. NGC ID# 24NU, PCGS# 6539

### 1892 Barber Half, PR67 Cameo Stark Field-Device Contrast

- 5061 1892 PR67 Cameo NGC.** Ex: Hugon. As the initial year of production for the short-lived and highly collectible Barber series, the 1892 will always be a popular coin for collectors. Fortunately for today's collectors, a higher percentage of both proofs and business strikes were set aside as curiosities at the time of issue. Equally fortunate is the care with which these coins were accorded, and as a result numerous high grade and very attractive examples are known today. This is one of the finer-known pieces. Brilliant throughout, the fields show deep, glassy reflectivity and they go "black" when angled just right. At the same time, the devices are noticeably frosted and present a strong contrast against the proof mirrors. There are no visible surface defects on either side of this impressive first-year coin. Census: 24 in 67 (2 in 67 ★), 1 finer (11/14).

Ex: FUN Signature (Heritage, 1/2005), lot 4272.  
From The Free Tilly Collection. PCGS# 86539

### 1892 Barber Half Dollar, PR63 Boldly Contrasted Deep Cameo

- 5062 1892 PR63 Deep Cameo PCGS. CAC.** The first year of issue Barber half dollar is highly popular with collectors, some of whom seek business strikes and others that prefer proofs. This lovely Deep Cameo proof has brilliant and highly lustrous devices with fully mirrored fields and a few minor hairlines. A splendid specimen. Population: 3 in 63, 20 finer (12/14).

Ex: FUN Signature (Heritage, 7/2011), lot 3714. PCGS# 96539

- 5063 1893 PR64+ Cameo PCGS.** Silver interiors are surrounded by bands of gold-to-orange with areas of teal and blue at top and bottom on both sides. Well-frosted on portrait and eagle with great all-around eye appeal. Population: 23 in 64 (3 in 64+), 45 finer (12/14). PCGS# 86540

### 1893 Half Dollar, PR65 Cameo Sharp, Frosty Devices

- 5064 1893 PR65 Cameo NGC.** The second year of proof production for the Barber half dollar declined to only 792 pieces, and the survival rate is proportionately lower than that of the 1892, which experienced higher sales due to the novelty of the new type. This Gem Cameo is boldly contrasted, with frosty devices and just a hint of light golden color over the deeply mirrored fields. A few faint hairlines are the only grade-limiting faults, though the eye appeal is exceptional overall. Census: 14 in 65, 31 finer (12/14). PCGS# 86540

**1893 Barber Half Dollar, PR66 Cameo  
Visually Appealing Proof Type Coin**

- 5065 1893 PR66 Cameo PCGS.** This is a delightful specimen with stellar visual appeal that would seem difficult to improve upon for the issue. Sharply struck and impressively preserved, this Premium Gem proof from a small mintage of 792 pieces combines a high degree of technical merit with eye-appealing frosted white devices and smooth, deeply-mirrored icy-gray fields. A tiny mark on Liberty's cheekbone is mentioned solely for the sake of accuracy. Population: 19 in 66 (2 in 66+), 7 finer (10/14). PCGS# 86540

**1893 Barber Half Dollar, PR66 Cameo  
Attractively Toned Cameo Example**

- 5066 1893 PR66 Cameo PCGS. CAC.** Only 792 proof Barber half dollars were struck in 1893 and few survivors display the eye appeal of this delightful Premium Gem. The design elements exhibit sharp definition throughout and the fields display deep mirrorlike surfaces. Toning that includes shades of aquamarine and champagne-gold adds to the outstanding visual appeal. Population: 19 in 66 (2 in 66+), 7 finer (11/14).  
*From The Free Tilly Collection. PCGS# 86540*

**1893 Half Dollar, PR66 Cameo  
Pleasant Field-Device Contrast**

- 5067 1893 PR66 Cameo PCGS. CAC.** The second proof delivery in the Barber half dollar series, the 1893 had a mintage of 792 pieces. The surfaces of this representative are delicately veiled in silver-gray and golden iridescence that appears to lighten in the open fields and over the devices. The stark cameo contrast is readily evident at all angles, and the surfaces are free of even the most trivial distractions. Population: 19 in 66 (2 in 66+), 7 finer (12/14).  
*Ex: Long Beach Signature (Heritage, 6/2002), lot 7297. PCGS# 86540*

- 5068 1894 PR64 NGC.** Deeply toned over both sides, with slate-blue color dominating the obverse. The reverse shows multiple hues that include bright teal-green, lavender, and plum. A fully struck, well-preserved example of this third-year proof issue. NGC ID# 24NW, PCGS# 6541

**1894 Half Dollar, PR66  
Repunched Date**

- 5069 1894 PR66 NGC. CAC. Breen-5052.** Rotation beneath a light exhibits splendid navy-blue, jade-green, peach-gold, and slate-gray toning. The strike is bold except on the right shield corner, and the surfaces are immaculate aside from a slender mark on the shield. Breen describes this repunched date variety as "extra outlines within triangle of 4." Despite a proof mintage of just 972 pieces, at least two obverse dies were used, and each displays a slightly different date position. Encapsulated in a former generation holder. NGC ID# 24NW, PCGS# 6541

**1894 Half Dollar, PR65 Cameo  
Beautifully Toned on Both Sides**

- 5070 1894 PR65 Cameo NGC.** Deep mirrors and sharp, satiny devices beautifully showcase vivid multicolor toning on both sides of this Gem Cameo. Violet, aquamarine, and sun-gold bands surround the margins, with lighter champagne-gold color in the centers. A few minor hairlines limit the grade, but in no way affect the visual appeal. This issue is generally available overall, but it becomes scarce with a Cameo designation. Census: 18 in 65, 31 finer (11/14). PCGS# 86541

**1894 Half Dollar, PR66 Cameo**  
**Exceptional, Lightly Toned Example**

**5071 1894 PR66 Cameo PCGS.** While the business strike half dollar from this year is scarce in high grades, the 1894 proof is slightly more available for date representation. The present Premium Gem example shows strong field-motif contrast with frosty devices and deep mirrors. The strike is sharp, with a light golden hue blanketing both sides and deepening to a ring of amber color around the peripheries. Population: 22 in 66 (2 in 66+), 5 finer (12/14). PCGS# 86541

**1894 Barber Half Dollar, PR66**  
**Elusive Cameo Example**

**5072 1894 PR66 Cameo PCGS.** Ex: Friend. One of the more popular dates as a proof because of the general availability today of what remains of the 972 proofs struck. However, this is not one of the more available dates with cameo contrast, especially among the dates from the 1890s. This is a magnificent coin that shows strong field-to-device contrast even beneath the rich layers of toning. The obverse has golden-rose hints that are surrounded by cobalt-blue at the margins. The reverse has the same cobalt-blue color spread evenly over the entire side. An immensely attractive coin with strong eye appeal. Population: 22 in 66 (2 in 66+), 5 finer (11/14). Ex: FUN Signature (Heritage, 1/2007), lot 4607. From The Free Tilly Collection. PCGS# 86541

**1897 Half Dollar, PR68**  
**Beautiful One-Sided Cameo**

**5073 1897 PR68 NGC.** Ex: Pittman. Full cameo contrast adorns the obverse of this high-end Superb Gem, though the reverse is a bit too deeply toned to qualify for the designation from NGC. The obverse portrait is largely free of color, while the mirrored fields display deeper hues of lavender, ocean-blue, and orange-lavender. The reverse is awash in concentric rings of mint-green, royal-blue, and deep violet around a sun-gold core. Surface blemishes are seemingly nonexistent, and the design elements are boldly impressed. The Mint struck 731 proof half dollars in 1897, but the majority of extant pieces grade at or below the Gem level. This piece is one of only seven non-Cameo coins certified as PR68 at NGC, with none numerically finer (11/14). From The Free Tilly Collection. NGC ID# 24NZ, PCGS# 6544

1897 Barber Half, Lightly Toned PR68  
Tied for Finest at PCGS

- 5074 1897 PR68 PCGS. CAC.** Thoroughgoing field reflectivity appears throughout each side of this Superb Gem proof 1897 half dollar, a coin with thickly frosted devices that might well rate a Cameo designation if the patina were slightly more translucent in selected areas. Some silver-white, mirrored areas remain, but the surfaces blend into pinkish, pale smoke-gray, and orange on this piece. Impeccable preservation and a full proof strike (save for that pesky right shield corner) separate this piece from the large majority of its fellows. For those collectors working on an 1897 proof set or Barber half set for Registry purposes, this top-notch half dollar is a *sine qua non*. Population: 4 in 68, 0 finer (12/14). NGC ID# 24NZ, PCGS# 6544

1897 Half Dollar, PR65 Cameo  
Luminous Devices  
Ex: Teich Family

- 5075 1897 PR65 Cameo PCGS.** Ex: Teich Family Collection. A splendid Cameo Gem proof. Predominantly brilliant, but both borders display light autumn-brown toning, and the left obverse margin contributes additional navy-blue and plum-red shades. The motifs are icy, and rise in bold definition above mirrored fields. PCGS# 86544

- 5076 1898 PR64 Cameo NGC.** The obverse is untoned silver-white, while the reverse shows a similar appearance save for a rich, thin ring of golden patina at the margin. The proof strike is full except for the usual area on the reverse, and ample field-device contrast is well within the Cameo designation. A nice coin for the grade. Census: 16 in 64 Cameo (1 in 64 ★), 50 finer (12/14). PCGS# 86545

1898 Half Dollar, PR65+ Cameo  
Top-Shelf Eye Appeal

- 5077 1898 PR65+ Cameo PCGS. CAC.** The proof silver coins produced in Philadelphia from 1896 to 1898 rightly are celebrated for their high technical quality and all-around eye appeal. This PR65+ Cameo example of the half dollar has clear contrast through a faint layer of champagne-to-gray patina. PCGS has graded just 18 finer Cameo representatives (11/14). PCGS# 86545

1899 Half Dollar, PR64+ Deep Cameo  
A Late-19th Century Classic

- 5078 1899 PR64+ Deep Cameo PCGS.** The 1899 mintage of 846 proof Barber half dollars is on the tail end of the "high era" of silver proof strikings, and few survivors are known with the Deep Cameo surfaces of this piece. Sharply detailed devices exhibit frost that is more than a match for the deep and glorious mirrors of the fields. Population: 1 in 64 (1 in 64+), 10 finer (11/14). PCGS# 96546

**1899 Barber Half, PR67 Deep Cameo**  
**846 Examples Struck**

**5079 1899 PR67 Deep Cameo PCGS.** The Philadelphia Mint struck 846 proof Barber half dollars in 1899, a moderate mintage in the context of the series. Few survivors can match the quality and visual appeal of the present coin. This magnificent Superb Gem displays razor-sharp definition on all design elements and the deeply mirrored fields contrast intensely with the richly frosted devices, creating a marvelous cameo effect. The impeccably preserved surfaces show subtle shades of pale gold toning at certain angles, enhancing the tremendous eye appeal. Population: 4 in 67, 1 finer (12/14). PCGS# 96546

**1900 Half Dollar, PR65 Cameo**

**5080 1900 PR65 Cameo NGC.** Both sides are fully brilliant with no evidence of toning other than a faint haze on the obverse. It is sharply struck with every individual recess in the die fully represented on this coin. The obverse has nice contrast between the fields and devices while the reverse has exceptional contrast and easily qualifies as Deep Cameo. This Gem proof has exceptional eye appeal. Census: 9 in 65 (1 in 65 ★, 1 in 65+★), 38 finer (11/14). PCGS# 86547

**1900 Half Dollar, PR65 Cameo**  
**A Turn-of-the-Century Beauty**

**5081 1900 PR65 Cameo PCGS. CAC.** Intense mint frost across the devices carries the contrast on this Gem Cameo proof, setting off the mirrored fields. The obverse is faintly toned, while on the reverse peripheral plum and blue are plain, most visibly at the left margin. The CAC green label confirms this coin's quality. Population: 21 in 65 (3 in 65+), 28 finer (11/14). PCGS# 86547

**1902 Half Dollar, Gem Proof**  
**Multicolor Patina**

**5082 1902 PR65 PCGS.** Lovely plum-mauve, autumn-gold, and ocean-blue toning encompasses this undisturbed and unblemished Gem. Despite the rich shades, glimpses of cameo frost are present on the portrait. The strike is crisp except near the right shield corner. Encapsulated in an old green label holder. One of just 777 proofs issued. NGC ID# 24P6, PCGS# 6549

**1902 Half Dollar, Toned PR65**

**5083 1902 PR65 PCGS.** An originally toned Gem, with deeply mirrored fields and satiny, sharply struck devices. The obverse peripheries display concentric aquamarine and amber-red bands around a warm champagne center, while reverse the exhibits intermingled hues of the same over the upper-left quadrant and pale blue-gold color elsewhere. Population: 39 in 65, 35 finer (12/14). NGC ID# 24P6, PCGS# 6549

---

**1902 Half Dollar, PR64 Cameo**  
**Elusive With Field-Device Contrast**

**5084 1902 PR64 Cameo NGC.** Ex: BRS Legacy Collection. This splendidly toned specimen has generous blushes of rose-red and ocean-blue patina, while the central reverse and right obverse are light golden in color. The fletchings are well-struck, although some softness is noted near the right shield corner and on the laurel leaves above the ear. A scant 777 proofs were issued. Census: 4 in 64, 4 finer (11/14).

Ex: *FUN Signature* (Heritage, 1/2008), lot 1701.  
From *The Free Tilly Collection*. PCGS# 86549

---

**1903 Half Dollar, PR67**  
**The Exceptional Clapp/Eliasberg Coin**

**5085 1903 PR67 NGC.** Ex: Eliasberg/Hugon. A virtually flawless Superb Gem that boasts exceptional eye appeal. Only the upper-right shield corner lacks a pinpoint strike. Each side has a modest overlay of golden-brown toning that deepens slightly toward the rim, but the depth of reflectivity in the fields tends to overpower this light color and the coin presents as essentially brilliant in much of the fields. A remarkably well-preserved coin with an impressive pedigree that traces back to its purchase from the Mint in 1903. Census: 25 in 67, 3 finer (11/14).

Purchased by J.M. Clapp directly from the Philadelphia Mint in November 1903; John H. Clapp; Clapp estate, 1942, to Louis E. Eliasberg, Sr.; Eliasberg Collection (Bowers and Merena, 4/1997), lot 2097; John C. Hugon Collection (Heritage, 1/2005), lot 4283; Long Beach Signature (Heritage, 9/2006), lot 2020.  
From *The Free Tilly Collection*. NGC ID# 24P7, PCGS# 6550

---

---

**1903 Half Dollar, PR66 Cameo**  
**Delicately Preserved**

**5086 1903 PR66 Cameo PCGS. CAC.** The proof 1903 Barber half dollar is readily available in the absolute sense, but Cameo examples are rare in all grades. This Premium Gem example displays sharp design elements set against deep, gold-tinted mirrors. Close examination fails to reveal any contact marks or noticeable hairlines, giving this high-end example superior eye appeal. Population: 4 in 66, 4 finer (11/14). PCGS# 86550

---

**1904 Barber Half Dollar, PR65**  
**Vivid Multicolor Toning**

**5087 1904 PR65 PCGS.** This sharply struck Gem proof displays a beautiful layer of deep violet-purple and electric-blue toning over both sides, except on the central devices. Well-preserved with minimal hairlines and no contact remnants whatsoever. It is difficult to imagine a more visually delightful specimen from this early 20th century issue. Population: 26 in 65, 25 finer (11/14).

Ex: *Houston Signature* (Heritage, 11/2007), lot 60713.  
From *The Free Tilly Collection*. NGC ID# 24P8, PCGS# 6551

---

**1904 Half Dollar, PR67 Cameo  
Great All-Around Appeal**

- 5088 1904 PR67 Cameo NGC.** This is an unusual Cameo proof considering the production methods in place at the Mint in the early 1900s. Beginning in 1902, a new method of proof production took place, with the devices in the dies being polished as well as the fields. It was believed that this would result in a more desirable appearance, as the frosted devices of Cameo example were not highly desired. Of course, today the opposite is true, and examples such as this with any Cameo contrast are highly prized. This Superb Gem is fully brilliant without toning and has very sharp design features in addition to the contrast between fields and devices. Census: 9 in 67 (2 in 67 ★), 1 finer (11/14).  
Ex: *New York Signature (Heritage, 7/2004)*, lot 6562. PCGS# 86551

**1906 Barber Half, Deeply Toned PR65**

- 5089 1906 PR65 NGC.** Fully struck and well-preserved, with deep layers of lavender-violet and aquamarine toning that becomes somewhat murky on the obverse. The surfaces are nicely preserved and free of hairlines or contact marks. From a small mintage of just 675 proofs, relatively few of which survive at the Gem level of preservation or finer. NGC ID# 24PA, PCGS# 6553

**1906 Barber Half Dollar, PR67  
Only 675 Examples Struck**

- 5090 1906 PR67 PCGS. CAC.** Spectacular shades of golden-brown, lavender, and cerulean-blue toning visit the impeccably preserved surfaces of this delightful Superb Gem. The design elements are sharply detailed throughout and the fields are deeply reflective under the patina. Eye appeal is terrific. Population: 11 in 67, 1 finer (12/14). NGC ID# 24PA, PCGS# 6553

**1907 Barber Half Dollar, PR65  
Spectacular Multicolor Toning**

- 5091 1907 PR65 PCGS.** An amazing Gem that displays immense reflectivity beneath thin gray patina over the centers and deep amber-orange at the margins, joined by azure at the right reverse. This crisply struck example exhibits powerful eye appeal and well-preserved fields. A lovely century-old Barber proof. Population: 21 in 65 (2 in 65+), 25 finer (11/14).  
Ex: *Long Beach Signature (Heritage, 5/2007)*, lot 1177.  
From *The Free Tilly Collection*. NGC ID# 24PB, PCGS# 6554

**1907 Barber Half, PR65 Cameo  
Scarce With Contrast**

- 5092 1907 PR65 Cameo PCGS.** While a fair number of of the 575-piece mintage 1907 half dollar proof coins have survived to the present day Cameo examples are infrequently encountered. The present luminous Gem Cameo displays occasional whispers of gold-tan color and razor-sharp design elements. Only the upper right corner of the shield reveals the usual softness. Both sides are devoid of mentionable blemishes. Population: 7 in 65 Cameo (1 in 65+), 10 finer (11/14). PCGS# 86554

**1909 Barber Half Dollar, PR68  
Among the Finest Certified**

- 5093 1909 PR68 PCGS. CAC.** A number of magnificent proof Barber half dollars survive today, many that hail from a small hoard of original proof sets released into the marketplace after the advent of certified grading. While it is impossible to state with certainty whether the present piece comes from that hoard, the stunning quality and visual appeal of the coin attest to decades of careful preservation.

This lovely example displays a vivid blend of cobalt-blue, lavender, and yellow-gold patina. All of the design elements are crisp, and they present a surprising level of contrast at the proper angle to the light. The specimen's impeccably preserved surfaces reveal no mentionable marks. Population: 8 in 68, 0 finer (12/14). NGC ID# 24PD, PCGS# 6556

- 5094 1909 PR63 Cameo PCGS.** This impressive Select example exhibits razor-sharp definition on all design elements and the frosty devices contrast boldly with the deeply mirrored brilliant fields. As made die-polish lines are visible on Libertys cheek and neck. Population: 4 in 63, 48 finer (12/14). PCGS# 86556

**1910 Barber Half Dollar, PR66 Cameo  
Ex: Dale Friend**

- 5095 1910 PR66 Cameo PCGS. Ex: Friend.** Light golden-brown and rose toning graces the borders of this beautiful Premium Gem. The devices are consistently icy throughout, and contrast favorably with the glassy fields. The strike is exacting, even on the often suspect fletchings and right shield corner. PCGS credits Dale Friend as owning the second finest all-time *business strike* collection of Barber half dollars, but he had impressive proofs in his arsenal as well. Population: 8 in 66, 4 finer (11/14).  
Ex: Dallas Signature (Heritage, 10/2006), lot 1249.  
From The Free Tilly Collection. PCGS# 86557

**1910 Half Dollar, PR67 Cameo  
Only 551 Pieces Struck**

- 5096 1910 PR67 Cameo PCGS.** Variegated shades of green, rose, and gold appear over both sides of this beautiful later proof Barber half dollar. The mildly frosted central devices and watery fields are in pleasing contrast, a seldom-seen state for this post-1902 issue of the brilliant era. Razor-sharp design details and impeccable surface preservation round out this Cameo Superb Gem specimen, one of the finest-known survivors from a low mintage of only 551 proof pieces. Population: 4 in 67 (1 in 67+), 0 finer (12/14).  
Ex: Long Beach Signature (Heritage, 5/2008), lot 797. PCGS# 86557

- 5097 1911 PR64 Cameo PCGS. CAC.** The silver-white surfaces are untoned, save for a light golden cast, and the strike is sharp save for the right shield corner and the eagle's right wing nearby. Nicely frosted devices and reflective field produce ample contrast. Population: 18 in 64, 40 finer (12/14). PCGS# 86558

**1911 Half Dollar, PR66 Cameo  
Multicolor Reverse Toning**

**5098 1911 PR66 Cameo PCGS.** Though the obverse is nearly brilliant, the reverse displays rich navy-blue and plum-mauve toning. The strike is full except near the right shield corner, which is a trifle soft. The obverse provides obvious white-on-black distinction, and the reverse contrast is also strong despite a blanket of toning. One of only 543 proofs struck. Population: 17 in 66 (1 in 66+), 7 finer (11/14). From *The Free Tilly Collection*. PCGS# 86558

**1911 Half Dollar, PR65  
Remarkable Deep Cameo Example**

**5099 1911 PR65 Deep Cameo PCGS.** A blush of pale champagne toning around the peripheries is the only trace of color on this Gem Deep Cameo proof. The relief elements, blanketed in heavy mint frost, deliver bold contrast with the fully mirrored, delicately preserved fields. This issue is scarce in all Cameo grades, and is extremely rare with a Deep Cameo designation. This population includes all four pieces certified by PCGS in this category: 2 in 65, 2 finer (12/14). PCGS# 96558

**1912 Half Dollar, PR67 ★  
Subtle Field-Device Contrast**

**5100 1912 PR67 ★ NGC.** Ex: Hugon. Highly attractive with blazing white centers and deeply toned peripheries that exhibit shades of blue, violet, and sun-gold. The piece has excellent eye appeal, even by the standards of the high grade, and the Star designation is well-deserved. NGC has graded only six numerically finer representatives (11/14). Ex: *FUN Signature* (Heritage, 1/2005), lot 4292; *Central States Signature* (Heritage, 4/2011), lot 3802. From *The Free Tilly Collection*. NGC ID# 24PG, PCGS# 6559

**1913 Barber Half Dollar, PR66  
Some Undesignated Contrast**

**5101 1913 PR66 NGC.** Ex: "Col." E.H.R. Green. Although not designated as a Cameo, this delightful Premium Gem shows some elements of contrast between the sharply detailed, frosty devices and the deeply reflective fields. Accents of lime-green and cobalt-blue toning grace the peripheries. Census: 28 in 66 (1 in 66+), 13 finer (11/14). Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$12.50; Eric P. Newman Numismatic Education Society. From *The Free Tilly Collection*. NGC ID# 24PH, PCGS# 6560

**1913 Half Dollar, PR65 Cameo  
Untoned and Reflective**

**5102 1913 PR65 Cameo PCGS. CAC.** The 1913 Barber half dollar's low circulation-strike mintage of 188,000 pieces makes collectors doubly eager to snap up nice examples of the proof format. This glowing, untoned, nicely reflective piece certainly provides ample opportunity, showing well-struck surfaces free of distractions, major or minor. Population: 8 in 65 Cameo, 8 finer (12/14). PCGS# 86560

**1913 Half Dollar, PR66 Cameo  
Just a Trace of Color**

**5103 1913 PR66 Cameo PCGS. CAC.** Ice-white motifs rise in virtually complete definition above the glassy fields. The borders display moderate lavender and jade-green toning, but most of this Premium Gem is brilliant. Immaculate except for nearly imperceptible contact on Liberty's neck. A meager 627 proofs were issued. Population: 3 in 66, 5 finer (12/14). PCGS# 86560

**1915 Barber Half Dollar, PR66**  
Only 450 Pieces Minted

- 5104 1915 PR66 PCGS.** Only 450 proof Barber half dollars were struck in 1915, making the issue elusive in all grades today. This delightful Premium Gem displays sharply detailed design elements and deeply reflective fields under attractive shades of greenish-gold, lavender, and blue toning. Population: 13 in 66, 9 finer (11/14).  
*From The Free Tilly Collection. NGC ID# 24PK, PCGS# 6562*

**WALKING LIBERTY HALF DOLLARS**

- 5105 1916 MS65 PCGS.** Silver-gray surfaces emit nice luster, and display sharply struck design elements. A light mark on Liberty's left knee is mentioned for accuracy. Always of interest to collectors as the first year of issue.  
*Ex: Central States Signature (Heritage, 3/2005), lot 7315. NGC ID# 24PL, PCGS# 6566*

**1916-S Half Dollar, MS64**  
Faintly Toned

- 5106 1916-S MS64 PCGS.** The frosty silver-white surfaces are minimally toned save for an almost-subliminal touch of gold. A nick on Liberty outstretched left (facing) arm and one along the border of the cap are noted and minor striking weakness appears through the centers, yet this first-year piece offers strong eye appeal for a near-Gem. NGC ID# 24PN, PCGS# 6568
- 5107 1917-D Obverse MS64 NGC.** A lovely satiny sheen encompasses the clean, well-preserved surfaces of this pleasing near-Gem. Boldly struck with warm champagne-gray toning across both sides. From a low mintage of 765,400 pieces. NGC ID# 24PR, PCGS# 6570
- 5108 1917-D Obverse MS64 PCGS.** An appealing example with white, untuned surfaces and shimmering mint frost. Slight champagne accents are noted near the borders. Somewhat more available than its Reverse mintmark counterpart from the same date and mint. NGC ID# 24PR, PCGS# 6570

**1917-D Half Dollar, MS64**  
Scarcer Reverse Mintmark Variant

- 5109 1917-D Reverse MS64 NGC. CAC.** The 1917-D Reverse Mintmark half dollar is notably scarcer than its Obverse Mintmark counterpart, despite having a substantially higher mintage (nearly 2 million coins versus just 765,400 pieces). The present Choice representative shows full definition on Liberty's branch hand, as well as the eagle's right (facing) leg. Satiny luster illuminates traces of light golden toning, while close examination reveals well-preserved surfaces. NGC has seen only 29 numerically finer submissions (11/14). NGC ID# 24PS, PCGS# 6571

**1917-S Walking Liberty Half, MS65**  
Reverse Mintmark Example

- 5110 1917-S Reverse MS65 PCGS. CAC.** A substantial mintage of 5.5 million Walking Liberty half dollars with the Reverse mintmark was produced at the San Francisco Mint in 1917, but the great majority of the coins were released into circulation near the time of issue and few were saved by contemporary collectors. As a result, the issue is much more difficult to locate in high grade than the mintage would suggest. This attractive Gem exhibits the typical striking details for the issue, with a touch of softness on Liberty's wreath hand and head. The well-preserved lustrous surfaces are visited by delicate shades of golden-tan toning. Population: 49 in 65, 10 finer (12/14). NGC ID# 24PU, PCGS# 6573

**1917-S Reverse Half Dollar, MS65  
Above-Average Strike**

**5111 1917-S Reverse MS65 PCGS. CAC.** This is an important representative of an early S-mint Walker that is a well known rarity as a fully struck Gem. Warm pastel-yellow iridescence drifts over the obverse and reverse, both of which exhibit bountiful mint luster with a frosty texture. The strike, while not completely full, is well above average for the date, particularly at Liberty's right (facing) hand and the eagle's breast feathers. A couple of minor, unobtrusive ticks do not disturb. Survivors of the 1917-S Reverse half (5.5 million pieces produced) should only be considered plentiful in worn grades. Housed in a first generation PCGS holder. Population: 49 in 65, 10 finer (11/14).

Ex: *Central States Signature (Heritage, 5/2004)*, lot 7617. NGC ID# 24PU, PCGS# 6573

**1918-D Half Dollar, Well-Struck MS63**

**5112 1918-D MS63 PCGS.** Freckles of brownish toning take on slightly deeper hues on the reverse of this Select Walker. Lustrous surfaces are lightly marked and exhibit above-average detail on the design elements, especially Liberty's branch hand and the eagle's breast feathers. Even the eagle's trailing leg illustrates more feather detail than usually seen. Overall, a very nice-looking coin for the issue and the grade. NGC ID# 24PW, PCGS# 6575

**1918-S Half Dollar, MS64  
Optimum Collecting Grade**

**5113 1918-S MS64 PCGS.** Although Choice Mint State 1918-S half dollars are encountered in the marketplace from time to time, finer examples are elusive, with only 35 higher grade PCGS submissions (12/14). For that reason, MS64 is considered the optimum collecting grade for this issue. This example has brilliant silver luster with delicate iridescent toning and strong design motifs. NGC ID# 24PX, PCGS# 6576

**1919 Half Dollar, MS64  
Bold Design Definition**

**5114 1919 MS64 PCGS. CAC.** A scarcer early date, the 1919 Walking Liberty half dollar is seldom available in pleasing Mint State condition, and it is distinctly scarce above the MS64 grade level. This well-preserved, Choice example showcases boldly struck design elements, including full thumb separation on Liberty's branch hand and sharp feathers on the eagle's right (facing) leg. The luster is satiny, rather than deeply frosty, due to faint die polishing lines in the fields. Pale lavender-gold toning blankets much of each side, with a few tinges of turquoise also seen around the borders. NGC ID# 24PY, PCGS# 6577

**1919-D Half Dollar, AU55  
Low Post-World War I Mintage**

**5115 1919-D AU55 PCGS. CAC.** As the United States shifted off its war footing, discharging conscripted soldiers and sailors and reducing its orders of munitions, the economy went into a steep recession, sometimes considered a depression. An immediate consequence was a reduced demand for coinage, reflected in the low mintages for half dollars at all three Mints in 1919. This lightly rubbed 1919-D half has modest wear but generous remaining luster that is largely silver-gray with dustings of golden-tan and reddish-orange. NGC ID# 24PZ, PCGS# 6578

---

1919-D Half Dollar, Lightly Toned MS62

**5116 1919-D MS62 PCGS.** Fewer than 1.2 million 1919-D half dollars were struck, and heavy circulation during the years following their issuance reduced the majority of surviving examples to lower circulated grade levels. This Mint State representative is surprisingly void of bothersome abrasions, though a degree of noticeable weakness on the central devices (typical of this issue) contributes to the grade. The luster is a slightly muted, light golden hue, though the relief elements exhibit deeper amber coloration. NGC ID# 24PZ, PCGS# 6578

**5117 1919-S AU50 NGC.** A bit of high-point wear is consistent with the grade on this moderately toned key-date Walker, featuring alternating pinkish-gold and pale blue patina. Nice for the grade. NGC ID# 24R2, PCGS# 6579

---

1920-S Half Dollar, MS63  
Better S-Mint Issue in Mint State

**5118 1920-S MS63 NGC.** The 1920-S is an elusive, seemingly overlooked date in Mint State grades. This Select example is deeply satiny with light golden color that yields an area of deeper amber in the lower-right obverse. The central regions show noticeable striking deficiency, an often seen characteristic on this poorly produced San Francisco issue. *From The Free Tilly Collection.* NGC ID# 24R5, PCGS# 6582

---

1920-S Half Dollar, MS64  
Lustrous, Lightly Toned Example

**5119 1920-S MS64 PCGS.** The 1920-S Walking liberty half dollar is a scarce issue in MS64 and finer examples are quite rare. This delightful Choice representative offers vibrant mint luster on both sides. The usual striking deficiency is noted in the centers, though the design elements are otherwise well-defined. A few hints of lavender and champagne-gold toning visit the well-preserved surfaces. Outstanding eye appeal. NGC ID# 24R5, PCGS# 6582

---

1921 Half Dollar, AU58  
Under a Quarter-Million Coins Struck

**5120 1921 AU58 PCGS. CAC.** The substantial mintages for half dollars in 1920 proved more than enough, as the three Mints combined struck fewer than a million half dollars in 1921 and no non-commemoratives at all in 1922. This Philadelphia example (mintage 246,000 pieces) has generous silver luster with minor gold-to-red elements and just a hint of rub across the high points. NGC ID# 24R6, PCGS# 6583

---

1921-D Walking Liberty Half Dollar, MS63  
Low-Mintage Key

**5121 1921-D MS63 PCGS.** The 1921-D Walking Liberty half dollar claims the lowest business-strike mintage of the series, at a meager 208,000 pieces. Accordingly, the 1921-D is one of the most challenging issues of the series in high grade. Even lower Mint state examples are scarce, and attractive Select specimens, like the present coin, are numismatically memorable. This impressive piece shows a better-than-average strike, with clear separation between Liberty's thumb and finger. The lightly marked surfaces are graced by pleasing shades of lavender and champagne-gold toning, with satiny mint luster underneath. This coin would be a welcome addition to a fine collection of half dollars. NGC ID# 24R7, PCGS# 6584

**5122 1921-S VF35 PCGS.** An attractive example of this elusive issue for the grade. Plenty of design detail remains evident in the central areas. Lightly toned overall. NGC ID# 24R8, PCGS# 6585

**1923-S Half Dollar, MS62**  
**Appealing for the Grade**

**5123 1923-S MS62 PCGS.** The 1923-S is a scarce, low-mintage issue, and one that is generally not found well-struck or in Mint State. While this coin is not fully struck, it does display above-average definition for the issue. The surfaces are light golden in color and exhibit pleasing satiny luster. A milling mark is noted just below Liberty's hip, along with scattered, trivial nicks in the fields that keep the piece from grading higher.  
*Ex: Houston Signature (Heritage, 12/2008), lot 1477. NGC ID# 24R9, PCGS# 6586*

**1927-S Half Dollar, MS64+**  
**Exceptionally Clean Surfaces**

**5124 1927-S MS64+ PCGS. CAC.** Only the San Francisco Mint produced half dollars in 1927, making an example of this issue essential for a complete date set. The present Choice representative displays shimmering, satiny luster with a light golden tint. The surfaces are remarkably devoid of any noticeable abrasions, though striking weakness in the centers, typical for the issue, contributes to the grade. NGC ID# 24RA, PCGS# 6587

**1927-S Half Dollar, Gem Mint State**  
**Extremely Rare Any Finer**

**5125 1927-S MS65 PCGS.** With fewer than 2.4 million pieces struck and no concerted effort made to save them, the 1927-S half dollar is scarce in Gem and extremely rare any finer. This Gem is minimally toned with shimmering luster and slightly above-average detail, including a discernible thumb on the branch hand. PCGS has graded six coins as MS66 or better (11/14). NGC ID# 24RA, PCGS# 6587

**1927-S Walking Liberty Half Dollar, MS65+**  
**Seldom Seen Finer**

**5126 1927-S MS65+ PCGS.** The 1927-S Walking Liberty half dollar claims a mintage of 2.3 million pieces, but most of that mintage circulated heavily at the time of issue, making the 1927-S an elusive date in high grade. Complicating the situation is the fact that the 1927-S is also a strike-rarity, and even high-end Gems, like the present coin, show some softness on Liberty's wreath hand and the eagle's leg. This coin exhibits well-preserved surfaces, with vibrant mint luster and attractive shades of champagne-gold and lavender toning. Population: 88 in 65 (7 in 65+), 6 finer (12/14). NGC ID# 24RA, PCGS# 6587

**1929-D Half Dollar, MS65**  
**Just the Faintest Touch of Toning**

**5127 1929-D MS65 PCGS.** This charming Gem has a whisper of gold color but is virtually brilliant. Attentively struck for this issue of just over a million pieces. A few faint marks on the eagle's front leg are all that preclude an even finer grade. PCGS has certified 76 numerically finer examples (11/14).  
*Ex: ANA Signature (Heritage, 3/2007), lot 345. NGC ID# 24RC, PCGS# 6589*

**1929-D Half Dollar, MS66+  
Only One Numerically Finer**

- 5128 1929-D MS66+ PCGS. CAC.** The 1929-D half dollar was the first issue of that denomination produced at the Denver Mint since 1921, but was only struck to the extent of a little more than 1 million coins. The date is available through MS65, but Premium Gems become scarce, and the date is virtually unobtainable any finer. This piece displays radiant, satiny luster beneath pale golden toning on each side, while the design elements are essentially sharp, with partial thumb separation on Liberty's branch hand. Well-preserved surfaces contribute to the overall eye appeal, appropriately recognized by CAC. Population: 76 in 66 (2 in 66+), 1 finer (12/14). NGC ID# 24RC, PCGS# 6589

**1929-S Half Dollar, MS66  
Reflective Mint Bloom**

- 5129 1929-S MS66 NGC. Ex:** Richmond Collection. Despite a mintage of nearly 2 million coins, the 1929-S half dollar is a challenging date in Premium Gem condition, and finer pieces are prohibitively rare. This example vibrantly lustrous, with light golden toning over each side. Liberty's branch hand is softly struck, but the design elements are otherwise well-executed. From a late die state, with several thin die cracks on the reverse. Census: 32 in 66 (1 in 66 ★, 1 in 66+★), 4 finer (11/14).  
*Ex: Richmond Collection, Part II (David Lawrence, 11/2004), lot 1426.*  
*From The Free Tilly Collection. NGC ID# 24RD, PCGS# 6590*

**1933-S Walking Liberty Half, MS66  
Fully Struck and Highly Lustrous**

- 5130 1933-S MS66 PCGS.** It is difficult to find a better-produced issue in the Walking Liberty series than the 1933-S. Examples are invariably sharply, if not fully struck, and the mint luster is bright and frosted. This brilliant example has both traits and is brilliant overall. Seldom encountered finer. NGC ID# 24RE, PCGS# 6591

**1934-S Half Dollar, MS65  
Seldom Available Finer**

- 5131 1934-S MS65 PCGS.** The 1934-S is the scarcest of the three 1934 Walking Liberty half dollar issues in Mint State, but is typically better-struck than some other San Francisco issues of the period. This Gem example displays full thumb separation on Liberty's branch hand and the eagle's right (facing) leg is sharply detailed. Tinges of olive toning around the periphery accent pale pearl-gray color overall. No significant abrasions are observed. NGC ID# 24RH, PCGS# 6594

**1934-S Half Dollar, MS65  
Strikingly Sharp Centers**

- 5132 1934-S MS65 PCGS.** A fully brilliant Gem with satiny silver luster and lightly reflective fields. A few freckles of brown and iridescent toning are visible at the upper obverse. This is a sharply struck example with a full thumb on the obverse and sharp feathers on the eagle's right (facing) leg. Population: 258 in 65 (1 in 65+), 139 finer (11/14).  
*Ex: Central States Signature (Heritage, 4/2006), lot 2947. NGC ID# 24RH, PCGS# 6594*

- 5133 1935-D MS65 PCGS. CAC.** Lustrous surfaces display patches of orange-gold on the obverse. The design elements are generally well-struck, with the skirt lines being especially strong. NGC ID# 24RK, PCGS# 6596

**1935-D Walking Liberty Half, MS66  
None Finer at Either Service**

- 5134 1935-D MS66 PCGS.** The 1935-D is essentially impossible to find fully struck. The typical example shows incompleteness over Liberty's head and branch hand. Such is the case with this satiny and brilliant Premium Gem, although the surfaces are exceptionally clean. Neither PCGS nor NGC have certified any coins in higher numeric grades (12/14). NGC ID# 24RK, PCGS# 6596

- 5135 1935-S MS65 PCGS.** A scarce S-mint and roughly comparable to the 1934-S. This piece is sharply defined on the obverse, but the eagle's feathers on the reverse are notably weak. Brilliant throughout, the surfaces are frosted and there are no mentionable abrasions on either side.  
Ex: *Central States Signature* (Heritage, 4/2006), lot 2952. NGC ID# 24RL, PCGS# 6597

**1935-S Half Dollar, MS66  
Only Three Numerically Finer Coins at NGC**

- 5136 1935-S MS66 NGC.** A scintillating Premium Gem that exhibits snowy-white, impeccably smooth surfaces and a strike that is less than perfect, but well above-average for this often poorly produced S-mint issue. Few 1935-S Walkers could surpass this beauty, either from a technical or aesthetic standpoint. Census: 48 in 66 (3 in 66+), 3 finer (11/14).  
Ex: *ANA Signature* (Heritage, 8/2007), lot 1094.  
From *The Free Tilly Collection*. NGC ID# 24RL, PCGS# 6597

**1935-S Half Dollar, MS66  
Extremely Rare Any Finer**

- 5137 1935-S MS66 PCGS.** This Depression-era half dollar has a satiny character to its pearl-gray surfaces and a separated thumb on the branch hand. Just a touch of steely toning visits parts of the rims. With just six numerically finer pieces in the combined certified population (11/14), this coin strikes a great balance between preservation and price. NGC ID# 24RL, PCGS# 6597

**1935-S Half Dollar, MS66+  
Fresh Mint Luster**

- 5138 1935-S MS66+ PCGS. CAC.** The 1935-S Walker is only marginally scarce in MS66 and lower grades, but finer pieces are nothing short of rare. This Plus-designated representative exhibits radiant, frosty luster that is virtually free of any perceptible color. Liberty's branch hand shows partial thumb separation, and the surfaces are devoid of any significant contact marks. Only three coins are numerically finer at PCGS (11/14). NGC ID# 24RL, PCGS# 6597

**1936-S Walker, Rare MS67  
Tied for Finest Certified**

- 5139 1936-S MS67 PCGS.** The 1936-S Walking Liberty half dollar is one of the better-struck S-mint issues in the series, but finding an attractive, high-grade example is inhibited by the scarcity of such coins overall in relation to the Philadelphia and Denver issues of the period. The present coin is exceptional in both preservation and design sharpness. Liberty's branch hand and the eagle's right (facing) leg are fully detailed, and the satiny surfaces are devoid of all but a couple insignificant ticks on the obverse sun. Largely untuned, save for a hint of iridescence seen when turned beneath a light.

The certified population of this issue plummets substantially in MS67, where PCGS has encapsulated only 11 coins, with none numerically finer; NGC has similarly seen only 17 submissions in this grade, also with none finer (11/14). This piece ranks as an important opportunity for the advanced Walking Liberty half collector or Registry Set specialist. NGC ID# 24RP, PCGS# 6600

- 5140 1937 MS67+ NGC.** Lustrous, sharply defined surfaces are impeccably preserved. Faint gold-gray color shows up under magnification. NGC ID# 24RR, PCGS# 6601

**1937-D Walker, MS67**  
**Among the Finest Certified at PCGS**

**5141 1937-D MS67 PCGS. CAC.** Many collectors consider this issue to be one of the most challenging of the period. Examples in Gem and Premium Gem condition are obtainable with searching, but Superb Gems are scarce. This in contrast to its Philadelphia counterpart, which is available in this grade. The current example is deeply frosty, with light golden luster that exhibits the occasional touch of deeper amber-gold around the peripheries. The preservation is excellent, and Liberty's branch hand shows partial thumb separation. Population: 50 in 67, 0 finer (12/14). NGC ID# 24RS, PCGS# 6602

**5142 1938 MS67 PCGS. CAC.** Lustrous champagne surfaces exhibit sharply struck design elements, including Liberty's head, skirt lines, and branch hand. Marvelously preserved throughout. NGC ID# 24RU, PCGS# 6604

**1938-D Walking Liberty Half Dollar, MS66+**  
**Low-Mintage Better Date**

**5143 1938-D MS66+ PCGS. CAC.** This important issue has the third lowest mintage of the series, and it has the only sub-million coin mintage from 1923 to 1947. A lovely Plus-designated Premium Gem, this specimen is satiny with mostly brilliant surfaces that exhibit light champagne toning at the obverse border and on most of the reverse. Population: 436 in 66 (33 in 66+), 40 finer (12/14). NGC ID# 24RV, PCGS# 6605

**1939-D Half Dollar, MS67+**  
**Just a Single Coin Finer at PCGS**

**5144 1939-D MS67+ PCGS. CAC.** Arcs of multicolor toning encompass the left portions of both the obverse and reverse. Shades include mauve, sea-green, and golden-orange. The remaining surfaces maintain their brilliance. This Registry-quality Superb Gem features essentially flawless preservation and impressive eye appeal. The strike is strong overall with a touch of softness over Liberty's thumb. Sharp strikes tend to be anomalous for D-mint Walkers from the 1930s, but they are typical of this issue. PCGS has certified just a single coin finer (10/14). NGC ID# 24RX, PCGS# 6607 Base PCGS# 6607

**1941 Half Dollar, MS68**  
**Delicate Toning, Strong Luster**

**5145 1941 MS68 NGC.** A marvelous short-set beauty with bright luster beneath delicate colors, silver-blue and apricot chief among them. Good separation on Liberty's branch hand leaves the thumb clear. Impressive preservation is at the limit of the combined certified population. Census: 25 in 68 (3 in 68 ★), 0 finer (11/14). NGC ID# 24S3, PCGS# 6611

**1941 Walking Liberty Half Dollar, MS68**  
**Sharply Detailed and Lustrous**

**5146 1941 MS68 PCGS.** This magnificent Walking Liberty half dollar exhibits sharply detailed design elements, with complete separation between Liberty's thumb and fingers on the wreath hand. The pristine surfaces radiate vibrant mint luster and show delicate shades of greenish-gold toning. Population: 19 in 68, 0 finer (12/14). NGC ID# 24S3, PCGS# 6611

**5147 1942 MS67+ NGC. CAC.** Dazzling luster emanates from the untuned surfaces of this high-end Superb Gem. Sharply struck and impeccably well preserved. NGC ID# 24S6, PCGS# 6614 Base PCGS# 6614

**1943-S Half Dollar, MS65 Prooflike**  
**The Only Prooflike Example of the Date**

- 5148 1943-S MS65 Prooflike NGC. CAC.** Walking Liberty half dollars typically have two distinct “looks,” consisting of satiny pieces and deeply frosty coins. Prooflike examples are so rare that many collectors do not even realize it is possible to obtain one — albeit, with much patience. NGC has encapsulated just four Prooflike Walkers in the *entire* series, and this is the only one representative of the 1943-S issue (12/14). The other three are of the 1944-S, 1945-S, and 1946-S issues. The fields on this coin are indeed deeply prooflike, and provide an attractive back drop for the satiny devices. Some striking weakness is noted in the centers, as usual for the issue, and some faint die polishing lines in the fields (as made) accompany the mirrorlike qualities. A tinge of light golden toning warms both sides. NGC ID# 24SB, PCGS# 6620

**1943-S Half Dollar, MS67**  
**Frosty and Well-Defined**

- 5149 1943-S MS67 PCGS. Large S.** The 1943-S Walking Liberty half dollar issue holds a key place among later-series issues in high grade, among the most challenging to find with a decent strike and unblemished surfaces. This lustrous Superb Gem is better defined than most, even though some high-point weakness appears. The surfaces are lightly toned lemon-gold and pearl-gray. Population: 37 in 67 (1 in 67+), 0 finer (11/14). NGC ID# 24SB, PCGS# 6620

**1945-S Half Dollar, MS67**  
**Pleasing Peripheral Patina**

- 5150 1945-S MS67 PCGS. Knob S.** Splendidly freckled forest-green and canary-gold peripheral toning aids the eye appeal of this lustrous and nicely struck San Francisco Walker. A minor vertical graze is noted above the G in GOD, but the coin is otherwise close to pristine. Unimprovable at either service. Population: 24 in 67, none finer (11/14). NGC ID# 24SH, PCGS# 6626

**1945-S Half Dollar, Vibrant MS67**  
**Among the Finest Certified**

- 5151 1945-S MS67 PCGS. CAC.** Plentiful in lower grades, the 1945-S half dollar becomes conditionally rare at the Superb Gem level. This piece is strong for the grade, with vibrant, frosty mint bloom and warm champagne toning. Liberty's branch hand shows minor softness, but the strike is otherwise pleasing. Population: 24 in 67, 0 finer (12/14). NGC ID# 24SH, PCGS# 6626

**1946-S Walking Liberty Half Dollar, MS67**  
**Peripheral Rainbow Toning**

- 5152 1946-S MS67 PCGS. CAC. Knob S.** Rich peripheral rainbow toning provides both sides of this Superb Gem example with exceptional visual appeal. Rich luster is an additional attribute. Though not fully struck, the level of design detail is pleasing. Neither PCGS nor NGC has awarded a higher numeric grade to a single example (11/14). NGC ID# 24SL, PCGS# 6629

**PROOF WALKING LIBERTY**  
**HALF DOLLARS**

- 5153 1936 PR64 NGC.** From the first-ever Walking Liberty half dollar proof issue comes this sharply struck, carefully preserved example that displays reflective fields and a greenish cast over the silver surfaces. A solid near-Gem example with excellent eye appeal. *From The Rawlin “Mac” McNelly Collection.* NGC ID# 27V4, PCGS# 6636

**1936 Half Dollar, PR65**  
**Key to Proof Series**

- 5154 1936 PR65 PCGS.** A fully struck Gem with consistent light straw-gold toning and exemplary surface preservation. The 1936 proof Walker is key to a complete set of the widely collected proof series. The low mintage was likely due to competition from the plethora of silver commemorative types issued that year. Encapsulated in a green label holder. NGC ID# 27V4, PCGS# 6636

**1936 Half Dollar, Gem Proof  
Mintage 3,901 Pieces**

- 5155 1936 PR65 PCGS. CAC.** After a two-decade hiatus, the U.S. Mint returned to proof production in 1936. Production was higher than before, though not high in absolute terms; the half dollar, for instance, saw just 3,901 proofs struck. This Gem has largely silver mirror-fields with significant scattered blue-to-green elements, particularly along the margins. NGC ID# 27V4, PCGS# 6636

**1936 Half Dollar, Lightly Toned PR65**

- 5156 1936 PR65 PCGS. CAC.** A fully struck and deeply mirrored Gem proof, showing subtle field-device contrast on the obverse. A pale golden glow is seen on each side, and the eye appeal is exceptional. The 1936 was the first proof issue in the Walking Liberty half dollar series, and is also the rarest overall. NGC ID# 27V4, PCGS# 6636

**1936 Walking Liberty Half, Exemplary PR66 ★**

- 5157 1936 PR66 ★ NGC.** This exemplary Premium Gem proof 1936 Walking Liberty half dollar shows beautiful sunset hues on each side, made all the more appropriate by Liberty's gesturing toward the setting Western sun. Sunset-orange and gold prevail, accented by pale blue, and the Star designation seems more than justified. NGC ID# 27V4, PCGS# 6636

**1936 Half Dollar, PR66  
Delicately Toned on Both Sides**

- 5158 1936 PR66 PCGS. CAC.** A faint champagne glaze precludes full brilliance on this deeply mirrored and fully struck first-year proof Walker. Proofs were only issued from 1936 to 1942, effectively creating a short, but challenging subset for collectors of this popular series. PCGS has encapsulated just 33 numerically finer 1936 representatives (12/14). NGC ID# 27V4, PCGS# 6636

**1936 Half Dollar, PR67  
First Walking Liberty Proof**

- 5159 1936 PR67 NGC.** The first proof Walking Liberty half dollar, this Superb Gem has gorgeous rainbow toning around more than half of the obverse border, with the balance exhibiting faint gold patina. The reverse is essentially brilliant. Among the finest that NGC has ever certified, and exceeded by a single PCGS certified representative (11/14).  
*Ex: Long Beach Signature (Heritage, 2/2008), lot 792.*  
*From The Free Tilly Collection.* NGC ID# 27V4, PCGS# 6636

**1936 Half Dollar, PR67  
None Numerically Finer at NGC**

- 5160 1936 PR67 NGC.** Proof mintages of the Walking Liberty type gradually increased with each succeeding year, making the introductory 1936 by default to scarcest in the series. This remarkable Superb Gem showcases a full strike set against brilliant, deeply mirrored fields. No contact marks or obvious hairlines are present, leaving this coin with exceptional visual appeal. Census: 82 in 67 (1 in 67+, 5 in 67 ★), 0 finer (11/14). NGC ID# 27V4, PCGS# 6636

**1936 Walking Liberty Half, PR67  
First Proof Issue of the Design**

**5161 1936 PR67 PCGS.** The Philadelphia Mint resumed its program of commercial proof set offerings in 1936, after a two-decade hiatus. A modest mintage of 3,901 Walking Liberty half dollars was struck using an all-brilliant finish. Because the Walking Liberty design was not adopted until 1916, and no proof half dollars were produced that year, the 1936-dated coins were the first Walking Liberty half dollars struck in proof format.

This impressive Superb Gem exhibits sharply detailed design elements throughout, with deeply reflective surfaces that show subtle hints of golden-tan toning. As expected from the grade, no mentionable distractions are evident and eye appeal is outstanding. Population: 32 in 67, 1 finer (12/14). NGC ID# 27V4, PCGS# 6636

**1937 Half Dollar, PR68  
Magnificently Preserved**

**5162 1937 PR68 NGC.** As no official proofs were struck for Walking Liberty half dollars in 1916, the proof series spans just seven dates. The second year of production, 1937, also had the second-lowest mintage with just 5,728 proofs made. This PR68 piece has plenty of eye appeal thanks to modest peach and violet peripheral toning around largely silver interiors. Census: 24 in 68 (3 in 68 ★), 0 finer (11/14). NGC ID# 27V5, PCGS# 6637

**1938 Half Dollar, PR68 ★  
Outstanding Eye Appeal**

**5163 1938 PR68 ★ NGC.** Walking Liberty proof half dollars of 1938 can be located through Premium Gem without too much trouble. Even PR67s are available with patient searching, but PR68s are elusive. NGC has assigned the coveted Star to a mere seven coins graded PR68, which are the finest seen by that service (11/14). Bright untoned immaculately preserved surfaces are apparent on both sides of this offering, yielding outstanding eye appeal. *From The Free Tilly Collection.* NGC ID# 27V6, PCGS# 6638

**5164 1939 PR68 PCGS.** This highly attractive Superb Gem is one of the few examples of this issue that displays modest field-motif contrast. A well executed strike imparts bold definition throughout, including the branch hand that is sometimes weak on this issue. Impeccable preservation characterizes both sides. Population: 34 in 68, 0 finer (12/14). NGC ID# 27V7, PCGS# 6639

**1939 Half Dollar, PR68  
Light Pastel Toning**

**5165 1939 PR68 PCGS.** The reflective, quicksilver surfaces on this outstanding Superb Gem proof show essentially no field-device contrast, typical for the issue. There is just a slight tint of pale peach and saffron-yellow on each side, a beautiful and unusual effect that adds to the already strong eye appeal. Population: 34 in 68, 0 finer (12/14). NGC ID# 27V7, PCGS# 6639

---

**1940 Walking Liberty Half, PR68  
Among the Finest Certified**

- 5166 1940 PR68 NGC.** Dramatic fire-red, gold, and apple-green patina dominates two-thirds of the rim on each side. This original and exceptional specimen appears unimprovable, and in fact neither service (as of 11/14) has certified any numerically finer. Encapsulated in a prior generation holder.  
*Ex: Central States Signature (Heritage, 5/2007), lot 3126.*  
*From The Free Tilly Collection. NGC ID# 27V8, PCGS# 6640*

---

**1940 Walker, Lightly Toned PR68  
Conditionally Rare**

- 5167 1940 PR68 PCGS.** *Ex: Charles Schultz.* Although available in the absolute sense, the 1940 proof Walker is a conditional rarity at the PR68 grade level. This representative is fully struck, with highly polished fields that display a uniform golden hue. The 1940 is one of the less often seen proof issues in the series, with the 1941 and 1942 dates being the most frequently encountered. Population: 32 in 68 (2 in 68+), 0 finer (12/14). NGC ID# 27V8, PCGS# 6640

---

**1941 Half Dollar, Lightly Toned PR68**

- 5168 1941 PR68 NGC.** A veneer of soft champagne-gold and light green patination covers the obverse border of this PR68 offering, ceding to ice-blue in the center. A similar color palette occurs on the reverse but ice-blue dominates the center, confining champagne-gold and light green to the margin. The design elements are sharply struck and each side has been very well cared for. Census: 81 in 68 (19 in 68 ★), 1 finer (11/14).  
*From The Free Tilly Collection. NGC ID# 24SP, PCGS# 6641*

---

**1941 Half Dollar, Peripherally Toned PR68 ★**

- 5169 1941 PR68 ★ NGC.** No AW. The 1941 is the most common issue in the proof Walking Liberty half dollar series after the 1942. It is readily available through PR67. The population declines significantly in PR68, but even these can be had with diligent searching. Deep multicolored toning adheres to the obverse periphery, while that on the reverse is a soft sky-blue. Sharply struck and impeccably preserved.  
Census: 19 in 68 ★, 1 finer (11/14).  
*From The Free Tilly Collection. NGC ID# 24SP, PCGS# 6641*

---

**1942 Walking Liberty Half Dollar, PR68  
Splendid Peripheral Color**

- 5170 1942 PR68 PCGS.** Lovely, deeply reflective surfaces with light frosting on both the obverse and reverse devices. Some golden-red and emerald-green color is seen at the peripheries. A Superb, virtually unimprovable specimen. Housed in a green label holder. Population: 46 in 68 (1 in 68+), 1 finer (11/14).  
*Ex: FUN Signature (Heritage, 1/2005), lot 7908.*  
*From The Free Tilly Collection. NGC ID# 27V9, PCGS# 6642*

---

**1942 Half Dollar, PR68  
Only One Numerically Finer at PCGS**

- 5171 1942 PR68 PCGS.** *Ex: Charles Schultz.* The 1942 is the most available of the seven proof issues in the Walking Liberty half dollar series, ideal for the collector seeking a single representative of this format. The present piece is deeply mirrored, if slightly hazy around the peripheries, and fully struck. Light golden color veils each side, with a few tinges of reddish color seen upon closer examination. Population: 48 in 68 (1 in 68+), 1 finer (12/14). NGC ID# 27V9, PCGS# 6642

**1942 Half Dollar, PR68  
Hand-Engraved Monogram**

**5172 1942 PR68 PCGS.** The designer's monogram was hand-engraved by a mint worker on the reverse die, similar to the 1944-D FS-901 but executed with considerably greater skill. Light sun-gold and ice-blue toning graces pristine surfaces. Encapsulated in an old green label holder.

*Ex: Orlando FUN Bullet (Heritage, 1/2002), lot 845, which realized \$2,817.50. NGC ID# 27V9, PCGS# 6642*

**1942 Walker, PR68  
Vivid Peripheral Toning**

**5173 1942 PR68 NGC. CAC.** Exquisitely preserved for this final year of proof Walking Liberty half dollar production. Most of each side has semi-translucent patina with a gray base and pale gold, blue, and lavender elements, while intense gold-orange and crimson patina appears in crescents centered at left. NGC has graded just four numerically finer representatives (11/14).

*From The Free Tilly Collection. NGC ID# 27V9, PCGS# 6642*

**1942 Half Dollar, PR68  
Final Proof Walker Issue**

**5174 1942 PR68 PCGS. CAC.** Rich crimson, gold, and powder-blue circle portions of the obverse and reverse. The remainder of the coin has only faint cream-gray toning. A faint mint-made retained lamination between the eagle's legs will be missed by nearly all observers. Fully defined and exceptionally attractive. Population: 48 in 68 (1 in 68+), 1 finer (12/14).

*Ex: Baltimore Signature (Heritage, 7/2003), lot 7968; FUN Signature (Heritage, 1/2008), lot 2183. NGC ID# 27V9, PCGS# 6642*

**FRANKLIN HALF DOLLARS**

**1949-D Half Dollar, Toned MS66 Full Bell Lines**

**5175 1949-D MS66 Full Bell Lines PCGS.** Mint State Full Bell Line 1949-D Franklin half dollars are readily available through the Gem level of preservation, after which the population drops precipitously. The two major services have graded only 57 Premium Gems and none finer. Occasional freckles of russet and olive run over the obverse, while this color palette becomes more extensive on the reverse. Sharply struck and nicely preserved. Population: 49 in 66 (4 in 66+) Full Bell Lines, 0 finer (12/14). NGC ID# 24SU, PCGS# 86654

**1949-D Franklin Half, MS66 Full Bell Lines  
Challenging Issue With a Full Strike**

**5176 1949-D MS66 Full Bell Lines PCGS.** This second-year issue from the Denver Mint had one of the lower business strike mintages in the Franklin half dollar series, at just over 4.1 million pieces. This lustrous, carefully preserved example is among the finer-graded pieces, as neither major service has rated any coins finer than MS66, with Full Bell Lines. A sharply struck Premium Gem with minimal surface marks and a slight degree of speckled dark-green and reddish-tan peripheral toning on each side. Population: 49 in 66 (4 in 66+) Full Bell Lines, 0 finer (12/14). NGC ID# 24SU, PCGS# 86654

**1949-S Half Dollar, MS67  
Among the Finest Certified**

**5177 1949-S MS67 PCGS. CAC.** Any Franklin half dollar certified at the MS67 grade level is a supreme rarity, with or without Full Bell Lines definition. This piece is one of just six so-graded non-Full Bell Lines 1949-S representatives, with none numerically finer (12/14). The surfaces are deeply frosty and devoid of the tiny ticks and grazes that typically affect high-grade examples of this type. The strike is sharp, but the bell lines are just slightly weak near the crack. Mottled lavender and sky-blue hues encompass the central regions, yielding to deeper olive-gold and amber peripheral toning. NGC ID# 24SV, PCGS# 6655

**5178 1951 MS66+ Full Bell Lines PCGS.** A splendid Premium Gem example of this early issue, fully struck and impressively preserved. Variegated hues of gold, russet, and apple-green adorn the obverse. Very scarce at this elevated grade level, and housed in an old green PCGS holder. Population: 8 in 66+ Full Bell Lines, 3 finer (11/14). NGC ID# 24SY, PCGS# 86658 Base PCGS# 86658

**5179 1952 MS67 ★ NGC. CAC.** Originally toned and worth a significant premium as such. Each side displays pale rose centers that are surrounded by sea-green and orange-gold peripheral color. Mint frost races around each side as the coin is slowly rotated beneath a light. While the bell lines are a little short of full they are still relatively strong. This is an exceptional 1952 half, and with the Star designation is the single finest seen by NGC (12/14). Ex: *Houston Signature (Heritage, 12/2009)*, lot 868. NGC ID# 24T3, PCGS# 6661 Base PCGS# 6661

#### 1952 Half Dollar, MS67 Full Bell Lines An Important Condition Rarity

**5180 1952 MS67 Full Bell Lines PCGS. CAC.** The lustrous surfaces of this Superb Gem displays grayish center flanked by golden-green and deep gray patination around the borders. Not only are the bell lines full but its lettering shows clearly. Both sides are impeccably preserved. The two major grading services have seen only 16 pieces at this level and none finer. Population: 14 in 67 Full Bell Lines, 0 finer (11/14). NGC ID# 24T3, PCGS# 86661 Base PCGS# 86661

**5181 1952-S MS67 PCGS.** Vivid bands of amber-red, gold, forest-green, and violet toning encompass the reverse and spill over onto the obverse periphery, leaving the remainder of that side with a pale lavender-gold hue. The bell lines are not quite complete, but the strike is otherwise well-executed and the eye appeal is supreme. Population: 9 in 67 (1 in 67+), 0 finer (10/14). NGC ID# 24T5, PCGS# 6663 Base PCGS# 6663

#### 1953-S Franklin Half Dollar, MS67 None Numerically Finer at PCGS or NGC

**5182 1953-S MS67 PCGS.** A speckling of olive-gold toning covers the satin-smooth surfaces of this appealing Superb Gem Franklin half. Marks are limited to a few tiny ticks on the portrait and some minor grazes elsewhere on the coin, but the strike is bold and the overall quality is excellent for this low-mintage San Francisco issue. Population: 11 in 67, 0 finer (10/14). NGC ID# 24T8, PCGS# 6666 Base PCGS# 6666

**5183 1955 MS66+ Full Bell Lines PCGS.** Dappled olive and amber-gold toning blankets both sides of this boldly struck Premium Gem. PCGS has awarded the Plus designation to just six MS66 examples, and a higher numeric grade to only two (9/14). NGC ID# 24TC, PCGS# 86670 Base PCGS# 86670

#### 1958 Franklin Half Dollar, MS67 Rare Example With Full Bell Lines

**5184 1958 MS67 Full Bell Lines PCGS. CAC.** The 1958 Franklin half dollar is known as a poorly struck issue and examples with Full Bell Lines, like the present coin, are quite elusive. Two reverse designs are known for the date, with this coin showing the smooth, undifferentiated feathers on the eagle that identify the Type I motif. This coin also exhibits bright mint luster, under pleasing shades of apple-green and lavender-gray toning. No mentionable distractions are evident and eye appeal is quite strong. This coin should find a home in the finest collection or Registry Set. Population: 13 in 67 (1 in 67+) Full Bell Lines, 0 finer (12/14). NGC ID# 24TG, PCGS# 86674

**5185 1958-D MS67 Full Bell Lines PCGS. CAC.** An array of orange, lime-green, yellow-gold, and olive drapes the obverse of this Superb Gem while the reverse takes on more bluish-gray and olive hues. The bold strike transcends the Full Bell Lines to include fairly strong definition in the letters on the bell. Lustrous surfaces are impeccably preserved. Population: 51 in 67 Full Bell Lines, 0 finer (12/14). NGC ID# 24TH, PCGS# 86675

**5186 1960 MS66 Full Bell Lines PCGS. CAC.** An outstanding Premium Gem example with the desirable Full Bell Lines designation from PCGS. The clean, well-preserved surfaces display mottled patina that turns to multicolored iridescence near the peripheries. Conditionally scarce. Population: 51 in 66 (2 in 66+) Full Bell Lines, 0 finer (11/14). NGC ID# 24TL, PCGS# 86678 Base PCGS# 86678

**5187 1962 MS65 Full Bell Lines PCGS.** Fully brilliant with extensive die polish lines on each side, this impressive example displays a few slight blemishes on the portrait of Franklin, and on the Liberty Bell, but nothing suggests that the Gem designation is not deserved.  
*Ex: Central States Signature (Heritage, 5/2003), lot 6967; Central States Signature (Heritage, 4/2006), lot 3131. NGC ID# 24TR, PCGS# 86682*

**5188 1962 MS65 Full Bell Lines PCGS. CAC.** Freckles of violet and light gray cascade over the lustrous surfaces of this sharply struck Gem. Both sides are nicely preserved. PCGS has seen six examples finer (12/14). NGC ID# 24TR, PCGS# 86682

**5189 1962 MS65 Full Bell Lines PCGS Secure. CAC.** Lustrous surfaces display violet and grayish patination and are sharply struck. A few light marks on Franklin's cheek probably prevents an even finer grade. PCGS has graded only six coins finer (12/14). NGC ID# 24TR, PCGS# 86682

## PROOF FRANKLIN HALF DOLLARS

**5190 1950 PR67 NGC.** A quite well-preserved Superb Gem, untuned with moderate mirrors. Minted late in the life of a die pair, as evidenced by a lack of contrast and traces of non-proof luster.  
*Ex: Denver Signature (Heritage, 8/2006), lot 3593. NGC ID# 27VA, PCGS# 6691*

**5191 1951 PR66+ Cameo PCGS. CAC.** This beautiful high-end Premium Gem Cameo is untuned and sharply struck. The well-preserved surfaces reveal only a solitary minuscule spot in the lower reverse field. Population: 69 in 66 (3 in 66+), 27 finer (12/14). NGC ID# 27VB, PCGS# 86692

### 1951 Half Dollar, Superb Gem Cameo Proof An Early Franklin High-Grade Rarity

**5192 1951 PR67 Cameo PCGS.** A Superb Gem Cameo proof from just the second year of strikings for the Franklin half dollar series, faintly silver-blue on the clearly contrasted obverse with faint suggestions of patina on the reverse. Carefully preserved with solid eye appeal to go with the high numeric grade. Population: 27 in 67 (1 in 67+), 0 finer (11/14). NGC ID# 27VB, PCGS# 86692

**5193 1952 PR67 Cameo PCGS.** Very few proof half dollars display the stark contrast seen on this piece. The fields are deeply mirrored and the devices on each side are thickly frosted, resulting in a strong cameo effect. Generally brilliant, there is just the faintest accent of golden around the rims. Population: 40 in 67 (1 in 67+), 2 finer (12/14). NGC ID# 27VC, PCGS# 86693

### 1952 Franklin Half, PR66 Deep Cameo Remarkable Contrast for the Issue

**5194 1952 PR66 Deep Cameo PCGS.** By 1952 the U.S. Mint was more-or-less recovered from its long World War II-induced proof-striking hiatus, though Franklin half dollar collectors know how challenging the early dates can be to find with any contrast. This PR66 Deep Cameo example is most notable for its luxuriously frosted devices and the gleaming mirrors around them. Population: 9 in 66 Deep Cameo (1 in 66+), 1 finer (11/14). NGC ID# 27VC, PCGS# 96693

### 1952 Half, PR66+ Deep Cameo Only One Graded Finer at PCGS

**5195 1952 PR66+ Deep Cameo PCGS. CAC.** An exceptional coin without a doubt, this beautifully preserved, high-end Premium Gem well-deserves the Deep Cameo designation, as the contrast between the frosted devices and the mirrored fields is boldly pronounced. A tiny, faint toning spot appears in Franklin's hair below the B in LIBERTY. The 1952 proof mintage consisted of 81,980 coins, but Deep Cameo examples from this key proof date are rarely encountered. PCGS has assigned the PR66 grade to only eight such examples, this being the sole PR66 piece to receive the Plus designation, with only one finer (12/14). NGC ID# 27VC, PCGS# 96693

**5196 1953 PR66+ Deep Cameo PCGS.** Outstanding contrast shows on this high-end Premium Gem. Color-free surfaces are immaculately well preserved. Population: 23 in 66 (1 in 66+), 13 finer (12/14). PCGS# 96694

**5197 1955 PR67+ Deep Cameo PCGS. CAC.** This high-end Superb Gem possesses incredible eye appeal to go with its high technical grade. The design elements are sharply detailed and the deeply mirrored fields contrast boldly with the frosty devices. Population: 57 in 67 (1 in 67+), 20 finer (12/14). NGC ID# 27VF, PCGS# 96696

**5198 1957 PR68 Deep Cameo PCGS. CAC.** The unfathomably deep fields form a splendid backdrop to the frosty devices. With no noticeable imperfections, this coin is suggestive of perfection. Population: 72 in 68, 2 finer (12/14).  
*Ex: Long Beach Signature (Heritage, 10/2000), lot 6413. NGC ID# 24TX, PCGS# 96698*

## KENNEDY HALF DOLLAR

- 5199** 1964-D MS67 PCGS. Type One Reverse. A glimpse of gold toning adorns this highly lustrous and well struck Superb Gem. Exceptionally preserved. Despite a prolific mintage, rare in the present grade. Population: 33 in 67, 1 finer (11/14). NGC ID# 24U3, PCGS# 6707 Base PCGS# 6707

## SMS KENNEDY HALF DOLLAR

1966 SMS Kennedy Half, SP67 Deep Cameo  
Seldom Seen in This Contrast Level

- 5200** 1966 SMS SP67 Deep Cameo PCGS. The 1965, 1966, and 1967 SMS Kennedy half issues are all elusive with Deep Cameo contrast, and in that same order, the 1966 more available than the 1965 and less so than the 1967. This Superb Gem piece is silver-white with abundant contrast and no mentionable distractions. Population: 30 in 67 Deep Cameo, 4 finer (11/14). NGC ID# 24WH, PCGS# 96846

## PROOF KENNEDY HALF DOLLAR

1976-S Clad Kennedy Half, PR70 Deep Cameo  
Registry Set Essential

- 5201** 1976-S Clad PR70 Deep Cameo PCGS. Even though countless Bicentennial half dollars survive today in innumerable coin accumulations and hoards, the proof Bicentennial half dollars in perfect PR70 Deep Cameo are seldom seen, the clad versions less often than the silver. This untuned clad piece certified by PCGS shows optimal field-device contrast and pristine preservation. Population: 41 in 70 Deep Cameo (12/14). NGC ID# 27WP, PCGS# 96811

## EARLY DOLLARS

- 5202** 1795 Flowing Hair, Two Leaves, B-4, BB-14, R.3 — Scratch — PCGS Genuine. VF Details. The left and right obverse field exhibit a couple of vertical pinscratches, and the eagle displays minor slide marks. Otherwise, a charming Flowing Hair dollar with medium chestnut and pearl-gray toning. PCGS# 39981 Base PCGS# 6853

1795 Flowing Hair Dollar, VF25  
B-7, BB-18; Splendid Original Look

- 5203** 1795 Flowing Hair, Three Leaves, B-7, BB-18, R.3, VF25 ANACS. Wide Date. Bowers Die State I. Two die lumps near the left ribbon end on the reverse indicate both the variety and the die state. Here, they are bold and not lapped, with the lump on the left the larger of the two. The reverse shows 14 berries — the only 14-berried reverse for the issue. Tawny-brown toning features olive-gold highlights at the margins, bolstered by remaining mint luster (an attribute eagerly sought by collectors of mid-grade, circulated early dollars). Lilac overtones appear when the coin is viewed at the proper angle. A bold strike with beautiful rims on both sides adds to the substantial appeal. The only marks of note are some mint-made short, horizontal adjustments at the central portrait hair near the jawline. PCGS# 39973 Base PCGS# 6852

**1795 Flowing Hair Dollar, AU50  
B-7, BB-18; 14-Berry Reverse**

- 5204** 1795 Flowing Hair, Three Leaves, B-7, BB-18, R.3, AU50 PCGS. Bowers Die State I. Wide Date. Four distinct characteristics identify this fairly available Three Leaves early dollar, all of them on the reverse. For a quick identification, two small die flaws are seen at the left ribbon end. These fade with a later die state, however, so the next best diagnostic is 14 berries — the only variety with that berry count. The die pair is confirmed by a recut top of the E in AMERICA, and a single berry between the eagle's left (facing) wing and the ribbon bow.

This example is attractive with light, golden-brown toning at the margins and silver-rose patina on the portrait. A few vertical adjustment marks are so well hidden in the hair they require a glass for confirmation. The reverse shows deeper, gunmetal-blue toning rose-gold accents. Nice luster remains on both sides, with sharp details on Liberty's hair and on the reverse motifs.

From The Rawlin "Mac" McInelly Collection. PCGS# 39973 Base PCGS# 6852

- 5205** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, Good 6 PCGS. A stone-gray collector coin of the coveted introductory silver dollar type. STATES OF is well-worn but the remaining legends are clear, including the date. The eagle and portrait are boldly outlined and Liberty's eye shows inner detail. Minor edge knocks are noted on the obverse at 7 and 11 o'clock, and on the reverse at 2:30. PCGS# 39986 Base PCGS# 6853

- 5206** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 — Repaired — NGC Details. Fine. The light gray surfaces of this example show microscopic evidence of tooling on both sides. Those surfaces are reflective due to old polishing. The blundered date feature remains clearly visible. PCGS# 39986 Base PCGS# 6853

**1795 Flowing Hair Dollar, VF Sharpness  
B-1, BB-21; Bold Motifs Remain**

- 5207** 1795 — Cleaning — Flowing Hair, Two Leaves, B-1, BB-21, R.2, PCGS Genuine. VF Details. Two Leaves. Bowers Die State I. Considerable detail remains on Liberty's hair strands, the eagle's plumage, and on the surrounding devices. The cleaning was light and non-abrasive, although an overall gray-gold and bluish coloration is one result — a bit mottled, but not displeasing. Mint-caused adjustment marks angle across the obverse, but they are light and shallow, softened by wear and mostly requiring a glass for viewing. This is a well-centered coin with good rims and several positive attributes despite the net grade. PCGS# 39986 Base PCGS# 6853

**1795 Flowing Hair Dollar, VF Details  
Two Leaves, B-1, BB-21**

- 5208** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 — Cleaning — PCGS Genuine. VF Details. The obverse is the Head of 1795 with sharp bust point, the profile of Liberty placed high, and star 1 touching the lowest curl at one point. The Two Leaves reverse shows the berries arranged nine left, 10 right, one berry centered under the right serif of A2. The pearl-gray surfaces are hairlined, but this midgrade early dollar is otherwise surprisingly free from abrasions. The borders exhibit glimpses of tan toning. An introductory, briefly coined type. PCGS# 39986 Base PCGS# 6853

**1795 Flowing Hair Dollar, XF40  
B-1, BB-21, Two Leaves**

- 5209 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, XF40 PCGS.** The popular blundered date variety, with 1795 engraved over 1195. The base and upright of the misplaced 1 are clearly visible beneath the 7. The B-1, BB-21 variety is one of the two most plentiful for the date, available to date and type collectors in nearly any desired grade. The other readily available variety is the B-5, BB-27 dollar with three leaves under each wing, while the current coin is the Two Leaves variant.

As with all early dollars, the key to acquisition is quality, regardless of the grade. This coin has exceptional surfaces with only a few insignificant abrasions on the high points, and a tiny rim bump at star 14. The overall appearance is excellent, with natural gray, brown, and iridescent surfaces, slightly lighter on the devices, with hints of orange-gold luster.

Ex: *FUN Signature* (Heritage, 6/2008), lot 1163. PCGS# 39986 Base PCGS# 6853

- 5210 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Repaired — NGC Details. Fine.** A relatively small darkly toned area is noted near 9 o'clock on each side. These two areas have a few re-engraved dentils, and the top of the ED in UNITED is re-engraved. Otherwise, this Flowing Hair dollar is only lightly abraded. The predominantly pearl-white surfaces are moderately luminous. The obverse exhibits adjustment marks (as made) from 5 to 6 o'clock. PCGS# 39977 Base PCGS# 6852

**1795 Flowing Hair Dollar, VF Sharpness  
B-5, BB-27; Nice Remaining Detail**

- 5211 1795 — Cleaning — Flowing Hair, Three Leaves, B-5, BB-27, R.1, PCGS Genuine. VF Details.** Bowers Die State II. A coin that has not fully recovered from an earlier cleaning, yet it retains considerable detail on both sides. Areas of deep-gray patina survive around the devices in patchy manner, while the fields are silver-gray from the cleaning. Light hairlines are visible when the coin is angled under light. Otherwise, the surfaces are smooth and agreeable in a reserved kind of way. PCGS# 39977 Base PCGS# 6852

**1795 Flowing Hair Silver Dollar  
Very Fine, B-5, BB-27**

- 5212 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF20 NGC.** Splashes of golden-brown dominate, although the obverse field has a couple of stone-white areas. A pleasing early silver dollar with a smooth obverse and a pair of hair-thin lines above the eagle's head and near the right wreath stem. The Flowing Hair type was coined for only two years, but the rarity of the 1794 compels type collectors to choose the 1795. PCGS# 39977 Base PCGS# 6852

**1795 Flowing Hair Dollar, XF Details  
B-5, BB-27, Three Leaves**

- 5213 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Environmental Damage — NGC Details. XF.** The reverse of this Flowing Hair type coin displays pleasing and consistent dove-gray toning. The obverse has a mostly stone-white center but the border displays charcoal patina with scattered freckles of that shade on the portrait. A loupe reveals moderate obverse hairlines. PCGS# 39977 Base PCGS# 6852

---

1795 Flowing Hair Dollar, XF Details  
B-5, BB-27, Three Leaves Reverse

- 5214** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Improperly Cleaned — NGC Details. XF. Faint traces of champagne and pale blue toning have gathered over the lightly hairlined surfaces of this well detailed Flowing Hair dollar, providing a rather wholesome look despite the NGC description.

---

1795 Flowing Hair Dollar, XF40  
Three Leaves Reverse, B-5, BB-27  
Outstanding Quality for Grade

- 5215** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF40 PCGS. Bowers Die State IV with faint clash marks on the field near Liberty's chin. A highly impressive Flowing Hair type coin that exhibits considerable luster and only trivial post-strike contact. Both sides display broad golden-brown borders. The obverse center is olive-green while the central reverse displays lavender shades. Moderate obverse adjustment marks on the portrait and border are as made. Certified in a green label holder. PCGS# 39977 Base PCGS# 6852

---

1795 Flowing Hair Dollar, XF45  
B-5, BB-27, Three Leaves

- 5216** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF45 PCGS. Die State III. BB-27 is the most often seen 1795 Flowing Hair dollar variety, and only becomes truly scarce in Mint State grades. This is the only use of this obverse die, which had the portrait engraved fairly deeply into the die face. As a result, examples of BB-27 are seen with a slightly higher relief than are other varieties of this issue. These factors combined to make BB-27 highly popular among type and date collectors. The present coin is well-struck, though the obverse rim below the date is incomplete due to the presence of adjustment marks. Both sides show lustrous pale golden patina, with light wear over the high points of the devices. A very pleasing example of this popular Flowing Hair type. PCGS# 39977 Base PCGS# 6852
-

**1795 Flowing Hair Dollar, AU Details  
Three Leaves, B-5, BB-27**

- 5217** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Repaired — NGC Details. AU. The present Flowing Hair dollar is sharper than 90% of the survivors of its type. The veins of the leaves are clear, as is the wing plumage. The left and right obverse field is smoothed, likely from an attempt to efface graffiti. The portrait has a couple of unobtrusive pinscratches near the ear. The reverse border displays minor adjustment marks, as made.

**1795 Draped Bust Dollar, VF35  
B-14, BB-51; Off-Center Portrait**

- 5218** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VF35 PCGS. Bowers Die State II. The eagle retains about a third of its breast feathers and strong rims define this sharply struck Small Eagle dollar. The Off-Center bust is less-often seen than its centered counterpart, and they are the only two varieties of the 1795 Draped Bust design. Attractive, warm-gray patina covers both sides with deep-gray overtones. Mint-made planchet adjustment marks on the obverse were nearly eliminated by strike and wear, although a few remnants are visible with a glass along the right margin and edge. PCGS# 39996 Base PCGS# 96858

**1795 Draped Bust Dollar, XF40  
B-14, BB-51, Off-Center**

- 5219** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, XF40 NGC. Die State I. The obverse die was hubbed slightly off-center, with the bust appearing just left of center on all subsequent coins. This example is well-detailed for the grade, with blended gunmetal-gray, golden, and lavender colors encompassing each side. The strike is bold and well-centered, with no evidence of adjustment marks around the borders. An appealing example of this marginally available variety. PCGS# 39996 Base PCGS# 96858

**1795 Draped Bust Dollar, AU50  
B-14, BB-51, Off-Center Portrait**

- 5220** 1795 Draped Bust, Off-Center AU50 NGC. B-14, BB-51, R.2. Bowers Die State I. Struck from a perfect state of the dies, as are most examples. In his 2013 *Encyclopedia*, Bowers describes this as the only die state known, but we have seen examples that are clashed in the upper reverse from the obverse drapery, which would demonstrate a later die state. The die subsequently may have been lapped. In any case, the reverse die was amazingly durable, used to strike dollars in four years between 1795 and 1798.

The present piece is one of those fortunate survivors that shows strong detail throughout, with smooth surfaces covered with a medium layer of rich golden-gray toning. A number of light, non-distracting adjustment marks are seen at the center of the reverse. The coin is an outstanding Draped Bust 1795 dollar, with glimpses of remaining mint luster and substantial eye appeal from the lightly toned, original surfaces.

Ex: Long Beach Signature (Heritage, 9/2003), lot 7462; Central States Signature (Heritage, 4/2008), lot 2333.

From The Rawlin "Mac" McNelly Collection. PCGS# 39996 Base PCGS# 96858

**1795 Draped Bust Dollar, XF40**  
**Pleasing Centered Bust, B-15, BB-52**

- 5221** 1795 Draped Bust, Centered, B-15, BB-52, R.2, XF40 PCGS. CAC. Bowers Die State IV. Boldly detailed for the assigned grade, with slight wear on the hair and golden luster remaining around the stars and legends. The bronzelike patina shows coppery-orange highlights. As usual, the BB-52 variety shows strong definition at the periphery, with prominent denticles and sharp obverse stars. A few minor marks from circulation are infrequent and shallow around the centered bust and Small Eagle motifs. There are no adjustment marks on the coin — one of several factors that helped this sharp early dollar gain CAC endorsement. PCGS# 39995 Base PCGS# 6858

**1796 B-4, BB-61 Dollar, Choice VF**  
**Small Date, Large Letters**

- 5222** 1796 Small Date, Large Letters, B-4, BB-61, R.3, VF35 PCGS. Bowers Die State I with a mostly complete forehead curl. Ocean-blue and peach-gold shades emerge when this nicely defined early silver dollar is rotated beneath a light. Minor adjustment marks (as coined) are concealed in the eagle's wings, but abrasions are inconsequential aside from a faded field mark near Liberty's mouth and a hair-thin line through the left wreath stem. PCGS# 40000 Base PCGS# 6860

**1796 Early Dollar, XF40**  
**B-4, BB-61; Small Date, Large Letters**

- 5223** 1796 Small Date, Large Letters, B-4, BB-61, R.3, XF40 PCGS. Attractive, light silver-gray toning displays lavender accents in the fields, which show surprisingly few marks or abrasions. Luster remains across the fields and at the margins. Nicely centered with bold rims, and there are no adjustment marks or mint-caused distractions to mention other than a die dot above the 1 of the date that helps define the die pair. As always, the eagle is flat on the breast for the BB-61 variety. Liberty's curls are bold at the top beneath LIBERTY, suggesting Bowers Die State I, the most available state of the dies. PCGS# 40000 Base PCGS# 6860

**1796 Bust Dollar, VF Details**  
**B-5, BB-65; Sole Large Date Variety**

- 5224** 1796 Large Date, Small Letters, B-5, BB-65, R.2 — Cleaning — PCGS Genuine. VF Details. The date logotype is the same size as seen for the 1797 silver dollars, representing the only Large Date variety for 1796. Struck from an advanced state of the dies as Bowers Die State IV, with the diagnostic lump between I and C of AMERICA filling the upper space between the letters and extending along the curve of C. The surfaces retain enough detail for the VF designation, although they display an oily iridescence that confirms the cleaning. A dark patch of blue toning covers the margin at OF, and a few minor scrapes are distributed across both sides. PCGS# 40002 Base PCGS# 6861

**1796 Silver Dollar, XF45**  
**B-5, BB-65; Large Date, Small Letters**

- 5225** 1796 Large Date, Small Letters, B-5, BB-65, R.2, XF45 PCGS. Bowers Die State IV. Large Date. The diagnostic die lump between I and C of AMERICA progresses through six stages and signals the impending end to this reverse die — one of three reverses utilized in the Small Eagle output from 1795 through 1798. The die is thought to have been leftover from 1795 and put into service only in 1796, quickly failing during production of BB-65 (its only use). The other Small Eagle reverse dies were more hardy and long-lasting through multiple years and die pairs. This attractive coin is lightly toned in golden-gray shades with smooth, minimally marked surfaces and strong details. A Choice XF example, confirmed by mint luster that remains in protected areas and excellent eye appeal. PCGS# 40002 Base PCGS# 6861

**1796 Draped Bust Dollar, AU50  
B-5, BB-65; Condition Rarity**

- 5226 1796 Large Date, Small Letters, B-5, BB-65, R.2, AU50 PCGS.** Bowers Die State III. A heavy die lump between the I and C of AMERICA is present to some degree on every known example of this die marriage, and it is fairly well developed on this example, joining the tops of both letters. The surfaces display original, medium-gray color with hints of gold and splashes of steel-blue on each side. Considerable luster remains around the devices.

The BB-65 variety is always in demand for type as well as date, because it is the only Large Date logotype for the year. Although seldom-mentioned (and often met with a collective yawn by early dollar collectors, who are used to such things), the 6 is boldly recut in the date. Remarkably few examples of the Large Date survive in About Uncirculated or finer conditions — a fact that does get the early dollar aficionados excited.

Ex: *Long Beach Signature* (Heritage, 2/2007), lot 3598.

From *The Rawlin "Mac" McNelly Collection*. PCGS# 40002 Base PCGS# 6861

**1796 Draped Bust Dollar, VF20  
B-1, BB-66; Small Date, Small Letters**

- 5227 1796 Small Date, Small Letters, B-1, BB-66, R.4, VF20 PCGS.** Unknown to Bowers without a lapped reverse, the die state is subjective for this moderately worn example. It is likely Bowers Die State II, although the lapping is not as significant as described in the reference. Nice detail remains for the assigned grade, and both sides show full rims and denticles. Dusky-gray patina displays light-silver areas on the main devices, with few marks or abrasions to interrupt the smooth surfaces. The date is bold, confirming the variety that shows the 9 and 6 closer together than the other digits. A scarce die pair for the year, and attractive for the grade. PCGS# 39999 Base PCGS# 6859

**1796 B-1, BB-66 Dollar, XF40  
Small Date, Small Letters**

- 5228 1796 Small Date, Small Letters, B-1, BB-66, R.4, XF40 PCGS.** Ex: Hesselgesser. Bowers Die State II, the usual state with delicate reverse details removed by die lapping. Pleasing pewter-gray surfaces have light gold highlights, especially on the obverse. Both sides are pleasing, despite a few minor ticks on the portrait. A cluster of mint-made adjustment marks appear on the reverse. Ex: *Dr. Hesselgesser Collection* (Ira & Larry Goldberg, 2/2009), lot 1050. PCGS# 39999 Base PCGS# 6859

**1797 Draped Bust Dollar, AU Sharpness  
B-3, BB-71; 10x6 Stars, Small Eagle Reverse**

- 5229 1797 — Damage — 10x6 Stars, Large Letters, B-3, BB-71, R.2, PCGS Genuine. AU Details.** Bowers Die State III. The damage described on the holder refers to a small attempted piercing between B and E of LIBERTY. Otherwise, the coin is wholesome and appealing, with sharp detail on both sides. Pleasing silver-gray surfaces retain mint luster and show few abrasions. Die clashing surrounds the portrait, and a few mint-made adjustment marks are shallow and well-hidden, running diagonally across Liberty's neck and hair. PCGS# 40004 Base PCGS# 6865

**1797 Draped Bust Dollar, AU50  
B-3, BB-71; 10x6 Stars**

- 5230 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, AU50 NGC.** Bowers Die State III. Lightly toned in iridescent shades of red, gold, and lavender, this attractive About Uncirculated early dollar is softly lustrous and well-struck for the later die state. Smooth fields and sharp rims are nearly free of marks, with only a short, cutlike scrape beneath the eagle's right (facing) wing needing individual mention. The Mint experimented with both the 10x6 and 9x7 star arrangements, with the 10x6 variant the first one struck. Each design found it a challenge to fit so many stars into the space available.

This example was struck from lapped dies, with several palm leaves missing their right edges on the reverse. Even so, the strike is above-average. The eagle displays a few breast feathers, and Liberty's hair strands and drapery lines remain strong. There are no adjustment marks on either side. The 10x6 Stars obverse is slightly less available than its 9x7 counterpart, making this coin a good selection for date collectors and, of course, a necessity for the type. From The Rawlin "Mac" McInelly Collection. PCGS# 40004 Base PCGS# 6865

**1797 Draped Bust Dollar, VF25  
Desirable Small Letters Reverse  
B-2, BB-72; 9x7 Stars**

- 5231 1797 9x7 Stars, Small Letters, B-2, BB-72, R.4, VF25 PCGS.** Bowers Die State I. The dies were lapped, effacing the already-low protective rims, accounting for premature wear — especially on the reverse. This example is struck slightly off-center left on both sides of the coin. Some small areas of granularity on the reverse and a few abrasions, now minimized by wear, do not distract from the smoothly attractive surfaces of this scarcer variety. Golden-gray patina shows glimpses of luster beneath the light toning, with a few deeper areas on the reverse. PCGS# 40005 Base PCGS# 6866

**1797 Silver Dollar, XF40  
B-1, BB-73; 9x7 Stars**

- 5232 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, XF40 PCGS.** Bowers Die State III. The obverse shows many die cracks and minor evidence of die clashing, while the reverse is nearly free of the cracks that appear in later die states. Four or five short, shallow adjustment marks — almost perfectly parallel — angle up from Liberty's hair and neck. Light, silver-gray toning covers both sides of the slightly grainy-but-glossy surfaces. Nice detail remains on the devices with bold rims and denticles. A touch of deeper amber-gold color embraces the obverse rim. A satisfying mid-grade example of this scarce date. PCGS# 40003 Base PCGS# 6863

**1797 B-1, BB-73 Dollar, XF45**  
**9x7 Stars, Large Letters; Bold Strike**

- 5233** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3 XF45 PCGS. Bowers Die State III. Original, old-silver patina covers both sides of this boldly struck Small Eagle dollar. Fully half of the eagle's breast feathers remain, and Liberty's hair strands are sharp except at the highest points, where the expected wear from circulation is evident. Gunmetal-blue highlights enhance the medium-gray color, with deeper accents at the legends. The rims on both sides are strong, high, and well-denticled. A tiny scrape to the left of the date is minor and without importance at the assigned grade. From The Rawlin "Mac" McInelly Collection. PCGS# 40003 Base PCGS# 6863

**1797 Large Letters Dollar, AU Details**  
**B-1, BB-73; 9x7 Stars**

- 5234** 1797 — Smoothed — 9x7 Stars, Large Letters, B-1, BB-73, R.3, PCGS Genuine. AU Details. Bowers Die State II. The obverse was smoothed, especially the top left area, perhaps to remove adjustment marks that still show remnant signs in Liberty's hair. Despite the noticeable handwork, mint luster remains over most of the coin. The reverse remains original and attractive. Gray, blue, and gold hues impart a silver-bronze coloration over the still-lustrous surfaces. PCGS# 40003 Base PCGS# 6863

**1798 Small Eagle Dollar, Choice VF**  
**15 Stars, B-2, BB-81**

- 5235** 1798 Small Eagle, 15 Stars, B-2, BB-81, R.3, VF35 PCGS. Bowers Die State II. A well-preserved and sharply detailed example, with a surprising amount of mint luster enlivening both sides of the coin. The 15-Star obverse suggests an unused, holdover die from 1796 was used to strike the BB-81 variety. As always, the obverse detail is somewhat stronger than the Small Eagle reverse, a factor not always handled with any allowance by the grading services. In this case, the assigned grade seems correct considering the notable planchet flaw at 3 o'clock on the reverse and a small, round dig between the 9 and 8 of the date. PCGS# 40007 Base PCGS# 6868

**1798 Small Eagle Dollar, XF Details**  
**B-2, BB-81; 15 Stars**

- 5236** 1798 — Repaired — Small Eagle, 15 Stars, B-2, BB-81, R.3, PCGS Genuine. XF Details. Bowers Die State II. The Small Eagle varieties are scarce and popular for the 1798 dollars, with both 13 Star and 15 Star variants. Of the two Small Eagle types, the 15 Star dollars are slightly scarcer than the standard 13 Star obverse. This example shows areas of repair, especially at the central obverse on Liberty, and it was retoned to disguise the work. The resulting coloration somewhat rustic-looking. A few adjustment marks are seen on the reverse margin, but they are minor in the context of this net-graded dollar. PCGS# 40007 Base PCGS# 6868

**1798 Silver Dollar, VF35**  
**B-1, BB-82; 13 Obverse Stars**  
**Small Eagle Reverse**

- 5237** 1798 Small Eagle, 13 Stars, B-1, BB-82, R.3, VF35 PCGS. Bowers Die State III. Struck from the latest state of the reverse when paired with the 1798 obverse, at which point the obverse was switched and used to strike 1797-dated BB-73 Large Letters dollars (Q. David Bowers in the 2013 *Encyclopedia of United States Silver Dollars 1794 - 1804*). The die state is distinct and adds much credence to the theory that the 1797 Large Letters dollars were actually struck in 1798. Accordingly, the Mint was able to squeeze the last life out of the Small Eagle reverse, before switching to the newly mandated Heraldic (Large Eagle) design. This example is Choice for the VF grade, with smooth, lightly iridescent surfaces surrounded by nice rims. A few light obverse lines do not distract from the natural, old-silver appeal, which retains occasional hints of mint luster. PCGS# 40006 Base PCGS# 6867

**1798 Draped Bust Silver Dollar, XF45  
B-1, BB-82 Small Eagle Reverse  
13 Stars, Luster Remains on Both Sides**

**5238** 1798 Small Eagle, 13 Stars, B-1, BB-82, R.3, XF45 NGC. Bowers-Borckardt Die State III. Obverse die relapped, leaving the uppermost and lowest hair curls incomplete. A thick die crack descends from the upper reverse rim through the second T in STATES, through the branch below and to the top edge of the eagle's left (facing) wing. The design elements are well-centered and generally well-struck, although the eagle seems somewhat flat, as always.

The coin shows moderate, even wear for the grade, and a coating of deep mauve-gray patina over both sides. Soft mint luster produces golden highlights. Surface blemishes consist almost entirely of a few small, circular marks that appear at a handful of locations near the periphery. The only variety of 1798 dollar with 13 obverse stars combined with the Small Eagle reverse, and an important issue therefore for any collector assembling a type set of American coinage.

*Ex: ANA Signature (Heritage, 8/2007), lot 1716.*

*From The Rawlin "Mac" McInelly Collection. PCGS# 40006 Base PCGS# 6867*

**1798 Silver Dollar, Choice AU  
Heraldic Eagle, Wide Date  
Better B-22, BB-104 Variety**

**5239** 1798 Large Eagle, Pointed 9, Wide Date, B-22, BB-104, R.4, AU55 NGC. Bowers Die State IV. This impressive scarcer variety early dollar displays dappled cream-gray and golden-brown toning. Nicely struck and partly lustrous. Adjustment marks on the central obverse are conspicuous but completely as struck. Abrasions are minimal aside from a few tiny pellet-shaped marks above the arrowheads, on the upper right shield, and on the reverse rim at 5:30. PCGS# 40021 Base PCGS# 6877

**5240** 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3 — **Cleaning** — PCGS Genuine. XF Details. Bowers Die State III. Although the present Heraldic Eagle dollar is hairlined, substantial design definition remains and there are no objectionable marks. Primarily toned almond-gold, although protected regions display ocean-blue. PCGS# 40022 Base PCGS# 6877

**1798 Large Eagle Dollar, AU55+  
B-11, BB-111, Pointed 9**

- 5241** 1798 Large Eagle, Pointed 9, B-11, BB-111, R.3, AU55+ NGC. Die State V, with bold die cracks on the obverse below the chin and over the ear. This variety is fairly scarce, and most known examples are in the mid to lower circulated grades. XF coins are considered high-end, and AU pieces are undeniably rare; Q. David Bowers, writing in *Silver Dollars & Trade Dollars of the United States*, questions whether or not full AU examples actually exist, let alone a Mint State piece. The Choice AU coin here offered is undoubtedly one of the finest known examples of the variety, with subtle luster residing beneath a blanket of golden-gray and gunmetal-blue hues. The strike is sharp and well-centered, with just slight wear over the high points of the design. Overall, a very pleasing example of this elusive issue. PCGS# 40028 Base PCGS# 6873

**1798 Large Eagle Dollar, VF30  
Pointed 9 (Wide Date), B-15, BB-112**

- 5242** 1798 Large Eagle, Pointed 9, Wide Date, B-15, BB-112, R.3, VF30 PCGS. CAC. Bowers Die State III. This gunmetal-gray silver dollar displays walnut-brown, powder-blue, and olive-green shades upon rotation beneath a light. Close examination reveals infrequent moderate marks, although as the CAC endorsement suggests, this midgrade early dollar is an eminently acceptable example of the popular early crown-sized type. PCGS# 40029 Base PCGS# 6877

**1798 Large Eagle Bust Dollar, AU50  
B-27, BB-113; Sharp Silver Luster Remains**

- 5243** 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, AU50 PCGS. Bowers Die State II. A Close Date, Pointed 9 variety with the 8 punched high and listing to the right. The confirming die flaw at the innermost point of star 12 is obvious. Liberty's hair strands are remarkably bold. A dusting of pale, peach-gold patina floats over the semiprooflike silver surfaces, which retain a generous amount of mint luster. Housed in a green label holder. PCGS# 40030 Base PCGS# 6873

**1798 Draped Bust Dollar, XF45  
Scarce B-31, BB-115 Die Pair**

- 5244** 1798 Large Eagle, Pointed 9, Close Date, B-31, BB-115, R.5, XF45 NGC. Bowers Die State IV. Struck from a late state of the dies, with heavy die cracks clearly visible on both sides at the margins and around the legends. The BB-115 die pair is elusive both in an absolute and conditional sense. Few examples exist in any grade, and Choice XF examples such as the present coin are close to the Condition Census for the variety. A speckling of slate-gray toning joins undertones of champagne-gold, with glimpses of silver luster beneath the light patina. A few scattered abrasions confirm the assigned grade. PCGS# 40032 Base PCGS# 6873

---

**1798 Large Eagle Silver Dollar, AU53  
Wide Date, Pointed 9, B-12, BB-120**

- 5245** 1798 Large Eagle, Pointed 9, Wide Date, B-12, BB-120, R.4, AU53 NGC. Die State V with a crack in the dentils near the wingtip and AM. A dove-gray and almond-gold early dollar. Luster emerges from myriad design crevices, and marks are essentially confined to a few slight rim knocks. As usual for B-12, the right-side reverse stars are lightly brought up due to the high relief of the lower right portion of the bust. PCGS# 40037 Base PCGS# 6877

---

**1799/8 Draped Bust Dollar, XF Details  
B-3, BB-141; 15 Stars Reverse**

- 5246** 1799/8 — Cleaning — 15 Stars Reverse, B-3, BB-141, R.3, PCGS Genuine. XF Details. Bowers Die State III. The popular Hidden Stars reverse, with the points of two mostly obscured extra stars behind the overly large first and last clouds on the reverse. Bits of white residue among the obverse stars and around the eagle's wing tips tip off a light cleaning, as do some faint hairlines, but the coin has recovered. Three small, dentil-sized voids at the rim (one on the obverse beneath the date, the other two on the reverse) are minor and appear to be mint-caused defects. Even and appealing silver-gray toning displays some golden highlights at the margins over the smooth fields. A nicely detailed early dollar with considerable merit at the assigned grade. PCGS# 40064 Base PCGS# 6883

---

**1799/8 B-3, BB-141 Dollar, AU53  
Bold Remaining Luster, Hidden Stars Variety**

- 5247** 1799/8 15 Stars Reverse, B-3, BB-141, R.3, AU53 PCGS. Bowers Die State III. Only the tips of the two supernumerary stars remain beneath the first-and-last baggy clouds, evidence of the die cutter's humorous and near-effective way of hiding the blundered field star pattern. The BB-141 variety is forever popular with early dollar collectors — not only for the partially hidden stars, but also for the bold 1799/8 overdate. This nice About Uncirculated coin is sharp and appealing, with bold devices on purple-gray surfaces enlivened by reddish-gold accents. Excellent mint luster remains. From The Rawlin "Mac" McNelly Collection. PCGS# 40064 Base PCGS# 6883

---

**1799/8 Draped Bust Dollar, AU53  
B-3, BB-141; Boldly Struck  
Hidden Stars Reverse**

- 5248** 1799/8 15 Stars Reverse, B-3, BB-141, R.3, AU53 PCGS. Bowers Die State II. Leaf points to the center of the I in AMERICA. The obverse die is the same for all three die pairs of the 1799/8 dollars, and the 15 Stars reverse is forever popular for the dual die cutter errors — the bold 1799/8 overdate and the oversized clouds hiding all but the points of two erroneous stars. Light silver-gray surfaces exhibit luster in the recessed areas. A short scrape near star 12 is the only notable mark. The design features are well impressed throughout, and overall both sides are remarkably smooth and appealing. Ex: ANA Signature (Heritage, 8/2008), lot 758. PCGS# 40064 Base PCGS# 6883
-

**1799/8 15 Reverse Stars Dollar, AU55  
B-3, BB-141, Lustrous Iridescence**

- 5249** 1799/8 15 Stars Reverse, B-3, BB-141, R.3, AU55 NGC. Bowers Die State IV. The overdate is bold on this sharply struck and attractive 15-Star Reverse dollar. Gleaming, smooth surfaces display iridescent colors beneath the primary gold and lilac toning, bolstered by much remaining mint luster. Thirteen field stars are clearly visible, with the points of two more stars hidden behind oversized clouds at the left and right. Numerous die lumps populate the obverse, and die cracks encircle the reverse, yet there are very few post-mint marks or abrasions. An appealing and Choice AU early dollar — the most popular variety for the year. From The Rawlin "Mac" McNelly Collection. PCGS# 40064 Base PCGS# 6883

**1799/8 Silver Dollar, XF40  
B-2, BB-143; 13 Field Stars**

- 5250** 1799/8 13 Stars Reverse, B-2, BB-143, R.4, XF40 PCGS. Bowers Die State I. A relapped third use of the overdated obverse, the scarcest of the three varieties, with 13 field stars in different positions than the other overdate die pairs. Dark, ebony-brown patina covers both sides of this sharply struck example. A pair of noticeable scratches on either side of the date are disguised by the toning. Lighter silver areas with reddish-brown color help define the motifs. PCGS# 40066 Base PCGS# 6884

**1799/8 Dollar, Choice XF  
13 Stars Reverse, B-2, BB-143**

- 5251** 1799/8 13 Stars Reverse, B-2, BB-143, R.4, XF45 PCGS. Bowers Die State I. The golden-brown and ice-blue obverse center is framed by deep blue-green peripheral toning. The reverse is mostly stone-gray but displays a dusky gunmetal margin. A nicely defined and unblemished example. The hair, wings, and other design crevices display white luster. PCGS# 40066 Base PCGS# 6884

**1799/8 Silver Dollar, AU55  
B-2, BB-143, 13 Stars Reverse**

- 5252** 1799/8 13 Stars Reverse, B-2, BB-143, R.4, AU55 PCGS. Bowers Die State I. A scarce overdated Bolender variety, rarely encountered any finer than the present grade. Sharply struck and with nearly full detail, although Liberty's cheek and the eagle's breast show light wear. Richly toned ocean-blue, autumn-brown, and olive-green. Refreshingly unabraded and certain to be of interest to the specialist. PCGS# 40066 Base PCGS# 6884

- 5253** 1799 Irregular Date, 15 Stars Reverse, B-4, BB-153, R.4 — **Cleaning** — PCGS Genuine. XF Details. Bowers Die State II. This ocean-blue early dollar is hairlined but free from mentionable abrasions. Well defined despite occasional inexactness of strike. A scarce and distinctive variety, noted for its many obverse cracks and the blundered star count on the reverse. PCGS# 40062 Base PCGS# 6879

**1799 Draped Bust Dollar, B-5, BB-157  
Choice Very Fine Condition**

- 5254** 1799 7x6 Stars, B-5, BB-157, R.2, VF35 PCGS. Bowers Die State II. Battleship-gray surfaces display silver highlights on the high points for an appealing, old-silver look. Struck from a lapped obverse die as characteristic of the variety, with stars 1, 2, and 13 somewhat spindly and the Liberty's lower curl less complete than the preceding use of the die. Only isolated small marks exist, and they are widely scattered for mostly trouble-free surfaces. Boldly struck and nicely centered. PCGS# 40049 Base PCGS# 6878

**1799 Dollar, B-5, BB-157, XF40  
Naturally Patinated Surfaces**

**5255** 1799 7x6 Stars, B-5, BB-157, R.2, XF40 PCGS. Die State III. A refreshingly original 18th century Draped Bust Large Eagle type dollar. Both sides display uniform gunmetal-gray patina, with slightly lighter shades seen over the relief elements. Faint bluish hues show up in the peripheral recesses when tilted beneath a light. The strike is bold, as evidenced by the sharp stars, and just light wear is present over the high points of the design. This piece is in a later die state, but the central reverse is well brought up, with no evidence of die sinking. PCGS# 40049 Base PCGS# 6878

**1799 Draped Bust Dollar, VF35  
B-16, BB-158; 7 x 6 Stars  
Struck 5% Off Center**

**5256** 1799 7x6 Stars, B-16, BB-158, R.2, VF35 PCGS. Bowers Die State III. Prominent die clashing is seen on both sides with a curving die crack from the right of the date, onto the bust, and turning toward the hair. Struck off-center right at 3 o'clock on both the obverse and reverse. This wonderful error has medium gray fields with lighter gray devices, and splashes of deep steel toning through the legend on the reverse.  
*Ex: FUN Signature (Heritage, 1/2009), lot 4286.*  
*From The Rawlin "Mac" McInelly Collection.* PCGS# 40050 Base PCGS# 6878

**1799 Draped Bust Dollar, XF45  
7x6 Stars, B-16, BB-158**

**5257** 1799 7x6 Stars, B-16, BB-158, R.2, XF45 NGC. Bowers-Borckardt Die State IV. This Choice AU specimen shows only slight wear on the design elements, Liberty's hair is well-detailed and the drapery is distinct. The lightly abraded surfaces show pleasing blue-steel, dove-gray, and amber toning. The obverse shows the often-seen clash marks above the date and an extensive network of die cracks. Census for the variety: 4 in 45, 12 finer (11/14). PCGS# 40050 Base PCGS# 6878

**1799 8x5 Stars Dollar, Choice XF  
B-23, BB-159; Sharp Collector-Grade Example**

**5258** 1799 8x5 Stars, B-23, BB-159, R.3, XF45 PCGS. Bowers Die State II. Weak top berries on the reverse, diagnostic die break at BE of LIBERTY. The 8x5 star arrangement is represented by this sole die pair, suggesting it was either an engraver's mistake or a star configuration that fell into disfavor at the Mint. As the solitary variety of the type, strong collector demand comes from both type and early dollar enthusiasts. This is a Choice example of the XF grade, with some claims to an even higher designation. Blue and lilac accents enhance golden-gray surfaces. Great rims and a sharp strike complete the appeal. PCGS# 40063 Base PCGS# 6881

**1799 Draped Bust Dollar, AU53**  
**Attractive 8x5 Stars Obverse, B-23, BB-159**

- 5259** 1799 8x5 Stars, B-23, BB-159, R.3, AU53 PCGS Secure. Ex: Friend. Bowers Die State III. Because this is the only die pair with the 8x5 obverse, most likely the star arrangement was an engraver's error. After carefully punching stars at the left, he was probably chagrined to count eight (not seven) of them. Five stars were then punched at the right for the requisite 13 total, similar to the year's ten dollar gold pieces. Mistake or not, today the variety is a collector favorite and it is much in demand for type.

The late state of the dies does not diminish the quality of strike or the eye appeal of this compelling Draped Bust dollar. Nice mint luster remains among softly mottled golden-gray hues. The motifs are bold for the assigned grade. Numerous die cracks exist on the obverse, with "waves" above the date from die clashing. An excellent example of the 8x5 type, well-produced from an obverse die nearing its demise. PCGS# 40063 Base PCGS# 6881

**1799 8x5 Stars Dollar, AU55**  
**B-23, BB-159; Scarce This Nice**

- 5260** 1799 8x5 Stars, B-23, BB-159, R.3, AU55 NGC. Bowers Die State II. The obverse shows the normally seen weak die crack between BE of LIBERTY. It is unclashed above the date, though, confirming the intermediate die state. The fields and devices are remarkably smooth and untroubled for a circulated early dollar, and the coin is free of any adjustment marks. Golden-lilac hues predominate over the lightly iridescent surfaces with substantial remaining luster.

David Bowers' list of Notable Specimens includes an AU55 coin (the Hesselgesser example) and four other AU representatives, and while this piece is not mentioned there it is certainly a Choice representative. The BB-159 variety is the only die pair with the 8x5 Star configuration, and as such it is always in great demand for type. PCGS# 40063 Base PCGS# 6881

- 5261** 1799 7x6 Stars, B-12, BB-160, R.3 — Streak Removed — PCGS Genuine. XF Details. Bowers Die State III. Numerous die cracks are present near the date and on the right obverse field. Two small streaks of struck-in grease, on the reverse above the beak and the M in UNUM, are granular from an attempt at chemical removal. Substantial luster fills the stars, legends, curls, and wings. PCGS# 40051 Base PCGS# 6878

**1799 Bust Dollar, AU53**  
**B-12, BB-160; Missing Berries**

- 5262** 1799 7x6 Stars, B-12, BB-160, R.3, AU53 NGC. Bowers Die State III. An interesting die pair not only for a pair of die cracks that travel upward from the bottom rim, one on each side of the portrait, but also for the lapped and then relapped reverse die, that eventually loses all of its berries. This bold example displays silvery luster over lightly patinated, softly speckled silver-gray surfaces. Bold rims and denticles surround the boldly struck motifs. Slight rub on the high points keeps this attractive early dollar from an even higher grade. PCGS# 40051 Base PCGS# 6878

- 5263** 1799 7x6 Stars, B-6, BB-162, R.4, VF30 PCGS. The first star appears small and thin, A in STATES touches clouds, and the first A in AMERICA touches third and fourth feathers. Obverse die state II, crack through the last four stars; reverse die state III, crack from rim to cloud 7. The silver-gray surfaces are appropriately defined and quite clean. PCGS# 40053 Base PCGS# 6878

**1799 B-10, BB-163 Dollar, AU53  
Splendid Peripheral Patina**

- 5264** 1799 7x6 Stars, B-10, BB-163, R.2, AU53 PCGS. Bowers Die State III-IV. Beautiful apple-green, golden-brown, and cherry-red toning adorns the peripheries of this briefly circulated Draped Bust type coin. Luster fills the borders, curls, wings, shield, and arrows. Impressively unabraded despite a single minor thin mark on the horizontal shield stripes. An intermediate die state with a descending crack through TES, but without a radial crack through the O in OF. PCGS# 40054 Base PCGS# 6878

**1799 Dollar, Mint State Details  
7x6 Stars, B-10, BB-163  
Fully Detailed and Lustrous**

- 5265** 1799 7x6 Stars, B-10, BB-163, R.2 — Spot Removed — PCGS Genuine. Unc Details. Bowers Die State IV. An important example due to its sharpness and essentially unbroken Mint luster. A blanket of deep ocean-blue and wheat-gold toning embraces remarkably unabraded surfaces. A small spot near obverse star 11 is lightly tooled, but that has little impact on the considerable eye appeal. The rare terminal die state with numerous die cracks across the reverse periphery, including a heavy radial crack through the O in OF. PCGS# 40054 Base PCGS# 6878

- 5266** 1799 7x6 Stars, B-17, BB-164, R.2, VF25 PCGS. Bowers Die State IV. A charming Draped Bust type coin with aquamarine fields and cream-gray high points. No marks are consequential, and the portrait exhibits ample hair detail for the designated grade. PCGS# 40055 Base PCGS# 6878

- 5267** 1799 7x6 Stars, B-21, BB-169, R.3, VF25 NGC. Bowers Die State IV. Several die cracks span the peripheries. An evenly defined steel-gray example with charcoal toning in protected areas of the obverse. A few small obverse marks are noted but none are of singular interest. PCGS# 40060 Base PCGS# 6878

**1800 Dollar, XF Details  
Scarce B-12, BB-184**

- 5268** 1800 B-12, BB-184, R.3 — Cleaning — PCGS Genuine. XF Details. Traces of luster emerge from the wings and other protected areas of this better variety early dollar. Light to medium straw-gold and pearl-gray toning visits minimally marked surfaces. Clashed near the left-side obverse stars. Faintly hairlined, but nonetheless of interest to the specialist. PCGS# 40070 Base PCGS# 6887

**1800 Draped Bust Dollar, AU55  
B-16, BB-187, Close Date**

- 5269** 1800 B-16, BB-187, R.2, AU55 NGC. Bowers Die State III. The 1 and the second 0 are close to Liberty's hair curl and drapery respectively. A naturally toned, attractive example with a large oblong, lightly toned area on the reverse, as if a label or perhaps a kraft envelope adhered to the coin during long-term storage. There is no evidence of chemical residue or unnatural absence of deeper toning, as the coin's surface is lightly iridescent and lustrous in the affected area. The rest of the coin is attractively toned in multihued gold, lilac, and umber shades with pleasing mint luster remaining beneath the patina.  
*From The Rawlin "Mac" McNelly Collection.* PCGS# 40073 Base PCGS# 6887

**1800 Bust Dollar, Sharp XF40  
B-5, BB-189 Variety**

- 5270** 1800 B-5, BB-189, R.5, XF40 PCGS. Bowers Die State I. Few early dollars survive with the uncomplicated originality of this sharp XF coin. The obverse retains crisp detail on the devices, with silver-gray accents over the olive-gray base toning. Subtle iridescence adds extra appeal to the smooth surfaces. The reverse presents aged olive-silver coloration surrounding a bold eagle, with a full complement of field stars. Both sides show perfect centering and strong rims. PCGS# 40075 Base PCGS# 6887

- 5271** 1800 AMERICA I, B-19, BB-192, R.2, Fine 15 PCGS. Bowers Die State IV. Slate-gray fields and devices contrast with deeper charcoal borders. The popular *Guide Book* variety with a die scratch beneath the claw that somewhat resembles the letter I. The minimally abraded surfaces are minutely granular. PCGS# 40082 Base PCGS# 6892

**1800 Bust Dollar, VF35  
B-19, BB-192, AMERICA I Variety**

- 5272** 1800 AMERICA I, B-19, BB-192, R.2, VF35 PCGS. Bowers Die State II. Strong die clashing shows lettering from the reverse legend among BERTY of LIBERTY and between the right-hand stars. "Waves" are seen above and below the date from additional clash marks. Although this variety is often available, Choice examples such as this nice VF coin are always in demand because of the AMERICA I reverse. The diagnostic stray die mark that resembles an "I" is sharp and immediately obvious near the eagle's right (facing) claw. Coffee-gold toning is a bit lighter on the devices for an attractive, two-tone patina. The coin is boldly struck and shows a minimum of minor marks for the grade. PCGS# 40082 Base PCGS# 6892

**1800 Dollar, XF45+  
B-19, BB-192, AMERICA I**

- 5273** 1800 AMERICA I, B-19, BB-192, R.2, XF45+ NGC. Die State III. This reverse die was previously used on the BB-191 variety, the only other AMERICA I variety of the year. A linear die gouge in the field adjacent to the final A in AMERICA earns the moniker, likely caused by a stray punch or other engraver mishap. BB-192 is the more often seen of the two die marriages, ideal for the collector seeking a single representative of this popular *Guide Book* variety. This example is remarkably lustrous, with a bold strike and strong detail remaining. The central regions display delicate lavender-gold toning, while the peripheries exhibit deeper aquamarine and olive-gold. A very pleasing coin for the grade. PCGS# 40082 Base PCGS# 6892

**1800 Draped Bust Dollar, XF45  
AMERICA I Variety, B-19, BB-192**

- 5274** 1800 AMERICA I, B-19, BB-192, R.2, XF45 PCGS. CAC. Bowers-Borckardt Die State I. An early die state of the famous AMERICA I variety, this Choice XF specimen retains much original design detail in the hair and the drapery remains distinct. The slate-gray surfaces are lightly abraded and pleasing. Population: 13 in 45, 23 finer (12/14). PCGS# 40082 Base PCGS# 6892

**1800 B-19, BB-192 Bust Dollar, AU53  
'AMERICA I' Reverse, Late Die State**

- 5275** 1800 AMERICA I, B-19, BB-192, R.2, AU53 PCGS. Bowers Die State IV+. The latest die state of this unfailingly popular variety shows a die crack through UNI of UNITED, through the field to the ribbon end on the reverse. The obverse displays bold die clashing around the date and up the left rim behind the stars. A curving die crack follows stars 5 to 7 and continues around the top of LIBERTY. The diagnostic die mark, said to resemble an "I" but more like a backwards J, is especially bold on the coin after AMERICA. A thin freckling of olive-gray patina covers the obverse, although the overall appearance of the coin is silver-gray with nice remaining luster. A bold, attractive representative of the AMERICA I type. PCGS# 40082 Base PCGS# 6892

**1800 AMERICA I Dollar, Choice AU  
B-19, BB-192, Late Die State**

- 5276** 1800 AMERICA I, B-19, BB-192, R.2, AU55 PCGS. Bowers Die State IV. Deeply blended gunmetal-gray and tan-brown embraces the obverse. The reverse is mahogany and cobalt-blue with glimpses of lighter cream shades. Satiny and minimally abraded with a few minor parallel roller marks (as struck) on the central reverse. Overall, a desirable representative of the popular AMERICA I variety. PCGS# 40082 Base PCGS# 6892

**1800 Draped Bust Dollar, AU53**  
**Dotted Date *Guide Book* Variety, B-14, BB-194**

- 5277** 1800 Dotted Date, B-14, BB-194, R.3, AU53 PCGS. Bowers-Borckardt Die State III. A pleasing AU53 specimen of this famous *Guide Book* variety, with die breaks around the first 0 in the date giving it a "dotted" appearance. The glossy surfaces of this attractive piece are lightly abraded under shades of golden-brown and lavender-gray toning. Population: 2 in 53, 1 finer (12/14). PCGS# 40078 Base PCGS# 6889

**1801 B-1, BB-211 Dollar, AU50**  
**Sharp, Attractive Surfaces and Patina**

- 5278** 1801 B-1, BB-211, R.3, AU50 PCGS. Bowers Die State II. The variety is immediately confirmed by an arrowhead centered beneath the U of UNITED — the only 1801 variety with this feature. Sea-green and golden-gray colors embrace this impressively detailed Draped Bust dollar. Light wear is present on the cheek, shoulder, and hair ribbon, but the hair tresses and plumage are sharply defined and the obverse stars have crisp centers. The strike is exemplary, without the weakness on the stars above the eagle often encountered for the type. A couple of faint marks are seen on Liberty's neck, but the surfaces are pleasingly unmarked and even the jaded specialist will admire this bold beauty.  
*Ex: Palm Beach Signature (Heritage, 11/2004), lot 7576.*  
*From The Rawlin "Mac" McNelly Collection.* PCGS# 40083 Base PCGS# 6893

**1801 B-2, BB-212 Dollar, XF Details**  
**Double-Clashed Die State**

- 5279** 1801 B-2, BB-212, R.3 — Improperly Cleaned — NGC Details. XF Bowers Die State II with a double "collar" clash mark on the lower right obverse field. A well-defined stone-gray and caramel-gold representative. Despite light vertical obverse hairlines, the eye appeal is attractive due to an absence of mentionable abrasions. PCGS# 40084 Base PCGS# 6893

- 5280** 1801 B-3, BB-213, R.3 — Repaired — PCGS Genuine. XF Details. Bowers Die State II. The lemon-gold obverse center is framed with powder-blue and peach-gold. The right obverse field is smoothed, and a lesser repair is evident on the field near the hair ribbon. The reverse has a small repair between stars 3 and 4 of the upper row. Mildly bright from cleaning, but a nicely defined early type coin. PCGS# 40085 Base PCGS# 6893

- 5281** 1802/1 Narrow Date, B-1, BB-231, R.3 — Smoothed — PCGS Genuine. XF Details. Bowers Die State II. Upon first glance, this glossy golden-brown and sea-green Bust dollar appears nearly unabraded, but the open fields are carefully smoothed. Still a sharp example of a popular early crown-sized type. PCGS# 40091 Base PCGS# 6898

- 5282** 1802/1 Narrow Date, B-4, BB-232, R.3, VF30 ANACS. Bowers Die State II. A tan-brown and steel-blue Large Eagle dollar with pleasing detail and a few tiny pellet-shaped depressions on the obverse field and behind Liberty's eye. PCGS# 40092 Base PCGS# 6898

- 5283** 1802/1 Wide Date, B-3, BB-234, R.3, VF25 PCGS. Bowers Die State II. A stone-gray and chestnut-gold representative with sharp definition on the wings and scroll for the designated grade. Marks are minor aside from a single hair-thin line on Liberty's neck. PCGS# 40094 Base PCGS# 6899

**1802/1 Bust Dollar, AU53**  
**B-3, BB-234; Late Die State**  
**Wide Overdate**

- 5284** 1802/1 Wide Date, B-3, BB-234, R.3, AU53 NGC. Bowers Die State III. The overdated 2/1 is particularly bold on this scarce die pair. Considerable mint luster remains despite light wear, with swirling lines intermingled with die polishing on the semiprooflike surfaces. Deeper gold toning surrounds the stars and sits on the high points of the motifs. The coin is lightly struck on the bust and hair, yet the reverse eagle is bold. The Bowers' list of Notable Specimens includes two AU55 coins, indicating the variety's scarcity in AU or finer grades.  
*From The Rawlin "Mac" McNelly Collection.* PCGS# 40094 Base PCGS# 6899

---

1802/1 Dollar, AU Sharpness  
B-9, BB-235, Wide Date

- 5285** 1802/1 Wide Date, B-9, BB-235, R.5 — Reverse Rim Damage — NGC Details. AU. Die State indeterminate. The crack through star 12 is present, as is the later crack through the 02 in the date, but the heavier crack from the rim at 5 o'clock to the bust is not yet discernable. BB-235 is a rare die pairing — the rarest overdate of the issue and the rarest 1802 variety overall. Q. David Bowers estimates no more than 100 examples are extant, with none known in Mint State and AU examples distinctly rare. This piece shows just a brush of friction over the high points of the design, with luminous surfaces that yield pale lavender-gray and light golden toning. Some minor rim irregularity at 6 o'clock on the reverse prevents NGC from granting this coin a numerical grade. PCGS# 40095 Base PCGS# 6899

---

1802 Bust Dollar, AU Sharpness  
B-6, BB-241; Narrow Date

- 5286** 1802 — Streak Removed — Narrow Date, B-6, BB-241, R.1, PCGS Genuine. AU Details. Bowers Die State II. Also known as the "Close Perfect Date." The BB-241 variety is the most readily available 1802 variety, to the extent that it is more numerous than all of the other varieties for the date combined. This example is boldly detailed with nice underlying mint luster remaining on both sides. Mottled shades of olive-brown, orange, and charcoal-gray cover the surfaces. A grease streak was removed between 10 and 11 o'clock on the obverse — some would say, to the coin's advantage. An appealing dollar for the fan of richly toned type. PCGS# 40088 Base PCGS# 6895

---

1802 Bust Dollar, AU Details  
B-6, BB-241; Narrow Date

- 5287** 1802 — Cleaning — Narrow Date, B-6, BB-241, R.1, PCGS Genuine. AU Details. Bowers Die State III. The Narrow Date variety is also known as the Close Perfect Date, although, in fact, it is imperfectly arranged with too much space between the 8 and 0. Struck from a usual state of the dies, with Liberty's curls showing signs of a lapped obverse die. The ubiquitous hairlines from cleaning are visible when angled in light, although strong detail remains on the elements. A few minor rim nicks are visible, as well as a shallow planchet flaw on the chin. The surfaces are not overly bright from the cleaning, with some blue and gray-brown patina still evident.

---

1802 B-6, BB-241 Dollar, AU50  
Narrow Date, Minimal Marks

- 5288** 1802 Narrow Date, B-6, BB-241, R.1, AU50 PCGS. Bowers Die State III with a partially lapped shoulder curl. A richly detailed Draped Bust dollar. Ocean-blue fields surround gunmetal-gray devices. The base of Liberty's neck has a small strike-through, as coined, but obverse abrasions are minimal, and the reverse is surprisingly free from contact. PCGS# 40088 Base PCGS# 6895

**1802 Wide Date Dollar, VF30**  
**B-5, BB-242; Attractive Lightly Toned Surfaces**

**5289** 1802 Wide Date, B-5, BB-242, R.5, VF30 PCGS. Bowers Die State I. Bowers ranks this variety the second-rarest of the 1802 die pairs, and the scarcest non-overdated variety. Fewer than 100 pieces exist in VF to XF condition, and perhaps just a dozen or so finer examples. The BB-242 variety is unknown in Uncirculated condition. This example offers pleasing lilac and soft-gray toning over silver surfaces with sharp remaining luster. Moderate wear defines the assigned grade. Hard to locate any nicer — a problem-free, highly attractive coin. PCGS# 40089 Base PCGS# 6896

**1803 Draped Bust Dollar, XF40**  
**B-5, BB-252; Small 3, Nice Surfaces**

**5290** 1803 Small 3, B-5, BB-252, R.3, XF40 ANACS. Bowers Die State I. Struck from the only known state of the dies, from a multiply used, relapped reverse die and a fresh obverse die. Nearly full hair detail remains on Liberty. Both sides show iridescent colors beneath attractive, bronzelike coloration. This richly toned coin is sharp for the grade, with minor wear and a few light marks but no important distractions. PCGS# 40097 Base PCGS# 6900

**1803 B-5, BB-252 Dollar, AU50**  
**Small 3, Fully Toned**

**5291** 1803 Small 3, B-5, BB-252, R.3, AU50 PCGS. Bowers Die State I. The small, high, thin-top 3 defines this variety, struck from a perfect state of the obverse die, paired with a well-traveled reverse that was used to strike several 1802 varieties. There are no other die states confirmed for this sharply struck coin. Pale olive accents attend the silver-gray surfaces. Light wear on the high points is balanced by silver luster in the lower hair strands. Golden highlights add life to both sides of the coin. From The Rawlin "Mac" McNelly Collection. PCGS# 40097 Base PCGS# 6900

**1803 Draped Bust Dollar, AU53**  
**Small 3, B-4, BB-254**

**5292** 1803 Small 3, B-4, BB-254, R.3, AU53 PCGS. Bowers-Borckardt Die State I. A pleasing AU53 example of this scarce variety with the Small 3 in the date and the 1 firmly attached to the curl. A slight trace of wear shows on the bust shoulder and hair left of the forehead, and this piece shows incomplete detail on the drapery and the corresponding area on the reverse. The lightly abraded surfaces retain traces of original mint luster. PCGS# 40099 Base PCGS# 6900

**5293** 1803 Large 3, B-6, BB-255, R.2 — Cleaning — PCGS Genuine. VF Details. Bowers Die State II. The glossy pearl-gray surfaces exhibit wheat-gold and powder-blue undertones. Careful rotation reveals patches of hairlines, but traces of luster remain within the wing plumage. PCGS# 40101 Base PCGS# 6901

**1803 Dollar, Choice XF**  
**B-6, BB-255, Large 3**  
**Heraldic Eagle Type Coin**

**5294** 1803 Large 3, B-6, BB-255, R.2, XF45 NGC. Bowers Die State II. Wheat-gold and steel-blue drape this originally toned early dollar. Pockets of luster are prevalent. Abrasions are surprisingly few aside from a slender mark near the Y in LIBERTY and a brief horizontal line on the cheek. The B-6 variety likely constituted much of the 19,570-piece Mint delivery of silver dollars in 1804. PCGS# 40101 Base PCGS# 6901

## GOBRECHT DOLLARS

### 1836 Gobrecht Dollar, Toned PR35 Judd-60, Die Alignment I

- 5295** 1836 Name on Base, Judd-60 Original, Coin Alignment, Pollock-65, R.1, PR35 PCGS. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (coin turn, center of Liberty's head opposite DO in DOLLAR). There is no trace of the diagonal die clash mark above the eagle's wing that is seen on later strikes. Each side has muted gunmetal-gray patina with faint underlying hints of blue. The devices are evenly worn over the high points, as one would expect. The fields are generally lightly marked, except for a thin pinscratch below the eagle's breast. Such problem-free surfaces are seldom seen on Gobrecht dollars, making this a worthwhile pursuit for the circulated 19th century type collector. PCGS# 11225

### 1836 Gobrecht Dollar, PR15 Judd-60, Die Alignment II Medal Alignment

- 5296** 1836 Name on Base, Judd-60, Pollock-65, R.1, PR15 PCGS. Silver. Plain Edge. Die Alignment II (medallic alignment with the head of Liberty opposite ES). The diagonal die clash mark above the eagle's wing is not evident on this piece because of the significant wear, substantial toning, and numerous small abrasions scattered about. The wear is even throughout and the only mark worthy of singular mention is a longer, angling abrasion in the field below the eagle. Variegated, deeper toning covers each side. PCGS# 11226

### 1839 Gobrecht Dollar, AU Details Judd-104, Original Striking

- 5297** 1839 Name Omitted, Judd-104 Original, Pollock-116 — Holed, Plugged — PCGS Genuine. AU Details. Stars Obverse, No Stars Reverse. Silver. Reeded Edge. Die Alignment IV: Center of Liberty's head opposite right side of F in OF. Only 300 Gobrecht dollars were struck in Die Alignment IV of both Originals and Restrikes. This piece lacks any trace of the microscopic cracks found on Restrikes through the tops of MERI, TE, and later connecting the bottoms of LAR. The top of each side shows a hole that was later plugged. The surface in that area was smoothed, but traces of the repair can still be seen. Just a trace of friction is evident on each side, and the surfaces display light, even blue-gray patina. PCGS# 11444

## SEATED DOLLARS

- 5298 1840 AU50 PCGS.** Traces of luster reside in the protected areas of this well-defined AU silver dollar. Occasional wisps of champagne-gold cling to the margin. Some light circulation marks do not distract. NGC ID# 24YA, PCGS# 6926

**1840 Dollar, AU58  
First-Year Issue**

- 5299 1840 AU58 NGC.** The 1840 is a first-year issue with a mintage of 61,005 coins. It is readily collectible in lower circulated grades but becomes scarce at the near-Mint grade level. Uniform slate patina dominates each side with a few light golden accents. Just a trace of rub occurs over the boldly rendered devices, and abrasions are minimally scattered throughout. NGC ID# 24YA, PCGS# 6926

**1840 Dollar, Lightly Toned AU58**

- 5300 1840 AU58 NGC.** Silver dollars dated 1840 are in strong demand by collectors as the first year of the design type. The silver-gray surfaces of this near-Mint example are imbued with whispers of aqua-blue and soft reddish-gold. The design elements are uniformly well-struck including the letters in LIBERTY and the star centers. No mentionable surface or rim marks are evident. Census: 44 in 58, 70 finer (11/14). NGC ID# 24YA, PCGS# 6926

- 5301 1841 AU58 NGC.** This attractive near-Mint specimen exhibits sharply detailed central design elements with just a trace of wear on the high points and lightly abraded surfaces that show prooflike reflectivity on both sides. Census: 54 in 58 (1 in 58+), 49 finer (12/14). NGC ID# 24YB, PCGS# 6927

- 5302 1841 AU58 NGC.** Patches of olive-green cascade over both sides, each of which exhibits well-defined design features. A faint horizontal pinscratch is visible in the upper reverse field. Census: 54 in 58 (1 in 58+), 49 finer (12/14). NGC ID# 24YB, PCGS# 6927

- 5303 1841 AU58 NGC.** This near-Mint Seated dollar is a splendid representative of the second year for the type, with nearly full satin luster beneath rich grayish-gold toning. A sharply detailed example for the advanced collector. NGC ID# 24YB, PCGS# 6927

- 5304 1841 AU58 NGC.** Lime-green, yellow-gold, and sky-blue patina runs over both sides of this near-Mint dollar that has well-struck design elements. A few minute marks do not disturb. Census: 54 in 58 (1 in 58+), 49 finer (12/14). NGC ID# 24YB, PCGS# 6927

**1841 Seated Dollar, MS62  
Condition Rarity in the Series**

- 5305 1841 MS62 NGC.** Ex: Sweet Collection. A uniform layer of violet-gray patina blankets the well-preserved surfaces of this Mint State example, and trace amounts of luster illuminate the recesses. The devices exhibit moderate incompleteness, notably on the stars, Liberty's head, and the lower portion of the eagle. The 1841 is a condition rarity in the series despite a fairly generous mintage of 173,000 coins. Census: 18 in 62, 13 finer (10/14). NGC ID# 24YB, PCGS# 6927

**1841 Dollar, Strongly Defined MS62**

- 5306 1841 MS62 NGC.** Mint State 1841 silver dollars are very challenging in MS 60 to MS63, and higher-grade specimens are extremely rare. Partially prooflike characteristics are visible on this MS62 example, more so the reverse, when it is tilted under a light source. Strong design detail is evident on the design features. Nice overall eye appeal for the designated grade. Census: 18 in 62, 13 finer (11/14). NGC ID# 24YB, PCGS# 6927

**5307 1843 MS60 PCGS.** This satiny Mint State No Motto dollar has light to medium chestnut-gold and pearl-gray toning. The surfaces are crisply struck, and the fields display no more than the expected number of wispy abrasions. The mintage of the issue was a generous 165,100 pieces, but most circulated to some extent. Population: 3 in 60, 44 finer (12/14). NGC ID# 24YD, PCGS# 6929

**5308 1844 AU55 NGC.** LIBERTY and the shield are die doubled, usual for business strikes of this low-mintage date. The silver-gray surfaces are only lightly abraded. The devices are well defined and reveal glimmers of luster. NGC ID# 24YE, PCGS# 6930

#### 1844 Seated Dollar, Well-Struck AU58 A Low-Production Issue

**5309 1844 AU58 PCGS. Breen-5431.** Quadruple vertical stripes in the obverse shield. The 1844 dollar had a small production of 20,000 circulation strikes. Most certified coins are in the Very Fine to About Uncirculated grade range. Deep aqua-blue and russet toning resides on the surfaces of this near-Mint specimen that exhibits well-struck design elements. A cluster of contact marks is visible on Liberty's chest. Population: 21 in 58, 32 finer (10/14). NGC ID# 24YE, PCGS# 6930

**5310 1845 — Improperly Cleaned — NGC Details. AU.** Bright silvery surfaces exhibit well-defined design features. A few minute circulation marks are visible, and magnification brings out some light hairlines in the fields. NGC ID# 24YF, PCGS# 6931

**5311 1845 AU58 NGC.** Ex: Jules Reiver Collection. This is a largely brilliant near-Mint example from a low mintage of only 24,500 representatives. Each lightly abraded side features generally sharp design definition with a touch rub over the high points. Census: 28 in 58, 18 finer (10/14).  
Ex: *Jules Reiver Collection (Heritage, 1/2006)*, lot 21530. NGC ID# 24YF, PCGS# 6931

#### 1845 Seated Dollar, Lustrous MS62 Underrated and Difficult 1840s Issue

**5312 1845 MS62 NGC.** Constrained by a limited silver supply, the Mint struck only 24,500 examples of the 1845 Seated silver dollar. Of that low mintage, many were likely exported or melted, or both. Certified survivors today average about Choice XF, and Mint State examples such as this piece are quite elusive. NGC and PCGS combined report only 10 submissions — likely not all separate coins — in MS62, and seven finer (12/14). Auction appearances of Mint State coins are few and far between; the last appearance of a 1845 silver dollar in this grade and service was a Goldbergs auction in June 2014, lot 920, which brought \$12,390.

This piece shows generous luster for the grade on surfaces that run from bright and untuned to pale powder-gray to lightly gold-tinged, an extremely nice example and one with a better-than-expected strike for this elusive issue. The 1845 is likely the most difficult Seated dollar date from the 1840s, represented here by a piece that would be difficult to improve upon. NGC ID# 24YF, PCGS# 6931

**5313 1846 MS61 NGC.** Both sides of this MS61 dollar display considerable luster on the golden-gray fields, along with well-struck devices. Scattered minute marks are more numerous on the obverse. Census: 21 in 61, 57 finer (12/14). NGC ID# 24YG, PCGS# 6932

**5314 1846 MS61 NGC.** Faint hairlines and scattered marks on each side prevent a higher grade to this lovely Mint State Seated Liberty silver dollar. The surfaces are mostly untuned with a few specks and splashes of gold. NGC ID# 24YG, PCGS# 6932

**1846-O Seated Dollar, Near-Mint  
First New Orleans Dollar Issue**

- 5315 1846-O AU58 PCGS. CAC.** The first silver dollars struck outside Philadelphia were coined at New Orleans in 1846, totaling 59,000 pieces. This near-Mint example has generous luster remaining beneath dappled blue-green and tan toning. Striking softness is noted on the stars flanking the liberty cap, but just a touch of wear is present. Population: 15 in 58, 25 finer (12/14). NGC ID# 24YH, PCGS# 6933

**1846-O Dollar, Sharply Struck MS60  
A Significant Condition Rarity**

- 5316 1846-O MS60 NGC.** The 1846-O, having a mintage of 59,000 pieces, is the first silver dollar produced by a branch mint. It is also a significant condition rarity. Of the 45 Uncirculated coins seen by NGC and PCGS, the vast majority (40 specimens) are between MS60 and MS63. The silver-gray surfaces of this MS60 example exhibit sharply struck design features. Light marks are scattered about but these are fewer and less severe than one might expect for a coin in this numerical grade. Census: 3 in 60, 18 finer (10/14). NGC ID# 24YH, PCGS# 6933

- 5317 1847 MS60 PCGS.** Attractive shades of deep steel-gray and peripheral accents of russet-bronze adorn the surfaces of this Mint State example. A few minor cuts and abrasions seem minimal for the MS60 grade assessment. Housed in an old green PCGS holder. Population: 4 in 60, 62 finer (11/14).  
*From The Rawlin "Mac" McNelly Collection.* NGC ID# 24YJ, PCGS# 6934

- 5318 1847 MS61 NGC.** Ex: Jules Reiver Collection. From a moderately scarce date, this example displays reflective surfaces and pleasing gray-gold and tan coloration. A well-struck piece with a few minor abrasions noted on the reverse.  
*Ex: Jules Reiver Collection (Heritage, 1/2006), lot 21533.* NGC ID# 24YJ, PCGS# 6934

**1848 Dollar, Choice AU  
Scarce, Low-Mintage Issue**

- 5319 1848 AU55 NGC.** Ex: Jules Reiver Collection. A production of just 15,000 coins makes this the lowest-mintage issue among Seated dollars from the 1840s. The eagle is strongly detailed, while Liberty's head and the stars are somewhat lightly impressed. The surfaces are bright and untuned with a number of small abrasions throughout. Census: 18 in 55, 27 finer (10/14). NGC ID# 24YK, PCGS# 6935

- 5320 1849 AU58 NGC.** Ex: Jules Reiver Collection. An attractive, sharply struck example with variegated light toning and smooth surfaces. Slight high-point wear is noted on both sides. An impressive near-Mint example from an important collection.  
*Ex: Jules Reiver Collection (Heritage, 1/2006), lot 21535.* NGC ID# 24YL, PCGS# 6936

**1850 Seated Dollar, MS60  
7,500 Examples Minted**

- 5321 1850 MS60 NGC.** In writing *Silver Dollars and Trade Dollars of the United States: A Complete Encyclopedia* (1993), Bowers suggests the Treasury "was trying to promote the new gold dollar as the coin of choice of this denomination, and to minimize the silver dollar," which may help to explain the low mintage of just 7,500 Seated dollars in 1850. Silver-gray toning and russet accents color each side. This Uncirculated coin is well-struck, and the only noteworthy abrasion is a linear depression below STATES. NGC ID# 24YM, PCGS# 6937

- 5322 1850-O XF45 PCGS.** The 1850-O is the scarcest Seated dollar issue from the New Orleans mint. This is a pleasing, well-struck example with mottled light toning over both sides. The surfaces exhibit a normal degree of wear for the grade and few slight scratches and abrasions. Population: 27 in 45, 67 finer (11/14). NGC ID# 24YN, PCGS# 6938

**1851 Seated Dollar, AU Details  
Likely a Restrike Example**

- 5323 1851 — Cleaning — PCGS Genuine. AU Details.** The 1851 Liberty dollar exists in both business-strike (Original) and proof (Restrike) formats. Originals were struck to the extent of just 1,300 pieces, and approximately 50 to 100 Restrikes were minted on at least two occasions — about 1858-1860 and then again around 1867-1868, according to Bowers. Certain attributes of this About Uncirculated representative are indicative of a Restrike dollar. Chief among them are the centered date and the absence of any die scratches in the upper-right horizontal shield lines on the reverse. However, PCGS has not certified the coin as a Restrike proof. This most likely can be attributed the somewhat soft details on portions of the obverse stars and Liberty's head, as well as the effects of the noted cleaning, which make its proof status difficult to confirm. Additional theories pertaining to the existence of centered-date Original dollars only add to the confusion and necessitate further research. This sharply struck coin exhibits square rims and prooflike reflectivity in the fields. Each side displays steel-gray patina overall with occasional olive hues. Small, wispy abrasions are scattered over the surfaces, but this remains a highly desirable example from an exceedingly elusive issue. NGC ID# 24YT, PCGS# 6939

**1854 Dollar, Sharp XF45  
Better Date**

- 5324 1854 XF45 PCGS.** Many of the 33,140 Seated dollars coined at the Philadelphia Mint in 1854 were either exported to China or melted, as the market price of silver exceeded face value. These factors make the 1854 one of the scarcest issues in the series. This darkly toned No Motto representative features sharply struck devices and relatively smooth surfaces. NGC ID# 24YT, PCGS# 6942

**1854 Seated Dollar, AU58  
Impressive Strike Definition**

- 5325 1854 AU58 NGC.** The Mint Act of 1853 reduced the silver content of half dimes through half dollars but left the weight of silver dollars unaffected. Thus, the Seated dollars were rarely seen in commerce and frequently melted for their bullion value. From a mintage of 33,140 pieces, this near-Mint example shows pleasing golden-gray patina and a razor-sharp strike. Repunching on the base of the 4 in the date is clear. Only a reeding mark below OF merits mention. Census: 6 in 58, 20 finer (10/14). NGC ID# 24YT, PCGS# 6942

**1855 Seated Dollar, Sharply Struck AU Details  
Scarce in All Grades**

- 5326 1855 — Scratch — PCGS Genuine. AU Details.** The 1855 Seated dollar, having a mintage of only 26,000 pieces, is scarce in all grades. Only a little more than 170 problem-free examples have been seen by PCGS and NGC (10/14). The grayish surfaces of this AU Details specimen display luster in the recessed areas of the sharply defined design features. Scattered minute marks are not significant, though a lengthy diagonal scratch above the eagle's head and neck accounts for the PCGS disclaimer. While evident, its location in the reverse field makes it less objectionable than if it were on an obverse device. Seated dollar specialists attempting to build a high-grade collection should give this piece serious consideration. NGC ID# 24YU, PCGS# 6943

- 5327 1856 XF45 PCGS.** The 1856 Seated dollar had a low mintage of 63,500 pieces, and survivors are scarce at all grade levels. This example is softly struck on the right side obverse stars, and on the eagle's left (facing) leg, talons, and arrow fletchings. Otherwise, it is well-detailed, showing relatively few abrasions and light wear from circulation. NGC ID# 24YV, PCGS# 6944

**1856 Dollar, AU58  
Rarely Encountered Finer**

- 5328 1856 AU58 NGC.** Ex: James A. Stack Collection. The surfaces are originally toned and show just a bit of softness of detail at the centers, a typical occurrence for this date. This near-Mint coin is a nice, problem-free example from an elusive issue. Only 63,500 pieces were coined, and a substantial quantity were melted. Census: 6 in 58, 20 finer (10/14).

Ex: James A. Stack Auction (*Stack's*, 3/1995), lot 193; *FUN Signature* (*Heritage*, 1/2006), lot 4385. NGC ID# 24YV, PCGS# 6944

- 5329 1857 XF45 PCGS.** Deeply toned surfaces characterize this better-date Seated dollar, one of 94,000 pieces minted. That number is deceptively high since many were shipped to China for use as trade dollars. NGC ID# 24YW, PCGS# 6945

**1857 Seated Dollar, Near-Mint  
Scarce Any Finer**

- 5330 1857 AU58 PCGS.** A near-Mint representative of this elusive Seated dollar issue with a mintage in the high five figures, pink-tinged silver-gray through the centers with deeper rose-steel hues along the margins. Softly struck on the obverse stars but broadly pleasing. Population: 20 in 58, 43 finer (11/14).

From *The College Collection*. NGC ID# 24YW, PCGS# 6945

**1857 Seated Dollar, MS62+ Prooflike  
Deeply Reflective Surfaces**

- 5331 1857 MS62+ Prooflike NGC.** The 1857 Seated dollar was primarily minted for export to China, where it was used to pay for tea and silk. Coins were shipped to San Francisco by sea and then on to the Orient, while others departed from Boston and New York. Most of the 94,000-piece mintage went to China, where presumably many of the dollars were melted because the price of silver made them attractive for bullion. As a result, few circulated 1857 dollars exist.

In Uncirculated condition, the date is scarce but occasionally available. This example is a Choice representative, having received the important Plus designation from NGC. The surfaces are prooflike and deeply reflective, with auburn-gold toning and orange accents at the margins. Characteristic striking weakness is seen at the obverse peripheries on Liberty's head, foot, and on the stars. The reverse eagle, however, is uncharacteristically bold and fully struck. A shallow semicircular scratch is noted on the lower left portion of the figure of Liberty, a defect that is difficult to discern unless pointed out. This is a highly attractive dollar with excellent eye appeal. Census: 12 in 62 Prooflike (1 in 62+), 30 finer (11/14). NGC ID# 24YW, PCGS# 6945

**1857 Dollar, MS63 Prooflike  
Brilliant, Reflective Surfaces**

- 5332 1857 MS63 Prooflike NGC.** The surfaces are fully prooflike on both sides with generally strong design details — the eagle in particular — although Liberty's head is almost completely flat. Nearly every star is similarly incomplete. Such striking characteristics are typical of the business strike silver dollars produced in 1857. Census: 12 in 63 Prooflike, 18 finer (10/14).

Ex: *Dallas Signature* (*Heritage*, 11/2005), 5131. NGC ID# 24YW, PCGS# 6945

**1859 Seated Dollar, MS64  
Many Melted Down**

- 5333 1859 MS64 NGC. CAC.** The mintage of the 1859 Seated dollar was a substantial 256,500 pieces. With such a large number struck, the 1859 should be abundantly available in high grades. However, the story of these coins is not simply one of large mintage equaling large availability. Rather, most of those produced were exported to northern China where they were subsequently chopmarked or converted to bullion. The result is that few 1859 dollars are known to collectors today (not to be confused with the frequently available 1859-O). This near-Gem is brilliant and well-struck except on the head of Liberty and uppermost stars. Census: 15 in 64, 0 finer (11/14).

Ex: *Central States Signature* (Heritage, 4/2011), lot 5228. NGC ID# 24YX, PCGS# 6946

- 5334 1859-O MS60 PCGS. CAC.** A sealed Treasury bag of 1859-O and 1860-O silver dollars reportedly emerged during the early 1960s. Those coins were Uncirculated but displayed field marks from long-term bag storage. The present lustrous and lightly toned coin likely came from that holding. Housed in a green label holder.

Ex: *Long Beach Signature* (Heritage, 2/2009), lot 1597, which realized \$2,012.50.

From *The Millford Collection, Part II*. NGC ID# 24YY, PCGS# 6947

**1859-O Seated Dollar, MS62  
Vibrant Toning, Sharp Luster**

- 5335 1859-O MS62 PCGS.** The 1859-O Seated dollar is an available date in the series — slightly less-seen than the 1860-O, but still a top selection for type. This example is head and shoulders above most MS62 coins in eye appeal and mint luster. The obverse is flashes intense orange-gold toning framed by lilac borders. The reverse adds ruby-red and lime-green hues to the mix. A few scattered marks are less than expected for this New Orleans issue and the strike is refreshingly bold — in short, nothing to distract from the outstanding visual impact. Housed in a green label holder.

From *The Rawlin "Mac" McNelly Collection*. NGC ID# 24YY, PCGS# 6947

**1859-O Seated Dollar, MS62  
Atypical Deep Toning**

- 5336 1859-O MS62 NGC.** This atypical 1859-O Seated dollar is likely from a source other than the Treasury silver dollar release of half a century ago. Coins from the Treasury bag (or bags) of Seated dollars, all dated 1859-O and 1860-O, are typically brilliant with little or no toning. This attractive example has deep steel-blue and faint gold toning over its entire obverse and reverse surface. NGC ID# 24YY, PCGS# 6947

- 5337 1859-S XF45 PCGS.** This is a well-struck San Francisco example overall, even if the eagle's left (facing) leg feathers and talons are incomplete. The surfaces display light toning, along with a typical degree of wear for the grade, and a relatively small number of abrasions. NGC ID# 24YZ, PCGS# 6948

**1861 Dollar, XF45  
Heavily Melted Issue**

- 5338 1861 XF45 PCGS.** By 1861 few silver dollars circulated, and most of the 77,500 examples struck in that year were sent to the melting pot for recoinage into subsidiary denominations. This bright silver-gray representative displays above-average strike definition for the issue and light friction over the high points. A lack of individually significant marks heightens the appeal. NGC ID# 24Z4, PCGS# 6951

**1862 Dollar, Well-Defined AU53  
A Low-Mintage Date**

- 5339 1862 AU53 PCGS.** The 1862 Seated dollar is a low-mintage issue (11,540 business strikes and 550 proofs). The meager circulation-strike production, most of which was exported to Latin American and East Indian ports (Breen, 1988), makes the date difficult to locate in most grades. Grayish-russet surfaces of this AU53 example exhibit well-defined design elements and are relatively lightly marked for a large silver coin seeing light circulation. Population: 10 in 53, 82 finer (10/14). NGC ID# 24Z5, PCGS# 6952

- 5340 1863 XF40 NGC.** Yellow-brown color frames the periphery of the obverse on this Civil War date Seated dollar and other areas of color include portions of Liberty and the eagle. The coin retains an attractive appearance on both sides. Census: 4 in 40, 71 finer (12/14). NGC ID# 24Z6, PCGS# 6953

**1863 Seated Dollar, MS64  
Strong Semiprooflike Surfaces**

- 5341 1863 MS64 NGC.** Specie payments were in suspension by 1863 because of the widespread hoarding of gold and silver coins on the East Coast. In that year the Philadelphia Mint struck only 27,200 Seated dollars. Most of those pieces were paid on private account to bullion depositors who required them for international trade. The issue is elusive in circulated grades and scarce through lower Mint State levels. Representatives as fine as the coin here offered are rarely encountered. This lustrous Choice example is remarkable for its brilliant silver surfaces and exceptional contrast. A thick layer of mint frost covers the devices, and the fields show a degree of reflectivity, providing strong aesthetic appeal. Census: 24 in 64, 5 finer (10/14).  
Ex: *Palm Beach Signature* (Heritage, 3/2006), lot 1651. NGC ID# 24Z6, PCGS# 6953

**1865 Seated Dollar, Deeply Toned AU55**

- 5342 1865 AU55 PCGS.** Most Civil War era Seated dollars are scarce to rare, especially so when approaching Mint State. Mintage for this date was 46,500 coins, and even if they were all released from the Mint, most would have immediately been hoarded, eventually finding their way to bullion dealers and the melting pot. Many were also exported to Latin America and India (Breen, 1988). Deep grayish-purple, purplish-red, and gold toning covers both sides of this Choice AU offering, each of which displays well-struck design elements. Population: 18 in 55, 38 finer (10/14).  
Ex: *Long Beach Signature* (Heritage, 9/2005), lot 3749. NGC ID# 24Z8, PCGS# 6955

- 5343 1866 Motto MS61 NGC.** Attractive with dove-gray and gunmetal-gray surfaces, this example is well-struck except for a few of the obverse stars. A few scattered, minor marks are minimal for the grade. Census: 4 in 61, 30 finer (11/14). NGC ID# 24Z9, PCGS# 6959

**1866 With Motto Dollar, MS63  
Bold and Pleasantly Toned**

- 5344 1866 Motto MS63 NGC.** Only 48,900 Seated Liberty dollars were struck in 1866, the first issue incorporating the motto IN GOD WE TRUST on the reverse above the eagle, and Mint State survivors are seldom seen. This sharp Select representative displays substantial semiprooflike reflectivity in the fields, with satiny devices and deep toning that blankets both sides in blended shades of aqua, lavender-gray, and olive-gold. An incredibly eye-appealing coin. Census: 10 in 63, 15 finer (12/14). NGC ID# 24Z9, PCGS# 6959

1869 FS-301 Seated Silver Dollar, MS62  
Misplaced Date and Repunched Date

- 5345** 1869 Misplaced Date and Repunched Date MS62 PCGS. FS-301. Microscopic repunching is visible below the 1 and the 8 in the date, while the top of a drastically misplaced digit joins two dentil tips below the right side of the 6. PCGS has certified two examples of this variety, both in MS62. Both sides have satiny silver luster with minimally reflective fields and no evidence of toning. PCGS# 416930 Base PCGS# 6962

- 5346** 1870-CC — Filed Rims — PCGS Genuine. AU Details. This is a well-struck coin with lightly toned surfaces that display a modicum of surface marks. Despite filed rims, this is an attractive example of this scarce key date that will serve the needs of a Carson City collector. NGC ID# 24ZE, PCGS# 6964

1870-CC Seated Dollar, AU50  
Scarce and Popular Carson City Issue

- 5347** 1870-CC AU50 PCGS. Variety 3-D. A doubly popular Seated dollar because of its low mintage (just 11,758 pieces) and also as the first silver dollar with a Carson City mintmark. The semiprooflike surfaces are bright and show slight golden-brown patina surrounding the devices. The coin is somewhat weakly defined in the centers with the softest details on the eagle, attributable to both strike and to moderate wear while circulating in the old West.  
*Ex: Long Beach Signature (Heritage, 10/2001), lot 271. NGC ID# 24ZE, PCGS# 6964*

1870-CC Dollar, Near-Mint  
Splendid Peripheral Toning

- 5348** 1870-CC AU58 NGC. Variety 3-C. The mintage of the 1870-CC dollar is less than one-fourth that of the 1870-CC half dollar. However, more of the former were set aside, perhaps for souvenirs of the first issue coined by the local branch mint, which was the pride of Carson City. Magnificent cobalt-blue toning hugs the peripheries of this near-Mint State example, transitioning into slivers of lavender and orange. Occasional splashes of yellow-gold visit the centers. The design elements are generally well struck, including all the letters in LIBERTY, although Liberty's hair shows blending of impression. Abrasions are chiefly confined to minor obverse field marks. Census: 21 in 58, 17 finer (11/14).  
*Ex: Tampa FUN Signature (Heritage, 1/2011), lot 5636, which realized \$14,375. NGC ID# 24ZE, PCGS# 6964*

---

**1871 Seated Dollar, MS63  
Lightly Toned Type Coin**

**5349 1871 MS63 NGC.** The 1871 Seated dollar was the first issue in the series with a mintage of more than 1 million pieces, and is often desired for type representation by budget-minded collectors. This Select Mint State example is pleasantly lustrous with a light golden hue over both sides. An above-average strike complements limited surface abrasions, giving this piece pleasing eye appeal. Census: 39 in 63, 44 finer (12/14). NGC ID# 24ZG, PCGS# 6966

---

**1871 Silver Dollar, MS63  
First Generation Holder**

**5350 1871 MS63 PCGS. CAC.** The 1871 was the first silver dollar issue with a mintage above 1 million pieces, but most were exported and melted, and the issue is very scarce at the Select Mint State level. The present coin displays medium stone-gray and chestnut-gold toning. The surfaces are satiny and lightly abraded for the grade. The design elements are sharply detailed, except for softness on Liberty's hair. Housed in a first generation holder. Population: 42 in 63, 45 finer (11/14). NGC ID# 24ZG, PCGS# 6966

---

**1871-CC Seated Liberty Dollar, Fine Details  
Low-Mintage Branch Mint Key**

**5351 1871-CC — Cleaning — PCGS Genuine. Fine Details.** Only 1,376 Seated Liberty dollars were struck at the Carson City Mint in 1871, the lowest production total of the series. Accordingly, the issue is quite elusive and collectors prize examples in all grades and conditions. The letters in LIBERTY are weak on this lightly cleaned example, but the design elements retain significant amounts of interior design detail and the surfaces are lightly abraded. NGC ID# 24ZH, PCGS# 6967

---

**1871-CC Silver Dollar, VF25  
Key Carson City Issue**

**5352 1871-CC VF25 NGC.** The 1871-CC is the second-scarcest Seated Liberty dollar from the Carson City Mint, trailing only the 1873-CC in overall rarity. This is a lightly circulated, but collectible example, showing uniform lavender-gray patina and pleasing detail for the grade. Silver dollar production at the Nevada facility was largely dictated by silver deposits until the Trade dollar was introduced and an increase in mintages was accomplished to produce quantities enough to export to the Orient. Census: 2 in 25, 36 finer (12/14). NGC ID# 24ZH, PCGS# 6967

---

**1871-CC Seated Dollar, VF35  
Deeply Toned and Well-Detailed**

- 5353 1871-CC VF35 PCGS.** This is a pleasingly detailed example of this key Carson City Seated dollar, with deep gunmetal-gray and olive-blue toning and smooth-unblemished surfaces. A minor rim bump is noted near star 12, but there are no other complaints. The Carson City Mint struck only 1,376 silver dollars in 1871, a significant decline from the already low production total of the year before, which consisted of just 11,758 coins. Demand for silver dollar remained minimal in the Nevada territory through the end of the series in 1873. Silver dollar production finally increased in Carson City for the Trade and Morgan dollars, as dictated by law. Population: 12 in 35, 57 finer (12/14). NGC ID# 24ZH, PCGS# 6967

**1871-CC Dollar, AU Details  
Highly Prized in Any Condition**

- 5354 1871-CC — Cleaning — PCGS Genuine. AU Details.** The 1871-CC has one of the lowest production figures (1,376 pieces) of the Seated Liberty dollar series, and examples are highly prized in any level of preservation. Most surviving specimens are in the Very Good to Extremely Fine grade range, and coins in mint condition are extremely rare. This lightly cleaned AU Details example is retoning soft olive-green and russet, particularly on the obverse. The devices are appropriately defined and contact marks are within the confines of what would be expected for a large silver coin that has seen some circulation. NGC ID# 24ZH, PCGS# 6967

- 5355 1872 MS62 PCGS.** Rose-brown and aquamarine toning adorns each side of this pleasing Mint State example. Well-detailed except for incompleteness on the head and some of the obverse stars. A few superficial marks and pinscratches limit the grade. Population: 22 in 62, 58 finer (11/14). NGC ID# 24ZJ, PCGS# 6968

- 5356 1872-CC — Obverse Re-Engraved — ANACS. Fine 15 Details.** One of the four Seated dollar issues produced at the mint in Carson City, and a key issue in the Seated dollar series with a low mintage of 3,150 pieces. This example displays alternating reddish-brown and gray coloration and evenly worn surfaces showing a few scattered abrasions. The letters of LIBERTY have been re-engraved on Liberty's shield. NGC ID# 24ZK, PCGS# 6969

**1872-CC Seated Liberty Dollar, VF35  
Low-Mintage Carson City Issue**

- 5357 1872-CC VF35 PCGS.** The 1872-CC Seated Liberty dollar was produced in small quantities, a fact that was realized by collectors in the 1890s, when collecting mintmarked issues first became popular. A small supply of circulated examples was saved by numismatists at that time, and perhaps 150-200 specimens are still extant today. This impressive Choice VF piece retains much original detail and displays pleasing pinkish-gray patina on both sides. A few minor digs on the figure of Liberty are the only mentionable defects. *Ex: Pittsburgh Signature (Heritage, 10/2011), lot 3871.* NGC ID# 24ZK, PCGS# 6969

---

**1872-CC Dollar, Naturally Toned XF40**  
**A Popular Issue**

**5358 1872-CC XF40 NGC.** The 1872-CC dollar saw a low production figure of 3,150 pieces. This factor along with the its elusiveness in all grades and the popularity of the Carson City mintmark make the issue one of the more desirable Seated Liberty dollars. Natural grayish-brown toning covers both sides of this XF offering, each of which exhibits well-struck design elements, including the letters in LIBERTY and those in the reverse motto. Some minute marks are fewer and much less severe than frequently encountered on circulated examples of this date. An excellent choice for the Seated dollar and/or CC-mint collector. Census: 10 in 40, 48 finer (10/14). NGC ID# 24ZK, PCGS# 6969

---

**1872-CC Dollar, XF Details**  
**A Key Date in the Series**

**5359 1872-CC — Harshly Cleaned — NGC Details. XF.** The 1872-CC dollar, from a relatively small mintage of 3,150 pieces, is one of the key dates in the Seated Liberty dollar series. The present extensively cleaned XF Details specimen is retoning in olive and brown shades. Well-defined design features and minimally abraded surfaces help to counter the NGC disclaimer that may be less intimidating than it sounds.

---

**1872-CC Dollar, Minimally Abraded XF40**

**5360 1872-CC XF40 PCGS.** All four Seated Liberty dollars from the Carson City Mint were low-mintage issues, and all are rare in mint condition. Light gray and olive-green patination runs over each side of this XF specimen. Nice detail is evident on the design elements, though the bottom of the E in LIBERTY is a tad soft, a not-unusual trait for this design type. Both sides reveal fewer marks than might be expected for a large silver dollar that has experienced some circulation and for the designated grade. Population: 24 in 40, 68 finer (10/14). NGC ID# 24ZK, PCGS# 6969

---

**1872-CC Dollar, Sharply Defined XF45**  
**A Choice Example of This Key Date**

**5361 1872-CC XF45 PCGS.** Opinions on the number of surviving 1872-CC dollars vary. John Kroon (1984) estimated that 125 to 150 coins exist in all grades; Weimar White (1992) put the number of survivors in the 100 to 200 range; Dale Phelan (1992) suggested a survival rate of 250 to 300 pieces, and David Bowers (1993) estimates the number to be in the 150 to 200 range. PCGS and NGC have graded a total of 286 specimens in all grades, mostly in Good through XF40.

The silver-gray surfaces of the present Choice XF offering display traces of olive-green. The design elements are sharp, including all letters in LIBERTY, the star radials, and the letters in the reverse motto. Both sides are quite clean for a coin having seen some circulation, and the few scattered marks present do not detract in the least. An excellent example of this key-date representative. Population: 12 in 45, 56 finer (10/14). NGC ID# 24ZK, PCGS# 6969

---

**1872-CC Seated Dollar, AU50**  
**Light Golden Toning**

**5362 1872-CC AU50 PCGS.** Remnants of semiprooflike mirroring remain in the fields of this Almost Uncirculated 1872-CC silver dollar. Pale golden toning blankets both sides, while the design elements are well-detailed. The low mintage of this issue (3,150 coins), coupled with its appeal as an early Carson City issue, make it widely popular among collectors of Seated Liberty dollars and key date specialists. Population: 17 in 50 (1 in 50+), 43 finer (12/14). NGC ID# 24ZK, PCGS# 6969

**1872-S Seated Dollar, AU58**  
**Only Obtainable S-Mint With Motto Issue**

- 5363** 1872-S AU58 NGC. This is an important issue in the Seated dollar series, representing the only obtainable With Motto issue from the San Francisco Mint. Still, a meager 9,000 coins were produced. The only others struck on the West coast are the 1870-S and 1873-S Seated dollars. About a dozen of the former are known, and the latter is not known to exist. This is a light-gray example with a trace of rub over the high points, accented by splashes of pale amber and blue toning. Census: 10 in 58, 14 finer (10/14). Ex: *Houston Signature* (Heritage, 11/2007), lot 60750. NGC ID# 24ZL, PCGS# 6970

**1873 Seated Dollar, MS64+**  
**Fresh Mint Frost**

- 5364** 1873 MS64+ PCGS. CAC. Remarkably frosty, original mint luster yields a hint of light golden toning on each side of this near-Gem Seated Liberty dollar. The strike is sharp, and only a few grade-consistent marks are observed upon close examination. The 1873 is one of the more plentiful With Motto issues in the series, and is popular as a final-year type coin. Population: 21 in 64 (1 in 64+), 8 finer (12/14). NGC ID# 24ZM, PCGS# 6971

**1873-CC Dollar, XF Details**  
**Rare in All Grades**

- 5365** 1873-CC — Tooled — PCGS Genuine. XF Details. The Carson City Mint produced only 2,300 Seated Liberty dollars in 1873. It was the final issue of the design type and mint, and is the rarest Seated dollar from Carson City. Most of the small mintage is thought to have been melted. PCGS has graded only 81 specimens in all grades, mostly the lower circulated levels. While the present XF Details specimen is not included in the population report, one can still get a general idea of the rarity of this important issue.

The silver-gray surfaces of this piece exhibit appropriately defined design features. Most of the letters in LIBERTY on the shield show better detail than ordinarily seen on CC Seated dollars. Both sides reveal a number of marks, several of which (especially above the eagle's head) appear to have been intentionally made with some sort of sharp tool. Hairlined across both sides. NGC ID# 24ZN, PCGS# 6972

## PROOF SEATED DOLLARS

### 1857 Seated Dollar, PR64 Richly Toned and Attractive

- 5366 1857 PR64 NGC.** Die rust on the L in DOL and an unfinished area below Liberty's chin identify the first proof die pair described by Q. David Bowers in his silver dollar *Encyclopedia*. Proofs of this date are more available than are those of many earlier issues, but they are still rare in all grades, with likely no more than 50 to 75 coins extant, including impaired pieces that do not show up on the certified population charts. The present piece is boldly struck, with deeply mirrored fields and frosty devices. Blended violet-orange and teal toning spread over both sides, masking any field-device contrast but delivering an undeniably original appearance. No contact marks are evident, and any grade-limiting hairlines are well-hidden by the rich patina. Census: 11 in 64, 16 finer (11/14). NGC ID# 252B, PCGS# 7000

### 1858 Seated Dollar, PR61 Low-Mintage, Proof-Only Issue

- 5367 1858 PR61 PCGS.** The 1858 is well-known as the sole proof-only issue in the entire Seated dollar series. A small production of just 300 examples was accomplished according to the *Guide Book*, though the reported total has been the subject of debate. Breen (1988) estimates an even more impressive mintage of only 80 proofs, which "came to the Chapman brothers, possibly as early as 1876, from one of their Mint contacts, believed to be Patterson Dubois." Moderate contrast and sharp device definition characterize the brilliant surfaces. Only Liberty's head and the eagle's left wingtip exhibit the slightest trace of shallowness. A few unimportant wispy marks are scattered throughout. Population: 6 in 61, 69 finer (10/14). NGC ID# 252C, PCGS# 7001

- 5368 1859 — Cleaning — PCGS Genuine. Unc Details.** Impressive, essentially full strike definition occurs on each side, only leaving the eagle's head a trifle weak. Rich coppery reddish-brown and faint touches of sea-green patina adorn each side of the coin. Delicate hairlines appear in the obverse fields. NGC ID# 252D, PCGS# 7002

- 5369 1859 PR60 NGC.** Electric-blue toning is more extensive on the reverse of this well-struck proof. Faint hairlines show up in the fields under magnification. NGC ID# 252D, PCGS# 7002

### 1859 Seated Liberty Dollar, PR62 800 Minted, Unknown Number Melted

- 5370 1859 PR62 PCGS.** An optimistic mintage of 800 Seated Liberty dollars was accomplished in 1859, the second year of commercial proof set offerings from the Philadelphia Mint. Unfortunately, the supply exceeded the demand for these coins and many unsold specimens were melted after the end of the year. This sharply detailed PR62 example shows a few minor hairlines in the reflective fields and a few hints of greenish-gold toning. Population: 45 in 62, 94 finer (12/14). NGC ID# 252D, PCGS# 7002

---

1859 Dollar, Attractively Toned PR64

- 5371 1859 PR64 NGC.** From a reported mintage of 800 proofs, this is a deeply mirrored example that has equally deep toning on each side. Gray-rose toning is the dominant color with sea-green around the margins. The reverse features an area of golden-orange coloration at the center. Pinpoint striking details and the absence of mentionable abrasions further add to the appeal of this near-Gem proof.  
*Ex: FUN Signature (Heritage, 1/2005), lot 8313. NGC ID# 252D, PCGS# 7002*

---

1861 Seated Dollar, PR63  
Low Distribution Rate

- 5372 1861 PR63 PCGS.** Only 350 examples of the 1,000 proofs minted in 1861 are believed to have been sold. Additionally, the distributed proofs experienced a high rate of attrition. This Select representative is expectedly razor-sharp with moderate white-on-black contrast. Largely brilliant, a few areas of delicate amber toning occur over the reverse. Signs of light contact define the grade. Population: 32 in 63, 35 finer (10/14). NGC ID# 252F, PCGS# 7004

---

1862 Seated Dollar, PR62  
Only 550 Proofs Struck

- 5373 1862 PR62 PCGS.** Proof production of Seated dollars declined by nearly 50% between 1861 and 1862. The 550 proofs struck for this issue often serve as alternatives to the challenging business-strike representatives. This nicely preserved example is delicately toned in golden-gray hues. Broad rims and boldly rendered design elements are indicative of multiple impressions from the dies. Tiny ticks are more prominent on the reverse than the obverse, but they are minimally distracting. NGC ID# 252G, PCGS# 7005

---

1862 Seated Dollar, PR64  
Low-Mintage Proof Issue

- 5374 1862 PR64 PCGS. CAC.** The business strike mintage was small — just 11,540 pieces — adding to demand for the date in proof format. Only 550 examples were struck as part of the Mint's early efforts to market proof sets to the public. Individual denominations were no longer sold separately as stand-alone proofs. Just 430 sets were initially sold, and the balance not reaching collectors until the mid-1870s. This lightly contrasted, well-preserved proof shows a few light lines as expected for the grade but is fully struck and sharply detailed. Fleeting shades of translucent, champagne-gold patina swirl over the deeply mirrored surfaces of this attractive, near-Gem proof dollar. Population: 27 in 64, 14 finer (11/14). NGC ID# 252G, PCGS# 7005

---

1863 Seated Dollar, PR63  
Among the Lowest-Mintage Proof Issues

- 5375 1863 PR63 PCGS.** Production of Seated Liberty dollar proofs declined to just 460 examples in 1863, representing a low point between 1859 and 1873. A small business-strike mintage of only 27,200 coins further heightens demand for representatives from this scarce proof issue. Minimal evidence of contact is seen over the bright silver-gray surfaces of this Select piece. The strike is strong, as one would expect of a proof, and a few darker toning spots occur over both sides. NGC ID# 252H, PCGS# 7006

1864 Seated Liberty Dollar, PR63  
Low Civil War Mintage of 470 Pieces

**5376 1864 PR63 PCGS.** Demand for proof coinage was understandably low during the Civil War and only 470 proof Seated Liberty dollars were struck in 1864. This attractive Select specimen offers sharply detailed design elements and reflective fields that show a scattering of minor hairlines and contact marks. Highlights of lavender-gray, purple, and cerulean-blue toning visit the surfaces. Population: 56 in 63, 54 finer (12/14). NGC ID# 252J, PCGS# 7007

1864 Silver Dollar, PR64  
Pleasing, Light Contrast

**5377 1864 PR64 PCGS. CAC.** Multiple proof dies were prepared for the issue — a strange state of affairs, because the proof production was just 470 pieces (easily accomplished with a single die pair). Examples exist from three different obverse dies, bringing into question the possibility of restrikes after the initial mintage. This example was struck from Obverse 3 according to the Bowers *Encyclopedia*. Subtle golden-gray toning visits the reflective fields of this near-Gem proof, complementing the full strike and the considerable mirrored appeal. CAC endorsed for quality and eye appeal. Population: 33 in 64 (1 in 64+), 21 finer (11/14). NGC ID# 252J, PCGS# 7007

1865 Seated Dollar, Toned PR65  
Popular and Rare Date  
Ex: Queller

**5378 1865 PR65 NGC.** The 1865 is one of those Seated dollar issues sure to elicit spirited bidding—especially a lovely Gem such as the present specimen. The mintage of business strikes for this final year of the Civil War was quite low to begin with — 46,500 coins — and most of them appear to have been exported to Latin America. Mint State business strikes are accordingly extremely rare, exerting added upward price pressure on the few proofs produced, 500 to be precise.

As of (11/14) NGC has certified 36 Gem proof examples of this date, with 25 finer (finest a PR68!), less the usual suspect quantities to allow for resubmissions and the like.

The fields on this proof are extraordinarily deep in their mirrored reflectivity, an attribute that is even more surprising when one sees the mottled gray and blue toning that covers most of each side. Pinpoint striking details are seen on this lovely Gem, and there are no noticeable contact marks on either side.

Ex: Queller Family Collection of Silver Dollars / Central States Signature (Heritage, 4/2008), lot 2162. NGC ID# 252K, PCGS# 7008

---

**1866 With Motto Dollar, PR64 Cameo  
Beautiful Original Brilliance**

- 5379 1866 Motto PR64 Cameo PCGS.** The 1866 is always popular with collectors as it is the first year of the design to show the modified reverse with the motto added above the eagle's head. A mere 725 proofs were issued and many of the pieces extant have been impaired to some degree. This flashy representative presents as brilliant although we detect a few blushes of milky patina in the fields. Contrast is especially pronounced and the only disturbance worthy of mention is a series of pinpoint blemishes to the right of stars 2 and 3. Population: 17 in 64 (1 in 64+), 16 finer (11/14).  
*Ex: Long Beach Signature (Heritage, 2/2005), lot 7406; Boston Signature (Heritage, 8/2010), lot 5161. PCGS# 87014*

- 5380 1867 — Questionable Color — PCGS Genuine. Unc Details.** A fully struck example with a deep coating of green-gray and rose toning across each side. Free of contact marks or other distractions. NGC ID# 252N, PCGS# 7015

---

**1867 Seated Dollar, PR64 Cameo  
Lightly Toned and Appealing**

- 5381 1867 PR64 Cameo NGC.** Delicate golden toning warms the highly contrasted surfaces of this deeply mirrored Cameo. The strike is bold and the devices exhibit pronounced mint frost. The Mint struck 625 proof Seated dollars in 1867, and this issue is fairly plentiful in the context of proofs, but Cameo representatives remain scarce, and are rarely seen above the Choice grade level. Census: 19 in 64 (1 in 64+, 1 in 64 ★), 22 finer (12/14). PCGS# 87015

---

**1867 Seated Liberty Dollar, PR64  
Stunning Deep Cameo Specimen**

- 5382 1867 PR64 Deep Cameo PCGS.** A total of 625 Seated Liberty dollars were struck in proof format in 1867. The essentially untuned surfaces of the near-Gem Deep Cameo presented in this lot exhibit strong contrast between heavily frosted design elements and deep mirror fields. A well-executed strike prevails throughout, rendering the field-motif contrast even more outstanding. Magnification reveals some fine hairlines in the fields and an area of dusky toning after AMERICA. Population: 8 in 64 (2 in 64+), 3 finer (12/14).  
*Ex: ANA Milwaukee Signature (Heritage, 8/2007), lot 1730. PCGS# 97015*

---

**1868 Seated Dollar, PR62  
Pleasing Lower-Grade Proof**

- 5383 1868 PR62 NGC.** Proof Seated dollar production amounted to only 600 pieces in 1868, and survivors of this issue are in great demand among date collectors, as its business strike counterpart has proven quite rare in high grades. This deeply mirrored proof exhibits bold detail, with noticeable field-device contrast on the reverse but not quite enough on the obverse to qualify for a Cameo designation. Light golden toning blankets each side, while minor, scattered hairlines limit the grade.  
*From The A. James Evans Collection, Part II. NGC ID# 252P, PCGS# 7016*

---

1868 Seated Dollar, Reflective PR63 Cameo

- 5384 1868 PR63 Cameo PCGS.** There is minor repunching on the last 8 in the date, a characteristic Walter Breen notes for one of the two proof dies used for this year's quota of 600 silver dollar proofs. This is a lot of coin for the grade, showing abundant field-device contrast and good eye appeal. The grade is determined by a combination of field hairlines, more perceptible on the obverse; some roller marks that appear in the planchet around Liberty's upper thigh area; and some strike weakness corresponding on the other side in the central reverse, carrying over to the top of the eagle's left (facing) wing. None of these drawbacks in themselves are particularly severe, however, and the surfaces are praiseworthy in terms of their preservation and their contrast and reflectivity. Population: 3 in 63 Cameo, 31 finer (12/14). PCGS# 87016

---

1869 Seated Dollar, PR63  
Needle-Sharp Strike

- 5385 1869 PR63 PCGS.** A faultless strike fully reveals the diecutter's intentions. Liberty's gown is deeply impressed and the individual folds are distinct. The obverse stars, a frequent stumbling block within Seated coinage, are completely detailed. Liberty's individual braids are well-defined, as are the reverse feathers. NGC ID# 252R, PCGS# 7017
- 5386 1870 PR61 PCGS.** This virtually untoned silver proof shows a peppering of marks ranging from small to severe that indicates it may have been stored at one time with other nonproof silver dollars. The most severe are a set of reeding marks in the right obverse field, and a dig just right of the eagle's right wing on the reverse. The strike is nicely sharp, however, and the reflective surfaces retain some eye appeal. NGC ID# 252S, PCGS# 7018

---

1870 Dollar, Richly Toned PR63

- 5387 1870 PR63 NGC.** This issue enjoys a relatively generous mintage of 1,000 proofs. As such, it is one of the more available proof dates in the series. Shades of violet, ice-blue, and apricot-orange combine over the surfaces and likely prevent a Cameo designation. All the design motifs are predictably bold, and signs of contact are minimal. An attractive Select representative. NGC ID# 252S, PCGS# 7018

---

1870 Seated Dollar, PR64 Cameo  
All-Brilliant, Sharply Contrasted

- 5388 1870 PR64 Cameo PCGS.** An attractive example of this popular With Motto date, the surfaces are brilliant throughout and display strong contrast between the fields and devices. The strike definition is full in all areas. Many of the 1,000 proofs minted this year were presumably melted. Population: 17 in 64, 14 finer (11/14). Ex: FUN Signature (Heritage, 1/2005), lot 8333. PCGS# 87018

---

1870 Seated Dollar, PR64 Cameo  
Obverse Planchet Lamination

- 5389 1870 — Planchet Lamination — PR64 Cameo PCGS.** Mint-made defects such as the small planchet lamination at 9 o'clock in the obverse field are rarely seen on 19th or 20th century proof coins. This example has a hint of champagne toning on its fully brilliant proof surfaces, with deeply mirrored fields around highly lustrous devices. The contrast is borderline Deep Cameo. PCGS# 87018

---

**1873 Seated Liberty Dollar, PR64+  
Rare Deep Cameo Example**

**5390 1873 PR64+ Deep Cameo PCGS. CAC.** A meager mintage of 600 proof Seated Liberty dollars was accomplished in 1873, the low figure undoubtedly due to the fact that the denomination was discontinued in March, to be replaced by the Trade dollar later in the year. Many of the coins that were struck were undoubtedly among the 2,258 silver dollars sent to the melter on July 10, 1873, after the weight change in lower denomination silver coins took effect. As a result, the 1873 proof Seated dollar is rare at the PR64 grade level, with Deep Cameo surfaces, and finer examples are very rare.

This high-end Choice example offers sharply detailed design elements and well-preserved brilliant surfaces throughout. The brilliant fields are brightly reflective and contrast profoundly with the frosty devices. Eye appeal is extraordinary. Population: 8 in 64 (2 in 64+) Deep Cameo, 4 finer (12/14). PCGS# 97021

---

---

**TRADE DOLLARS**

---

**1873 Trade Dollar, MS64  
Lightly Toned and Nicely Struck**

**5391 1873 MS64 PCGS.** Attractive olive-green and copper-gold patina enlivens the surfaces of this near-Gem 1873 Trade dollar. Considerable luster percolates upward from underneath and contact marks are few, although a short nick appears just behind Liberty's nose. The strike is fairly sharp throughout both sides. Population: 50 in 64 (3 in 64+), 15 finer (12/14). NGC ID# 252W, PCGS# 7031

**5392 1874 MS63 PCGS.** No period after FINE. This lightly toned Philadelphia Trade dollar has booming luster and a typical strike. The reverse has a mildly granular appearance. Marks are absent aside from slight rim nicks on the reverse near 4:30. Population: 25 in 63, 43 finer (12/14). NGC ID# 252Z, PCGS# 7034

---

---

**1875 Trade Dollar, MS62  
Fully Struck and Satiny**

**5393 1875 Type Two Reverse MS62 PCGS.** Splashes of apple-green and lavender envelop this satiny and fully struck Trade dollar. The fields exhibit only incidental contact. An underappreciated low mintage issue. From the usually encountered reverse subtype without a berry beneath the eagle's branch claw. *From The College Collection.* PCGS# 40107 Base PCGS# 7037

**5394 1875-CC Chop Mark, Type One Reverse, MS62 PCGS.** A single, deeply entered chopmark is placed on the eagle's head, and flattens the area opposite at the base of Liberty's scroll. Lustrous and only delicately toned. The strike is good aside from blending on the eagle's right (facing) leg. PCGS# 517129 Base PCGS# 87038

**5395 1875-CC Type One Reverse MS61 NGC.** A coruscating and essentially brilliant Carson City Trade dollar. Field marks are generally minor for the designated grade, although we note a small cluster beneath PLURIBUS. The strike is sharp although the Liberty's hair is incompletely impressed. PCGS# 40108 Base PCGS# 7038

**1875-S Trade Dollar, MS64  
Thick, Frosted Mint Luster**

- 5396** 1875-S Type One Reverse MS64 PCGS. CAC. Large S. This variety is noted by Bowers in the 1993 book *Silver Dollars and Trade Dollars of the United States: A Complete Encyclopedia*, and it is identifiable by prominent reverse die rust on the first L in DOLLAR. 1875-S Trade dollars of the present hub variety are more plentiful than their similarly dated Type One Obverse / Type Two Reverse counterparts. Since the 1875-S (4.4 million coins produced) is also among the more plentiful Trade dollars in mint condition, this lovely near-Gem is earmarked for inclusion in a Choice quality type set. The surfaces are richly frosted with delicate, barely perceptible, golden tinged overtones. With the exception of the eagle's right (facing) leg feathers (which are still appreciably bold), every design element exhibits razor sharp striking definition. There are no singularly bothersome abrasions, and a few stress cracks (as struck) around the reverse periphery and at the left obverse border are noted solely for accuracy.  
Ex: Long Beach Signature (Heritage, 9/2002), lot 7244. PCGS# 510101 Base PCGS# 7039

**1875-S Trade Dollar, MS64  
Type One Reverse**

- 5397** 1875-S Type One Reverse MS64 PCGS. CAC. Large S. Light to medium steel-gray toning adorns this lustrous Choice type coin. Well preserved aside from a slender abrasion near the U in UNITED and a few light marks on the left obverse field and Liberty's raised forearm. The strike is bold except on the right claw. Certified in an old green label holder. PCGS# 510101 Base PCGS# 7039

**1875-S Trade Dollar, MS65  
Type One Reverse, Large S**

- 5398** 1875-S Type One Reverse MS65 NGC. Large S. The 5 in the date is repunched south. Even minor RPD varieties are seldom encountered for the Trade dollar series. Brilliant save for minute gray freckles on the obverse border near 5 o'clock. The lustrous surfaces are well struck apart from blending on Liberty's hair and the right (facing) claw. Splendidly preserved except for minor marks near the D in UNITED. PCGS# 510101 Base PCGS# 7039

**1875-S/CC Trade Dollar, Near-Mint  
Single Chop Mark on Reverse**

- 5399** 1875-S/CC Chop Mark AU58 PCGS. FS-501. A popular overmintmark of the Trade dollar series, the S/CC is best appreciated under magnification but clear when one knows where to look. The reverse is in a late die state with crack through the bottom of the word TRADE and in many other places on the outer lettering. The lightly rubbed but still-lustrous reverse is generally steel-gray with deeper color at parts of the margins and a single bold chop in the middle of the eagle. PCGS# 87040

**1878-CC Trade Dollar, XF40  
Scarce Low-Mintage Issue**

- 5400** 1878-CC XF40 PCGS. The low-mintage 1878-CC Trade dollar was the last of six issues from that Mint. Production was halted after 97,000 coins as the Carson City facility geared up toward Morgan dollar production. This example has light wear with natural deep gray surfaces and splashes of steel patina. NGC ID# 253F, PCGS# 7047

---

1878-CC Trade Dollar, AU55  
Many Melted at Mint

- 5401 1878-CC AU55 PCGS. CAC.** A significant number of 1878-CC Trade dollars were melted before they even left government control, and today even AU55 coins are very scarce with finer examples borderline rare. This Choice AU piece remains appealing despite a degree of light wear across the high points and into the fields. Population: 11 in 55, 45 finer (12/14). NGC ID# 253F, PCGS# 7047

---

1878-S Trade Dollar, Sharply Struck MS65  
Elusive at This Level

- 5402 1878-S MS65 PCGS.** Type Two Obverse and Reverse. Although quantities of the 4.162 million-piece 1878-S mintage are believed to have been melted at the San Francisco Mint or were exported to the Orient (Bowers, 1993), the two major grading services have certified about 2,500 specimens, making the issue common in all grades; even near-Gems can be acquired with patient searching. This date is elusive any finer.

Golden-gray and ice-blue patina bathes the lustrous surfaces of this Gem offering. The design elements are sharply struck, including Liberty's head that is soft on some examples. Both sides have been well cared for. Population: 23 in 65 (3 in 65+), 27 finer (11/14). NGC ID# 253G, PCGS# 7048

---

1878-S Trade Dollar, Toned MS65

- 5403 1878-S MS65 NGC.** The Philadelphia Mint ceased business strike Trade dollar production in 1877, but the San Francisco Mint struck one more run of a little more than 4.1 million coins in 1878, marking the final business strike issue in the series. This Gem example is vibrantly lustrous beneath consistent lavender and golden-gray toning, while the strike is bold and the fields are free of distractions. Census: 25 in 65, 11 finer (12/14). NGC ID# 253G, PCGS# 7048

---

PROOF TRADE DOLLARS

---

1874 Trade Dollar, PR64  
Light Contrast Through Rich Patina

- 5404 1874 PR64 PCGS.** Glimmers of this second-year proof Trade dollar's contrast persist through rich gold, peach, violet, and blue-gray patina with a handful of deeper spots on the obverse. Crisply detailed, though faint hairlines and scattered contact marks, including one on Liberty's cheek, contribute to the grade. Population: 40 in 64, 13 finer (11/14).  
*From The Rawlin "Mac" McNelly Collection.* NGC ID# 27YK, PCGS# 7054

---

1874 Trade Dollar, PR64  
Frosty Devices, Brilliant Fields

- 5405 1874 PR64 PCGS.** Frosty motifs contrast with glassy fields, but the green label holder precedes the extension of the Cameo designation to the Trade dollar series. Brilliant aside from a glimpse of tan toning on the upper right obverse field. The strike shows incompleteness on Liberty's chest and the eagle's right (facing) leg.  
*Ex: Dallas Signature (Heritage, 10/2009), lot 881, which realized \$4,025.* NGC ID# 27YK, PCGS# 7054

**1874 Trade Dollar, PR66  
Challenging Date in High Grade**

**5406 1874 PR66 NGC.** Only 700 proof Trade dollars were struck in 1874, the second year of the denomination. The coins were issued with the proof sets of the year and most of the coins were delivered by June, with only the last 100 pieces delivered in later deliveries of 50 coins each in September and December. Although unsold proofs were often melted for recoinage in the 19th century, it seems unlikely that unsold specimens of the 1874 Trade dollar issue were destroyed after the end of the year. Instead, records indicate 175 proofs of unspecified dates were released for face value on January 9, 1875, most of them undoubtedly going to coin dealers. Despite the fact that the 1874 escaped the melting pot, it is one of the most elusive issues of the series in high grade today.

This attractive Premium Gem is vividly toned in shades of greenish-gold and grayish-blue patina. The design elements are sharply detailed throughout and the deeply reflective fields shine through the toning. Census: 8 in 66, 2 finer (12/14). NGC ID# 27YK, PCGS# 7054

**5407 1876 PR63 Cameo ANACS.** Type One Obverse. Type Two Reverse. The brilliant centers are framed by broad arcs of sea-green, golden-brown, and rose-red patina. The strike is precise except on the right (facing) claw. PCGS# 87056

**1876 Trade Dollar, PR64 Cameo  
Seldom Encountered in Finer Grades**

**5408 1876 PR64 Cameo NGC.** Type One Obverse. Type Two Reverse. The 1876 proof Trade dollar enjoyed a generous mintage of 1,150 pieces, making the issue reasonably available in the context of the series. This attractive Choice example offers sharply detailed frosty design elements and well-preserved surfaces with nicely contrasting reflective fields. Census: 17 in 64, 16 finer (12/14). PCGS# 87056

**1878 Trade Dollar, PR66  
Proof-Only Philadelphia Issue**

**5409 1878 PR66 NGC.** The 1878 Philadelphia Trade dollar is a proof-only issue, although Carson City and San Francisco made business strikes in this, the first year of Morgan dollar coinage. The Bland-Allison Act effectively ended the Trade dollar series, although proofs were coined for a few more years. Impeccable, mark-free surfaces are fully struck throughout on this Premium Gem proof. Under a lamp, the obverse resolves into deep purple and blue hues, with a touch of red around Liberty's outstretched arm. On the reverse, rose-pink prevails. Census: 14 in 66, 4 finer (12/14). NGC ID# 27YP, PCGS# 7058

**1878 Trade Dollar, PR63 Cameo  
Strongly Contrasted**

- 5410 1878 PR63 Cameo NGC.** Since the Philadelphia Mint had to concentrate on production of Morgan dollars stipulated by the Bland-Allison Act, the few proof Trade dollars coined early in the year were the only production of the design at that Mint. Meanwhile, the branch mints in Carson City and San Francisco had time to produce a quantity of Trade dollars while they waited for Morgan dollar dies to arrive from Philadelphia. This lovely Cameo proof has excellent contrast and only a hint of gold toning.  
*Ex: Houston Signature (Heritage, 11/2007), lot 60801. PCGS# 87058*

**1879 Trade Dollar, PR64  
Undesignated Cameo Contrast**

- 5411 1879 PR64 NGC.** Exquisite ocean-blue, plum-red, and golden-brown toning graces the margins. The fields and motifs are generally brilliant. Cameo frost is obvious across design elements, but no such designation is present since the coin is encapsulated in a prior generation holder. The strike is needle-sharp, and the eye appeal of this proof-only Trade dollar is formidable. NGC ID# 27YR, PCGS# 7059

**1879 Trade Dollar, Lavishly Toned PR66**

- 5412 1879 PR66 NGC.** Superlative surface quality is the hallmark of this Premium Gem proof 1879 Trade dollar, seemingly deserving of a Cameo designation despite the presence of moderate lovely patina on each side. Medium bluish-green and pale copper-pink patina fails to defeat the appreciable field reflectivity or the noticeable mint frost on the devices. A loupe shows no mentionable distractions, although die lapping has effaced many of the lower feathers on the eagle. Census: 29 in 66, 8 finer (12/14). NGC ID# 27YR, PCGS# 7059

**1880 Trade Dollar, Reflective PR64**

- 5413 1880 PR64 PCGS.** This beautiful near-Gem proof Trade dollar displays generous if unacknowledged cameo contrast on both sides. The surfaces are untoned with well-frosted devices and deeply mirrored jet-black fields. Certified in an early blue-label PCGS holder, this sharply struck, thoroughly appealing coin would be an excellent addition to a high-grade type set. Only 1,987 pieces were struck of the issue. NGC ID# 27YS, PCGS# 7060

- 5414 1880 PR62 Cameo NGC. CAC.** This upper-end coin shows deeply reflective proof fields with light, mottled violet and blue toning on the obverse and pale golden over the reverse. The devices are noticeably frosted, which gives the piece a strong cameo effect on each side. Light hairlines and a few minor contact marks account for the grade.  
*Ex: Queller Family Collection of Silver Dollars / Rosemont Central States Signature (Heritage, 4/2008), lot 2191. PCGS# 87060*

**1880 Trade Dollar, PR63 Cameo  
Proof-Only Issue**

- 5415 1880 PR63 Cameo PCGS.** The 1880 Trade dollar was a proof-only issue, albeit one with a massive (in context) mintage of 1,987 pieces. This Select Cameo example has moderate contrast through the centers and a narrow ring of gold-orange toning at the margins. Softly struck on the right-side obverse stars, as sometimes seen. PCGS# 87060

---

1880 Trade Dollar, PR63+ Cameo  
Deeply Mirrored Fields

- 5416** 1880 PR63+ Cameo PCGS. Type Two Obverse and Reverse. A beautiful, deeply mirrored example of this popular proof-only issue. Dusky shades of violet and lavender-blue reside amid the mirrors, while the sharply struck central devices display satiny cameo contrast. Close examination reveals a few faint hairlines in the fields, though these are primarily hidden by the delicate patina. PCGS# 87060

---

1880 Trade Dollar, PR63+ Cameo  
Pleasing for the Grade

- 5417** 1880 PR63+ Cameo NGC. The 1880 proof Trade dollar was produced in fairly substantial numbers (1,987 coins), and is fairly available for date collectors today. Cameo examples, however, are much more challenging. This Plus-graded piece is well-struck, with pleasing field-device contrast. Peripheral hues of amber and pale blue surround light golden toning in the centers, while the reverse fields exhibit just a touch of milky color. PCGS# 87060

---

1880 Trade Dollar, PR64 Cameo  
No Business-Strikes Produced

- 5418** 1880 PR64 Cameo PCGS. Golden tinged on both sides, the obverse and reverse are unusually clean for the grade. Pinpoint striking definition and silky-smooth features help to provide expectantly solid eye appeal for a late date proof Trade Dollar at the near-Gem level of preservation. The appreciably frosted devices appear to float atop glassy reflectivity in the fields. Minor hairlines are found in the fields, expected for the grade. If you enjoy white coins displaying Cameo contrast, this is an excellent selection to add to your collection. Population: 66 in 64 (3 in 64+), 43 finer (12/14). Ex: *Pittsburgh Signature* (Heritage, 8/2004), lot 6427; *FUN Signature* (Heritage, 1/2006), lot 4526. PCGS# 87060

---

1880 Trade Dollar, PR64 Cameo  
Lovely White-on-Black Contrast

- 5419** 1880 PR64 Cameo PCGS. Even after the beginning of Morgan dollar production, politicians in Nevada kept putting pressure on the Mint to continue striking Trade dollars, with the hopes that that series would be revived. Of course, that never happened, and proofs were struck for a few more years before the design became obsolete. This Choice Cameo proof is sharply struck and fully brilliant with satiny white luster and deeply mirrored fields. Population: 66 in 64 (3 in 64+), 43 finer (12/14). PCGS# 87060
-

**1880 Trade Dollar, PR66 Ultra Cameo**  
Pronounced Field-Motif Contrast

- 5420 1880 PR66 Ultra Cameo NGC.** The proof-only Trade dollar issue of 1880 is famous for its unusually generous mintage of 1,987 pieces. Among surviving specimens, however, Ultra Cameo status is far from common, and this Premium Gem offers an extraordinary level of contrast. Both sides show light golden toning overall, with the lower reverse also displaying elements of pale violet. The central devices are beautifully frosted and well-defined, though the surrounding stars on the obverse show softness, particularly close to Liberty's head. Carefully preserved with only a few tiny flaws evident in the fields. Census: 2 in 66, 4 finer (12/14).  
*Ex: Long Beach Signature (Heritage, 9/2009), lot 977. PCGS# 97060*

**1881 Trade Dollar, PR63**  
Needle-Sharp Definition

- 5421 1881 PR63 PCGS.** Only 960 proof Trade dollars were struck in 1881, these being essential for a complete date set as the last of the business strike Trade dollars were coined in 1878. The present example is sharply struck with deep mirrors. Milky-gold toning blankets each side, masking the grade-consistent hairlines in the fields, but leaving the surfaces with a great deal of flash. NGC ID# 27YT, PCGS# 7061

**1881 Trade Dollar, PR64 Deep Cameo**  
A Proof-Only Issue

- 5422 1881 PR64 Deep Cameo PCGS.** By 1881 the Trade dollar was well into its proof-only obsolescence, sustained only by the demand of collectors. This Deep Cameo near-Gem is one of the lucky early strikes from its dies, lightly toned-over but still marvelously contrasted. Horizontal lines in the fields and a few faint contacts contribute to the numeric grade. Population: 10 in 64 (2 in 64+), 11 finer (11/14). PCGS# 97061

**1882 Trade Dollar, PR65**  
Popular Proof-Only Issue

- 5423 1882 PR65 NGC.** From a generous proof-only mintage of 1,097 pieces, this impressive Gem exhibits sharply detailed design elements and deeply reflective surfaces under vivid shades of greenish-gold, bluish-gray, and turquoise toning. No mentionable distractions are evident. Census: 66 in 65, 38 finer (12/14). NGC ID# 27YU, PCGS# 7062

---

1883 Trade Dollar, PR63  
Slightly Contrasted

**5424 1883 PR63 NGC.** A hazy overlay of pearl color evenly coats both sides, limiting the visual impact of the moderately hairlined fields. Ample reflectivity is noted below the toning as is a bold strike and slight cameo contrast on the reverse. The last readily collectible date in the Trade dollar series.

Ex: *FUN Signature* (Heritage, 1/2008), lot 1946. NGC ID# 27YV, PCGS# 7063

---

1883 Trade Dollar, PR64  
Mild Surface Contrast

**5425 1883 PR64 NGC.** There is considerable field-device contrast appearing on this near-Gem proof 1883 Trade dollar. The fields are mildly reflective despite a light layer of pinkish-gray, somewhat hazy patina, and the devices are well-frosted throughout. This is the second reverse, showing full feathers on the eagle. NGC ID# 27YV, PCGS# 7063

---

1883 Trade Dollar, PR64 Cameo  
A Beautiful Final-Year Proof

**5426 1883 PR64 Cameo PCGS.** Deeply mirrored fields showcase beautiful sun-gold hues that grow deeper toward the borders where they are met by tinges of violet and royal-blue. The strike is boldly executed and the frosty devices contrast fully with the glassy recesses. Aside from the unofficial 1884 and 1885 rarities, the 1883 proof Trade dollar is the final issue in this intriguing series, and is always in high demand among date and type collectors. Population: 32 in 64 (2 in 64+), 28 finer (11/14). PCGS# 87063

---

1883 Trade Dollar, PR66 Cameo  
Great Example for the Type

**5427 1883 PR66 Cameo NGC.** The 1883 Trade dollar issue is the last obtainable for a price in the series, and collectors are accordingly fond of the date. This is a fantastic-looking example, lavishly contrasted and accented with pale champagne-gold around the margins of each side. The strike is nice and sharp overall, despite minor softness on Liberty's head. A bit of planchet roughness appears, as made, through the lower-left wing of the eagle on the reverse. A great example for the type. PCGS# 87063

*End of Session Three*

# SESSION FIVE

## MORGAN DOLLARS

### 1878 8 Tailfeathers Dollar, Sharply Struck MS66 VAM-14.1, 'Alligator Eye'

- 5856** 1878 8TF VAM-14.1, R-4, Alligator Eye MS66 PCGS. VAM 14.1. The lower wreath and ONE DOLLAR are die doubled. This VAM variety shows a heavy die polishing line inside the depression of Liberty's cap, and a blunt beak on the eagle. There are two bold extra wing feathers below the right (facing) wing. Faint, curly die lines are noted across the tips of the leftmost leaves of the olive branch. This sharply struck example has powerful cartwheel luster and nearly immaculate fields. The portrait has only the faintest contact. Wisps of golden-brown color preclude full brilliance. 1878 Morgan dollars of the inaugural 8 Tailfeathers type are avidly collected, and although bagmarked Mint State examples can be found without difficulty, Premium Gems are decidedly rare.  
*Ex: Central States Signature (Heritage, 4/2002), lot 4132; Baltimore Signature (Heritage, 7/2003), lot 8366; Portland Signature (Heritage, 3/2004), lot 6680; Denver Signature (Heritage, 8/2006), lot 2755; FUN Signature (Heritage, 1/2007), lot 6836. PCGS# 133796 Base PCGS# 7072*

- 5857** 1878 8TF Doubled Bow, VAM-14.3, MS65 PCGS. CAC. Housed in a first-generation holder. The date shows doubling on the upper-underside of the digits and on the right wreath leaves and berry. The bottom of the 8 has excess metal fill. This first-year, introductory type example was among the first 749,500 Morgan dollars struck. The original Gem surfaces are frosty and brilliant save for a ring of light russet toning that hugs the margins on each side. Although undesignated as VAM-14.3 on the holder, this coin is tied with one other of the same variety for finest at PCGS (11/14). PCGS# 133798 Base PCGS# 7072

### 1878 8 Tailfeathers Dollar, Nicely Toned MS66 An Important Design Type VAM-17

- 5858** 1878 8TF Diagonal In 8, VAM-17, MS66 PCGS. The 1878 8 Tailfeathers silver dollar initiates the Morgan dollar series (excluding the three 1878 proof-only prototypes). While the actual mintage of the 8 Tailfeathers reverse is not known, Breen (1988) estimates 699,300+ business strikes and about 500 proofs. Bowers (2007) presents an estimate of 750,000 circulation strikes and 500 proofs. According to Breen, the 8 Tailfeathers was produced from March 12 to March 25, after which the design was changed to 7 over 8 Tailfeathers. Although many of the 8 Tailfeathers variety were distributed in 1878 and thereafter, enough remained in the Treasury that there is an ample supply of Mint State coins from which to choose today (per Bowers). In fact, this issue is readily available through Gem condition after which it becomes very elusive.

The MS66 coin in this lot displays a melange of cobalt-blue, lavender, and violet patination resting on frosty luster. Well-struck design elements exhibit fairly strong detail in the hair above Liberty's ear and slightly less definition on the eagle's breast feathers. Both sides have been well cared for, though some grazes are visible in the field left of Liberty's nose and on the cheek. A highly appealing dollar, whose importance is underscored by being the only year and mint of the 8 Tailfeathers design. Population: 42 in 66 (3 in 66+), 2 finer (11/14). PCGS# 133818 Base PCGS# 7072

- 5859** 1878 8TF Broken R&B, VAM-21, MS65+ PCGS. A beautifully toned obverse is the hallmark of this Gem example, as dusky violet-rose coloration is draped over the fields and centers, with lovely sea-green peripheral accents. The reverse is nearly brilliant, save for slight mottled border accents. A lustrous and well-preserved example showing only faint, inoffensive marks. PCGS# 133822 Base PCGS# 7072

- 5860** 1878 7/8TF Strong, VAM-38, MS65 PCGS. A sharply struck Gem that boasts sweeping luster and exemplary preservation. Lightly toned aside from a slender band of sun-gold on the left obverse margin. VAM-38 ranks among the more available doubled tailfeather VAMs, but it is very scarce in the present quality. PCGS# 134035 Base PCGS# 7078

- 5861** 1878 7/8TF Strong, VAM-38, MS65 PCGS. A wisp of honey-gold toning visits this lustrous and well struck first-year Gem. Five tailfeather fragments are evident beneath the conspicuous eight feathers. Beautifully preserved, and difficult to locate any finer. PCGS# 134035 Base PCGS# 7078

- 5862** 1878 7/8TF Strong, VAM-38, MS65 PCGS. CAC. This delightful Gem exhibits sharply detailed design elements and the remnants of six secondary tailfeathers show beneath the primary feathers on the reverse. Vibrant cartwheel mint luster radiates from the well-preserved surfaces and eye appeal is outstanding. PCGS has graded 10 numerically finer examples (12/14). PCGS# 134035 Base PCGS# 7078

**5863 1878 7TF Reverse of 1878 MS65+ PCGS. CAC. VAM-114.1.** VAMworld.com reports that this marriage was unreported prior to 2011. The reverse die is shared with VAM-100-1, but the obverse differs. The R in PLURIBUS is nicely die doubled, as are the right-side stars. Brilliant and lustrous with smooth fields and only delicate grazes on the cheek. NGC ID# 253K, PCGS# 7074

**1878 Seven Tailfeathers, Reverse of 1878 Dollar  
Obverse-Toned Premium Gem**

**5864 1878 7TF Reverse of 1878 MS66 PCGS.** The second of three distinct varieties in the first year of issue for the Morgan dollars in Philadelphia, the Seven Tailfeathers, Reverse of 1878 is singular in the series. The obverse of this Premium Gem has bold blue-green, violet, rose, and gold patina over all but the upper right, while the reverse is essentially light silver. Great cartwheel luster. Population: 38 in 66 (4 in 66+), 0 finer (11/14).

*From The College Collection. NGC ID# 253K, PCGS# 7074*

**5865 1878 7TF Reverse of 1879 MS65 PCGS.** Introduced late in 1878, this reverse hub would be used on all subsequent Morgan dollars through 1904. Collectors are aware that striking quality over the eagle's breast feathers suffered from this change. Fortunately for interested bidders, this untuned example is crisply defined in all areas. With unbroken mint frost and few bagmarks, it is no surprise that this piece resides in a Gem holder. PCGS has only graded 19 coins of this variety any finer (12/14). NGC ID# 253L, PCGS# 7076

**1878 Seven Tailfeathers, Reverse of 1879 Dollar, MS65+  
Third Morgan Design for the Year**

**5866 1878 7TF Reverse of 1879 MS65+ PCGS Secure. CAC. Ex: Bella.** The last of three Morgan dollar reverse varieties for the year and the most challenging in Gem and better condition. Silver-bright surfaces offer a strong cartwheel effect and the all-around eye appeal is as impressive as the pedigree would suggest. PCGS has certified just 17 examples of this variety as MS66 or better (11/14). NGC ID# 253L, PCGS# 7076

**5867 1878-CC MS65 PCGS.** Hints of gold and blue toning appear splashed along the border of this otherwise brilliant and untuned silver dollar. Both sides have exceptional luster and great eye appeal. NGC ID# 253M, PCGS# 7080

**5868 1878-CC MS65 NGC.** The lustrous surfaces of this Gem CC-mint specimen display a couple wisps of gold-brown color on the obverse. A sharp strike characterizes the design features. A few obverse grazes prevent an even finer grade. NGC ID# 253M, PCGS# 7080

**5869 1878-CC MS65 PCGS.** From the first year of issue comes this lovely Carson City Gem. Solidly struck with great luster and delicate mint frost on the devices. A few small marks and grazes are within the parameters of the grade designation.  
*Ex: FUN Signature (Heritage, 1/2007), lot 6855. NGC ID# 253M, PCGS# 7080*

**1878-CC Morgan Dollar, MS66  
Old Green Holder**

**5870 1878-CC MS66 PCGS.** A well-preserved, frosty example of this first-year Carson City Morgan dollar. Bold design definition complements the uninterrupted cartwheel luster, while a few traces of light golden color around the peripheries are the only suggestion of toning. Housed in an old green label holder, with just six coins numerically finer at PCGS (12/14). NGC ID# 253M, PCGS# 7080

**1878-CC Silver Dollar, Sharp MS66  
Rare Numerically Finer**

**5871 1878-CC MS66 NGC.** The 1878-CC Morgan is highly popular as the first issue of the type from the Carson City Mint, but it is only available in grades through MS65; Premium Gems are scarce in comparison to the demand for them, and finer pieces are rare. This frosty, brilliant representative is fully struck, with just a few faint luster grazes on the cheek detected when rotated beneath a light. Only nine coins are numerically finer at NGC (12/14). NGC ID# 253M, PCGS# 7080

**1878-CC Morgan Dollar, MS66  
Beginning of an Era**

**5872 1878-CC MS66 NGC.** An impressive Premium Gem, this first year Carson City Morgan dollar marks the beginning of an important era in silver dollar production. This lovely piece has untuned silver surfaces with brilliant luster. NGC has only certified nine examples in finer numerical grades (12/14). NGC ID# 253M, PCGS# 7080

**1878-CC Silver Dollar, MS66  
Brilliant, Frosted Carson City Issue**

- 5873 1878-CC MS66 PCGS.** VAM enthusiasts will notice the diagonal die lines at IB of LIBERTY and a die chip in the center of the first C in the mintmark, plus multiple die cracks through the reverse legend including TAT of STATES. Die lines run through WE in the motto. This lustrous Premium Gem dollar is boldly struck above Liberty's ear and on the eagle's talons and breast. A few light nicks on the high points are the most noticeable marks. The obverse is untoned and frost-white, while the reverse is nearly so except for a whisper of golden toning between the eagle's wings. Just 15 coins are certified numerically finer by both services combined (12/14). NGC ID# 253M, PCGS# 7080

**1878-CC Morgan Dollar  
MS65 Deep Mirror Prooflike  
Nearly Unavailable Finer in DMPL**

- 5874 1878-CC MS65 Deep Mirror Prooflike PCGS. CAC. VAM-11.** Ex: A Gift of Undeserved Favor. A Top 100 Variety. Boldly contrasted and deeply mirrored, this issue is unarguably scarce in Deep Mirror Prooflike and virtually impossible to locate any finer. A few minor luster grazes on the portrait and a handful of non-distracting field marks are the only visual signs of Mint handling. A bold strike shows no weakness at Liberty's hair strands or the eagle's plumage. A crisscrossing of bold die lines in the eagle's wings are characteristic of the VAM-11 variety. Population: 35 in 65 Deep Mirror Prooflike, 3 finer (12/14). NGC ID# 253M, PCGS# 97081

**1878-S Dollar, Well-Struck MS67**

- 5875 1878-S MS67 PCGS.** The mintage approached 10 million Morgan dollars in the debut year, yet survivors are rarely seen any in top grades, as the population data indicates. This Superb Gem is housed in a green-label PCGS holder and has intermingled iridescence over satiny silver surfaces. The design elements are well-struck. Population: 28 in 67 (1 in 67+), 1 finer (12/14). Ex: *Dallas Signature* (Heritage, 10/2006), lot 1273; *Long Beach Signature* (Heritage, 9/2007), lot 2332; *Summer FUN Signature* (Heritage, 6/2008), lot 1286; *Central States Signature* (Heritage, 4-5/2010, lot 1287; ANA *Signature* (Heritage, 8/2010), lot 5217. NGC ID# 253R, PCGS# 7082

**1878-S Dollar, MS67  
VAM-19A, The 'Torn Bonnet'**

- 5876 1878-S "Torn Bonnet," VAM-19A, MS67 NGC.** A Hit List 40 Variety. The "Torn Bonnet" nickname comes from a thick, broad die gouge across the wheat leaves and cotton leaf onto Liberty's cap. Heavily polished dies typify the variety and are apparent on the obverse by its prooflike surfaces and on the reverse by weakness at the legend. The arm of the R in TRUST is missing. Silver luster is dominant across the untuned surfaces, with mint frost especially thick on the eagle. Liberty's cheek is smooth and full, and the neck is unabraded. A superlative Superb Gem. Census (all varieties): 35 in 67, 0 finer (12/14). PCGS# 40535 Base PCGS# 7082

- 5877 1879 MS66 PCGS.** Vibrant, frosty cartwheel luster is uninterrupted as it illuminates brilliant surfaces on each side of this Premium Gem representative. The strike is sharp and the eye appeal is superb. Only four coins are numerically finer at PCGS (12/14). From *The College Collection*. NGC ID# 253S, PCGS# 7084

- 5878 1879 MS66 PCGS.** The 1879 Morgan dollar is generally available in grades through MS65, but the certified population plummets at the MS66 level and finer pieces are exceedingly rare. This Premium Gem showcases vibrant, frosty luster beneath an array of sea-green, blue, violet, and orange-gold coloration. The strike is sharp and close study with a lens fails to reveal any significant abrasions hidden beneath the patina. PCGS has certified only four numerically finer representatives (11/14). NGC ID# 253S, PCGS# 7084

- 5879 1879 MS66 NGC.** Pleasing luster cascades over the untuned surfaces of this Premium Gem. Well struck, including fairly good detail in the hair over Liberty's ear. Nearly unavailable any finer with fewer than 10 higher NGC/PCGS submissions (12/14). NGC ID# 253S, PCGS# 7084

**1879 Morgan Dollar, MS65  
Rare Deep Mirror Prooflike Example**

**5880 1879 MS65 Deep Mirror Prooflike PCGS.** A huge mintage of 14.8 million Morgan dollars was accomplished at the Philadelphia Mint in 1879, all with the slanting arrow feather that identifies the Reverse of 1879. Mint State examples are easily located, specimens with Deep Mirror Prooflike contrast are quite elusive.

The present coin is a delightful Gem with razor-sharp definition on all design elements and well-preserved brilliant surfaces. The deeply reflective fields contrast profoundly with the frosty devices, creating a dramatic white-on-black cameo flash when the coin is tilted in the light. Population: 9 in 65 Deep Mirror Prooflike, 2 finer (11/14). NGC ID# 253S, PCGS# 97085

**1879-CC Dollar, MS62  
Normal Mintmark**

**5881 1879-CC MS62 NGC.** Normal Mintmark. A curiously underrepresented issue among the GSA dollars, the 1879-CC Morgan poses a challenge in Mint State grades, particularly with a "clean" mintmark not affected by repunching. Pale silver surfaces have light cloud-white dappled toning and a strong cartwheel beneath. Softly struck with chatter and a couple of scrapes in Liberty's face area largely accounting for the grade. From The Rawlin "Mac" McNelly Collection. NGC ID# 253T, PCGS# 7086

**1879-CC Morgan Dollar, MS63  
Early Carson City Issue**

**5882 1879-CC MS63 NGC.** Normal Mintmark. The Carson City Mint began coining the Morgan silver dollar in 1878, but in 1879 egregious railroad tariffs motivated mine owners to ship silver to San Francisco instead of Carson City. Silver dollar production fell drastically and the 1879-CC Morgan is today prized across the entire grading spectrum. This brilliant example exhibits generous frost throughout. NGC ID# 253T, PCGS# 7086

**1879-CC Morgan Dollar, MS64  
Brilliant, Outstanding Example**

**5883 1879-CC MS64 NGC.** Normal Mintmark. Fully struck and brilliant with the usual outstanding mint frost this issue is known for. As the third-scarcest CC dollar, the 1879 is always of interest to advanced collectors, and this piece represents excellent value for the grade. Ex: Central States Signature (Heritage, 4/2001), lot 6615. NGC ID# 253T, PCGS# 7086

**1879-CC Capped Die Dollar, MS64  
Bright Semiprooflike Fields**

- 5884 1879-CC Capped Die, VAM-3, MS64 PCGS.** A Top 100 Variety. The population of Mint State 1879-CC Morgan dollars, already small relative to other nearby Carson City dates, is further subdivided into the repunched mintmark (or "Capped Die") and plain varieties. This Capped Die near-Gem has a frosty portrait that are surrounded by strong semiprooflike fields. On the reverse, small dots of reddish-orange on the eagle's feathers add color. PCGS has graded only 12 Capped Die examples in finer grades (11/14). *From The Rawlin "Mac" McInelly Collection.* PCGS# 133869 Base PCGS# 7088

**1879-O Silver Dollar, MS65  
High-End for the Grade**

- 5885 1879-O MS65 NGC.** The 1879-O Morgan dollar is one of the more challenging early series issues in high grades; Gem coins are scarce, and finer pieces are decidedly rare. This representative is well-struck for a New Orleans issue, with intensely vibrant, satiny luster underlying a thin glaze of golden toning on each side. Liberty's cheek is remarkably clean, and only a few faint disruptions in the left obverse field appear to limit the technical grade of this incredibly eye-appealing 1879-O Morgan. NGC has only graded seven numerically finer representatives (12/14). NGC ID# 253V, PCGS# 7090

**1879-O Dollar, MS65  
Attractively Sharp and Frosty**

- 5886 1879-O MS65 PCGS.** Available in lower grades, this New Orleans issue becomes somewhat scarce in MS65, and is a notable condition rarity any finer. This Gem representative is well-struck for the date, with frosty luster that yields a warm golden hue around the peripheries. A few faint interruptions in the luster on Liberty's cheek are all that preclude an even finer grade. PCGS has seen 16 numerically finer submissions (12/14). NGC ID# 253V, PCGS# 7090

**1879-O Dollar, MS65  
Series O-Mint Debut**

- 5887 1879-O MS65 NGC.** This second-year Morgan dollar issue is also the New Orleans debut of the series, as the facility did not reopen from its Civil War-era shuttering until that year. Strong cartwheel luster persists through distinctive patina with powder-blue, lavender-violet, and sea-green elements. NGC has graded just seven numerically finer pieces (11/14). *Ex: FUN Signature (Heritage, 1/2007), lot 6887.* NGC ID# 253V, PCGS# 7090

**1879-S Reverse of 1878 Dollar, MS65  
Light, Irregular Toning**

- 5888 1879-S Reverse of 1878 MS65 PCGS.** A Top 100 Variety. The Second Reverse, which has seven tailfeathers and a parallel top arrow feather. This variety was struck from dies leftover from 1878, instead of newly arrived dies from Philadelphia. Peach-brown, cherry-red, and navy-blue enrich the margins, although the centers are only lightly toned. This lustrous and precisely struck Gem has a pristine reverse and no obtrusive obverse abrasions. Population: 52 in 65, 1 finer (12/14). *Ex: Central States Signature (Heritage, 4-5/2010), lot 1298.* NGC ID# 253W, PCGS# 7094

- 5889 1879-S MS65+ PCGS. CAC.** Vivid bluish-green, crimson, and lime-green toning runs over the obverse of this high-end Gem, leaving the reverse brilliant. Sharply struck design elements include the hair above Liberty's ear. A very nicely preserved coin. NGC ID# 253X, PCGS# 7092

**1879-S Morgan Dollar, MS68  
None Certified Finer**

- 5890 1879-S MS68 NGC.** A sensational Superb Gem, this brilliant silver dollar exhibits fully white surfaces with no hints of powder-blue toning. The fields are lightly reflective on this borderline Prooflike example, although there is no designation on the holder. MS68 is the highest certified grade at PCGS or NGC (12/14). NGC ID# 253X, PCGS# 7092

**1879-S Silver Dollar, MS68  
Dazzling Luster and Eye Appeal**

- 5891 1879-S MS68 NGC.** Like the following two issues from this mint, the 1879-S Morgan dollar is a readily available date for type purposes, but it finally becomes conditionally scarce at the lofty MS68 grade level. This superb, brilliant representative is a remarkably sharp and vibrant piece, showing semiprooflike mirroring in the fields and delicately preserved, frosty central devices. None have been certified numerically finer at NGC or PCGS (12/14). NGC ID# 253X, PCGS# 7092

- 5892 1880 MS66 PCGS.** The high-mintage 1880 Philadelphia Morgan dollar was struck in a quantity surpassing 12.6 million coins, but examples in grades finer than Gem are seldom seen. This lustrous, untuned silver-white example boasts radiant cartwheel luster and only a couple of minor marks on Liberty's cheek. The strike above the ear is somewhat soft. NGC ID# 253Y, PCGS# 7096

- 5893 1880 MS66 NGC.** Coruscating luster endows the brilliant surfaces of this sharply struck MS66 piece that is impeccably well preserved. The 1880 is elusive in this grade level, and finer examples are unrepresented in the population of either service (12/14). NGC ID# 253Y, PCGS# 7096

- 5894 1880 MS66 PCGS.** This piece displays fully lustrous surfaces bathed in dusky orange-lilac toning in the center areas, accenting iridescent cobalt-blue at the peripheries. The design elements are well-impressed, and the surfaces are relatively clean, with only a handful of tiny, incidental flaws.

*Ex: Palm Beach Signature (Heritage, 3/2006), lot 1024; ANA Signature (Heritage, 8/2007), lot 2225; FUN Signature (Heritage, 1/2008), lot 5282; Central States Signature (Heritage, 4/2008), lot 2601. NGC ID# 253Y, PCGS# 7096*

**1880 Dollar, MS65 Deep Prooflike  
Brilliant Cameo**

- 5895 1880 MS65 Deep Prooflike NGC.** The 1880 Morgan dollar is decidedly scarcer than its San Francisco counterpart, and Deep Prooflike representatives are particularly elusive. This Gem example is bold contrasted, with deep mirrors and heavily frosted, sharply struck devices. Only a few insignificant ticks in the fields limit the grade, but are hardly a hindrance on the eye appeal. Census: 9 in 65 Prooflike, 2 finer (12/14). NGC ID# 253Y, PCGS# 97097

- 5896 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS.** A Top 100 Variety. Medium autumn-brown toning graces the borders of this lustrous and well struck Gem. Uncommonly free from marks aside from a graze above Liberty's eye. A distinctive, popular, and collectible variety. PCGS# 133876 Base PCGS# 7108

- 5897 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS.** A Top 100 Variety. This bold overdate shows the clear remnants of an underlying 79 within the loops of the 80 in the date. This representative is attractively frosty with a warm champagne glow over each side. Only a few faint luster grazes on the cheek and a single linear mark above the eagle's head preclude an even finer grade from PCGS. Population: 10 in 65, 3 finer (12/14). PCGS# 133876 Base PCGS# 7108

- 5898 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS.** A Top 100 Variety. The strongest overdate of the series, paired with an obsolete reverse subtype. The Carson City mintmark provides further interest. Lustrous and lightly toned with a suitable strike and a few minor facial grazes. Encased in an old green label holder. *Ex: Charlotte ANA (Heritage, 3/2007), lot 1225, which realized \$2,185. PCGS# 133876 Base PCGS# 7108*

**1880/79-CC Morgan, MS66  
Distinct VAM-4 Overdate**

- 5899 1880/79-CC Reverse of 1878, VAM-4, MS66 NGC.** A Top 100 variety. Harry Forman, the renowned Morgan bag dealer, discovered this overdate in 1964. The naked eye easily distinguishes the 79 underneath the right digits while a parallel top arrow feather identifies the reverse. Shimmering surfaces admit little disturbance save for some reverse chatter surrounding STATES. Census: 13 in 66 (2 in 66+), 0 finer (12/14). PCGS# 133876 Base PCGS# 7108

1880-CC 8 Over High 7 Dollar, MS66  
Minimally Toned Example of VAM-5

**5900** 1880-CC 8 Over High 7, VAM-5, MS66 PCGS. CAC. A Top 100 Variety. One of the *Guide Book* classics of the Morgan dollar series, represented here by a minimally toned Premium Gem with a strong cartwheel to its luster. Liberty's hair has above-average definition over the ear. For the variety, Population: 1 in 66, none are finer (11/14). PCGS# 133877 Base PCGS# 7102

**5901** 1880-CC 8 Over Low 7, VAM-6, MS66 NGC. A Top 100 Variety. The VAM is undesignated on the NGC insert. Narrow bands of golden-brown and apple-green toning embrace the borders of this lustrous and splendidly preserved Carson City dollar. PCGS# 133878 Base PCGS# 7104

1880-CC Overdate Dollar, MS67  
Second 8 Over 7

**5902** 1880-CC 8 Over Low 7, VAM-6, MS67 NGC. A Top 100 Variety. This third reverse variety shows die filling within the interior spaces of the first 8, and clear evidence of a 7 beneath the second 8. The reverse has tiny die artifacts inside each C of the mintmark. Numerous overdate varieties of the 1880-CC Morgan dollars are known, having varying degrees of rarity. Both sides of this highly lustrous Morgan dollar are untuned with brilliant, frosty mint luster. The strike is bold with strong hair definition over Liberty's ear. A few tiny luster breaks and trivial marks are consistent with the grade of this splendid Superb Gem. There have not been any 1880-CC dollars certified in MS67 with the VAM-6 designation on the insert. Among all 1880-CC dollars only 21 others have been graded MS67 at NGC and none are numerically finer (12/14). PCGS# 133878 Base PCGS# 7104

1880-CC Morgan Dollar, MS67  
Tied for Finest Known VAM-7

**5903** 1880-CC 8/7, Reverse of 1878, VAM-7, MS67 PCGS. Certified 1880-CC Morgans are plentiful, but finding specific VAM varieties in the finest condition remains a challenge. The VAM-7 is identified by the second 8 that exhibits a dash underneath, diagonal die polish within the lower loop, and a tiny ear that pokes through the upper loop to the left. Silver-white surfaces highlight the present example, and a russet band runs from Liberty's ear toward UR of PLURIBUS. NGC has graded a single VAM-7 at the MS67 level, and PCGS none (this coin has not been submitted to PCGS for attribution). For all 1880-CC Morgans, PCGS counts 30 coins at the MS67 level with just a single piece at 67+ (12/14). PCGS# 134049 Base PCGS# 7110

1880-CC Silver Dollar, MS66  
Reverse of 1878, VAM-7A

**5904** 1880-CC 8/7, Reverse of 1878, VAM-7A, MS66 PCGS. CAC. A Hit List 40 Variety. This popular die state has a clashed N from IN in front of the neck. Crisply struck and highly lustrous with delicate chestnut toning and uncommonly unabraded fields. Even the cheek displays only a few faint grazes. Population: 36 in 66 (6 in 66+), 2 finer (12/14) PCGS# 134049 Base PCGS# 7110

**5905 1880-CC MS66 PCGS.** This spectacular Premium Gem exhibits impeccably preserved brilliant surfaces with vibrant frosty mint luster, and sharply detailed design elements throughout. From a low Carson City mintage of 591,000 pieces. NGC ID# 2542, PCGS# 7100

**5906 1880-O MS64+ PCGS.** The 1880-O Morgan dollar is an important condition rarity, frequently encountered in MS64, but rarely finer, with only 35 numerically finer examples certified by PCGS (12/14). This example is brilliant, lustrous, and untuned. NGC ID# 2543, PCGS# 7114

**1880-O Morgan Dollar, MS64+  
Dazzling Mint Brilliance**

**5907 1880-O MS64+ PCGS. CAC.** Micro O mintmark. Vibrant, frosty mint bloom illuminates nearly undisturbed fields on this well-struck near-Gem, with a few minor grazes on Liberty's cheek being all that precludes a finer assessment. A high-end piece for the grade, and bested by only 35 numerically finer coins at PCGS (12/14). NGC ID# 2543, PCGS# 7114

**1880-O Dollar, MS64 Deep Mirror Prooflike  
Oval O on Reverse**

**5908 1880-O MS64 Deep Mirror Prooflike PCGS.** Oval O. Remarkably deep mirrors set up pronounced contrast with the lightly frosted devices. This minimally toned New Orleans silver dollar has a well-preserved reverse and a clean cheek. An important piece for Registry collectors. Population: 36 in 64 Deep Mirror Prooflike, 0 finer (11/14).  
Ex: ANA Signature (Heritage, 3/2007), lot 1230. NGC ID# 2543, PCGS# 97115

**5909 1880-O Checkmark, VAM-21, Hot 50, MS64 PCGS.** A Hot 50 Variety. The 880 in the date is lightly repunched and there is a distinctive die crack on Liberty's eye. Emanating luster and sharply defined devices characterize this Choice New Orleans dollar. The surfaces are entirely untuned and minimally marked for the grade. Population: 6 in 64, 0 finer (12/14).  
Ex: ANA Signature (Heritage, 3/2008), lot 932. PCGS# 133987 Base PCGS# 7114

**5910 1880-S MS67 PCGS.** Medium S. Remarkable bands of cherry-red, lemon-gold, jade-green, and powder-blue illuminate the right obverse. The right reverse margin has slender but nonetheless attractive arcs of golden-tan, ice-blue, and lilac-red. NGC ID# 2544, PCGS# 7118

**1880-S Silver Dollar, MS68  
Eye-Catching Radiance**

**5911 1880-S MS68 NGC.** Large S mintmark. Dazzling, frost-white mint bloom cartwheels uninterrupted around each side of this high-end type coin. The eye appeal is superb and, save for a touch of weakness on the hair immediately above Liberty's ear, the strike is complete. NGC has encapsulated only five numerically finer representatives (12/14). NGC ID# 2544, PCGS# 7118

**1880-S Silver Dollar, MS68  
Captivating Brilliance**

**5912 1880-S MS68 NGC.** The epitome of perfection for the type collector, this MS68-certified 1880-S Morgan dollar is a visually spectacular and technical supreme blazer. Semiprooflike mirroring in the fields and thickly frosted devices are devoid of toning, while the strike is razor-sharp and surface imperfections are virtually nonexistent. NGC has seen just five numerically finer examples of this available San Francisco issue (12/14). NGC ID# 2544, PCGS# 7118

**1880-S Dollar, MS67+ Prooflike  
Incredible Field-Motif Contrast**

**5913 1880-S MS67+ Prooflike PCGS. CAC.** The eye appeal of this high-end Superb Gem is seemingly unrivaled; both sides are devoid of toning, with sharp, heavily frosted devices and carefully preserved surfaces. The obverse fields showcase a profound depth of mirroring and deliver bold white-on-black contrast, though the reverse fields, while reflective, are not quite deep enough to warrant a Deep Mirror Prooflike designation from PCGS. The coin is truly marvelous to behold, sure to impress the most discerning collector. PCGS has certified only 20 numerically finer Prooflike representatives (11/14). NGC ID# 2544, PCGS# 7119

**1880-S Morgan Dollar, MS68  
Magnificent Deep Mirror Prooflike Specimen**

- 5914 1880-S MS68 Deep Mirror Prooflike NGC.** The 1880-S Morgan dollar enjoyed a generous mintage of 8.9 million pieces, and the issue was quite well-produced. The 1880-S was well-represented in the Treasury releases of the 1960s and the typical example seen today is sharply struck and brightly lustrous, with strong eye appeal. As a result, the 1880-S is always in demand from mintmark type collectors.

All that being said, this magnificent MS68 example stands out as one of the finest examples extant of this remarkably high-quality issue. Razor-sharp definition is evident on all design elements, and the devices have a rich coat of mint frost that creates bold cameo contrast with the deeply reflective prooflike fields. The brilliant surfaces are virtually pristine and visual appeal is incredible. Census: 3 in 68 (1 in 68 ★) Deep Mirror Prooflike, 0 finer (11/14). NGC ID# 2544, PCGS# 97119

- 5915 1880/79-S Medium S, VAM-8, MS67 PCGS. CAC.** A Top 100 Variety. Die fill in the upper loop of the second 8 suggests remnants of a crossbar of a 7. Deep forest-green, lavender, and golden-brown encompass the obverse. The reverse is brilliant. Lustrous, fully struck, and magnificently preserved. PCGS# 133886 Base PCGS# 7120

- 5916 1880/79-S Medium S, VAM-8, MS65 Deep Mirror Prooflike PCGS.** A Top 100 Variety. The remnant of an underlying 7 is seen within the upper loop of the second 8 in the date, and the remaining three numerals are very lightly recut. This is a seldom seen Deep Mirror Prooflike example, showing noticeable cameo contrast and brilliant, vibrant luster. The strike is sharp, and only a few small ticks on the cheek limit the technical grade. PCGS# 41502 Base PCGS# 97121

- 5917 1880/9-S VAM-11 MS67 PCGS. CAC.** A Hot 50 Variety. Parallel die lines within the upper half of the 0 in the date suggest an underdigit, although the overdate status is contested. A lightly toned and thoroughly lustrous Superb Gem. Well struck and exceptionally free from contact. PCGS# 133988 Base PCGS# 7122

- 5918 1881 MS65 Prooflike NGC.** A surprisingly scarce issue in Prooflike condition, considering its high mintage in excess of 9 million coins. This is a fully struck representative with frosty white devices and deep reflectivity seen in the icy-gray fields. A few inoffensive, minor abrasions are observed on each side. Census: 9 in 65 Prooflike, 1 finer (11/14). NGC ID# 2546, PCGS# 7125

**1881 Dollar, White MS65 Deep Mirror Prooflike**

- 5919 1881 MS65 Deep Mirror Prooflike NGC.** This gorgeous Gem is stark white in color and boldly frosted on the devices which leads to noticeable contrast over both sides. Detail is apparent in the hair over Liberty's ear and on the eagle's breast. No significant marks mar the surfaces. Strong eye appeal and excellent quality for a prooflike issue. Census: 12 in 65 Deep Mirror Prooflike, 0 finer (11/14). Ex: ANA Signature (Heritage, 7/2005), lot 6749. NGC ID# 2546, PCGS# 97125

- 5920 1881-CC MS66 PCGS.** A visually pleasing Premium Gem with lovely apple-green, sky-blue, red, and deep purple toning over the obverse. The reverse is brilliant, frosty, and virtually mark-free. A fully struck and impressive example of this popular Carson City issue. NGC ID# 2547, PCGS# 7126

**1881-CC Dollar, Lustrous MS67  
A Low-Mintage Issue**

- 5921 1881-CC MS67 NGC.** The 1881-CC dollar is a very desirable issue owing to its low mintage of 296,000 pieces and the popular Carson City mintmark. Ebullient luster emanates from the untuned surfaces of this Superb Gem. The design elements are sharply struck, including the hair above Liberty's ear and the eagle's breast feathers. Occasional grazes on Liberty's face and neck are inconsequential. NGC has seen only four specimens finer (11/14). NGC ID# 2547, PCGS# 7126

**1881-CC Morgan, MS67  
Pristine Surfaces**

- 5922 1881-CC MS67 PCGS.** The year 1881 featured the second-lowest mintage of Carson City silver dollars in the series, and the present coin is one of the best preserved of that emission. Satiny, white surfaces admit only the most trivial blemishes, most notably along Liberty's neckline and above the eye. There is a depression in the right cotton boll, hidden within Liberty's hair. The reverse of this Superb Gem is similarly unmarked, with scattered lines above the eagle's head and among the breast feathers. PCGS and NGC combined grade only 14 finer, 6 in MS67+ and 8 in MS68 (12/14). NGC ID# 2547, PCGS# 7126

**1881-CC Morgan Dollar, MS67  
Smooth, Frosted Surfaces**

- 5923 1881-CC MS67 PCGS.** Unbroken surfaces glisten on this Superb Gem. Liberty exhibits a clean cheek, and the strike fully details the plumage at the cap. Only the most occasional chatter disturbs the unblemished fields, particularly around the U in UNITED. Both sides are untoned except for an obverse area touching the right cotton blossom. The combination of near-perfect condition and the CC mintmark make this an especially desirable silver dollar. PCGS grades only 10 examples higher, 6 in MS67+ and 4 in MS68 (12/14). NGC ID# 2547, PCGS# 7126

**1881-CC Dollar, MS66+ Prooflike  
Tied for Finest Prooflike Example at PCGS**

- 5924 1881-CC MS66+ Prooflike PCGS.** CAC. An available Carson City issue, due to nearly half of the original mintage being dispersed through the GSA sales of the early 1970s. Prooflike examples, however, remain elusive in the finer Mint State grades. This high-end Premium Gem exhibits heavily frosted, sharply struck devices set against brilliant, mirrored fields. A few minute ticks preclude an even finer grade, though this piece's status as one of the two finest Prooflike examples certified at PCGS is unchallenged. Population: 36 in 66 (2 in 66+) Prooflike, 0 finer (11/14). NGC ID# 2547, PCGS# 7127

- 5925 1881-S MS67 PCGS.** CAC. An elaborate array of multicolored iridescence decorates the obverse of this impressive type coin. The reverse is mostly brilliant, save for golden peripheral toning, and both sides are highly lustrous, well-preserved, and distraction-free. NGC ID# 2549, PCGS# 7130

- 5926 1881-S MS67+ PCGS.** CAC. The obverse of this Superb Gem exhibits intense gold, violet, and lime toning on the obverse, with mostly brilliant silver luster on the reverse, framed by delicate gold. An impressive example for the toning enthusiast. NGC ID# 2549, PCGS# 7130

**1881-S Dollar, Outstanding MS68**

- 5927 1881-S MS68 NGC.** CAC. The 1881-S is the commonest Mint State Morgan dollar of the 1878-1904 era. That said, near-pristine examples such as this occur only infrequently. Stunning luster endows the untuned surfaces and the design elements are sharply defined. An immaculately preserved specimen with outstanding eye appeal, and well deserving of CAC endorsement. Ex: ANA Signature (Heritage, 3/2010), lot 1372. NGC ID# 2549, PCGS# 7130

- 5928 1881-S MS66 Deep Mirror Prooflike PCGS.** This impressive Premium Gem Morgan dollar is a coin of exceptional quality, with sharply detailed design elements and deeply reflective fields on both sides. The surfaces show only minor contact marks and yield outstanding eye appeal. Housed in a green label holder. Population: 74 in 66 (1 in 66+) Deep Mirror Prooflike, 7 finer (12/14). NGC ID# 2549, PCGS# 97131

- 5929 1882 MS66 PCGS.** CAC. This brilliant Premium Gem displays untuned surfaces and frosty silver luster. Both sides exhibit a bold strike including nearly full hair detail over Liberty's ear. PCGS has only certified eight numerically finer examples (12/14). NGC ID# 254A, PCGS# 7132

**1882-CC Silver Dollar, MS67  
Striking Mint Bloom**

- 5930 1882-CC MS67 PCGS.** In the absolute sense, the 1882-CC Morgan dollar is an available date, due to large numbers being represented in the GSA sales of the early 1970s, but the certified population declines significantly at the MS67 grade level, and only one numerically finer coin is certified. This example showcases thickly frosted mint brilliance, with vibrant cartwheel effect that yields superior preservation on both sides. The strike is sharp and the visual appeal is outstanding. Population: 70 in 67 (2 in 67+), 1 finer (11/14). NGC ID# 254B, PCGS# 7134

---

**1882-CC Dollar, Sharply Struck MS67  
Modest Field-Motif Contrast**

- 5931 1882-CC MS67 NGC.** Thousands of Mint State 1882-CC dollars have been certified through Premium Gem, but NGC and PCGS have graded only about 140 pieces as MS67, and the latter service has seen a solitary MS68 (11/14). Modest field-motif contrast is apparent when the present offering is rotated under a light source. The design elements are sharply struck and neither side reveals mentionable abrasions. NGC ID# 254B, PCGS# 7134

---

**1882-CC Dollar, MS67  
Superior Strike**

- 5932 1882-CC MS67 NGC.** The strike is full even over the ear on this silver-white Superb Gem, a frosty example of one of the best-produced Carson City Morgan dollars. The face of Liberty exhibits only a couple of minute abrasions, and the reverse is virtually blemish-free. Census: 58 in 67 (1 in 67+, 4 in 67 ★), 0 finer (12/14). Ex. *September Long Beach Signature (Heritage, 9/2011)*, lot 3609. NGC ID# 254B, PCGS# 7134

- 5933 1882-CC MS65 Deep Mirror Prooflike PCGS.** This sensational Carson City dollar is atypical, having fully and deeply mirrored fields rather than the frosty luster of most GSA hoard coins. Both sides are brilliant and untuned with exceptional aesthetic appeal. PCGS has certified only 71 finer examples with the DMPL designation (12/14). NGC ID# 254B, PCGS# 97135

- 5934 1882-CC MS65 Deep Mirror Prooflike PCGS.** A flashy, radiant, deeply contrasted Gem of this popular Carson City issue. A few minor reeding marks appear on Liberty's cheek and neck consistent with the grade, but this piece boasts lots of eye appeal and will find a ready home in a nice set of Deep Mirror Prooflike dollars. NGC ID# 254B, PCGS# 97135

- 5935 1882-O/S Recessed, VAM-4, MS64 PCGS.** A Top 100 Variety. An appealing example with reddish-gray and sky-blue toning over lustrous, well-preserved surfaces. Scattered marks are consistent with the grade. PCGS# 133891 Base PCGS# 7138

- 5936 1882-O/S Recessed, VAM-4, MS64 PCGS.** A Top 100 Variety. The eagle is heavily rusted on this variety, showing the crossbar of an underlying S within the primary O mintmark on the reverse. This is the most plentiful of the O Over S VAMs, but it is still elusive in the finer Mint State grades. This Choice example is lightly toned golden with satiny underlying luster. The hair above Liberty's ear is slightly soft, but the surfaces are unusually clean for the grade. PCGS# 133891 Base PCGS# 7138

- 5937 1882-O/S Recessed, VAM-4, MS64 NGC.** A Top 100 Variety. The crossbar of the underlying S is plainly evident with the lower part of the primary O mintmark. This Choice example is well-struck, with vibrant luster illuminating vivid amber-orange and aquamarine hues on the obverse, and a light golden tone on the reverse. No significant abrasions are observed. PCGS# 133891 Base PCGS# 7138

---

**1882-S Dollar, Vibrant MS68**

- 5938 1882-S MS68 NGC.** Tens of thousands of 1882-S dollars are available in Mint State through MS67. The population declines in MS68, where NGC and PCGS have certified 150 or so and none finer (11/14). Vibrant luster issues from untuned surfaces that have been immaculately preserved. The design elements are well-struck. NGC ID# 254F, PCGS# 7140

---

**1882-S Dollar, MS68  
Outstanding Eye Appeal**

- 5939 1882-S MS68 NGC.** The 1882-S is one of the better-produced Morgan dollars, with crisply struck design elements and radiant luster. This MS68 specimen is certainly no exception. Moreover, its silver-white surfaces are remarkably smooth. The foregoing attributes add up to outstanding eye appeal. NGC ID# 254F, PCGS# 7140

---

**1882-S Morgan Dollar, MS65  
Deep Mirror Prooflike**

- 5940 1882-S MS65 Deep Mirror Prooflike PCGS.** This impressive Gem has deeply mirrored fields and satiny devices that combine to display wonderful cameo contrast. Both sides are highly lustrous, with speckled gold toning on the obverse. Population: 34 in 65 Deep Mirror Prooflike, 8 finer (12/14). NGC ID# 254F, PCGS# 97141

**5941 1882-S MS65+ Deep Mirror Prooflike NGC.** 1882-S Morgan dollars are readily available, even in prooflike finish. Deep Mirror Prooflike coins are elusive, however, especially in Gem condition. This untoned MS65+ DPL displays sharply struck devices and is minimally abraded. Census: 71 in 65 (1 in 65+) Deep Mirror Prooflike, 8 finer (12/14). NGC ID# 254F, PCGS# 97141

**1883 Silver Dollar, MS67  
Bold Obverse Coloration**

**5942 1883 MS67 PCGS.** The reverse of this beautifully preserved Superb Gem representative is largely untoned, save for a pale golden glow around the peripheries, but the obverse is more vividly colored in areas of champagne, violet, and pine-green. The strike is sharp and the eye appeal is simply exceptional. Only three coins are certified numerically finer at PCGS (12/14). NGC ID# 254G, PCGS# 7142

**1883 Morgan Dollar, MS67  
Bold Obverse Toning**

**5943 1883 MS67 PCGS. CAC.** While the 1883 Morgan dollar has a mintage of almost 12.3 million pieces, it is scarce in Superb Gem and extremely rare any finer. This MS67 beauty is boldly toned peach, sea-green, blue, and violet on the obverse with a pure silver reverse that showcases cartwheel luster. PCGS has graded just three pieces as MS68 or better (11/14). NGC ID# 254G, PCGS# 7142

**1883 Morgan Dollar, MS67  
Extremely Rare Any Finer**

**5944 1883 MS67 PCGS. CAC.** The 1883 is one of the few Philadelphia Morgan dollar issues to be available for a price in Superb Gem, though it is borderline scarce and anything finer is distinctly rare. This CAC green label MS67 example has a broadly silver obverse with frost and cartwheels, while the reverse has a significant green-gold cast, particularly in an arc at the top. NGC ID# 254G, PCGS# 7142

**5945 1883 MS65 Deep Mirror Prooflike PCGS.** Heavily frosted devices and correspondingly bold cameo contrast give this deeply mirrored Gem incredible visual appeal. Moderate die rust is observed on the eagle's feathers, though both sides are distinctly sharp throughout. Only nine Deep Mirror Prooflike coins are numerically finer at PCGS (12/14). NGC ID# 254G, PCGS# 97143

**1883 Dollar, MS66 Deep Prooflike  
Pleasing Field-Motif Contrast**

**5946 1883 MS66 Deep Prooflike NGC.** For many collectors, the Deep Prooflike examples are the finest-known representatives of any issue in the Morgan dollar series, and the present coin is tied with just seven others as the finest 1883 Deep Prooflike Morgan certified by NGC (12/14). The sharp, frosty devices contrast boldly with the mirrored fields, while just a touch of light golden color warms each side. A few faint disruptions in the obverse fields are all that limit the grade. NGC ID# 254G, PCGS# 97143

**5947 1883-CC MS66+ ★ NGC. CAC.** Incredible waves of rainbow patina cross the obverse, while the reverse is a subtly rim-toned beauty on its own. Both sides show intense luster and exceptional eye appeal, duly called out by NGC's Star designation. One noticeable nick at Liberty's cheekbone is grade-consistent. NGC ID# 254H, PCGS# 7144

**1883-CC Silver Dollar, MS67  
Superb Luster and Eye Appeal**

**5948 1883-CC MS67 PCGS. CAC.** A few dashes of golden toning visit the reverse of this exceptional Carson City silver dollar, while the remainder of each side is frosty and brilliant. The surfaces are smooth and virtually unblemished. Boldly struck and fully lustrous. Housed in an old green label holder. Population: 187 in 67 (9 in 67+), 5 finer (12/14).

*Ex: Central States Signature (Heritage, 5/2005), lot 9549; Long Beach Signature (Heritage, 2/2006), lot 1939; Central States Signature (Heritage, 4/2006), lot 3372. NGC ID# 254H, PCGS# 7144*

**5949 1883-CC MS66 Deep Mirror Prooflike PCGS.** Liberty's cheek is free of all but the tiniest marks, and the untuned silver-white surfaces overall show good preservation to complement the deeply mirrored fields and top-notch eye appeal. A Deep Mirror Prooflike example of this issue in higher numerical grades is a rare bird indeed. NGC ID# 254H, PCGS# 97145

**1883-CC Morgan Dollar, MS67 ★  
VAM-3, Dash Under 8 Variety**

- 5950 1883-CC MS67 ★ NGC. VAM-3, R.3.** The VAM-3 exhibits slight doubling at the upper portion of the lower loop in the first 8, and a dash below the second 8. Die polish just above the ear, and within the CC mintmark, further characterizes the variety. Apart from the VAM attribution this is a Superb, untoned Gem with immaculate fields and sharp devices. NGC lists no higher graded examples, while PCGS has nine at MS67+ and five at MS68 (12/14). PCGS# 42156 Base PCGS# 7144

**1883-O Dollar, Vibrant MS67  
Elusive at This Level**

- 5951 1883-O MS67 NGC.** The 1883-O Morgan comes from a plentiful mintage approaching 9 million pieces and has a high survival rate, evidenced by the thousands of coins certified through Premium Gem. This issue is elusive in MS67, where the population declines to a little more than 80 specimens and none finer (11/14). Vibrant luster emanates from the smooth silver-white surfaces of this Superb Gem. The centers are softly struck as often seen on this issue. NGC ID# 254J, PCGS# 7146

**1883-S Dollar, MS63  
Largely Unsaved Issue**

- 5952 1883-S MS63 PCGS.** Though the 1883-S dollar is an inexpensive coin in moderately worn condition, even at the AU level it surpasses the 1883-CC for the most expensive mintmark of its year. This Select example has generally silver surfaces with only a few pale patches of cloudy patina and hints of gold along the margins. Small, scattered abrasions are grade-consistent. From The Rawlin "Mac" McInelly Collection. NGC ID# 254K, PCGS# 7148

**1883-S Dollar, Select Mint State  
Scarce San Francisco Issue**

- 5953 1883-S MS63 PCGS. Q. David Bowers (1993)** notes that the 1883-S Morgan dollar "... is very scarce in lower Mint State levels. Probably about 10,000 to 20,000 are on the face of the earth, some of which may really be in the AU or 'slider' category." This Select Uncirculated piece offers coruscating luster and just a wisp of light color at the margins. Sharply struck with a surprisingly clean reverse. Ex: ANA Signature (Heritage, 3/2007), lot 1269. NGC ID# 254K, PCGS# 7148

**1883-S Silver Dollar, MS64+  
Beautifully Toned on Both Sides**

- 5954 1883-S MS64+ PCGS. CAC.** The 1883-S is scarce enough in Mint State in general that AU examples bring substantial premiums over common dates. Of those Mint State pieces that do survive, Choice examples are about as fine as are typically available, as higher-grade examples are decidedly rare. This Plus-designated MS64 coin is well-struck, with frosty luster and minimally abraded surfaces. Tinges of mint-green and lemon-gold around the peripheries attractively accent luminescent lavender and powder-blue hues in the centers. PCGS has only encapsulated 18 numerically finer examples (12/14). NGC ID# 254K, PCGS# 7148

- 5955 1884 MS65 PCGS.** Blazing luster issues from both sides of this lovely Gem, each of which exhibits sharply struck design elements. Medium-intensity multicolored toning cedes to a brilliant reverse. NGC ID# 254L, PCGS# 7150

- 5956 1884 MS66 PCGS. CAC.** Deep multicolored patination occupies the obverse of this sharply struck Gem. The lustrous surfaces on both sides are impeccably well preserved. The certified population of 1884 Morgans declines noticeably at the MS66 level. NGC ID# 254L, PCGS# 7150

- 5957 1884 MS66+ PCGS. CAC.** The 14 million-coin mintage for the 1884 silver dollars today translates into most certified survivors averaging only MS63 or a tad better. Premium Gems are elusive. This example is untuned on both sides with blatant cartwheel luster and excellent preservation, visible throughout Liberty's cheek, although one mark on the eagle's breast is grade-consistent. Population: 48 in 66+, 48 finer (12/14). NGC ID# 254L, PCGS# 7150

---

### 1884 Dollar, Conditionally Elusive MS67

- 5958 1884 MS67 NGC.** The original mintage exceeding 14 million pieces helps to make the 1884 dollar a readily available issue in mint condition, except that MS67s such as the present offering are very elusive. Indeed, NGC and PCGS have certified only 80 specimens at this level and five examples finer. Impeccably preserved silvery surfaces exhibit strong luster and sharply struck design elements. Census: 36 in 67 (3 in 67 ★), 2 finer (11/14). NGC ID# 254L, PCGS# 7150

---

### 1884 Silver Dollar, Frosty MS67 Two Finer at NGC, Three at PCGS

- 5959 1884 MS67 NGC.** The frosty silver-white surfaces show both a sharp strike over the ear of Liberty and throughout, as well as excellent preservation on her clean cheek and the eagle's breast on reverse, putting this piece into the small minority of Superb Gems for the issue. Even though more than 14 million pieces were struck for circulation, NGC reports only 36 in MS67 with two finer (12/14). PCGS shows similar populations. NGC ID# 254L, PCGS# 7150

---

### 1884-CC Dollar, Remarkable MS67+

- 5960 1884-CC MS67+ NGC.** Tens of thousands of Uncirculated 1884-CC Morgan dollars have been certified through Premium Gem by NGC and PCGS. The population declines precipitously in MS67, but even these can be had with diligent searching. The present offering is one of the nine high-end Superb Gems graded by NGC (11/14). Lustrous surfaces are remarkably well-preserved. NGC ID# 254M, PCGS# 7152

- 5961 1884-CC MS65 Deep Mirror Prooflike PCGS. CAC. VAM-7.** The 18 in the date is noticeably repunched at the bases. This VAM variety is easily confirmed by a small, horizontal die gouge behind Liberty's eye. The eagle is moderately rusted on the reverse. This example is fully mirrored in the fields and frost-white over the devices, delivering stark cameo contrast. The strike is sharp and only a few minute ticks preclude an even finer numeric grade. An immensely appealing, brilliant Carson City dollar. NGC ID# 254M, PCGS# 97153

- 5962 1884-CC MS66 Deep Mirror Prooflike NGC.** Relatively strong contrast is apparent on this MS66 Deep Mirror Prooflike Carson City representative. Untoned surfaces exhibit strong detail on the design elements, and both sides reveal just a few light grazes. Census: 52 in 66 (1 in 66+ Deep Mirror Prooflike, 3 in 66 ★) NGC ID# 254M, PCGS# 97153

- 5963 1884-O MS67 PCGS.** This gorgeous Superb Gem exhibits creamy white luster with excellent design definition over the eagle and on the eagle's breast. Both sides are brilliant and untoned. Population: 99 in 67, 1 finer (12/14). NGC ID# 254N, PCGS# 7154

- 5964 1884-O MS67 NGC.** This Superb Gem displays radiantly lustrous surfaces that have just a few speckles of light gray that show up under magnification. The design features are generally well-struck, with a modicum of detail in the centers. The 1884-O is scarce at this level and exceedingly rare any finer. NGC ID# 254N, PCGS# 7154

- 5965 1884-O MS67 NGC.** MS67 is the finest numerical grade that is likely to be encountered of this date as the two major services have certified a mere two examples finer (12/14). Untoned lustrous surfaces are nearly flawless. NGC ID# 254N, PCGS# 7154

- 5966 1884-S AU58 NGC.** This near-Mint dollar is well-struck, except for the hair detail above the ear, with relatively clean surfaces and mere traces of high-point friction. Both sides display mottled orange-gold patina, chiefly near the borders, and a reddish-gray patch covers the eagle's breast. NGC ID# 254P, PCGS# 7156

- 5967 1884-S AU58 NGC.** This a boldly detailed representative with lightly toned surfaces and a remarkably clean cheek. Substantial mint frost and minimal high-point friction make this piece seem close to Mint State. A single noteworthy abrasion is evident on the eagle's breast. NGC ID# 254P, PCGS# 7156

- 5968 1884-S AU58 PCGS.** The sharply detailed design elements of this attractive near-Mint specimen show just a trace of wear on the high points and the lustrous surfaces display only minor signs of contact. The obverse features vivid orange-green toning, while the reverse remains essentially brilliant. NGC ID# 254P, PCGS# 7156

- 5969 1884-S AU58 PCGS. CAC.** This example is brilliant and still shows considerable mint frost on both sides. The strike definition is somewhat weak across the centers, and minor high-point friction confirms the near-Mint grade assessment. NGC ID# 254P, PCGS# 7156

- 5970 1884-S AU58 PCGS. CAC.** The 1884-S Morgan dollar circulated heavily in the regional economy at the time of issue and the date is quite elusive in high grade. This attractive near-Mint example shows just a trace of wear on the sharply detailed design elements and the lustrous brilliant surfaces show a scattering of minor contact marks, mostly on the obverse. NGC ID# 254P, PCGS# 7156

---

### 1884-S Dollar, MS60 Intact Mint Luster

- 5971 1884-S MS60 NGC.** Unlike the heavily minted and heavily saved San Francisco issues that started the Morgan dollar series, the 1884-S is genuinely challenging in Mint State. While this lustrous piece has a number of grade-defining faults, it is unworn with modest patina and fully intact luster. NGC ID# 254P, PCGS# 7156

**1885 Morgan, MS66 Deep Mirror Prooflike  
Eye-Catching Contrast**

**5972 1885 MS66 Deep Mirror Prooflike PCGS Secure. CAC.** High-grade Deep Mirror Prooflike examples form a distinct minority within this otherwise available Philadelphia issue. This Premium Gem example is starkly contrasted, with glassy-black fields and heavily frosted, sharp design elements. A hint of light golden color blankets each side, and there are only a couple faint grazes on Liberty's cheek to limit the grade. Population: 80 in 66 (3 in 66+) Deep Mirror Prooflike, 1 finer (12/14). NGC ID# 254R, PCGS# 97159

**5973 1885-CC MS66 PCGS. VAM-2A.** A small dash under the second 8 in the date and light clashing near Liberty's neck identify this variety. This example is frosty and brilliant, with vibrant luster and delicately preserved surfaces. A touch of incompleteness is noted on the hair immediately above Liberty's ear, but the strike is otherwise sharp. PCGS has encapsulated 66 numerically finer examples of this date (12/14). NGC ID# 254S, PCGS# 7160

**5974 1885-CC MS66 PCGS.** Light frost graces the highpoints of this pretty Premium Gem, practically untuned with pleasing detail. Close inspection reveals more luster breaks than tiny marks on the surfaces. PCGS has only certified 66 finer examples of this Nevada issue (12/14). NGC ID# 254S, PCGS# 7160

**5975 1885-CC MS66 PCGS.** Splashes of yellow-gold color visit the obverse of this lustrous Premium Gem. A few light grazes are visible on the well-struck surfaces. NGC ID# 254S, PCGS# 7160

**5976 1885-CC MS66 PCGS.** Occasional wisps of soft gold color show up on this Premium Gem, more so on the reverse. Nice definition is apparent in most of the hair above Liberty's ear and the eagle's breast. A popular CC-mint issue. NGC ID# 254S, PCGS# 7160

**5977 1885-CC MS66+ PCGS.** Radiant luster exudes from the color-free surfaces of this high-end Premium Gem. A few minor grazes are visible on the chin and neck. NGC ID# 254S, PCGS# 7160

**1885-CC Dollar, MS66 Deep Prooflike  
Elusive in This Grade Level**

**5978 1885-CC MS66 Deep Prooflike NGC.** Most of the small original mintage of 228,000 Carson City Morgan dollars of 1885 survived in Treasury vaults, resulting in the issue being readily available through Premium Gem. Deep Prooflike examples in this numerical grade are very elusive, however. The mirrored fields highlight the sharply struck frosty devices on this untuned specimen. Both sides are impeccably preserved. Census: 19 in 66 Deep Mirror Prooflike, 1 finer (11/14). NGC ID# 254S, PCGS# 97161

**1885-CC Morgan Dollar, MS66+  
Spectacular Deep Mirror Prooflike Specimen**

**5979 1885-CC MS66+ Deep Mirror Prooflike PCGS. CAC.** The 1885-CC Morgan dollar is a tremendously popular issue, due to the hundreds of thousands of nice Mint State coins that appeared in the various Treasury and GSA disbursal's of decades past. Even so, a coin such as this MS66+ Deep Mirror Prooflike example will make even jaded collectors take notice. The frosty devices are sharply detailed and display profound contrast and intense cameo flash. There are few contact marks or hairlines, as expected, and delicate hints of light gold toning appear here and there. Strong eye appeal is this coin's trump card. Population: 45 in 66 (5 in 66+) Deep Mirror Prooflike, 2 finer (11/14). NGC ID# 254S, PCGS# 97161

**5980 1885-O MS67 PCGS. CAC.** Here is one of many condition rarities in the Morgan dollar series. Despite a mintage of more than 9 million coins, and a population exceeding 160,000 PCGS-certified coins, few have earned the Superb Gem grade, and PCGS has only graded one finer (12/14). This impressive piece has brilliant and frosty silver luster, bold design motifs, and untuned obverse and reverse surfaces. NGC ID# 254T, PCGS# 7162

**5981 1885-O MS66 Deep Mirror Prooflike NGC.** The 1885-O Morgan dollar, sporting a mintage approaching 10 million pieces, is a readily available issue. Deep Mirror Prooflike examples in Premium Gem are another matter entirely. The two services have graded 71 such specimens and a mere two finer. Frosty, sharply struck devices are highlighted by the deep mirrored fields. Both surfaces are very well preserved. Census: 23 in 66 Deep Mirror Prooflike, 1 finer (12/14). NGC ID# 254T, PCGS# 97163

**5982 1885-S MS65 PCGS.** Only a whisper of green-gold toning visits this lustrous and nicely struck Gem. Close to pristine except for a single "mustache" reed mark above the lip. Certified in a green label holder.  
*Ex: Milwaukee Shore Collection (Heritage, 5/2005), lot 9280. NGC ID# 254U, PCGS# 7164*

**5983 1885-S MS65+ PCGS.** The 1885-S is infrequently encountered in higher Mint State grades. In fact, PCGS has only certified 41 submissions that are finer than this brilliant and lustrous Gem. The satiny white surfaces exhibit delicate gold toning on the obverse, and heavy iridescent toning across the entire reverse. PCGS has graded just 41 numerically finer submissions (12/14). NGC ID# 254U, PCGS# 7164

---

**1886 Morgan Dollar, MS68  
Exceptional Surfaces**

**5984 1886 MS68 NGC.** A splendidly smooth and fully struck stone-white silver type coin. The dies were long in use, and provide an orange-peel texture in the fields, as produced. Extended coinage from the die pair has also caused some softness on the breast feathers, as made. The present piece was presumably once the top coin in a sealed bag of silver dollars, likely opened in the 20th century, decades after production. Census: 28 in 68 (3 in 68+, 2 in 68 ★), 0 finer (12/14).  
*Ex: Summer FUN Signature (Heritage, 7/2011), lot 4047. NGC ID# 254V, PCGS# 7166*

---

**1886 Morgan, MS66 Deep Mirror Prooflike  
Tied for Numerically Finest at PCGS**

**5985 1886 MS66 Deep Mirror Prooflike PCGS.** The silver-white surfaces show scant evidence of other color, but abundant contrast on each side between the thickly frosted devices and the radiant fields makes this a standout example, one of a small company in this grade. Each side is well-struck and free of major abrasions. Population: 32 in 66 (1 in 66+) Deep Mirror Prooflike, 0 finer (10/14). NGC ID# 254V, PCGS# 97167

**5986 1886-O MS62 PCGS Secure.** Lustrous and well struck with essentially brilliant surfaces that reveal a slight degree of golden color on each side. This example shows a few scattered marks, but these are certainly not excessive for the grade. The 1886-O is a slightly scarcer New Orleans issue in Mint State. NGC ID# 254W, PCGS# 7168

---

**1886-O Dollar, MS63  
Conditionally Elusive O-Mint Morgan**

**5987 1886-O MS63 PCGS. CAC.** A challenging date in Mint State, and scarce above the MS63 grade level. This is a satiny, well-struck Select example, showing uniform golden-gray toning over each side, with minimally abraded underlying surfaces. This issue owes much of its high-grade scarcity to the fact that large numbers were paid out into circulation in final years of the 19th century, but quantities were also melted under the terms of the Pittman Act of 1918. NGC ID# 254W, PCGS# 7168

---

**1886-O Dollar, MS64  
Prohibitively Rare Any Finer**

**5988 1886-O MS64 PCGS.** Due to the extreme rarity of Gem or finer pieces, MS64 coins are typically the finest examples of the 1886-O Morgan dollar that are available. This representative is unusually well-struck for an O-mint issue, with frosty cartwheel luster shining through a veil of warm golden toning. No major abrasions are present, and only a few small marks on Liberty's cheek appear to preclude a full Gem grade assessment. PCGS has only certified three numerically finer pieces (12/14). NGC ID# 254W, PCGS# 7168

---

**1886-O Dollar, MS62 Prooflike  
Seldom Seen This Deeply Mirrored**

**5989 1886-O MS62 Prooflike PCGS. CAC.** A particularly challenging issue to locate with prooflike qualities, as the typical example is poorly struck with rather insipid luster. This piece is above-average in regards to sharpness, with frosty devices delivering subtle contrast with the mirrored fields. Light, scattered abrasions contribute to the grade. Population: 3 in 62 Prooflike, 3 finer (11/14). NGC ID# 254W, PCGS# 7169

**1886-O Dollar, MS62 Deep Mirror Prooflike  
Rare With Field-Motif Contrast**

**5990 1886-O MS62 Deep Mirror Prooflike PCGS. CAC.** The 1886-O Morgan dollar was released into circulation in large quantities closely following its issuance, and large numbers were also melted under the terms of the Pittman Act of 1918. As a result, circulated pieces are fairly plentiful, but Mint State coins become increasingly elusive in succeeding grades. The typical piece is rather dull and poorly struck, a common characteristic of New Orleans issues from this period, and coins with any degree of prooflike mirroring are notable rarities, regardless of grade. This example is an outstanding piece in regards to luster, showing frosty devices that provide subtle contrast with the deeply mirrored fields. The eagle's talons show a touch of the usual softness, though the strike is nonetheless above-average. Light, scattered abrasions define the grade, but none are individually detracting. A tinge of light golden color warms each side. Population: 6 in 62 Deep Mirror Prooflike, 5 finer (11/14). NGC ID# 254W, PCGS# 97169

**5991 1886-S MS65 PCGS.** This amazing Gem S-Mint Morgan dollar has reflective, lightly mirrored fields beneath dappled gold and iridescent toning over its brilliant silver surfaces. Although undesignated, this is a borderline Prooflike example. PCGS has only certified 55 finer examples of this issue. NGC ID# 254X, PCGS# 7170

**1887 Silver Dollar, MS66  
Brilliant Deep Mirror Prooflike Example**

**5992 1887 MS66 Deep Mirror Prooflike PCGS.** The 1887 is an available date overall, and is only marginally elusive with Deep Mirror Prooflike qualities, but such examples surviving as fine as the MS66 grade level are scarce. This piece is boldly struck, with deeply reflective fields and subtle cameo contrast on each side. A few minute, grade-consistent ticks are revealed when rotated beneath a light, though the eye appeal remains outstanding. Population: 39 in 66 Deep Mirror Prooflike, 0 finer (11/14). NGC ID# 254Y, PCGS# 97173

**5993 1887/6 VAM-2 MS65+ PCGS.** A Top 100 Variety. The bottom curve of a 6 is clearly visible at the base of the 7 on this popular overdate variety. The present Gem has a hint of champagne toning over brilliant silver luster with lovely satin surfaces. PCGS has only certified one dozen finer examples (12/14). PCGS# 133908 Base PCGS# 7174

**1887-O Dollar, MS65  
Rare in Finer Grades**

**5994 1887-O MS65 PCGS.** A surprisingly attractive example of this New Orleans issue with delicate sapphire and amethyst jewel-tones over silver surfaces with a strong cartwheel effect. Solidly struck on the central design elements. PCGS has graded just 10 numerically finer pieces (11/14).  
*Ex: Houston Signature (Heritage, 12/2010), lot 3932. NGC ID# 2552, PCGS# 7176*

**5995 1887-O MS65 PCGS.** Both sides of this Gem yield modest field-device contrast at various angles, and soft champagne-gold color occasionally visits each. The design elements are generally well-impressed for a New Orleans date. PCGS and NGC have graded fewer than 15 pieces finer (12/14). NGC ID# 2552, PCGS# 7176

**1887-O Morgan Dollar, MS65  
Seldom Finer**

**5996 1887-O MS65 PCGS. CAC.** An impressive Gem 1887-O Morgan dollar, this example has frosty silver luster and brilliant surfaces that host faint splashes of champagne toning. The 1887-O is a condition rarity that is scarce at this grade level and quite rare in higher grades with only 10 numerically finer submissions examined by PCGS. NGC ID# 2552, PCGS# 7176

**5997 1887/6-O VAM-3 MS63 PCGS. A Top 100 Variety.** A lovely Select Mint State example, this piece is brilliant-white with a modicum of surface blemishes. The design elements are well-defined, save for a touch of weakness just above the ear. From The Rawlin "Mac" McNelly Collection. PCGS# 133912 Base PCGS# 7178

**5998 1887-S MS65 PCGS.** Lavish patina on each side includes chestnut and pale ice-blue shades amid rich cartwheel luster and a decent strike. Both Liberty's cheek and the eagle's breast are refreshingly abrasion-free. PCGS reports only 25 submissions in numerically finer grades of this better-date issue, the finest one each in MS66+ and MS67 (12/14). NGC ID# 2554, PCGS# 7180

**1887-S Morgan Dollar, MS63 Deep Mirror Prooflike  
Remarkable, Conditionally Rare Example**

**5999 1887-S MS63 Deep Mirror Prooflike PCGS.** The 1887-S is a slightly scarcer issue overall, but in Deep Mirror Prooflike condition it is rare. This example demonstrates some of the great eye appeal attributed to this date by Dave Bowers, in his *Guide Book of Morgan Silver Dollars*. The coin's strike definition is impressive, and the fields exhibit tremendous, glassy reflectivity. A small number of minor abrasions limit the numeric grade of this otherwise remarkable silver dollar. Population: 25 in 63 Deep Mirror Prooflike, 23 finer (10/14). NGC ID# 2554, PCGS# 97181

**6000 1887-S/S VAM-2 MS65 PCGS.** A Top 100 Variety. The variety is undesignated on the old green label holder, but the mintmark is obviously repunched within both loops. A flashy and brilliant Gem that boasts a bold strike and well preserved fields. Liberty's cheek is also smooth.  
Ex: Milwaukee Shore Collection (Heritage, 5/2005), lot 9286, which realized \$3,737.50. PCGS# 133915 Base PCGS# 42937

**6001 1888-O MS66 PCGS.** Round O. Faint honey toning adorns this lustrous and well preserved Premium Gem. The strike is superior for a New Orleans issue of the era, although slightly incomplete at the centers. Encapsulated in a green label holder. None are graded any finer at PCGS (11/14). NGC ID# 2556, PCGS# 7184

**6002 1888-O MS66 PCGS.** Appealing satin luster and good preservation on the high points of Liberty and the eagle make this Premium Gem among a small minority of top-grade survivors, despite the plentiful original mintage exceeding 12 million coins. Pale mint and peach hues appear at the obverse rim and reverse center, respectively. The finest of this issue at PCGS are a couple dozen MS66+ coins, as that service has yet to grade an MS67 (12/14). NGC ID# 2556, PCGS# 7184

**1888-O 'Scarface' Dollar, MS61  
Famous Morgan Variety  
VAM-1B3, Top 100**

**6003 1888-O Scarface, VAM-1B3, MS61 PCGS. CAC.** A Top 100 Variety. The *Top 100 Guide* refers to VAM-1B as "the most dramatic die break in the Morgan dollar series" and adds "Rare in all grades." Lustrous with faint green-gold toning and a soft central strike. Moderate marks on the portrait determine the grade.  
Ex: Dallas Signature (Heritage, 11/2012), lot 4244, which realized \$4,993.75. PCGS# 133918 Base PCGS# 87184

**6004 1888-S MS65 PCGS.** This is a sensational, brilliant Gem with careening mint luster and impressively preserved surfaces. Well struck throughout, save for a touch of weakness above the ear. An ideal coin for the type or date collector. NGC ID# 2557, PCGS# 7186

**1888-S Morgan, MS66  
Conditionally Scarce**

**6005 1888-S MS66 PCGS.** A well-executed strike complements radiant cartwheel luster on both sides of this brilliant, beautifully preserved Premium Gem. This San Francisco issue is scarce in Gem condition, and Premium Gems are decidedly rare; only four coins have been certified numerically finer at PCGS and NGC combined. Population: 25 in 66 (2 in 66+), 3 finer (12/14). NGC ID# 2557, PCGS# 7186

**6006 1889 MS66+ NGC.** Most of the obverse is covered in pastel patina including mint, violet, and copper-gold, save for an interesting area through the center of golden patina shaped roughly like a hockey stick. The reverse is more traditional, rim-toned in similar shades with a grayish-gold center. Lavish cartwheel luster and good high-point preservation on each side separate this piece from most of its cohort, and this piece will also be a prize for the toning enthusiasts. Census: 10 in 66+, 6 in 66 ★, 1 finer (12/14). NGC ID# 2558, PCGS# 7188

---

**1889 Morgan Dollar, MS66+  
Rarely Finer**

- 6007 1889 MS66+ PCGS. CAC.** A short die crack crosses the bust tip from the 1 to star 1, and clash marks are noted at Liberty's upper lip. The reverse has clash marks inside the wreath and over the left (facing) wing. An impressive Premium Gem, this example has brilliant and frosty silver luster. PCGS has only certified four finer examples (12/14). NGC ID# 2558, PCGS# 7188

---

**1889-CC Morgan Dollar, XF40  
Popular Collector Grade**

- 6008 1889-CC XF40 PCGS.** The key issue to the Carson City Morgan dollar series is the 1889-CC, offered here in the popular collector grade of XF40. This example has faint grayish patina on its silver surfaces with traces of luster remaining in the protected areas on each side. A pleasing example lacking visible marks. NGC ID# 2559, PCGS# 7190

---

**1889-CC Dollar, Choice XF  
Solid Circulated Example**

- 6009 1889-CC XF45 PCGS.** Unlike earlier Carson City Morgan dollar issues, the 1889-CC dollar was not well-represented in GSA holdings and is more often found in circulated grades than Mint State. This Choice XF piece remains faintly lustrous silver-blue with a streak of brownish-red down the central obverse and additional elements at the margins. NGC ID# 2559, PCGS# 7190

---

**1889-CC Dollar, Pleasing XF45  
The Rarest, Most Desirable CC-Mint Morgan**

- 6010 1889-CC XF45 PCGS.** The 1889-CC is the rarest and most desired issue among Carson City Morgan dollars, and its 350,000-piece mintage is among the lowest production figures in the Morgan dollar series. A review of PCGS/NGC population reports indicates most examples graded are in the Poor to Very Fine range. Extremely Fine and About Uncirculated pieces are very scarce in relation to the demand for them, and Mint State specimens are elusive, most often encountered between MS60 and MS63.

The light silver-gray surfaces of this Choice XF offering reveal only a few scattered, minute marks, and the design elements are well-defined despite high-point wear. This is a very nice, pleasing example of this key-date issue that will fit comfortably in a high-grade Morgan dollar collection. NGC ID# 2559, PCGS# 7190

- 6011 1889-CC — Cleaning — PCGS Genuine. AU Details.** The 1889-CC is one of the most important key dates in the Morgan dollar series. This example is sharply struck and minimally abraded. Each side displays creamy khaki-beige toning. The reverse fields show some wispy hairlines from cleaning. NGC ID# 2559, PCGS# 7190

- 6012 1889-CC — Cleaning — PCGS Genuine. AU Details.** The rarest Carson City dollar in the series, the 1889-CC Morgan is always in strong demand, regardless of grade. This is a pleasing, well-detailed example, with subtle remnants of luster illuminating dusky golden-gray toning over each side. PCGS notes evidence of old cleaning, though the faint hairlines are well-masked by the patina. NGC ID# 2559, PCGS# 7190

- 6013 1889-CC — Rim Damage — PCGS Genuine. AU Details.** A moderate rim ding, at 3 o'clock on the reverse, corresponds to the PCGS designation. A minimally toned key date Carson City Morgan that displays substantial luster on the curls, feathers, and borders. NGC ID# 2559, PCGS# 7190

---

**1889-CC Dollar, AU50  
Lightly Worn Nevada Mint Key**

- 6014 1889-CC AU50 PCGS.** Though other dates in the Carson City Morgan dollar series have lower mintages, the lack of GSA examples for the 1889-CC makes it a challenge regardless of condition. This AU50 example shows light wear over the high points but also considerable glimmering luster remains in the lightly toned fields where color appears at the margins. Abrasions are generally wispy. Housed in a green label holder. From The Rawlin "Mac" McNelly Collection. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan Dollar, AU53  
Impressive, High-End Example**

**6015 1889-CC AU53 PCGS.** This key date in the Morgan silver dollar series is a low-mintage issue of 350,000 coins. A relatively small fraction of the original number still survive, making this a highly desirable issue that is always of interest to collectors.

The current example displays creamy-beige surfaces that are remarkably clean for the grade. High-point wear over the boldly struck design motifs is no more than expected. NGC ID# 2559, PCGS# 7190

**1889-O Dollar, MS65  
Above-Average in Luster and Strike**

**6016 1889-O MS65 PCGS.** Close to 12 million Morgan dollars were struck in New Orleans in 1889. Most certified coins grade no better than Select and near-Gem because the issue typically has substandard luster and design detail. The present Gem is above-average in both of these attributes. The silvery surfaces display pleasing luster and some detail is seen on the hair over Liberty's ear and on the eagle's breast feathers. PCGS and NGC have graded only 17 pieces finer (11/14). NGC ID# 255A, PCGS# 7192

**1889-O Dollar, MS65  
Excellent Eye Appeal for the Issue**

**6017 1889-O MS65 NGC.** The lustrous surfaces of this MS65 specimen display just a whisper of soft golden-brown color clinging to the peripheral areas on both sides. A modicum of design detail is visible in the hair above Liberty's ear and on the eagle's breast, elements that are usually lightly struck, and according to Bowers (2007) are "not very satisfactory." The surfaces of each side reveal fewer marks than might be expected for an MS65. All in all, this coin has above-average eye appeal for the date. Census: 53 in 65 (1 in 65+), 7 finer (11/14). NGC ID# 255A, PCGS# 7192

**1889-O Dollar, Lustrous MS65**

**6018 1889-O MS65 PCGS.** A sliver of gold and cobalt-blue patination gravitates to the margins of this O-mint Gem leaving the remaining surfaces brilliant. Pleasing luster resides over both sides each of which is well-defined except for the typically seen weakness in the centers. This specimen has been well cared for. The two major services have graded fewer than 20 examples finer (12/14). NGC ID# 255A, PCGS# 7192

**1889-O Morgan, MS65  
Scarce in High Grades**

**6019 1889-O MS65 PCGS.** Largely untuned surfaces exhibit traces of russet at the left obverse stars, while the reverse is completely white. The obverse strike is a touch soft at the center, as is seen at the corresponding reverse point. Marks are consistent with the grade level and there are wide swaths with no blemishes. PCGS reports eight MS65+ pieces and 10 at the MS66 level. NGC ID# 255A, PCGS# 7192

**1889-O Morgan Dollar, Scarce MS65  
Originally Toned**

**6020 1889-O MS65 PCGS.** Harry Forman and others handled bag quantities of 1889-O silver dollars, but like many Morgans, collectors especially enjoy the challenging Gem examples. The obverse exhibits even color with more intense hues at the periphery. The reverse exhibits light brown color in the center, leading to green, blue and auburn about the rim. PCGS has graded only 18 coins higher, and NGC but six (12/14). NGC ID# 255A, PCGS# 7192

---

**1889-O Silver Dollar, MS65+  
Unusually Frosty, Rare Any Finer**

- 6021 1889-O MS65+ PCGS. CAC.** This New Orleans issue seldom comes well-struck, a characteristic that affects the population of high-grade survivors. This Plus-designated Gem example is free of any significant abrasions, but the usual striking softness on the hair above Liberty's ear and the eagle's breast likely limits the technical grade. A warm golden glow around the peripheries attractively accents the brilliant, frosty centers. PCGS has seen only 10 numerically finer submissions (12/14). NGC ID# 255A, PCGS# 7192

---

**1889-O Dollar, MS65 Deep Mirror Prooflike  
Modest Field-Motif Contrast  
One of the Four Finest at NGC**

- 6022 1889-O MS65 Deep Mirror Prooflike NGC.** Mint State examples of the 1889-O Morgan dollar exist in prodigious quantities. Bowers (2007) writes that: "Prooflike coins are seen with frequency, often having cameo contrast." The population reports, however, would seem to indicate that prooflike specimens are really not all that common. Of the 4,460 or so 1889-O dollars seen by NGC, only about 110 (or 2.5 percent) have prooflike surfaces and a scant 41 have deep mirrors.

The present untoned Gem offering is among the finest 1889-O Deep Mirror Prooflike seen by NGC, and exhibits modest field-motif contrast, especially when the coin is rotated slightly beneath a light source. The design elements are well-struck, including partial detail in the hair over Liberty's ear and on the eagle's breast feathers. This is another significant attribute of this particular specimen as most coins of this issue are poorly struck. Occasional light scuffs are fewer than might be expected for the designated grade. Census: 4 in 65 Deep Mirror Prooflike, 0 finer (11/14). NGC ID# 255A, PCGS# 97193

- 
- 6023 1889-S MS65 PCGS.** Blatant cartwheel luster runs over each side of this nicely preserved better-date Gem Morgan dollar. The surfaces are lightly toned with gold and cinnamon patina and show some prooflike tendencies. Liberty's cheek is nice and clean. The 1889-S issue was struck to the extent of only 700,000 pieces, and few survive nearly so nice as this example. NGC ID# 255B, PCGS# 7194

- 6024 1889-S MS65 PCGS.** Sparkling luster adorns white surfaces that exhibit well impressed design features. A few minor contact marks and luster grazes prevent a higher grade. PCGS has only certified 88 finer examples (12/14). NGC ID# 255B, PCGS# 7194

- 
- 6025 1889-S MS65 PCGS.** This S-mint Gem is awash in booming luster. Well-struck devices include the centers with nice detail in the hair above Liberty's ear and on the feathers of the eagle's breast. Untoned except for an occasional wisp of gold color that shows under magnification. NGC ID# 255B, PCGS# 7194

---

**1890-CC Dollar, MS63  
VAM-4, 'Tail Bar' Variety**

- 6026 1890-CC Tail Bar, VAM-4, MS63 NGC.** A Top 100 Variety. VAM-4 is identified by a prominent die gouge from the arrow fletchings to the wreath. This Select dollar, from this prolific Carson City issue, is fully brilliant with abundant frosty luster. The strike is good, and linear striations from the draw bench appear on both sides. PCGS# 133934 Base PCGS# 87198

---

**1890-CC 'Tail Bar' Morgan  
MS63 Deep Mirror Prooflike**

- 6027 1890-CC Tail Bar, VAM-4, MS63 Deep Mirror Prooflike PCGS.** A Top 100 Variety. The 1890-CC Tailbar Morgan dollar variety is fairly available within the context of the popular VAM series, but examples with Deep Mirror Prooflike surfaces such as this Select PCGS piece are quite scarce. The dramatic, deep die gouge below the arrow feathers makes this among the most popular VAMs. Generous contrast between fields and devices is accompanied by marginal hues of amber-gold on each side of this piece. A few scattered marks and luster grazes are in concert with the grade. Population: 6 in 63 Deep Mirror Prooflike, 5 finer (10/14). PCGS# 987199

---

**1890-CC Dollar, MS65  
Rarely Encountered Finer**

- 6028 1890-CC MS65 PCGS.** An eye-appealing Gem example, this 1890-CC Morgan displays frosty cartwheel luster beneath thin traces of light golden color. The strike is well-executed and only a few luster grazes on the cheek limit the grade. PCGS has encapsulated only 13 numerically finer representatives (11/14). NGC ID# 255D, PCGS# 7198

---

**1890-CC Morgan, MS64 Deep Mirror Prooflike  
Scarce Any Finer**

- 6029 1890-CC MS64 Deep Mirror Prooflike PCGS. CAC.** The Treasury released 1890-CC Morgans beginning in the 1930s, but few exhibit the mirrors seen on this example. Frosty figures contrast with glassy surfaces and deliver a black-and-white appearance as the coin is tilted. The strike is strong, revealing central feathers on the reverse. PCGS reports three Deep Mirror Prooflike examples in MS64+ and 28 in MS65 (12/14). NGC ID# 255D, PCGS# 97199

---

**1890-CC Dollar, MS65 Deep Mirror Prooflike  
Stark Cameo Contrast**

- 6030 1890-CC MS65 Deep Mirror Prooflike PCGS. CAC.** The 1890-CC Morgan dollar is fairly plentiful overall due to the dispersal of nearly 4,000 pieces in the GSA sales of the early 1970s, but Deep Mirror Prooflike coins remain scarce in comparison to the demand for them, and Gem examples are nothing short of rare. This piece exhibits deeply frosted devices set against glassy fields, with a thin golden glaze over both sides. Slight striking weakness is noted on the eagle's breast and the hair above Liberty's ear, but the design elements are otherwise well brought up. Population: 28 in 65 Deep Mirror Prooflike, 0 finer (12/14). NGC ID# 255D, PCGS# 97199

- 6031 1890-O MS65 PCGS.** Lustrous surfaces are untuned, and display a well preserved reverse, and some minor, inconsequential ticks on the obverse. The design elements are well struck, with the hair over Liberty's ear showing just a touch of softness. PCGS has only certified 24 numerically finer examples (12/14). NGC ID# 255E, PCGS# 7200

---

**1890-S Dollar, MS66  
Delicately Patinated**

- 6032 1890-S MS66 PCGS.** This delicately toned Premium Gem has a dynamic, flashy appearance. Frosty luster produces splendid cartwheel effects. Well-struck and carefully preserved, the piece is nearly defect-free save for a paper-thin slide mark between Liberty's jaw and the corner of her mouth and a slightly weak strike over Liberty's ear. PCGS has graded just seven numerically finer pieces (11/14).

*Ex: Santa Clara Signature (Heritage, 11/2002), lot 6618; FUN Signature (Heritage, 1/2004), lot 8929; FUN Signature (Heritage, 1/2007), lot 7189. NGC ID# 255F, PCGS# 7202*

---

**1890-S Dollar, MS66  
Seldom Seen Finer**

- 6033 1890-S MS66 PCGS.** Lustrous surfaces exhibit well-struck design elements, including noticeable definition in the hair over Liberty's ear and on the eagle's breast feathers. Modest field-motif contrast is apparent when the coin is rotated slightly beneath a light source. Nearly untuned surfaces are nicely preserved. PCGS has seen a mere seven examples finer (12/14). NGC ID# 255F, PCGS# 7202

---

**1891 Morgan Dollar, MS65  
Rare in Better Grades**

- 6034 1891 MS65 NGC.** The lower left obverse and reverse of this 1891 dollar are peach-tinged, while the remainder has blue-to-violet overtones. A distinctly beautiful Gem with significant cartwheel luster and ample eye appeal. The 1891 dollar remains available for a price even this fine, though NGC has graded just three numerically finer pieces (11/14). NGC ID# 255G, PCGS# 7204

**1891 Dollar, Lustrous MS65  
Rare Any Finer**

- 6035 1891 MS65 NGC.** Pleasing luster exudes from both sides of this Gem, and the design features are better-defined than ordinarily seen. In particular, decent detail is apparent in the hair over Liberty's ear, though the feathers on the eagle's breast are weak. The surfaces are color free except for a few freckles of golden-brown on the reverse. Neither side reveals significant abrasions. A die crack travels across the tops of the letters at the reverse left and top. NGC and PCGS have certified fewer than 10 examples finer (11/14). NGC ID# 255G, PCGS# 7204

**1891-CC Morgan Dollar, MS65  
Elusive CC-Mint Issue in High Grade**

- 6036 1891-CC MS65 PCGS.** Shades of lavender-gray and amber toning blanket the reverse of this impressive Gem, while the obverse remains essentially brilliant. The design elements are well-detailed and the lustrous surfaces show few signs of contact. PCGS has graded 31 numerically finer examples (12/14). NGC ID# 255H, PCGS# 7206

**1891-CC Dollar, Sharp MS65**

- 6037 1891-CC MS65 PCGS.** A virtually brilliant Gem that has dazzling luster and is well struck. The cheek is uncommonly smooth, and the same can be said for both fields. The 1891-CC is the most available post-1885 Carson City dollar, but this is an outstanding example that will likely witness spirited bidding on the auction floor. Ex: FUN Signature (Heritage, 1/2010), lot 2979. NGC ID# 255H, PCGS# 7206

**1891-CC Dollar, MS64 Deep Mirror Prooflike  
Extremely Rare Any Finer**

- 6038 1891-CC MS64 Deep Mirror Prooflike PCGS Secure. CAC. Ex:** A Gift of Undeserved Favor. This brilliant, untoned Deep Mirror Prooflike dollar was featured as part of our August, 2008 Baltimore ANA sale, where an exceptional collection of Deep Mirror and Prooflike Morgan dollars was sold under the "Undeserved Favor" pedigree. Then, as now, we can say "The faintly toned silver-white mirrors exhibit powerful reflectivity and considerable flashiness. Choice, and an attractive representative of this challenging issue. PCGS has graded only one finer Deep Mirror Prooflike piece." Population: 54 in 64 Deep Mirror Prooflike, 1 finer (12/14). NGC ID# 255H, PCGS# 97207

**1891-CC Morgan Dollar, MS65  
VAM-3, 'Spitting Eagle'**

- 6039 1891-CC Spitting Eagle, VAM-3, MS65 PCGS.** A Top 100 Variety. A small die gouge in the field near the eagle's beak identifies this popular variety. This example displays heavily frosted, remarkably clean surfaces and sharply struck devices. The obverse is nearly brilliant, save for a few amber tinges around the periphery, while the reverse is awash in rich orange-gold toning, with a crescent of ocean-blue seen around the lower-right border. Population: 14 in 65 (1 in 65+), 1 finer (11/14). PCGS# 133937 Base PCGS# 7206

- 6040 1891-S MS65 Prooflike NGC.** The sharply struck central motifs are white and frosted, while the deep sea-green fields exhibit profound watery reflectivity. Russet and gold accents are added near the borders. Both sides are well-preserved and distraction-free. Census: 16 in 65 (1 in 65+) Prooflike, 1 finer (11/14). From The Rawlin "Mac" McInelly Collection. NGC ID# 255K, PCGS# 7211

- 6041 1891-S MS64 Deep Mirror Prooflike NGC.** This is a lovely, fully struck near-Gem with deeply reflective fields and attractive deep-green and violet-rose toning across both sides. It is well-preserved and free of any significant distractions. Census: 35 in 64 Deep Mirror Prooflike, 6 finer (11/14). NGC ID# 255K, PCGS# 97211

**1892 Silver Dollar, MS65  
Delicate Peripheral Toning**

- 6042 1892 MS65 PCGS.** A slightly scarcer Philadelphia issue, the 1892 Morgan becomes scarce in Gem condition and finer pieces are distinctly rare. This frosty representative is devoid of major distractions, and displays lovely lavender and vivid ocean-blue peripheral colors around pale champagne centers. Slight striking softness on the hair immediately above Liberty's ear is to be expected for this issue. PCGS has only encapsulated four numerically finer representatives (12/14). NGC ID# 255L, PCGS# 7212

**1892 Dollar, MS65+  
Above-Average Strike  
Richly Toned Reverse**

- 6043 1892 MS65+ PCGS.** Morgan dollars of 1892 are most frequently seen through the near-Gem level of preservation after which the certified population declines significantly. Gems are scarce and are the highest grade likely to be encountered. In fact, PCGS has certified just four examples finer and NGC one finer, all MS66s (10/14).  
The lustrous, silver-white surfaces of this high-end Gem cede to deep aqua-green, grayish-olive, and orange patination. The design elements exhibit somewhat better design detail than usually seen on most specimens of this date, including partial definition in the hair above Liberty's ear. A few obverse marks are noted but these are well within the parameters of the grade designation. NGC ID# 255L, PCGS# 7212

- 6044 1892-CC MS62 PCGS.** This lustrous Mint State example, from the penultimate date of Carson City mint operations, is softly struck across the centers but bold on the other design motifs. A thick die crack encircles most of the reverse periphery. Both sides offer pale ice-green toning and champagne accents over the centers. Housed in a green label PCGS holder. NGC ID# 255M, PCGS# 7214

- 6045 1892-CC MS62 PCGS.** Fulsome cartwheel luster runs on brightly mirrored surfaces that are untuned in the centers and show a slight pinkish-gold accents at the rims, more prominent on the lower reverse. Small to medium marks show on Liberty's cheek and the eagle's breast, accounting for the grade, but this piece shows nice eye appeal for the grade. NGC ID# 255M, PCGS# 7214

- 6046 1892-CC MS63 PCGS.** Splendid frosty mint luster sweeps across the brilliant surfaces of this pleasing example. A modest number of small abrasions are noted, as expected for the Select grade level. From the next-to-last year of Carson City mint operations. NGC ID# 255M, PCGS# 7214

- 6047 1892-CC MS63 PCGS.** Splashes of lavender and sun-gold reside in the peripheral regions of this intensely lustrous Select representative, leaving the centers with only a faint champagne hue when tilted beneath a light. A well-struck coin with grade-consistent abrasions.  
From *The College Collection*. NGC ID# 255M, PCGS# 7214

- 6048 1892-CC MS63 NGC.** A frosty, untuned, and lustrous Select Mint State example of this late Carson City issue, showing good eye appeal overall despite a few distributed marks in keeping with the grade. Radiant cartwheel luster is blatant on each side. NGC ID# 255M, PCGS# 7214

- 6049 1892-CC MS63 PCGS. CAC.** Dusky lavender-gray toning yields tinges of lemon-gold in the recesses on each side of this Select 1892-CC Morgan dollar. Satiny luster shines through the patina, and the design elements exhibit pleasing sharpness. No major abrasions are present. NGC ID# 255M, PCGS# 7214

**1892-CC Morgan Dollar, MS64  
Penultimate Carson City Issue**

- 6050 1892-CC MS64 PCGS.** Faintly toned blue-to-violet but otherwise silver with shimmering fields and eye appeal in spades. The fields are clean for the MS64 designation and the overall eye appeal is as solid as the strike on the hair over the ear.  
Ex: *The Milwaukee Shore Collection (Heritage, 5/2005)*, lot 9303. NGC ID# 255M, PCGS# 7214

**1892-CC Morgan Dollar, MS64+  
Last Full Year of Coining for the Carson City Mint**

- 6051 1892-CC MS64+ PCGS. CAC.** The last full year of Carson City Morgan dollar production was 1892, the year that also saw the U.S. Presidential election that returned Grover Cleveland to office and sealed the Nevada minting operation's fate. This MS64+ example from the penultimate issue has dappled reddish-orange peripheral toning and broad silver-blue centers with strong and beautiful luster.  
From *The College Collection*. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, Well-Struck MS65  
Elusive Any Finer**

- 6052 1892-CC MS65 NGC.** Despite the generous production figure for a Carson City dollar (1.352 million pieces), MS65 is the highest numerical grade most collectors are likely to encounter when searching for an 1892-CC. Indeed, NGC and PCGS have graded only 45 coins finer (11/14), a number of which are likely resubmissions. The present Gem is well-struck throughout and possesses strong luster. Nearly color free save for a hint of nearly imperceptible gold color at Liberty's nose area. NGC ID# 255M, PCGS# 7214

**1892-CC Morgan, MS65  
Frosty Mint Luster**

- 6053 1892-CC MS65 NGC.** Liberty's portrait floats above smooth, icy surfaces, broad portions of which approach perfection. Die polish softens the ear a touch while the reverse details a convincing portion of the breast feathers. 1892-CC Morgans in Gem Uncirculated are available with patience, and the issue becomes most elusive any higher. NGC has certified but 16 MS66 pieces (12/14). NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, Brilliant MS65  
Better-Date Carson City Issue**

- 6054 1892-CC MS65 PCGS.** As the 1892-CC dollar was not present in the GSA sales, most high grade survivors likely originate from earlier Treasury Department releases in the 1950s. This coin is available in the lower Uncirculated grades but becomes rare above the Gem level. Liberty exhibits minor abrasions at the nose and around the ear. The reverse is exceptionally smooth aside from a couple of marks above the eagle's head. NGC ID# 255M, PCGS# 7214

- 6055 1892-CC MS61 Prooflike PCGS.** Sharply struck with impressively mirrored fields and frosty devices. A grade-consistent number of small- to medium-sized abrasions appear on each side of the piece. NGC ID# 255M, PCGS# 7215

**1892-S Morgan, AU55  
Conditionally Challenging**

- 6056 1892-S AU55 NGC.** The rapid growth of census data has revealed any number of condition rarities in the U.S. catalog, and the 1892-S Morgan is a prime example. The pricing of this issue presents a steep curve between the AU and MS level, and collectors carefully evaluate the potential of each coin. The present candidate retains considerable luster and is largely untuned with deeper gray beneath the obverse portrait. NGC ID# 255P, PCGS# 7218

**1892-S Dollar, Unc Details  
Deeply Toned and Softly Lustrous**

- 6057 1892-S — Improperly Cleaned — NGC Details. Unc.** The 1892-S Morgan dollar is one of the rarest dates in the series in Mint State, with even high-end AU examples bringing strong premiums at auction. This representative is unworn, but shows minor evidence of light past cleaning. Both sides are deeply retuned, exhibiting blended hues of midnight-gray, gunmetal-blue, olive, and reddish-orange. The strike is sharp and the surfaces are devoid of significant abrasions. NGC ID# 255P, PCGS# 7218

**1892-S Silver Dollar, Unc Details  
Reflective Fields**

- 6058 1892-S — Cleaning — PCGS Genuine. Unc Details.** The 1892-S Morgan is one of the most challenging dates in the series in Mint State grades. This example is lightly cleaned, but has since retuned a pleasing golden-gray hue. Noticeable semiprooflike mirroring flashes in the fields. The hair above Liberty's ear is slightly soft, but the surfaces are free of major abrasions. NGC ID# 255P, PCGS# 7218

**1893 Silver Dollar, MS64+  
Seldom Seen Philadelphia Issue**

- 6059 1893 MS64+ PCGS. CAC.** While the branch mint Morgan dollar issues from 1893 are frequently the most widely publicized, the Philadelphia issue is an elusive semikey in its own right. This high-end Choice example displays brilliant, frosty luster and well-detailed motifs. A few light grazes on the cheek preclude a full Gem assessment, but hardly detract from the overall appeal. NGC ID# 255R, PCGS# 7220

**1893 Morgan Silver Dollar, MS65  
Better-Date Philadelphia Issue**

- 6060 1893 MS65 NGC.** The 1893 boasts the third-smallest mintage of Philadelphia-struck Morgans and is eclipsed in that regard only by the emissions of 1894 and 1899. Beyond the low mintage, the present coin is a condition scarcity with only seven finer at NGC. This untoned example has especially clean fields for the assigned grade. Census: 86 in 65 (3 in 65+), 4 finer (12/14). NGC ID# 255R, PCGS# 7220

- 6061 1893-CC AU50 PCGS.** In its final year of operations, the Carson City mint facility struck just 677,000 Morgan silver dollars. Almost none were sold in the great GSA sales of the 1960s and 1970s, and today examples remain elusive at most grade levels. This is a moderately circulated example with numerous small to medium-sized abrasions on each side. The silver-gray surfaces show a slight degree of golden color near the upper obverse and lower reverse borders, and specks of russet patina near the centers. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, AU53  
Slightly Prooflike**

- 6062 1893-CC AU53 PCGS. CAC.** Aside from a few short marks on Liberty's cheek and chin, this final-year Carson City dollar has excellent surfaces with considerable silver luster. The surfaces are brilliant and untoned, with a trace of high point wear that prevents a finer grade. Both sides have faint field reflectivity. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, MS62  
Brilliant, Attractive Specimen**

- 6063 1893-CC MS62 PCGS.** According to the second edition of *A Guide Book of Morgan Silver Dollars*: "The 1893-CC is, sadly, the last of the Carson City dollars — ending a romantic numismatic era. Today, surviving pieces are much loved, much desired by collectors."

The current example is a brilliant coin that displays considerable reflectivity in the fields and snow-white frost on the devices. It is typically softly defined over the centers, with scattered abrasions that limit the grade but fail to impair the overall visual appeal of this attractive specimen. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, Lustrous MS62**

- 6064 1893-CC MS62 PCGS.** The 1893-CC Morgan dollar is an impressively scarce issue that was not well-represented in the great Treasury / GSA sales of the 1960s and 1970s. With a low mintage of 677,000 pieces, the date is a perennial favorite among collectors.

The present example displays full, frosted mint luster and the coin's strike definition is solid. Nearly brilliant, save for traces of russet color at the edges, the surfaces display normal, moderate abrasions for the MS62 assessment. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, MS62  
Intense Mint Luster**

- 6065 1893-CC MS62 PCGS. CAC.** The final-year Carson City issue is normally seen heavily bagmarked, and this brilliant, silver-white example has its share of abrasions. Mint handling and rough transport distributed marks on the high points — the fields are actually quite clean. The date always has immeasurable appeal to Carson City enthusiasts. This example is intensely lustrous and obviously Mint-fresh, struck from a late state of the reverse die as indicated by die clashing beneath the eagle's right (facing) wing. NGC ID# 255S, PCGS# 7222

---

1893-CC Morgan Dollar, MS62+  
Faint Clash Marks

- 6066** 1893-CC MS62+ PCGS. CAC. A typical 1893-CC Morgan dollar, this brilliant and fully lustrous Mint State piece has scattered marks on the obverse, with minimal marks on the reverse. As so often seen, the reverse is numerically finer. Minor obverse and reverse clash marks are evident in the usual locations. NGC ID# 255S, PCGS# 7222

---

1893-CC Morgan, MS63  
Untoned Example of This Semikey Date

- 6067** 1893-CC MS63 PCGS. Certified in an old-style PCGS blue-label holder, this Select Mint State 1893-CC Morgan dollar shows little contrast between the fields and devices on untoned silver-white surfaces, but it is also relatively free of mentionable contacts for the grade. As the third Carson City key in this all-time-favorite series, this attractive example should see spirited bidding. NGC ID# 255S, PCGS# 7222

---

1893-CC Dollar, MS63  
Final Year of Issue

- 6068** 1893-CC MS63 PCGS. The Carson City Mint's existence depended on politics. Shuttered in 1885 after Grover Cleveland came to the Presidency, the coinage operations reopened following Benjamin Harrison's inauguration. Cleveland's return to the White House in 1893, however, sealed the facility's fate. This final-year Select coin is all-brilliant with a strong cartwheel effect. A reddish-violet patch graces the top of the E in E PLURIBUS UNUM. Abrasions on Liberty's cheek and in the surrounding fields contribute to the grade. From The Rawlin "Mac" McInelly Collection. NGC ID# 255S, PCGS# 7222

---

1893-CC Morgan Dollar, MS64  
Final Carson City Issue

- 6069** 1893-CC MS64 NGC. The Carson City Mint struck a small total of 677,000 Morgan dollars in 1893, the last year of coining operations at the famous Western facility. Few examples were saved by contemporary collectors and the issue was not heavily represented in the GSA or Treasury releases of the 1960s and '70s. As a result, the 1893-CC is rare in grades above the MS64 level and collectors prize examples in any Mint State grade. This attractive Choice specimen offers brilliant, well-preserved surfaces that radiate vibrant mint luster on both sides. The design elements are sharply detailed throughout and eye appeal is outstanding. NGC has graded 16 numerically finer examples (11/14). NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS64  
Low-Mintage, Final Carson City Issue**

**6070 1893-CC MS64 PCGS. CAC.** The 1893-CC Morgan dollar claims a low mintage of 677,000 pieces, the last silver dollar issue from the famous Carson City Mint. The 1893-CC is not too difficult to locate in Choice condition, but any finer grade is quite rare. This attractive Choice example displays sharply detailed central devices, but some stars are a little flat. The mostly brilliant surfaces are brightly lustrous, with a few wisps of light gold toning, and only minor signs of contact are evident. Overall eye appeal is terrific. PCGS has graded only 12 numerically finer examples (11/14). NGC ID# 255S, PCGS# 7222

**1893-O VAM-5 Dollar, MS62  
Slanted Date Obverse**

**6071 1893-O MS62 PCGS. VAM-5.** The date is slanted up to the right, with the 1 close to the border and the 3 noticeably farther from the border. The reverse has the O mintmark tilted slightly to the right. This lovely piece has brilliant and untoned silver surfaces with excellent design definition and mildly prooflike fields. NGC ID# 255T, PCGS# 7224

**1893-O Dollar, Well-Struck MS62  
The Lowest-Mintage New Orleans Morgan**

**6072 1893-O MS62 PCGS.** The 1893-O has the lowest production of any New Orleans Morgan (300,000 pieces). This MS62 example displays some semiprooflike characteristics, especially on the reverse. The design features exhibit better definition than usually seen, including the hair over Liberty's ear and the eagle's breast feathers. Small marks on Liberty's cheek limit the grade. Nevertheless, a nice-looking coin both for the designated grade and the issue. NGC ID# 255T, PCGS# 7224

**1893-O Dollar, MS62  
Vibrant Cartwheel Luster**

**6073 1893-O MS62 PCGS.** All four Morgan dollar issues produced in 1893 are either key or semikey dates, and none are readily available in Mint State. This is a well-struck, satiny example of the New Orleans issue, from a mintage of just 300,000 pieces. Pastel shades of yellow-gold and pale lavender grace much of each side, but allowing radiant luster to shine through. NGC ID# 255T, PCGS# 7224

**6074 1893-S Good 4 NGC.** Dove-gray surfaces show a light tinge of gold on the reverse. The rim is full on the obverse but worn down into the letter tops on the reverse, and only scattered hair-thin scrapes appear with a loupe, rather than mentionable marks. NGC ID# 255U, PCGS# 7226

**1893-S Morgan, VG10  
Lowest Mintage in the Series**

**6075 1893-S VG10 PCGS.** The 1893-S Morgan is the undisputed key to the series, with the 1889-CC trailing by many lengths. The small mintage of 100,000 pieces is easy to recall and only reinforces the collecting challenge. There are a few reverse marks above and below the motto, as well as at the branch and arrow tips. LIBERTY is bold and the dark toning in the protected areas sharply outlines the remaining detail throughout. NGC ID# 255U, PCGS# 7226

---

1893-S Morgan Dollar, Fine 12  
Ever-Popular Series Key

- 6076 1893-S Fine 12 PCGS. The San Francisco Mint produced far fewer Morgans in 1893 than in any other year, and today's collectors carefully consider the issue when working toward completion of the Morgan set. This is an attractively toned specimen, with the obverse coin-gray in the center leading to shades of blue and green above Liberty and at the rim. NGC ID# 255U, PCGS# 7226

---

1893-S Morgan Dollar, VF Details  
Well-Detailed Key Date Example

- 6077 1893-S — Obverse Scratched — NGC Details. VF. Writing in the second edition of his *Guide Book of Morgan Silver Dollars*, Bowers observes that: "The 1893-S is the object of great desire in the Morgan dollar series. No single issue has greater popularity across the board. The majority of known pieces, into the thousands, are in the single grade category of Very Fine."

The current example of this great key issue shows evenly worn steel-gray surfaces that exhibit few noticeable marks, other than a series of horizontal scratches — superficial in nature — that are noticed primarily just to the left of Liberty's ear, and in the field area just to the left of the mouth.

---

1893-S Dollar, AU Details  
Famous Key Date

- 6078 1893-S — Tooled, Cleaned — ANACS. AU Details, Net XF40. With surviving examples of the 1893-S dollar concentrated in the VF range, any piece with superior detail is a prize even if it is otherwise impaired. While this piece has only faintly retuned after a past cleaning and part of Liberty's cheek has been smoothed out, the coin's high points show only slight wear. NGC ID# 255U, PCGS# 7226

---

1893-S Dollar, XF Details  
Attractive Key Date Representative

- 6079 1893-S — Improperly Cleaned — NGC Details. XF. The 1893-S key date Morgan dollar sees a surprisingly sharp price increase between the VF and XF grade levels, and the same may prove true of net-graded pieces at the same Details grades. This XF Details example remains attractive and a nice, modestly circulated representative of the series' most popular key issue. Faint hairlines and a mildly subdued appearance are noted on the pearl-gray surfaces, but distracting abrasions are absent.

---

1893-S Dollar, Remarkably Clean XF40

- 6080 1893-S XF40 PCGS. Close examination of this key-date representative in the Morgan dollar series reveals remarkably clean surfaces for a large silver dollar that has experienced some circulation. What few marks are present are minute and unobtrusive. Moreover, the design elements are well-defined despite high-point wear. This piece will fit comfortably in a high-grade collection. NGC ID# 255U, PCGS# 7226

- 6081 1894 AU58 PCGS. Sharply struck and essentially brilliant, save for faint golden border accents, this pleasing example displays substantial luster. Liberty's cheek has a mildly scuffy appearance, while high-point friction is minimal. NGC ID# 255V, PCGS# 7228

- 6082 1894 AU58 NGC. Substantial luster remains on this nearly Uncirculated 1894 Morgan dollar, while just a trace of friction over the high points of the design precludes a Mint State grade from NGC. Largely untuned, with pleasing eye appeal for the grade. NGC ID# 255V, PCGS# 7228

1894 Dollar, Toned MS60  
A Low-Mintage Date

- 6083 1894 MS60 PCGS.** Sprinkles of cinnamon color run over over both sides of this Mint State example, but are more prominent on the reverse. Soft bluish-gray accents tend to gravitate to the borders, and the design elements are well-struck. The grade is determined by a small patch of heavy scrapes in the reverse right field between the wing and wreath. Other abrasions are scattered and minor. The foregoing marks are fewer and less severe than what would be expected for an MS60. In other words, this piece may have claims to a higher grade. The 1894 has a low mintage of 110,000 business strikes, and Mint State coins are mostly in the lower levels.  
Ex: Ft. Worth ANA Signature (Heritage, 3/2010), lot 1588. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS61  
Mintage 110,000 Pieces

- 6084 1894 MS61 PCGS.** From 1893 to 1895, mintages of Morgan dollars plunged relative to what had come before as the silver purchase acts propping them up were removed. This MS61 1894 dollar has a number of wispy abrasions on its bright silver obverse, though the reverse is cleaner with just a few scattered nicks and lines of reed marks in the fields. Housed in a green label holder.  
From The Rawlin "Mac" McNelly Collection. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS62  
Pleasing High-End Example

- 6085 1894 MS62 NGC.** The second-smallest business strike mintage of the entire Morgan dollar series, at a mere 110,000 coins, makes the 1894 issue an obvious candidate for popularity among die-hard collectors. Survivorship was relatively high, but the overall scarcity of this Philadelphia Mint product remains impressive. This appealing example has a mildly flashy appearance and essentially untuned silver-gray surfaces that betray faint undertones of rose on each side. A well-struck coin with minimal surface marks for the grade. NGC ID# 255V, PCGS# 7228

1894 Dollar, MS64  
Ex: Mike Casper Collection

- 6086 1894 MS64 PCGS. CAC.** Ex: Mike Casper Collection. Purchased from John Love by Mr. Casper. The striking details are stronger than usually seen; in fact, it they are almost completely struck up in the centers. The surfaces are minimally abraded and almost brilliant with just a hint of golden color over the denticles on the obverse with the usual frosted mint luster. This important coin was hand-selected by one of the best known, old-time dollar dealers and one of the most discriminating collectors of Morgan dollars.  
Ex: Santa Clara Signature (Heritage, 11/2001), lot 6196; Central States Signature (Heritage, 5/2007), lot 4916. NGC ID# 255V, PCGS# 7228

- 6087 1894-O MS62 PCGS.** This is a scarce New Orleans issue which suffered from poor production quality, resulting in relatively few high-grade survivors. This lustrous example displays tan and gray coloration accented by speckled russet and olive patina. The central details are softly struck on both sides, a typical characteristic of the date and mint. NGC ID# 255W, PCGS# 7230

- 6088 1894-O MS62 PCGS.** This highly lustrous example is brilliant in the fields and centers, with light golden accents near the borders. A few small to medium-sized marks are evident on both sides. Typically soft on the central details, but with excellent overall eye appeal. NGC ID# 255W, PCGS# 7230

---

Select 1894-O Morgan Dollar  
Extraordinary Eye Appeal

**6089 1894-O MS63 PCGS.** High-quality 1894-O Morgan dollars are quite elusive, because of a generally poor strike and typically dull luster. The present Select example is a pleasing exception, with sharp details in most areas, just a touch of softness on the hair above the ears and the eagle's breast, and vibrant, frosty luster. Eye appeal is outstanding.

*Ex: Stamford Signature (Heritage, 10/2010), lot 4308; FUN Signature (Heritage, 1/2011), lot 6109. NGC ID# 255W, PCGS# 7230*

---

1894-O Dollar, Lustrous MS63  
Above-Average Strike

**6090 1894-O MS63 PCGS.** The 1894-O Morgan is typically seen with a poor strike, subpar luster, and extensive bagmarks, helping to account for the relatively few examples extant in the better levels of Mint State. The present Select offering displays pleasing satiny luster residing on untuned surfaces. While not fully struck, the design elements reveal better definition than ordinarily encountered. Moreover, light scattered marks are fewer and less severe than usually seen. NGC ID# 255W, PCGS# 7230

---

1894-O Dollar, MS64  
Rare Any Finer

**6091 1894-O MS64 PCGS. CAC.** In the aftermath of silver purchase legislation repeal, production of Morgan dollars plummeted toward something like actual demand — which turned out to be “not much.” New Orleans, for example, struck only slightly more than 1.7 million pieces, though those coins did for the most part get used, as seen by the notable lack of Mint State coins in general and Gems in particular (PCGS has graded just 11 such coins as of November 2014). This near-Gem representative is bright with no patina and a considerable cartwheel. A touch of striking softness on the central elements is as often seen but eminently forgivable with the eye appeal as strong as it is. A CAC green label backs up the assigned grade. NGC ID# 255W, PCGS# 7230

**6092 1894-S MS63 PCGS.** Splendidly arrayed across both sides in a tremendous variety of iridescent colors, too numerous to list. A fully struck, lustrous coin showing typical small marks for the grade, and a highly attractive example of this semikey issue from the San Francisco mint. NGC ID# 255X, PCGS# 7232

**6093 1894-S MS64 PCGS.** The certified populations of the 1894-S Morgan drop precipitously in Gem grade, making the near-Gem level a nice compromise between price and aesthetics for many collectors. Pale multicolor pastel patina appears on each side, and minuscule marks appear on Liberty's cheek, with one larger hit on the chin. Radiant cartwheel luster and overall good eye appeal are pluses on this coin. NGC ID# 255X, PCGS# 7232

**6094 1894-S MS64 PCGS.** Flowing cartwheel luster shows on each side of this untoned near-Gem 1894-S dollar. The surfaces appear high-end for the assigned grade, relatively unmarked save for a couple of ticks on Liberty's jawline and upper neck. An extremely nice and sharply struck example for those who prefer untoned coins. Wispy die cracks connect some of the peripheral elements on the reverse. NGC ID# 255X, PCGS# 7232

**6095 1894-S MS64 PCGS.** This borderline prooflike near-Gem has impressive ivory surfaces with lovely arcs of cobalt-blue and sunset-gold toning on the obverse. The reverse is similarly prooflike and brilliant with delicate golden splashes over the bright silver surfaces.

*From The College Collection.* NGC ID# 255X, PCGS# 7232

**6096 1894-S MS64 PCGS Secure.** An appealing specimen for the Choice Uncirculated grade level, by virtue of its intense mint luster and essentially untoned appearance. A few small marks and luster grazes preclude a finer grade assessment. The centers are softly struck on both sides.

*Ex: Long Beach Signature (Heritage, 5/2009), lot 1190.* NGC ID# 255X, PCGS# 7232

---

#### 1894-S Dollar, Well-Preserved MS64

**6097 1894-S MS64 PCGS. CAC.** The 1894-S Morgan is a semikey issue in all grades, but it becomes distinctly elusive above the MS64 level. This Choice example displays frosty cartwheel luster beneath blended shades of lavender-gray and pale sun-gold toning. The hair above Liberty's ear and the eagle's breast exhibit mild striking weakness, though the eye is chiefly drawn to the remarkably clean surfaces. NGC ID# 255X, PCGS# 7232

---

#### 1895-O Dollar, AU58 Scarce in Better Grades

**6098 1895-O AU58 PCGS.** While the proof-only Philadelphia issue of the same date attracts most of the attention, all the Morgan dollars of 1895 pose their own challenges. This near-Mint example of the lower-mintage 1895-O dollar has soft but pleasing luster beneath a thin layer of silver-blue patina. Great eye appeal for an issue that is scarce in Mint State.

*From The College Collection.* NGC ID# 255Y, PCGS# 7236

---

#### 1895-O Morgan Dollar, AU55 Deep Mirror Prooflike Lightly Circulated, Strongly Reflective Semikey

**6099 1895-O AU55 Deep Mirror Prooflike ANACS.** Circulated coins seldom retain the bold reflectivity needed for Deep Mirror Prooflike status, yet this semikey 1895-O dollar reaches the threshold. Despite a number of choppy abrasions each side offers a profound gleam at both the minimally patinated centers and the golden-orange and blue glimmers of the margins.

*From The Rawlin "Mac" McNelly Collection.* NGC ID# 255Y, PCGS# 97237

---

#### 1895-O Morgan, AU55 Deep Mirror Prooflike

**6100 1895-O AU55 Deep Mirror Prooflike NGC.** The New Orleans Mint produced fewer Morgan dollars in 1895 than in any other year except 1893, and fewer still of the prized Deep Mirror Prooflike examples. Indeed, PCGS notes only six Deep Mirror Prooflike coins for the issue in any grade, and NGC only eight (12/14). The present coin exhibits russet color around the margins with brilliant centers. NGC ID# 255Y, PCGS# 97237

**6101 1895-S AU55 NGC.** A scarcer San Francisco issue, with a mintage of only 400,000 coins. This Choice AU example retains subtle mint luster in the recesses and is essentially brilliant in color, with just slight rub over the high points of the design. NGC ID# 255Z, PCGS# 7238

**6102 1895-S AU58 PCGS.** An attractive near-Mint example of this low-mintage San Francisco issue. The bright surfaces show generally well-struck design motifs, except directly above Liberty's ear, and the coin displays only wispy abrasions on each side. NGC ID# 255Z, PCGS# 7238

**6103 1895-S — Improperly Cleaned — NGC Details. Unc.** An extensively toned example with full strike definition and a few small, scattered abrasions on each side. The coin presents a mildly subdued appearance due to improper cleaning, but remains an attractive representative of this better date.

**1895-S Morgan Dollar, MS63**  
**Low Mintage of Only 400,000 Pieces**

- 6104 1895-S MS63 PCGS.** All the 1895-dated dollars are challenging in their own ways. The San Francisco issue, for example, has a mintage of just 400,000 pieces, though even Select pieces like this one are available for a price. Both sides remain largely silver, the obverse with a faintly pastel, creamy texture, the reverse more clearly cartwheeled. Choppy areas on both obverse and reverse contribute to the grade.  
*From The Rawlin "Mac" McNelly Collection. NGC ID# 255Z, PCGS# 7238*

**1895-S Silver Dollar, MS63+**  
**Better San Francisco Issue**

- 6105 1895-S MS63+ PCGS. CAC.** The San Francisco Mint struck only 400,000 silver dollars in 1895, and this issue is by extension elusive in Mint State grades in comparison to the demand for it. The present piece is radiantly lustrous, with semiprooflike mirroring in the fields and traces of olive-gold color detected upon close examination. Light, scattered abrasions on Liberty's cheek limit the grade, but the strike is above-average for the issue and the eye appeal is pleasing. NGC ID# 255Z, PCGS# 7238

**1895-S Morgan Dollar, MS64**  
**Elusive Semikey Date**

- 6106 1895-S MS64 PCGS.** The surfaces are mostly color-free on this better-date near-Gem Morgan dollar, showing well-frosted devices and surfaces that are largely pristine, save for a couple of small marks on Liberty's chin and a luster graze on the cheek. This piece offers good eye appeal throughout each side and would fit nicely into a mostly Gem set. PCGS has graded only 39 examples in higher grades of this low-mintage issue of 400,000 coins (10/14). NGC ID# 255Z, PCGS# 7238

**1896-O Dollar, Lightly Toned MS62**

- 6107 1896-O MS62 PCGS Secure.** Substantial quantities were released into circulation, and contemporary collectors paid little attention to Mint State representatives. Thus, the issue proves challenging in high grades. Warm golden overtones grace the margins, while the centers show light toning over otherwise silver-gray surfaces. Above-average definition for the issue with only a few wispy abrasions precluding a Select designation.  
*Ex: Long Beach Signature (Heritage, 5/2009), lot 1203. NGC ID# 2563, PCGS# 7242*

**1896-O Dollar, MS63**  
**Above-Average Detail and Luster**

- 6108 1896-O MS63 PCGS.** The 1896-O dollar is extremely difficult to locate above MS63, owing to its consistent deficiency in strike, luster, and number of abrasions. This helps to account for fewer than 50 examples grading finer than MS63 (11/14). This piece displays good definition, including the hair at Liberty's ear and on the eagle's breast feathers. The lustrous silver-gray surfaces show some scattered marks and scuffs consistent with the grade designation. NGC ID# 2563, PCGS# 7242

**1896-O Silver Dollar, MS63**  
**Rarely Encountered in Finer Grades**

- 6109 1896-O MS63 PCGS.** Elusive in all Mint State grades, the 1896-O Morgan dollar becomes genuinely rare above MS63. This softly lustrous representative displays pale champagne toning over each side, with fewer abrasions than are expected for the grade. Slight striking weakness is evident on the hair above Liberty's ear, as is expected for this New Orleans issue. PCGS has certified only 33 numerically finer examples (12/14). NGC ID# 2563, PCGS# 7242

---

1896-S Morgan Dollar, MS63  
Difficult in MS63 and Better Grades

- 6110 1896-S MS63 PCGS. CAC.** The 1896-S is a difficult but not impossible Morgan dollar issue in this grade, but at the Gem level they are decidedly scarce, with a price to match. This MS63 coin might represent an excellent compromise, with lots of life emanating from vibrant silver-white surfaces that display a few grade-consistent abrasions.

Ex: *Fort Worth Signature* (Heritage, 3/2010), lot 1616. NGC ID# 2564, PCGS# 7244

---

1896-S Morgan Dollar, MS64  
Better S-Mint Issue

- 6111 1896-S MS64 PCGS Secure.** Bowers suggests that only one-fifth of the 5 million-coin mintage was released into circulation, and the remaining coins were likely melted. The low survival rate, evidenced by the small number of coins that surfaced during the Treasury release of the 1960s, makes the 1896-S a better date in the series. This frosty and brilliant near-Gem is typically struck with areas of mild softness at the centers. Abrasions are minimal. NGC ID# 2564, PCGS# 7244

---

1896-S Dollar, Conditionally Elusive MS65  
Above-Average Surfaces

- 6112 1896-S MS65 NGC.** Morgan dollars of 1896 from the San Francisco Mint can be acquired in mint condition through near-Gem with a degree of searching. The population declines significantly at the Gem level of preservation where NGC and PCGS have graded approximately 100 examples and fewer than 10 specimens finer. The lustrous surfaces of this MS65 offering display occasional freckles of nearly imperceptible gold color on the obverse. The design elements are somewhat soft in the centers, though a modicum of detail is visible in the hair over Liberty's ear and on the eagle's breast. Surface marks are fewer and less severe than expected for the grade designation and for the issue that is typically bagmarked. Census: 14 in 65, 5 finer (11/14). NGC ID# 2564, PCGS# 7244

- 
- 6113 1897 MS66+ PCGS.** A heavily frosted, well-struck example of this conditionally elusive Philadelphia issue. No distracting abrasions are present, and just a few faint luster grazes on the cheek preclude a full MS67 grade. PCGS has encapsulated only 28 numerically finer representatives (12/14). NGC ID# 2565, PCGS# 7246

**1897 Morgan, MS66+ Prooflike  
Vibrant Cartwheel Luster**

- 6114 1897 MS66+ Prooflike PCGS. CAC.** The 1897 Morgan dollar was among the more elusive issues in the series until the Treasury releases of the early 1960s, when bags of the date emerged onto the numismatic market. Still, few examples exhibit any amount of prooflike mirroring, and such pieces are rare at the Premium Gem grade level. This high-end representative displays softly frosted design elements, with subtle cameo contrast and nearly unabraded surfaces. The strike is sharp, and a few faint traces of lemon-gold around the rims and over the obverse devices are the only signs of color. Population: 13 in 66 (2 in 66+) Prooflike, 0 finer (12/14). NGC ID# 2565, PCGS# 7247

- 6115 1897-O MS62 PCGS.** Whispers of reddish-gold patina hug the margins of this MS62 O-mint Morgan. The design features show localized softness, a typical characteristic of this issue. Scattered contacts and grazes, more so on the obverse, determine the grade. NGC ID# 2566, PCGS# 7248

**1897-O Silver Dollar, MS63  
Better Date in Mint State**

- 6116 1897-O MS63 PCGS.** This slightly more challenging New Orleans issue is seldom seen above the MS63 grade level. The present coin shows areas of ocean-blue toning over a blanket of satiny golden-gray luster. The extreme centers exhibit some of the usual striking weakness, though grade-limiting surface abrasions are minimal. PCGS has seen only 48 numerically finer submissions (11/14). NGC ID# 2566, PCGS# 7248

**1897-O Dollar, MS63  
Elusive Any Finer**

- 6117 1897-O MS63 PCGS.** Select is the finest numerical grade that most collectors will encounter when searching for an 1897-O dollar. Indeed, PCGS and NGC have seen only about 80 examples finer. While not fully struck, this offering exhibits better design detail than usually seen on the hair over Liberty's ear and on the eagle's breast. Lustrous silver-gray surfaces reveal a few marks determining the grade. NGC ID# 2566, PCGS# 7248

- 6118 1897-O MS61 Prooflike NGC.** This was a lackluster issue in terms of production quality, and Prooflike examples are rare. This is an all-brilliant example with modestly abraded surfaces. The fields display impressive, substantial reflectivity on both sides. Census: 8 in 61 Prooflike, 11 finer (11/14). NGC ID# 2566, PCGS# 7249

**1897-O Dollar, MS61 Deep Mirror Prooflike  
Rare With This Much Contrast**

- 6119 1897-O MS61 Deep Mirror Prooflike PCGS. CAC.** The 1897-O Morgan is an elusive date overall in Mint State grades, but pieces exhibiting any degree of prooflike mirroring are distinctly rare; PCGS has certified only 12 Deep Mirror Prooflike examples in all grades, with just two in MS61 and eight numerically finer (11/14). This piece is unusually sharp for the issue, with subtle cameo contrast and just a blush of light golden color overall. Light, scattered abrasions account for the grade. NGC ID# 2566, PCGS# 97249

- 6120 1897-S MS66 Prooflike PCGS. VAM-4.** A flashy, brilliant, and boldly struck high grade silver dollar that would satisfy even the most demanding collector. The flag of the 1 and the top of the 7 are repunched. A diagonal die gouge passes through the ribbon loop. VAMworld.com credits Leonard Hinkley with the 1974 discovery of VAM-4. The variety is undesignated on the insert. *From The College Collection.* NGC ID# 2567, PCGS# 7251

- 6121 1897-S MS66 Prooflike NGC.** Prooflike 1897-S dollars are elusive. Indeed, NGC and PCGS have graded only 55 Premium Gems with this finish and just five pieces numerically finer. The color-free surfaces of the present offering exhibit well-struck devices that yield mild contrast with the prooflike fields. Census: 23 in 66 (1 in 66 ★) Prooflike, 2 finer (12/14). NGC ID# 2567, PCGS# 7251

**1898 Dollar, Flashy MS67**

- 6122 1898 MS67 PCGS.** Superb Gem 1898 dollars such as the present example can be obtained, but only with diligent searching. This issue is virtually nonexistent any finer. Silver-white surfaces exhibit sharply struck design elements and are impeccably well preserved. Both sides yield flashy luster. Population: 86 in 67 (3 in 67+), 0 finer (12/14). NGC ID# 2568, PCGS# 7252

**1898 Morgan, MS67**  
**Only Three Pieces Certified Higher**

**6123 1898 MS67 PCGS.** Luster radiates effortlessly from the unbroken fields of this Superb Gem. Silver-white surfaces are completely untuned. There is a depression at the truncation point, while peripheral die cracks connect the reverse letters. A mere three coins at the MS67+ level exceed this example. Population: 86 in 67 (3 in 67+), 0 finer (12/14). NGC ID# 2568, PCGS# 7252

**6124 1898-S MS65 NGC.** This delightful Gem has soft, frosty grayish-silver luster with delicate peripheral gold and iridescent toning along the obverse border. NGC has graded a mere 11 numerically finer submissions. NGC ID# 256A, PCGS# 7256

**6125 1898-S MS65 PCGS.** This impressive Gem is brilliant and lustrous. Well struck design features and minimally abraded surfaces add to the coin's appeal. NGC ID# 256A, PCGS# 7256

**1898-S Morgan Dollar, MS66**  
**Condition Rarity in Finer Grades**

**6126 1898-S MS66 PCGS.** The 1898-S Morgan dollar is a conditionally scarce issue in MS66 and finer examples are extremely rare. This delightful Premium Gem displays well-detailed design elements and vibrant mint luster, under shades of golden-brown and lilac toning. The well-preserved surfaces reveal a few small marks above the date, but no other mentionable distractions. Population: 73 in 66 (4 in 66+), 3 finer (12/14). NGC ID# 256A, PCGS# 7256

**6127 1899 MS66 PCGS.** The low-mintage 1899 is a favorite date among series fans. This Premium Gem is as good as it gets for the issue, unless one is prepared to spend several thousand more dollars for one of the few MS67 examples, currently numbering 19 at PCGS (12/14). Cartwheel luster runs from surfaces that are anton-tinged at the rims on each side. Liberty's cheek and the eagle's breast each show a few minor marks that account for the grade, but they are minor, and the overall presentation is quite high. NGC ID# 256B, PCGS# 7258

**6128 1899 MS66 PCGS.** Pale cool mint and accents of warmer cherry enliven the surfaces of this nicely preserved Premium Gem, a top-notch example of this low-mintage date. The eagle's breast is free of mentionable contact, and a couple of reeding marks on Liberty's cheek are within the context of the grade. Lovely cartwheel luster runs over each side. PCGS shows only 19 submissions numerically finer (12/14). NGC ID# 256B, PCGS# 7258

**6129 1899 MS66 PCGS. CAC.** With a mintage of only 330,000 coins, the 1899 Morgan dollar is a notably elusive date in the finer Mint State grades. This Premium Gem example is beautifully preserved and frosty, with sharp design definition and exceptional visual appeal. PCGS has only certified 19 numerically finer representatives (12/14). NGC ID# 256B, PCGS# 7258

**1899 Silver Dollar, MS66**  
**Untuned Deep Mirror Prooflike**

**6130 1899 MS66 Deep Mirror Prooflike PCGS. CAC.** A rounded, clean cheek on the frosted portrait of Liberty exemplifies the high technical quality of this brilliant, untuned Deep Mirror Prooflike dollar. There are virtually no marks aside from a few nondescript pinpricks on its surfaces, obverse or reverse. The motifs are beautifully contrasted with silver, mirrored fields. A rarity in Deep Mirror Prooflike, and no coins are certified any finer by either service. Population: 12 in 66 Deep Mirror Prooflike, 0 finer (12/14). NGC ID# 256B, PCGS# 97259

**1899-O Silver Dollar, MS66**  
**Flashy Deep Mirror Prooflike Example**

**6131 1899-O MS66 Deep Mirror Prooflike PCGS.** The 1899-O Morgan is elusive in Deep Mirror Prooflike grades, and those grading finer than MS65 are significant condition rarities. This example shows well-defined motifs set against glassy mirrors, with a light golden tinge over both sides. No detracting marks are observed. Housed in an old green label holder. Population: 19 in 66 (1 in 66+) Deep Mirror Prooflike, 2 finer (12/14). NGC ID# 256C, PCGS# 97261

**1899-O Dollar, MS62**  
**Micro O Mintmark**

**6132 1899-O VAM 31, Micro O, MS62 PCGS.** A Top 100 Variety. A curious variety, with the mintmark punched approximately the size seen on a dime. A very elusive, distinct variety. Well-struck, satiny, and lightly toned golden, with a few minor abrasions on the obverse that influence the assigned grade. Ex: Palm Beach Signature (Heritage, 12/2004), lot 10150. PCGS# 133949 Base PCGS# 87260

**6133 1899-S MS65 PCGS.** Slight weakness over Liberty's ear, typical of nearly all Morgan dollar issues, appears on this Gem San Francisco Mint dollar. Both sides have excellent surfaces that host brilliant silver luster. The surfaces are fully brilliant and untoned. NGC ID# 256D, PCGS# 7262

**6134 1899-S MS65 PCGS.** Occasional whispers of gold-tan color appear on the brightly lustrous surfaces of this S-mint Morgan. The design elements are somewhat better brought up than typically seen on this issue, evidenced by partial detail in the hair over Liberty's ear and on the eagle's breast. A moderate mark on Liberty's jaw does not unduly disturb. NGC ID# 256D, PCGS# 7262

#### 1899-S Dollar, MS66

##### Rare Any Finer

**6135 1899-S MS66 PCGS.** A beautiful turn-of-the-century Premium Gem with a fresh silver-white interior on the obverse ringed by bold blue-to-violet patina. Similar colors grace the upper reverse of the cartwheel-luster reverse. In MS66 the 1899-S dollar is scarce, and PCGS has graded just nine coins finer (11/14).  
*From The College Collection. NGC ID# 256D, PCGS# 7262*

#### 1899-S Dollar, Bright MS66

**6136 1899-S MS66 NGC.** The NGC/PCGS population data show most certified 1899-S dollars to be in the MS63 to MS64 range. The numbers drop significantly in MS65, as well as in Premium Gem and finer. This well struck MS66 coin exhibits bright luster exuding from untoned surfaces. A few minor obverse marks do not detract. Census: 26 in 66, 1 finer (11/14).  
*Ex: Long Bach Signature (Heritage, 9/2007), lot 2834. NGC ID# 256D, PCGS# 7262*

**6137 1900-O/CC VAM-10A MS65 PCGS.** A Top 100 Variety. Widely popular among VAM specialists and Carson City dollar collectors, struck with a leftover tail die from the Carson City Mint when it ceased operations in 1893. This Gem example is softly frosted with light golden centers that deepen to amber and pale russet around the borders. Some striking deficiency is present on the eagle's breast and the hair above Liberty's ear, though the smooth, largely unabraded surfaces balance the eye appeal. PCGS# 133962 Base PCGS# 7268

**6138 1900-O/CC VAM-11 MS65 PCGS.** A Top 100 Variety. The overmintmark is clear with a glass, but this is a later die state with encircling die cracks on the reverse. Bright white in color and lustrous, with no deep or detracting nicks in the field or on Liberty's broad cheek. The fact that this reverse die was reused shows the economical mindset of the mints, as dies were precious and should not be discarded despite something as minor as an out of date mintmark. Scarce any finer.  
*Ex: Dallas Signature (Heritage, 11/2005), lot 3623. PCGS# 133963 Base PCGS# 7268*

**6139 1900-O/CC VAM-11 MS65 PCGS.** A Top 100 Variety. The diagonal die crack through the shoulder curl is one identifier for VAM-11, one of several collectible O/CC marriages for the year. The Carson City Mint ended coinage in 1893, but leftover dies gathered dust for an additional seven years. Well struck and lustrous with smooth fields and light gold patina. PCGS# 133963 Base PCGS# 7268

#### 1900-O/CC Dollar, VAM-11, MS66

##### An Important Red Book Variety

**6140 1900-O/CC VAM-11 MS66 PCGS.** A Top 100 Variety. The Capped Die variety, with the primary mintmark struck over a partially effaced CC. Bright luster cascades over both sides of this nearly color-free Morgan. The strike is about average, that is not full but still showing decent detail in the centers. A handful of grazes on the cheek and neck are within the parameters of the MS66 grade. Population for the variety: 2 in 66, 0 finer (12/14). PCGS# 133963 Base PCGS# 7268

#### 1900-O/CC Dollar, VAM-11, Well-Struck MS66

##### A Popular Morgan Dollar Variety

**6141 1900-O/CC VAM-11 MS66 PCGS. CAC.** A Top 100 Variety. Fragments of the partially effaced Carson City mintmark bookend the prominent New Orleans mintmark. Another common die marker for this VAM is a 'thread-like' impression on the lower cap above the hair ribbon. This well struck and essentially brilliant premium Gem has booming cartwheel luster on each side. An exceptionally preserved representative of this popular variety. Encased in an old green label holder. Population for the issue: 94 in 66 (3 in 66+), 2 finer; Population for the variety: 2 in 66, 0 finer (12/14). PCGS# 133963 Base PCGS# 7268

**6142 1900-S MS65+ PCGS. CAC.** This is a satiny and nicely preserved, untuned silver-gray example of this turn-of-the-century S-mint Morgan. Liberty's cheek shows a few light hits, nothing overt, and one larger mark appears in the center of the eagle's breast, but each side is rather nicely preserved overall. Several interesting die cracks appear on the obverse — through Liberty's nose tip, through the date and star 1, through the bust truncation and lower hair — and some others traverse portions of the reverse periphery. NGC ID# 256H, PCGS# 7270

**1901 Silver Dollar, MS62  
Upper-End for the Grade**

**6143 1901 MS62 PCGS.** A beautifully vibrant, untuned example of this conditionally elusive Philadelphia issue. The extreme centers show slight striking deficiency, but the definition is above-average for the issue. Faint, lightly distributed luster graces on Liberty's cheek and the adjacent field account for the grade from PCGS, but no truly distracting abrasions are present, making this piece appear remarkably high-end for the grade. NGC ID# 256J, PCGS# 7272

**6144 1901 Doubled Die Reverse, VAM-3, XF45 PCGS.** CAC. A pleasing Choice XF example of this popular variety, featuring faint blue toning highlights over its natural silver-gray surfaces. The two complete sets of tailfeathers are boldly detailed on this example. Population: 11 in 45, 27 finer (12/14). PCGS# 133965 Base PCGS# 7302

**1901-O Dollar, MS66+  
Just Three Coins Finer at PCGS**

**6145 1901-O MS66+ PCGS.** CAC. The 1901-O Morgan dollar has an unusually healthy mintage for its time and the antiquated status of its Mint, more than 13.3 million pieces. This MS66+ piece is primarily pearl-gray with occasional variations in color and a significant cartwheel effect. PCGS has graded just three examples as MS67 or better (11/14). NGC ID# 256K, PCGS# 7274

**1901-S Morgan Dollar, MS63  
Unusual Deep Mirror Prooflike Example**

**6146 1901-S MS63 Deep Mirror Prooflike PCGS.** Ex: Naples II Collection. The 1901-S is a much better date in any event, but Deep Mirror Prooflike examples are extremely rare. The present lot would at first glance nearly pass for a true proof. It is virtually untuned and has a good strike. A few minor facial marks explain the grade. Population: 2 in 63 Deep Mirror Prooflike, 2 finer (11/14). Ex: *Baltimore Signature (Heritage, 3/2009)*, lot 1516. NGC ID# 256L, PCGS# 97277

**6147 1902-O MS66+ PCGS.** CAC. An unusually vibrant example of this slightly better O-mint issue, this high-end Premium Gem is also devoid of significant abrasions and shows an above-average strike for the date. Traces of golden color accent the softly frosted surfaces. PCGS has only seen 15 numerically finer submissions (12/14). NGC ID# 256N, PCGS# 7280

**1902-O Morgan Dollar, MS65 Deep Mirror Prooflike  
Tied for Finest at PCGS**

**6148 1902-O MS65 Deep Mirror Prooflike PCGS.** The 1902-O Morgan dollar claims a large mintage of 8.6 million pieces, but the issue was not generally well-produced. Writing about the 1902-O in 1982, silver dollar specialist Wayne Miller opined, "Typically among the poorest struck of the late New Orleans dollars. Most are flatly struck, with horrible luster."

The present coin is a spectacular exception to the rule, as it exhibits sharply detailed design elements throughout, and well-preserved brilliant surfaces with no mentionable distractions. The fields display prooflike reflectivity on both sides, adding to the outstanding eye appeal. Population: 4 in 65 Deep Mirror Prooflike, 0 finer (11/14). NGC ID# 256N, PCGS# 97281

**6149 1902-S MS65 PCGS.** Deep multicolor peripheral hues surround light golden-gray centers on this well-preserved Gem example. Slight striking softness is noted on the hair above Liberty's ear, but the definition is nonetheless above-average for the issue. Only 43 coins are numerically finer at PCGS (12/14). NGC ID# 256P, PCGS# 7282

**6150 1903 MS67 NGC.** Abundant cartwheel luster careens around each side of this lovely, lightly toned Superb Gem, showing pinkish-gold patina on each side. The device high points show only a few minor, wispy marks. NGC ID# 256R, PCGS# 7284

**6151 1903 MS67 PCGS.** A few wisps of light gold color appear under magnification, and both sides show pleasing satiny luster. The design elements are strongly defined, the usual case for the issue. Impeccable preservation is apparent throughout. Population: 83 in 67 (1 in 67+), 0 finer (12/14).

*Ex: Long Beach Signature (Heritage, 2/2009), lot 1970; Chicago Signature (Heritage, 8/2011), lot 4813. NGC ID# 256R, PCGS# 7284*

---

**1903-O Dollar, MS66+ Prooflike  
Sole Finest Prooflike Example at PCGS**

**6152 1903-O MS66+ Prooflike PCGS. CAC.** Despite the discovery of thousands of 1903-O Morgan dollars in Treasury vaults in the early 1960s, Prooflike examples remain scarce, and are extremely rare finer than MS65. This Plus-designated Premium Gem example is brilliant in the centers, with violet and amber-gold tinges of color around the peripheries. The coin is well-struck and beautifully preserved, with no distracting marks in the mirrored fields. Population: 5 in 66 (1 in 66+) Prooflike, 0 finer (12/14). NGC ID# 256S, PCGS# 7287

---

**1903-S Dollar, MS63  
Distinctive Peripheral Patina**

**6153 1903-S MS63 PCGS.** Shimmering blue-to-violet interior toning drapes strong cartwheel luster. Arcs of deeper color are present along parts of the margins, particularly the upper and left obverse. Lightly abraded but attractive nonetheless, never a guarantee for this issue of fewer than 1.3 million pieces. NGC ID# 256T, PCGS# 7288

---

**1903-S Silver Dollar, MS64  
Elusive Late-Series S-Mint**

**6154 1903-S MS64 NGC.** The 1903-S is the most elusive in higher Mint State grades of the three late-series S-mint Morgan dollar issues from the 1902-S to 1904-S. This untoned near-Gem boasts attractive, well-struck surfaces that are only a couple of mentionable marks on each side away from a Gem grade — a couple of small ticks on Liberty's chin on the obverse, a patch of reeding marks above the eagle on the reverse. NGC reports 51 in numerically finer grades (10/14). A nice-looking coin for the grade. NGC ID# 256T, PCGS# 7288

**6155 1904 MS65 PCGS.** The 1904 Morgan dollar is a scarce issue that is conditionally rare in Gem or finer grades. This lovely piece is an excellent representative of the issue that is destined for a high grade Registry set of the series. It is fully lustrous with brilliant silver surfaces, satin luster, and sharp design elements, enhanced with light golden toning. PCGS has only certified 18 numerically finer pieces (12/14). NGC ID# 256U, PCGS# 7290

**6156 1904 MS65 PCGS.** Vivid blue-green central patina blends into rich reddish-copper hues at the margins on the obverse, while the reverse shows primarily copper-gold and greenish-gray at the margins with a near-untoned center. Both sides are nicely preserved, with cartwheel luster more perceptible on the reverse. Only 18 submissions at PCGS are numerically finer (12/14). NGC ID# 256U, PCGS# 7290

**6157 1904 MS65 PCGS.** Bright luster emanates from the nearly untuned surfaces of this adequately struck Gem. Scattered minute obverse marks are within the confines of the grade. This date is very elusive any finer. NGC ID# 256U, PCGS# 7290

---

**1904 Dollar, MS66  
Among the Finest Certified**

**6158 1904 MS66 NGC.** This blazing Premium Gem is largely brilliant with generally strong definition, an exception to the rule that defines the 1904 Morgan dollar issue. The only indication of incomplete occurs centrally over Liberty's ear and the eagle's breast feathers. The surface preservation is in accord with the lofty grade, and each side is devoid of any noteworthy impairments. Census: 10 in 66 (1 in 66+, 2 in 66 ★), 0 finer (10/14). NGC ID# 256U, PCGS# 7290

---

**1904-O Silver Dollar, MS67  
None Numerically Finer**

**6159 1904-O MS67 PCGS.** This Superb Gem 1904-O Morgan dollar is devoid of any mentionable surface flaws, showing smooth, satiny luster that exhibits just a suggestion of light golden color upon close examination. Minor softness is noted on the eagle's breast and the hair immediately above Liberty's ear, but the strike is otherwise pleasing. Population: 38 in 67, 0 finer (12/14). NGC ID# 256V, PCGS# 7292

---

**1904-O Morgan Dollar, MS67 ★  
Numerically Tied for Highest-Graded Example**

**6160 1904-O MS67 ★ NGC.** Prior to the Treasury release in 1962, the 1904-O silver dollar was a prized condition rarity within the Morgan series, with only a few known Mint State examples. Although Mint State examples are plentiful today, survivors at this grade level are most assuredly not. The NGC census indicates just six pieces at the MS67 ★ level, one at MS67+, and one at MS67+★. This snow-white example exhibits perfect dies and unmolested surfaces. NGC ID# 256V, PCGS# 7292

**6161 1904-S AU58 PCGS.** An attractive near-Mint example of this San Francisco issue, despite typical strike weakness over the centers. Essentially untuned with still-lustrous surfaces that display a few wispy pincatches, mainly on the reverse. NGC ID# 256W, PCGS# 7294

---

**1904-S Dollar, MS63  
Elusive Late-Series Issue**

**6162 1904-S MS63 PCGS.** The San Francisco is the scarcest of the three 1904 Morgan dollar issues, seldom available in any Mint State grade. This Select representative is well-struck, with radiant luster underlying warm golden toning that exhibits a few amber and lilac hues periodically over each side. No significant surface abrasions are observed. NGC ID# 256W, PCGS# 7294

---

**1904-S Morgan Dollar, MS63+  
A Premier Example of the Issue**

**6163 1904-S MS63+ NGC.** This is an impressive and pleasing example, despite typical striking softness over the centers. The dynamic cartwheel luster seen on each side is much better-than-average for this often lackluster issue, and attractive lavender and russet peripheral toning further increases the coin's overall appeal. NGC ID# 256W, PCGS# 7294

---

**1904-S Morgan Dollar, Untoned MS63**

**6164 1904-S MS63 PCGS. CAC.** This is a nicely lustrous, untuned silver-white example of this conditional rarity, showing only a light peppering of mostly tiny ticks and pecks that together define the grade but are individually insignificant. Some hazy brownish patina appears on the lower reverse, and the strike is a bit soft on the high points of each side. NGC ID# 256W, PCGS# 7294

---

**1904-S Dollar, MS64  
Above-Average Strike and Luster**

**6165 1904-S MS64 PCGS.** San Francisco Morgan dollars produced in 1904 are plagued by weak strikes and subpar luster, prime factors contributing to their scarcity in higher Mint State grades. This MS64 specimen, while not fully struck, still exhibits above-average design detail. In particular, the hair above Liberty's ear and the feathers on the eagle's breast show considerable definition. Moreover, both sides display pleasing luster and are devoid of significant marks. NGC ID# 256W, PCGS# 7294

**6166 1921-D MS64 Prooflike NGC.** More than 20 million examples of this Denver mint issue were struck, yet remarkably few exist in Prooflike condition. This is an appealing piece with razor-sharp strike definition, and surfaces that are draped in mottled olive and pastel rose patina. A few wispy abrasions on Liberty's chin and neck seemingly prevent a Gem assessment. Census: 64 in 64 Prooflike, 15 finer (11/14).  
From The Rawlin "Mac" McInelly Collection. NGC ID# 256Y, PCGS# 7299

**6167 1921-S MS65+ PCGS.** The final Morgan dollar issue at the San Francisco Mint, this example exhibits delicate greenish-champagne toning over brilliant and frosty silver surfaces. Only 65 submissions are PCGS certified in numerically finer grades (12/14). NGC ID# 256Z, PCGS# 7300

#### 1921-S Morgan Dollar, MS65+ Radiantly Frosty Mint Bloom

**6168 1921-S MS65+ PCGS. CAC.** An incredibly vibrant, frosty Gem example of this final-year San Francisco issue. The obverse is well-struck, though the reverse exhibits some of the typical weakness on the eagle's breast and the lower wreath leaves. A few faint luster grazes on Liberty's cheek preclude a full Premium Gem grade, though the eye appeal is hardly interrupted. Both sides display just a touch of light champagne color. PCGS has seen only 65 numerically finer submissions (11/14). NGC ID# 256Z, PCGS# 7300

#### 1921-S Morgan Dollar, MS66 No Superb Gems at PCGS

**6169 1921-S MS66 PCGS.** While the 1921-dated Morgan dollars are famously available in most grades, the San Francisco issue is scarce in Premium Gem and nigh-unobtainable any finer. This MS66 coin has frosty pearl-gray elements on the obverse with blue-green and amber at the lower border. The reverse is brighter silver with an obvious cartwheel effect. Population: 65 in 66 (2 in 66+), 0 finer (11/14). NGC ID# 256Z, PCGS# 7300

## PROOF MORGAN DOLLARS

### 1878 8 Tailfeather Morgan Dollar, PR65 Cameo First Design Style Struck in the Series

**6170 1878 8TF PR65 Cameo NGC.** The 1878 8 Tailfeather Morgan dollar proofs were the first of the new Morgan design, struck only in early 1878. These First Reverse coins not only showed eight tailfeathers, they also showed the topmost arrow feather on the left (facing) side parallel to the feathers below it (the so-called Parallel Arrow Feather style, often abbreviated PAF by numismatists). This First Reverse style was soon withdrawn in favor of a second style with seven tailfeathers and PAF, the so-called Second Reverse.

The proof 8 Tailfeathers silver dollars were struck in an estimated number of 500 proofs, according to the Bowers silver dollar *Guide Book*, although the Breen *Proof Encyclopedia* makes the number sound authoritative and exact. At any rate, despite the precise number struck, high-grade proofs are few and far between, and Cameo examples such as this PR65 Cameo piece graded by NGC are scarcer yet. The surfaces on this piece show sumptuous eye appeal, with a great deal of contrast between the well-frosted devices and perceptibly mirrored fields. A dash of cinnamon patina near the rims on each side further the appeal. Census: 6 in 65 Cameo, 19 finer (10/14).

From The Free Tilly Collection. PCGS# 87311

- 6171 1878 7TF Reverse of 1878 PR61 Cameo NGC.** This issue is challenging to locate with a Cameo finish. Indeed, NGC and PCGS have graded only 39 such pieces. This PR61 example is somewhat exceptional in that it is fully struck in the hair over Liberty's ear and displays strong field-motif contrast; these attributes are absent on many known examples of this issue (Bowers, 2012). Soft golden-orange patina clings to the margins, leaving the centers mostly color free. Slide marks on Liberty's cheek appear to be the only factor precluding a higher numerical grade. Nevertheless, this is a *much* sharper coin than the PR61 designation would indicate. Census: 1 in 61, 17 finer (12/14). PCGS# 87312

**1878 Morgan Dollar, PR63 Cameo  
Reverse of 1878**

- 6172 1878 7TF Reverse of 1878 PR63 Cameo PCGS.** A moderately toned, razor-sharp Select specimen with a strong cameo contrast and bright steel-gray surfaces. Only 750 proof 1878 Morgan Dollars were struck, which is a low figure considering the presumed demand for the first silver dollar issue since 1873. Further, two thirds of this scant mintage had the 8 Tailfeather reverse. Just 250 pieces were struck with the 7 Tailfeather 'Second' Reverse. Other than the proof-only 1895, this is the unquestioned 'key date' of the Proof Morgan Dollars. Population: 5 in 63, 15 finer (11/14).  
Ex: *Palm Beach Signature* (Heritage, 11/2004), lot 358; *Long Beach Signature* (Heritage, 2/2005), lot 10645.  
From The Free Tilly Collection. PCGS# 87312

**1879 Morgan Dollar, PR63  
Toned and Attractive**

- 6173 1879 PR63 NGC.** Although softly struck on the hair detail just above Liberty's ear, this proof displays generally sharp definition and a lack of wear or any other indications of mishandling. Both sides are deeply toned in hues of forest-green, lavender, and gold. Some light hairlines are seen on Liberty's cheek and in the left obverse field. Other marks in the coin's online photo image are actually located on the NGC holder, not on the coin itself. NGC ID# 27Z2, PCGS# 7314

**1879 Silver Dollar, PR63 Cameo  
Delicately Toned, Deeply Mirrored**

- 6174 1879 PR63 Cameo PCGS.** This early proof Morgan is boldly contrasted, and is fully struck through the hair curls and the eagle's talons. Impressively deep mirrors reveal a few faint hairlines when tilted beneath a light, though these quickly vanish to the unaided eye. A single burgundy-colored speck near the reverse rim at 9 o'clock is the only deep color on this otherwise light golden proof. Population: 11 in 63, 59 finer (11/14).  
From The Free Tilly Collection. PCGS# 87314

**1879 Morgan Dollar, PR64 Cameo  
Upper-End for the Grade**

- 6175 1879 PR64 Cameo PCGS. CAC.** This example is very well-struck and temptingly close to Gem status, being untuned save for a touch of golden-rose peripheral color. Even the occasional Gem specimen would have difficulty surpassing the eye appeal of this lovely 1879 proof. Population: 21 in 64 (4 in 64+), 38 finer (11/14).  
Ex: *FUN Signature* (Heritage, 1/2005), lot 11929.  
From The A. James Evans Collection, Part II. PCGS# 87314

**1880 Morgan Dollar, Lightly Toned PR63**

- 6176 1880 PR63 PCGS.** A fairly available proof issue from a mintage of 1,355 pieces, ideal for the collector seeking a single type representative in proof format. This well-struck Select representative displays satiny devices set against mirrored fields, with a uniformly golden overall hue. The obverse is noticeably contrasted, but the reverse just misses qualification for the designation. NGC ID# 27Z4, PCGS# 7315

- 6177** No lot.

**1880 Morgan Dollar, PR64 Cameo  
Vivid Multicolor Toning**

- 6178 1880 PR64 Cameo PCGS.** A gorgeous Choice proof Morgan with lovely powder-blue and autumn-gold peripheral toning. The strike is exacting, and the frosty devices contrast starkly with the mirrored fields. The well-preserved surfaces add to the unrivaled eye appeal. Population: 38 in 64 (1 in 64+), 50 finer (11/14).  
*Ex: Central States Signature (Heritage, 4/2008), lot 3046.*  
*From The Free Tilly Collection. PCGS# 87315*

**1880 Morgan Silver Dollar, PR67 Cameo  
Sharp, Contrasting Fields**

- 6179 1880 PR67 Cameo NGC.** The Bland-Allison Act resurrected the standard silver dollar in 1878, and the Mint quickly ramped up production of the large, lustrous cartwheels. Proof strikings of all denominations were already an annual affair, and the Morgan naturally joined the lineup. This Superb Gem is a testament to the Mint's ability to achieve sharp contrast between the fields and devices, as Liberty distinctly separates from the glassy surfaces. Census: 27 in 67 (1 in 67+, 3 in 67 ★), 16 finer (12/14). PCGS# 87315

**1881 Morgan Dollar, PR63  
975 Examples Struck**

- 6180 1881 PR63 PCGS.** A spectacular Select proof Morgan dollar from a mintage of 975 pieces, this coin is sharply detailed throughout and the reflective fields show only a few minor hairlines and contact marks. Vividly toned in shades of greenish-gold, cerulean-blue, and silver-gray. Eye appeal is outstanding.  
*From The Free Tilly Collection. NGC ID# 2725, PCGS# 7316*

**1882 Morgan Dollar, Choice Proof  
Scarce Issue in High Grade**

- 6181 1882 PR64 NGC.** A fairly generous mintage of 1,100 proof Morgan dollars was achieved in 1882, but examples in Choice condition are scarce today. The present coin displays razor-sharp definition on all design elements, and the reflective fields are tinted by delicate shades of gold toning. Only a few hairlines and contact marks are present, and they hardly diminish the considerable eye appeal.  
*Ex: FUN Signature (Heritage, 7/2011), lot 4227.*  
*From The Free Tilly Collection. NGC ID# 2726, PCGS# 7317*

**1882 Morgan Dollar, PR64 Cameo  
Beautiful Peripheral Toning**

- 6182 1882 PR64 Cameo PCGS.** Frosty central devices exhibit bold contrast with the mirrored fields, while the peripheries frame the display in vivid mint-gold, royal-blue, violet, and amber rings. The strike is bold, and there are just a few faint hairlines present in the fields to limit the grade. Population: 35 in 64 (1 in 64+), 31 finer (12/14). PCGS# 87317

**1883 Morgan Dollar, PR65 Cameo  
Clear Contrast**

- 6183 1883 PR65 Cameo PCGS.** From 1878 to 1883, the Mint struck three different dollars for general distribution to collectors and the Morgan dollar was the newest of the three, dating only to 1878. (The Trade dollar started in 1873 and the gold dollar in 1849.) This piece is clearly contrasted with just a hint of peach patina in an arc at the top left obverse and a faint echo at the bottom of the reverse. Population: 9 in 65, 13 finer (11/14).  
*From The Free Tilly Collection. PCGS# 87318*

1883 Morgan, PR66 Cameo  
Seldom Seen Finer

- 6184 1883 PR66 Cameo PCGS.** A lightly toned example with mottled hues over each side, and well-preserved surfaces that are contact-free. Full strike definition includes the eagle's talons and tailfeathers, along with all of the central motifs. This proof issue had a mintage of 1,039 pieces, very few of which are graded finer than PR64 at either service. Population: 12 in 66 (1 in 66+), 1 finer (11/14). PCGS# 87318

1884 Morgan Dollar, Deeply Toned PR66

- 6185 1884 PR66 NGC.** Both sides of this stunning Premium Gem proof show similar iridescent patina that runs the gamut from amber-gold at the centers all the way through deep violet, magenta, and olive-gray at the margins, with practically every intervening shade. The strike is nicely executed, and no perceptible signs of contact appear. A prize for the toning enthusiasts. Census: 19 in 66 (1 in 66 ★), 3 finer (12/14). NGC ID# 27ZB, PCGS# 7319

1884 Morgan Dollar, PR63 Cameo  
A Pleasing Mid-Grade Proof Type Coin

- 6186 1884 PR63 Cameo PCGS.** Pastel peach and sky-blue adorn the reverse, while the obverse has only a hint of gold toning. The strike is intricate, and the prominently reflective fields are void of detectable hairlines. The portrait is nicely frosted. A scant 875 proofs were struck. Population: 20 in 63, 37 finer (11/14). Ex: FUN Signature (Heritage, 1/2007), lot 7473. From The Free Tilly Collection. PCGS# 87319

1885 Morgan, Toned PR66

- 6187 1885 PR66 PCGS.** From a proof mintage of 930 coins, this Premium Gem displays bold design definition and the delicate surfaces are well-preserved. Deep toning in varying shades of olive, gold, ocean-blue, and pale lavender encompass each side, slightly muting the mirroring in the fields. Population: 17 in 66, 1 finer (12/14). NGC ID# 27ZE, PCGS# 7320

1885 Morgan, Toned PR65 Cameo

- 6188 1885 PR65 Cameo NGC.** A stunning Gem with excellent cameo contrast on both sides, created by the intersection of mirrored fields and lustrous devices. The centers on each side have light gold color, deepening to bold gold, violet, and vivid blue at the borders. A desirable example with a low Cameo proof population. Census: 20 in 65 (1 in 65+, 1 in 65 ★), 25 finer (11/14). Ex: Long Beach Signature (Heritage, 5/2007), lot 1644. From The Free Tilly Collection. PCGS# 87320

1886 Morgan Dollar, Fully Struck PR66  
Ex: JFS Collection

- 6189 1886 PR66 PCGS.** Ex: JFS Collection. This high-grade specimen is primarily straw-gold, but has a hint of rose-red near the rims. The strike is needle-sharp, and the fields appear flawless, without any hairlines or flan imperfections. A wonderful representative of the scarce proof mintage of 886 pieces. From The Free Tilly Collection. NGC ID# 27ZF, PCGS# 7321

---

**1887 Morgan Dollar PR63**  
**Sharply Detailed and Well-Contrasted**

- 6190 1887 PR63 PCGS. CAC.** From a limited mintage of 710 pieces, the 1887 proof Morgan dollar is very scarce in all grades today. This attractive Select specimen displays sharply detailed frosty design elements that contrast noticeably with the deeply mirrored fields. A few minor hairlines explain the grade. Housed in an old green label holder.  
From The Free Tilly Collection. NGC ID# 27ZG, PCGS# 7322

---

**1888 Morgan Dollar, PR64 Cameo**  
**833 Examples Struck**

- 6191 1888 PR64 Cameo PCGS.** The quicksilver surfaces are snow-white and blindingly mirrored, with good contrast and much appeal. A few slide marks appear on Liberty's cheek, however, and a tiny fleck of dark toning appears near the E in the Latin motto. Other contact is minimal, and the strike is expectedly pleasing. Population: 22 in 64 (3 in 64+), 10 finer (11/14).  
Ex: Baltimore Signature (Heritage, 3/2009), lot 1554.  
From The Free Tilly Collection. PCGS# 87323

---

**1889 Silver Dollar, PR63**  
**Undesignated Cameo Proof**

- 6192 1889 PR63 PCGS. CAC.** While the PCGS label lacks a designation, this piece qualifies as a cameo proof in our opinion, with satin devices over fully mirrored fields. Faint hairlines prevent a higher numerical grade. Both sides exhibit delicate gold toning that intensifies near the borders. NGC ID# 27ZJ, PCGS# 7324

---

**1889 Morgan Dollar, PR64**  
**Attractively Toned and Impressive**

- 6193 1889 PR64 NGC.** Gorgeous layers of variegated pastel toning create a rainbow-like effect on both sides, especially as this near-Gem proof example is rotated beneath a strong light source. The coin's strike definition is razor-sharp throughout, and the deeply toned surfaces are free of contact marks or other noteworthy defects. Census: 42 in 64, 48 finer (10/14). NGC ID# 27ZJ, PCGS# 7324

---

**1889 Morgan Dollar, PR64**  
**Memorable, Intense Toning**

- 6194 1889 PR64 PCGS.** A strikingly original proof, obviously undisturbed for 125 years, allowing it to acquire a thick and intense toning of steel-blue, royal-purple, and burnt-orange. The bold colors complement one another to form a rich and glowing patina. Deep mirrors flash at the margins although they are secondary to the comprehensive toning over the interiors. Boldly struck for this proof issue, with only minor blending of Liberty's hair strands. Population: 42 in 64, 28 finer (12/14). NGC ID# 27ZJ, PCGS# 7324

---

**1889 Morgan Dollar, PR64**  
**Moderately Contrasted**

- 6195 1889 PR64 PCGS Secure.** This fully struck Choice proof exhibits medium slate-gray and straw-gold toning. The fields are flashy, and the eagle and portrait show noticeable frost. The resulting contrast is to a degree just shy of a Cameo designation. Only trivial wispy marks are present. A scant 811 proofs were struck. Population: 42 in 64, 27 finer (10/14). NGC ID# 27ZJ, PCGS# 7324

**1889 Dollar, PR64 Cameo  
Vivid Aquamarine Toning**

- 6196 1889 PR64 Cameo PCGS.** Perhaps conservatively graded as a near-Gem, this lovely proof dollar seems fully struck, displaying none of the typical flatness above Liberty's ear and on the eagle's breast. Lovely cobalt-blue and crimson-pink toning embraces the nearly blemish-free surfaces, as the nicely contrasted devices rest above unfathomably deep fields. No bothersome hairlines are present, although a thin mark is noted on the eagle's breast. Population: 20 in 64 (2 in 64+), 19 finer (11/14).  
Ex: *Palm Beach Signature* (Heritage, 3/2005), lot 6388; *ANA Signature* (Heritage, 8/2007), lot 2521.  
From The Free Tilly Collection. PCGS# 87324

**1890 Morgan Dollar, PR63  
Better Proof Issue**

- 6197 1890 PR63 NGC.** Glimpses of orange, forest-green, and navy-blue patina enrich the rims of this exactly struck Select proof Morgan. The left obverse field has a few trivial hairlines, and the upper reverse field is slightly hazy. A mere 590 proofs were struck, the lowest mintage of the series aside from the three proof 1878 tailfeather varieties. The devices are thickly frosted. Certified in a prior generation holder.  
Ex: *FUN Signature* (Heritage, 7/2007), lot 1789.  
From The Free Tilly Collection. NGC ID# 27ZK, PCGS# 7325

**1890 Morgan Dollar, PR65+  
Beautiful Original Toning**

- 6198 1890 PR65+ PCGS.** Proof Morgan dollar production was limited in 1890, with only 590 pieces struck. This was the lowest proof mintage of all the dates in the series. The present survivor is a beautifully original Gem, showcasing natural hues of sun-gold, royal-purple, and ocean-blue on the obverse, with a more blended array of the same on the reverse. The strike is sharp and any grade-limiting hairlines in the fields are well-hidden by the rich patina. Population: 17 in 65 (1 in 65+), 22 finer (11/14). NGC ID# 27ZK, PCGS# 7325

**1891 Morgan Dollar  
Lightly Toned Choice Cameo Proof**

- 6199 1891 PR64 Cameo NGC.** The obverse of this pleasing Cameo proof has mostly brilliant silver color with a hint of peripheral gold toning, while the reverse has a small central patch of brilliant silver color that is framed by remarkable lilac and gold hues. A wonderful example that just misses the Gem grade level. From a mintage of only 650 pieces.  
Ex: *Long Beach Signature* (Heritage, 2/2007), lot 5817; *Central States Signature* (Heritage, 5/2007), lot 5071.  
From The Free Tilly Collection. PCGS# 87326

**1891 Morgan Dollar, PR64 Cameo  
Conditionally Scarce**

- 6200 1891 PR64 Cameo PCGS.** During the 1890s, the U.S. Mint delivered proof coinage of exceptional quality. This Cameo Morgan testifies to the craftsmanship of the era, as snow-white devices boldly emerge from contrasting fields. Lighter toning dots the obverse left field, and the glasslike surface is smooth save for a blending line underneath Liberty's chin. Population: 25 in 64, 20 finer (12/14). PCGS# 87326

**1891 Morgan, PR64 Cameo  
Colorful, Contrasting Fields**

- 6201 1891 PR64 Cameo PCGS.** Cameo proof coinage is a perpetual collector favorite, as central devices with eye-catching frost offset glassy surfaces. The effect is reinforced by the toning on this 1891 Morgan, which exhibits a colorful contrast between the silver-white portrait of Liberty and the auburn fields. The reverse features a similar toning scheme and reveals especially smooth surfaces for the assigned grade. Population: 25 in 64, 20 finer (12/14). PCGS# 87326

---

1893 Silver Dollar, Gem Cameo

- 6202 1893 PR65 Cameo NGC.** Ex: Richmond Collection. For the date collector, a high-grade proof 1893 Morgan dollar may prove more practical and aesthetically appealing than one of the scarce business strike issues from this year. This piece is deeply mirrored with frosty devices and just a touch of light golden color. The hair immediately above Liberty's ear is not fully brought up, but the strike is otherwise well-executed. Census: 10 in 65, 19 finer (11/14).  
Ex: Richmond Collection, Part II (David Lawrence, 11/2004), lot 1695.  
From The Free Tilly Collection. PCGS# 87328

---

1894 Dollar, Premium Gem Proof  
Mild Contrast

- 6203 1894 PR66 NGC.** This is a gorgeous Premium Gem proof with visible contrast, albeit not enough for a Cameo designation, and considerable visual appeal. The detail on the eagle's breast feathers is intricate and gorgeous. Only a few faint areas of toning visit each side. Census: 40 in 66 (1 in 66+), 34 finer (11/14).  
From The Free Tilly Collection. NGC ID# 2577, PCGS# 7329
- 6204 1896 PR64 Cameo PCGS.** Copious eye appeal is the hallmark of this nicely contrasted 1896 Morgan silver dollar, an untuned example save for a thin ring of golden patina at the extreme rim. A loupe reveals a few scattered hairlines on the obverse that determine the grade, but each side benefits from an excellent strike. Population: 19 in 64 Cameo, 17 finer (12/14).  
From The Free Tilly Collection. PCGS# 87331

---

1896 Dollar, PR67 Cameo  
Brilliant and Sharply Contrasted

- 6205 1896 PR67 Cameo NGC.** Proof dollars from 1896 are among the most attractive in the series. This was perhaps best stated by Wayne Miller:

"The proofs from 1896-1898 evidence the most awesome cameo contrast of any of the proof Morgans. Special care seems to have been taken during these years to maximize the depth of the mirror fields, and the whiteness of the devices."

Evidence of the care taken by Mint personnel can be seen by the presence of die polishing below and within Liberty's ear and scattered in a couple of polished areas in the lower part of the hair. This is a completely brilliant example that displays stark cameo contrast between the fields and devices on each side. The surfaces are essentially perfect with no noticeable marks. Census: 19 in 67 (1 in 67+, 3 in 67 ★), 5 finer (11/14).  
Ex: Summer FUN (Heritage, 7/2010), lot 4294. PCGS# 87331

- 6206 1897 PR62 Cameo PCGS.** Beautiful toning on each side of this nicely contrasted proof is largely copper-amber in color, although a sliver of metallic blue decorates the lower-left obverse rim. Mirrored fields and well-frosted devices provide perceptible cameo contrast. A few scrapes and hits on each side include one noticeable indent in the center of Liberty's cheek. Population: 3 in 62 Cameo, 26 finer (12/14).  
From The Free Tilly Collection. PCGS# 87332

**1898 PR65 Deep Cameo Dollar**  
**Exceptional White-on-Black Contrast**

**6207 1898 PR65 Deep Cameo PCGS.** The 1898 was among the best-made, if not the best, in the proof Morgan dollar series. Wayne Miller, in *The Morgan and Peace Dollar Textbook*, says: "In its production of the 1898 proof silver dollar, the Philadelphia mint was as close to perfection as possible. Of the five most breathtaking proof Morgans the author has ever seen, three were of the 1898 issue. These specimens were incredibly deeply mirrored cameos, with devices so frosty white they appeared to be painted on."

Miller's description aptly applies to the present Gem Deep Cameo example, as the frosty white motifs appear to float over the deeply mirrored, watery fields. The sharpness of strike seems to enhance this contrast. Under magnification, well-preserved surfaces reveal just a whisper of gold-tan color at the margins. This is a simply fantastic coin. Population: 5 in 65, 23 finer (11/14).

Ex: *Queller Family Collection of Silver Dollars / Central States Signature (Heritage, 4/2008)*, lot 2205. PCGS# 97333

**1899 Morgan Dollar, PR63**  
**Scarce, Low Total-Mintage Date**

**6208 1899 PR63 PCGS.** This date saw a low total-mintage of both proofs and business strikes at the Philadelphia Mint, as a mere 846 proofs and just 330,000 commercial coins were issued. This sharply detailed example is fully brilliant on both sides, with an abundance of glassy reflectivity noted in the fields. An attractive piece, free of contact marks, with a few trivial hairlines noted that seemingly restrict the grade. NGC ID# 27ZX, PCGS# 7334

**1899 Morgan, PR63**  
**Old Green Holder**

**6209 1899 PR63 PCGS.** A light golden hue warms the deeply reflective mirrors on both sides of this Select proof example. The strike is sharp and the surfaces exhibit only light hairlines to limit the grade. The reverse is fully cameo in appearance, while the obverse is close but no cigar. The 1899 proof was struck to extent of 846 pieces, and is popular due to the semikey status of its business strike counterpart. Housed in an old green label holder. NGC ID# 27ZX, PCGS# 7334

**1900 Dollar, PR65**  
**Vivid Multicolor Patina**

**6210 1900 PR65 PCGS. CAC.** The color on this Gem turn-of-the-century proof is simply outstanding. Vivid splashes of royal-blue, deep purple, mint-gold, and lavender-orange blanket glassy fields and bold, satiny devices. Any grade-limiting hairlines are fully hidden by the rich patina. From a mintage of only 912 proofs. Population: 22 in 65, 15 finer (11/14). NGC ID# 27ZY, PCGS# 7335

**1900 Morgan Dollar, PR65 Cameo**  
**Appealing Rim Toning**

**6211 1900 PR65 Cameo NGC.** The design elements display striking contrast with the watery fields, affirming the Cameo designation of this appealing Gem proof. Delicate mauve toning rings the peripheries, and is joined on the obverse by a narrow band of cobalt-blue, purple, and golden-brown. The strike is sharp throughout, with just a hint of trivial softness in portions of the hair over Liberty's ear. A few stray, unobtrusive hairlines preclude an even higher grade. Census: 17 in 65 Cameo, 37 finer (12/14). PCGS# 87335

**1901 Morgan Dollar, PR64**  
**Proof Mintage of 813 Pieces**

**6212 1901 PR64 PCGS.** With so few Mint State 1901 silver dollars extant, it is little wonder that the similarly dated specimen strikings are accorded special status in the proof Morgan series. Uniformly brilliant, as befits the Mint's method of proof production in the early 20th century, this Choice quality example shimmers beneath moderate smoky-gray and tan colors at the borders. Both sides are boldly struck with no outwardly noticeable handling marks. Housed in a green label holder. Population: 76 in 64, 30 finer (11/14). From *The Free Tilly Collection*. NGC ID# 27ZZ, PCGS# 7336

**1902 Morgan Dollar, PR63  
Warm Golden-Amber Toning**

- 6213 1902 PR63 PCGS.** A lavish display of amber, gold, and crimson iridescence adorns the peripheral regions of this relatively scarce Select proof Morgan dollar. The design motifs are crisply struck and the fields are highly reflective. Wispy hairlines in the left obverse field and faint slide marks on Liberty's cheek preclude a higher grade assessment.  
Ex: FUN Signature (Heritage, 1/2008), lot 5731.  
From The Free Tilly Collection. NGC ID# 2822, PCGS# 7337

**1902 Morgan Dollar, PR63  
Brilliant, Well-Preserved Specimen**

- 6214 1902 PR63 PCGS Secure.** Regarding proofs of this date, Bowers comments in *A Guide Book of Morgan Silver Dollars* that: "The strike is usually average at best, but some employee, perhaps new on the job, decided this year to polish the portraits on the various Proof dies, and to *really* polish them in 1903 — doing away with cameo contrast." Bowers' comments seem to be confirmed by the graded population data from NGC and PCGS, where a remarkably low combined total of just 10 1902 pieces have been rated with full Cameo contrast, as of (10/14). This fully brilliant specimen is a bit soft on the hair detail above Liberty's ear, but the fields display substantial reflectivity and the surfaces are contact-free on both sides. NGC ID# 2822, PCGS# 7337

**1902 Morgan Dollar, PR67  
Colorful Rim Toning**

- 6215 1902 PR67 NGC.** In the early 1900s the Mint began polishing the devices of Morgan proof dies, leading to a more uniform finish across the entire coin. This Superb Gem is one of the finest survivors of the new technique. Light reflects most intensely within the textured coiffure and cap, and both sides exhibit a pleasing peripheral tone of maroon. Census: 11 in 67 (1 in 67 ★), 7 finer (12/14). NGC ID# 2822, PCGS# 7337

**1903 Morgan Dollar, PR64  
Flashy, Deeply Mirrored Specimen**

- 6216 1903 PR64 PCGS.** Brightly mirrored surfaces are essentially untuned and exhibit far more flash than is generally seen on this late-date proof Morgan. The design elements exhibit razor-sharp definition and more mint frost than is usually evident on a post-1902 proof. Population: 71 in 64 (1 in 64+), 70 finer (11/14).  
Ex: Long Beach Signature (Heritage, 9/2003), lot 9113; FUN Signature (Heritage, 1/2005), lot 12013.  
From The Free Tilly Collection. NGC ID# 2823, PCGS# 7338

**1904 Morgan Dollar, PR64  
Low-Mintage of 650 Pieces**

- 6217 1904 PR64 PCGS.** Deeply mirrored in the fields with each side covered in splendid, multicolored toning. Only 650 proofs were struck in this, the final year for regular production of the Morgan dollar. Far fewer examples are known today, especially in near-Gem and finer grades. Sharply struck throughout, as one would expect. Population: 80 in 64 (1 in 64+), 61 finer (11/14).  
Ex: Houston Signature (Heritage, 12/2008), lot 3324.  
From The Free Tilly Collection. NGC ID# 2824, PCGS# 7339

**1904 Morgan, PR66  
Final Proof Issue in the Series**

- 6218 1904 PR66 NGC.** The 1904 is the last year of proof Morgan strikes and it enjoys as a date the second lowest proof mintage in the series. This colorfully toned example exhibits an obverse with maroon and russet, while shades of aqua and copper sprinkle the reverse. Liberty's crisp definition reveals full detail at the ear and on the eagle's breast. Conditionally scarce, this example would be the capstone of a set of proof Morgan dollars. Census: 32 in 66 (1 in 66 ★), 25 finer (12/14). NGC ID# 2824, PCGS# 7339

**1921 Morgan Dollar, Zerbe PR64  
Esoteric Rarity**

- 6219 1921 Zerbe PR64 NGC.** The diagnostics for this issue are clearly visible as outlined in the *Breen Proof Encyclopedia*: a tiny die line runs from the left tip of the second U in UNUM to the rim; the first 1 shows its left bottom serif above the center of a dentil, and the right edge of the last 1 is a tad right of the left edge of e dentil. On the reverse, recutting shows on the left side of the T in UNITED, and die file marks are abundant within and flanking the bows and ribbons tying the wreath. The strike through the central details (most visible on Liberty's hair above and below the ear) is far sharper than on Uncirculated coins. The surfaces of this near-Gem proof are mostly brilliant with a light touch of gold, an attractive example of this esoteric rarity. Census: 15 in 64, 19 finer (10/14). From *The Free Tilly Collection*. NGC ID# 257A, PCGS# 7341

**PEACE DOLLARS**

- 6220 1921 MS65 PCGS.** The new Peace dollar type was struck in a high relief format. This example is boldly detailed save for the usual softness across the centers. The essentially untoned surfaces exhibit soft, glowing mint frost and just a few inoffensive, trivial marks. NGC ID# 2U4E, PCGS# 7356
- 6221 1921 MS65 NGC.** Color-free surfaces yield pleasing luster and well-struck design features. A few light obverse marks are consistent with the grade designation. NGC ID# 2U4E, PCGS# 7356
- 6222 1921 MS65 PCGS.** Ice-blue and caramel-gold toning visit this lustrous and lightly abraded Gem. The strike is crisp except on the hair near the ear, which is usually indistinct on the high relief 1921. Housed in a green label holder.  
Ex: *St. Louis Central States (Heritage, 5/2005)*, lot 10023. NGC ID# 2U4E, PCGS# 7356
- 6223 1921 MS65 PCGS.** Lovely pastel pinkish-gray and mint-green coloration adorns the carefully preserved surfaces of this boldly struck Gem. A small milling mark in the left obverse field, and another concealed in the eagle's upper back, fail to challenge the MS65 grade assessment. A pleasing satiny sheen further enhances the appeal of this desirable item.  
Ex: *Long Beach Signature (2/2005)*, lot 10684. NGC ID# 2U4E, PCGS# 7356
- 6224 1921 MS65 PCGS.** Dusky gold and pinkish-gray patina appears in conjunction with untoned silvery and charcoal-gray areas on this attractive Gem 1921 Peace dollar. The strike through the obverse center is about typical for the issue, but there are no marks of consequence. A nice example for type purposes. NGC ID# 2U4E, PCGS# 7356

- 6225 1921 MS65 ★ NGC.** The 1921 Peace dollar exists in plentiful numbers in the Gem level of preservation, but only eight MS65s have been given the Star designation and just six in finer numerical grades are assigned the Star (12/14). The radiantly lustrous minimally abraded surfaces with sharply struck design features account for this MS65 ★ example. NGC ID# 2U4E, PCGS# 7356

- 6226 1921 MS65 PCGS. CAC.** Both sides of this Gem display frosty luster and sharply struck design elements. Remarkably clean surfaces for an MS65 and well deserving of the CAC endorsement. NGC ID# 2U4E, PCGS# 7356

**1921 Peace Dollar, MS66  
Above-Average Strike**

- 6227 1921 MS66 NGC.** Most 1921 Peace dollars are flatly struck in the centers. While not fully defined, the current Premium Gem exhibits above-average detail in the hair at Liberty's ear. Pleasing luster radiates from both sides, each of which is untuned and has been well cared for. This specimen possesses very nice overall eye appeal. NGC and PCGS have graded only 13 examples finer (11/14). NGC ID# 2U4E, PCGS# 7356

**1921 Dollar, Better Struck MS66**

- 6228 1921 MS66 PCGS.** The 1921 Peace dollars were struck in high relief which proved difficult for the Philadelphia Mint because it took tremendous striking pressure to bring out all details. Die life was short and the striking pressure was reduced, resulting in many coins being weakly struck, most evident in the centers. The current MS66 coin is somewhat better defined in the hair at Liberty's ear. Lustrous surfaces display occasional blushes of champagne-gold and are free of significant marks. PCGS has graded only seven pieces finer (12/14). NGC ID# 2U4E, PCGS# 7356
- 6229 1921 VAM-1F, Matte Proof Dies, MS65 PCGS. CAC.** Although a business strike, the present Gem was coined from the same die pair as the rare matte proofs. The die markers include a curved line from the right top of the V in TRVST, and a pair of die polish lines through the A in DOLLAR. The variety is undesignated on the holder, since it precedes David Close's 2005 discovery of VAM-1F. Lustrous and nicely struck with delicate ice-blue and gold toning.  
Ex: *San Francisco ANA Signature (Heritage, 7/2005)*, lot 7027.  
From *The A. James Evans Collection, Part II*. PCGS# 518799 Base PCGS# 7356

**1921 Peace Dollar, MS66  
VAM-1H, Satin Proof Dies**

- 6230 1921 VAM-1H, Satin Proof Dies, MS66 PCGS Secure. CAC.** An Elite 30 Variety. VAM-1H was struck from the same dies used to strike the rare satin proofs of 1921. Heavy circular die polishing lines around WE in IN GOD WE, as well as around OF in UNITED STATES OF AMERICA, identify the variety. PCGS has attributed only six examples of this variety, with the present piece being the sole finest (12/14). Traces of light golden color accent the satiny surfaces. Above-average striking definition is present on both sides, and the surfaces are free of any major abrasions. An immensely attractive Peace dollar and a representative of a widely popular variety. PCGS# 518800 Base PCGS# 7356

- 6231 1922 MS64 NGC.** This sharply struck near-Gem displays hints of soft champagne color over both sides. A hair-thin mark is noted across portions of the lower reverse. NGC ID# 257C, PCGS# 7357

**1922 Peace Dollar, MS66+  
Bright Silver Luster**

- 6232 1922 MS66+ PCGS. CAC.** The 1922 is among the most plentiful of Peace dollars, yet even it is a significant condition rarity in grades finer than Premium Gem. This MS66+ piece has bright silver luster and impressively smooth surfaces. An all-around worthy coin for type and date collectors alike. PCGS has graded just 25 pieces as MS67 or better (12/14). NGC ID# 257C, PCGS# 7357

**1922 Peace Dollar, MS67  
Heavily Frosted Mint Bloom**

- 6233 1922 MS67 NGC.** One of the most plentiful dates in the Peace dollar series, the 1922 yields only to the 1923 in terms of high-grade availability, but becomes a significant condition rarity at the MS67 level. This thickly frosted Superb Gem showcases beautifully vibrant, gold-tinted surfaces and sharp design elements. Census: 35 in 67 (1 in 67 ★), 0 finer (12/14). NGC ID# 257C, PCGS# 7357

- 6234 1922-D MS66 NGC. CAC.** Intensely frosted mint bloom reveals just a few traces of light golden color as it cartwheels around each side. The strike is sharp and there are no surface distractions on either side. The 1922-D Peace dollar is seldom available in MS66, and finer pieces are rare. NGC has encapsulated just 16 numerically finer representatives (12/14). NGC ID# 257D, PCGS# 7358

- 6235 1922-S MS65 NGC.** This Gem is well-struck and untuned, displaying semireflective fields with a curious lack of bagmarks compared to the average member of this San Francisco Mint issue. A few wispy luster grazes occur on both sides, and small contact marks show on the central devices. An attractive and conditionally scarce Gem example of this early Peace dollar issue. NGC reports only 15 numerically finer — all MS66 (12/14). NGC ID# 257E, PCGS# 7359

- 6236 1922-S MS65 PCGS.** Whispers of soft violet and yellow-green rest on the lustrous surfaces of this impressively defined Peace dollar. A handful of minuscule grade-consistent marks does not disturb. Just a few more than 20 pieces numerically finer have been graded by PCGS and NGC (12/14). NGC ID# 257E, PCGS# 7359

- 6237 1922-S MS65 PCGS. CAC.** A few wisps of light tan color show up on the radiantly lustrous surfaces under magnification, and a solid strike delivers bold detail to the design elements. A few minor reverses grazes may be all that precludes an even finer grade. MS65 is the finest most collectors can expect to encounter as the two major services have seen only 22 pieces finer (12/14). NGC ID# 257E, PCGS# 7359

- 6238 1922-S MS65 PCGS. CAC.** Freckles of light gray patina run over the lustrous surfaces of this Gem S-mint example. The design elements are well-struck and both surfaces are very nicely preserved. A graze on the eagle's head does not detract. Well-deserving of the CAC label. PCGS has graded a mere seven pieces finer (12/14). NGC ID# 257E, PCGS# 7359

**1922-S Dollar, MS66  
Condition Rarity**

- 6239 1922-S MS66 NGC.** While the 1922-S dollar commands little premium over type in circulated grades, each point within the Mint State spectrum raises the price substantially. This Premium Gem has bright silver surfaces with only faint suggestions of gunmetal patina dotting parts of the fields. Census: 15 in 66, 0 finer (11/14). NGC ID# 257E, PCGS# 7359

- 6240 1923 MS66+ PCGS. CAC.** Sharply struck design features, blazing luster, and minimally abraded surfaces combine to yield great overall eye appeal, aptly recognized by CAC. A few wisps of nearly indiscernible gold color appear under magnification. The 1923 is plentiful in Premium Gem but elusive any finer. NGC ID# 257E, PCGS# 7360

**1923 Peace Dollar, MS67**  
**Vibrant Luminescence**

**6241 1923 MS67 PCGS Secure.** Traces of light golden color attest to the originality of the intense mint frost that blankets each side of this gorgeous Superb Gem like a layer of freshly fallen snow. The strike is sharp and the surfaces are almost perfectly preserved. No date in the series is better suited for type purposes than the 1923, with its characteristically dazzling eye appeal. Population: 54 in 67, 0 finer (12/14). NGC ID# 257F, PCGS# 7360

**1923 Peace Dollar, MS67**  
**Intense Mint Frost**

**6242 1923 MS67 NGC. CAC.** In regards to the perfect combination of high-grade availability and superior eye appeal, the 1923 Peace dollar is one of the most popular dates in the series. This Superb Gem representative is awash in fresh, frosty mint luster that cartwheels uninterrupted around each side. The strike is sharp, and just a suggestion of light golden color is discernable in good lighting. Census: 95 in 67, 0 finer (12/14). NGC ID# 257F, PCGS# 7360

**1923-D Peace Dollar, MS66**  
**Only One Coin Numerically Finer**

**6243 1923-D MS66 PCGS Secure.** A much more elusive issue than its Philadelphia counterpart, the 1923-D Peace dollar becomes scarce as early as the MS66 grade level. This well-struck example exhibits soft cartwheel luster beneath dusky golden-gray toning. The strike is sharp and the preservation is excellent. Population: 91 in 66 (3 in 66+), 1 finer (12/14). NGC ID# 257G, PCGS# 7361

**1923-D Silver Dollar, MS66**  
**Radiant Mint Luster**

**6244 1923-D MS66 PCGS Secure.** Remarkably vibrant mint bloom radiantly illuminates subtle golden hues on each side of this Premium Gem example which deepen toward the peripheries. The strike is bold, and only a few faint surface grazes preclude an even finer numeric grade. Excellent quality for the issue. Population: 91 in 66 (3 in 66+), 1 finer (12/14). NGC ID# 257G, PCGS# 7361

**1923-S Silver Dollar, MS65**  
**Green Label Holder**

**6245 1923-S MS65 PCGS.** A softly frosted, well-preserved Gem example of this early San Francisco issue, exhibiting just a touch of light golden color over each side. The strike is sharp and the eye appeal is correspondingly high. Housed in a green label holder. PCGS has encapsulated only three numerically finer representatives (12/14). NGC ID# 257H, PCGS# 7362

**1923-S Silver Dollar, MS65**  
**Pleasing Cartwheel Luster**

**6246 1923-S MS65 NGC.** Blazing luster is immediately apparent on this piece, and further study will reveal unusual detail for the date on Liberty's head, although a bit of strike weakness can be noted in the reverse lettering. Just a hint of gold tone interrupts this piece's white color. An abrasion above Liberty's eye prevents a finer grade. Census: 82 in 65, 1 finer (12/14).  
*Ex: Long Beach Signature (Heritage, 5/2008), lot 2749.* NGC ID# 257H, PCGS# 7362

**1923-S Dollar, MS65**  
**Extremely Rare in Finer Grades**

- 6247 1923-S MS65 PCGS Secure.** The 1923-S is the scarcest Peace dollar from this year in Gem and finer condition, being scarce in MS65 and prohibitively rare in better grades. This golden-toned example is frosty and well-preserved, also showing a sharp strike which contributes to the overall eye appeal. Only three coins are numerically finer at PCGS (12/14). NGC ID# 257H, PCGS# 7362

**1924 Silver Dollar, MS67**  
**Fresh, Incredibly Heavy Mint Frost**

- 6248 1924 MS67 NGC. CAC.** Incredibly thick mint frost dazzles each side of this Superb Gem like a fresh blanket of snow, vibrantly cartwheeling with just the slightest tilt beneath a light. The strike is bold, and surface abrasions are seemingly nonexistent. A remarkably eye-appealing coin that will impress even the most discerning collector. Superior to most examples of this type in general. Census: 83 in 67 (1 in 67 ★), 1 finer (12/14). NGC ID# 257J, PCGS# 7363

**1924 Peace Dollar, MS67**  
**VAM-5A, The 'Broken Wing' Variety**

- 6249 1924 VAM-5A, Broken Wing MS67 NGC.** A Top 50 Variety. A heavy, semicircular die break through the eagle's wing identifies this popular VAM variety. NGC has attributed only 47 examples of this variety, with the current offering being tied with one other piece as the finest by two full grade points (11/14). Brilliant, heavily frosted mint bloom engulfs each side in dazzling radiance, while the design elements are sharply impressed and the surfaces are devoid of all but the most minuscule grazes. From The Sweet Bloomfield Collection. PCGS# 133766

- 6250 1924-S MS64+ PCGS. CAC.** The soft gold-colored obverse cedes to a brilliant reverse. Lustrous surfaces yield sharply struck devices and are minimally abraded. NGC ID# 257K, PCGS# 7364

**1924-S Peace Dollar, MS65**  
**Only One Piece Numerically Finer at NGC**

- 6251 1924-S MS65 NGC.** Unlike its Philadelphia counterpart, which is readily available in high grades, the 1924-S Peace dollar is scarce at the Gem level, and extremely rare and expensive any finer. The present coin is beautifully preserved and exactly struck, with just a glimpse of light golden color over otherwise brilliant, frosty luster. Census: 70 in 65, 1 finer (11/14). From The Sweet Bloomfield Collection. NGC ID# 257K, PCGS# 7364

**1924-S Dollar, Well-Struck MS65**  
**Elusive at This Level**

- 6252 1924-S MS65 NGC.** Mint State 1924-S dollars are difficult to locate, especially above the near-Gem level. The two major services have seen only about 150 Gems and a mere six coins numerically finer. Freckles of olive visit the lustrous surfaces of this offering, and the design elements are nicely struck including strong definition in the hair at Liberty's ear. A few minor reverse marks are within the parameters of the grade designation. Census: 70 in 65, 1 finer (11/14). NGC ID# 257K, PCGS# 7364

**1924-S Dollar, MS65**  
**Rarely Encountered Finer**

- 6253 1924-S MS65 PCGS Secure.** Available in lower grades, the 1924-S Peace dollar becomes conditionally scarce in Gem condition, and finer representatives are extremely rare. This satiny, light golden example is well-struck with minimal marks on Liberty's cheek to limit the grade. A vibrant cartwheel effect is activated when tilted beneath a light. Population: 79 in 65 (1 in 65+), 5 finer (12/14). NGC ID# 257K, PCGS# 7364

---

**1925 Peace Dollar, MS67  
Superb Type Representative**

**6254 1925 MS67 PCGS.** While numerous dates in the Morgan dollar series are available in Superb Gem condition, the same fortune is not granted to Peace dollars. Only a handful of dates in this series can be considered collectible in this grade, but even these are elusive. The 1925 is arguably the most plentiful issue in the series in MS67, ideal for the collector seeking one of the finest type coins available. The present piece is devoid of color but vibrant in frosty mint bloom. The strike is sharp and there are no disruptive abrasions present. Population: 95 in 67 (1 in 67+), 1 finer (12/14). NGC ID# 257L, PCGS# 7365

---

**1925 Peace Dollar, MS67  
Captivating Fresh Mint Bloom**

**6255 1925 MS67 NGC. CAC.** A strikingly superb type coin, this MS67 1925 Peace dollar is about as eye-appealing as possible for this series. Spectacular, vibrant cartwheel luster illuminates heavily frosted surfaces and distinctly captivating sun-gold hues that swirl over each side. The strike is sharp, and the surfaces are devoid of distractions. A seemingly unsurpassable representative not only of this date, but of the Peace dollar type in general. NGC ID# 257L, PCGS# 7365

---

**1925 Peace Dollar, MS67  
Only Two Coins Numerically Finer**

**6256 1925 MS67 PCGS Secure. CAC.** The surfaces of this Superb Gem 1925 Peace dollar are remarkably clean, showing a distinct satiny luster that is noticeably different than, but equally as appealing as, the heavily frosted mint bloom that is typical of the previous issues from this mint. This example is essentially brilliant, though a suggestion of golden color appears when tilted beneath a light. Population: 95 in 67 (1 in 67+), 1 finer (12/14). NGC ID# 257L, PCGS# 7365

---

**1925-S Peace Dollar, Frosty MS65  
Significant Series Condition Rarity**

**6257 1925-S MS65 PCGS.** Extremely elusive in Gem grade, the 1925-S is frequently found lightly struck, or with extensive bagmarks. Judging from the current PCGS population data, and ignoring the inevitable duplications, one could justly argue that this issue is the most elusive in Gem condition, since there are fewer MS65 pieces certified than any other Peace dollar. While even key dates such as the 1928 and 1934-S show PCGS populations of 276 and 204 pieces, respectively, the 1925-S in MS65 shows a current population of only 40 pieces, with none finer (11/14). The satiny silver-gold surfaces show scattered, small glints of amber and ice-blue patina. Ex: FUN Signature (Heritage, 1/2007), lot 1150. From The Sweet Bloomfield Collection. NGC ID# 257M, PCGS# 7366

**1925-S Peace Dollar, MS65  
Tied for Finest Certified at PCGS**

**6258 1925-S MS65 PCGS Secure.** The 1925-S Peace dollar is one of the rarest dates in the series in Gem and finer condition, rivaled at this level only by the also conditionally scarce 1928-S. Not even the key-date 1928 or the scarce 1930s issues claim close proximity to the 1925-S in regards to high-grade rarity. PCGS has encapsulated only 40 representatives in MS65 and none finer, while NGC reports having seen 65 pieces in this grade (2 in 65+), and one MS66 coin numerically finer (12/14). This representative is well-preserved, with frosty luster shining through a blanket of pale champagne toning. The strike is sharp, contributing to the overall eye appeal. NGC ID# 257M, PCGS# 7366

**6259 1926 MS66 PCGS. CAC.** Golden toning over the obverse has a fainter echo on the reverse. A lustrous Premium Gem, tied for numerically finest in the PCGS *Population Report* (12/14). NGC ID# 257N, PCGS# 7367

**6260 1926-S MS65+ PCGS Secure. CAC.** Occasional gold freckles are visible on the highly lustrous surfaces of this high-end Gem, somewhat more evident on the reverse. Sharply defined devices and impeccable preservation further affirm the CAC endorsement. NGC ID# 257R, PCGS# 7369

**1926-S Peace Dollar, MS66  
Only Two Pieces Finer**

**6261 1926-S MS66 PCGS.** The 1926-S Peace dollar is not especially elusive, but MS66 examples fall into a different class. Uninterrupted luster highlights the silver-white obverse, while the reverse exhibits hints of crimson and gray. Liberty's exceptionally smooth face quickly draws the viewer's eye to this conditionally scarce Peace dollar. Population: 73 in 66, 2 finer (12/14). NGC ID# 257R, PCGS# 7369

**1926-S Silver Dollar, MS66  
Extremely Rare Any Finer**

**6262 1926-S MS66 PCGS Secure.** The 1926-S is notably elusive at the MS66 grade level, and is seen much less often than many of the previous issues in the Peace dollar series. This example is remarkably vibrant, with areas of pale champagne toning overlying the satiny, well-preserved surfaces. A sharp impression of the dies contributes to the eye appeal. Population: 73 in 66, 2 finer (12/14). NGC ID# 257R, PCGS# 7369

**6263 1927 MS65 PCGS.** A lovely Gem representative of this scarce, low-mintage issue. Vibrant luster radiates from the well-preserved, minimally abraded surfaces. Housed in an old green PCGS holder. NGC ID# 257S, PCGS# 7370

**6264 1927 MS65 PCGS.** This is a low-mintage issue of 848,000 coins, yet Mint State examples are quite numerous through the MS64 grade level, finally becoming scarce at MS65. This Gem displays outstanding luster and lightly toned, silver-gray surfaces with bold strike definition and a few minor abrasions on the obverse. NGC ID# 257S, PCGS# 7370

**6265 1927 MS65 NGC.** A well-impressed Gem with light silver luster and faint touches of canary-yellow and apricot patina. A few tiny marks on the portrait are entirely grade-consistent. NGC has certified only two numerically finer pieces (12/14). NGC ID# 257S, PCGS# 7370

**6266 1927 MS65 PCGS.** Satiny cartwheel luster underlies a thin veil of light golden toning on each side of this Gem representative, while the strike is sharp and the surfaces are devoid of obtrusive abrasions. The 1927 is a slightly scarcer issue overall, boasting a low mintage 848,000 coins, and is genuinely rare finer than MS65. NGC ID# 257S, PCGS# 7370

**1927 Silver Dollar, MS65  
In a Prior Generation Slab**

- 6267 1927 MS65 NGC. CAC.** Light golden toning blankets much of this Gem 1927 Peace dollar, growing deeper toward the margins. The strike is sharp, and the surfaces are free of distractions. This issue is one of just four in the series with a mintage below 1 million coins (in this case, just 848,000 pieces), and is rarely seen finer than MS65. Housed in a prior generation holder. Only two coins are numerically finer at NGC (12/14). NGC ID# 257S, PCGS# 7370

**1927-D Dollar, MS65+  
Conditionally Elusive Denver Issue**

- 6268 1927-D MS65+ PCGS Secure. CAC.** The 1927-D is one of the more conditionally challenging dates in the Peace dollar series, being scarce in Gem condition and notably rare any finer. This Plus-designated representative is light golden in tone, with vibrant underlying luster and minimally disrupted surfaces. Only 10 coins are numerically finer at PCGS, and NGC has so-graded just three examples (12/14). NGC ID# 257T, PCGS# 7371

- 6269 1927-S MS64+ PCGS.** This impressive high-end near-Gem is sharply struck and radiates intense luster from the nearly untuned surfaces. A few light marks on the eagle may prevent full Gem status. NGC ID# 257U, PCGS# 7372

**1927-S Dollar, MS64+  
Above-Average Strike**

- 6270 1927-S MS64+ PCGS. CAC.** The Peace dollars of 1927-S are available through near-Gem after which the population drops significantly to about 150 pieces certified by PCGS and NGC (11/14). This high-end near-Gem is better struck than ordinarily seen for this issue, especially on the hair over Liberty's ear. Silvery surfaces yield pleasing luster and are minimally marked. NGC ID# 257U, PCGS# 7372

**1927-S Dollar, Exceptional MS65**

- 6271 1927-S MS65 NGC.** Most collectors searching for a high-grade 1927-S Peace dollar will need to settle for an MS65 as the two major services have graded a mere three pieces finer! And even locating a sharp Gem will not be that easy as most 1927-Ss are poorly struck with subpar luster and possess a fair number of marks. This piece is exceptional in that it is well-struck with bright luster and fewer marks than usually seen for the date and grade level. Whispers of electric-blue, reddish-gold, and gold-orange cling to the margins. Census: 77 in 65, 1 finer (11/14). NGC ID# 257U, PCGS# 7372

**1927-S Peace Dollar, MS65  
Only Three Coins Numerically Finer**

- 6272 1927-S MS65 PCGS Secure.** The scarcest of the three 1927 issues in high grades, the 1927-S Peace dollar is seldom seen in Gem condition, and finer representatives are nearly unknown. This piece is well-preserved and satiny, with a light champagne hue blanketing each side. The design elements are well-defined. Population: 73 in 65 (1 in 65+), 2 finer (12/14). NGC ID# 257U, PCGS# 7372

**1927-S Peace Dollar, MS65  
Radiant Cartwheel Luster**

- 6273 1927-S MS65 NGC. CAC.** The 1927-S boasts the third-lowest mintage in the series (866,000 pieces), and is one of only four dates with a production total of less than 1 million coins. Gem Mint State examples are distinctly scarce, and finer coins are prohibitively rare. This piece shows faintly dappled olive-lavender hues over much of the frosty, silver-gold surfaces. The strike is sharp and the surfaces are devoid of major abrasions. Census: 76 in 65, 1 finer (11/14). NGC ID# 257U, PCGS# 7372

**1927-S Peace Dollar, MS65  
Only Two Finer Coins at PCGS**

**6274 1927-S MS65 PCGS. CAC.** The 1927-S Peace dollar boasts a low mintage of 866,000 pieces, making the issue very scarce at the MS65 grade level and a prime condition rarity in finer grades. The present coin is a delightful Gem with terrific eye appeal. Softly frosted luster in pearl to medium-gray shades graces this appealing S-mint specimen. Liberty's hair is well-defined, and the surfaces pleasingly preserved aside from the odd luster scrape and small mark. Hints of golden color appear at the obverse rims. This coin should find a home in a fine collection or Registry Set. Population: 73 in 65 (1 in 65+), 2 finer (11/14). NGC ID# 257U, PCGS# 7372

**1927-S VAM-3 Dollar, MS65  
Doubled Leaves, Top 50**

**6275 1927-S Doubled Leaves, VAM-3, MS65 NGC.** A Top 50 Variety. The eagle's branch is lightly die doubled. The obverse die marker is a raised diagonal line near the monogram. The variety is undesignated on the "Gold and Silver Pawn" NGC insert. A highly lustrous Gem with a hint of gold toning and exceptionally clean surfaces. PCGS# 133778

**1928 Peace Dollar, MS65  
Capstone of the Series**

**6276 1928 MS65 PCGS.** This Peace dollar issue is famous for its mintage of just 360,649 coins — far and away the lowest in the series. Flashy brilliance and sharply rendered design elements are hallmarks of this Gem representative. A handful of small, undistracting marks are strewn over each side and prohibit an even loftier grade. PCGS reports only 14 numerically finer examples (10/14). NGC ID# 257V, PCGS# 7373

**1928 Peace Dollar, MS65  
Rarely Encountered Finer**

**6277 1928 MS65 PCGS.** The biggest key date in the Peace dollar series, the 1928 had a limited mintage of only a little more than 360,000 pieces. Gem survivors are scarce, and finer pieces are rare. This example is somewhat frostier than most representatives of this date, with sharp design elements and only a few insignificant ticks in unobtrusive locales. Delicate champagne toning blankets each side. NGC ID# 257V, PCGS# 7373

**1928 Peace Dollar, MS65  
Decidedly Frosty and Sharp**

**6278 1928 MS65 PCGS.** The key to the series, the 1928 Peace dollar boasts the lowest mintage of the type (360,649 pieces), and is a notably scarce date in Gem condition. This representative is light golden in color, with significantly more lively luster than is typically seen on this date. The strike is sharp, and only a few minute ticks preclude an even finer grade. PCGS has encapsulated just 14 numerically finer representatives (11/14). NGC ID# 257V, PCGS# 7373

**1928 Peace Dollar, MS65  
A Series Key**

- 6279 1928 MS65 PCGS.** The 1928 Peace dollar, long recognized as a key for the series, is generally available for a price in grades through MS64, though Gems are elusive, and anything finer is a rarity. This MS65 piece is well struck with dappled purple toning, which is more extensive on the obverse, and covers light champagne-gold, lustrous surfaces that are well-preserved.  
*Ex: Long Beach Signature (Heritage, 9/2008), lot 3080; Long Beach Signature (Heritage, 2/2009), lot 2058. NGC ID# 257V, PCGS# 7373*

**1928 Peace Dollar, MS65  
Delicately Toned on Both Sides**

- 6280 1928 MS65 NGC. CAC.** A lightly toned example of this key Peace dollar issue, showing shades of pale lavender, champagne, and powder-blue over the surfaces. The strike is sharp, and the satiny luster is largely uninterrupted as it cartwheels around each side. Housed in a prior generation holder. Only four coins are numerically finer at NGC (12/14). NGC ID# 257V, PCGS# 7373

**1928 Dollar, MS65  
Upper-End for the Grade**

- 6281 1928 MS65 PCGS Secure. CAC.** With the lowest mintage of the series (little more than 360,000 coins), the 1928 Peace dollar is of special interest in Gem condition. This piece is remarkably clean for the grade, showing just a few faint luster grazes that limited PCGS' assessment. The strike is sharp, and attractive, satiny luster shines through a light golden hue on each side. Only 14 coins are numerically finer at PCGS (12/14). NGC ID# 257V, PCGS# 7373

- 6282 1928-S MS64+ PCGS.** Smooth, frosty luster underlies dusky lavender-gray toning on each side of this Plus-designated Choice example. The devices are well-struck, with no significant abrasions. PCGS has certified just 57 numerically finer representatives (12/14). NGC ID# 257W, PCGS# 7374

- 6283 1928-S MS64+ PCGS. CAC.** A challenging issue in pleasing Mint State condition, the 1928-S Peace dollar is scarce finer than MS64. This Plus-graded piece is attractively frosty, with soft pastel hues encompassing each side. There are fewer abrasions than expected, even for the Plus designation. Only 57 coins are numerically finer at PCGS (12/14). NGC ID# 257W, PCGS# 7374

- 6284 1928-S MS64+ PCGS. CAC.** An available issue in MS64 and lower grades, the 1928-S Peace dollar becomes scarce in finer condition. This Plus-designated example is well-struck and frosty, with lightly dappled lavender-gray and pale gold hues over each side, with a faint crescent of olive and aquamarine also visible along the lower-left obverse border. IN GOD WE TRUST and the monogram are die doubled, as usual for the '28-S.  
*From The College Collection. NGC ID# 257W, PCGS# 7374*

- 6285 1934 MS66 PCGS.** Fewer than 1 million examples of this issue were struck by the Philadelphia Mint, giving it one of the lowest mintages of the series. This is a lovely Premium Gem with vibrant luster and golden toning over both sides. Well-struck with impressively preserved surfaces that are nearly flawless, save for a couple of minor marks on the reverse. NGC ID# 257X, PCGS# 7375

- 6286 1934 MS66 PCGS.** It is seldom that one sees a Peace dollar with such swirling, radiant cartwheel luster, but this piece has it in spades, separating it from the vast majority of survivors. Faint ice-blue and pale gold patination add to the wonderful eye appeal, as does the excellent preservation visible throughout the high points of each side. Two reeding marks appear at the top of Liberty's forehead. PCGS population data report only three numerically finer of the issue (12/14).  
*From The Sweet Bloomfield Collection. NGC ID# 257X, PCGS# 7375*

- 6287 1934-D MS65 NGC. CAC.** Micro D mintmark. As a date, the 1934-D Peace dollar is only available in grades through MS64; Gems are elusive, and finer pieces are rare in comparison to the demand for them. This CAC-endorsed Gem example is boldly struck, with vibrant, frosty mint luster illuminating clean surfaces and just a tinge of light golden toning over each side. An immensely attractive coin, housed in a prior generation holder. NGC has seen only 30 numerically finer representatives (12/14). NGC ID# 257Y, PCGS# 7376

**1934-D Silver Dollar, MS66  
Only Two Numerically Finer at PCGS**

- 6288 1934-D MS66 PCGS Secure.** Micro D. Intense mint luster, residing beneath a suggestion of light golden toning, is the hallmark of this Premium Gem 1934-D Peace dollar. The strike is sharp, and there are no disruptive abrasions. This issue is seldom seen at the Premium Gem grade level, and finer representatives are extremely rare. Population: 66 in 66 (2 in 66+), 2 finer (12/14). NGC ID# 257Y, PCGS# 7376

**1934-S Dollar, Near-Gem  
Green Label Holder**

- 6289 1934-S MS64 PCGS.** The 1934-S is the scarcest Peace dollar in Mint State, and only a small minority of examples are as nice as the present near-Gem. Light ice-blue and almond-gold toning graces lustrous and minimally marked surfaces. The centers show slight inexactness of strike. Certified in a green label holder. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, Lightly Toned MS64+**

- 6290 1934-S MS64+ PCGS.** A radiantly lustrous, Plus-graded example of this late-series San Francisco issue. Lightly mottled olive-gold toning encompasses much of each side, while the strike is sharp and there are no significant abrasions. The 1934-S Peace dollar had a mintage of barely more than 1 million coins, and is a notable semikey in all grades. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, MS65  
Frosty and High-End for the Grade**

- 6291 1934-S MS65 PCGS. CAC.** In the context of the series, the 1934-S Peace dollar is challenging in all Mint State grades, but it becomes particularly so at the Gem level and finer pieces are rare. This example is remarkably well-preserved and frosty, with just a touch of light golden color accenting the delicate surfaces. The strike is sharp and the eye appeal is correspondingly high. PCGS has seen only 27 numerically finer submissions (12/14). NGC ID# 257Z, PCGS# 7377

**1934-S Silver Dollar, MS65+  
Rarely Encountered in Better Grades**

- 6292 1934-S MS65+ PCGS Secure. CAC.** A delicately preserved, Plus-graded Gem example of this elusive late-series issue. A uniform overlay of wheat-gold toning accents satiny cartwheel luster on both sides, while the design elements are sharply impressed. The 1934-S is the scarcest of the 1930s Peace dollar issues in high grades. Only 27 coins are numerically finer at PCGS (12/14). NGC ID# 257Z, PCGS# 7377

**1935 Dollar, MS66  
Final Peace Issue**

- 6293 1935 MS66 PCGS.** This Premium Gem features strong cartwheel luster and crisply struck motifs. Well-preserved and highly attractive. Both sides have a hint of pink and silver-blue patina. The final year of the Peace dollar series, aside from a never-released Denver production in the 1960s, saw fewer than 1.6 million pieces struck at Philadelphia. PCGS has graded no numerically finer examples (11/14).  
*Ex: Dallas Signature (Heritage, 11/2005), lot 3804; National Money Show Signature (Heritage, 3/2007), lot 1431. NGC ID# 2582, PCGS# 7378*

- 6294 1935-S MS65 PCGS. CAC.** Three rays beneath ONE. Light to medium wheat-gold toning adorns this highly lustrous and nicely struck Gem. Infrequent wispy marks do not deny the eye appeal. A better date and the final San Francisco issue.  
*Ex: Chicago Signature (Heritage, 8/2011), lot 4942. NGC ID# 2583, PCGS# 7379*

**1935-S Peace Dollar, MS66+  
Outstanding Eye Appeal**

- 6295 1935-S MS66+ PCGS. CAC.** Four rays below ONE. A magnificent representative that exhibits potent luster, a good strike, and exceptional preservation throughout the cheek and fields. Lightly toned powder-blue and almond-gold with a blush of walnut-brown on the obverse near 3 o'clock. As of (12/14), PCGS has certified only two coins as MS66+ and just two coins finer. The other MS66+ PCGS example has three rays below ONE, and can be viewed in the MJB set within the Peace Dollar, Circulation Strikes PCGS Registry. A significant bid will be required to add the present piece to the competitive Registry holding. NGC ID# 2583, PCGS# 7379

**EISENHOWER DOLLARS**

- 6296 1972 Type Two, FS-901, MS65 PCGS.** The Caribbean Islands appear narrow and incused on the scarce Type Two Ike dollar. They have a more conventional relief appearance on the common Type One and Type Three varieties. A lustrous and well preserved chestnut-gold Gem. Population: 59 in 65, 7 finer (11/14). PCGS# 510592 Base PCGS# 97409

**1972 Type Three Ike Dollar, MS66  
Among Finest Certified**

- 6297 1972 Type Three MS66 PCGS. CAC.** Three different subtypes of 1972 Ikes are known, easily distinguished by the shape of the Caribbean Islands, and their relationship to the tip of Florida. Type Two is the key variety, but the Type Three variety becomes rare at the MS66 level. A lustrous and essentially immaculate light golden-brown example that retains hints of the flan surface prior to the strike. Population: 4 in 66, 0 finer (11/14). NGC ID# 2587, PCGS# 7409

**PROOF EISENHOWER DOLLAR**

**1978-S Ike Dollar, PR70 Deep Cameo  
Spectacular Registry Set Candidate**

- 6298 1978-S PR70 Deep Cameo PCGS.** Tied with just 25 others as the finest certified of this final-year proof issue. The fully mirrored fields provide a deep black back drop for the gold-tinted, heavily frosted devices. The strike is bold and the preservation is perfect. Struck in copper-nickel, with a mintage of just more than 3.1 million proofs. A Registry Set essential. NGC ID# 282D, PCGS# 97438

## SACAGAWEA DOLLAR

2000-P 'Cheerios' Dollar, MS67  
Accompanied by 2000 Cent, MS66 Red

- 6299** 2000-P Cheerios, FS-902, MS67 PCGS. The rare prototype Sacagawea dollar prototype with bold definition on the eagle's tailfeathers. Beautifully preserved, with bright, brass-gold luster and semiprooflike fields. The FS-902 variety was inadvertently distributed by Cheerios cereal as part of a Mint promotion for the new "golden" dollar. Included in the lot is a **2000 Cent MS66 Red**, formerly part of the Cheerios packaging for the FS-902 dollar. (Total: 2 coins)

## COMMEMORATIVE SILVER

- 6300** 1893 Isabella Quarter MS65 PCGS. Rainbow-like toning, with deeper shades on the obverse, endows the lustrous surfaces of this Gem commemorative. The design features are sharply struck throughout and both sides have been impeccably preserved. NGC ID# 28HR, PCGS# 9220
- 6301** 1893 Isabella Quarter MS65 PCGS. The surfaces are sharply struck, as usual for this beautiful design, and show lambent luster under a moderate layer of powder-gray patina accented with glints of copper-gold. NGC ID# 28HR, PCGS# 9220
- 6302** 1893 Isabella Quarter MS65 PCGS. CAC. Pearl-gray surfaces boast nice luster and a sharp strike on this Gem Isabella quarter, encapsulated in a green-label holder and with the CAC green approval sticker. A popular commemorative type. NGC ID# 28HR, PCGS# 9220

1893 Isabella Quarter, MS66  
Seldom Seen Finer

- 6303** 1893 Isabella Quarter MS66 PCGS. Blended olive, gold, and lavender hues encompass each side of this Premium Gem example, with the deeper colors most prominent on the reverse. The strike is sharp and the surfaces are free of any distracting abrasions. The Isabella quarter was distributed in fairly small quantities (just 24,214 pieces), and is always in demand among classic commemorative collectors as the first commemorative quarter struck by the U.S. Mint. PCGS has certified only 46 numerically finer representatives (12/14). NGC ID# 28HR, PCGS# 9220

1893 Isabella Quarter, MS66  
Distinctive Peripheral Toning

- 6304** 1893 Isabella Quarter MS66 PCGS. The simple and uncluttered 1893 Isabella quarter dollar design by Charles Barber has an elegance to it that unfortunately was not shared by the regular denomination of the same year. This Premium Gem is clearly toned russet and gunmetal-blue at the borders with additional elements visible at the otherwise silver centers. Better-defined than often seen with a clearly defined thread along the industrious woman's figure. PCGS has graded just 46 numerically finer pieces (11/14). NGC ID# 28HR, PCGS# 9220

1893 Isabella Quarter, MS66  
Lustrous and Impressively Preserved

- 6305** 1893 Isabella Quarter MS66 PCGS. CAC. A lovely example of this commemorative issue, well-struck and carefully preserved, with clean surfaces and light olive-gray coloration. More lustrous than many others that we have seen, with a radiant, satiny appearance on both sides. Essentially blemish-free, this is a solid Premium Gem representative of one of our nation's earliest commemorative coins. Only 46 coins are numerically finer at PCGS (12/14). NGC ID# 28HR, PCGS# 9220

1893 Isabella Quarter, MS66  
Potent Luster, Sharp Strike

- 6306** 1893 Isabella Quarter MS66 PCGS. CAC. Potent luster illuminates this virtually immaculate Premium Gem. Narrow bands of blue-green and tobacco-brown endow the borders while the remainder of the coin remains stone-white. A sharply struck and desirable example of this early and conditionally rare commemorative type. Housed in a green label holder. From The A. James Evans Collection, Part II. NGC ID# 28HR, PCGS# 9220

---

1893 Isabella Quarter, Well-Preserved MS66

- 6307 1893 Isabella Quarter MS66 PCGS. CAC.** The Isabella quarter is a favorite both for its lovely design (by Charles Barber, but he is believed to have followed motifs by Kenyon Cox [1856-1919], according to the Bowers commemorative *Guide Book*) as well as for its odd denomination within the series, first and last of its kind. This Premium Gem offers the bold strike the issue is known for, with pale greenish-gray rim toning and no contact marks of importance. NGC ID# 28HR, PCGS# 9220

---

1893 Isabella Quarter  
Impressively Toned Premium Gem

- 6308 1893 Isabella Quarter MS66 PCGS Secure. CAC. Ex: Paul Denby.** The frosted portrait of Queen Isabella displays toning worthy of regal grandeur, with shades of amber-orange, steel-blue, and yellow-gold across vibrantly lustrous surfaces. A boldly struck example of this popular commemorative quarter, symbolic of the industry of American women. This dramatic Premium Gem is housed in a PCGS Secure holder and is obviously CAC approved. NGC ID# 28HR, PCGS# 9220

---

1893 Isabella Quarter, MS66+  
Colorful Early Commemorative

- 6309 1893 Isabella Quarter MS66+ PCGS. CAC.** The Board of Lady Managers for the World's Columbian Exposition received a commemorative coin, the Isabella quarter, to sell alongside the Columbus half dollars, though the fact that both pieces were priced the same led to low sales of the former. This MS66+ marvel has deep and beautiful toning with waves of peach, green-gold, and blue. PCGS has graded just 46 coins as MS67 or finer (11/14). NGC ID# 28HR, PCGS# 9220

---

1893 Isabella Quarter, Sharp MS67+  
Radiantly Luminescent

- 6310 1893 Isabella Quarter MS67+ PCGS.** A popular issue for commemorative collectors, the Isabella quarter was struck in concert with the World's Columbian Exposition in Chicago in 1893, and is the only U.S. quarter dollar issue in the classic commemorative series. This stunning MS67+ PCGS example is superbly toned across each side in a multicolored display of blended iridescence. The fully struck surfaces show exceptionally crisp delineation of every design element, including each of the beads along the borders, as well as the central figures of Queen Isabella on the obverse and the kneeling female on the reverse, symbolizing women's industry. Flashy cartwheel luster illuminates clean, impeccably preserved surfaces. Population: 40 in 67 (5 in 67+), 6 finer (12/14). NGC ID# 28HR, PCGS# 9220

- 
- 6311 1900 Lafayette Dollar MS64 PCGS. DuVall 3-D.** The AT in STATES is noticeably repunched. This is pleasing Choice example of this first silver dollar commemorative, with mint-gold and sea-green peripheral accents surrounding warm lavender-orange toning over the centers. The strike is sharp and there are no major abrasions. NGC ID# 28N8, PCGS# 9222

- 6312 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B.** Attractive hints of golden-brown and lavender toning visit the well-preserved surfaces of this impressive Choice example. The design elements are sharply detailed and vibrant mint luster shines through the toning. NGC ID# 28N8, PCGS# 9222

1900 Lafayette Dollar, MS64  
Well-Preserved, DuVall 2-C

- 6313** 1900 Lafayette Dollar MS64 NGC. CAC. DuVall 2-C. An outstanding example that boasts vibrant luster, mark-free fields, a precise strike, and predominant powder-blue toning. The borders display chestnut-gold, and each side has a few russet freckles on the upper left quadrant. DuVall 2-C is the second most plentiful Lafayette marriage. On the obverse, the second S in STATES is clearly repunched, as is the final A in AMERICA. On the reverse, the tip of the lowest leaf is centered over the 9 in the date. NGC ID# 28N8, PCGS# 9222

1900 Lafayette Dollar, MS65  
Scarce DuVall 3-D

- 6314** 1900 Lafayette Dollar MS65 NGC. DuVall 3-D. On the obverse, the AT in STATES is repunched at the base. On the reverse, the lowest leaf tip is centered above the 9 in the date. Most Lafayette dollars are either DuVall 1-B or 2-C. DuVall 3-D is much scarcer than the aforementioned two marriages. For an unknown reason, the legends on the Lafayette dollar were inexpertly entered by hand into working dies, instead of hubbed. The branch beneath the statue also differs on each of the five reverse dies. Well struck and thoroughly lustrous with superior preservation and eye appeal. NGC ID# 28N8, PCGS# 9222

1900 Lafayette Dollar, MS65  
Sharply Detailed With Iridescent Toning

- 6315** 1900 Lafayette Dollar MS65 PCGS. DuVall 2-C. The Lafayette dollar is the first commemorative silver dollar, with a net distribution figure of 36,026 pieces. Examples in Gem condition are scarce. The present coin is a sharply detailed specimen, showing iridescent gold, gray, and blue patina. Vibrant mint luster is apparent beneath the toning. NGC ID# 28N8, PCGS# 9222

1900 Lafayette Dollar, MS65  
Conditionally Scarce

- 6316** 1900 Lafayette Dollar MS65 PCGS. DuVall 1-B. In 1886 France presented the Statue of Liberty to the United States, and in 1898 a group of Americans sought to return the favor with a memorial to Lafayette. Congress approved the Lafayette commemorative dollar as a fundraiser for the Paris monument that was completed in 1908. This silver-white Gem exhibits minimal abrasions, particularly in the lightly-toned fields. PCGS counts only 87 pieces numerically finer (12/14). NGC ID# 28N8, PCGS# 9222

1900 Lafayette Dollar, Deeply Toned MS65+

- 6317** 1900 Lafayette Dollar MS65+ PCGS. DuVall 2-C. The lowest leaf tip is centered above the 9 in the date and the second S in STATES is repunched east. Deep violet, cobalt-blue, and crimson toning resides on the highly lustrous surfaces of this high-end MS65. Sharply struck on all design elements and impeccably preserved throughout. NGC ID# 28N8, PCGS# 9222

1900 Lafayette Dollar  
Lightly Toned Gem

- 6318** 1900 Lafayette Dollar MS65 PCGS. CAC. DuVall 2-C. An available variety of this elusive and popular Lafayette commemorative dollar. This commemorative was the first of its denomination struck by the U.S. Mint, and was also the first official coin authorized to feature the portrait of a U.S. president. The coins were struck in 1899. This Gem example is free of any noticeable abrasions and displays vibrant, satiny luster. Iridescent lavender-gray toning exhibits irregular splashes of aquamarine and amber-gold color. NGC ID# 28N8, PCGS# 9222

- 6319** 1921 Alabama MS66 PCGS. Violet, yellow-gold, and lime-green toning is somewhat deeper at the margins of this Premium Gem. A sharply struck nicely preserved example.  
*From The College Collection.* NGC ID# 28HT, PCGS# 9224

---

### 1921 Alabama Half Dollar, MS66

Ex: Young Collection

**6320** 1921 Alabama MS66 PCGS. CAC. Ex: Young Collection. Wheat-gold, plum-mauve, and lime-green patina ensures the originality of this high-grade half dollar. Essentially pristine aside from wispy contact on Governor Kilby and a rim imperfection on the reverse at 11:30. The strike on the eagle's legs is incomplete but above-average for the issue. The B.E. Young silver commemorative PCGS Registry Set is ranked #4 All-Time. Only three pieces are numerically finer at PCGS (12/14). NGC ID# 28HT, PCGS# 9224

**6321** 1921 Alabama 2x2 MS66 PCGS. The jugate portraits on the obverse show ticks but they are small ones, in keeping with the Premium Gem grade of this piece. Only light patina shows on each side, but the luster is abundant amid the excellent eye appeal. PCGS reports only seven in MS67, including two MS67+ (12/14). From *The A. James Evans Collection, Part II*. NGC ID# 28HS, PCGS# 9225

**6322** 1921 Alabama 2x2 MS66 PCGS. Medium-intensity peripheral multicolored toning and radiant luster endow this Premium Gem commemorative. The design elements are sharply struck throughout. From *The College Collection*. NGC ID# 28HS, PCGS# 9225

**6323** 1921 Alabama 2x2 MS66 PCGS. Nicely preserved surfaces on this Premium Gem show a soft, satiny texture and just a hint of barely perceptible toning throughout. The device high points are free of major marks, separating this piece from the vast majority of survivors. PCGS shows seven in the numeric grade of MS67, including two MS67+ (12/14). NGC ID# 28HS, PCGS# 9225

**6324** 1936 Albany MS67 PCGS. CAC. Lustrous surfaces display peripheral reddish- and yellow-gold patina, joined by freckles of gold-brown on the reverse. A nicely preserved and sharply struck commemorative. NGC ID# 28HU, PCGS# 9227

---

### 1937 Antietam Half Dollar, MS68

Only Two Coins Certified Numerically Finer

**6325** 1937 Antietam MS68 NGC. CAC. Struck to commemorate the 75th anniversary of the Civil War battle of Antietam, fought on September 17, 1862, to stop General Lee from invading Maryland, this high-end Superb Gem Antietam Anniversary half dollar is boldly struck, with satiny luster that illuminates soft amber and sun-gold hues on each side. A beautifully preserved example. Census: 19 in 68 (6 in 68 ★), 2 finer (12/14). NGC ID# 28HV, PCGS# 9229

**6326** 1935-D Arkansas MS67+ NGC. Silver-white surfaces yield pleasing luster and sharply struck design elements. Both sides are impeccably well preserved and yield tremendous eye appeal. Census: 3 in 67+, 4 in 67 ★, 3 in 67+★, 2 finer (12/14). NGC ID# 28HX, PCGS# 9234

**6327** 1935-S Arkansas MS67 PCGS. CAC. Ex: Jewell/W.P.E. Collection. Soft violet patina covers the lustrous surfaces of this magnificent Superb Gem. Sharply struck devices and impeccable preservation rounds out the coin's pleasing eye appeal. Population: 22 in 67 (2 in 67+), 0 finer (12/14). NGC ID# 28HY, PCGS# 9235

**6328** 1936-D Arkansas MS67 ★ NGC. Ex: Schultz Collection. Soft yellow-gold, violet, and lime-green toning visits the lustrous surfaces of this gorgeous Arkansas commemorative. Sharply struck and impeccably well preserved. Census: 3 in 67 ★, 2 finer (12/14). NGC ID# 28J2, PCGS# 9238

**6329** 1936-D Arkansas MS67 PCGS. CAC. A medium gray specimen with a smattering of antique-gold and russet color gravitating toward the border regions, slightly heavier on the reverse. Soft violet resides in the centers. Well-struck, lustrous, and nicely preserved. Population: 34 in 67 (4 in 67+), 1 finer (12/14). Ex: *Baltimore Signature (Heritage, 7/2003)*, lot 9157; *Long Beach Signature (1/2004)*, lot 6497. NGC ID# 28J2, PCGS# 9238

**6330** 1936-D Arkansas MS67 PCGS. CAC. Orange-gold and lime patina visits the borders, while the interiors are pearl-gray. A magnificent Superb Gem that is sharply struck, although the eagle's breast has slight blending of detail. Encapsulated in a green label holder. Population: 34 in 67 (4 in 67+), 1 finer (12/14). NGC ID# 28J2, PCGS# 9238

---

### 1936-S Arkansas Half, MS67

Impeccable Preservation

**6331** 1936-S Arkansas MS67 PCGS. CAC. Deep fire-red and ochre hues decorate the extreme rims on each side of this Superb Gem Arkansas half, while pale mint-green and pearl-gray occupy the centers. The eye appeal and preservation are both equally impeccable. Although nearly 10,000 net pieces were issued, few survive so fine. Population: 17 in 67 (2 in 67+), 0 finer (12/14). NGC ID# 28J3, PCGS# 9239

**6332** 1937-D Arkansas MS67 PCGS. The Arkansas state seal elements on the reverse were combined with two different obverses to make the issues known as "Arkansas" and "Arkansas-Robinson" or "Robinson-Arkansas." This obverse, the traditional Arkansas, features a youth of 1936 and an Indian chief of 1836 on the obverse. This is a satiny silver-white Superb Gem with little toning but super eye appeal. Population: 28 in 67 (4 in 67+), 1 finer (12/14). NGC ID# 28J5, PCGS# 9242

**1937-D Arkansas Centennial Half, MS67  
Only One Piece Numerically Finer**

- 6333 1937-D Arkansas MS67 PCGS. CAC.** The Coinage Act of 1792 mandated Liberty's appearance on American coinage, and in due course Indian figures also appeared. Combining the two together was a natural evolution. This jugate presentation, which first appeared on the 1935 Arkansas Centennial half dollar, sustained the theme of pairing figures that is seen throughout the commemorative series. Deep russet and yellow mark the obverse rims of this Superb Gem, while the reverse exhibits light green within the rays and copper at the periphery. NGC grades 13 examples at MS67 with none higher. PCGS counts 28 in 67 (4 in 67+), with only a single coin in MS68 (12/14). NGC ID# 28J5, PCGS# 9242

- 6334 1937-S Arkansas MS66 PCGS. CAC.** Pale pearl-gray, mint, and saffron hues occupy most of each side before melding into deep multicolor patina in thin crescents near the rims, a totally original appearance. The high points of each side are nicely brought up and free of contact. Population: 66 in 66 (2 in 66+), 5 finer (12/14). NGC ID# 28J6, PCGS# 9243

**1938-D Arkansas Half, MS67+  
Crescent-Toned Obverse**

- 6335 1938-D Arkansas MS67+ PCGS. CAC.** By 1938, only the New Rochelle half dollar was a novel commemorative design; all others struck that year and the next were holdovers, including the Arkansas. This D-mint piece has strong luster and primarily silver surfaces, though the upper left obverse shows bands of gold and rose color. Population: 23 in 67 (1 in 67+), 1 finer (11/14). NGC ID# 28J8, PCGS# 9246

- 6336 1936-S Bay Bridge MS67 PCGS. CAC.** Frosty cream-gray surfaces intermingle with deeper bluish-gray on this lovely and immaculately preserved Superb Gem, which additionally boasts a bold strike and good eye appeal. NGC ID# 28JD, PCGS# 9254

- 6337 1936-S Bay Bridge MS67 PCGS. CAC.** Delicate shades of lavender and champagne-gold toning blanket the impeccably preserved surfaces of this delightful Superb Gem. Well-detailed design elements and satiny mint luster add to the outstanding eye appeal. PCGS has graded 10 numerically finer examples (12/14). NGC ID# 28JD, PCGS# 9254

- 6338 1936-S Bay Bridge MS67 PCGS. CAC.** Ex: Gutttag Family. The design elements of this spectacular Superb Gem are sharply detailed and vibrant satiny mint luster radiates from both sides. The well-preserved surfaces exhibit subtle shades of silver-gray and lavender toning. PCGS has graded 10 numerically finer examples (12/14). NGC ID# 28JD, PCGS# 9254

**1936-S Bay Bridge Half Dollar, MS67+  
Just 10 Finer at PCGS**

- 6339 1936-S Bay Bridge MS67+ PCGS. CAC.** The Bay Bridge half dollar was the only coin design credited to San Francisco artist Jacques Schnier, a professor at Berkeley who turned to acrylic sculpture late in life. This marvelous MS67+ example has rich peach, rose, and violet-to-silver toning. PCGS has graded only 10 numerically finer examples (11/14). NGC ID# 28JD, PCGS# 9254

**1934 Daniel Boone Bicentennial Half, MS67+  
Only One Coin Numerically Finer at PCGS**

- 6340 1934 Boone MS67+ PCGS. CAC.** This is the first issue in the Daniel Boone Bicentennial half dollar series, actually struck in the 200th anniversary of the frontiersman's birth, and therefore is also the only issue lacking the added 1934 date above PIONEER YEAR on the reverse. This example exhibits a light golden hue over each side, with deeper russet and gold peripheral accents. The design elements are sharply brought up, illuminated by the characteristically satiny luster. Population: 43 in 67 (4 in 67+), 1 finer (11/14). NGC ID# 28JE, PCGS# 9257

**1935-D Boone Half, MS67  
Just 5,005 Pieces Made**

- 6341 1935-D Boone MS67 PCGS.** The more available of two 1935-D Boone half dollar varieties, though at just 5,000 pieces plus assay coins such availability is relative. This Superb Gem is silver-gray on the interiors with bold reddish-orange toning at the margins that is widest at the right reverse. Population: 13 in 67 (1 in 67+), 0 finer (11/14). NGC ID# 28JG, PCGS# 9259

- 6342 1935/34 Boone MS67+ NGC. CAC.** This variety of the Boone commemorative half dollar has the small 1934 in the field above PIONEER YEAR. Brownish freckles make occasional appearances at the border of this high-end Superb Gem. Lustrous surfaces exhibit sharply struck devices and are impeccably preserved. Census: 52 in 67 (6 in 67+, 3 in 67 ★), 1 finer (12/14). NGC ID# 28JJ, PCGS# 9262

**1935/34-D Boone Half, MS68**  
Mintage 2,003 Pieces

- 6343 1935/34-D Boone MS68 NGC.** By one assay coin, the 1935/34-D Boone half dollar has the lowest mintage of any classic silver commemorative. This MS68 example has dappled silver and gold-to-orange patina on the obverse, while the reverse assumes a ring pattern with the silver in the middle. Census: 7 in 68 (1 in 68 ★), 0 finer (11/14). NGC ID# 28JK, PCGS# 9263

- 6344 1935/34-S Boone MS67 NGC.** The 1935 Boone commemorative half dollars are known with and without a small font 1934 in the right reverse field. The Denver and San Francisco Mints each produced 5,000 without the added date and an additional 2,000 each with the 1934. Lustrous, sharply struck surfaces display rainbow-like patina at the margins. Census: 24 in 67 (1 in 67 ★), 5 finer (12/14). NGC ID# 28JL, PCGS# 9264

**1935/34-S Daniel Boone Bicentennial Half**  
Remarkable High-End Superb Gem

- 6345 1935/34-S Boone MS67+ PCGS. CAC.** This commemorative half dollar was originally struck in 1934 to celebrate the 200th anniversary of Daniel Boone's birth, but its production continued through 1938 in the form of three-coin sets. The 1935 issues were the first to exhibit an added commemorative date (1934) above the words PIONEER YEAR on the reverse. This is a carefully preserved example of the San Francisco issue, showing pale golden toning on each side that deepens toward the borders. Satiny luster is uninterrupted by abrasions, and the design elements are sharply impressed. Population: 18 in 67 (3 in 67+), 2 finer (11/14). NGC ID# 28JL, PCGS# 9264

- 6346 1937-D Boone MS67 PCGS. CAC.** Magnification brings out very soft powder-blue and champagne color on the lustrous surfaces of this D-mint commemorative. Sharply struck design elements and well cared for surfaces further enhance the coin's eye appeal. NGC ID# 28JS, PCGS# 9271

- 6347 1937-S Boone MS67 PCGS. CAC.** Hints of deep gold toning adhere to the rims of this Superb Gem Boone half dollar. The balance of the obverse and reverse are brilliant white, with soft, frosty silver luster. Population: 41 in 67 (3 in 67+), 2 finer (12/14). From The College Collection. NGC ID# 28JT, PCGS# 9272

- 6348 1938-D Boone MS67 PCGS. CAC.** The lustrous surfaces of this Superb Gem display a sliver of deep multicolored patina on the right margin of each side. This is a sharply struck, impeccably preserved example. Population: 69 in 67 (6 in 67+), 4 finer (12/14). NGC ID# 28JV, PCGS# 9275

- 6349 1936 Bridgeport MS67 PCGS. Ex: W.P.E. Collection.** Vibrant mint luster and sharply detailed design elements are the calling cards of this spectacular Superb Gem, with a few hints of greenish-gold and amber toning at the peripheries. Population: 78 in 67 (5 in 67+), 0 finer (12/14). NGC ID# 28JX, PCGS# 9279

**1936 Bridgeport Half, MS67+**  
Top-of-the-Registry Example

- 6350 1936 Bridgeport MS67+ PCGS. CAC.** It was P.T. Barnum the local philanthropist, rather than Barnum the circus huckster, who was honored on this commemorative issue. The creamy silver surfaces are smooth with dotted ruddy patina largely at the margins, though a few splashes affect Barnum's hair. Population: 77 in 67 (5 in 67+), 0 finer (11/14). NGC ID# 28JX, PCGS# 9279

- 6351 1925-S California MS67 PCGS.** A booming, vibrant obverse with touches of sunset-russet and blue about the periphery. The reverse is similar, but with a bit more russet and blue color at the border. A fantastic, highly lustrous coin. Population: 100 in 67 (3 in 67+), 6 finer (9/14).  
Ex: Palm Beach Signature (Heritage, 3/2006), lot 1366.  
From The Free Tilly Collection. NGC ID# 28JY, PCGS# 9281

- 6352 1925-S California MS67 PCGS.** Both sides of this Superb Gem yield dazzling luster and are endowed with deep multicolored toning at the peripheries, more extensively so on the obverse. All design elements are sharply struck. NGC ID# 28JY, PCGS# 9281

**1925-S California Half, MS67**  
Diamond Jubilee of Statehood

- 6353 1925-S California MS67 PCGS Secure.** The Diamond Jubilee of California statehood was the subject of this well-received commemorative design that is available even as a Superb Gem, albeit at a price. This MS67 coin has multicolored band toning, more prominently on the obverse, with more-or-less silver centers and scattered splashes of russet. PCGS has certified six examples as MS68 or finer (11/14). NGC ID# 28JY, PCGS# 9281

**6354 1925-S California MS67 PCGS. CAC.** The iconic California gold-panner appears to optimum advantage on this flashy, lustrous Superb Gem, lightly toned in pastel iridescent color and with a hammered strike. A gorgeous example of this popular commemorative issue. PCGS reports only six numerically finer (12/14). NGC ID# 28JY, PCGS# 9281

**6355 1925-S California MS67 PCGS. CAC.** Intensely lustrous surfaces display soft multicolored patination and sharply struck design elements. Both sides are remarkably well preserved. NGC ID# 28JY, PCGS# 9281

**6356 1925-S California MS67 PCGS. CAC.** Iridescent shades of lavender, silver-gray, and greenish-gold toning blanket the well-preserved surfaces of this magnificent California half dollar. Vibrant mint luster and sharply detailed design elements add to the outstanding visual appeal. PCGS has graded six numerically finer examples (11/14). NGC ID# 28JY, PCGS# 9281

**6357 1925-S California MS67 PCGS. CAC.** Pale iridescent patina in shades of mint, gold, and pale orange intermingles to delightful effect on this Superb Gem California half dollar. Indicative of the grade, the shoulder and high points of the bear are free of visible contact. PCGS shows only six numerically finer (12/14). NGC ID# 28JY, PCGS# 9281

**6358 1936 Cincinnati MS66+ PCGS. CAC.** Reddish-gold and olive patina clings to the rims of this high-end Premium Gem. Sharply struck and nicely preserved.  
*From The College Collection.* NGC ID# 28JZ, PCGS# 9283

#### 1936 Cincinnati Half, MS67 None Numerically Finer

**6359 1936 Cincinnati MS67 NGC.** The adage “fake it ‘til you make it” might well apply to the Cincinnati commemoratives, whose prime beneficiary, coin dealer Thomas G. Melish, effectively made up a celebration to get an issue under his control. This Philadelphia Superb Gem is bright silver-white overall with only touches of toning along the rims. Census: 5 in 67, 0 finer (11/14). NGC ID# 28JZ, PCGS# 9283

#### 1936 Cincinnati Half Dollar, MS67 Among the Finest Certified

**6360 1936 Cincinnati MS67 PCGS.** The Cincinnati Music Center half dollars were struck at all three mints, but were only sold in three-coin sets, of which just 5,000 were distributed. This brilliant, satiny Superb Gem is one of just nine so-graded examples of the Philadelphia issue at PCGS (1 in 67+), and none are finer (12/14). The devices are well-struck and, as is expected at this grade level, the preservation is exceptional. NGC ID# 28JZ, PCGS# 9283

**6361 1936-D Cincinnati MS67 PCGS.** The satiny surfaces display excellent preservation and show just scattered light dollops of pale pastel patina, allowing the top quality to be easily admired. The 1936-D Cincinnati is seldom seen in finer grades. Population: 46 in 67 (6 in 67+), 2 finer (12/14). NGC ID# 28K2, PCGS# 9284

#### 1936-D Cincinnati Half, MS67+ Tribute to Stephen Foster

**6362 1936-D Cincinnati MS67+ PCGS.** America’s troubadour, Stephen Foster, is depicted on the obverse of the Cincinnati commemorative half dollar, while the reverse proclaims that Cincinnati was the Music Center of America. Foster lived in Cincinnati for a time in the middle 19th century, and while he was there he penned “Oh! Susanna” and other successful songs. This Superb Gem is a fitting tribute to Foster, featuring satiny silver luster and splendid peripheral gold toning. Population: 46 in 67 (6 in 67+), 2 finer (12/14). NGC ID# 28K2, PCGS# 9284

**6363 1936 Cleveland MS67 PCGS.** The Cleveland Centennial half dollar is actually a dual commemoration, of the Great Lakes Exposition as well, and the major ports on those lakes are marked by stars on the reverse. This is a stunning Superb Gem with variegated multicolor patina on each side and exceptional preservation. Population: 72 in 67 (7 in 67+), 1 finer (12/14). NGC ID# 28K4, PCGS# 9288

#### 1936 Cleveland Half, MS67+ Extremely Rare Any Finer

**6364 1936 Cleveland MS67+ PCGS. CAC.** The surveyor Moses Cleaveland, founder of the city that dropped the “E” from his surname, appears on the obverse of the Great Lakes Exposition half dollar. Silver-gray centers yield to rich peach, rust, and violet hues in the fields and margins. Population: 72 in 67 (7 in 67+), 1 finer (11/14). NGC ID# 28K4, PCGS# 9288

**1936 Cleveland Half Dollar, MS68 ★  
Beautifully Preserved With Bold Eye Appeal**

**6365 1936 Cleveland MS68 ★ NGC.** Remarkable orange and fire-red toning consumes the obverse, although glimpses of pearl-gray are present on the high points. The reverse is lightly patinated in chestnut and olive-gold shades. A crisply struck and beautifully preserved representative. The Cleveland type was issued for the 1936 Great Lakes Exposition. Census: 5 in 68 (2 in 68 ★), 0 finer (12/14). NGC ID# 28K4, PCGS# 9288

**6366 1936 Columbia MS67+ PCGS.** Magnification brings of whispers of soft ice-blue and champagne color. Lustrous surfaces exhibit sharply struck design elements and impeccable preservation. Population: 87 in 67 (10 in 67+), 1 finer (12/14). NGC ID# 28K5, PCGS# 9291

**1892 Columbian Half Dollar  
Seldom Seen Choice Proof Striking**

**6367 1892 Columbian PR64 NGC.** The 103 proof Columbian half dollars struck in 1892 are among the most elusive and desirable of all early classic commemorative halves. This example displays deep lavender and gunmetal-gray toning over each side, but the mirrored fields retain nearly full reflectivity. The finer points of the design are struck to full definition, and no discernable contact marks are observed upon close examination. An appealing example of the first commemorative half issue. Census: 20 in 64, 9 finer (10/14). PCGS# 9295

**1892 Columbian Half, MS66+  
Prooflike Fields**

**6368 1892 Columbian MS66+ PCGS. CAC.** Fully prooflike fields provide a deep-mirror back drop for sharp, satiny devices on this high-end Premium Gem example. The margins display pale lavender-gold toning, surrounding lighter mint-green hues in the central regions. No significant abrasions are present. This is a delightful example of the first commemorative half dollar struck at the United States Mint. PCGS has seen only 29 numerically finer representatives (12/14). NGC ID# 26H5, PCGS# 9296

**1892 Columbian Half Dollar, MS67  
Start of the Silver Commemorative Series**

**6369 1892 Columbian MS67 NGC.** The first commemorative design in U.S. coinage history was the World's Columbian Exposition half dollar of 1892, a novelty that today is available in grades from heavily circulated (many pieces were spent at face value) to Superb Gems like this one. Silvery interiors, carefully preserved, give way to strong blue and dusky peach hues at the margins. Census: 45 in 67 (11 in 67 ★, 3 in 67+★), 0 finer (11/14). NGC ID# 26H5, PCGS# 9296

**1892 Columbian Half, Superb Gem  
Vividly Toned**

**6370 1892 Columbian MS67 NGC.** The first commemorative silver issue saw a massive mintage of 950,000 pieces, not all of which were sold. This 1892 Columbian half, by contrast, must have been sold to someone who took care of it, such as its beautifully toned blue and reddish-orange surfaces with a broad near-silver center on the reverse. Census: 45 in 67 (11 in 67 ★, 3 in 67+★), 0 finer (11/14). NGC ID# 26H5, PCGS# 9296

**1892 Columbian Half Dollar, MS67  
Among the Finest Certified  
Semiprooflike Fields**

**6371 1892 Columbian MS67 PCGS.** The 1892 Columbian half dollar, issued in conjunction with the World's Columbian Exposition held in Chicago in 1893, is slightly more plentiful in high grades than its 1893 counterpart, and is frequently chosen for type representation. This sharp, beautifully preserved representative displays distinct semiprooflike mirroring in the fields and frosty, subtly contrasted devices. Bold peripheral bands of ocean-blue and golden-russet surround brilliant centers. Population: 29 in 67 (5 in 67+), 0 finer (11/14). NGC ID# 26H5, PCGS# 9296

**1892 Columbian Half, MS67 ★  
Exceptional Eye Appeal**

- 6372 1892 Columbian MS67 ★ NGC.** As the first commemorative half dollar struck, the 1892 Columbian half holds a special place in the long and historic commemorative series. From the first proof striking that sold for \$10,000 in 1892 to the final 1893 business strike, Columbian halves were popularly collected at the time and in the 120-plus years since. This spectacularly toned piece displays a window of silver-white brilliance on each side, complementing lovely sea-green patina with rich reddish-golden accents at the rims. The luster and eye appeal are exceptional. One tiny, lateral mark appears just under the eye, but NGC's Star designation for exceptional eye appeal is well-merited. Although the 1892-93 Columbian halves are well-loved today, they were less than popular among some circles upon their debut, when the "sailing ship on wheels" reverse came in for particular abuse.

*Ex: New York Signature (Heritage, 6/2005), lot 7076.*

*From The Free Tilly Collection. NGC ID# 26H5, PCGS# 9296*

**1892 Columbian Half Dollar, MS67  
Remarkably Clean Surfaces**

- 6373 1892 Columbian MS67 PCGS. CAC.** This first-year issue of the Columbian half dollar commemorative series is readily available through the Gem level of preservation. The certified population starts to dwindle somewhat in Premium Gem and declines significantly in MS67. Indeed, PCGS and NGC have seen just 75 submissions in this grade.

Glowing luster exudes from both sides of this lovely Superb Gem that is patinated in soft cobalt-blue, lavender, and champagne-gold. The design elements are sharply struck throughout and close inspection reveals remarkably clean surfaces. This piece yields fantastic eye appeal that has been appropriately recognized by CAC. Population: 29 in 67 (5 in 67+), 0 finer (11/14). NGC ID# 26H5, PCGS# 9296

**1893 Columbian Half, MS67  
Exceptional Color and Luster**

- 6374 1893 Columbian MS67 NGC.** A melding of cerulean-blue and fire-orange toning surrounds the silver portrait of Columbus on the obverse, with violet and golden-yellow hues added to the mix on the reverse. Strong mint luster rolls beneath the splendid patina. This is one of the most impressively toned Columbian halves we have seen — a Superb Gem, sharp and unabashedly attractive. Census: 32 in 67 (6 in 67 ★), 2 finer (12/14). NGC ID# 26H6, PCGS# 9297

**1893 Columbian Half Dollar, MS67  
Boldly Toned**

- 6375 1893 Columbian MS67 PCGS. CAC.** The 1893 Columbian half dollar had more than 1.5 million pieces struck, a commemorative record neared but not broken until the George Washington half dollars of 1982. This Superb Gem survivor has bold luster beneath vibrant patina centered around ocean-blue and sapphire tones. Population: 17 in 67 (2 in 67+), 0 finer (11/14). NGC ID# 26H6, PCGS# 9297

**1893 Columbian Half Dollar, MS67  
Incredible Prooflike Fields**

- 6376 1893 Columbian MS67 PCGS. CAC.** A truly extraordinary piece of 19th century commemorative silver that offers distinctly prooflike attributes. While swirls of luster in the fields point to a business-strike origin, the reflectivity on this Superb Gem is undeniable, and the central devices are better-defined than usual with generous mint frost. Rich gold-orange border toning gives way to a light layer of whitish-gray across the centers. This piece offers incredible surface quality and eye appeal for this second Columbian half dollar issue. This is one of 17 MS67 pieces certified by PCGS with none numerically finer (11/14).

*Ex: Coinfest Signature (Heritage, 10/2010), lot 4376. NGC ID# 26H6, PCGS# 9297*

**6377 1935 Connecticut MS67 PCGS.** A beautiful Superb Gem example of the Connecticut commemorative half dollar, with sharp strike definition and faint traces of champagne toning on the lustrous creamy-beige and pale greenish surfaces. An impressive representative in this high grade. Population: 70 in 67 (6 in 67+), 1 finer (11/14). NGC ID# 28K8, PCGS# 9299

**6378 1935 Connecticut MS67 PCGS Secure.** Ex: Paul Denby. A sensation example of the Connecticut Tercentenary with bold definition and lightly toned, exquisitely preserved surfaces. This issue is rarely seen in such a remarkable state of preservation. Population: 70 in 67 (6 in 67+), 1 finer (11/14). NGC ID# 28K8, PCGS# 9299

**6379 1936 Delaware MS66 PCGS.** Pale but powerful patina runs the gamut through mint, saffron, orange, to pale blue near the rims on each side of this stunning Premium Gem Delaware half dollar. Vivid luster shines throughout, but most noticeably at the small untuned silver areas in the center of each side. NGC ID# 28K9, PCGS# 9301

### Telegram, Sketches and Models for the 1936 Elgin Half Dollar

**6380 1936 Elgin Uncertified.** Several items pertaining to the creation of the 1936 Elgin half dollar, including:

1. The framed original sketch of the obverse and reverse of the 1936 Elgin commemorative half dollar by designer Trygve Rovelstad. Original sketches of commemorative designs are very rare, and this is the first such sketch we have been privileged to offer.
2. A July 17, 1936-dated telegram from the Treasury Department advising that the Fine Arts Commission approved the sketches and asking for models of the proposed design.
3. The first plaster casting of the obverse and reverse design by Rovelstad, each 10 inches in diameter, on a 21x12 1/2 inch plaster slab.

(Total: 3 coins) NGC ID# 28KA, PCGS# 9303

### 1936 Elgin Half Dollar, MS67 Ex: Trygve Rovelstad, First Coin Issued

**6381 1936 Elgin MS67 NGC.** Ex: Rovelstad. The 1936 Elgin half dollar was struck to commemorate the founding of the city of Elgin, Illinois and the construction of the Pioneer Memorial, which is imaged on the reverse of the coin (the memorial was not actually completed until 2001). This coin was the first 1936 Elgin commemorative half dollar struck and was presented to sculptor Trygve Rovelstad, who designed the issue. It later passed to his daughter, Gloria Ann, and was later acquired by Anthony Swiatek. The lot is accompanied by a typed list of the first twelve coins issued describing their initial distribution to VIPs and Rovelstad himself, original paper coin envelope, signed statement by Anthony Swiatek and Trygve Rovelstad about the history of the coin, and a picture of the coin inside its original plastic custom holder.

This spectacular Superb Gem offers well-detailed design elements with satiny mint luster and hints of lavender-gray and amber toning. The small toning spot below the T in TRUST and the line of toning below the date are also visible in the picture of the coin in its plastic holder. The Elgin half dollar is a scarce issue at the MS67 grade level, and NGC has graded only nine numerically finer examples (12/14). NGC ID# 28KA, PCGS# 9303

**6382 1936 Elgin MS67+ NGC.** Frosty luster endows both sides of this high-end Superb Gem, each of which displays greenish-yellow patina and sharply struck design features. This is a marvelously preserved specimen. NGC ID# 28KA, PCGS# 9303

**6383 1936 Elgin MS67+ PCGS. CAC.** Burnt-orange and maroon patina in alternating waves of silver covers the obverse, while the reverse is largely untuned save for a thin crescent of color. This piece boasts excellent preservation, both on the untuned figures in the memorial on the reverse but also checkable beneath the moderate patina of the obverse profile. NGC ID# 28KA, PCGS# 9303

### 1936 Elgin Half Dollar, MS68 Fundraiser for Pioneer Memorial

**6384 1936 Elgin MS68 NGC.** Unlike many commemorative coin promises that never came true, the Pioneer Family Memorial designed by Trygve Rovelstad and depicted on the Elgin half was raised ... in 2001. Until then high-grade Elgin half dollars were the best testament to Rovelstad's vision, including this MS68 piece with largely silver-blue and silver-pink luster but also strong peach and apricot elements along parts of the obverse borders. Census: 9 in 68 (7 in 68 ★), 0 finer (11/14). NGC ID# 28KA, PCGS# 9303

**6385 1936 Gettysburg MS66+ NGC.** Reddish-gold, lime-green, and orange-gold patination cascades over the lustrous surfaces of this high-end Premium Gem, joined by crimson on the reverse. Sharply struck design elements and impeccable preservation round out the coin's outstanding eye appeal. NGC ID# 28KB, PCGS# 9305

**6386 1936 Gettysburg MS67 NGC.** Beautiful orange-red, forest-green, golden-brown, and stone-gray toning blankets this lustrous and well preserved Superb Gem. The 75th anniversary of the Battle of Gettysburg was held in 1938, but its silver commemorative was nonetheless issued and dated two years prior. In a former generation holder. Census: 68 in 67, 3 finer (11/14).  
Ex: *St. Louis Central States Signature (Heritage, 5/2005)*, lot 8009, which realized \$2,990.  
From *The Free Tilly Collection*. NGC ID# 28KB, PCGS# 9305

**6387 1936 Gettysburg MS67 PCGS. CAC.** Soft violet and lime-green patination resides on the highly lustrous surfaces of this remarkably clean Superb Gem. The design features are sharply struck throughout. NGC ID# 28KB, PCGS# 9305

#### 1922 Grant No Star Half Dollar, MS66 Strong Peripheral Toning

**6388 1922 Grant No Star MS66 PCGS. CAC.** The "Plain" or No Star 1922 Grant half dollars are more available than their With Star counterparts in MS66, though anything finer is a borderline condition rarity. This Premium Gem has silver interiors and bold green-gold, amber, turquoise, and ocean-blue patina around. PCGS has certified just 46 pieces as MS67 or better (11/14). NGC ID# 28KD, PCGS# 9306

#### 1922 No Star Grant Memorial Half, MS67 None Numerically Finer at PCGS

**6389 1922 Grant No Star MS67 PCGS.** The small incuse star that was present in the right obverse field when the Grant Memorial half dollar debuted in early 1922, was later removed, likely to create a new variety to offer to collectors, with the result that the majority of the Grant halves struck were of this later, No Star variant. The present example is well-struck and equally well-preserved, with satiny, gold-tinted luster. Splashes of olive-brown toning are seen periodically around the margins, primarily on the obverse, confirming the originality of the surfaces. Population: 46 in 67 (2 in 67+), 0 finer (12/14). NGC ID# 28KD, PCGS# 9306

#### 1922 Grant No Star Half Dollar, Toned MS67

**6390 1922 Grant No Star MS67 PCGS.** Splashes of peach-gold, bluish-gray, and lavender visit the lustrous surfaces of this Superb Gem Grant commemorative. The design elements are well-struck and both sides have been well-preserved. The No Star variety, having a relatively large mintage exceeding 67,000 pieces, is more frequently seen than its With Star counterpart. Population: 46 in 67 (2 in 67+), 0 finer (12/14). NGC ID# 28KD, PCGS# 9306

#### 1922 Grant No Star Half Dollar, Elusive MS67

**6391 1922 Grant No Star MS67 PCGS. CAC.** Whispers of yellow-gold, russet, and light green appear at the margins of this Superb Gem. The lustrous surfaces are well-struck and nicely preserved. This commemorative is well deserving of the CAC endorsement. Elusive at this grade level and virtually unobtainable any finer. Population: 46 in 67 (2 in 67+), 0 finer (12/14). NGC ID# 28KD, PCGS# 9306

#### 1922 No Star Grant Memorial Half, MS67+ Original Coloration

**6392 1922 Grant No Star MS67+ NGC. CAC.** A lovely Superb Gem example of the No Star Grant Memorial half dollar. Both sides show satiny luster underlying splashes of amber-red, olive, and straw-gold toning, while the surfaces are free of distractions. Slight striking softness is noted on the high points of Grant's hair, but the design elements are otherwise well-impressed. Census: 35 in 67 (4 in 67+, 5 in 67 ★), 1 finer (12/14). NGC ID# 28KD, PCGS# 9306

**6393 1922 Grant With Star MS63 PCGS. CAC.** A few small ticks on General Grant's forehead and cheek account for most of the grade on this Grant With Star, along with a few on the central cabin device on the reverse. Satin luster flows over lightly toned surfaces that show excellent eye appeal for the grade. NGC ID# 28KC, PCGS# 9307

**1922 Grant With Star Half, MS64  
Among the First Strikes**

**6394** 1922 Grant With Star MS64 PCGS. CAC. The obverse star on the Grant half designates the earliest strikes of this commemorative celebrating the centennial of the president's birth. Less than 6% of the entire emission is starred, and fewer still exist at this grade level. This is a white, lustrous example with scattered obverse marks at Grant's temple, eye, and forehead. The reverse is blemish-free and features a light chestnut band across the roof and window of Grant's birthplace. NGC ID# 28KC, PCGS# 9307

**1922 Grant Memorial Half, MS65  
With Star Variety**

**6397** 1922 Grant With Star MS65 NGC. Artistic tributes marked the centennial of Ulysses Grant's birth, including the Washington, D.C. Grant Memorial and this Philadelphia-struck commemorative half dollar. The star in the right field designates this example as one the early strikes. The obverse hosts hints of gold while the reverse is untoned. The NGC census counts 62 numerically finer examples (12/14). NGC ID# 28KC, PCGS# 9307

**1922 Grant With Star Half Dollar, MS64+  
Warm Golden Tone**

**6395** 1922 Grant With Star MS64+ PCGS. CAC. Golden color predominates across the obverse with varied hues scattered throughout. More delicate tone blankets the portrait with deeper blue, green, and yellow at the periphery. The reverse reveals hints of maroon within the trees and tinges of russet at the rim. The Grant With Star variety is scarce at the Gem level, and this MS64+ example, with CAC approval, is a worthy competitor. NGC ID# 28KC, PCGS# 9307

**1922 Grant With Star Half Dollar, MS65  
Very Scarce Any Better**

**6398** 1922 Grant With Star MS65 PCGS. CAC. The recipients of the Grant With Star half dollars had not asked for the variety, requesting the star on dollars only, but they did not turn down the gift. This With Star Gem has bright silver surfaces with just the faintest hint of blue patina in the fields. PCGS has graded 44 pieces as MS66 or finer (11/14).

Ex: ANA Signature (Heritage, 8/2004), lot 8092.

From The A. James Evans Collection, Part II. NGC ID# 28KC, PCGS# 9307

**1922 Grant With Star Half Dollar, MS65  
Key Early Commemorative**

**6396** 1922 Grant With Star MS65 NGC. Only 4,256 pieces were struck of this issue, making certain that this early commemorative would be an absolute rarity. It is also a highly respected condition rarity as few examples were well taken care of, many having been sold to the non-collecting public. As always, the fields display noticeable die polishing marks which have imparted a semiprooflike sheen on each side. Equally bright over the devices. Most of each side is brilliant with a smidgen of golden toning on the peripheries.

Ex: Long Beach Signature (Heritage, 2/2005), lot 8498. NGC ID# 28KC, PCGS# 9307

**1922 Grant With Star Half, MS65  
Exceptional Surfaces**

**6399** 1922 Grant With Star MS65 PCGS. CAC. White obverse toning exhibits occasional hints of maroon. The surfaces are smooth, and there is pair of small depressions hidden in the hair. The reverse displays similar color to the obverse, although with less intensity. The unblemished reverse fields lend the final touch to the appealing Grant commemorative. CAC has approved 23 examples at this grade level, and only 10 higher (12/14). NGC ID# 28KC, PCGS# 9307

1922 Grant With Star Half, MS66  
Well-Preserved Key Issue

- 6400** 1922 Grant With Star MS66 PCGS. The silvery surfaces show just a hint gold and powder-gray patina on this well-preserved Premium Gem, with General Grant's cheek nicely free of mentionable contact and his homeplace in Point Pleasant, Ohio, equally distraction-free. The strike is well brought up, and the swirling die-polishing lines prominent in the obverse fields serve to increase the luster. The Grant With Star is an acknowledged key to the 144-piece classic commemorative set. PCGS shows 40 in the numeric grade of MS66 (including five MS66+) and five finer in MS67 (12/14). NGC ID# 28KC, PCGS# 9307

1922 Grant With Star Half Dollar, MS66  
Lustrous and Well-Preserved

- 6401** 1922 Grant With Star MS66 PCGS. Ex: Young Collection. According to Dave Bowers, in *Commemorative Coins of the United States* (1991): "The 1922 Grant 'star' half dollar in Mint State is one of the very rarest pieces of the series simply because the mintage was low and most pieces did not sell to collectors." Early in the life of the Grant With Star half dollar obverse die, it clashed, and was then lapped by the press operator. As a result, most examples display prominent obverse die polish lines along with clash marks near the nose and chin. The present high-grade and satiny example is from that die state. Peripherally toned golden-brown, rose-red, and lavender, this Premium Gem specimen is pleasingly lustrous and minimally abraded. Population: 40 in 66 (5 in 66+), 5 finer (12/14). NGC ID# 28KC, PCGS# 9307

1922 Grant Memorial Half, MS66  
Scarcer With Star Variant

- 6402 1922 Grant With Star MS66 PCGS.** Astonishing quality for this key issue, the surfaces are bright with mint luster which is made even more intense by the faint die polishing marks in the fields. The effect of these always-seen polishing marks are limited to enhanced brightness, their actual appearance made almost invisible by the layerings of pastel iridescence that covers each side. The With Star Grant Memorial half dollar is significantly scarcer overall than its No Star counterpart, and is genuinely rare at the Premium Gem grade level. Population: 40 in 66 (5 in 66+), 5 finer (12/14).  
*Ex: Long Beach Signature (Heritage, 2/2000), lot 5762. NGC ID# 28KC, PCGS# 9307*

1922 Grant Memorial Half  
Premium Gem With Star Example

- 6403 1922 Grant With Star MS66 PCGS.** The Mint only struck 5,000 Grant Memorial half dollars with the small incuse star in the right obverse field (plus six coins for assay purposes), and 750 examples were melted, leaving a net distribution of only 4,256 coins, including assay pieces. Few examples survive as fine as the MS66 grade level, and this type in general is much scarcer than its No Star counterpart, which had a much higher distribution of 67,405 coins, including 55 assay pieces. The With Star example is carefully preserved, with satiny luster and splashes of olive, mint-green, amber, and champagne toning on each side. The hair above Grant's ear is slightly soft, but the strike is otherwise pleasing. Population: 40 in 66 (5 in 66+), 5 finer (12/14). NGC ID# 28KC, PCGS# 9307
- 6404 1928 Hawaiian MS62 PCGS. CAC.** Both sides of this Mint State Hawaiian half dollar have gold, blue, and iridescent toning with frosty underlying luster. It is a lovely example of the scarce commemorative issue, one of a handful of commemorative types with a mintage of 10,000 or fewer coins.  
*Ex: Houston Signature (Heritage, 12/2010), lot 4081. NGC ID# 28KE, PCGS# 9309*
- 6405 1928 Hawaiian MS63 PCGS.** A lustrous, highly attractive example of the Hawaiian half dollar, which is often referred to as a key issue in the early silver commemorative series. Both sides of this lightly toned representative display few abrasions. NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half Dollar, Near-Gem  
Sesquicentennial of Cook's Discovery**

- 6406 1928 Hawaiian MS64 PCGS. CAC.** In 1778 Captain James Cook led the first expedition to make contact with the Kingdom of Hawaii, though the next year he would die in the islands after an attempt to take the king hostage went sour. Cook appears on the obverse of the Hawaiian half dollar of 1928, one of the lower-mintage and more challenging classic commemoratives. This near-Gem has surprisingly little patina on softly lustrous silver surfaces. A long mark along Cook's jawline contributes to the grade. *From The Rawlin "Mac" McNelly Collection.* NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half Dollar  
Choice Uncirculated Quality**

- 6407 1928 Hawaiian MS64 PCGS. CAC.** Struck 31 years prior to the statehood of Hawaii, this key in the commemorative series recognizes James Cook at the discoverer of the Paradise of the Pacific in 1778. Coin-gray color gives way to hints of russet at the obverse rim. Both sides feature undertones of light blue, and the only marks of note are scattered about the lower portion of the obverse portrait. NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half Dollar, MS64  
Appealing Near-Gem Example of This Key**

- 6408 1928 Hawaiian MS64 PCGS. CAC.** Saffron, pink, and ice-blue hues grace the margins of this attractive near-Gem, which is still largely untuned in the centers and shows good luster and excellent eye appeal overall. A key to the complete commemorative silver set, certified in a green-label holder and much more expensive at the next grade level. *Ex: October Signature (Heritage, 10/2011), lot 4402.* NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half Dollar, Well-Struck MS64**

- 6409 1928 Hawaiian MS64 PCGS. CAC.** The Hawaiian Sesquicentennial half dollar is regarded as one of the keys to the classic commemorative series. Only 10,008 pieces were produced, and few are known in the upper Mint State grades. This Choice example is well-struck and satiny, with varying shades of olive toning encompassing both sides. NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half, Appealing MS64**

- 6410 1928 Hawaiian MS64 PCGS. CAC.** This near-Gem example is deeply satiny, with blended tones of lavender-gray and champagne overlying each side. The strike is sharp and there are no major abrasions observed upon close examination. Struck to celebrate the 150th anniversary of Captain James Cook's arrival on the Hawaiian islands in 1778. NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half Dollar, Well-Struck MS65  
Elusive Any Finer**

- 6411 1928 Hawaiian MS65 PCGS.** Hints of champagne-gold and sky-blue patina run over the lustrous surfaces of this Gem Hawaiian commemorative half dollar. The design elements are well-struck, including clarity in the beach landscape on the reverse. A few minuscule marks are visible, as is an unobtrusive luster graze beneath the S in TRUST. Somewhat challenging in Gem condition and elusive any finer. *Housed in a green label holder. From The Free Tilly Collection.* NGC ID# 28KE, PCGS# 9309

1928 Hawaiian Half Dollar, MS65  
Distinctive Dappled Toning

- 6412 1928 Hawaiian MS65 PCGS. An oft-overlooked aspect of the Hawaiian half dollar design, the eight triangles flanking the words HALF DOLLAR, symbolizes the eight major islands in the chain. This Gem representative has a mix of silver-gray, reddish-gold, and claret hues, the latter appearing primarily at the lower reverse. PCGS has graded just 99 coins as MS65 or finer (11/14). NGC ID# 28KE, PCGS# 9309

1928 Hawaiian Half Dollar, MS65  
Brilliant, Satiny Surfaces

- 6413 1928 Hawaiian MS65 PCGS. CAC. An unusual example of this elusive commemorative half dollar, this Gem example is devoid of toning, showing just smooth, satiny luster and carefully preserved surfaces. The design elements also exhibit above-average sharpness. Finer representatives are seldom available. NGC ID# 28KE, PCGS# 9309

1928 Hawaiian Half, Toned MS65

- 6414 1928 Hawaiian MS65 PCGS. CAC. A deeply toned Gem with an appearance reminiscent of the Bank of Hawaii hoard coins that were auctioned more than 25 years ago. Satiny luster and bold design elements are evident beneath golden-brown, olive-yellow, and iridescent toning.  
Ex: *Central States Signature* (Heritage, 4-5/2009), lot 3366. NGC ID# 28KE, PCGS# 9309

1928 Hawaiian Half Dollar, MS65  
Distinctive Lemon-Silver Toning

- 6415 1928 Hawaiian MS65 NGC. CAC. An accurately graded and beautiful Gem that escaped the heavy abrasions and unattractive toning that plague so many survivors of the issue. This lustrous coin displays lemon-silver color, with subtle iridescence and hints of copper at the rims. A few light marks are consistent for the assigned grade, the strike is bold, and there are no notable distractions. Gem Hawaiians are consistently in demand — a fact that has not changed since they were distributed primarily to the Hawaiian populace more than 85 years ago.  
Ex: *Central States Signature* (Heritage, 4/2006), lot 4955. NGC ID# 28KE, PCGS# 9309

1928 Hawaiian Half, Toned MS65

- 6416 1928 Hawaiian MS65 PCGS. CAC. Green and gold overlay dappled gray toning on this attractive Hawaiian half. The obverse fields are remarkably smooth save for a depression at the compass point. The reverse reveals original surfaces with pleasing hints of russet, yellow, and green. NGC ID# 28KE, PCGS# 9309

1928 Hawaiian Half Dollar  
Lightly Toned Gem

- 6417 1928 Hawaiian MS65 PCGS. CAC. An intensely vibrant example of this popular Hawaii commemorative half dollar, with satiny surfaces and exceptional preservation. Warm champagne toning encompasses much of each side, although the lower-left periphery exhibits a deeper crescent of vivid rainbow colors. Seldom seen technically or visually finer. NGC ID# 28KE, PCGS# 9309

---

**1928 Hawaiian Half Dollar, MS66  
Understated Beauty**

- 6418** 1928 Hawaiian MS66 PCGS. The famously challenging Hawaiian half dollar, struck on the 150th anniversary of Captain Cook's arrival on the island chain, came more than 30 years before the territory achieved statehood. This Premium Gem has primarily pearl-gray surfaces with soft but pleasing luster. Population: 97 in 66 (10 in 66+), 2 finer (11/14).  
*From The A. James Evans Collection, Part II.* NGC ID# 28KE, PCGS# 9309

---

**1928 Hawaiian Half Dollar, MS66  
Ex: Young Collection**

- 6419** 1928 Hawaiian MS66 PCGS. Ex: Young Collection. Formerly part of the #1 PCGS Registry set of Classic Commemoratives, this Hawaiian half dollar is a Premium Gem sure to please. Moderately toned silver-gray surfaces deepen to near-opacity at the upper obverse and right reverse margins, though plenty of luster filters through. Surprisingly few marks for this famously ill-treated issue. PCGS has graded just two pieces as MS67 or better (11/14). NGC ID# 28KE, PCGS# 9309

---

**1928 Hawaiian Half Dollar, MS66  
Elusive at This Level**

- 6420** 1928 Hawaiian MS66 PCGS. The 1928 Hawaiian half dollar can be located through Gem condition with relatively little trouble. The issue becomes elusive any finer. Splashes of deep gold patina visit the lustrous surfaces, more so on the obverse. Well-struck design features and minimally abraded surfaces round out the coin's pleasing eye appeal. Population: 97 in 66 (10 in 66+), 2 finer (11/14). NGC ID# 28KE, PCGS# 9309

---

**1928 Hawaiian Sesquicentennial Half  
Champagne-Toned Premium Gem**

- 6421** 1928 Hawaiian MS66 PCGS. The Hawaiian half dollars represent one of the few success stories among the classic commemorative series. A prudent 10,008-piece mintage was accomplished (including 50 sandblast proofs and eight assay coins) and, more importantly, all were promptly sold. The low mintage and sizeable distribution to the Hawaiian populace mean relatively few survivors today, making the issue elusive in all grades and highly prized. This appealing champagne-toned Premium Gem shows a sharp strike and strong satin luster. The surfaces are devoid of all but the most minor marks, none of which are individually significant. Just two coins are certified numerically finer at PCGS (12/14). NGC ID# 28KE, PCGS# 9309

---

**1928 Hawaiian Half, MS66  
Silver Series Design Key**

- 6422** 1928 Hawaiian MS66 PCGS. CAC. A significant number of Hawaiian half dollars were sold to a general public that mishandled them, making better-than-Gem coins all the rarer. This MS66 piece is strongly toned, largely rose-lavender and violet with windows of lighter sea-green and blue in a wedge and the left obverse and a curtain-like formation at the left reverse. Population: 97 in 66 (10 in 66+), 2 finer (11/14). NGC ID# 28KE, PCGS# 9309

---

**1928 Hawaiian Half Dollar, Toned MS66**

- 6423** 1928 Hawaiian MS66 PCGS. CAC. Sales of the 1928 Hawaiian commemorative half dollar through the Bank of Hawaii were brisk and the issue sold out quickly, mostly to residents of the Hawaiian Islands. Deep yellow-gold patina laced with lime-green and rose covers the lustrous surfaces of this lovely Premium Gem. Sharply struck design elements and impeccably preserved surfaces round out the coin's outstanding eye appeal. Population: 97 in 66 (10 in 66+), 2 finer (12/14). NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half Dollar, MS66+  
Colorful, Light Toning**

**6424 1928 Hawaiian MS66+ NGC. CAC.** Pleasing toning is the hallmark of this CAC-approved Premium Gem Hawaiian half. The obverse exhibits even gold color across the left field while light blue blankets the lower half. The obverse fields are clean, and Cook's bust neatly absorbs the minimal chatter that is present. The reverse features richer toning as the Hawaiian king points to the spectacular rainbow peering behind the mountain. Census: 78 in 66 (2 in 66+, 8 in 66 ★), 4 finer (12/14). NGC ID# 28KE, PCGS# 9309

**6425 1935 Hudson MS66 PCGS.** Neptune, the whale, and the mermaid are all pleasingly free of mentionable contact, unusual for this issue. The surfaces are frosty and lightly toned sandy-brown on portions of each side. An issue seldom seen in higher grades; PCGS shows 11 numerically finer, including one MS 67+ (12/14). NGC ID# 28KE, PCGS# 9312

**6426 1935 Hudson MS66 PCGS. CAC.** Thick, rich, virtually undisturbed mint frost envelops both sides of this Premium Gem. The surfaces are well-defined and tinged in mottled tan-gray shades with freckles of russet at the peripheries. PCGS reports only 11 numerically finer (12/14). NGC ID# 28KE, PCGS# 9312

**6427 1935 Hudson MS66 PCGS. CAC.** Freckles of russet gravitate to the margins of this Premium Gem commemorative while whispers of yellow-gold make appearances on the reverse. A solid strike emboldens the design features and the lustrous surfaces are magnificently preserved. PCGS has graded only 11 examples finer (12/14). NGC ID# 28KE, PCGS# 9312

**6428 1935 Hudson MS66 PCGS. CAC.** Soft champagne-gold patina shows more prominently under magnification on this Hudson commemorative. The design features are well-impressed throughout, and the lustrous surfaces have been well cared for. This issue commemorated the founding of Hudson, a small town located between New York City and Albany. NGC ID# 28KE, PCGS# 9312

**1935 Hudson Half Dollar, MS66+  
Bold Peripheral Toning**

**6429 1935 Hudson MS66+ PCGS. CAC.** The Hudson half dollar has some of the most fascinating lettering in the entirety of U.S. coinage thanks to the rounded, eccentric characters forming the name HUDSON that overlap with the nearby waves. This MS66+ Hudson half has a typically soft strike but above-average silver luster with bold peripheral bands of gold-orange and violet. PCGS has graded only 11 pieces as MS67 or better (11/14). NGC ID# 28KE, PCGS# 9312

**1935 Hudson Commemorative, MS67  
Splendid Visual Appeal**

**6430 1935 Hudson MS67 NGC. CAC.** Iridescent toning occurs peripherally around the obverse in shades of jade-green, magenta, and orange, while the interior remains mostly light golden in color. The reverse is lightly patinated with splashes of golden-russet color. Softly frosted luster enlivens the carefully preserved surfaces of this Superb Gem Hudson commemorative, further enhancing its strong eye appeal. This coin is among the finest numerically certified at both NGC and PCGS. Census: 31 in 67 (3 in 67 ★), 0 finer (12/14). NGC ID# 28KE, PCGS# 9312

**1924 Huguenot Half, MS67+  
Bold Border Toning**

**6431 1924 Huguenot MS67+ PCGS. CAC.** The portraits on the Huguenot half dollars, though dignified, are of men from a different time and thus make as much sense as a picture of George Washington on a Civil War commemorative. Historical issues notwithstanding, the design is generally praised and this MS67+ piece with orange and blue-violet border toning shows it off to full effect. Population: 57 in 67 (8 in 67+), 2 finer (11/14). NGC ID# 28KG, PCGS# 9314

**1924 Huguenot Half, MS67+  
Delightfully Toned**

**6432 1924 Huguenot MS67+ NGC. CAC.** The early Dutch settlement of what is now the United States, little-known in American popular culture except as the background for the drama series *New Amsterdam*, also is the subject of the Huguenot-Walloon Tercentenary commemorative. This magnificently preserved example has elegant peach, plum, and steel-blue patina over amply lustrous and carefully preserved surfaces. Census: 52 in 67 (2 in 67+, 4 in 67 ★, 1 in 67+★), 0 finer (11/14). NGC ID# 28KG, PCGS# 9314

**1924 Huguenot-Walloon Half, MS67+ ★  
Finest Certified at NGC**

**6433 1924 Huguenot MS67+ ★ NGC. CAC.** A magnificent specimen of the 1924 Huguenot-Walloon Tercentenary half dollar, struck to commemorate the 300th anniversary of the founding of the Dutch colony of New Netherland. The obverse features portraits of William the Silent and Admiral Gaspard de Coligny, leaders of the Protestant Reformation, both of whom actually died several decades before the Dutch East India Company founded the colony whose settlement the coins were commemorating.

This spectacular piece displays impeccably preserved surfaces, and sharply detailed design elements throughout. The brilliant silver center yields to vivid shades of greenish-gold and lavender toning at the peripheries on the obverse, while the reverse is blanketed in shades of champagne-gold and pink. Vibrant mint luster shines through the patina and eye appeal is incredible. Few Huguenot-Walloon half dollars show attractive multicolor toning at this grade level, and a similarly toned MS66+ PCGS specimen sold for \$34,500 in 2011. This coin is the only MS67 example to receive both the plus and star designation at NGC, with none finer (12/14). The lot is accompanied by a copy of *The Huguenot-Walloon Tercentenary*, a book sponsored by the Huguenot-Walloon New Netherland Commission and written by their secretary, Antonia Froendt. (Total: 2 coins) NGC ID# 28KG, PCGS# 9314

**1946 Iowa Reverse Impression  
Large Metallic Representation**

**6434 1946 Iowa Reverse Impression.** A thin 8.25 inch metallic representation of the reverse for the Iowa Centennial half dollar is affixed to a wooden plaque. An affixed description states that this item was "struck" from the original model of sculptor Adam Pietz. While certainly reproduced from the original model, it was clearly not struck in that manner that a coin was struck. The overall plaque measures approximately 12 x 14 inches.

**1946 Iowa Centennial Half Dollar, MS68+  
Tied for Finest Known at PCGS**

**6435 1946 Iowa MS68+ PCGS.** A mintage of 100,057 pieces was promptly sold out to a numismatically inclined public, in part because the postwar coin market was booming. Most were distributed in-state by the Iowa Centennial Committee. The Iowa half was an exceptionally well-produced issue by the Mint, and today most survivors are in higher grades. This Superb Gem is at the top of known examples, with radiant, satin mint luster and an exceptional full strike. Vivid rainbow toning visits the margins on both sides of the coin. One of seven MS68 coins to earn the PCGS Plus designation, with none certified finer. Population: 76 in 68 (7 in 68+), 0 finer (12/14). NGC ID# 28KJ, PCGS# 9316

**1946 Iowa Centennial Half, MS68+  
Among the Finest Certified**

**6436 1946 Iowa MS68+ PCGS. CAC.** Splashes of fire-red, sun-gold, and forest-green enrich much of the obverse border, although the remainder of this pristine Superb Gem remains brilliant. Highly lustrous and fully struck. The Iowa issue is the sole postwar statehood centennial issue. Population: 76 in 68 (7 in 68+), 0 finer (12/14). NGC ID# 28KJ, PCGS# 9316

**1925 Lexington Half Dollar, MS67  
Also Honors Battle of Concord**

- 6437 1925 Lexington MS67 PCGS.** The sesquicentennial of the Revolutionary War's beginning is the subject of this popular commemorative. Despite a six-figure mintage, the issue is a rarity in Superb Gem and finer grades. This MS67 coin has warm luster filtering through deep rose, violet, and ocean-blue patina. Population: 21 in 67 (3 in 67+), 1 finer (11/14). NGC ID# 28KK, PCGS# 9318

**1925 Lexington Half Dollar, MS67  
In-Demand Revolutionary War Commemorative**

- 6438 1925 Lexington MS67 NGC.** Issued in commemoration of the Lexington-Concord Sesquicentennial (1775-1925), this issue is also known as the Patriot half dollar and features the Concord Minuteman on the obverse and Lexington's Old Belfry on the reverse. This popular issue is always in demand as a tribute to the soldiers of the Revolutionary War.

This multicolor Superb Gem has brilliant satin luster beneath natural speckled golden-brown and iridescent toning. The strike is excellent and the surfaces are pristine, an exceptional, highly appealing example. Census: 15 in 67 (1 in 67+★), 0 finer (12/14). NGC ID# 28KK, PCGS# 9318

**1925 Lexington Half Dollar, MS67  
Carefully Preserved and Colorful**

- 6439 1925 Lexington MS67 PCGS. CAC.** The 150th anniversary of the fateful battles at Lexington Concord were the subject of this half dollar, struck a year before the nation's "official" Sesquicentennial commemorative. This Superb Gem Lexington half has distinctive blue and green overtones of varying strength across strongly lustrous and carefully preserved surfaces. Population: 21 in 67 (3 in 67+), 1 finer (11/14). NGC ID# 28KK, PCGS# 9318

**1918 Lincoln Half Dollar, MS66  
Uncommonly Colorful**

- 6440 1918 Lincoln MS66 PCGS. CAC.** Run-of-the-mill Lincoln half dollar commemoratives in MS66 are readily available on the open market. This CAC-stickered Premium Gem, however, has powerful luster beneath bold and colorful patina, silver-blue, peach, and violet on each side with even more vibrancy on the reverse. PCGS# 9320

- 6441 1918 Lincoln MS67 PCGS. CAC.** Nine years after he became the first President whose portrait graced circulating coinage, Abraham Lincoln received a commemorative depiction on the obverse of the half dollar celebrating the Illinois statehood centennial. Rich peach and blue-to-violet tones enhance the eye appeal, while areas of silver hint at the coin's onetime appearance. PCGS has graded just two examples as MS68 or finer (11/14). PCGS# 9320

- 6442 1918 Lincoln MS67 PCGS. CAC.** This majestic Superb Gem exhibits razor-sharp definition on all design elements, with vibrant mint luster and traces of pale gold toning. PCGS has graded a mere two coins numerically finer (12/14). PCGS# 9320

- 6443 1936 Long Island MS67 NGC.** A deeply toned Superb Gem, with mottled tan, gold, magenta, and violet throughout the periphery. The central devices have a vivid mix of silver-gray and medium-brown coloration. Splendid luster radiates beneath the patina and complements the powerfully struck design elements. A few wispy abrasions keep this attractive piece from being absolutely flawless. NGC and PCGS combined have certified only four examples finer (12/14). NGC ID# 28KL, PCGS# 9322

**1936 Long Island Half Dollar, MS67  
Dramatic Tab Toning**

- 6444 1936 Long Island MS67 PCGS. CAC.** The obverse of this delightful Premium Gem shows dark tab toning, while the reverse is completely blanketed in shades of lavender-gray and sea-green. The design elements are well-detailed and vibrant mint luster shines beneath the toning. Visual appeal is quite strong. Population: 57 in 67 (2 in 67+), 0 finer (11/14). NGC ID# 28KL, PCGS# 9322

---

**1936 Long Island Half, Superb Gem  
Designed by Adolph Weinman's Son**

- 6445** 1936 Long Island MS67 PCGS. CAC. While the Chief Engravers surnamed Barber are the most famous father-and-son duo in U.S. coin design history, the Weinmans, father Adolph and son Howard, also count due to the son's credit on the Long Island half dollar. This Superb Gem has satin texture and broad silver centers with distinct peach, rose, and violet hues through the fields. Population: 58 in 67 (2 in 67+), 0 finer (11/14). NGC ID# 28KL, PCGS# 9322

---

**1936 Long Island Half, MS67  
Bold Burnt-Orange Toning**

- 6446** 1936 Long Island MS67 PCGS. CAC. The deep burnt-orange toning seen on many of the best Long Island half dollars is prevalent on this Superb Gem particularly the reverse. That side adds violet accents, while on the obverse the smooth portraits remain largely silver-gray. Population: 58 in 67 (2 in 67+), 0 finer (11/14). NGC ID# 28KL, PCGS# 9322

---

**1936 Long Island Half Dollar, MS68  
Remarkably Well-Preserved  
Among the Four Finest**

- 6447** 1936 Long Island MS68 NGC. Deep orange, crimson, rose, and forest-green hues show only small scattered breaks for pearl-gray on the obverse. The reverse is border-toned deep bluish-violet, reddish-rust, orange, and grayish-green while the interior remains largely silver-gray. The design elements are sharply struck and the surfaces are remarkably well-preserved for the issue, especially considering the broad open designs of the obverse portraits and the reverse sails of the ship. Marks on these latter features stand out on most surviving specimens. One of four MS68 coins known to NGC with none numerically finer; PCGS has seen none at this level (11/14). NGC ID# 28KL, PCGS# 9322
-

**1936 Lynchburg Half, MS67+  
Living Senator as Subject**

- 6448 1936 Lynchburg MS67+ PCGS. CAC.** Senator Carter Glass of Virginia was still alive at the time of his depiction on the Lynchburg commemorative, a source of some controversy. This MS67+ coin, unbettered in the PCGS *Population Report* (11/14), has a tab-toned obverse with peach, ruby, and claret toning around a largely silver center. On the reverse, the colors are small and dappled across a broad silver base. NGC ID# 28KM, PCGS# 9324

**1920 Maine Half Dollar, MS67  
No PCGS Coins in Higher Numeric Grade**

- 6449 1920 Maine MS67 PCGS Secure.** Ex: Paul Denby. Attractive shades of golden-brown and lavender-gray toning visit the well-preserved surfaces of this spectacular Superb Gem. The design elements are well-detailed and the surfaces radiate satiny mint luster. From a distribution total of 50,028 pieces. Population: 37 in 67 (4 in 67+), 0 finer (11/14). NGC ID# 28KN, PCGS# 9326

**1920 Maine Centennial Half, MS67  
Satiny-Silver Appeal**

- 6450 1920 Maine MS67 PCGS. CAC.** A light dusting of amber-gold patina shows on the margins of this Superb Gem Maine half dollar, but overall the impression is silver-white brilliance. Few of the production problems that plague the issue are seen on the surfaces of this smooth and pristine example. Die finishing marks are at a minimum, and there are no overt handling marks that are often seen. The strike is bold except for the usual blending of the branches on the pine tree and the moose below. Population: 37 in 67 (4 in 67+), 0 finer (11/14). NGC ID# 28KN, PCGS# 9326

- 6451 1921 Missouri MS65 PCGS.** A well-struck example of this early commemorative type, showing better-than-average sharpness on the reverse figures and bold articulation of the stars and legends. A lustrous and originally toned representative with well-preserved, unmarked surfaces. NGC ID# 28KS, PCGS# 9330

- 6452 1921 Missouri MS65 PCGS.** Rich golden-brown and sea-green fill the obverse border, while the centers display light tan patina. A sharply struck and satiny Gem with pleasing preservation. The Missouri is a scarce early type, whether or not it has a 2x4 in the left obverse field.

Ex: *Houston Signature* (Heritage, 11/2007), lot 61351; *Long Beach Signature* (Heritage, 2/2007), lot 6053.

From *The Free Tilly Collection*. NGC ID# 28KS, PCGS# 9330

- 6453 1921 Missouri MS65 NGC.** A veneer of champagne-gold patina resides on the lustrous surfaces of this Gem commemorative. The design elements are sharply struck. The 1921 Missouri becomes quite challenging any finer. NGC ID# 28KS, PCGS# 9330

- 6454 1921 Missouri MS65 PCGS.** Ex: W.P.E. Collection. A sharply struck example of this challenging, low-mintage issue, with lovely lavender-violet toning and well made devices. The lustrous surfaces are impressively preserved. NGC ID# 28KS, PCGS# 9330

- 6455 1921 Missouri MS65 NGC.** An untuned, gleaming silver-white Gem of this better-date silver commemorative, about of equal value and rarity in this grade with its 2★4 counterpart. The obverse profile is pleasingly free of major contact. NGC reports only 38 numerically finer — 36 in MS66, two in MS67 (12/14). NGC ID# 28KS, PCGS# 9330

- 6456 1921 Missouri MS65 NGC.** Softly lustrous surfaces are untuned save for a light golden cast, and they show good preservation on each side, with scattered small contact marks appearing only under a loupe. A better issue in the commemorative series, and especially popular in this grade, as it is seldom seen finer. NGC ID# 28KS, PCGS# 9330

- 6457 1921 Missouri MS65 PCGS.** Green-gold, gray, and orange hues mix on this “plain” Missouri Gem. The surfaces are better-defined than usually seen — the strap across the frontiersman’s shoulder on the reverse is visible — though a couple of light flaws are hidden in the portrait’s cap. NGC ID# 28KS, PCGS# 9330

- 6458 1921 Missouri MS65 PCGS. CAC.** While the “plain” Missouri half dollars of 1921 are less popular than their 2★4 counterparts, their mintages are within a few hundred coins of each other. This Gem has broad silver luster with touches of blue and gold at the margins. PCGS has certified just 39 pieces as MS66 or better (11/14). From *The A. James Evans Collection, Part II*. NGC ID# 28KS, PCGS# 9330

- 6459 1921 Missouri MS65 PCGS. CAC.** Amber-gold, pinkish, and pale greenish-white patina complement flowing luster and good overall preservation on this Gem Missouri half dollar. Of the non-2★4 variety such as the present example, PCGS shows only 39 grading events finer (12/14). Both Missouri types can be considered key coins within the 144-piece series. NGC ID# 28KS, PCGS# 9330

- 6460 1921 Missouri MS65 PCGS. CAC.** The Missouri commemorative half lacking the 2★4 is not significantly more available than the With 2★4, even though the latter gets the lion’s share of attention. The certified populations in Gem and finer grades also do not differ greatly. Powder-gray and gold patina complement expansive luster on this well-preserved piece. PCGS shows only 39 submissions numerically finer — all of them MS66, but likely not all separate coins (12/14). NGC ID# 28KS, PCGS# 9330

- 6461 1921 Missouri 2x4 MS65 PCGS.** Like the Alabama also struck in 1921, the Missouri had the numerical sequence of its entry into the Union stamped into the obverse field as a separate variety. The present lustrous Gem displays delicate straw-gold toning and is free from mentionable marks.

Ex: *New York Signature* (Heritage, 7/2002), lot 5391, which realized \$3,680.

From *The A. James Evans Collection, Part II*. NGC ID# 28KR, PCGS# 9331

- 6462 1921 Missouri 2x4 MS65 PCGS.** Reddish-gold and yellow-green toning gravitates to the margins of this sharply struck Gem. Both sides have been well cared for.

From *The College Collection*. NGC ID# 28KR, PCGS# 9331

**6463 1921 Missouri 2x4 MS65 PCGS.** One of the most in-demand issues among the 144-piece complete commemorative silver collection, the Missouri 2★4 pieces were struck specifically to increase profits by having two different types. (The 24 refers to Missouri becoming the 24th state in 1821, following the Missouri Compromise of 1820.) This is a grayish-gold Gem with satiny luster and excellent preservation. NGC ID# 28KR, PCGS# 9331

**6464 1921 Missouri 2x4 MS65 PCGS. CAC. Ex: Gutttag Family.** Satin luster on cream-gray surfaces complements tinges of pinkish patina seen on each side. A few marks show under a loupe on the high points, notably the frontiersman's shoulder and legs on the reverse, but there are no overt abrasions and the eye appeal is excellent. Seldom seen in higher grades. NGC ID# 28KR, PCGS# 9331

**1921 Missouri 2x4 Half Dollar, MS66  
Mintage 5,000 Pieces**

**6465 1921 Missouri 2x4 MS66 NGC.** One of several artificially created varieties of commemorative half dollars of its time, the Missouri 2x4 is popular in part due to its low mintage of just 5,000 pieces. This Premium Gem has dotted gunmetal "ring" toning midway into each side, while the surrounding areas remain lustrous silver. Softly struck in the usual spots but minimally marked. Neither NGC nor PCGS has graded an MS67 example (11/14). NGC ID# 28KR, PCGS# 9331

**1921 Missouri Half Dollar, MS66  
2x4 Example, Only One Finer**

**6466 1921 Missouri 2x4 MS66 PCGS. CAC.** Highly prized at the Premium Gem level, this MS66 specimen originates from the initial striking of the Missouri commemoratives, as denoted by the 2★4 designation in the left obverse field. The "2x4" obverse pairs with the 24 star reverse to identify Missouri as the 24th state in the Union. Gray surfaces host several obverse bands of reddish-brown while the reverse is evenly toned throughout. The minimal abrasions are as expected for the lofty grade level, and are primarily limited to the frontiersman's left (facing) calf. PCGS population: 34 in 66 (1 in 66+), 0 finer (12/14). NGC ID# 28KR, PCGS# 9331

**6467 1923-S Monroe MS65+ PCGS. CAC.** Presidents Monroe and Adams show better preservation than usually seen on this issue, as do the major devices on the reverse. Delicate copper-gold and mint-green patina is barely perceptible on each side, a lovely effect. Population: 16 in 65+, 84 finer (12/14). NGC ID# 28KT, PCGS# 9333

**6468 1923-S Monroe MS65+ PCGS. CAC.** This high-end Gem displays vibrant mint luster and well-detailed design elements under attractive shades of greenish-gold and lavender-gray toning. The surfaces are impeccably preserved and overall eye appeal is outstanding. NGC ID# 28KT, PCGS# 9333

**1923-S Monroe Half, MS66  
Rare in Superior Grades**

**6469 1923-S Monroe MS66 NGC.** More than 274,000 examples of this commemorative were struck, but many unsold pieces were subsequently released into circulation at face value. High-grade Mint State specimens survive to a certain extent, though pieces grading finer than this representative are genuinely rare. Radiant mint luster illuminates dappled rainbow toning over much of the obverse and the around the reverse periphery. The design elements are well-defined, and the surfaces are free of any distracting abrasions. Census: 57 in 66 (3 in 66+, 1 in 66★, 1 in 66+★), 8 finer (11/14). NGC ID# 28KT, PCGS# 9333

**1923-S Monroe Half, MS66  
Scarce at This Grade Level**

**6470 1923-S Monroe MS66 PCGS. CAC.** The 1823 Monroe Doctrine embodied America's opposition to further colonial expansion in the New World. John Quincy Adams suggested the policy that James Monroe championed as president. The two are immortalized on this commemorative, one of the finest surviving examples. Both sides exhibit speckled, brown toning, with only a trivial obverse line at Monroe's forehead and a lint mark in the reverse field to the left. Population: 78 in 66 (5 in 66+), 6 finer (12/14). NGC ID# 28KT, PCGS# 9333

**1923-S Monroe Half Dollar, MS66+  
Condition Rarity in Finer Grades**

**6471 1923-S Monroe MS66+ PCGS. CAC.** The San Francisco Mint produced an ambitious total of 274,000 Monroe commemorative half dollars in 1923 (and 77 more for assay purposes). Unfortunately, the issue was not as well-received as hoped, and many coins went unsold. A large number of these pieces were released into circulation at face value in later years. As a result, the Monroe half dollar is often seen with wear and excessive surface marks. The issue is genuinely scarce in MS66 condition, and finer examples are very rare.

This high-end Premium Gem displays vibrant mint luster, under attractive shades of lavender-gray, greenish-gold, and amber toning. The well-detailed design elements complement the virtually pristine surfaces. Population: 77 in 66 (5 in 66+), 6 finer (11/14). NGC ID# 28KT, PCGS# 9333

**1938 New Rochelle Plaster Casts  
Lorrillard Wise's Rejected Design**

**6472 1938 New Rochelle Rejected Design Plaster Casts.** Two nine-inch plaster casts of the obverse and reverse depict the rejected Lorrillard Wise design for the New Rochelle commemorative half dollar. The Commission of Fine Arts was opposed to his designs and soon contacted Gertrude Lathrop, who submitted designs that were finally adopted. The two plaster casts illustrate what might have been in the commemorative field, and provide an tangible reminder of an episode that was recounted in Don Taxay's *An Illustrated History of U.S. Commemorative Coinage*. Both casts are in excellent condition without cracks or chips. (Total: 2 pieces) NGC ID# 28KU, PCGS# 9335

**1938 New Rochelle Half Dollar, SP66  
Rare Specimen Striking**

**6473 1938 New Rochelle SP66 NGC. CAC.** A total of 50 special or "Specimen" strikings of the New Rochelle half dollar were distributed to important members of that community, along with those on the related Coinage Committee and certain individuals connected to the Westchester County Coin Club. While a number of prooflike pieces are also known for the issue, this specimen coin sets itself apart for its detail. While most New Rochelle halves are extremely blurry on the petal midrib of the iris, this piece is sharper there, if not complete on the uppermost element. Extensive die polish lines descend through the flower, a clue to the source of this coin's reflectivity. Census: 6 in 66, 5 finer (12/14). NGC ID# 28KU, PCGS# 9335

**6474 1936 Norfolk MS68 PCGS. CAC.** The verbose legends of the Norfolk type protect the fields and allow for high third party grades by the standards of the classic commemorative era. This pristine, coruscating half dollar displays light to medium olive-gold and caramel-gold toning. This MS68-CAC piece is one of 56 such (12/14). NGC ID# 28KV, PCGS# 9337

**Large Format 1925 Norse-American Medal  
Silvered Bronze, MS64**

- 6475 1925 Norse Medal, Large Format, Silvered MS64 NGC.** Legislation was introduced to Congress for a Norse-American commemorative half dollar, and Congress voted against an actual coin, compromising with the issue of commemorative medallions, including the thick and thin half dollar-sized octagonal pieces, smaller gold issues, and these large silvered bronze medallions that measure 67mm between opposing sides. The 68th Congress approved "An Act to authorize the Secretary of the Treasury to prepare a medal with appropriate emblems and inscriptions commemorative of the Norse-American Centennial" on March 2, 1925. The legislation limited production to 40,000 medals, but said nothing of size and material. Most likely, Congress assumed that half dollar-sized medals were intended. Only 75 examples of this large format silvered bronze medal were struck. This impressive piece has nearly all of its brilliant silver finish remaining, with only a few small spots of the underlying bronze visible. PCGS# 523083

**1926-S Oregon Trail Half, MS68  
One of the First Two Issues**

- 6476 1926-S Oregon MS68 NGC.** The 1926-S was one of two Oregon Trail issues actually struck on the 75th anniversary the design was meant to celebrate, a relatively tame cash-grab compared to what was to come. This MS68 representative has strong silver-gray luster on the interiors with gold and umber border-toning. Census: 15 in 68 (3 in 68 ★, 1 in 68+★), 0 finer (11/14). NGC ID# 28KX, PCGS# 9341

**1926-S Oregon Trail Half Dollar, MS68  
None Finer at PCGS**

- 6477 1926-S Oregon MS68 PCGS. CAC. Ex: Bruce Scher.** The Oregon Trail half dollar is one of the most popular issues in the silver commemorative series because of its beautiful evocative design. The 1926-S claims a distribution of 83,055 pieces and this incredible MS68 example is among the finest survivors in terms of technical quality and aesthetic appeal. The design elements are sharply detailed throughout and the impeccably preserved surfaces display a mix of brilliant silver, powder-blue, plum-mauve, and golden-brown toning, with most of the color at the peripheries. Vibrant mint luster shines through the patina, adding to the intense visual appeal. Population: 6 in 68, 0 finer (11/14). NGC ID# 28KX, PCGS# 9341

**1936 Oregon Trail Half Dollar, MS68  
Among the Finest Certified**

- 6478 1936 Oregon MS68 NGC.** The 1936 Oregon Trail Memorial half dollar is usually obtainable in grades through MS67, but for the patient collector who must have only the best, a small handful of MS68 coins are known. This representative is boldly struck, particularly on the rear-most upright of the wagon, with satiny luster that illuminates pale mint-gold and lavender hues over each side. Close examination fails to reveal any obtrusive abrasions, making this piece truly appealing from both a technical and aesthetic viewpoint. Census: 5 in 68 (1 in 68 ★), 0 finer (11/14). NGC ID# 28L3, PCGS# 9345

**1936 Oregon, MS68  
Superb Strike, Splendid Patina**

- 6479 1936 Oregon MS68 PCGS. CAC.** The satin-smooth surfaces show virtually no marks other than a few microscopic lines on the hillside visible only under magnification. Fully struck, especially for the issue that is sometimes weak at the borders. A natural patina of umber-brown rims and amber-orange margins merges into lilac centers, with hints of lime-green and champagne-gold. MS68 is the top of the line for this issue, with no reported specimens graded numerically finer. Population: 6 in 68, 0 finer (12/14). NGC ID# 28L3, PCGS# 9345

**1936-S Oregon Half, MS68  
First S-Mint Oregon Issue in a Decade**

- 6480 1936-S Oregon MS68 NGC.** A decade after the Oregon Trail design's first striking in San Francisco in 1926, it returned in an issue motivated by little more than greed. This is a high-end survivor from among the 5,000 coins (plus assay pieces) produced, primarily bright silver with areas of light peach visible in the fields and at the margins. Census: 14 in 68 (2 in 68 ★), 0 finer (11/14). NGC ID# 28L4, PCGS# 9346

- 6481 1937-D Oregon MS68 NGC.** This sharply struck Superb Gem showcases vivid toning which blankets both sides in deep violet, rose-red, olive-gold, and midnight-blue hues. Satiny underlying luster illuminates the patina in such a way as to give this piece a medallion relief appearance. Census: 78 in 68 (1 in 68+, 6 in 68 ★, 1 in 68+★), 1 finer (12/14). NGC ID# 28L5, PCGS# 9347

- 6482 1937-D Oregon MS68 NGC.** Deep multicolored toning adorns both sides of this D-mint Oregon commemorative half, and a well executed strike imparts sharp definition to the design elements. Impeccably preserved throughout. Census: 78 in 68 (1 in 68+, 6 in 68 ★, 1 in 68+★), 1 finer (12/14). NGC ID# 28L5, PCGS# 9347

- 6483 1937-D Oregon MS68+ NGC.** The Oregon Trail is the longest-running series of commemorative coins (1926-1939). Deep rainbow-like toning adheres to the left margins of each side. Excellent luster exudes from the immaculately preserved surfaces that exhibit sharply struck design elements. Great overall eye appeal. NGC ID# 28L5, PCGS# 9347

- 6484 1937-D Oregon MS68 PCGS. CAC.** Beautiful mint-green and peach-gold accents appear on each side of this stunning Superb Gem 1937-D Oregon Trail half dollar. The high points of each side are virtually contact-free. The 1937-D Oregon Trail, net distribution of 12,008 pieces, is secondmost-available behind the 1926-S at more than 83,000 coins; it is also one of the best-produced in the series. Population: 50 in 68 (2 in 68+), 1 finer (12/14). CAC shows 29 in this grade. NGC ID# 28L5, PCGS# 9347

**1937-D Oregon Trail Half, MS68+  
A Registry Collecting Trump**

- 6485 1937-D Oregon MS68+ PCGS. CAC.** The first three Oregon Trail commemorative half dollar issues struck at the Denver Mint, those of 1933, 1934, and 1937, all were the only such issues of their respective years. It was not until the PDS sets of 1938-1939 that the D-mint coins had fellows. This 1937-D Oregon Trail half offers marvelous silver-blue patina with a crescent of reddish-orange around much of the obverse margin and similar, deeper color at the right reverse. Magnificently preserved. Population: 50 in 68 (2 in 68+), 1 finer (11/14). NGC ID# 28L5, PCGS# 9347

- 6486** 1938 Oregon MS67+ PCGS. CAC. A well-preserved example of this conditionally elusive Philadelphia issue which was struck to the limited extent of just 6,000 pieces (plus six coins for assay purposes). The design elements are sharply brought up, and both sides display a pleasing champagne glow. Only two coins are numerically finer at PCGS (12/14). NGC ID# 28L6, PCGS# 9348

**1938-D Oregon Half, MS68**  
**Light, Beautiful Patina**

- 6487** 1938-D Oregon MS68 PCGS. CAC. The distributors of the Oregon halves ordered only half as many sets for 1938 compared to the previous year, further acknowledgment of the weakening speculators' market for new issues. This crisply struck and shining coin has lovely target toning. Outer bands of tan-gold with a hint of red yield to cyan and a subtly toned peach-silver center. PCGS has awarded only two coins a higher grade (4/07).  
*Ex: Central States Signature (Heritage, 5/2007), lot 2581. NGC ID# 28L7, PCGS# 9349*

**1938-D Oregon Half Dollar, MS68+**  
**Attractive and Carefully Preserved**

- 6488** 1938-D Oregon MS68+ PCGS. CAC. The first Denver Oregon Trail issue to be struck alongside Philadelphia and San Francisco coins of the same date, represented here by a magnificent MS68+ survivor sporting silver-violet and pale blue patina over most of each side with amber and orange patina along the right borders. Population: 42 in 68 (5 in 68+), 2 finer (11/14). NGC ID# 28L7, PCGS# 9349

**1938-D Oregon Half, MS68+★**  
**Supremely Beautiful**

- 6489** 1938-D Oregon MS68+ ★ NGC. CAC. Even at the MS68 level, the 1938-D Oregon half dollar is merely very scarce rather than rare. What are rare, however, are coins that can come even close to this MS68+★ example's eye appeal. Deep patina likely began as tab toning, judging by the arc of almost-silver at the left interior obverse, but rich apricot, peach, and violet hues cover the vast majority of the surfaces. Magnificently preserved, as the certified grade implies, and the green CAC label lends further weight to what the eye can plainly see: this coin is flat-out magnificent. Census: 61 in 68 (1 in 68+, 35 in 68 ★, 1 in 68+★), 2 finer (11/14). NGC ID# 28L7, PCGS# 9349

**1939-D Oregon Trail Half, MS68**  
**None Certified Numerically Finer**

- 6490** 1939-D Oregon MS68 NGC. The Oregon Trail commemorative half dollar series finally came to an end in 1939, a year in which the Denver mint struck only 3,000 examples (plus four coins for assay purposes). This satiny MS68 representative features immaculately preserved and seemingly brilliant surfaces with strongly struck design detail. Census: 27 in 68 (14 in 68 ★, 2 in 68+★), 0 finer (11/14). NGC ID# 28LA, PCGS# 9353

**1939-D Oregon Trail Half, Magnificent MS68+ ★  
Original Holder-Toned Surfaces**

- 6491 1939-D Oregon MS68+ ★ NGC. CAC.** Toning on the obverse is a fantastic iridescent melange of amber, brown, cherry, mint, and copper, while the reverse shows more daubs of gold and emerald. One glance at the cardboard mailing holders for these coins, as depicted on p. 184 of the Swiatek-Breen commemorative coins *Encyclopedia*, will convince the viewer that this coin spent many long years in its original Mint holder. There are some considerable areas of untuned silver-white remaining on each side (those being the areas covered by cardboard), and abundant luster shines through the surfaces on each side. A magnificent example of this last-year-of-the-series issue, having a net production of 3,004 pieces. This piece is one of two at NGC in this grade with both the Plus and Star designations (12/14). NGC ID# 28LA, PCGS# 9353

**1939-S Oregon Commemorative, Toned MS68**

- 6492 1939-S Oregon MS68 NGC. CAC.** Deep orange-gold, yellow-green, and reddish-gold patination cascades over the highly lustrous surfaces of this S-mint Oregon commemorative half dollar. The design elements are sharply impressed and close examination reveals no significant marks. Well deserving of CAC endorsement. Census: 8 in 68 (2 in 68 ★), 0 finer (11/14). NGC ID# 28LB, PCGS# 9354

- 6493 1915-S Panama-Pacific MS66 NGC.** An attractive example of this key-date commemorative issue. Sharply struck, for the type, this premium quality Gem displays lovely variegated cobalt-blue and golden-gray toning, and excellent preservation. The first issue in the series to display the motto, "In God We Trust".  
*Ex: Long Beach Signature (Heritage, 9/2003), lot 9396.*  
From The Free Tilly Collection. NGC ID# 26H7, PCGS# 9357

**1915-S Panama-Pacific Half, MS66  
Pleasing Olive-Gold Patina**

- 6494 1915-S Panama-Pacific MS66 PCGS.** The bounty of the American West is celebrated by Columbia, while a perched eagle on a shield is flanked by oak and olive branches. This Premium Gem displays a strong strike on the eagle's breast feathers with rim-to-rim sharpness not often seen on the issue. Rich, olive-gold patina is obviously original and highly pleasing, with plentiful mint luster beneath the toning. NGC ID# 26H7, PCGS# 9357
- 6495 1915-S Panama-Pacific MS66 NGC. CAC.** This is a stunning certified Premium Gem example of the 1915-S Panama-Pacific half dollar, with bold luster radiating from both sides. The warm patination features shades of pinkish-gray and ice-blue predominating, an unusual but sensational combination. NGC ID# 26H7, PCGS# 9357

**1915-S Pan-Pac Half, MS67 ★  
Top-Notch Eye Appeal**

- 6496 1915-S Panama-Pacific MS67 ★ NGC.** One of the most impressive examples of this classic commemorative design from America's most important and expansive world's fair, the historic 1915 Panama-Pacific International Exposition. Silver centers cede to lovely iridescent patina on each side, including pale pastel mint, saffron, lilac, and violet. Sumptuous luster and an absence of meaningful marks combine with top-notch eye appeal. Census: 64 in 67 (11 in 67 ★, 2 in 67+★), 0 finer (12/14). NGC ID# 26H7, PCGS# 9357

**1915-S Panama-Pacific Half, MS67  
Bold Color and Luster**

- 6497 1915-S Panama-Pacific MS67 PCGS. CAC.** The first commemorative half dollar struck since the World's Columbian Exposition, the Panama-Pacific issue had a substantially more limited mintage but even that failed to sell out. This Superb Gem has gold-green border toning fading through blue and violet with a rosy core on the reverse. Population: 88 in 67 (9 in 67+), 3 finer (11/14). NGC ID# 26H7, PCGS# 9357

**1915-S Panama-Pacific Half, MS67  
Attractive Rim Toning**

- 6498 1915-S Panama-Pacific MS67 PCGS. CAC.** Aesthetically pleasing designs place the Panama-Pacific issues, five pieces in all, among the most popular of the commemorative series. Exquisite rim toning combined with CAC approval elevates this Superb Gem within the assigned grade. White centers lead to varied hues of blue and burgundy, and a similar effect on the reverse reinforces the overall appeal. Population: 89 in 67 (9 in 67+), 3 finer (12/14). NGC ID# 26H7, PCGS# 9357

**1915-S Pan-Pac Half Dollar, Remarkable MS67**

- 6499 1915-S Panama-Pacific MS67 PCGS. CAC.** The rebuilding of San Francisco since the 1906 earthquake and the 1914 opening of the Panama Canal furnished the occasion for the Panama-Pacific International Exposition. Olive-gray patination and highly lustrous surfaces endow this well-struck half dollar commemorative. This is a remarkable well preserved MS67. Housed in a green label holder. NGC ID# 26H7, PCGS# 9357

- 6500 1915-S/S Panama-Pacific, FS-502, MS66 NGC.** The mintmark is lightly repunched north. This satiny high grade commemorative is primarily light golden-gray, but the margins display arcs of ocean-blue, plum-red, and lime-green. Well struck and satiny with essentially unabraded surfaces.  
*Ex: Beverly Hills Signature (Heritage, 11/2011), lot 4003, which realized \$2,990. PCGS# 511601 Base PCGS# 9357*

**1915-S Panama-Pacific Half, MS67  
Repunched Mintmark Variety**

- 6501 1915-S/S Panama-Pacific, FS-502, MS67 PCGS. CAC.** Although not so-attributed on the holder, this Superb Gem Panama-Pacific half dollar is an example of the FS-502 repunched mintmark *Cherry-pickers'* variety. The upper serif of the errant S is seen in the field just above the primary mintmark. As a date, this commemorative is conditionally scarce in MS67, and finer pieces are prohibitively rare. This example is well-struck and satiny, with blended olive, amber, and aquamarine peripheral hues surrounding warm lavender-gold centers. PCGS has certified only three numerically finer representatives (12/14). PCGS# 511601 Base PCGS# 9357

**1920 Pilgrim Tercentenary  
White Plaster Reverse Facsimile**

**6502 1920 50C Pilgrim Uncertified.** A 12 5/8 inch white plaster facsimile of the reverse of the 1920 Pilgrim Tercentenary half dollar which was originally displayed on the wall of the Mayflower Coffee Shop in New York City. This piece was acquired by Stanley Apfelbaum and given to Anthony Swiatek on July 31, 1982 at the Milwaukee Coin Show by Walter Breen. An inscription in blue ink on the back of the plaster records the presentation. The Pilgrim half dollar was issued to commemorate the three hundredth anniversary of the landing of the Pilgrim's on Plymouth Rock in 1620. NGC ID# 28LC, PCGS# 9359

**6503 1920 Pilgrim MS67 PCGS.** A light golden cast accentuates surfaces that are otherwise untuned on this nicely preserved Superb Gem. Two of three tiny reeding marks appearing on the pilgrim's shoulder are the only noticeable contact. The 1921 Pilgrim is more elusive in the lower Mint State grades, but at this level both are quite difficult. NGC ID# 28LC, PCGS# 9359

**6504 1920 Pilgrim MS67 PCGS.** Ebullient luster issues from the remarkably well preserved surfaces of this Superb Gem. Reddish-gold marginal toning is slightly deeper and more extensive on the obverse. NGC ID# 28LC, PCGS# 9359

**6505 1921 Pilgrim MS67 PCGS.** Struck to commemorate the 300th anniversary of the Pilgrims' arrival at Plymouth in 1620, the Pilgrim Tercentenary half dollar was produced in 1920 and 1921, with the latter issue being the scarcer overall. This richly lustrous representative exhibits bold design definition and nearly undisturbed surfaces. The obverse exhibits mottled lavender-gray, olive, and forest-green toning, while the reverse displays lesser amounts of the same, with an ice-blue hue dominating the central regions. Population: 36 in 67 (2 in 67+), 1 finer (12/14). NGC ID# 28LD, PCGS# 9360

**1921 Pilgrim Half Dollar, MS67  
Scarcer Second-Year Issue**

**6506 1921 Pilgrim MS67 PCGS.** The 1921 is the scarcer of the two Pilgrim issues and it is rarely seen in Superb condition. Radiant mint luster swirls around each side with a lovely mixture of golden-olive and lilac toning. For the toning enthusiast, this is the coin. Population: 36 in 67 (2 in 67+), 1 finer (12/14).  
*Ex: New York Signature (Heritage, 7/2002), lot 5094.* NGC ID# 28LD, PCGS# 9360

**1921 Pilgrim Tercentenary Half, MS67+  
Only One Finer at PCGS**

**6507 1921 Pilgrim MS67+ PCGS.** The original Pilgrim Tercentenary half dollars of 1920 bore the dual date 1620 - 1920 on the reverse, but when production continued the following year, the date 1921 was added to the obverse field. The Mint struck 100,000 examples of the latter issue (plus 53 coins for assay purposes), but 80,000 were left unsold and were later melted. High-grade survivors are widely collected by classic commemorative specialists, and those grading as high as the present coin are decidedly scarce. This piece boasts satiny, virtually undisturbed mint luster and fully defined motifs. Splashes of deep olive, amber, and green-gold encompass portions of each side, though primarily in the margins. Population: 36 in 67 (2 in 67+), 1 finer (12/14). NGC ID# 28LD, PCGS# 9360

**1921 Pilgrim Half Dollar, MS67  
Second of Two Issues of the Design**

**6508 1921 Pilgrim MS67 PCGS. CAC.** In the year of the 401st anniversary of the settlement at Plymouth Rock, the U.S. Mint struck this cash-grab issue of 20,000 pieces plus assay coins for those who already had benefited from the 1920 Pilgrim halves. This broadly lustrous Superb Gem has scattered blue-to-green and peach tints with the latter color strongest at the bottom of the obverse and the top of the reverse. Population: 35 in 67 (2 in 67+), 1 finer (11/14).  
*From The College Collection.* NGC ID# 28LD, PCGS# 9360

---

1936 Rhode Island Presentation Case  
Only Three Examples Produced  
Possibly Unique

**6509 1936 Rhode Island Presentation Case.** This special presentation case was manufactured by The Robbins Co of Attleboro, Massachusetts—as stamped on the inside front flap of the case. It has four flaps and a mounting back that is approximately 2 1/4 x 5 1/4 inches. The case is black leather and two of the inner flaps and the mounting back appear to be lined with blue silk. The badge itself is simply and enigmatically inscribed: 1636 R.I. 1936 / TERCENTENARY / SPECIAL. The connecting ribbon is red, white, and blue, and the coin is mounted in a bezel. The top side of the ribbon is faded, suggesting to us that this may have been in a store window for some time which partially faded that side. The back side of the ribbon is as bright and vibrant in color as the day it was issued.

This special presentation case was unrecorded and unknown to commemorative collectors before it appeared in lot 8155 of the Pittsburgh Signature (Heritage, 8/2004). It has been consigned to this auction by commemorative expert Anthony Swiatek. Without belaboring the obvious, the term “SPECIAL” at the top of the badge indicates that this must have been presented to some person who was special to the Rhode Island Tercentenary Commission. A phone call to the 2004 consignor revealed that many years ago he purchased this item from an antique dealer. This antique dealer told him at that time that three such cases were produced. Unfortunately, who that dealer was and who the cases were produced for is now unknown. The coin itself is a high-end MS64 piece that has heavy russet toning around the margins from the decades spent in the bezel. The overall condition of the black leather case is really quite remarkable. There are no tears in the leather, just minor soiling on the silk lining and some separation of the silk liner from the leather on the inside right flap. Also, the snap on the outside of the case still works. This is an extraordinary, and possibly unique commemorative offering that is sure to fire the imagination of many advanced collectors.

*Ex: Unknown antique dealer; private collector; Pittsburgh Signature (Heritage, 8/2004), lot 8155, realized \$1,207.50; resold three weeks later to a private collector for \$2,000; sold privately at the 2008 Baltimore ANA Convention for \$2,600; sold privately in March 2010 for \$2,950; Anthony Swiatek.*

NGC ID# 28LE, PCGS# 9363

**1936-S Rhode Island Half Dollar, MS67+  
Lustrous and Attractively Toned**

- 6510 1936-S Rhode Island MS67+ PCGS. CAC.** The 1936-S Rhode Island commemorative half dollar claims a low distribution of 15,000 pieces. This High-end Superb Gem is well-detailed and brightly lustrous, under attractive shades of greenish-gold and lavender-gray toning. No mentionable distractions are evident. Population: 29 in 67 (7 in 67+), 0 finer (11/14). NGC ID# 28LG, PCGS# 9365

**1937 Roanoke Half, MS68  
None Numerically Finer**

- 6511 1937 Roanoke MS68 PCGS.** One of America's great unsolved mysteries is the disappearance of the Roanoke Island colony in the late 1580s. The extraordinarily well-preserved commemorative marks the 350th anniversary of the settlement founding. Brilliant obverse centers lead to delightful olive and russet rim toning, and the reverse is similarly colored. Population: 16 in 68 (1 in 68+), 0 finer (12/14). NGC ID# 28LH, PCGS# 9367

- 6512 1935-S San Diego MS67 ★ NGC.** A medley of deep multicolored toning swirls about the borders of this commemorative half, framing the silvery centers. Sharply struck design elements, potent luster, and marvelously preserved surfaces affirm the Star designation. Census: 19 in 67 ★, 1 in 67+★, 6 finer (12/14). NGC ID# 28LK, PCGS# 9371

**1935-S San Diego Half, MS67+  
Sole Issue Struck in California**

- 6513 1935-S San Diego MS67+ PCGS. CAC.** The first of two San Diego commemorative issues, the other struck a year later and several states away in Denver. Colorful peach, apricot, and violet toning has formed at the borders, while substantial interior portions remain gorgeous silver-blue. PCGS has graded just five examples as MS68 or finer (11/14). NGC ID# 28LK, PCGS# 9371

- 6514 1926 Sesquicentennial MS65 PCGS.** The satiny silver centers show excellent eye appeal, amplified by the thin crescents of lovely iridescent patina that accent the margins of each side. Minor marks that show on President Washington's cheek under a loupe are within the context of the grade, and the Liberty Bell is nearly mark-free. PCGS reports eight numerically finer, all MS66 (12/14). *From The College Collection.* NGC ID# 28LM, PCGS# 9374

- 6515 1926 Sesquicentennial MS65 PCGS.** Deeply variegated golden-brown, apple-green, and ruby-red patina encompasses this shimmering and minimally abraded Gem. Many Presidents have been featured on a U.S. coin, but Coolidge was the sole chief executive to serve at the time of an issue. Certified in a green label holder. PCGS has graded only eight pieces finer (11/14). *Ex: Long Beach Signature (Heritage, 6/2010), lot 1329, which realized \$2,185.* NGC ID# 28LM, PCGS# 9374

- 6516 1926 Sesquicentennial MS65 PCGS. CAC.** The Liberty Bell on the reverse is largely free of contact, but the profiles on the obverse show a few minor ticks that together account for the grade. The surfaces show good luster and are lightly toned in a pinkish-gold cast. A difficult issue to find in any higher numeric grade. PCGS reports eight numerically finer, all MS66 (12/14). NGC ID# 28LM, PCGS# 9374

- 6517 1926 Sesquicentennial MS65 NGC. CAC.** This sharply delineated commemorative half displays coruscating luster radiating from both sides, each of which is devoid of significant contacts. A couple of unobtrusive dark spots are visible on the reverse. NGC ID# 28LM, PCGS# 9374

- 6518 1926 Sesquicentennial MS65 PCGS. CAC.** Both sides of this Gem are awash with potent luster and display delicate champagne-gold toning imbued with wisps of ice-blue and lavender on the reverse. A few minute marks on the liberty bell may help to preclude an even finer grade. PCGS has graded fewer than 10 and NGC fewer than 20 finer (12/14). NGC ID# 28LM, PCGS# 9374

- 6519 1926 Sesquicentennial MS65 PCGS. CAC.** A light golden cast appears amid generous satiny luster on each side of this relatively unmarked Gem Sesquicentennial half. Few of these are certified at either service in finer numeric grades. NGC ID# 28LM, PCGS# 9374

- 6520 1926 Sesquicentennial MS65 PCGS. CAC.** *Ex: The Roman Collection.* Pale, beautiful pastel patina in the centers melds into deep iridescence at the rims on each side. This Gem Sesquicentennial boasts considerably more flash and cartwheel luster than most examples of the issue, an attribute that should appeal to many potential bidders. NGC ID# 28LM, PCGS# 9374

**1926 Sesquicentennial Half, Iridescent-Toned MS66**

- 6521 1926 Sesquicentennial MS66 NGC.** With a combined population of less than 30 coins at NGC and PCGS in MS66 and none finer, the 1926 Sesquicentennial issue has a well-deserved reputation as a major condition rarity in the commemorative silver series. The preservation on this Premium Gem is impressive, as only under a loupe do a few minor ticks appear on Washington's cheek. Its most appealing feature, however, is the lovely iridescent toning, comprising pale yellow-gold, pinkish-gold, jade, and amber-gold, deepest at the lower obverse. The reverse is more demure but equally attractive, and generous satin luster prevails throughout. Census: 19 in 66 (6 in 66 ★, 1 in 66+★), 0 finer (12/14). NGC ID# 28LM, PCGS# 9374

**6522** 1935 Spanish Trail MS66 PCGS. CAC. Magnification brings out freckles of faint gold color on this sharply struck Premium Gem. Marvelously preserved throughout. Housed in an old PCGS green label holder.  
From *The College Collection*. NGC ID# 28LN, PCGS# 9376

**6523** 1935 Spanish Trail MS66 PCGS. CAC. Chestnut-gold and silver-gray shades intermingle across this satiny and fully struck Premium Gem. A well preserved representative of the low mintage type. Certified in a green label holder.  
Ex: *Long Beach Signature* (Heritage, 2/2005), lot 8585, which realized \$1,334. NGC ID# 28LN, PCGS# 9376

**6524** 1935 Spanish Trail MS66 PCGS. CAC. Bluish-violet and gold overtones enliven the pale silver-gray surfaces of this Spanish Trail Premium Gem. The design elements are well struck, and the broad, open surfaces on both sides are devoid of unsightly blemishes. NGC ID# 28LN, PCGS# 9376

**6525** 1935 Spanish Trail MS66 PCGS. CAC. Radiant luster issues from the silvery surfaces displaying hints of champagne and ice-blue colors. The design features are uniformly well impressed. Both sides of this Premium Gem are impeccably preserved. NGC ID# 28LN, PCGS# 9376

**6526** 1935 Spanish Trail MS66 PCGS. CAC. Hints of soft champagne and grayish-blue patination covers the lustrous surfaces of this sharply struck MS66 commemorative. A couple of minuscule milling marks in the right-obverse field are mentioned for complete accuracy, but do not subtract in the least from the coin's gorgeous eye appeal. NGC ID# 28LN, PCGS# 9376

**6527** 1935 Spanish Trail MS66+ PCGS. CAC. The Old Spanish Trail half dollars were supposedly to benefit the El Paso Museum Committee according to numismatic huckster L.W. Hoffecker, but the museum received nothing but two examples of the half dollars. The Spanish Trail halves today are among the more elusive issues in the complete commemorative half series in grades above Gem condition. This golden-gray example with copper-toned rims is a top-notch example with excellent preservation. NGC ID# 28LN, PCGS# 9376

**6528** 1935 Spanish Trail MS67 PCGS. With just 10,000 pieces produced along with eight additional coins for assay purposes, the Spanish Trail has one of the lowest mintages of any commemorative design. The lustrous surfaces of this MS67 specimen exhibit well-struck design features. A few unobtrusive marks do not disturb. PCGS has seen a mere two examples finer (11/14). NGC ID# 28LN, PCGS# 9376

**6529** 1935 Spanish Trail MS67 PCGS. Unusually vibrant mint luster resides beneath blended shades of orange-gold, lavender, and olive-gray toning, while the underlying surfaces are devoid of contact marks. The Old Spanish Trail half dollars are only marginally available in this grade, and finer pieces are prohibitively rare, with only two so-graded examples at PCGS (12/14). NGC ID# 28LN, PCGS# 9376

#### 1935 Spanish Trail Half, Fantastic MS67

**6530** 1935 Spanish Trail MS67 PCGS. CAC. Glowing luster radiates from surfaces displaying a film of soft ice-blue and champagne coloration and that exhibit razor-sharp delineation. Both sides are remarkably clean, further enhancing the coin's fantastic eye appeal. Housed in a green label holder. PCGS had certified a mere two examples numerically finer (12/14). NGC ID# 28LN, PCGS# 9376

**6531** 1935 Spanish Trail MS67 PCGS. CAC. This satiny cream-gray Superb Gem shows virtually flawless preservation, a well-struck and attractive example of this low-mintage collector favorite. This curious type commemorates a disastrous 1535 Spanish exploration for gold across the Gulf states. Cabeza de Vaca, symbolically depicted on the obverse, was the expedition secretary and one of its few survivors. NGC ID# 28LN, PCGS# 9376

#### 1925 Stone Mountain Half Dollar, MS67+ Delicate Multicolor Toning

**6532** 1925 Stone Mountain MS67+ PCGS. CAC. This high-end Superb Gem displays an attractive blend of violet, lavender, gold, and gray toning on both sides, with vibrant mint luster shining through the patina. The design elements are well-detailed and no mentionable flaws are evident. PCGS has graded eight numerically finer examples (11/14). NGC ID# 26H8, PCGS# 9378

#### 1925 Stone Mountain Half, MS67+ The 'Confederate Commemorative'

**6533** 1925 Stone Mountain MS67+ PCGS. CAC. Though the early legislation for the Stone Mountain half dollar included a memorial to the recently deceased President Warren G. Harding, by the time the coins arrived his name and likeness were nowhere to be found. This MS67+ piece is richly toned with broad fields of peach and gunmetal-blue, the latter forming a "starry sky" behind the Confederate generals on the obverse. NGC ID# 26H8, PCGS# 9378

**1935 Texas Centennial Half, MS68**  
Beautiful, Tied for Finest Certified

- 6534 1935 Texas MS68 NGC.** The Philadelphia Mint struck 10,000 Texas Centennial half dollars in 1935 (plus eight pieces for assay purposes), but for an unknown reason, 12 coins were later melted, leaving a net total of 9,996 pieces that were distributed as part of three-coin sets alongside an example each from Denver and San Francisco. This piece is a remarkable condition rarity, being one of only 15 coins certified in MS68 by NGC, with none finer (11/14). The strike is bold throughout and the surfaces are completely free of noticeable contact marks. The upper-right obverse rim exhibits a vivid crescent of forest-green and violet-red toning, though the remainder of each side is largely light golden in color. An impressive coin in every respect. NGC ID# 28LR, PCGS# 9382

**1935 Texas Half Dollar, MS68**  
Part of the Design's First Three-Coin Set

- 6535 1935 Texas MS68 NGC.** After a simple-and-clean first year of strikings in 1934, the Texas commemorative went into full money-extraction mode with PDS sets in 1935. This Philadelphia coin from the second year of issue is impressively preserved with a distinct green-gold overtones across parts of otherwise silver surfaces. Census: 15 in 68, 0 finer (11/14). NGC ID# 28LR, PCGS# 9382

**1937-D Texas Centennial Half, Rare MS68**  
None Certified Numerically Finer

- 6536 1937-D Texas MS68 NGC.** The Texas commemorative half dollar is sometimes challenging to find sharply struck, as the high points of each side are almost directly opposite each other. On this magnificent Superb Gem, however, striking quality does not seem to be a problem, and the preservation is equally impressive. The obverse displays iridescent ice-blue and light golden toning, with a crescent of deeper russet also seen along the upper border; the reverse is more evenly toned in warm champagne hues. Census: 5 in 68 (1 in 68 ★), 0 finer (11/14). NGC ID# 28LY, PCGS# 9391

**1938-S Texas Half Dollar, MS67+**  
Delicately Toned and Preserved

- 6537 1938-S Texas MS67+ PCGS. CAC.** A high-end Superb Gem example of one of the scarcer issues in this popular commemorative series. The 1938-S Texas Centennial half dollar had a limited mintage of only 3,814 pieces, and is scarce in MS67 or finer condition. This piece is lightly toned in lavender-blue and pale champagne hues, with satiny underlying luster. Population: 82 in 67 (8 in 67+), 1 finer (12/14). NGC ID# 28M4, PCGS# 9396

- 6538 1925 Vancouver MS66 PCGS. CAC.** This frosty Premium Gem is largely untuned save for a small marginal area of multicolor iridescence on each side. The high points of each side are free from noticeable marks. Seldom seen in numerically finer grades. PCGS reports only 54 finer (12/14).  
*From The A. James Evans Collection, Part II.* NGC ID# 28M5, PCGS# 9399

- 6539 1925 Vancouver MS66 PCGS. CAC.** Vivid copper-orange and cool mint green are among the strongest members of this toning palette. The luster is equally strong, and the excellent preservation seen over each side puts this piece into a small minority. PCGS shows only 54 submissions numerically finer (12/14). NGC ID# 28M5, PCGS# 9399

**1925 Vancouver Half Dollar, Toned MS67**  
Impeccably Preserved Surfaces

- 6540 1925 Vancouver MS67 PCGS.** Only about 100 Vancouver commemorative half dollars have been certified in the MS67 level of preservation and a scant two pieces finer. A melange of soft aqua-blue, rose, and russet patination cascades over the lustrous surfaces of the present offering, highlighted by occasional speckles of deep olive on the obverse. The design elements are sharply struck and both sides have been well cared for. The latter attribute is most significant, because the design of this coin is such that even a small amount of handling produced friction on the higher points. Population: 52 in 67 (8 in 67+), 1 finer (11/14). NGC ID# 28M5, PCGS# 9399

**1925 Fort Vancouver Half, MS67  
Only Two Coins Numerically Finer**

- 6541** 1925 Vancouver MS67 NGC. Vibrant royal-blue edges surround deep, red- and amber-gold tones in concentric rings of vivid color. There are no visible marks or friction even under magnification and the strike is bold. Well-preserved — most likely in its holder of issue until certification. This lustrous Superb Gem would be a splendid addition to a high-grade set of toned commemoratives. NGC ID# 28M5, PCGS# 9399

**1925 Vancouver Half, MS67  
Rare Any Finer**

- 6542** 1925 Vancouver MS67 PCGS. CAC. The “local-interest” commemorative trend so pronounced in the 1930s did not originate in that decade, as the Fort Vancouver commemorative and its obscure subject suggest. This Superb Gem representative has a light silver-gray central obverse with bold powder-blue and orange tones around, hues that scarcely are dimmed on the reverse. Population: 52 in 67 (8 in 67+), 1 finer (11/14). NGC ID# 28M5, PCGS# 9399

**1925 Fort Vancouver Half, MS67  
Ample Luster**

- 6543** 1925 Vancouver MS67 PCGS. CAC. The original toning on this piece encompasses various greenish hues on the obverse with some untuned silver areas in the center. The reverse is a more-demure copper-gold around the margin, and ample luster runs over both sides of this well-preserved piece. Population: 53 in 67 (8 in 67+), 1 finer (12/14). NGC ID# 28M5, PCGS# 9399

- 6544** 1946 Booker T. Washington MS67+ PCGS. CAC. Variegated lime-green, crimson, orange-gold, and grayish-violet patination cascades over the highly lustrous surfaces of this high-end Superb Gem. A sharply struck impeccably preserved specimen. Formerly in an NGC MS68 ★ holder. NGC ID# 28M7, PCGS# 9404

- 6545** 1946-D Booker T. Washington MS67 PCGS. CAC. Deep peripheral accents on the obverse include mahogany and cherry, while most of the center is a satiny silver-gray. The reverse is lavishly toned in red-orange patina, and the high points of Washington's portrait are free of mentionable contact. Population: 47 in 67 (3 in 67+), 0 finer (12/14). NGC ID# 28M8, PCGS# 9405

- 6546** 1946-D Booker T. Washington MS67 PCGS. CAC. A lavish display of apple-green, gold, rose, and red-orange iridescence complements each side of this exceptional Superb Gem example. It is fully struck with lustrous, immaculately preserved surfaces. None are graded any finer, at PCGS. Population: 47 in 67 (3 in 67+), 0 finer (11/14). NGC ID# 28M8, PCGS# 9405

- 6547** 1946-D Booker T. Washington MS67 PCGS. CAC. This conditionally scarce Booker T. Washington commemorative is a splendid example with boldly struck devices and vibrant mint luster. Each side presents an elaborate display of intermingled, iridescent colors. Impressive and unsurpassed in this high grade level, at PCGS. Population: 47 in 67 (3 in 67+), 0 finer (11/14). NGC ID# 28M8, PCGS# 9405

**1946-D Booker T. Washington Half, MS67  
Vibrant Luster and Color**

- 6548** 1946-D Booker T. Washington MS67 PCGS. CAC. Of the three Booker T. Washington issues struck in 1946, the 1946-D had the smallest mintage. This Superb Gem has vibrant luster beneath wild multicolored patina, stripes of sea-green, blue, violet, and peach with occasional windows of bright silver peeking through. Population: 47 in 67 (3 in 67+), 0 finer (11/14). NGC ID# 28M8, PCGS# 9405

**1946-S Booker T. Washington Half, MS67+  
Excellent Toning**

- 6549** 1946-S Booker T. Washington MS67+ PCGS. CAC. The initial San Francisco Booker T. Washington half dollar issue saw a generous mintage of more than half a million pieces, though few survivors are so well-preserved as this colorful MS67 coin. Bold crazy-quilt waves of mustard-gold, blue-violet, and magenta enhance the reverse, while the obverse has similar colors in rippling waves. Population: 94 in 67 (10 in 67+), 2 finer (11/14). NGC ID# 28M9, PCGS# 9406

- 6550** 1947-S Booker T. Washington MS67 PCGS. Peripheral champagne-gold frames violet color on the obverse while the former color palette covers most of the reverse. This is a highly lustrous, sharply struck, impeccably preserved example. Population: 16 in 67, 0 finer (12/14). NGC ID# 28MC, PCGS# 9410

**1949 Booker T. Washington Half, MS67+  
A Minimally Toned Marvel**

**6551** 1949 Booker T. Washington MS67+ NGC. CAC. The fourth year of Booker T. Washington half dollars saw them struck in PDS sets of 6,000 pieces plus assay coins. This MS67+ Philadelphia coin has minimal patina and maximum silver luster. Well-defined, though the ever-present planchet roughness visits Washington's jaw. Census: 23 in 67 (1 in 67 ★, 1 in 67+), 0 finer (11/14). NGC ID# 28MG, PCGS# 9416

**6552** 1952 Washington-Carver MS67 PCGS. The prodigiously struck and widely distributed 1952 Washington-Carver half dollar is always available in lower grades. Some were even spent in circulation. However, very few were preserved in Superb condition. This brightly lustrous example is draped in multicolored, mottled toning over each side, and none of the usually troubling abrasions are present. Population: 16 in 67 (2 in 67+), 1 finer (12/14). NGC ID# 28MV, PCGS# 9434

**1952 Washington-Carver Half Dollar, Toned MS67 ★**

**6553** 1952 Washington-Carver MS67 ★ NGC. Glowing luster emanates through the deep patination of crimson, sky-blue, forest-green, and yellow-gold. This sharply struck specimen reveals just a few minor reverse marks. The coveted Star affirms the outstanding eye appeal. Census: 27 in 67 (8 in 67 ★, 1 in 67+★), 1 finer (11/14). NGC ID# 28MV, PCGS# 9434

**1952 Washington-Carver Half, MS67  
Extensively Toned**

**6554** 1952 Washington-Carver MS67 PCGS. CAC. The only Washington-Carver issue to reach a six-figure mintage (much less seven figures), the 1952 is common in circulated grades but still a rarity in Superb Gem like its peers. This MS67 piece has full-spectrum crazy-quilt toning on the obverse with more subdued, though no less beautiful hues on the reverse. Population: 16 in 67 (2 in 67+), 1 finer (11/14). NGC ID# 28MV, PCGS# 9434

**1952 Washington-Carver Half, MS67+  
Conditionally Rare This Fine**

**6555** 1952 Washington-Carver MS67+ PCGS. CAC. Few would deny that Booker T. Washington and George Washington Carver were worthy subjects to appear on commemorative coins; it is regrettable that their designs turned into boondoggles that slammed the door on new commemoratives for decades. This second-year Washington-Carver coin from Philadelphia is impressively preserved beneath concentric patina that shows dappling in the violet-rose and silver-gray interiors. Population: 16 in 67 (2 in 67+), 1 finer (11/14). NGC ID# 28MV, PCGS# 9434

**6556** 1952-S Washington-Carver MS66+ PCGS. CAC. The frosty surfaces show radiant cartwheel luster and uniformly excellent preservation throughout both sides. A loupe reveals only the most minuscule ticks on either side, but the eye appeal is abundant. Population: 15 in 66+, 6 finer (12/14). NGC ID# 28MX, PCGS# 9436

**1952-S Washington-Carver Half, MS67  
Satiny and Lightly Toned**

**6557** 1952-S Washington-Carver MS67 NGC. CAC. Even while available in lower grades, the 1952-S Washington-Carver half dollar is a significant condition rarity in Superb Gem condition. This piece is well-struck and free of distractions. A pale golden-gray hue encompasses much of each side, with deeper orange-gold splashes of color also observed in the margins. Census: 12 in 67 (3 in 67 ★), 1 finer (12/14). NGC ID# 28MX, PCGS# 9436

---

1953-D Washington-Carver Half, MS67  
Sole Finest at PCGS

**6558** 1953-D Washington-Carver MS67 PCGS. CAC. This issue had a mintage of only 8,000 pieces (plus three coins for assay purposes), with relatively few having been certified in the better Mint State grades. This Superb Gem is the single finest seen at PCGS (12/14). Light amber-gold and lime-green peripheral toning cedes to soft powder-blue in the centers, and the design elements are well-struck. Highly lustrous surfaces reveal a few insignificant ticks. As affirmed by CAC, this piece is vastly superior in technical quality and aesthetic appeal to the majority of this issue which were poorly struck on imperfect planchets and mishandled during the distribution process. NGC ID# 28MZ, PCGS# 9439

---

---

1954-S Washington-Carver Half, MS67  
Deeply Toned, Among the Finest Certified

**6559** 1954-S Washington-Carver MS67 PCGS Secure. CAC. Ex: Bruce Scher. The San Francisco Mint struck 122,000 Washington Carver half dollars in 1954 (plus 24 pieces for assay purposes), but a significant quantity were melted and still others were paid out at face value. Q. David Bowers estimates about 42,000 coins were actually issued in one way or another, a figure which corresponds to the *Guide Book* figure of 42,024 pieces, including assay coins. Surviving examples are little more plentiful than the lower-mintage Philadelphia and Denver issues, and Superb Gems are extremely rare. This representative is well-struck and satiny, with deeply blended hues of orange-gold, olive, cherry-red, and pine-green blanketing each side. Population: 6 in 67, 0 finer (12/14). NGC ID# 28N5, PCGS# 9444

---

**1936 Wisconsin Territorial Centennial, MS68  
Impressive, Numerically Unsurpassed**

**6560** 1936 Wisconsin MS68 PCGS. Ex: Young Collection. This low-mintage issue of 25,015 pieces must have been well-produced, as a large number of coins have been certified at the impressive MS67 grade level by each of the major grading services. At the MS68 level, however, far fewer examples have been seen, and none have been rated numerically finer by either NGC or PCGS.

This impressive piece is fully struck and highly lustrous with a pleasing mixture of aquamarine and antique-silver toning, and soft golden highlights noted on the obverse. Both sides of the coin are blemish-free, even under a magnifier. Population: 31 in 68 (4 in 68+), 0 finer (11/14). NGC ID# 28N6, PCGS# 9447

**1936 Wisconsin Half Dollar, MS68  
Multicolor Patination**

**6561** 1936 Wisconsin MS68 NGC. Dramatic cherry-red, orange, sea-green, golden-brown, and stone-gray consume this satiny and fully struck Superb Gem. A magnificent representative of this territorial centennial issue. Immaculate except for inconspicuous contact above the E in LIBERTY. Census: 35 in 68 (7 in 68 ★, 1 in 68+★), 0 finer (12/14).

Ex: Long Beach Signature (Heritage, 2/2011), lot 4131. NGC ID# 28N6, PCGS# 9447

**1936 Wisconsin Half Dollar, MS68  
None Numerically Finer at PCGS**

**6562** 1936 Wisconsin MS68 PCGS. CAC. This attractive Superb Gem exhibits silver-gray features with a ring of russet color around the obverse periphery. The fully brought up design elements are frosty in finish and the well-preserved surfaces are free of mentionable distractions. Housed in a green label holder. Population: 31 in 68 (4 in 68+), 0 finer (11/14).

Ex: FUN Signature (Heritage, 1/2003), lot 9882. NGC ID# 28N6, PCGS# 9447

**1936 Wisconsin Half Dollar, Solidly Struck MS68**

**6563** 1936 Wisconsin MS68 NGC. CAC. Silver-rose, peach, ruby, and blue-violet hues mingle on each side of this solidly struck Wisconsin half dollar. Swirling luster pierces the rich patina, and the impressive overall preservation elevates the piece above even Superb Gem status. Census: 35 in 68 (7 in 68 ★, 1 in 68+★), 0 finer (11/14). NGC ID# 28N6, PCGS# 9447

**1936 York Commemorative, Lustrous MS68 ★**

**6564** 1936 York MS68 ★ NGC. MS68 is the only real challenging issue in the York commemorative series, where NGC and PCGS have graded just 59 specimens and none finer. Reddish-gold toning gravitates to the margins, more deeper and extensive on the obverse. Lustrous, immaculately preserved surfaces exhibit well-struck devices.

Census: 34 in 68 (7 in 68 ★), 0 finer (11/14). NGC ID# 28N7, PCGS# 9449

**1936 York Half Dollar, Sharp MS68**

**6565** 1936 York MS68 PCGS. CAC. A veneer of champagne-gold toning resides on the radiantly lustrous surfaces of this magnificent York half dollar. The design elements are sharply impressed, including the intricate detail of the stockade with its hinged gate and its surrounding landscape. Both sides are virtually perfect. Population: 26 in 68, 0 finer (12/14). NGC ID# 28N7, PCGS# 9449

## COMMEMORATIVE GOLD

### Louisiana Purchase Exposition Farran Zerbe's Wooden Post Cards

- 6566 Louisiana Purchase Exposition Wooden Post Cards.** These clever 3.5 x 5.75 inch post cards were copyright by Farran Zerbe in 1904, according to the accompanying clipping from the November 25, 1964 issue of *Coin World*. Both cards are addressed, and one was actually mailed, although the stamp is no longer present. (Total: 2 items) NGC ID# 26HA, PCGS# 7443

### Louisiana Purchase Exposition Wooden Print Blocks

- 6567 Louisiana Purchase Exposition Related Wood Print Blocks.** Two seemingly contemporary wooden print blocks from the Louisiana Purchase Exposition: One depicts the obverse of the McKinley commemorative dollar with an outer bezel and loop; the other depicts four images representing the obverse and reverse of the 1/4 and 1/2 dollar size Louisiana Purchase Exposition gold charms. Splendid association items for a detailed collection of Louisiana Purchase Exposition ephemera. (Total: 2 items)

- 6568 1903 Louisiana Purchase, Jefferson, MS66 ★ NGC.** This handsome Superb Gem is well struck and unabraded, but it likely received a Star designation for a different reason: the fields are moderately prooflike, although insufficiently to merit a Prooflike notation. The flashy fields and radiant devices combine for obvious eye appeal. NGC ID# 26HA, PCGS# 7443
- 6569 1903 Louisiana Purchase, Jefferson, MS66 PCGS. CAC.** Rich golden-orange color, good luster, and a mark-free portrait of Jefferson separate this Premium Gem from most of its cohort, as does the added CAC endorsement.  
*From The A. James Evans Collection, Part II.* NGC ID# 26HA, PCGS# 7443
- 6570 1903 Louisiana Purchase, Jefferson, MS66 PCGS. CAC.** The profile of President Jefferson is free of all but the most picayune contact marks, and thorough luster and attractive mint-green and orange-gold patina put this piece into a small subset of the most attractive survivors. NGC ID# 26HA, PCGS# 7443

### 1903 Louisiana Purchase, Jefferson Gold Dollar Eye-Appealing Superb Gem

- 6571 1903 Louisiana Purchase, Jefferson, MS67 NGC.** Distributed to the limited extent of just 17,500 pieces, the Jefferson type of the Louisiana Purchase Exposition gold dollar is scarce in MS67 condition and is almost unknown finer. This representative is unusually well-struck, with satiny honey-gold luster and delicately preserved surfaces. Census: 92 in 67 (1 in 67+, 2 in 67 ★), 1 finer (12/14). NGC ID# 26HA, PCGS# 7443

### 1903 Louisiana Purchase Gold Dollar, MS67 Jefferson Portrait

- 6572 1903 Louisiana Purchase, Jefferson, MS67 PCGS.** A delightful Superb Gem, this Jefferson portrait gold dollar is fully brilliant with rich yellow-gold surfaces and equally delightful blue and rose overtones that are especially prominent on the reverse. Population: 92 in 67 (1 in 67+), 0 finer (12/14). NGC ID# 26HA, PCGS# 7443

**1903 Louisiana Purchase Exposition Spoon  
With Embedded McKinley Gold Dollar**

**6573 1903 Louisiana Purchase Souvenir Spoon with McKinley Gold Dollar.** A deeply patinated Louisiana Purchase Exposition sterling silver spoon, 5.5 inches long, depicts a scene of the Festival Hall and Cascades in the bowl, along with an embedded McKinley commemorative gold dollar. The gold dollar has AU details, with evidence of past cleaning, and a small spot of gold solder on the reverse. These spoons were popular with fairgoers, although few survive today. NGC ID# 26HB, PCGS# 7444

**6574 1903 Louisiana Purchase, McKinley, MS63 NGC.** Frosty yellow-gold luster adorns both sides of this Select gold commemorative. All devices are well brought up. A few minor marks are consistent with the grade designation. NGC ID# 26HB, PCGS# 7444

**6575 1903 Louisiana Purchase, McKinley, MS66 PCGS.** Lustrous yellow-gold surfaces show otherwise-good eye appeal, but several black spots appear on the McKinley side around the rim and one over the eye.  
*From The A. James Evans Collection, Part II.* NGC ID# 26HB, PCGS# 7444

**6576 1903 Louisiana Purchase, McKinley, MS66+ PCGS. CAC.** Sharply detailed design elements and vibrant mint luster are the calling cards of this high-end Premium Gem, one of 17,500 pieces for the design. The well-preserved yellow-gold surfaces show a few highlights of rose. NGC ID# 26HB, PCGS# 7444

**1903 Louisiana Purchase/McKinley Dollar, MS68  
Impressive and Tied for Finest Graded**

**6577 1903 Louisiana Purchase/McKinley MS68 NGC.** Even in Superb Gem condition, the 1903 Louisiana Purchase gold dollars with McKinley portrait are available for a price, although they are scarce. At the MS68 grade, however, only seven submissions (including possible duplicates) are shared between the major grading services — five at NGC and two at PCGS (9/14). This MS68 example could form the nucleus of a fine collection of commemorative gold. Apricot-gold surfaces show lovely peach and pink tints, and the luster swirls with hints of both flash and satin. This all-around impressive coin is as exquisitely preserved as the grade demands.  
*From The Empire Collection.* NGC ID# 26HB, PCGS# 7444

**6578 1904 Lewis and Clark MS64 PCGS. CAC.** The smooth sun-gold surfaces display pastel rose-gold and sea-green undertones. A highly lustrous Choice gold dollar with well struck motifs and lightly impressed dentils. Traces of lacquer are evident near PORTLAND.  
*From The College Collection.* NGC ID# 26HC, PCGS# 7447

**1904 Lewis and Clark Gold Dollar, MS65**  
**Rich Color, Bright Fields**

- 6579** 1904 Lewis and Clark MS65 PCGS. Rich reddish patina is seen over each side with a confirmed glimmer of semireflectivity in the fields. The result of the rich color and bright fields produces a majestic coin. The Lewis and Clark gold dollars are scarce issues, and this is the more obtainable first-year issue of the two that were produced.  
*Ex: Long Beach Signature (Heritage, 2/2005), lot 8643. NGC ID# 26HC, PCGS# 7447*

**1904 Lewis and Clark Gold Dollar, MS65**  
**Only Two-Headed U.S. Type Coin**

- 6580** 1904 Lewis and Clark MS65 PCGS. Attractive peach fields are framed by peripheral sun-gold. The portraits are fully struck, and any incompleteness is confined to the left-side dentils. This Gem appears pristine save for a single faint vertical graze on the cheek of Lewis. Although dated 1904, the issue commemorates a Portland, Oregon exposition held the following year, 1905.  
*Ex: Central States Signature (Heritage, 4/2011), lot 6080. NGC ID# 26HC, PCGS# 7447*

**1904 Lewis and Clark Gold Dollar, Solidly Struck MS65**

- 6581** 1904 Lewis and Clark MS65 PCGS. Rich greenish-gold patination runs over both sides of this impressive commemorative gold dollar, each of which displays coruscating luster. A solid strike imparts sharp definition to the design elements, and the surfaces show impeccable preservation. Housed in a green label holder.  
 NGC ID# 26HC, PCGS# 7447

**1904 Lewis and Clark Dollar, MS66**  
**Elusive Any Finer**

- 6582** 1904 Lewis and Clark MS66 PCGS. Rich orange-gold and mint-green colors compete for territory on the lustrous surfaces of this sharply struck Premium Gem. Close examination reveals no mentionable marks over each side. This is the highest grade that most collectors are likely to encounter as PCGS has seen only 20 pieces finer and NGC 29 finer (12/14). NGC ID# 26HC, PCGS# 7447

**1904 Lewis and Clark Gold Dollar**  
**Flashy Premium Gem Type Coin**

- 6583** 1904 Lewis and Clark MS66 PCGS. CAC. The 1904 is the slightly more available of the two Lewis and Clark commemorative gold dollar issues, ideal for the classic commemorative type collector. This Premium Gem example displays satiny lemon-gold luster and well-struck relief elements. The fields show some usual die fatigue, a common characteristic of this issue. PCGS has encapsulated only 19 numerically finer representatives (11/14).  
*From The A. James Evans Collection, Part II. NGC ID# 26HC, PCGS# 7447*

- 6584** 1905 Lewis and Clark MS63 PCGS. CAC. A flashy sun-gold Select representative that boasts a crisp strike and only a few delicate, hair-thin field marks. For this early commemorative issue, the MS63 grade provides superior value. NGC ID# 26HD, PCGS# 7448

- 6585** 1905 Lewis and Clark MS64 NGC. An attractive mix of orange-gold and ice-blue patination resides on the lustrous surfaces of this near-Gem gold-dollar commemorative. Sharply struck devices and the lack of mentionable marks further enhance the coin's eye appeal. NGC ID# 26HD, PCGS# 7448

- 6586** 1905 Lewis and Clark MS64 PCGS. The only true two-headed issue in U.S. numismatics. Lewis has a prominent ear, while Clark displays shoulder-length hair. A well preserved near-Gem with apricot-gold centers framed by jade-green margins. NGC ID# 26HD, PCGS# 7448

- 6587** 1905 Lewis and Clark MS64 NGC. Pleasing luster emanates from the yellow-gold surfaces of this near-Gem gold-dollar commemorative and the design elements are well-impressed. A handful of minute, unobtrusive marks prevent Gem status. NGC ID# 26HD, PCGS# 7448

1905 Lewis and Clark Gold Dollar, MS66  
Rich, Variegated Patina

**6588** 1905 Lewis and Clark MS66 PCGS. Ex: Benson. With just seven numerically finer pieces in the combined certified population (11/14), the 1905 Lewis and Clark gold dollar is extremely rare any finer than this Premium Gem, as well as very scarce at the MS66 level. The present coin has strong lemon-yellow color in the centers with pale straw-gold elements closer to the rims. The central definition is excellent, particularly on the often-lost details of the portraits' hair and clothing, while the fields are smooth and essentially untouched. An incredibly appealing piece for the classic gold commemorative collector.

Ex: *FUN Signature* (Heritage, 1/2010), lot 2642. NGC ID# 26HD, PCGS# 7448

1905 Lewis and Clark Gold Dollar  
Sharply Struck MS66

**6589** 1905 Lewis and Clark MS66 PCGS. Ex: Paul Denby Collection. The Lewis and Clark Exposition dollar is the first commemorative gold coin issue to be struck in more than one year (1904-1905). As Bowers (2008) writes, the Lewis and Clark coins were not at all popular, due in part to the previous Louisiana Purchase gold dollars that had lost numismatic value for collectors.

Deep orange-gold patination imbued with hints of nearly imperceptible ice-blue clings to both sides of this Premium Gem, each of which is awash with coruscating luster. The design elements are sharply struck and the surfaces are impeccably preserved. Population: 74 in 66, 4 finer (11/14). NGC ID# 26HD, PCGS# 7448

**6590** 1915-S Panama-Pacific Gold Dollar MS66 PCGS. Gorgeous intermingled pale mint-green and golden-orange toning enlivens each side of this splendid Premium Gem. The major devices on each side are free of mentionable contact, save for one small tick on the back of the upper dolphin. NGC ID# 26HE, PCGS# 7449

**1915-S Panama-Pacific Gold Dollar, MS67  
None Certified Numerically Finer**

- 6591 1915-S Panama-Pacific Gold Dollar MS67 NGC.** One of five commemorative issues struck in conjunction with the Panama-Pacific International Exposition, held in San Francisco in 1915, the Panama-Pacific gold dollar is also one of just six major gold dollar types in the classic commemorative series. This piece is beautifully preserved and richly satiny in honey-gold luster. The strike is bold and the eye appeal is excellent. Census: 70 in 67 (2 in 67+, 1 in 67 ★), 0 finer (12/14). NGC ID# 26HE, PCGS# 7449

**1915-S Panama-Pacific Gold Dollar  
Immaculate Superb Gem**

- 6592 1915-S Panama-Pacific Gold Dollar MS67 PCGS.** A wonderfully smooth and lightly frosted example of the Panama-Pacific gold dollar, with superb coloration and immaculate surfaces. Although many of this issue are bothered by friction on the obverse, this example is free of any marks or distractions. The portrait of the laborer is bold and fully struck, and the reverse is equally sharp. Although Farran Zerbe's ambitious plans were not fully realized, a net distribution of 15,000 pieces was accomplished from an original production of 25,000 gold dollars. This is one of the finest survivors from the mintage — none are certified numerically higher by either PCGS or NGC (12/14). NGC ID# 26HE, PCGS# 7449

**1915-S Panama-Pacific Quarter Eagle, MS64  
Pleasing Mid-Grade Representative**

- 6593 1915-S Panama-Pacific Quarter Eagle MS64 PCGS.** A highly appealing example for the grade, this Choice Panama-Pacific quarter eagle displays satiny yellow-gold luster that reveals just slight interruptions on the high points when rotated beneath a light. The strike is sharp, and this piece has a lovely, shimmering appearance. From a low distribution of only 6,749 coins. NGC ID# 26HK, PCGS# 7450

**1915-S Pan-Pac Two and a Half, MS64  
Widely Sought Issue**

- 6594 1915-S Panama-Pacific Quarter Eagle MS64 NGC.** Panama-Pacific Exposition emissions are longtime collector favorites, being among the most beautiful of the commemorative series. The quarter eagle features Liberty astride a mythological sea creature (the hippocampus), which in turn symbolizes the Panama Canal's dominion over the oceans. This yellow-gold example exhibits more intense gold color within the fields and hints of brown at the obverse rim. NGC ID# 26HK, PCGS# 7450

**1915-S Quarter Eagle, MS64  
Panama-Pacific Exposition**

- 6595 1915-S Panama-Pacific Quarter Eagle MS64 PCGS. CAC.** Impressive apple-green and orange toning visits both sides but is more prominent on the reverse. Unabraded, satiny, and well struck. Outstanding quality for the designated third party grade. Farran Zerbe was in charge of coin sales at the P.P.I.E., and after its closure, moved his booth to the Palace of Fine Arts, which still stands today. Housed in a first generation holder. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS65  
Rich Orange-Gold Color**

- 6596 1915-S Panama-Pacific Quarter Eagle MS65 PCGS.** Depending on one's definitions, the 1915-S Panama-Pacific quarter eagle is either the first or the second commemorative of its denomination, with the 1848 CAL. quarter eagles inducing the question. This orange-gold Gem has striking color, albeit slightly lighter on the reverse, and a delicate texture to the fields. Minor softness affects Columbia's head, but the overall detail is pleasing. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS67  
Tied for the Finest Certified**

**6597** 1915-S Panama-Pacific Quarter Eagle MS67 NGC. There have been no submissions of Panama-Pacific quarter eagles to NGC or PCGS that are graded higher than MS67 (12/14). This example has brilliant yellow-gold luster with pristine, satin surfaces and exceptional eye appeal. NGC ID# 26HK, PCGS# 7450

**1915-S Pan-Pac Two and a Half, MS67  
One of 20 With CAC Approval in This Grade**

**6598** 1915-S Panama-Pacific Quarter Eagle MS67 NGC. CAC. Most collectors lack the financial resources to obtain a Panama-Pacific fifty dollar, whether round or octagonal. Fortunately, the Panama-Pacific quarter eagle is also a novel design, lovely in its own way; this design and its companion on the Pan-Pac silver half dollar were the last work of Mint Chief Engraver Charles Barber, who passed away in February 1917 at age 77. This Superb Gem Pan-Pac two and a half is among the several dozen finest certified of the issue at this grade level, but the added CAC green-label endorsement in this grade shrinks the population of coins so certified down to 20 pieces (9/14). The problem-free surfaces boast glorious, rich orange-gold color amid the swirling die-polish lines, bold strike, and high eye appeal expected at this grade level. From *The Empire Collection*. NGC ID# 26HK, PCGS# 7450

**6599** 1917 McKinley MS66 PCGS. A high-grade, flashy example of this scarcer McKinley issue. The fields on both sides are bright and prooflike with rich, even golden-orange coloration. This would make an exciting addition to a commemorative gold collection. Ex: *Long Beach Signature* (Heritage, 2/2003), lot 8749. NGC ID# 26HG, PCGS# 7455

**6600** 1917 McKinley MS66 PCGS. Rich orange-gold luster issues from the sharply struck surfaces of this Premium Gem. Both sides have been wonderfully cared for. A toning spot is visible o the first M in MEMORIAL. NGC ID# 26HG, PCGS# 7455

**1917 McKinley Gold Dollar, MS67  
A Remarkable Registry Coin**

**6601** 1917 McKinley MS67 PCGS. The second of two years for this commemorative issue, originally scheduled to be a silver coin before Congress was reminded of McKinley's support for the gold standard. This Superb Gem has generous apricot-gold luster and surprisingly strong eye appeal for this often-lacking issue. Population: 68 in 67 (3 in 67+), 0 finer (12/14). NGC ID# 26HG, PCGS# 7455

**1917 McKinley Gold Dollar, MS67+  
Tied for the Finest Certified**

**6602** 1917 McKinley MS67+ PCGS. CAC. A stunning Superb Gem, this scarce 1917-dated McKinley dollar has amazing rose and amber toning on its yellow-gold surfaces, exhibiting brilliant satin mint luster. This impressive piece is tied for the finest certified at NGC or PCGS. Population: 68 in 67 (3 in 67+), 0 finer (12/14). NGC ID# 26HG, PCGS# 7455

**6603** 1917 McKinley MS65 Prooflike NGC. One of the three finest-graded Prooflikes at NGC, this is an outstanding example of this commemorative gold dollar issue. Well-struck with rich rose-gold color throughout. The fields display remarkable reflectivity: a rare attribute for this type. Census: 3 in 65 Prooflike, 0 finer (11/14). PCGS# 77455

**6604** 1922 Grant No Star MS65 NGC. The Grant No Star gold dollar is a low-mintage issue that was well-produced and well-designed by Laura Gardin Fraser. This is a lovely Gem representative with clean, lustrous surfaces and rich coloration. NGC ID# 26HJ, PCGS# 7458

**6605** 1922 Grant No Star MS65 PCGS. Struck after the Grant With Star versions, the No Star varieties are otherwise identical to the earlier issues. Peach-gold surfaces exhibit traces of light green and are well struck. Both sides display pleasing luster and are well-preserved. Ex: *Houston Signature* (Heritage, 12/2009), lot 1382. NGC ID# 26HJ, PCGS# 7458

**6606** 1922 Grant No Star MS65 PCGS. CAC. The wheat-gold surfaces show good luster and plenty of eye appeal, despite a couple of hair-thin marks on the obverse, one at Grant's temple, that determine the grade. NGC ID# 26HJ, PCGS# 7458

- 6607** 1922 Grant No Star MS66 PCGS. Swirling die polishing lines are in evidence on this highly lustrous wheat-gold Premium Gem, but the device high points on each side are pleasingly free of major contact. NGC ID# 26HJ, PCGS# 7458

**1922 Grant No Star Gold Dollar, MS66  
Final U.S. Gold Dollar Design**

- 6608** 1922 Grant No Star MS66 PCGS. CAC. The last gold dollars struck by the U.S. Mint, the Grant commemorative gold dollars designed by Laura Gardin Fraser, come with and without a star above the name GRANT. This No Star Premium Gem is bright yellow-gold with occasional coppery accents and above-average detail with only a hint of the usual "bald spot" at the back of the portrait's head. From *The A. James Evans Collection, Part II*. NGC ID# 26HJ, PCGS# 7458

- 6609** 1922 Grant With Star MS65 PCGS. The 1922 Grant With Star gold dollar was an intentional money-extracting issue of the type common among commemoratives in the early 1920s. (The Grant With Star *half dollars*, by contrast, were a happy accident for the beneficiaries.) This Gem example has uncommonly bright yellow-gold luster for the issue. NGC ID# 26HH, PCGS# 7459

- 6610** 1922 Grant With Star MS65 PCGS. CAC. A luminous Gem of the With Star subtype, yellow-gold over most of each side with a delicate crimson alloy streak down the center of the reverse. Strong eye appeal. NGC ID# 26HH, PCGS# 7459

- 6611** 1922 Grant With Star MS66 PCGS. A splendid peach-gold Premium Gem. Lustrous and magnificently preserved. The strike is bold aside from the tree trunk left of the frame house window. Certified in a green label holder.  
Ex: *Dallas Signature (Heritage, 4/2007)*, lot 1448, which realized \$3,737.50.  
From *The Free Tilly Collection*. NGC ID# 26HH, PCGS# 7459

- 6612** 1922 Grant With Star MS66 NGC. The small incuse star in the right obverse field identifies this piece as being from the first production run of just 5,000 coins (plus 16 pieces for assay purposes). The significance of the star has never been confirmed, but its removal partway through production appears to have been solely to create a new variety to market to collectors. This beautifully preserved Premium Gem displays satiny yellow-gold luster, and the design elements are boldly impressed. NGC ID# 26HH, PCGS# 7459

- 6613** 1922 Grant With Star MS66 PCGS. CAC. An eye-catching Premium Gem Grant With Star gold dollar, bright yellow-gold with significant detail at the often-weak spot at the back of Grant's head. A small alloy spot appears just to the right of the portrait. NGC ID# 26HH, PCGS# 7459

- 6614** 1922 Grant With Star MS66 PCGS. CAC. Flowing luster on flashy, rich orange-gold surfaces is accompanied by excellent strike and preservation. This piece is certified in a green-label holder with CAC green approval sticker, a popular format for some collectors. NGC ID# 26HH, PCGS# 7459

- 6615** 1922 Grant With Star MS66 PCGS. CAC. The two-toned palette includes rich reddish-orange on the device high points and cooler mint-green and yellow-gold in the fields on this nicely preserved example, featuring a near-pristine profile of General Grant and all-around top-notch eye appeal.  
From *The A. James Evans Collection, Part II*. NGC ID# 26HH, PCGS# 7459

**1922 Grant With Star Dollar, MS67  
Honey-Gold Surfaces**

- 6616** 1922 Grant With Star MS67 PCGS. Flowing luster drips from honey-gold surfaces on this Superb Gem Grant With Star gold dollar, a coin that is virtually unimprovable numerically at PCGS, which has seen six marginally finer in MS67+ and a single MS68 (12/14). The high points of each side are nicely preserved and free of contact. NGC ID# 26HH, PCGS# 7459

**1922 Grant With Star Gold Dollar, MS67  
Impressive, Beautifully Preserved Example**

- 6617** 1922 Grant With Star MS67 PCGS. CAC. The Grant With Star commemorative gold dollar was designed by Laura Gardin Fraser — wife of Buffalo nickel designer James Earle Fraser — and utilized her design for the Grant Memorial half dollar on a slightly smaller scale. This is a well-struck and unmarked example with strong mint luster and lovely yellow-gold toning. Just one coin is graded numerically higher by PCGS (12/14). NGC ID# 26HH, PCGS# 7459

**1922 Grant With Star Dollar, MS68  
Deep, Attractive Color and a Bold Strike**

- 6618** 1922 Grant With Star MS68 NGC. Unusually deep reddish-lilac patina on each side is the hallmark of this immaculate Superb Gem 1922 Grant With Star gold dollar. NGC has seen only 10 submissions in this top grade, while the finest at PCGS is a sole MS68 (10/14). General Grant's profile is noticeably free of marks on the exposed cheek and forehead, the usual areas where pesky contact signs appear. The deep, attractive coloration and excellent strike and preservation make this coin well-deserving of a premium bid.  
From *The Empire Collection*. NGC ID# 26HH, PCGS# 7459

---

**1926 Sesquicentennial Two and a Half, MS66  
Virtually Unobtainable Any Finer**

- 6619 1926 Sesquicentennial MS66 PCGS.** While the 1926 Sesquicentennial quarter eagle is on the borderline of being conditionally scarce in MS66, the utter lack of finer examples makes the coins expensive; PCGS has graded just one piece in MS66+ and none finer (11/14). This peach-accented apricot-gold example is well-struck for the design with occasional alloy spots. *From The A. James Evans Collection, Part II.* NGC ID# 26HL, PCGS# 7466

---

**1926 Sesquicentennial Quarter Eagle  
Top-Notch MS66**

- 6620 1926 Sesquicentennial MS66 PCGS.** The vast majority of Sesquicentennial quarter eagles fail the test to become Premium Gems, either due to excessive marks, poor luster, a mediocre strike — and often all three. This exceptional example passes each criterion, exceptionally well-preserved with rich reddish-orange luster, and a top-notch strike front and back. NGC ID# 26HL, PCGS# 7466

---

**MODERN ISSUES**

---

**1984-D Los Angeles Olympiad Silver Dollar  
Superb MS70 Representative**

- 6621 1984-D Olympic Silver Dollar MS70 PCGS.** One of three commemorative coins struck for the 23rd Olympiad, held in Los Angeles from 1983 to 1984. Designed by American sculptor Robert Graham, this silver dollar's obverse depicts the Los Angeles Memorial Coliseum and the reverse shows a well-proportioned representation of a proud American eagle. This commemorative was produced by all three active mints, with the Denver facility striking 116,625 pieces. This perfectly preserved example is well-struck, with satiny luster that exhibits just a suggestion of light golden color. Population: 10 in 70 (12/14). NGC ID# 28PA, PCGS# 9610

- 6622 1995-W Olympic/Torch Runner Gold Five Dollar Cancelled Proof Die.** A reverse die used to strike the proof 1995-W Torch Runner gold five dollar, part of the ambitious 1996 Atlanta Olympics commemorative program. Above the base of the die is serial number, W5-630250. Highly polished steel face with devices incused and frosted. The die has been "X" cancelled.

- 6623 2000-W Library of Congress Bimetallic Ten Dollars MS69 PCGS.** Notwithstanding experiments such as the Judd-1, the Library of Congress ten dollar commemoratives were the first visibly bimetallic U.S. coinage issues. This example of the low-mintage business strike has near-perfect surfaces and smooth, satiny luster. NGC ID# 28V5, PCGS# 9784

---

**MODERN BULLION COINS**

- 6624 1993 Half-Ounce Gold Eagle MS70 PCGS.** The half-ounce Uncirculated gold Eagles were by and large struck in quantities far smaller than their one-ounce companions and pose an interesting collecting challenge. This is a brilliant, untuned example with great eye appeal. Population: 12 in 70 (12/14). NGC ID# 26NE, PCGS# 9872

- 6625 Five-Piece 1995-W 10th Anniversary American Eagle Set.** A complete five-piece 10th Anniversary American Eagle proof set. Contains the one-ounce \$50, half-ounce \$25, quarter-ounce \$10, and tenth-ounce \$5 gold eagles, but as always, the star is the one-ounce silver eagle, the key to its widely collected series. All coins appear pristine. Included with the lot is the government-issued case, box, and certificate of authenticity.

---

1995-W Silver Eagle, PR69 Deep Cameo  
Premier Series Key

**6626** 1995-W Silver Eagle PR69 Deep Cameo PCGS. A bullion coin ranking as high as number four in Scott Schechter and Jeff Garrett's *100 Greatest U.S. Modern Coins* might seem odd to the novice, but if any coin deserves such high esteem among modern keys, it is the 1995-W proof Silver Eagle. The issue was only distributed through the purchase of a complete 1995-W 10th anniversary bullion program proof set, which had a rather steep purchase price of \$999. The high cost the complete set limited the number sold to just 30,125, which by extension represents the entire mintage of the 1995-W proof Silver Eagle. Not surprisingly, the value of this one coin has increased to many times what the entire proof set original cost.

The present example is virtually pristine, with bold design elements and stark white-on-black contrast. Just a touch of light golden color accents the devices, leaving the fields deeply mirrored and devoid of toning. PCGS has certified 51 numerically finer examples (12/14). NGC ID# 28WZ, PCGS# 9887

---

1995-W Silver Eagle, PR69 Ultra Cameo  
Intense Eye Appeal

**6627** 1995-W Silver Eagle PR69 Ultra Cameo NGC. A beautiful, seemingly perfect example of this key Silver Eagle issue, struck to the limited extent of just 30,125 pieces. This piece shows heavily frosted devices set against deep, black mirrors, with just a trace of pale champagne color obverse when studied beneath a good light. PCGS has encapsulated just 52 numerically finer examples (12/14). NGC ID# 28WZ, PCGS# 9887

---

1995-W Silver Eagle, PR69 Deep Cameo  
Limited 30,125-Coin Mintage

**6628** 1995-W Silver Eagle PR69 Deep Cameo PCGS. This nearly perfect Deep Cameo proof has impressive white-on-black contrast with frosty silver devices and fully mirrored fields of seemingly unlimited depth. The 1995-W American Silver Eagle was a limited-mintage issue with a total production of just 30,125 pieces. NGC ID# 28WZ, PCGS# 9887

---

1995-W Silver Eagle, PR70 Ultra Cameo  
A Sparkling Example of This Series Key

**6629** 1995-W Silver Eagle PR70 Ultra Cameo NGC. The 10th anniversary of the American Eagle bullion coinage program was marked by the issuance of a special proof set of all bullion coins then in production, including the Silver Eagle. The 1995 sets were struck at the West Point Mint, and bear that mintmark. The gold pieces in the set could also be purchased individually, thereby increasing their sales among collectors who could not afford the \$999 issue price of the complete set, but the Silver Eagle was not. Collectors who wanted this West Point proof striking had to shell out the price of the complete set.

The production of the 10th anniversary set was originally limited to just 45,000 sets, but in the end only 30,125 were actually sold, this figure being the total production of the included 1995-W Silver Eagle. Its low mintage (the lowest in the series by a staggering margin), coupled with the events surrounding its release, makes the 1995-W Silver Eagle the rarest and by extension the most sought-after issue in the entire series. The present coin shows beautiful deep mirrors and sharp, frosty devices. A few faint traces of pale golden color are noticed when tilted beneath a light, though the coin appears brilliant at first glance. A tiny, C-shaped lint mark is present on Liberty's head, and should not be mistaken for a post-mint flaw. NGC ID# 28WZ, PCGS# 9887

---

**1997 Tenth-Ounce Platinum Eagle, MS70**  
**A Registry Collector's Dream**

- 6630 1997 Tenth-Ounce Platinum Eagle MS70 PCGS.** As platinum grew in popularity among speculators in the 1990s, the U.S. Mint saw an opportunity and launched the platinum American Eagles in 1997. This technically marvelous tenth-ounce "business strike" from that initial issue is one of only a handful to get the ultimate grade from PCGS. Population: 17 in 70 (11/14). NGC ID# 26S5, PCGS# 99754

---

**1997 Quarter-Ounce Platinum American Eagle, MS70**  
**Perfect First-Year Business Strike**

- 6631 1997 Quarter-Ounce Platinum Eagle MS70 PCGS.** In the first year of platinum American Eagle production, tenth-ounce and one-ounce were the most popular sizes, and the quarter-ounce had a business strike mintage of only 27,100 pieces. Of those, this is one of only four to be assigned a perfect grade by PCGS (11/14). John Mercanti's visage of Lady Liberty is beautifully rendered. NGC ID# 26SR, PCGS# 99753

---

**COINS OF HAWAII**

---

**1883 Hawaiian Ten Cents, MS65**  
**Natural Toning, Nice Luster**

- 6632 1883 Hawaii Ten Cents MS65 PCGS. CAC.** Olive-gray surfaces show generous accents of gold and ice-blue amid strong satin luster and a bold strike on this Gem 1883 Hawaii dime, the smallest of the four 1883-dated silver denominations struck for the Kingdom of Hawaii. Most of the 250,000-piece mintage was melted. Population: 21 in 65, 14 finer (12/14). PCGS# 10979

- 6633 1883 Hawaii Quarter MS66 PCGS. CAC. Medcalf 2CS-3.** A delightful Premium Gem example of this popular issue, from a mintage of 500,000 pieces. This sharply detailed specimen displays vibrant mint luster under shades of golden-brown and magenta toning. PCGS has graded 17 numerically finer examples (12/14). From The College Collection. PCGS# 10987

---

**1883 Hawaii Quarter Dollar, MS67+**  
**Tied for the Finest at PCGS**

- 6634 1883 Hawaii Quarter MS67+ PCGS. CAC.** The collector who seeks a single Hawaii silver coin should consider the quarter dollar that is the most available issue of the series. However, Superb Gems such as this beauty appear infrequently. This boldly defined piece has ivory luster with splashes of blue, green, and gold toning on each side. An exceptional example. Population: 17 in 67 (2 in 67+), 0 finer (12/14). PCGS# 10987

---

**1883 Kingdom of Hawaii Half Dollar, MS65**  
**Strong Luster Through Distinctive Patina**

- 6635 1883 Hawaii Half Dollar MS65 PCGS.** The independent Kingdom of Hawaii's last attempt at a comprehensive local coinage was the series of 1883, struck at the San Francisco Mint on contract. This Gem has generous luster with a silver-blue base and prominent reddish-orange and olive-green dapples at the margins. King Kalakaua's portrait offers intricate detail. Population: 14 in 65 (1 in 65+), 5 finer (12/14). PCGS# 10991

- 6636** 1883 Hawaii Dollar AU53 NGC. Dusky grayish-violet toning bathes both sides of this Hawaii dollar. The design elements are sharply defined and both sides reveal remarkably clean surfaces. This issue commemorated King Kalakaua I and his progressive reign over the Hawaiian Islands. PCGS# 10995

**Undated Waterhouse Token, AU58  
Elusive Hawaiian Issue, Medcalf 2TE-1**

- 6637** (1860) Waterhouse AU58 PCGS. Medcalf 2TE-1. Obverse: bust of King Kamehameha III, HIS MAJESTY KAMEHAMEHA IV around. Reverse: beehive in center, JOHN THOMAS WATERHOUSE IMPORTER HALE MAIKAI, struck in white metal with a reeded edge, 34 mm.

John T. Waterhouse owned two stores in Honolulu (established 1851) and had these tokens struck bearing the bust of Kamehameha III, but with the inscription to Kamehameha IV. The date of issue is uncertain, but they were probably designed during the reign of Kamehameha III and actually struck after the crown passed to his nephew, Kamehameha IV in 1855. Medcalf notes:

“...the Waterhouse token is scarce, very much in demand and virtually impossible to find above EF condition. It contains a large proportion of tin or lead, resulting in a soft alloy, susceptible to damage.”

The present coin is a well-detailed near-Mint example, with the usually seen flattening of the nose on the bust. The lavender-gray surfaces show a few minor abrasions and retain traces of original mint luster. Population: 1 in 58, 2 finer (12/14). PCGS# 600500

**1871 Wailuku Plantation Token  
12 1/2 Cents, Broad Starfish  
M. 2TE-3, Choice VF**

- 6638** 1871 Wailuku Plantation 12 1/2 Cents, Broad Starfish, VF35 NGC. Medcalf 2TE-3. Ex: Samuel Mills Damon Collection. Our auction archives suggest the Narrow Starfish M. 2TE-2 is about twice as available. Most examples of the Broad Starfish are unevenly impressed, as they were struck by hand by a blacksmith. This chocolate-brown example is problem-free but has a light impression near the date and northeast of the starfish. Samuel Mills Damon was born in Honolulu, the son of missionary Samuel Chenery Damon. The younger Damon became a prominent Hawaiian sugar plantation director, and later became Hawaii's Minister of Finance. He died in 1924 but his extensive world coin collection apparently remained intact until it was auctioned in 2006. Listed on page 414 of the 2015 *Guide Book*. Ex: Damon Collection (Doyle, New York, 3/2006), lot 2674. PCGS# 600503

1880 Wailuku Plantation Token, AU55  
1 Real, Medcalf 2TE-6  
Superior Strike

- 6639** 1880 Wailuku Plantation Token, 1 Real, AU55 PCGS. Medcalf 2TE-6. A splendid chocolate-brown representative. The strike is far above average for this usually mushy variety, and as close to full as can be obtained. The surfaces are pleasing and exhibit only incidental contact. PCGS has certified a total of only 12 examples of this rare Hawaiian token. The Wailuku Plantation was an early cane sugar farm controlled by American businessmen. One real, a Mexican silver denomination, was equivalent to 12 1/2 U.S. cents. Listed on page 414 of the 2015 *Guide Book*. Population: 3 in 55, 0 finer (12/14). PCGS# 600512

1879 12 1/2 Cent T.H. Hobron Token  
MS61, Rare Medcalf 2TE-8 Variant

- 6640** 1879 T. Hobron, Kahului-Wailuku 12 1/2 Cent Railroad Token, Thin 6/2 MS61 PCGS. Medcalf 2TE-8 Variant. A rare die marriage. Similar to the Medcalf 2TE-8 variety, but both dies differ. For example, the T is repunched above its right base, as is the first H. The reverse stars have long, slender branches. The lower loop of the 8 is slightly open. A pleasing mahogany-brown example with well struck centers and the usual minor blending of impression on the rims. Listed on page 414 of the 2015 *Guide Book*. PCGS# 515877 Base PCGS# 600515

1893 Princess Kailulani Silver Dollar  
Medcalf 2MH-3, AU58  
Rare Reginald Huth Issue

- 6641** 1893 Princess Kailulani Pattern Silver Dollar, Medcalf 2MH-3, AU58 PCGS. Dated 1893 but struck in 1895. The obverse features Princess Kailulani, facing right, one dolphin below the bust. A map of the Hawaiian Islands set on the globe background of the Pacific Ocean centers the reverse. Reginald Huth's Princess Kailulani medal was produced in honor of her 18th birthday. Listed in *Unusual World Coins*, Third Edition (1992) by Colin R. Bruce II as XM3. The latter reference estimates a mintage of 20 pieces. Metcalf states that varieties 2MH-3 and 2MH-5 had a combined production of 50 pieces. The present untoned piece retains substantial prooflike field flash. Minor contact marks and hairlines confirm limited non-collector handling. PCGS# 726252

## ERRORS

### 1965 Cent Struck Over a 1965 Dime Double Denomination, MS65

- 6642** 1965 Lincoln Cent — Struck on a 1965 Dime — MS65 NGC. This double denomination error began life as a 1965 dime but was later overstruck by cent dies. The portrait of Roosevelt is nearly inverted relative to Lincoln. The cent date is sharp. The dime date is faint but readable. The flame of the torch is over the N in ONE CENT. Lustrous and cream-white with clean surfaces.

### 1920 Nickel, Struck 40% Off Center on a Cent Planchet, MS64 Brown

- 6643** 1920 Buffalo Nickel — 40% Off Center on a Cent Planchet — MS64 Brown PCGS. Struck widely off center toward 2 o'clock. A lustrous and sharply struck reddish-brown example. The Indian's profile and the bison's legs are off the flan. The date is present, but not the mintmark (if any). The struck portion of the coin is well-preserved, although the unstruck half of the obverse has a couple of minor mint-made abrasions. Because the piece is off center, the braid and shoulder definition is unusually intricate for a business strike. An Uncirculated (and popular) obsolete type coin with two significant mint errors.  
*Ex: Pittsburgh Signature (Heritage, 8/2004), lot 8336; ANA Signature (Heritage, 8/2007), lot 2196.*

### 1972-S Nickel, PR65 Uniface Obverse Coin #1

- 6644** 1972-S Jefferson Nickel — Uniface Obverse, Coin #1 — PR65 PCGS. The mate coin for the present lot is the next lot. Two Jefferson nickel planchets were fed between proof dies, with one planchet precisely aligned above the other. The collar die prevented any diameter expansion. As one might expect, the strike is razor-sharp on the obverse. The reverse is slightly wavy and nearly featureless, since it was struck against a planchet instead of the reverse die.

### 1972-S Nickel, PR65 Uniface Reverse Coin #2

- 6645** 1972-S Jefferson Nickel — Uniface Reverse, Coin #2 — PR65 PCGS. The mate coin for the present lot is the previous lot. Per consignor request, the two coins are sold in consecutive, separate lots. A pair of planchets for Jefferson nickels were fed together between proof dies, one placed perfectly above the other. The strike created one uniface obverse and one uniface reverse Jefferson nickel. On this coin, the reverse appears normal, while the obverse is wavy and nearly featureless.

---

**1981-P Nickel, MS65 Red and Brown  
Struck Over a 1981 Cent**

- 6646** 1981-P Jefferson Nickel — Overstruck on a 1981 Cent — MS65 Red and Brown NGC. The Philadelphia mintmark is intact, and though the upper half of the nickel date is off the flan, the tail of the 9 and loop of the 8 is obvious. The cent date is very faint but can be located above the dome of Monticello. The reverse field displays prominent die polish lines. Much scarcer than cent-on-dime 11-cent pieces.

---

**Kennedy Half on a Bronze Planchet  
MS64 Brown**

- 6647** 19??-? Kennedy Half Dollar — Struck on a Foreign Planchet — MS64 Brown NGC. 2.4 gm. The U.S. Mint struck Liberia cents (KM-13) between 1968 and 1975, made of bronze with a standard weight of 2.6 gm. A U.S. cent of the era weighs 3.1 gm. A Liberian cent planchet is the most likely candidate for the present half dollar. It was struck flush with the collar at 8 o'clock. Kennedy's profile is complete, but the final three digits (and any mintmark) are off the flan. Toned rich olive-brown with lighter mahogany-red shades in protected areas.

---

**Eisenhower Dollar on a 1973-D Cent  
MS66 Red, Double Denomination**

- 6648** Undated Eisenhower Dollar — Overstruck on a 1973-D Cent — MS66 Red NGC. Ike dollars struck over other denominations are very rare, since riddlers trapped most such pieces and prevented their exit from the Mint. The present spectacular Premium Gem retains its original pumpkin-gold color. The cent date and mintmark are easily located on the top of Eisenhower's head. The Ike dollar date and presumed Denver mintmark are off the flan. A majority of the eagle and Ike's head are present, although Eisenhower's profile is absent, as is the eagle's head. Much of the Lincoln Memorial is evident near the eagle's tail. Lincoln's portrait is nicely outlined although inner detail cedes to the later President. Lustrous and well preserved. We can locate only one other similar error in our two decades of online auction archives; lot 4677 from our February 2013 Long Beach Signature.
-

1974-D Ike Dollar, MS65  
Overstruck on a 1974-D Dime

- 6649** 1974-D Eisenhower Dollar — Struck on a 1974-D Dime — MS65 NGC. An impressive Gem of this rare double denomination type combination. The Ike dollar mintmark is sharp and the upper half of all four date digits are present. The dime Denver mintmark is faintly visible and the 197 of the dime date is bold, though the final digit is indistinct. The lustrous surfaces are unabraded and minimally toned. The red color of the copper core extends slightly from the edge around the perimeters. Roosevelt's profile is within Ike's neck, and Ike's profile is off the flan, though his chin and ear are visible.

1943-S Australia Sixpence on a  
Zinc-Plated Steel Cent Planchet, AU50

- 6650** 1943-S Australia Sixpence — Struck on a U.S. Zinc-Coated Steel Cent Planchet — AU50 NGC. 2.8 gm. Australian sixpence were struck at the San Francisco Mint in 1943, at approximately the same time that the 1943 zinc-plated steel cents were produced. The inevitable mishap occurred; a world coin struck on a U.S. coin planchet. Despite its unusual dark silver-gray color, the present sixpence circulated briefly before it was saved by a sharp-eyed finder. Substantial luster shimmers from the legends and motifs. Minimally granular and unabraded. The rims and reeding are complete. An A.N.A. Certification Service certified, dated August 2, 1974, accompanies the lot.

## WASHINGTONIA

Washington-Franklin Sansom Medal  
MS63, Baker-58A, Julian CM-5b

- 6651** (1808) Sansom Medal, Restrike, MS63 NGC. Baker-58A, Julian CM-5b. Bronze, 41 mm. Although NGC has classified this medal as a restrike, there is not a true restrike of this medal, although there is a possibility it was a later striking. John Reich, the assistant engraver at the U.S. Mint, cut the dies for this medal for the issuer, merchant Joseph Sansom of Philadelphia. The obverse features jugate busts of Franklin and Washington while the striking reverse includes an eagle with lightning bolts in its talons descending on a portion of a globe identified as the United States. Published by Sansom and struck at the Philadelphia Mint as a part of his History of the Revolution series, this medal was designed to commemorate the signing of the Treaty of Paris that officially ended the American Revolutionary War. In terms of design, one of the truly great American medals, with Reich executing the classic eagle and globe reverse with a master's hand. Struck in a variety of formats, silver examples are essentially uncollectible with 3 or 4 known, while bronzes exist likely in the range of 20 to 40 pieces. Mahogany-brown color adds to the eye appeal of this piece. A small dark spot appears on Washington's forehead. The luster and color on the reverse are particularly pleasing.

- 6652** (1807) Sansom Medal MS63 NGC. Baker-71A, Julian-PR-1. Bronzed copper, 41 mm. Designed by John Reich and issued in 1807 in Philadelphia in very limited quantities. The original advertisement for this medal states that it was only listed in silver, but that is clearly not the case as original pieces are known in bronze and white metal. Originals are distinguished by recutting on the 9, and by the closeness of RELINQ. to the pedestal.  
*Ex: Early American Historical Auctions (2/2001), lot 1254.*

## SO-CALLED DOLLARS

### 1920 Wilson Dollar, PR66 Possibly Unique So-Called Dollar Variant Brass, No M

**6653 1920 Wilson Dollar, No M, Brass, PR66 NGC. HK-450 Variant.** The 1920 Wilson dollars were struck to commemorate the opening of the Manila Mint on July 6, 1920, the first and only time the U.S. government has established a branch mint outside of the Continental United States. These coins or, more properly, medals, were never given legal tender status, but many of the pieces did circulate in the Philippine economy before World War II. They are usually collected with the So-Called dollar series. The mintage was limited to 3,700 pieces in copper (HK-450), 2,200 examples in silver (HK-449), and five specimens struck in gold (HK-1031). The silver medals were sold for \$1 and the copper examples were offered at \$.50 per piece. The gold specimens were presented to VIP's, including President Woodrow Wilson. A number of unsold specimens were dumped into the Pacific Ocean in 1942, to prevent their seizure by Japanese invaders.

The design for the Wilson dollar was conceived by Clifford Hewitt, who installed much of the equipment in the Manila Mint. The obverse features a bust of President Wilson facing left with PRESIDENT OF THE UNITED STATES in an arc above. Beaded border. The reverse shows a kneeling figure of Justice, with scales in her upraised right hand, with a youth pouring planchets from a cornucopia into a coin press. TO COMMEMORATE THE OPENING OF THE MINT around, with MANILA P.I. and the date 1920 in an incused oval below. The dies were engraved by Chief Engraver George T. Morgan at the Philadelphia Mint. The engraver's initial M is evident behind the left foot of Justice.

The present coin seems to be a unique prototype for the Wilson dollar, struck in brass, before the engraver's initial was added to the die, reminiscent of the 1915 No S Panama-Pacific half dollar patterns. We have found no auction appearance or other listing for this piece in the literature. John Ray Sinnock, who would later serve as chief engraver and was the designer of the Roosevelt dime and Franklin half dollar, was assisting Morgan at the Mint, beginning in 1918. Although no specific evidence has come to light, it is possible that this piece was part of his collection, which was kept intact and only distributed many years later. Anthony Swiatek acquired this piece from Abe Kosoff in the 1970s.

This magnificent Premium Gem offers razor-sharp definition on all design elements, with impeccably preserved copper-red surfaces and strong matte-like luster on both sides. Heritage is privileged to present this possibly unique prototype, with its fascinating mysterious origin, high technical grade, and outstanding eye appeal, in its first public offering.

1900 Lesher Dollar, AU Details  
Rare Zerbe Type One, HK-787  
Serial No. 34

- 6654** 1900 Lesher Dollar, Zerbe Type One — Cleaning — Genuine PCGS. AU Details. Zerbe-1, HK-787, R.6. Joseph W. Lesher was a silver mine owner near Central, CO. The rare initial Lesher variety had no indication merchant, and was essentially a silver token that Lesher personally promised to redeem for \$1.25 upon request. 100 pieces were struck, each with a hand-engraved serial number on the reverse exergue. This example is #34. The tan-brown and gunmetal-gray surfaces are hairlined from cleaning. Listed on page 408 of the 2015 *Guide Book*.

**6655** No lot.

**6656** No lot.

Gold C. Smith Pony Express Medal  
Changing Horses, MS62

- 6657** (1947) 1935 Pony Express Diamond Jubilee, Gold, MS62 NGC. This C. Smith so-called half dollar variety that is scarce in silver, but decidedly rare in the present 10 karat gold alloy. The obverse depicts a vigilant armed rider on a galloping horse. The more placid reverse shows a relay station where the worn-out horse is exchanged for a rested stallion. Well struck, satiny, and faintly hairlined.

HARD TIMES TOKEN

1837 Feuchtwanger Three Cent, AU55  
New York Coat of Arms, HT-262

- 6658** 1837 Feuchtwanger Three Cent, Coat of Arms AU55 PCGS. Low-117, HT-262, R.3. Feuchtwanger's cent tokens are plentiful, but his various three cent varieties range from scarce to very rare. This smooth dove-gray example is nicely struck and shows scant evidence of wear. The die engraver attempted to enter the New York motto EXCELSIOR on the ribbon between Liberty and Justice, but ran out of room and had to omit the letter R. Listed on page 408 of the 2015 *Guide Book*.

**6659** No lot.

CONFEDERATE STATES OF AMERICA

- 6660** (1961) 1861 Confederate Cent, Bashlow Restrike, Lead, MS65 NGC. Breen-8015. According to Breen, only 50 pieces were struck in lead from the defaced dies, circa 1961 to 1962 at August Frank's in Philadelphia. The low mintage compares favorably to the 20,000 pieces that Bashlow issued in bronze. A satiny silver-gray example with exemplary surfaces given the broken and cancelled die state.
- 6661** (1961) 1861 Confederate Cent, Bashlow Restrike, Tin, MS66 NGC. Breen-8017. Tin is among the rarer alloy Bashlow restrike varieties. Although many thousands of bronze examples were issued, Walter Breen (1988) records a mintage in tin of only 50 pieces. The present pristine tin "cent" appears as made, and even retains a wafer-thin shelf of "extra metal" that crept into the collar of the reverse die during the strike, between 10:30 and 12 o'clock. The numeral 1 is incused on the edge at 6 o'clock.
- 6662** (1961) 1861 Confederate Cent, Bashlow Restrike, Red Fiber, MS65 NGC. Breen-8019. Breen reports a Bashlow mintage of just 50 pieces. Coin dealer Robert Bashlow acquired the cancelled and broken dies in 1961, and had the August C. Frank Co. produce transfer dies. The original dies were later presented by Bashlow to the Smithsonian. Bashlow restruck pieces in various alloys, chiefly bronze, goldline, and silver. This matte finish violet-red example is lightly struck but remains essentially as issued.

ALASKA TOKENS

- 6663** 1911 Parka Head, Alaska Gold One, MS66 NGC. HK-850, Gould-Bressett 171. Ex: Hart's Coins of the West. 10 stars, as usual. Hibler-Kappen and Gould-Bressett both list an 11 star, Head Left variety unknown to exist. This high-grade honey-gold representative is unabraded but has a few tiny field planchet flaws, near the nose and shoulder of the Eskimo. Listed on page 402 of the 2015 *Guide Book*.
- 6664** 1911 Parka Head, Alaska Gold 1/2, MS66 NGC. Gould-Bressett 176. Ex: Hart's Coins of the West. A splendid caramel-gold example. Evenly struck and essentially as made. A much better Hart type. The identity of M.E. Hart is unconfirmed, but suggested as Alaskan pioneer and businesswoman Mrs. Mary E. Hart. Listed on page 402 of the 2015 *Guide Book*.
- 6665** 1911 Parka Head, Alaska Gold 1/4, MS66 NGC. Gould-Bressett 177. Ex: Hart's Coins of the West. The Parka Head ranks among the scarcest types within the M.E. Hart series. According to Hibler-Kappen, "believed to have been dated 1911 to commemorate golden anniversary of earliest discovery of gold in Alaska by Eskimos." This prooflike sun-gold Premium Gem is pristine aside from a small spot on the reverse at 5 o'clock. Listed on page 402 of the 2015 *Guide Book*.

GOLD CHARMS

- 6666** 1914 Montana Gold 1/4, MS67 NGC. Ex: Hart's Coins of the West. An immaculate and fully struck butter-gold Superb Gem. The M.E. Hart series was sold by Farran Zerbe at the 1915 Panama-Pacific Exposition. Similar Idaho, Oregon, and Washington varieties were sold, also in 1/4, 1/2, and gold dollar sizes. Listed on page 402 of the 2015 *Guide Book*.
- 6667** 1914 Montana Gold 1/2, MS67 NGC. Ex: Hart's Coins of the West. A well struck and pristine Superb Gem. The field near the Indian is heavily clashed, as coined. The maker, likely a California jewelry firm, produced Idaho, Montana, Oregon, and Washington varieties in gold dollar size and its half and quarter fractions. Listed on page 402 of the 2015 *Guide Book*.

- 6668** 1914 Montana Gold One MS66 NGC. Ex: Hart's Coins of the West. A mark-free honey-gold Premium Gem. The obverse field is clashed near the Indian. Small mint-made strike-throughs are noted near the Y and between the ON in MONTANA. A high grade for the issue, typically encountered either impaired or in lesser Mint State grades. Listed on page 402 of the 2015 *Guide Book*.

## CALIFORNIA GOLD CHARMS

- 6669** 1915 Minerva, Bear, Round, California Gold 1/4, MS68 NGC. Ex: Hart's Coins of the West. A pristine example of the popular Western souvenir gold type. Perfect aside from minor incompleteness of strike on the opposing high points of the token, the bear's flank and the base of Minerva's helmet. Listed on page 402 of the 2015 *Guide Book*.
- 6670** "1849" Minerva, Bear, Round, California Gold One, MS67 NGC. Ex: Hart's Coins of the West. A flashy and technically flawless sun-gold Superb Gem. On page 402, the 2015 *Guide Book* lists the 1915-dated California Minerva octagonal dollar, but omits the rarer 1849 variety. 1849-dated half and quarter round Minerva varieties are also known, which suggests three-piece 1849 denomination sets were sold at the 1915 Panama-Pacific Exposition.

## GOLD CHARMS

### 'Coins of the Golden West' Copper-and-Glass Frame

- 6671** "Coins of the Golden West" Display Frame. A very rare frame for the 36-piece "Coins of the Golden West" set, marked by M.E. Hart & Co. of 560 Powell Street in San Francisco. The identity of M.E. Hart is unconfirmed, although research by William D. Hyder suggests it may be Mrs. Mary E. Hart, who worked at the 1915 Panama-Pacific Exposition with the Alaska delegation as an exhibitor. The frames were made by Shreve & Co. and are very similar to the well known frames that housed single or double complete sets of 1915-S Panama-Pacific commemoratives. The present frame measures 10 x 8 inches and remains virtually as issued nearly a century ago. Included with the lot is the copper frame, five purple satin ribbons listing the header and states associated with the varieties, the back with integral hanger and stack, and the glass and velvet inset where the 36 tokens until recently resided. The 36 tokens themselves are not included in the lot, but instead are offered as individual lots in the present FUN Signature auction. Listed on page 402 of the 2015 *Guide Book*.

## 20TH CENTURY TOKENS AND MEDALS

- 6672** I Will and Pioneer Family Medals From the Medallic Art Company, Rovelstad Plaster Model, Uncertified. This lot includes the following medals from the Medallic Art Company:

Two I WILL medals struck in silver, Pioneer Family reverse, proof (50 examples struck).

Two I Will medals struck in bronze, Pioneer Family reverse, Mint State (250 examples struck).

Three Pioneer Family medals, reverse verbiage, Mint State.

Accompanied by a 6 3/4 inch brown plaster model of the obverse of the Pioneer Family, signed by Trygve Rovelstad and several postcards and official documentation on the I Will monument in Chicago. (Total: 9 coins)

## GSA DOLLARS

### 1880/79-CC GSA Dollar, MS65+ Reverse of 1878, VAM-4

- 6673** 1880/79-CC Reverse of 1878, VAM-4, GSA, MS65+ NGC. A Top 100 Variety. The lower left obverse margin displays narrow bands of golden-brown, plum-red, and navy-blue, but this lustrous Carson City dollar is otherwise untoned. The strike is precise, and the obverse field and the reverse are well preserved. Grazes on Liberty's cheek and neck decide the grade. Without box or certificate. PCGS# 518922 Base PCGS# 407108

### 1881-CC GSA Dollar, MS66+ VAM-2, Doubled 88

- 6674** 1881-CC GSA MS66+ NGC. VAM-2. This lustrous high grade Carson City GSA dollar boasts a precise strike and an exceptionally smooth reverse. The cheek and left obverse field show only wispy contact. VAM-2 is noted for its substantial die fill within the upper loops of the 8s in the date. Only a trace of olive-gold toning denies full brilliance. Without box or certificate. PCGS# 518863 Base PCGS# 407126

- 6675 1881-CC GSA MS64+ Deep Mirror Prooflike NGC.** The design elements of this high-end Choice example are sharply detailed and richly frosted, providing intense cameo contrast with the deeply reflective prooflike fields. Brilliant aside from a blush of light charcoal toning on the lower reverse. The reverse is close to pristine and the obverse displays only minor marks. Without box or certificate. PCGS# 518865 Base PCGS# 497127

**1882-CC GSA Dollar  
MS66 Prooflike  
White and Flashy**

- 6676 1882-CC GSA MS66 Prooflike NGC.** A sharply struck Carson City GSA dollar with exceptionally flashy fields. Stone-white aside from wisps of tan toning on the field near the nose. The reverse and right obverse appear pristine, and the cheek displays only incidental contact. A minor vertical mark on the left obverse field determines the grade. Without box or certificate. PCGS# 518867 Base PCGS# 407135

**1883-CC GSA Dollar, MS67  
VAM-5A, Virtually Pristine**

- 6677 1883-CC GSA MS67 NGC. VAM-5A.** An interesting VAM with a clashed N, a die scratch on the right wing, a die gouge at the beak, a starburst effect at the right wingtip, and other minor die anomalies. A thoroughly lustrous and virtually immaculate Superb Gem that must have amazed its GSA auction winner decades ago. The borders display a trace of golden toning. Without box or certificate. PCGS# 518869 Base PCGS# 407144

**1884-CC GSA Dollar, MS67 ★  
Fully Patinated Obverse**

- 6678 1884-CC GSA MS67 ★ NGC.** Dramatic toning consumes the obverse. The right two-thirds of that side is deep blue-green, and the left margin is peach-gold, with a slender area of plum-red nestled between the two dominant shades. The reverse remains brilliant. Sharply struck and lustrous with an essentially unabraded reverse and obverse field. The portrait shows only wispy contact, nearly obscured by the colorful patina. Only a single 1884-CC dollar has been certified as MS68 by NGC, and that coin is outside of a GSA holder. No box or certificate accompanies the lot. PCGS# 518872 Base PCGS# 407152

**PROOF SET**

- 6679 1947 Double Mint Set Uncertified.** This double Mint Set includes 28 coins, two of each denomination issued by the three active mints in 1947 (San Francisco did not strike half dollars that year). The coins are in the original cardboard holders and the outer kraft envelope is present. The coins are lightly toned and well preserved. An impressive original set.

## INGOTS

### San Francisco Mint 5.67-Ounce Silver Ingot Type One Oval Hallmark

- 6680 San Francisco Mint Silver Ingot. 5.67 Ounces.** Type One oval hallmark and uses a medium-sized serif font, indicating a production period between the late 1930s to early 1940s. The oval hallmark is just slightly off the ingot on the left part of the oval and is weakly impressed at the top. The hallmark is followed by the ingot number 1392, which is in turn followed by 999.5 and finally FINE. The melt number on the bottom side appears to have been smoothed away. The weight is in the center of the back side: 5.67, OZS is stamped in upside-down and in unusually large letters (as usually seen on this type). Slight patina is seen overall. The ingot measures 31 mm x 50 mm x 8 mm. PCGS# 661000

### 24.87-Ounce San Francisco Silver Ingot Sheared Plate, Type Two

- 6681 San Francisco Mint Sheared Plate Silver Ingot. 24.87 Ounces.** Type Two oval hallmark with small sans-serif font. Sheared plate ingots such as this are believed to have been produced between 1952 and 1955. The hallmark is nicely placed in the center of the top side with the ingot number 210 below, followed by melt number 338. The bottom of the top side is more crowded with 24.87 OZS / 999.75 / FINE all contained within the lower third of that side. This larger-sized ingot measures 67mm x 95mm x 11mm. Light rose tinted patina is seen over each side. PCGS# 661000

## REDFIELD DOLLARS

- 6682 1892-CC MS65 Paramount (MS63 NGC). VAM-8A.** Ex: Redfield Collection. Light tan-gold toning visits the margins while the fields and motifs are brilliant. A lustrous Carson City Morgan with an especially smooth reverse. La Vere Redfield obtained many of his better date dollars from casinos. He played simple games such as baccarat, and demanded payment for his winnings in silver dollars.  
From *The Millford Collection, Part II*. NGC ID# 255M, PCGS# 7214

### 1893-CC Dollar, MS60 Red Paramount Holder Ex: La Vere Redfield

- 6683 1893-CC MS65 Paramount (MS60 NGC).** Ex: Redfield Collection. Narrow bands of rich tobacco-brown and lavender toning endow the borders. A lustrous and nicely struck example of this key Carson City issue. Moderate obverse marks determine the grade. An interesting V-shaped clash mark beneath Liberty's chin is from two separate clashes, with a die rotation between clashes.  
From *The Millford Collection, Part II*. NGC ID# 255S, PCGS# 7222

### 1896-S Redfield Dollar, MS63 Red Paramount Holder

- 6684 1896-S MS65 Paramount (MS63 NGC).** Ex: Redfield Collection. Freckles of golden-brown toning adorn the peripheries of this otherwise brilliant better date Morgan dollar. Lustrous and nicely struck with clean fields and scattered small facial marks. Despite a mintage of 5,000,000 pieces, the 1896-S is surprisingly scarce in AU and finer grades.  
From *The Millford Collection, Part II*. NGC ID# 2564, PCGS# 7244

*End of Session Five*

# SESSION SIX

## PATTERNS

1838 Half Dollar Pattern in Silver  
Judd-73 Restrike, PR64 Cameo

- 6685** 1838 Half Dollar, Judd-73 Restrike, Pollock-77, R.5, PR64 Cameo PCGS. The obverse depicts a draped bust of Liberty facing left with thirteen stars around the periphery and the date 1838 below. Liberty is wearing a diadem and the scroll over her hair is inscribed with LIBERTY. A flying eagle facing left dominates the reverse. The legend UNITED STATES OF AMERICA and the denomination HALF DOLLAR are around the periphery. Struck in silver with a reeded edge and medallion alignment of the dies. The high points are typically struck for this restrike issue, and a trio of spindly die cracks wander across the reverse. The lightly abraded fields offer medium golden-brown patina.

Ex: FUN Signature (Heritage, 1/2004), lot 8370. PCGS# 11288

1849 Three Cent Pattern, PR66  
Judd-112, Deeply Reflective, Nicely Toned

- 6686** 1849 Three Cent Silver, Judd-112, Pollock-126, Low R.7, PR66 NGC. The obverse die is of the Seated Liberty half dime, while the reverse bears the Roman numeral III with no other legends. A "coin without a country," allegedly struck in a 60:40 silver:copper alloy with a reeded edge. Save for a couple of unique and unusual pieces listed in Judd for 1840 and 1846, the 1849 three cent patterns in their several varieties are the first U.S. pattern coins struck since 1839—or, to put it more precisely, bearing a date after 1839. According to USPatterns.com, "Somewhere between one and two dozen are believed to exist." This is a deeply mirrored example with layers of pale blue and rose toning over each side.

From The A. James Evans Collection, Part II. PCGS# 11490

1850 Three Cent Silver Pattern, PR64  
Judd-125 Original

- 6687** 1850 Three Cent Silver, Judd-125 Original, Pollock-147, R.4, PR64 PCGS. CAC. A Liberty cap dominates the obverse, surrounded by rays. LIBERTY is near the cap base; the date 1850 appears below. On the reverse, UNITED STATES OF AMERICA frames a circular palm branch that encloses the Roman numeral III. Struck in silver with a plain edge. Deep copper-gold patina and generous luster appear throughout. There is a long, curving strikethrough, as made, through 85 in the date upward to the cap base. Population: 13 in 64 (1 in 64+), 1 finer (12/14).

From The A. James Evans Collection, Part II. PCGS# 11536

1852 Annular Gold Dollar in Copper-Nickel  
Judd-140, PR65+

- 6688** 1852 Gold Dollar, Judd-140, Pollock-167, Low R.7, PR65+ NGC. CAC. The simple obverse design consists of the legend USA above and 1852 below. The reverse features a circle of olive sprigs. Struck on an annular copper-nickel planchet with a plain edge. One of the more innovative proposed solutions to the problem of the small and easily lost gold dollar, though a thinner and expanded coin was chosen in the end. The surfaces are bright and unmellowed with the original copper-nickel color. PCGS# 11589

**1853 Cent in German Silver  
Judd-149, PR64**

- 6689** 1853 One Cent, Judd-149, Pollock-178, High R.6, PR64 PCGS. Ex: New Millennium Collection. The obverse is the same as that used to coin regular issue 1853 quarter eagles. The reverse shows the denomination ONE CENT within a laurel wreath. Struck in a German silver alloy with a reeded edge. A metallurgical analysis is necessary to determine the Judd variety for this type, since the copper-nickel and German silver alloys cannot be distinguished by color. The boldly defined specimen offered here has a thin veil of milky patina and a few trivial flyspecks on the obverse.  
Ex: FUN Signature (Heritage, 1/2004), lot 8377; Long Beach Signature (Heritage, 1/2004), lot 6000; ANA Signature (Heritage, 8/2004), lot 7877. PCGS# 11622

**1854 Cent Pattern, PR64 Brown  
Judd-160, Struck in Either Bronze or Copper**

- 6690** 1854 One Cent, Judd-160, Pollock-187, R.4, PR64 Brown NGC. These patterns were a part of the Mint's experiments with a smaller diameter cent. The design is similar to the contemporary large cent but omits the stars and shrinks the wreath. Struck in copper or bronze with a plain edge. The fields on this piece are remarkably bright and reflective for a copper pattern. The reverse fields show noticeable diagonal die striations. While labeled a Brown coin, there is a remarkable amount of subtle reddish-yellow underlying color present beneath the brown patina. PCGS# 11659

**1855 Large Flying Eagle Cent Pattern, PR63 Brown  
Judd-168 Original**

- 6691** 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR63 Brown PCGS. This Flying Eagle cent pattern features a hooked-neck eagle and slanting 5s on the obverse. The diameter is that of a large cent. The reverse is similar to the issued 1855 cent, displaying ONE CENT at the center, surrounded by a circular wreath bound by a ribbon. Struck in copper with a plain edge. Some glimpses of mint red appear near the rims on each side, but most of the surfaces are medium brown. Die clashing shows on the reverse, but there are few marks for the grade. A "great" addition to a Flying Eagle or large cent collection. PCGS# 11720

**1855 Flying Eagle Cent, PR65 Brown  
Judd-168, Popular 'Hooked-Neck' Eagle Design**

- 6692** 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR65 Brown NGC. A Flying Eagle cent pattern in a large format, featuring a hooked-neck eagle, slanting 5s on the obverse, and ONE CENT in the center of the reverse surrounded by a thick laurel wreath similar its counterpart on the large cent. Struck in copper with a plain edge. The fields are brightly mirrored and the resultant flash enlivens the brown and blue patina seen on each side. Fully struck on the obverse, slightly weak on the leaves of the reverse on the reverse. PCGS# 11720

**1855 Judd-168 Cent, PR65 Brown  
Flying Eagle, Quarter Diameter**

- 6693** 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR65 Brown PCGS. CAC. Eagle Eye Photo Seal, card not included. The crook-necked flying eagle on the obverse is similar to the design for the regular-issue Flying Eagle cent. The 5s in the date are slanted. ONE CENT is at the center reverse, inside a floral wreath similar to the large cent. The diameter is quarter-sized, nearly midway between the large and small cents. Struck from clashed dies in copper with a plain edge. This well struck Gem is smooth aside from a thin mark near star 11. The reverse is ocean-blue, and the obverse is variegated plum-red and powder-blue with orange-gold in protected areas. PCGS# 11720

**1855 Larger-Size Flying Eagle Cent  
Judd-171, Copper-Nickel Alloy, MS62**

- 6694** 1855 Flying Eagle Cent, Judd-171, Pollock-196, Low R.7, MS62 NGC. The obverse features an eagle flying to the left, surrounded by 13 stars with the date at the bottom. The reverse shows a wreath with four leaves under the E in STATES. Struck in copper-nickel alloy with a plain edge. The former NGC holder indicated this is Judd-171 (60% copper and 40% nickel), rather than Judd-171A, struck in German silver (75% copper, 12% nickel, 13% zinc). According to USPatterns.com and the Judd reference (tenth edition), it is thought that examples struck in German silver are originals and coins struck in bronze are restrikes, although some bronze coins may be originals. Like this piece, bronze restrikes should show evidence of clashed dies. The surfaces display beige-tan patina and a uniformly incomplete strike. PCGS# 11736

**1856 Half Cent, Gem Proof  
Judd-177, Copper-Nickel**

- 6695** 1856 Half Cent, Judd-177, Pollock-205, R.5, PR65 PCGS. Regular die trials striking for the half cent. Struck in copper-nickel with a plain edge. These pieces were an important metallurgical trial striking that tested the proposed alloy for the Flying Eagle cents struck later in this same year. One of only two pattern half cent varieties; the other is Judd-155. Blended apple-green and tan-brown toning blankets unabraded surfaces. Well struck except for the dentils. Certified in an old green label holder. Population: 5 in 65, 1 finer (11/14).  
*Ex: Orlando FUN Signature (Heritage, 1/2010), lot 3728, which realized \$4,600. PCGS# 11777*

**1856 Braided Hair Half Cent in Copper-Nickel  
Judd-177, Deeply Reflective PR65**

- 6696** 1856 Half Cent, Judd-177, Pollock-205, R.5, PR65 NGC. Regular dies for the Braided Hair half cent, struck in copper-nickel with a plain edge. These metallurgical trial strikes were produced in anticipation of the Flying Eagle small cents that began production the same year. This is a deeply reflective proof that retains almost complete "white" color of the copper-nickel alloy as minted. PCGS# 11777

**1858 Flying Eagle Cent Pattern  
Judd-193, With Ornamented Shield, PR61**

- 6697** 1858 Flying Eagle Cent, Judd-193, Pollock-236, Snow-PT11a, R.5, PR61 PCGS. The obverse is identical to the regular issue 1858 Small Letters cent. The reverse resembles the issued 1860 Indian cent reverse but the shield is broad and ornamented. Struck in copper-nickel with a plain edge. The fields show remarkably deep reflectivity on each side and there is a slight presence of reddish patina present. The grade is primarily from speckles of carbon that are scattered over each side. PCGS# 11844

**1858 Flying Eagle Cent, PR63  
Judd-202, Leaves in Clusters of Six**

- 6698** 1858 Flying Eagle Cent, Judd-202, Pollock-246, R.5, PR63 PCGS. The hook-necked eagle pattern obverse, usually attributed to Longacre, was paired with several reverses during the year. Judd-202 displays ONE CENT in a simple laurel wreath with clusters of either five (Pollock-245) or six (Pollock-246) leaves. Struck in copper-nickel with a plain edge. Significant red patina covers both sides with lilac in the center of the reverse. The fields are nicely mirrored and there is a slight speckling of carbon on each side (more so on the reverse). PCGS# 11867

**1858 'Hooked-Neck' Flying Eagle Cent  
Judd-203, PR63**

- 6699** 1858 Flying Eagle Cent, Judd-203, Pollock-247, R.5, PR63 PCGS. The obverse has a hooked-neck eagle flying left with tall wings. The reverse is similar to that of the issued 1860 cent but there is no shield at 12 o'clock. Struck in copper-nickel with a plain edge. The fields are heavily striated and show the expected depth of mirroring as a result. Honey-tan centers are surrounded by deeper reddish patina at the margins. PCGS# 11869

**1858 Flying Eagle Cent Pattern  
Judd-206, PR64**

- 6700** 1858 Flying Eagle Cent, Judd-206, Pollock-242, R.5, PR64 PCGS. Snow-PT16. Paquet's Small Eagle pattern obverse is paired with the regular issue Low Leaves reverse. Struck in copper-nickel with a plain edge. The surfaces are uniformly deep brown over both sides with the occasional tinge of blue. The depth of color has obscured much of the reflectivity in the mirrored fields. PCGS# 11877

**1859 Paquet-Designed Half Dollar, PR63  
Judd-235, Pollock-284 Variety**

- 6701** 1859 Half Dollar, Judd-235, Pollock-284, R.5, PR63 PCGS. CAC. Anthony Paquet's Liberty seated design. She faces left, and her hands support a fasces and shield. The reverse depicts an eagle and shield in the center with olive and arrows in the claws. The beak holds a ribbon inscribed E PLURIBUS UNUM. Around, the legend UNITED STATES OF AMERICA with the denomination HALF DOLLAR below. Struck in silver with a reeded edge. This Pollock variety shows three vertical lines in the shield and split wingtips on the reverse. Obviously cleaned at one time, the margins are beginning to take on a bit of light russet and blue patina.  
*Ex: FUN Signature (Heritage, 1/2007), lot 1254; FUN Signature (Heritage, 1/2008), lot 3564.*  
*From The A. James Evans Collection, Part II. PCGS# 11960*

**1859 Paquet Half Dollar, PR63 Brown  
Judd-236, Pollock-285 Variant**

- 6702** 1859 Half Dollar, Judd-236, Pollock-285, R.7, PR63 Brown PCGS. Anthony Paquet's design offers a seated Liberty facing left. She supports a fasces with her right hand and balances a shield in her left. The reverse features a large eagle with an olive branch and lengthy arrows in the claws. The "perfect ribbon" Pollock subvariety. Struck in copper with a reeded edge. This is the reverse variant with three vertical lines on the reverse shield and six tail feathers. The designs on each side are a bit softly struck, and the surfaces show even reddish-brown patina. PCGS# 11962

**1859 Longacre Half Dollar in Silver  
Judd-237, PR64**

- 6703** 1859 Half Dollar, Judd-237, Pollock-293, R.4, PR64 PCGS. A bust of Liberty faces right with laurel and vine in her hair. A ribbon below the bust is inscribed LIBERTY, with UNITED STATES OF AMERICA around, and the date 1859 below. The reverse displays the agricultural wreath of the Seated dime, resized to appropriate scale, around the denomination HALF DOLLAR. Struck in silver with a reeded edge. The fields are deeply reflective and there is slight contrast evident between the fields and devices. Most of each side is brilliant with occasional golden toning evident around the margins. PCGS# 11966

1859 Longacre Half Dollar in Silver  
Judd-239, PR64

- 6704** 1859 Half Dollar, Judd-239, Pollock-295, R.4, PR64 PCGS. CAC. The so-called "French Head" design for the half dollar that features a bust of Liberty facing right, draped with a ribbon inscribed LIBERTY with a wide wreath of oak and vine on her head. The reverse has 1/2 DOLLAR in the center and is surrounded by a wreath of cotton, tobacco, corn, sugar cane, wheat, and oak. Struck in silver with a reeded edge. We are uncertain where the term "French Head" came from. The design was obviously inspired by the Apollo Belvedere, a Neoclassical statue in Rome that was considered the ideal of Classical beauty. Much brightness and deep reflectivity is apparent with just a hint of light toning present. From The A. James Evans Collection, Part II. PCGS# 11972

1859 Paquet Half Dollar, PR64  
Very Rare Judd-247, Silver

- 6705** 1859 Half Dollar, Judd-247, Pollock-286, High R.7, PR64 PCGS. CAC. The Paquet Liberty Seated with Fasces obverse. Liberty is seated on a rock and supports an upright shield with one hand and fasces with the other. An olive branch and three arrowheads lie beneath the shield. Thirteen stars encircle the rim. The reverse features the Cereal Wreath design as issued on the Seated dime, but in larger format. The denomination is expressed as HALF DOLLAR at the center. Struck in silver with a reeded edge. This is the first appearance of Judd-247 in a Heritage auction since 1999. A beautifully toned specimen with rich peripheral bands of electric-blue, caramel-gold, and plum-red. Substantial frost on the motifs suggest that a Cameo designation may be in its eventual future. PCGS# 11994

1861 GOD OUR TRUST Half Dollar  
Judd-277, Pollock-326, PR65 Cameo

- 6706** 1861 Half Dollar, Judd-277, Pollock-326, R.7, PR65 Cameo NGC. The regular Seated Liberty half dollar design with the addition of a scroll over the eagle bearing the motto GOD OUR TRUST. The obverse die has the shield point over the right edge of the 1 in the date as described for Pollock-326. The other variant shows the shield point over the left edge of the 8 in the date. Struck in silver with a plain edge. The fields are deeply reflective and the brightly mirrored fields display thick mint frost, which resulted in a strong cameo contrast on each side. Pale russet patina is seen overall, but slightly deeper around the margins. PCGS# 535172 Base PCGS# 12100

1861 Copper GOD OUR TRUST Half  
Judd-278, PR63 Red and Brown

- 6707 1861 Half Dollar, Judd-278, Pollock-327, Low R.7, PR63 Red and Brown NGC. The design is similar to the regular issue Seated half dollar, but GOD OUR TRUST is placed within a scroll above the eagle. Struck in copper with a reeded edge. Pollock makes no mention of two date placements on the copper strikings of this design. But for those keeping score, the shield point is over the right side of the 1 in the date. USPatterns.com states "Full red copper examples are extremely rare." While this piece is not completely red, there is a significant presence. Just the slightest shadings off of red are noted. The fields are deeply reflective also. A couple of copper spots are seen in the exergue. PCGS# 12103

1861 Liberty Ten, PR64  
Judd-285, Gilt Copper  
Akers Gold Patterns Plate Coin

- 6708 1861 Ten Dollar, Judd-285, Pollock-340, High R.6, PR64 Gilt NGC. Similar in design to the issued Rounded Bun 1861 ten dollar piece, with the exception that a scroll is placed on the field above the eagle with the inscription GOD OUR TRUST. The usual high date Pollock variant. Struck in copper with a reeded edge and subsequently gilt. Fully struck and satiny with light vertical hairlines on the obverse field. A small spot is noted on the obverse rim at 11 o'clock. The present coin is plated on page 19 of David W. Akers *United States Gold Patterns* (1975), representing the uncollectible gold Judd-284 variety.  
Ex: Henry Weisblatt; ANA Sale (*Stack's*, 8/1976), lot 3682. PCGS# 60431

1861 Liberty Eagle Pattern, Judd-287  
GOD OUR TRUST, Struck in Copper

- 6709** 1861 Ten Dollar, Judd-287, Pollock-344, High R.6 — **Environmental Damage — Genuine NCS.** In our opinion, this proof coin has the details of an Uncirculated specimen that has environmental damage. The obverse exhibits a few blushes of moderate steel-blue verdigris. The reverse is unimpaired. Fully struck and unabraded with deep mahogany-brown patina, reminiscent of bronzed U.S. Mint medals of the era. The design is identical to the issued "Rounded Bun" subtype of the 1861 Liberty eagle, except the legend GOD OUR TRUST is placed sans scroll above the eagle. The high date Pollock variant of this desirable pattern. Struck in copper with a reeded edge. PCGS# 60433

1862 With Motto Half Dollar, PR64 Brown  
Judd-294, Beautiful Iridescence

- 6710** 1862 Half Dollar, Judd-294, Pollock-352, Low R.7, PR64 Brown PCGS. The design is similar to that used on regular issue 1862 Seated half dollars, except that a scroll with the motto GOD OUR TRUST is present above the eagle's head. Struck in copper with a reeded edge. Deep shades of iridescent patina cover each side of this visually interesting pattern. PCGS# 60444

1863 Two Cent, PR64 Red and Brown  
Washington Bust Right

- 6711** 1863 Two Cents, Judd-305, Pollock-370, R.4. PR64 Red and Brown PCGS. CAC. The popular Baker-37 variety with a Washington bust right beneath GOD AND OUR COUNTRY. The reverse is similar to the adopted design but the word CENTS is sharply curved. Struck in bronze with a plain edge. Mahogany-brown patina encroaches upon the remaining areas of honey-gold color. Boldly struck and nicely preserved. Housed in an old green label holder.  
Ex: FUN Signature (Heritage, 1/2004), lot 8409; FUN Signature (Heritage, 1/2007), lot 1279, which realized \$3,105. PCGS# 70460

1863 Judd-310 Washington Two Cent  
PR62, Copper-Nickel

- 6712** 1863 Two Cents, Judd-310, Pollock-375, Low R.7, PR62 NGC. The obverse features a bust of Washington (Baker-38B) facing right with the motto GOD AND OUR COUNTRY around and 1863 below. The reverse is the design adopted for regular-issue two cent coinage in 1864. Struck in copper-nickel with a plain edge. Violet shadings in a woodgrain pattern cross the central obverse, while the rest of this luminous but hairlined piece is orange-gold. A well struck specimen of this elusive Washington pattern.  
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4554. PCGS# 60465

1863 Postage Currency Ten Cent Pattern in Silver  
Judd-325, Bright PR63

- 6713** 1863 Ten Cents, Judd-325, Pollock-390, Low R.6, PR63 PCGS. CAC. The obverse depicts an ornamental shield with an inverted laurel wreath suspended from a ring. A pair of crossed arrows is behind the shield, with EXCHANGED FOR U.S. NOTES around the perimeter. The reverse has 10 CENTS 1863 in the center, with \* POSTAGE CURRENCY \* ACT JULY 1862 around. Struck in silver with a plain edge. The bright, uniformly reflective surfaces display a single toning spot on the obverse over the T in NOTES. An otherwise untuned, lightly hairlined example.  
Ex: FUN Signature (Heritage, 1/2001), lot 8539.  
From The A. James Evans Collection, Part II. PCGS# 60482

1864 No L Indian Cent Pattern, PR65  
Judd-353, Experimental Alloy Striking

- 6714** 1864 One Cent, Judd-353, Pollock-425, Low R.6, PR65 NGC. The design is the same as that of the regular issue 1864 No L Indian cent, struck in a copper-aluminum alloy with a plain edge. A number of experimental alloys were struck in 1864. This piece is presumably a copper-aluminum alloy in a 13 to 1 ratio (93% to 7%). These are traditionally described as having a golden color, but on this piece time has mellowed the color to a glossy olive-brown patina. Not quite fully struck on the tips of the feathers of the headdress. Ex: *Central States Signature* (Heritage, 5/2005), lot 8306; *ANA Signature* (Heritage, 7/2005), lot 7254. PCGS# 60520

*James Barton Longacre*

1864 With L Indian Cent, PR61  
Judd-358, Copper-Nickel

- 6715** 1864 With L Indian Cent, Judd-358, Pollock-429, High R.7, PR61 NGC. Struck from regular issue 1864 With L Indian cent plain edge dies, but in copper-nickel instead of bronze. An extremely rare obsolete alloy version of the coveted proof 1864 With L bronze cent. The present well struck specimen is toned walnut-brown with hints of lighter tan-gold in protected areas. No marks are evident but a few small russet spots are scattered, mostly near the shield. We are aware of only five Judd-358 specimens:
1. The present coin.
  2. J.H. Judd; Bowers & Ruddy Rare Coin Review #21-25 and 28, 1974-1976; Dr. Edward B. Willing Collection (Bowers and Ruddy, 6/1976), lot 1388; Heathgate Collection (Ira & Larry Goldberg, 2/2001), lot 1091. PCGS PR64.
  3. Grand Central Sale (Paramount, 11/1974), lot 353; Burnheimer Sale (Paramount, 5/1976), lot 1199; Cincinnati Sale (Stack's, 6/1977), lot 379; Kagin's; Dr. Stanley Spurgeon. PCGS PR64.
  4. Tad Collection (Stack's, 2/1976), lot 211; Greater New York Sale (Stack's, 5/1984), lot 686; "Bud" Szurek. PR40 SEGS.
  5. PR60 PCGS. Listed in the 12/2014 PCGS Population Report. PCGS# 60527

**1864 Seated Quarter, PR67  
IN GOD WE TRUST, Judd-386**

- 6716** 1864 Seated Quarter, Judd-386, Pollock-454, Low R.7, PR67 NGC. Ex: Eric P. Newman Collection. The obverse is a regular dies trial striking, while the reverse has the motto IN GOD WE TRUST above the eagle as adopted in 1866. Struck in silver with a reeded edge. The so-called transitional patterns of 1864, quarter (Judd-386), half dollar (Judd-391), and silver dollar (Judd-396), purportedly bridge the gap between the earlier No Motto coins and the Motto design officially adopted in 1866. According to USPatterns.com, the coins were actually produced for sale to collectors in sets, circa 1869. Approximately a dozen sets were struck in silver and another dozen in copper. Two or three sets were produced in aluminum and at least one in nickel. NGC has certified only two Judd-386 specimens, with the present coin as the single finest (11/14).

The design elements are sharply impressed on this exceptional Superb Gem, and the flawless surfaces are patinated in deep shades of cobalt-blue and lavender-gray. PCGS# 60557

**1865 Seated Dollar in Copper, PR55  
Judd-437 No Motto Dies**

- 6717** 1865 Dollar, Judd-437, Pollock-510, High R.7, PR55 PCGS. CAC. Both sides feature the same die design that was used on regular issue 1865 (No Motto) Seated dollars, and as such is scarcer than the retro-dated With Motto pieces made of this date. Struck in copper with a reeded edge. This well-struck deep golden-brown specimen exhibits slight wear on Liberty's legs. The fields have scattered tiny abrasions in addition to a couple of faded thin marks on the upper reverse. Population: 1 in 55, 2 finer (12/14).  
Ex: *New York Connoisseur's Collection* (*American Numismatic Rarities*, 3/2006), lot 1341; *Long Beach Signature* (*Heritage*, 9/2008), lot 3434. PCGS# 60622

**1865 Ten Dollar Pattern in Copper  
Judd-450, PR65 Red and Brown**

- 6718** 1865 Ten Dollar, Judd-450, Pollock-522, High R.6, PR65 Red and Brown PCGS. This transitional eagle shows the normal obverse and IN GOD WE TRUST on the reverse above the eagle. Struck in copper with a reeded edge. The design was adopted for use in 1866. USPatterns.com notes that over a dozen examples are known. The original mint red has only mellowed slightly and evenly over each side. PCGS# 70637

**1866 Washington Five Cent Pattern  
Judd-473, PR64**

- 6719** 1866 Five Cents, Judd-473, Pollock-564, Low R.6, PR64 PCGS. CAC. George Washington appeared on numerous privately minted Early American tokens, but did not appear on U.S. Mint coins prior to the 1866 five cent patterns. The obverse depicts a bust of Washington facing right and has the legend IN GOD WE TRUST. The obverse is muled with the proof Shield nickel reverse with the centering dot plainly evident. Struck in nickel with a plain edge. Each side has uniformly toned medium gray with little reflectivity remaining in the fields.  
From *The A. James Evans Collection, Part II*. PCGS# 60669

**1866 'Dutch 5' Five Cent Pattern  
PR66 ★ Brown Cameo**

- 6720** 1866 Shield Five Cents, Judd-491, Pollock-578, Low R.7, PR66 ★ Brown Cameo NGC. Five-cent pattern with an obverse similar to the adopted Shield nickel design, but the reverse features a "Dutch" numeral 5 inside a laurel wreath. The date is divided in two by the ball of the date. Struck in copper or bronze with a plain edge. Beautiful iridescent blue and brown surfaces. The strong underlying mirrors in the fields set up the background for the frosted devices. PCGS# 60687

**1867 Longacre Five Cent in Aluminum, PR66  
Judd-561, Bright and Problem-Free**

- 6721 1867 Five Cents, Judd-561, Pollock-622, R.5, PR66 PCGS. CAC.** A Longacre design that shows Liberty facing left with four feathers and four stars in the headdress, the date below, UNITED STATES OF AMERICA above, and his name immodestly engraved beneath the portrait. The reverse has a large, ornate shield with a large Roman numeral V over it, the motto above. It is believed that 100 of these were struck, according to J. Colvin Randall. Liberty's profile greatly resembles Longacre's contemporary Indian cent, gold dollar, and three dollar designs. The stars are boldly recut. Struck in aluminum with a plain edge. The surfaces are bright and show no signs of oxidation. Noticeable horizontal die striations are seen on each side, which created the depth of mirroring in the fields. From The A. James Evans Collection, Part II. PCGS# 60771

**1867 Liberty Nickel, PR65 Cameo  
Judd-561, Struck in Aluminum**

- 6722 1867 Five Cents, Judd-561, Pollock-622, R.5, PR65 Cameo PCGS. CAC.** The central obverse device is a head of Liberty facing left, wearing a headdress of four large feathers and a ribbon with the inscription UNION AND LIBERTY. Resting in the hair in front of the ribbon are four large stars. The chief engraver's name LONGACRE F. is stylishly displayed at the truncation of the neck. The legend UNITED STATES OF AMERICA around, with the date in the exergue. The reverse features a Roman numeral V over an ornate shield, with IN GOD WE TRUST at the top. Struck in aluminum with a plain edge. Streaks of light tan toning cross well struck, reflective, and minimally marked surfaces. Cameo frost is readily apparent. PCGS# 860771 Base PCGS# 60771

**1868 Judd-608 Cent, PR66 Cameo**

- 6723 1868 Cent, Judd-608, Pollock-673, R.4, PR66 Cameo NGC. CAC.** The design closely resembles the contemporary three cent nickel, but only a single pillar represents the denomination within the wreath, and the ribbon ends are more prominent. Pollock Variety 2 with the 1 in the date centered over a dentil. Struck in nickel with a plain edge. A nicely struck specimen with a cream-gray obverse and butter-gold toning on the reverse. A lens reveals a few pinpoint flecks and hairlines. PCGS# 80820

**1868 'Nickel Half Dime,' Judd-638, PR67**

- 6724 1868 Half Dime, Judd-638, Pollock-710, R.6, PR67 NGC.** Regular die trials striking of the 1868 half dime, but struck in nickel alloy with a plain edge. Most likely struck by the Mint for sale to collectors of off-metal "trials." These were struck in copper, nickel, and aluminum, of which the last are the rarest. Extensive die clashing appears on each side of this Superb Gem proof, and much cameo contrast shows on the reverse. A few contact marks and hairlines appear on each side. Census: 3 in 67, 0 finer (12/14). PCGS# 60856

**1868 Ten Cent Pattern in Aluminum, PR65  
Bright Judd-649 Example**

- 6725 1868 Ten Cents, Judd-649, Pollock-722, Low R.7, PR65 NGC. Ex: Exemplar Collection.** The regular-issue Seated dime dies of 1868 were used to strike this piece in aluminum with a reeded edge. These were struck during an era when aluminum was being touted as a replacement coinage metal, although these pieces were struck for sale to collectors. The bright grayish-white surfaces show good eye appeal for the grade, despite some minor field hairlines. PCGS# 60867

**1869 Nickel Pattern, PR63  
Judd-684, Star on Coronet**

- 6726** 1869 Five Cents, Judd-684, Pollock-763, R.5, PR63 PCGS. CAC. Reminiscent of the contemporary three cent nickel, but Liberty's coronet has a star, the Roman numeral V replaces the Roman III, and a Maltese cross and a scroll bearing the motto close the reverse wreath. Struck in nickel with a plain edge. Light honey-gold toning adorns this nicely struck and satiny specimen. Tiny carbon flecks are near the F in OF and the left ribbon end. Certified in a green label holder.  
*From The Millford Collection, Part II. PCGS# 60909*

**1869 Five Cent Pattern in Nickel  
Judd-684, Brilliant PR65 Cameo**

- 6727** 1869 Five Cents, Judd-684, Pollock-763, R.5, PR65 Cameo PCGS. CAC. Similar to the contemporary three cent nickel, but the Roman numeral V replaces the Roman III, and a Maltese cross and a scroll bearing the motto close the upper wreath on the reverse. Struck in nickel with a plain edge. These five cent patterns were issued in three-coin sets accompanying the diminutive cent pattern with a similar obverse design, Judd-666, and the similarly designed three cent piece, Judd-676. This five cent design is also known in copper, but is much scarcer. This is a brilliant example with nice mirroring in the fields that establishes a background for the frosted devices that give the coin its Cameo designation. PCGS# 388945 Base PCGS# 60909

**1869 Five Cent, PR66 Cameo  
Judd-684, Longacre Liberty Head**

- 6728** 1869 Five Cent, Judd-684, Pollock-763, R.5, PR66 Cameo NGC. The obverse design is similar to the adopted three cent nickel with the only change being a star added to Liberty's coronet. The reverse features a large Roman numeral V encompassed by a laurel wreath. At the top of the wreath are the letters IN GOD WE TRUST on a scroll, and a Maltese cross resting squarely at the top of the design. Struck in nickel with a plain edge. A nicely struck, brilliant, and blatantly mirrored specimen whose glassy fields appear free from hairlines. PCGS# 388945 Base PCGS# 60909

**1869 Standard Silver Ten Cent, PR63  
Judd-696, First Generation Holder**

- 6729** 1869 Standard Silver Ten Cents, Judd-696, Pollock-775, R.5, PR63 PCGS. CAC. Liberty head faces right and wears a Phrygian cap with three large stars. The reverse, the only Standard Silver dime die of the year, reads STANDARD SILVER around the upper edge, with 10 CENTS inside a wreath of oak and laurel. Struck in silver with a reeded edge. Crisply struck and flashy with only a whisper of golden toning. Conservatively assessed by PCGS, and housed in a first generation holder.  
*From The Millford Collection, Part II. PCGS# 60921*

**1869 Standard Silver Dime, PR65  
Judd-709, Brightly Mirrored Fields**

- 6730** 1869 Standard Silver Ten Cents, Judd-709, Pollock-788, High R.6, PR65 NGC. This Standard Silver design variety has only one star at the front of Liberty's head on the obverse. The reverse has 10 CENTS in the center, crowded by a wreath of oak and laurel, with STANDARD SILVER 1869 around the margin. Struck in silver with a plain edge. Bright mirroring in the fields shines through the irregular rose and cobalt-blue toning scattered about each side. The obverse is fully brought up, but several features on the wreath on the reverse show softness, undoubtedly from incomplete filling of the die from die opposition. PCGS# 60934

**1869 Standard Silver Half**  
Judd-748, PR63

- 6731** 1869 Standard Silver Half Dollar, Judd-748, Pollock-831, R.5, PR63 PCGS. Standard Silver design with a bust of Liberty facing right on the obverse. Liberty is wearing a diadem inscribed LIBERTY, the legend is around the border, and the motto IN GOD WE TRUST is on a scroll at the bottom. The reverse exhibits the denomination 50 CENTS within a wreath of oak and laurel. STANDARD SILVER is at the periphery, the date 1869 is below the wreath. Struck in silver with a reeded edge. The fields display remarkable depth of mirrored reflectivity with significant frosted contrast against the devices. Each side is essentially brilliant with just the faintest tinge of golden patina evident. PCGS# 60977

**1869 Standard Silver Half in Copper**  
Judd-756, PR65 Brown

- 6732** 1869 Standard Silver Half Dollar, Judd-756, Pollock-840, Low R.7, PR65 Brown PCGS. CAC. Standard Silver design for the half dollar with Liberty wearing a ribbon inscribed LIBERTY on the obverse. The ribbon is ornamented with a star, the legend UNITED STATES OF AMERICA is around the periphery, and the motto IN GOD WE TRUST is on a scroll below. On the reverse, the denomination 50 CENTS is positioned within a wreath of oak and laurel. STANDARD SILVER is above, the date, 1869, is below. Struck in copper with a reeded edge. This is a magnificent Standard Silver pattern whose surfaces go far beyond what would be expected from a Brown coin. Much blue is seen over each side intermixed with reddish-brown patina, and the entire color scheme is further enhanced by the bright mirrors in the fields. PCGS# 60986

**1869 Aluminum Seated Dollar, Gem Proof**  
Judd-764, Unacknowledged Cameo Contrast

- 6733** 1869 Dollar, Judd-764, Pollock-849, Low R.7, PR65 PCGS. Regular issue design for the Seated Liberty dollar, struck in aluminum with a reeded edge. The 1869 aluminum patterns of all denominations were almost certainly struck for sale to collectors, although they have been called dies trial pieces in the past. They were sold in cased sets, at least two of which survive intact. The other sets have long since been broken up. About half a dozen examples of Judd-764 still exist, per USPatterns.com. The splendid, bright, unoxidized surfaces of this piece have undoubtedly remained that way because the coin was lacquered at one time (as seen by the pale iridescence on each side). While the insert does not specify the coin is a Cameo, there certainly is strong field-device contrast on each side. The strike is slightly soft in the centers.  
Ex: FUN Signature (Heritage, 1/2011), lot 5355; Central States Signature (Heritage, 4/2011), lot 5565. PCGS# 60995

**1870 Half Dime, PR65 Cameo  
Judd-819, Struck in Aluminum**

- 6734** 1870 Half Dime, Judd-819, Pollock-909, High R.7, PR65 Cameo PCGS. CAC. Ex: Denali Collection. A seated Liberty faces left while supporting a shield with a scroll inscribed with LIBERTY on her right side and holding an olive branch in her left hand. A Phrygian cap and pole are suspended in the background. UNITED STATES / OF AMERICA occupies the periphery with the date, 1870, in exergue. A regular 1870 half dime reverse die was used to strike the Judd-815 through Judd-820 patterns. HALF DIME is enclosed within a wreath of corn, wheat, oak, and maple, tied with a bow at the bottom. Struck in aluminum with a reeded edge. The surfaces are bright and show no traces of oxidation. The devices are thickly frosted against the deeply reflective fields. An interesting lintmark (as coined) is located in the left obverse field. Ex: *Chicago Signature (Heritage, 8/2011)*, lot 5262, which realized \$11,500. PCGS# 800058 Base PCGS# 61063

**1870 Seated Half Dime, PR65 Cameo  
Judd-823, Struck in Aluminum**

- 6735** 1870 Seated Half Dime, Judd-823, Pollock-913, R.8, PR65 Cameo PCGS. CAC. Ex: Denali Collection. The regular dies for the 1870 half dime, struck in aluminum with a reeded edge. One of the many so-called "die trials" of the time struck in atypical, sometimes exotic metals for sale to collectors, the Judd-823 is extremely rare with only two or three known, according to USPatterns.com. The present untuned specimen has mirrored fields and exhibits noticeable white-on-black contrast. The obverse displays striated die lines, as made, but there are no marks. PCGS# 800060 Base PCGS# 61067

**1870 Standard Silver Ten Cent, PR66  
Judd-826, Silver, Plain Edge  
Ex: Eric P. Newman**

- 6736** 1870 Standard Silver Ten Cents, Judd-826, Pollock-916, R.7, PR66 NGC. CAC. Ex: Eric P. Newman Collection. William Barber's Liberty Seated design. A seated representation of Liberty faces left. Behind is a free-standing pole topped with a Liberty cap. Liberty's right hand rests upon a shield with a scroll inscribed LIBERTY. The statutory legend follows the border, and the date is below. The reverse has the denomination, 10 CENTS, inside a wreath composed of corn and cotton. Above is the word STANDARD. The reverse rim is much wider than the obverse rim. Struck in silver with a plain edge. Rich lavender and forest-green toning consumes the obverse and fills the reverse periphery. The central reverse is predominantly golden-brown. Well struck and undisturbed. PCGS# 61070

**1870 William Barber-Designed Quarter  
Judd-882, Beautifully Toned PR64**

- 6737** 1870 Quarter Dollar, Judd-882, Pollock-980, High R.7, PR64 PCGS. A regular issue Seated quarter reverse is paired with a pattern obverse. A William Barber rendition of the Seated Liberty motif with a large rectangular shield, a banner inscribed Liberty, and a Liberty pole behind Liberty's legs and left (facing) arm. Struck in silver with a reeded edge. Beautifully toned with rose-colored centers that are surrounded by rich rings of iridescence at the margins. PCGS# 61126

1870 Standard Silver Quarter in Silver  
Judd-888, Nicely Toned PR65

- 6738** 1870 Standard Silver Quarter Dollar, Judd-888, Pollock-987, R.5, PR65 NGC. CAC. A bust of Liberty wearing a cap ornamented with three stars faces right, the legend UNITED STATES OF AMERICA surrounds the figure, and a scroll with IN GOD WE TRUST is below. The reverse reads 25 CENTS 1870 in the center and is surrounded by a wreath of cotton and corn. Struck in silver with a reeded edge. Deep rose, blue, and pale yellow toning is seen in concentric circles on each side with strong underlying mirrors in the fields. PCGS# 61132

1870 Standard Silver Quarter, PR64  
Judd-894, Silver, Reeded Edge

- 6739** 1870 Standard Silver Quarter Dollar, Judd-894, Pollock-1001, R.5, PR64 NGC. Standard Silver design with a bust of Liberty facing right on the obverse. Liberty wears a ribbon inscribed LIBERTY, the legend UNITED STATES OF AMERICA is at the periphery, the motto IN GOD WE TRUST is on a scroll below. The reverse depicts the denomination 25 CENTS and the date 1870 within a wreath of corn and cotton. The word STANDARD is at the top. Struck in silver with a reeded edge. This well struck and undisturbed specimen exhibits medium to deep sea-green and slate-gray toning. The surfaces are satiny and devoid of evident detractors. PCGS# 61138

1870 Standard Silver Quarter  
PR65 Cameo, Judd-895  
Rare Silver, Plain Edge Variety

- 6740** 1870 Standard Silver Quarter Dollar, Judd-895, Pollock-1002, Low R.7, PR65 Cameo PCGS. The Liberty Head obverse, with no star on the tiara. IN GOD WE TRUST is on a scroll below the portrait. On the reverse an open agricultural wreath encloses 25 CENTS, date 1870 below. STANDARD is at the upper rim. Struck in silver with a plain edge. A prominently mirrored Gem that boasts a crisp strike, light almond-gold toning, and noticeable cameo contrast. The eye appeal surpasses the numerical grade. The design is comparatively plentiful in silver with a reeded edge, but the plain edge silver variant is highly elusive. From The A. James Evans Collection, Part II. PCGS# 800062 Base PCGS# 61139

1870 Seated Liberty Half, PR65 Brown  
Judd-935, William Barber Design

- 6741** 1870 Half Dollar, Judd-935, Pollock-1041, High R.6, PR65 Brown PCGS. A seated figure of Liberty faces left on the obverse with 13 stars surrounding. The date is below, a free-standing liberty pole is behind, and LIBERTY is inscribed on a scroll crossing a small shield. The reverse is the same type that was used to coin regular issue Motto Seated halves. Struck in copper with a reeded edge. The fields are deeply reflective and each side displays rich shades of blue patina. Fully struck throughout. PCGS# 61181

1870 Standard Silver Half Dollar, PR65  
Judd-952, Beautifully Toned

- 6742 1870 Standard Silver Half Dollar, Judd-952, Pollock-1095, Low R.7, PR65 PCGS. CAC. The obverse shows a bust right of Liberty. She wears a diadem inscribed LIBERTY, with the hair tied in a bun. The peripheral legends include UNITED STATES OF AMERICA and IN GOD WE TRUST, the latter within a scroll. The reverse displays 50 CENTS and the date 1870 within a wreath of cotton and corn. STANDARD is centered on the upper border. Struck in silver with a plain edge. The surfaces are beautifully toned in shades of golden and lilac with bright underlying mirrors in the fields. PCGS# 61198

1870 Standard Silver Half Dollar  
Judd-957, PR64

- 6743 1870 Standard Silver Half Dollar, Judd-957, Pollock-1108, R.5, PR64 PCGS. Ex: New Millennium Collection. A bust of Liberty faces right and is surrounded by UNITED STATES OF AMERICA. The figure of Liberty wears a headband inscribed LIBERTY, and the front of the headband has a large star. IN GOD WE TRUST is below on a banner. The reverse features 50/ CENTS / 1870 within a wreath of cotton and corn. STANDARD is centered above the wreath. Struck in silver with a reeded edge. Although the B in LIBERTY is not fully brought up, the strike is generally crisp. The richly toned golden-brown and mauve fields are moderately reflective and nicely preserved.  
Ex: November Signature (Heritage, 11/2003), lot 11150. PCGS# 61203

1870 Standard Silver Half Dollar  
Very Rare Judd-972  
PR64 Red and Brown

- 6744 1870 Standard Silver Half Dollar, Judd-972, Pollock-1083, High R.7, PR64 Red and Brown NGC. Ex: Simpson. The starred Liberty cap obverse is surrounded by UNITED STATES OF AMERICA and a scroll below with E PLURIBUS UNUM. The reverse has 50 CENTS in the center and is encircled by a wreath, which is in turn encircled with STANDARD SILVER 1869. Struck in copper with a plain edge. For a Standard Silver pattern this is a remarkably rare Judd variety. Only a single prior example, graded NGC PR62 Brown, appears in our online auction archives. This is a splendidly toned specimen draped in cherry-red, lime-green, and sun-gold shades. Fully struck, satiny, and unabraded with a few minor and unimportant obverse spots.  
Ex: Jascha Heifetz Collection (Superior, 10/1989), lot 3266; Baltimore Sale (Stack's-Bowers, 3/2012), lot 7177. PCGS# 71218

1870 Standard Silver Half in Copper  
Judd-989, PR64 Brown

- 6745 1870 Standard Silver Half Dollar, Judd-989, Pollock-1118, Low R.7, PR64 Brown ANACS. Standard Silver design with Liberty facing right wearing a headband with a star, a scroll below, and UNITED STATES OF AMERICA above. The reverse has 50 CENTS in the center and is surrounded by a wreath of oak and laurel with 1870 below and STANDARD SILVER above. This design is similar to that used in 1869. Struck in copper with a reeded edge. Significant deep brown and light blue and rose patina covers each side, yet the underlying mirrors still flash strongly when the piece is angled just right beneath a light. PCGS# 61235

**1871 Shield Nickel in Copper  
Judd-1056, PR67 Red and Brown**

- 6746** 1871 Five Cents, Judd-1056, Pollock-1191, R.8, PR67 Red and Brown NGC. Regular dies trial for the 1871 Shield nickel, struck in copper with a plain edge. According to USPatterns.com, "Although described as a regular dies trial piece, these were actually struck for sale to collectors as part of complete sets." Undoubtedly that is the case, but it must be noted that there were precious few complete sets that could have been assembled of this date. The Shield nickel is obviously a weak link as only half a dozen copper strikings are believed known, fewer than three in aluminum, and a single piece allegedly produced in steel. Much original mint red surrounds the devices with the fields deep blue-brown. Fully struck. PCGS# 71315

**1871 Standard Silver Dime in Copper  
Judd-1075, PR67 Red and Brown**

- 6747** 1871 Standard Silver Ten Cents, Judd-1075, Pollock-1211, R.7, PR67 Red and Brown NGC. Longacre's popular Seated Liberty motif with conjoined flags behind and Liberty's hand resting on a globe. The reverse has 10 CENTS in the center and is surrounded by a wreath of cotton and corn, the word STANDARD at the top of that side. Struck in copper with a reeded edge. Lovely iridescent orange-red, apple-green, and navy-blue colors decorate this magnificent Superb Gem. Well struck aside from the center of the globe and the right half of the 0 in the denomination, which is directly opposite. A wispy lintmark (as made) above the left half of the 0 provides a pedigree marker. This is the finest example of Judd-1075 presently certified by NGC (11/14).  
Ex: Central States Signature (Heritage, 5/2004), lot 10631. PCGS# 71334

**1871 Standard Silver Quarter  
PR66 Red and Brown  
Judd-1097, Struck in Copper**

- 6748** 1871 Standard Silver Quarter Dollar, Judd-1097, Pollock-1233, High R.6, PR66 Red and Brown NGC. Liberty is seated facing left on the obverse with the date 1871 below and 13 stars arranged around the border. The reverse depicts the denomination 25 CENTS within a wreath of cotton and corn. The word STANDARD is at the top rim. Struck in copper with a reeded edge. An undisturbed Premium Gem whose field reflectivity is unaffected by the multicolored, autumn leaves toning seen over each side. The strike is full despite the inordinately high relief of the globe.  
Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 2743. PCGS# 71356

1871 Seated Quarter, PR65 Brown  
Judd-1102, Struck in Copper

- 6749** 1871 Quarter Dollar, Judd-1102, Pollock-1238, High R.7, PR65 Brown NGC. The regular dies issue of 1871, but struck in copper with a reeded edge. Examples of other silver and gold denominations struck in copper are known for this year with similar rarity, which suggests that sets were purposely made. The golden-brown surfaces show an occasional hint of steel-blue on each side. Sharply defined throughout, and the fields are moderately reflective.  
*Ex:* FUN Signature (Heritage, 1/2005), lot 10483; Baltimore Signature (Heritage, 3/2009), lot 2481, which realized \$4,312.50. PCGS# 61361

1871 Standard Silver Half, PR64  
Judd-1105, R.7, Half-Dozen Known

- 6750** 1871 Standard Silver Half Dollar, Judd-1105, Pollock-1241, R.7, PR64 NGC. A seated Liberty faces right on the obverse, wearing an Indian headdress and clutching a Liberty pole in her right hand. Her left hand rests on a globe with a ribbon inscribed LIBERTY. The date 1871 is below, and there are no stars or legends at the obverse rim. On the reverse, the denomination 50 CENTS appears within a wreath of cotton and corn with STANDARD above. This piece is a good color match for the Judd-1220 1872 Trade dollar silver pattern with Indian Princess obverse and Trade dollar reverse offered elsewhere in this auction. Light champagne patina deepens to amber around portions of the margins on each side. A few light field hairlines account for the grade but are undistracting. NGC and PCGS each show one submission in PR64, and there is one PR65 finer at NGC (10/14). About a half-dozen examples survive of this pattern.  
*Ex:* Rarities Sale (Bowers and Merena, 8/1998), lot 2071.  
From The A. James Evans Collection, Part II. PCGS# 61364

**1873 Seated Half Dime, PR66 Cameo  
Judd-1267, Struck in Aluminum**

- 6751** 1873 Seated Half Dime, Judd-1267, Pollock-1409, R.8, PR66 Cameo PCGS. CAC. Coined from regular issue reeded edge dies, but in aluminum instead of silver. Judd-1267 was included as part of a few complete off-metal 1873 proof sets, perhaps made for presentation purposes, but more likely for unrecorded sale to well-connected dealers and collectors. Judd-1267 was also the last of its kind, since the denomination was omitted from the “Crime of 1873” legislation. The present silver-gray specimen exhibits obvious cameo contrast and an intricate strike. The fields are essentially free from hairlines, although evaluation beneath a loupe reveals infrequent microscopic carbon. As of (11/14), PCGS has certified a scant two examples in all grades. PCGS# 861552 Base PCGS# 61552

**1873 Trade Dollar Pattern in Silver  
Judd-1293, Brilliant PR63 Cameo**

- 6752** 1873 Trade Dollar, Judd-1293, Pollock-1435, R.4, PR63 Cameo NGC. The design is similar to the issued Trade dollar, but Liberty’s left hand rests on a globe, right hand holds a staff, and plow handles are behind the globe. On the reverse, the banner bearing E PLURIBUS UNUM is clutched by the eagle’s beak, which also clutches a Federal shield in place of the usual olive branch. Struck in silver with a reeded edge. The surfaces are lightly hairlined and brilliant throughout. The fields are predictably deep in their reflectivity and establish a “black” background for the white mint frost that covers the devices. PCGS# 388989 Base PCGS# 61578

**1873 Trade Dollar Pattern in Silver  
Judd-1322, PR64**

- 6753** 1873 Trade Dollar, Judd-1322, Pollock-1465, R.4, PR64 PCGS. The obverse is similar to the adopted design, but with a longer base on the rock that extends to the right (facing) rim behind Liberty. The reverse shows a small eagle high in the field, with spread wings and holding a ribbon that is nearly a closed loop in its beak. Struck in silver with a reeded edge. These patterns were struck in silver, copper, aluminum, and white metal. The six-piece sets in silver, with plain and reeded edges, were sold by the Mint for \$30. The fields are moderately reflective and the centers display rose-gray patina that darkens slightly around the margins. PCGS# 61608

**1875 'Sailor Head' Twenty Cent Pattern in Nickel  
Judd-1395, PR64 Cameo**

- 6754** 1875 Sailor Head Twenty Cents, Judd-1395, Pollock-1538, High R.7, PR64 Cameo PCGS. CAC. The popular Sailor Head design of William Barber, here on a pattern for a twenty cent piece. The reverse has a "spade-type" shield with 20 incuse, rays above the shield, two arrows, and an olive branch at the lower shield border. UNITED STATES OF AMERICA / CENTS encircles the rim. Struck in nickel with a plain edge. The depth of mirrored fields establishes the background for the thickly frosted devices.  
*From The A. James Evans Collection, Part II. PCGS# 61702*

**1875 Twenty Cent Piece in Copper  
Judd-1414, PR64 Red Cameo**

- 6755** 1875 Twenty Cents, Judd-1414, Pollock-1557, High R.7, PR64 Red Cameo NGC. Dies trial striking for the 1875 twenty cent piece, but struck in copper with a plain edge. A very interesting and unusual twenty cent piece dies trial, the surfaces are deep cherry-red with a few dabs of light blue here and there. The fields are deeply reflective and the devices heavily frosted, giving the coin its cameo contrast. PCGS# 81721

**1877 Sailor Head Dime in Copper, PR65 Brown  
Standout Example of Judd-1498**

- 6756** 1877 Sailor Head Ten Cents, Judd-1498, Pollock-1651, Low R.7, PR65 Brown PCGS. CAC. William Barber's portrait of Liberty resembles the famous Sailor Head design but lacks the "sailor" collar. The 13 tiny stars are widely spaced, and the date is at the exergue. The reverse is of the regular-issue Seated dime. A coin without a country since UNITED STATES OF AMERICA is absent. Struck in copper with a reeded edge. Beautiful pale blue and pinkish patina and few signs of contact make this a standout example of this rare issue. Population: 2 in 65 Brown, 1 finer (12/14). PCGS# 61833

**1878 Judd-1554 Silver Dollar, PR62  
Charles Barber Design**

- 6757** 1878 Silver Dollar, Judd-1554, Pollock-1733, R.5, PR62 PCGS. Liberty wears a beaded coronet and faces left. The stars are arranged 7 x 6, separated by IN GOD WE TRUST with the date below. The reverse features a standing eagle with spread wings, clutching an olive branch and arrows. E PLURIBUS UNUM is above in gothic letters. The border displays UNITED STATES OF AMERICA and ONE DOLLAR with the legends separated by two stars. This is the Pollock variety with star 13 distant from the curl and the upright of the B in PLURIBUS centered under the second T in STATES. Charles Barber's rejected silver dollar design. Struck in silver with a reeded edge. Light golden patina visits protected areas of this flashy specimen. The strike shows minor blending at the centers. The reverse has a tiny rim bump at 3 o'clock.  
*Ex: A. James Evans Collection (Heritage, 11/2004), lot 7337.  
From The A. James Evans Collection, Part II. PCGS# 61915*

**1878 Barber-Designed Dollar Pattern  
Judd-1554, Pollock-1741, PR62**

- 6758** 1878 Silver Dollar, Judd-1554, Pollock-1741, R.5, PR62 PCGS. The head of Liberty is large and faces left with IN GOD WE TRUST at the top and the date below, similar to the pattern fifty dollar gold pieces from 1877. The reverse has a spread-winged eagle with E PLURIBUS UNUM in Gothic lettering above. UNITED STATES OF AMERICA is at the top and ONE DOLLAR on the bottom rim. This is the Pollock variety with star 13 distant from the curl and the upright of the B in PLURIBUS centered under the TE in STATES. Struck in silver with a reeded edge. This is Barber's rejected dollar design. Roger Burdette has determined from investigation in Mint archives that at least 50 pieces were struck between December 1, 1877 and January 2, 1878. This is a nicely reflective example with no obvious impairments. Pale golden color is seen over each side. PCGS# 61915

1878 Standard Dollar Pattern in Copper  
Judd-1555, Barber's 'Rejected Dollar' Design  
PR66 Brown Cameo

1878 William Barber Five Dollar, PR62 Gilt  
Judd-1574, An Anti-Counterfeiting Issue

**6759** 1878 Dollar, Judd-1555, Pollock-1734, Low R.7, PR66 Brown Cameo NGC. The head of Liberty faces left, with IN GOD WE TRUST above and the date 1878 below. Liberty wears a coronet inscribed LIBERTY. Thirteen stars at the border are arranged seven left, six right. The N of IN is close to the coronet point, and star 13 is close to the lowest hair curl. There are five beads above the Y in LIBERTY. On the reverse an eagle with drooping wings occupies the center, with UNITED STATES OF AMERICA and ONE DOLLAR, the latter in minuscules, at the rim. E PLURIBUS UNUM appears arcing in a Gothic font above the eagle. The upright of the B in PLURIBUS is centered under the tip of the right bottom serif on the second T of STATES, and the M in UNUM is slightly left of center of the M in AMERICA. Struck in copper with a reeded edge. For such a rare pattern there are a surprising number of high-grade examples known. Both services combined have certified one other PR66 and two PR67 pieces — not a large number certainly, but an indication of the care taken with these exceptional patterns. This design is similar to that used on the half union patterns. In old auction catalogs it was referred to as “Barber’s rejected dollar.” This is an exceptionally well-preserved coin. The surfaces are uniformly mellowed with pale blue surrounding the devices. The fields display remarkably deep mirrored reflectivity and set up the bright background against the lustrous devices that give this piece its Cameo designation. PCGS# 61916

**6760** 1878 Five Dollar, Judd-1574, Pollock-1766, High R.6, PR62 Gilt NGC. The William Barber Flowing Hair motif graces the obverse. Liberty faces left, wearing a headband eponymously inscribed. E PLURIBUS UNUM is above, the date 1878 below. The reverse offers an eagle with lowered wings in the center, with UNITED STATES OF AMERICA and E PLURIBUS UNUM around. The arrows are long and slender, their tips extending behind and past the eagle’s wing, and the olive branch has six leaves. Struck in a larger diameter than regular half eagle issues, in copper, gilt, with a reeded edge.

The series of 1878 half eagles, Judd-1568A through 1574A, were struck on larger-diameter, thinner planchets as anti-counterfeiting measures, in an effort to combat the plague of malefactors scooping out the center of a gold coin and replacing it with less-expensive metal (in the 1870s one of the less-expensive metals was platinum!).

This is a lightly hairlined example. The gilt surface does little to impede the bright flash of the proof mirrors, a common problem on many gilt pieces. The strike is generally strong, but it is clear that die opposition had not been thoroughly thought through with this design as there is slight high-point softness noted on each side. PCGS# 61937

**1879 Washlady Quarter, PR65 Brown  
Famous Charles Barber Design  
Judd-1591, Copper**

- 6761 1879 Washlady Quarter Dollar, Judd-1591, Pollock-1784, Low R.7, PR65 Brown NGC.** The Washlady design is attributed to Charles Barber, with Liberty's hair bound behind the head. The obverse has UNITED STATES OF AMERICA around the border with the date below the bust. The reverse has an eagle clutching an olive branch and three arrows. The UNITED STATES OF AMERICA legend and E PLURIBUS UNUM motto follow inside the upper reverse border with the denomination expressed as QUAR. DOLLAR below. Struck in copper with a reeded edge. The Washlady quarter has become one of the better known pattern designs. The earliest known mention of the Washlady nickname was by David Proskey at the F.W. Doughty auction in 1891, and is presumably a reference to Liberty's hairstyle. The present fully struck Gem is deeply toned cobalt-blue with glimpses of butter-gold and lavender-red. The flashy fields are unblemished. PCGS# 61968

**1879 George Morgan Pattern Dollar in Copper  
Judd-1616, PR64 Red and Brown**

- 6762 1879 Morgan Dollar, Judd-1616, Pollock-1812, High R.6, PR64 Red and Brown PCGS. CAC.** The obverse depicts the regular dies design for the Morgan dollar, while the reverse features an eagle with spread wings holding an olive branch in its right talon and three long arrows in its left. Above is the legend UNITED STATES OF AMERICA and the motto E PLURIBUS UNUM. ONE DOLLAR is below. An interesting combination of a double usage of E PLURIBUS UNUM on both sides. Struck in copper with a reeded edge. This is a magnificent pattern dollar. If one is expecting the traditional dose of Brown in this Red and Brown-designated pattern, they are sure to be disappointed. There is very little here that could be termed Brown. In fact, all we see is occasional patchy light blue in the fields; otherwise the surfaces are full Red. PCGS# 71994

**1879 Metric Dollar in Goloid or Silver, PR65  
Judd-1617, Attractively Toned**

- 6763 1879 Metric Dollar, Judd-1617, Pollock-1813, R.4, PR65 NGC.** William Barber's Metric dollar with Liberty wearing a coronet with a border of pearls. The reverse is elaborately laid out with a partial wreath of cotton and corn tied at the base, a ribbon, and with DEO EST GLORIA on a tablet above. Struck in goloid or silver with a reeded edge. The fields are nicely mirrored and each side displays significant deep blue or rose colored toning around the devices and rims, while the fields are much lighter in hue. PCGS# 61995

**1879 William Barber Metric Dollar  
Judd-1618, PR65**

- 6764** 1879 Metric Dollar, Judd-1618, Pollock-1813, R.5, PR65 NGC. William Barber's Metric Dollar with Liberty wearing a coronet with a border of pearls. The reverse is quite elaborate with a partial wreath of cotton and corn tied at the base, a ribbon, and with DEO EST GLORIA on a tablet above. Struck in silver with a reeded edge. These pieces are seldom found in Gem quality. In fact, PCGS has only graded one other Gem with none finer (12/14). Both sides have nicely reflective fields with pale gold toning on the obverse, lilac-gold on the reverse.  
Ex: FUN Signature (Heritage, 1/2007), lot 1582. PCGS# 61996

**1880 Metric Dollar, Brilliant PR65  
Judd-1645, Widely Collected William Barber Design**

- 6765** 1880 Metric Dollar, Judd-1645, Pollock-1845, High R.6, PR65 NGC. The obverse and reverse designs are the same as Judd-1617 except for the date. Struck in gold or silver with a reeded edge. This is a gorgeous Gem proof with bright silver surfaces and wispy ivory toning. The devices show significant mint frost, yielding a moderate cameo contrast, and are framed by deeply reflective fields.  
Ex: FUN Signature (Heritage, 1/2007), lot 1596. PCGS# 62030

**1881 Liberty Head Cent by Barber  
Judd-1665, PR66 Cameo**

- 6766** 1881 Liberty Head One Cent, Judd-1665, Pollock-1865, High R.6, PR66 Cameo NGC. CAC. The motifs closely resemble those on the issued 1883 Liberty nickel, but the obverse stars are absent in favor of UNITED STATES OF AMERICA, and on the reverse the Roman numeral is I instead of V. Struck in nickel with a plain edge. These designs were also used on the three cent (Judd-1668) and five cent (Judd-1671) designs of this year. Deeply mirrored on each side with thickly frosted devices. Mostly brilliant with the slightest golden streakiness in the planchet (visible only with magnification).  
Ex: Houston Signature (Heritage, 12/2008), lot 1775.  
From The A. James Evans Collection, Part II. PCGS# 862061 Base PCGS# 62061

**1881 Liberty Head Three Cent Pattern in Nickel  
Judd-1668, PR63 Cameo**

- 6767** 1881 Liberty Head Three Cents, Judd-1668, Pollock-1869, High R.6, PR63 Cameo PCGS. CAC. The Charles Barber Liberty Head obverse. Head facing left, similar to the adopted Liberty Head nickel design, but UNITED STATES OF AMERICA rings the obverse in thick, widely spaced letters, with date 1881 below. On the reverse a Roman numeral III is flanked by an agricultural wreath, again similar to the 1883 regular-issue nickel design. Struck in nickel with a plain edge. The surfaces are all-brilliant on this lovely, well-preserved pattern. Just the slightest hairlines are present.  
From The A. James Evans Collection, Part II. PCGS# 534934 Base PCGS# 62064

**1882 Liberty Nickel Precursor in Nickel  
Judd-1690, PR66 Cameo**

- 6768** 1882 Liberty Head Five Cents, Judd-1690, Pollock-1892, R.5, PR66 Cameo PCGS. CAC. A Liberty nickel pattern that closely approximates the issued 1883 No Cents variety, although there are slight differences in the positioning of the devices relative to the stars and peripheral legends. USPatterns.com calls it “a popular precursor to the Liberty nickel.” Struck in nickel with a plain edge. As we pointed out in the Queller catalog: “The transitional patterns such as the Judd-1690 1882 Liberty Head nickel and the Judd-232 1859 half dime are doubly popular, as they are collected both by pattern collectors and by collectors of the regular-series issues and varieties who desire “something special” but might not otherwise dream of collecting patterns in general. With several dozen examples available in the numismatic marketplace, this pattern also has wider availability than most other issues.” Pale rose and lavender patina is draped over starkly contrasted cameo features. *From The A. James Evans Collection, Part II.* PCGS# 388539 Base PCGS# 62095

**1882 Shield Nickel in Copper, PR60 Red and Brown  
Judd-1694, Similar to the Adopted Design**

- 6769** 1882 Shield Five Cents, Judd-1694, Pollock-1896, Low R.7, PR60 Red and Brown ANACS. The obverse is similar to the regular-issue Shield nickel design, but without the ornamental ball at the base of the shield. The reverse is the same type used to coin 1882 Shield nickels. Struck in copper with a plain edge. Both sides are covered in deep shades of multicolored iridescence. The mirrored fields are only vaguely apparent under a light and held at just the right angle. In a small-sized holder. PCGS# 72099

**1883 Transitional Liberty Nickel in Pure Nickel  
Judd-1704, PR64 Cameo**

- 6770** 1883 Liberty Head Five Cents, Judd-1704, Pollock-1908, Low R.6, PR64 Cameo PCGS. The obverse is similar in design to the Liberty nickel adopted this year, except the stars are replaced with the legend UNITED STATES OF AMERICA. The reverse has a central inscription that reads PURE NICKEL, surrounded by a wreath of cotton and corn. FIVE CENTS is separated above and below with seven stars left and six right. Struck in pure nickel, which makes examples magnetic, with a plain edge. The fields show exceptional depth of mirroring which establishes a “black” background for the heavily frosted devices. Splendidly preserved. *From The A. James Evans Collection, Part II.* PCGS# 62120

1883 Liberty Nickel, PR66 Cameo  
Judd-1712, 33 N., 67 C.

**6771** 1883 Liberty Head Five Cents, Judd-1712, Pollock-1916, Low R.6, PR66 Cameo PCGS. CAC. The obverse resembles the final Charles Barber design for the Liberty nickel, but rather than stars, UNITED STATES OF AMERICA encircles the head. The date 1883 is below. The reverse wreath is also familiar, but FIVE shows at the top rim, with CENTS at the bottom, and the alloy 33 N. / 67 C. becomes the central legend. Struck in nickel alloy with a plain edge. Light wheat-gold toning graces reflective and undisturbed surfaces. Well struck and highly attractive.

Ex: A. James Evans Collection (Heritage, 11/2004), lot 7345.

From The A. James Evans Collection, Part II. PCGS# 82129 Base PCGS# 62129

1884 Perforated Cent, PR67  
Judd-1721, Eastman Johnson Design

**6772** 1884 One Cent, Judd-1721, Pollock-1929, R.5, PR67 PCGS. CAC. Eastman Johnson's "holey" design for the cent with the center perforated with an irregular circumference. The obverse bears the legend UNITED STATES OF AMERICA about the upper rim and the date at the bottom. The reverse shows the denomination ONE CENT at the top with an inverted shield and two laurel sprigs below. Struck in nickel with a plain edge. A majority of specimens appear subdued, but the present Superb Gem has flashy pristine fields and delicate gold and ice-blue toning. The strike is full, and a few pinpoint carbon flecks provide the sole imperfections. Population: 5 in 67, 0 finer (11/14).

From The A. James Evans Collection, Part II. PCGS# 62150

Eastman Johnson's 1884 'Holey' Nickel  
Judd-1724, PR65

**6773** 1884 Five Cents, Judd-1724, Pollock-1934, Low R.6, PR65 PCGS. The Eastman Johnson "holey five cent" design. The obverse shows FIVE above and CENTS below a roughly octagonal opening in the planchet, with shields on either side. The reverse shows UNITED STATES OF AMERICA at the outer rim, with an inner circle of 13 stars and date 1884 below. Struck in nickel with a plain edge. The fields show minimal reflectivity and each side displays light gray-pinkish patina.

From The A. James Evans Collection, Part II. PCGS# 62154

1884 'Holey' Five Cent Pattern in Nickel  
Judd-1724, PR66

**6774** 1884 Five Cents, Judd-1724, Pollock-1934, Low R.6, PR66 PCGS. CAC. Another, even finer example of Eastman Johnson's "holey" design for the nickel. Again, struck in nickel with a plain edge. This piece shows brightly reflective fields and even a moderate amount of contrast of the lightly frosted devices against the depth of proof mirroring. Slight pinkish-gray patina is seen over each side.

From The Millford Collection, Part II. PCGS# 62154

1885/3 'Holey' Cent by Eastman Johnson  
Judd-1740, PR65

**6775** 1885 One Cent, Judd-1740, Pollock-1950, High R.6, PR65 NGC. This annular (ring-shaped) pattern cent has a central perforation. The obverse has UNITED STATES OF AMERICA above with the date 1885/3 at the bottom of that side. On the reverse, ONE CENT is in large letters at the top with a small shield that is flanked by laurel sprigs below. Struck in silver with a plain edge. Deep, multicolored iridescence covers the mirrored surfaces.

From The A. James Evans Collection, Part II. PCGS# 62181

1885 Annular Five Cent Pattern  
Judd-1742, PR66

- 6776** 1885 Five Cents, Judd-1742, Pollock-1954, High R.6, PR66 NGC. An annular pattern that has thirteen stars, the date, and the legend UNITED STATES OF AMERICA on the obverse. The upper reverse has the legend FIVE CENTS with a shield between two laurel leaves on the lower reverse. Struck in silver with a plain edge. Rose and lilac patina clings to the devices on each side of this infrequently seen, late-date pattern.

*From The A. James Evans Collection, Part II. PCGS# 62184*

1896 Charles Barber Federal Shield Cent  
Judd-1767, Brightly Reflective PR64

- 6777** 1896 One Cent, Judd-1767, Pollock-1982, Low R.7, PR64 PCGS. CAC. The obverse has a scroll reading LIBERTY across a shield with thirteen stripes. Behind are two crossed poles, topped by an eagle and a liberty cap. E PLURIBUS UNUM is above, 1896 is below. The reverse displays ONE CENT within a curved olive sprig with UNITED STATES OF AMERICA around. Both sides have beaded borders. Struck in nickel alloy or German silver with a plain edge. The fields are extraordinarily bright and reflective on each side, showing an even layer of rose patina.

*From The A. James Evans Collection, Part II. PCGS# 62220*

1896 Federal Shield Nickel Pattern  
Judd-1770, PR63

- 6778** 1896 Five Cents, Judd-1770, Pollock-1987, Low R.6, PR63 PCGS. CAC. This Charles Barber design uses a Federal shield as its primary motif. Behind the shield are two crossed poles bearing a liberty cap and eagle. A scroll passing in front of the shield is inscribed LIBERTY. The denomination 5 CENTS is centered within a curved olive sprig on the reverse. Struck in a nickel alloy with a plain edge. USPatterns.com states this design was struck in "Nickel alloy including standard coin nickel and at least 6 varieties of German silver." This is a moderately reflective proof with even gray patina over each side.

*From The A. James Evans Collection, Part II. PCGS# 62224*

(1879) Silver Dollar Splasher, PR63 Cameo  
Uniface Reverse Die Trial, Judd-A1879-5

- 6779** (1879) Silver Dollar Die Trial, Judd-A1879-5, PR63 Cameo PCGS. This uniface die trial shows William Barber's reverse design for Judd-1615, with the Perched Eagle holding an olive branch with seven leaves and three arrows. E PLURIBUS UNUM in a small arc above, UNITED STATES OF AMERICA/ONE DOLLAR around. The obverse is blank, but shows dentilation all around. Struck in white metal with a reeded edge.

This fascinating die trial traces its history to the fabulous collection of King Farouk of Egypt. Fred Baldwin (who cataloged the sale for Sotheby's) purchased this piece when that remarkable gathering was sold in 1954. It later passed to Abner Kreisberg and Hans Schulman, who offered it in lot 2412 of their February 1960 Public Auction Sale:

"1879 AW 1589A. White metal essai for the silver dollar 1879. Rev. same AW 1588. Reeded edge. **BLANK OBERSE**. Have never seen this item listed. Unquestionably a unique prize. Reverse is a proof, obv. Uncirculated. R-15. Valued at (400.00)."

The design elements of this attractive Select specimen are sharply rendered, with a rich coat of mint frost that creates bold cameo contrast with the deeply reflective fields. The surfaces show a few minor contact marks, and highlights of lavender and pale gold toning enhance the considerable eye appeal. Population: 1 in 63 Cameo, 0 finer (12/14).

*Ex: Possibly William Woodin, exhibited at the 1914 ANS Exhibition, but misattributed as "A.W. 1597" on page 83 of the catalog; unknown intermediaries; King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1997; Fred Baldwin; unknown intermediaries; Public Auction Sale (Kreisberg/Schulman, 2/1960), lot 2412.*

**1915 Panama-Pacific Gold Dollar**  
**Judd-A1915-1, White Metal, Bronzed, PR64 Brown**  
**Unique Obverse Die Trial**

**6780 1915 Panama-Pacific Gold Dollar Splasher, Judd-A1915-1, Unique, PR64 Brown NGC.** This unique splasher is a uniface trial of the obverse die for the 1915-S Panama-Pacific gold dollar. A corresponding reverse die trial exists (offered in another lot in this sale), and both trials were struck before the S mintmark was added to the die. George Keck, of New York City, was the designer of the Panama-Pacific gold dollar. This piece, and the corresponding reverse trial, were discovered in his estate. The coins were first offered publicly in the 1952 ANA Convention Auction (New Netherlands, et al, 8/1952), lot 1166:

**"Trial Strikes of the 1915 Panama Pacific Dollar.** 1915. Dollar, as last above. Uniface trial impressions, obverse and reverse separate, struck in White Metal, Bronzed. Similar to the regular dies, but without the mintmark "S" on reverse. The obverse is slightly thicker, and the reverse is slightly thinner than the regularly issued coin. Ex. Fine. Obtained from the estate of the late Charles Keck by R.J. Lathrop and believed to be unique. 2 Pcs. Plate."

Subsequently, the two trials were offered in the Dr. Curtis Paxman Collection (Bowers and Ruddy, 11/1974), lot 1051. Both die trials were later acquired by Anthony Swiatek.

The present coin is an attractive Choice example that closely matches the grade and appearance of the corresponding reverse trial. The design elements are sharply detailed, and the evenly patinated chocolate-brown surfaces show glossy mint luster, with few signs of contact. The discerning collector will not miss the once-in-a-lifetime opportunity to acquire this unique and important numismatic treasure.

---

**1916 McKinley Gold Dollar, PR63  
Extremely Rare Obverse Die Trial  
Struck in Nickel, Judd-A1916-1**

**6781 1916 McKinley Gold Dollar, Judd-A1916-1 Variant, PR63**  
NGC. Major Lenox Lohr, of Chicago, Illinois, was one of the most prolific collectors of pattern coins of all time. His collection included more than 1,400 different patterns when he sold it to Abner Kreisberg in the late 1950s. Kreisberg sold the collection to the Empire Coin Company (Q. David Bowers and James Ruddy), and they offered it in a monumental fixed price list, circa 1961. Although this uniface obverse die trial of the McKinley gold dollar, struck in nickel, was not included in the Empire offering, Andrew W. Pollock III indicates Lohr was the first owner-of-record for this extremely rare trial piece. Robert Batchelder apparently acquired this example at some point, and Sol Kaplan owned it by 1971, when he sold it to Anthony Swiatek at a Shaker Heights, Ohio coin show. Swiatek has owned this piece ever since. A closely related obverse die trial, struck from the same die, in the same metal, but possibly from a different collar is also in Mr. Swiatek's collection, and is offered in another lot in this sale. That piece has an extremely high wire rim around the obverse.

Aside from the other trial piece in this sale, we know of no other uniface obverse die trial of a 1916 McKinley gold dollar struck in nickel. NGC has certified both examples as J-A1916-1 Variant, but it is possible that they should be considered different issues because of the different collar. In that case both pieces would be unique. This pleasing Select example exhibits well-detailed design elements and lightly marked surfaces that display slightly subdued luster. The surfaces are blanketed in delicate shades of greenish-gold and lavender-gray toning. This fascinating die trial represents the ultimate in numismatic rarity and it may be decades before collectors have the opportunity to purchase it again, after this chance has passed. PCGS# 62401

---

1916 McKinley Gold Dollar, PR65  
Obverse Die Trial in Nickel, Judd-A1916-1  
Extremely Rare

**6782 1916 McKinley Gold Dollar, Judd-A1916-1 Variant, PR65 NGC.** Colonel James W. Curtis is little remembered today, but he was one of the most prominent collectors of pattern coins in the mid-20th century. He compiled a large collection of patterns that was mostly dispersed in a Numismatic Gallery auction in February 1950 and published the *U.S. Pattern Coin Handbook* about the same time. Although this mysterious obverse die trial was not among the coins sold in the 1950 auction, later numismatists have named him as the first owner-of-record for this piece. John Ford exhibited a specimen of this die trial shortly after the sale, at the March 22, 1953 meeting of the Bronx Coin Club, so he may have acquired this specimen from Curtis about the time he sold his collection.

The only auction appearance we can trace for this die trial was lot 1865 of RARCOA's section of Auction '80:

**"1916 GOLD DOLLAR.** Uniface obverse die trial in Nickel (non-magnetic) of the McKinley Commemorative Gold Dollar. Struck inside a collar (edge is reeded) with a very high wire rim caused by the extreme striking pressure used in its manufacture. The piece is listed in Judd's Appendix A, but no indication of rarity is given. However, we note that a McKinley Dollar trial in nickel (struck both sides) appeared in the 1979 A.N.A. auction where it was called UNIQUE. We assume that both were likely made at the same time and unhesitatingly call the presently offered piece RARE."

The lot realized \$4,000, a quite impressive price for that era. Anthony Swiatek acquired this specimen shortly after the auction and it has been in his collection since that time.

In addition to the obverse/reverse trial piece mentioned in the lot description, there is another obverse die trial that is even more closely related to this example. It is struck from the same obverse die, but seemingly with less striking pressure and possibly a different collar, as it does not show the wire rim. That piece is also in Anthony Swiatek's collection, and is offered in another lot in this sale.

This remarkable Gem features the sharpest obverse detail this cataloger has ever seen on a striking from the McKinley dollar die. The well-preserved lustrous surfaces show pleasing hints of pale gold and lavender patina and the wire rim frames the design in spectacular fashion. The last public offering of this extremely rare die trial was 34 years ago, and it may be an equally extended period before it becomes available again.

---

1964-1965 Inco 25 Cent Test Pieces  
From the Estate of Inco Official Kenn Henderson

---

**6783 1964-1965 International Nickel Company 25 Cent Test Pieces.** In 1964-1965, extensive non-precious metals coin testing was done outside the Mint at different facilities, including International Nickel Company, Dupont, and Corning Glass Works. The pieces in this lot are from the estate of Kenn Henderson, an officer of Inco at the time. Andrew Pollock wrote extensive background information about these pieces in his 1994 reference *United States Patterns and Related Issues*, pages 443-447. We strongly recommend that bidders refer to Pollock's in-depth treatment of these little-known patterns. We have grouped the 58 pieces in this lot into three categories: 1964 Inco Large Head 25 Cent Test Pieces, 1965 Inco Small Head 25 Cent Test Pieces, and Miscellaneous "Component Pieces." Included are:

**1964 Inco 25 Cent Test Pieces - Large Head**

Pollock-5340. 95% nickel, 5% silicon on 2% "Permalloy" Core. Plain Edge. 2 pieces.  
Pollock-5350. Pure nickel (Ni engraved in right obverse field). Plain Edge. 2 pieces.  
Pollock-5350. Blank Planchet for above. Pure nickel. Type 2. Plain edge. 1 piece.  
Pollock-5351. 45/55 nickel/copper (45 engraved in right obverse field). Plain edge. 1 piece.  
Pollock-5353a. 75/25 copper/nickel (CuNi engraved in right obverse field). Plain edge. 1 piece.  
Pollock-5365. 75/25 copper/nickel on 60% copper core. No engraving in field. Reeded edge. 1 piece.  
Pollock-5365a. 75/25 copper/nickel on 60% copper core. No engraving in field. Plain edge. 8 pieces.  
— Blank planchet for above. Type 2. 1 piece.  
Pollock-5365b. 70/30 copper/nickel on 60% copper core. No engraving in field. Reeded edge. 1 piece.  
Pollock-5365c. 70/30 copper/nickel on 60% copper core. No engraving in field. Plain edge. 1 piece.

**1965 Inco 25 Cent Test Pieces - Small Head**

Pollock-5380. 95/5 nickel/silicon on 2% "Permalloy" core. Reeded edge. 6 pieces.  
Pollock-5380. Sealed in original presentation poly holder. 2 pieces.  
— Blank planchet. Proof Quality, manufactured by the Franklin Mint. 18 pieces.  
— Blank planchet. Similar to the above, said to be annealed in oxygen rather than nitrogen. 6 pieces.

**Miscellaneous "Component Pieces"**

— 75/25 copper/nickel outer clad layer. 2 pieces  
— Pure copper inner core. 2 pieces.  
— Bonded 2-piece set - copper/nickel layer and copper core. 1 piece.  
— Blank planchet - copper/nickel layers over copper core. Type 1. 1 piece.  
— Blank planchet - copper/nickel layers over copper core. Type 2. 1 piece.

(Total: 58 coins)

**1999-P New Jersey Quarter MS66  
On an Experimental Gold-Colored Planchet**

**6784 1999-P New Jersey Quarter — Struck on an Experimental Planchet — MS66 PCGS.** Gold-colored alloy experiments were conducted in 1999 using state quarter dies, presumably because no Anthony dies were available. Those experiments eventually culminated in the manganese-alloy Sacagawea dollar. This virtually pristine piece has the brassy yellow-gold color of a new Sacagawea dollar and an unusually sharp strike. As usual for these 1999 experimental pieces, there are a few minor lintmarks near the borders, and the rims are irregular, stretched, and low relief, as if the collar die mismatched the quarter dies.

Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 2781, which realized \$3,450.

**GOLD DOLLARS**

**6785 1849 No L MS64 PCGS.** This popular first-year variety omits designer Longacre's L initial. The lustrous yellow-gold surfaces of this near-Gem display wisps of mint-green and possess sharply struck design elements. Both sides have been well cared for. Population: 67 in 64 (5 in 64+), 42 finer (12/14). NGC ID# 25B7, PCGS# 7501

**6786 1849 Open Wreath MS64 NGC. CAC. Breen-6002.** The star at 5 o'clock is widely repunched. The Distant Stars variety with the stars placed closer to the rim and thus further from the portrait. A well struck and faintly marked caramel-gold near-Gem of the briefly issued Open Wreath design. In a former generation holder. Ex: Long Beach Signature (Heritage, 6/2011), lot 4441, which realized \$1,725.

From The Free Tilly Collection. NGC ID# 25B9, PCGS# 7502

**1849 Open Wreath Gold Dollar, MS65  
Rich, Two-Toned Color Scheme**

**6787 1849 Open Wreath MS65 PCGS.** Large Head. Longacre's faint monogram appears on the angled truncation of the bust. This strongly lustrous and solidly struck example has pleasing yellow-gold color with subtle reddish peripheral accents. The obverse has few marks for the grade, and only a handful of minor flaws in the reverse fields preclude an even finer grade. Population: 51 in 65 (1 in 65+), 14 finer (11/14).

Ex: ANA Signature (Heritage, 8/2007), lot 2784.  
From The Free Tilly Collection. NGC ID# 25B9, PCGS# 7502

**1849-D Gold Dollar, MS61  
First-Year Dahlonge Type Coin**

**6788 1849-D MS61 NGC. Variety 1-A.** The Dahlonge Mint's output of 21,588 gold dollars in 1849 proved to be rather substantial for the facility, and this first-year issue remains the most plentiful gold dollar from the Georgia mint. This piece is well-struck for a D-mint issue, with sharp stars and well-delineated hair curls. The rims are boldly brought up, encircling bright, green-gold fields that reveal few abrasions for the grade. Census: 46 in 61, 51 finer (12/14). NGC ID# 25BD, PCGS# 7507

**1849-D Gold Dollar, MS62  
Rich Red and Green Toning**

**6789 1849-D MS62 NGC. Variety 1-B.** The centered mintmark variety, also identified by spindly die crack through the mintmark. The introductory Dahlonge issue of the denomination, and essential to a Southern gold type set since the Open Wreath design was coined only in 1849. The present orange-red and olive-gold example has a bold strike and displays prominent clash marks. Wispy field marks are noted near the portrait. Census: 29 in 62, 22 finer (11/14). NGC ID# 25BD, PCGS# 7507

**6790 1849-O Open Wreath MS62 PCGS. Variety 1.** The obverse is bright and lustrous with well-struck design elements and lovely bright yellow-gold color. Several wispy abrasions and pinscratches are seen in the upper reverse fields. NGC ID# 25BE, PCGS# 7508

**6791 1849-O Open Wreath MS62 PCGS. Variety 1.** The R in DOLLAR is die doubled, characteristic of Variety 1. The strike is precise and the rich peach toning is attractive. The surfaces are lustrous and exhibit a few minor grazes. The sole Open Wreath New Orleans issue. Certified in a green label holder. Ex: Orlando FUN Signature (Heritage, 1/2008), lot 3643.  
From The Free Tilly Collection. NGC ID# 25BE, PCGS# 7508

**6792 1849-O Open Wreath MS62 PCGS. CAC. Variety 3.** The New Orleans Mint struck gold dollars in 1849, their first year of issue, the start of a glorious five-year span before the opening of the San Francisco Mint dried up the supply of gold heading to Louisiana. This MS62 piece has bright yellow-gold luster that defines the eye appeal. Population: 51 in 62, 68 finer (12/14). NGC ID# 25BE, PCGS# 7508

**1850-D Gold Dollar, AU55  
Scarcer D-Mint Issue**

- 6793 1850-D AU55 NGC. Variety 2-C.** Gold dollar production declined significantly in its second year of production at the Dahlonega Mint, with only 8,382 coins struck, and this issue's survival rate is significantly lower than that of the 1849-D. Only 125 to 175 examples are believed extant, with the majority of these only in XF and lower grades. This Choice AU representative is pleasantly luminous in honey-gold hues. Slight softness is noted on the central hair curls and the left-hand stars, a combination of a slightly weak strike and minor high-point wear. Census: 17 in 55, 43 finer (12/14). NGC ID# 25BH, PCGS# 7511

**1851 Gold Dollar, MS66  
Conditionally Rare Type Coin**

- 6794 1851 MS66 NGC.** With a mintage in excess of 3.3 million coins, the 1851 gold dollar is understandably popular among type collectors, but finding a piece in MS66 or finer condition will prove challenging. This Premium Gem representative shows frosty green-gold luster that shimmers uninterrupted over both sides. The extreme centers show slight softness, though the definition is nonetheless pleasing. Census: 22 in 66 (1 in 66+, 1 in 66 ★), 7 finer (11/14). NGC ID# 25BK, PCGS# 7513

**1851-C Gold Dollar, MS63  
Sharp, High-End Charlotte Type Coin**

- 6795 1851-C MS63 PCGS. Variety 1.** The most affordable and frequently pursued avenue for collecting Charlotte gold is to acquire a single example of each of the three denominations produced at that mint. For the gold dollar denomination, the 1851-C is the most practical choice, as it is one of the most readily available dates in the series. Even Mint State pieces are obtainable for the ambitious collector. This is almost in direct contrast to the general rule of rarity for Charlotte gold only being available in XF and lower grades. This MS63 example is remarkably sharp for a C-mint issue, with satiny green-gold luster and pleasantly smooth surfaces. About as sharp and lustrous as Charlotte gold is ever seen. Population: 13 in 63, 18 finer (12/14). NGC ID# 25BL, PCGS# 7514

**1851-O Gold Dollar, MS64  
Conditionally Elusive New Orleans Issue**

- 6796 1851-O MS64 PCGS. CAC. Variety 1.** In the height of the California Gold Rush, before the opening of the San Francisco Mint, the New Orleans Mint produced many large mintages of gold coins. The 1851-O gold dollar had a production total of 290,000 pieces, but these experienced extensive circulation and moderately high attrition, and few high-grade Mint State pieces survive. This piece displays satiny yellow-gold luster and is largely free of noticeable abrasions. The central design elements show a touch of the usual weakness, though the eye appeal is nonetheless pleasing. Population: 28 in 64, 47 finer (11/14). NGC ID# 25BN, PCGS# 7516

- 6797 1852-O MS62 NGC. Variety 1.** Attractive orange-gold luster appears on each side of this 1852-O gold dollar, a far-above-average survivor of the mintage of 140,000 coins. Some die clashing and a few scattered marks are evident in concert with the grade, and LA in DOLLAR and the 5 in the date are somewhat softly struck as expected, but this piece offers much remaining eye appeal. Census: 51 in 62, 31 finer (12/14). NGC ID# 25BT, PCGS# 7520

**1852-O Gold Dollar, MS63  
Lovely New Orleans Type Coin**

- 6798 1852-O MS63 NGC.** An early die state without clash marks. This peach-gold representative exhibits vibrant luster, and is well struck except on the A in DOLLAR. Marks are minimal for the designated grade, and the exemplary eye appeal will delight the specialist. A desirable New Orleans type coin. Census: 18 in 63, 13 finer (11/14). NGC ID# 25BT, PCGS# 7520

**1853 Gold Dollar, MS65**  
**Charming, Frosty Type Coin**

- 6799 1853 MS65 NGC.** An available Philadelphia issue, ideal for type representation. This piece displays luminous, frosty surfaces beneath a blanket of original orange-gold toning. The strike is needle-sharp, showing Liberty's hair curls fully delineated and the reverse berries boldly rounded. An impressive Type One representative. NGC has seen only 49 numerically finer submissions (11/14). NGC ID# 25BU, PCGS# 7521

**1854-D Gold Dollar, AU Sharpness**  
**Appealing Surfaces**

- 6800 1854-D — Improperly Cleaned — NGC Details. AU. Variety 6-H.** Much eye appeal remains despite the NGC caveat on this piece, an attractive survivor from the original mintage of only 2,935 coins for circulation. Only light hairlines show in the fields, and the orange-gold surfaces retain an essential attraction. A small, curving scrape occurs just above the bow. The 54 in the date and LA are softly struck, as expected. NGC ID# 25BZ, PCGS# 7526

**1854-D Gold Dollar, AU58**  
**Luminous, Honey-Gold Surfaces**

- 6801 1854-D AU58 NGC. CAC. Variety 6-H.** The 1854-D gold dollar's mintage of just 2,935 coins was rather scant, even for the low-production Dahlonega Mint, and only about 100 to 125 examples are believed extant. This is a sharply struck near-Mint example, showing subtle original luster in the recesses amid warm honey-gold patina. A trace of friction over the obverse portrait accounts for the grade. Census: 25 in 58, 24 finer (12/14). NGC ID# 25BZ, PCGS# 7526

- 6802 1854-S AU58 PCGS.** Sharply struck with bright, still-lustrous, lightly toned surfaces. Each side displays typical small marks from circulation. A pleasing near-Mint example of this introductory gold dollar issue from the new mint facility in San Francisco. NGC ID# 25C2, PCGS# 7527

**1854-S Gold Dollar, MS62**  
**First-Year S-Mint Issue**

- 6803 1854-S MS62 NGC.** This is a well struck coin with bright orange-gold color and flashy peripheral luster. The surfaces have only light abrasions that are appropriate to the grade and do not detract from the eye-appeal. Struck from a low mintage of only 14,632 pieces. First year of issue from the San Francisco Mint, and a popular coin as such. Census: 21 in 62 (1 in 62+), 14 finer (11/14). Ex: *Central States Signature (Heritage, 4/2006)*, lot 2270. From *The Free Tilly Collection*. NGC ID# 25C2, PCGS# 7527

- 6804 1854 Type Two MS62 PCGS.** The initial Type Two gold dollar issue and one of two popularly collected for the subtype, seen here as a bright yellow-gold MS62 piece with above-average reverse detail. NGC ID# 25C3, PCGS# 7531

- 6805 1855 MS61 NGC.** The Type Two gold dollar design lasted just three years in total with the two Philadelphia issues of 1854 and 1855 the most common type coins. This wheat-gold example of the latter date has wheat-gold luster and surprisingly few marks for the grade. NGC ID# 25C4, PCGS# 7532

**1855 Gold Dollar, Highly Lustrous MS63**

- 6806 1855 MS63 NGC.** The Type Two gold dollar design was only produced for three years (1854 to 1856), making it important for the type collector. Highly lustrous yellow-gold surfaces display hints of lime-green and are well-struck. A vertical, as-made planchet defect extending from below the 1 denomination through the 8 in the date does not detract. NGC ID# 25C4, PCGS# 7532

**1855-C Gold Dollar, Unc Details  
Sole Type Two Charlotte Issue**

- 6807 1855-C — Improperly Cleaned — NGC Details. Unc. Variety 1.** The rarer of the two known varieties, with the date slightly further left. The 1855-C gold dollar is a scarce issue overall, becoming especially challenging in AU and Mint State grades. It is also one of the most poorly struck dates in the entire Charlotte gold dollar series, as is evidenced by the central weakness on the present coin. This piece is medium green-gold in color, with light evidence of old cleaning. Struck late-state dies, with multiple clash marks visible at slightly rotated intervals. A radial die crack is also noted on the obverse through the T in UNITED. NGC ID# 25C5, PCGS# 7533

**1855-O Gold Dollar, AU55  
Smooth, Appealing Surfaces**

- 6808 1855-O AU55 NGC. Variety 2.** This New Orleans issue is not prohibitively scarce in the absolute sense, but collector demand is heightened by the issue's status as the only Type Two gold dollar struck at this mint. The present Choice AU example shows weakness on the 8 in the date, but is otherwise well-struck. Medium green-gold patina blankets each side and there are no significant abrasions. NGC ID# 25C7, PCGS# 7535

**1855-O Gold Dollar, AU55  
Only Type Two New Orleans Issue**

- 6809 1855-O AU55 PCGS. Variety 2.** Traces of luster remain in the recesses beneath deep orange-gold patina. The design elements are well brought up for the issue. The 1855-O is widely popular as the only Type Two gold dollar struck at the New Orleans Mint, and is also conditionally challenging in grades finer than AU55. NGC ID# 25C7, PCGS# 7535

**1856-S Type Two Gold Dollar, AU58  
Elusive San Francisco Issue**

- 6810 1856-S Type Two AU58 NGC.** Ex: Browning. The San Francisco Mint struck just 24,600 gold dollars in 1856, all of the Type Two motif. Most entered circulated in the Western territories, and high-grade survivors are scarce. This near-Mint example is well-struck for the type, with smooth honey-gold surfaces and just a trace of friction over the high points of the design. Census: 65 in 58, 33 finer (12/14). NGC ID# 25C8, PCGS# 7536

**1856-S Gold Dollar, AU58  
Only S-Mint Type Two Issue**

- 6811 1856-S Type Two AU58 PCGS. CAC.** The 1856-S is the final Type Two issue, and is the only issue of that design from the San Francisco Mint. The mintage is only 24,600 pieces, which is divided approximately evenly between normal and repunched mintmark varieties. These two reverses share the same obverse die, identified by its diagonal crack from the ear to the U in UNITED. This is a pleasing and partly lustrous example with smooth sun-gold surfaces. Population: 33 in 58, 21 finer (11/14). Ex: FUN Signature (Heritage, 1/2008), lot 3681. From The Free Tilly Collection. NGC ID# 25C8, PCGS# 7536

**1856 Gold Dollar, Slanted 5, MS66  
Immediate Eye Appeal**

- 6812 1856 Slanted 5 MS66 PCGS.** Glistening butter-gold surfaces provide this Premium Gem with immediate eye appeal. This piece exhibits generally good strike detail, although there is typical weakness on OLL and 85 at the reverse center. Shallow planchet flaws appear on the obverse near the central portions of AMERICA. Population: 10 in 66 (2 in 66+), 4 finer (12/14). NGC ID# 25C9, PCGS# 7540

**1857-C Gold Dollar, AU55**  
Above-Average Strike and Planchet Quality

- 6813 1857-C AU55 NGC. Variety 1.** The only known variety. The 1857-C gold dollar bears the dubious distinction of being the worst of all gold dollars in terms of strike and planchet quality. The present Choice AU specimen is a refreshing exception in that the design elements exhibit a well-above-average strike, including the lower part of Liberty's hair, the letters in LIBERTY, most of the plumes and feathers, the reverse wreath, the 85 of the date, and the OL in DOLLAR, all areas that are typically very weak. Moreover, neither side shows the severe "waviness" in the fields or the surface roughness frequently encountered on this date. The coppery-gold surfaces display traces of luster in the recesses and are quite clean throughout. Doug Winter states: "Any piece with better than average eye appeal is very rare and should command a strong premium over a typical example." This exceptional specimen is just such a coin. Census: 44 in 55, 45 finer (10/14). NGC ID# 25CE, PCGS# 7545

**1857-C Gold Dollar, MS61**  
Key Charlotte Mint Issue

- 6814 1857-C MS61 NGC. Variety 1,** the only variety known. Although the Mint issued the first Type Three gold dollars in 1856, the first examples were not struck in Charlotte until the following year. Interestingly, the mintage of the 1857-C — 13,280 pieces — is on the high side compared to most series issues, it is among the rarest in Mint State. This is partially because the 1857-C is, on average, one of the worst produced gold coins in U.S. history. Only a select few Mint State examples have been certified, none above MS62.

The present coin offers an excellent opportunity to acquire one of the finest representatives of this desirable issue. Pleasing olive-gold patina endows the surfaces of this lightly marked specimen. Although the quality of this issue is notoriously poor, this piece exhibits a significantly sharper strike and fewer defects than typically seen. The fields have a wavy appearance, as usual, and there is minor deterioration on the rims. Nonetheless, the surfaces are fairly smooth overall, and patches of luster appear throughout, remarkable for the issue. A number of die cracks are noted on both sides. This piece has great eye quality compared to the average 1857-C, which is usually seen dull and rather rough. PCGS has certified just one example at the MS61 level, with one finer. NGC reports four MS61 representatives, which may represent multiple submissions of the same coin, along with only four other MS62 specimens (12/14).

Ex: Long Beach Signature (Heritage, 9/2008), lot 3171; Long Beach Signature (Heritage, 2/2010), lot 1407. NGC ID# 25CE, PCGS# 7545

**1857-S Gold Dollar, MS61**  
Conditionally Rare

- 6815 1857-S MS61 NGC.** A particularly challenging San Francisco issue with a mintage of only 10,000 pieces. Mint State examples are rare, and are seemingly underappreciated compared to the more popular Charlotte and Dahlonega issues from this period. This piece is well-struck, with soft, wheat-gold luster. A few light, scattered abrasions limit the grade. Census: 9 in 61, 6 finer (11/14). From The Free Tilly Collection. NGC ID# 25CG, PCGS# 7547

**1858-S Gold Dollar, MS61**  
Conditionally Rare

- 6816 1858-S MS61 NGC.** The 1858-S has a mintage of only 10,000 pieces and is an important condition rarity in AU and Mint State. This piece possesses full, shimmering mint luster that exhibits a hint of reflectivity on the obverse and is tinged in a light reddish-gold patina. There are no obvious blemishes on either side, just some minor scuffiness confined mostly to the obverse. Census: 7 in 61, 2 finer (11/14).

Ex: Long Beach Signature (Heritage, 9/2006), lot 3072.

From The Free Tilly Collection. NGC ID# 25CK, PCGS# 7550

---

**1859-S Gold Dollar, Well-Defined MS61  
Very Rare in Mint Condition**

**6817 1859-S MS61 NGC.** The 1859-S gold dollar is very rare in mint condition, with only 23 pieces seen by NGC and PCGS combined. Considerable luster resides on the yellow-gold surfaces of this MS61 specimen, and the design elements are well-impressed. A few light ticks do not detract. Census: 9 in 61, 1 finer (11/14).  
*From The Free Tilly Collection. NGC ID# 25CP, PCGS# 7554*

**6818 1860-S MS61 NGC.** The 1860-S gold dollars were the last struck on the West Coast for a decade and the second-to-last San Francisco regular-issue gold dollars overall. This yellow-orange example has soft but generous luster and surprisingly few abrasions for the grade. Census: 22 in 61, 17 finer (12/14).  
*From The Free Tilly Collection. NGC ID# 25CT, PCGS# 7557*

---

**1866 Gold Dollar, Razor-Sharp MS66**

**6819 1866 MS66 NGC.** The mintage for gold dollars jumped from 3,725 pieces in 1865 to 7,100 in 1866. Most known examples are in mint condition through near-Gem. Only 12 NGC/PCGS-certified coins qualify as Premium Gem. This is a lovely piece that shows deep copper-gold color and luster along with razor-sharp design detail. As with many gold dollars of this date, the fields show heavy die clashing and are also striated, producing bright semireflectivity on each side. Census: 4 in 66, 5 finer (11/14).  
*Ex: Long Beach Signature (Heritage, 9/2009), lot 1428. NGC ID# 25D2, PCGS# 7565*

**6820 1867 MS63 PCGS.** This low-mintage gold dollar is scarce in all grades yet remains affordable. This is a smooth and suitably struck example. All letters in LIBERTY are legible beneath the date, the result of clashed dies. Population: 5 in 63, 21 finer (12/14).  
*Ex: FUN Signature (Heritage, 7/2007), lot 2309. NGC ID# 25D3, PCGS# 7566*

---

**1867 Gold Dollar, Elusive MS66  
Underrated Issue**

**6821 1867 MS66 PCGS.** The 1867 gold dollar is an elusive issue from a small business-strike mintage of 5,200 pieces. Probably no more than 75-110 examples are extant in all Mint State grades, and circulated specimens are quite scarce as well. The true rarity of this date is not generally appreciated outside of series specialists. High-grade business-strike examples have often been mistaken for proofs in auction descriptions.

The present coin is a delightful Premium Gem with sharply detailed design elements and some interesting clash marks on both sides. The prooflike yellow-gold surfaces are well-preserved and show no large or distracting flaws. Population: 4 in 66, 1 finer (12/14). NGC ID# 25D3, PCGS# 7566

---

1868 Gold Dollar, Pastel-Toned MS65

**6822** 1868 MS65 PCGS. Ex: HW Bass Jr. Collection. Fantastic pastel toning on this Gem gold dollar includes peach, gold, and pale mint-green amid top-notch luster on each side. A few faint planchet flakes appear on the reverse, but this prooflike example from the small mintage of 10,500 circulation strikes is hard to better, aesthetically speaking. Population: 9 in 65, 11 finer (12/14). NGC ID# 25D4, PCGS# 7567

---

1869 Gold Dollar, MS64  
Lovely Coloration

**6823** 1869 MS64 PCGS. CAC. Gold dollar production dwindled following the end of the Civil War, with only 5,900 coins struck in 1869. This issue is seldom seen in any grade today, and Mint State pieces are particularly elusive. This Choice example is boldly struck, with satiny surfaces that yield shades of honey, rose, and yellow-gold. Only a few faint luster grazes limit a full Gem assessment from PCGS. Population: 8 in 64, 18 finer (12/14). NGC ID# 25D5, PCGS# 7568

**6824** 1870 MS63 PCGS. The 1870 gold dollar saw production of just 6,300 business strikes and Select and finer examples are conditionally rare. This MS63 coin has attractive honey-gold luster with lighter wheat elements. Population: 15 in 63, 47 finer (12/14). NGC ID# 25D6, PCGS# 7569

---

1870-S Gold Dollar, MS62  
Final San Francisco Issue of the Denomination

**6825** 1870-S MS62 PCGS. Sharply struck and smooth with bright luster throughout the legends and devices. A lovely canary-gold representative of the final San Francisco issue of the denomination prior to the 1915 Panama-Pacific Exposition. Only 3,000 pieces were struck. Population: 16 in 62, 17 finer (11/14). Ex: FUN Signature (Heritage, 1/2009), lot 5151. From The Free Tilly Collection. NGC ID# 25D7, PCGS# 7570

---

1870-S Gold Dollar, MS62  
Popular San Francisco Date

**6826** 1870-S MS62 PCGS. The year 1870 was one of limited gold production in San Francisco; the three dollar piece was not even struck to an official extent, and only the double eagle is considered available today. The gold dollar had a scant mintage of only 3,000 coins, and survivors are scarce across the grade spectrum. Mint State examples are the most elusive, but also the most sought-after. This piece is boldly struck, with semiprooflike mirroring in the fields and warm honey-gold patina overall. There are fewer abrasions than expected for this numeric level. Population: 17 in 62, 17 finer (12/14). NGC ID# 25D7, PCGS# 7570

---

1874 Gold Dollar, MS68  
Condition Rarity Type Coin

**6827** 1874 MS68 NGC. The 1874 gold dollar is a popular type issue, but even it is a condition rarity at the MS68 level. This honey-gold example is smooth from a post-striking perspective, though die clashes are strewn through the fields. The reverse detail is excellent. Census: 9 in 68, 0 finer (12/14). NGC ID# 25DC, PCGS# 7575

- 6828 1880 MS66 PCGS.** Spectacular eye appeal meets the viewer, due to rich orange-red toning, glassy fields, and a needle-sharp strike. A meager 1,636 pieces were struck. Encapsulated in a green label holder.  
*Ex: Dallas Signature (Heritage, 11/2007), lot 1815, which realized \$2,990.*  
*From The Free Tilly Collection. NGC ID# 25DJ, PCGS# 7581*

**1880 Gold Dollar, MS68  
Extraordinary Type Coin**

- 6829 1880 MS68 NGC.** For type purposes, few dates are better suited among Type Three gold dollars than the 1880. The issue had a paltry mintage of just 1,600 coins, but many examples were saved by dealers and speculators, making this one of the more plentiful late-series issues in high grades. Even in MS67, this date is moderately obtainable, and only in MS68 does it truly become rare. The present example is a remarkable piece, showcasing deeply reflective orange-gold fields that contrast nicely with the frosty, razor-sharp devices. Close scrutiny with a loupe fails to reveal even minor flaws, giving this piece exemplary eye appeal. Census: 22 in 68 (3 in 68 ★), 1 finer (11/14). NGC ID# 25DJ, PCGS# 7581

**1880 Gold Dollar, MS68  
Top-Tier Type Coin**

- 6830 1880 MS68 PCGS. CAC.** The 1880 gold dollar had an enticingly low mintage of only 1,600 coins, the second-lowest production figure in the series from the Philadelphia Mint. Remarkably, however, numerous examples were retained by dealers and speculators, with the result that this issue is one of the more easily obtainable dates from this period and highly popular among type collectors. Almost all known examples are in Mint State, and the majority of these grade in the MS65 to MS67 range. In MS68, this issue finally becomes a condition rarity, and finer pieces are nearly unknown.  
This piece is boldly struck, with seemingly flawless preservation. Heavily frosted devices beautifully accent semiprooflike fields, while warm sun-gold patina blankets each side. Population: 26 in 68 (1 in 68+), 1 finer (11/14). NGC ID# 25DJ, PCGS# 7581

- 6831 1886 MS65 PCGS. CAC.** Pale yellow with "split luster," frosted in certain areas and reflective in others. Quality detail is a further essential component to the all-around eye appeal. Population: 44 in 65, 21 finer (12/14). NGC ID# 25DR, PCGS# 7587

- 6832 1889 MS66 NGC.** A Premium Gem representative of the last year for the gold dollar denomination. Although the mintage is a relatively scant 28,950, high-grade pieces are available due to a few small hoards — presumably because people saved the final-year gold dollars as souvenirs. This khaki-gold piece possesses stunningly rich luster over well-preserved surfaces.  
*Ex: FUN Signature (Heritage, 1/2009), lot 10053. NGC ID# 25DU, PCGS# 7590*

**1889 Gold Dollar, Superb Gem  
Final Year of the Series**

- 6833 1889 MS67 PCGS. CAC.** The gold dollar denomination stumbled to a halt in 1889 after 40 years of issue with the legislation for repeal coming the next year. This end-of-series Superb Gem has shimmering luster with a mix of apricot and peach shades. Though the 29,000 business strikes for the year were saved in quantity and even Superb Gems remain available for a price, PCGS has graded just four coins as MS68 or better (11/14).  
*From The College Collection. NGC ID# 25DU, PCGS# 7590*

## PROOF GOLD DOLLARS

### 1859 Gold Dollar, PR63 Cameo One of Only 20 to 25 Believed Known

- 6834 1859 PR63 Cameo PCGS.** The proof 1859 gold dollar was the first in the series with a recorded mintage: 80 coins. Many of these were likely melted as unsold, however, and it is estimated that no more than 20 to 25 pieces exist today (Jeff Garrett and Ron Guth suggest as few as 15 survive), three of which are permanently housed in the Smithsonian Institution and the American Numismatic Society Collection. The combined certified population for this date of PCGS and NGC is just 27 coins, a figure that certainly includes resubmissions. This Cameo example is boldly struck, with deep mirroring in the fields and rich orange-gold toning overall. A few faint hairlines in the fields limit the grade, but the devices are frosted and undisturbed. An important and seemingly underappreciated early proof rarity. This is only the tenth time we have offered a proof 1859 gold dollar in the past 12 years. Population: 2 in 63, 4 finer (11/14).  
*From The Free Tilly Collection.* NGC ID# 2500, PCGS# 87609

### 1881 Gold Dollar, PR64 Cameo Only 40-50 Believed Known in All Grades

- 6835 1881 PR64 Cameo NGC.** A mere 87 gold dollars were made in 1881, and 44 have been graded by NGC and PCGS, a number of which are likely resubmissions (11/14). The brass-gold surfaces of this near-Gem Cameo exhibit a gold-on-black appearance when the coin is viewed head on. Sharply struck and nicely preserved. Census: 6 in 64 Cameo, 5 finer (11/14).  
*Ex: ANA Signature (Heritage, 7-8/2008), lot 1883; Houston Signature (Heritage, 12/2008), lot 1820. NGC ID# 25ES, PCGS# 87631*

### 1883 Gold Dollar, PR64 Deep Cameo

- 6836 1883 PR64 Deep Cameo PCGS.** The fashion for proof gold dollars as patrician Christmas presents was not yet in full gear in 1883, though the official mintage of 207 proofs is a transitional figure to the four-figure outputs that began the next year. This profoundly contrasted near-Gem has marvelous contrast and "orange-peel" texture in the fields. Population: 1 in 64 Cameo, 1 finer (11/14). NGC ID# 25ET, PCGS# 97633

---

1887 Gold Dollar, PR63  
Elusive Cameo Representative

**6837** 1887 PR63 Cameo PCGS. CAC. Proof gold dollar production was substantial in 1887, the Philadelphia Mint striking 1,043 coins. Survivors, however, are not so plentiful, particularly in Cameo grades. PCGS has certified only 31 Cameos in all numeric levels, with four in PR63 and 25 numerically finer (12/14). This example is starkly contrasted, with tack-sharp definition and deeply mirrored fields. A few minor marks define the grade. NGC ID# 25EX, PCGS# 87637

---

1887 Gold Dollar, PR64 Cameo  
Moderate Contrast

**6838** 1887 PR64 Cameo PCGS. A clearly contrasted near-Gem Cameo beauty from the third-to-last issue in 40 years of gold dollar coinage. Moderately frosted devices stand out from subtly textured yellow-gold mirrors that show touches of orange along the margins. Population: 7 in 64 Cameo (1 in 64+), 16 finer (11/14). NGC ID# 25EX, PCGS# 87637

---

1888 Gold Dollar, PR65 Cameo  
Remarkable Contrast

**6839** 1888 PR65 Cameo NGC. The exceptional contrast between the deeply mirrored fields and the fully lustrous yellow-gold devices visibly supports the Cameo designation that NGC assigned to this Gem proof gold dollar. Both sides are boldly defined and possess exceptional eye appeal. Census: 15 in 65 Cameo (1 in 65+), 22 finer (12/14). NGC ID# 25EY, PCGS# 87638

---

1889 Gold Dollar, PR64  
Final Year of Issue

**6840** 1889 PR64 PCGS. It must have come as a disappointment to certain Philadelphia families that the proof gold dollars were discontinued after 1889. This end-of-the-series near-Gem proof has low contrast but high mirrors and appeal. The fields display considerable "orange-peel" texture. Population: 14 in 64, 18 finer (11/14). NGC ID# 25EZ, PCGS# 7639

---

1889 Gold Dollar, PR64 Cameo  
Excellent Final-Year Type Coin

**6841** 1889 PR64 Cameo PCGS. Proof gold dollar production amounted to an impressive 1,779 coins in 1889, but this date is curiously scarcer than the 1888 proof, which had a smaller mintage of 1,079 pieces. This leads one to surmise that a number of this issue was either melted or perhaps wound up in circulation. The present coin is deeply contrasted, with rich apricot-gold color and sharp, frosty devices. PCGS has certified only 19 Cameos in all grades, with four in PR64 and 12 numerically finer (11/14). NGC ID# 25EZ, PCGS# 87639

## EARLY QUARTER EAGLES

### 1798 Quarter Eagle, AU Details Rare BD-1, Four Berries

- 6842** 1798 Close Date, Four Berries, BD-1, High R.5 — Mount Removed, Cleaned — NGC Details. AU. Ex: Hilt Collection. Bass-Dannreuther Die State a. Only 1,094 quarter eagles were struck in 1798, accomplished with just two die pairs. Both varieties are rare in all grades, though BD-1 is about twice as rare as BD-2, with only 25 to 30 coins believed extant. A heavy die break that quickly developed near the date likely led to this die's early retirement. The present coin is from an early die state, with no evidence of the break near the date. Some minor striking deficiency is noted in the centers, though the design elements are otherwise well-defined. This piece was at one point removed from jewelry, as the rim shows evidence of mount removal. The surfaces are lightly cleaned, but exhibit a pleasing green-gold hue.  
From *The Liberty USA Collection*. PCGS# 45504 Base PCGS# 97649

### 1798 Quarter Eagle, AU Details BD-2, Five Berries, Attractively Original

- 6843** 1798 Wide Date, Five Berries, BD-2, R.5 — Obverse Graffiti — NGC Details. AU. Ex: Hilt Collection. Bass-Dannreuther Die State a. BD-2 is the more often seen of the two 1798 quarter eagle varieties, but it is still itself rare, with only 45 to 55 pieces believed extant. The present coin is visually appealing, with original bronze-gold patina that yields overtones of peach and coppery-gold. The strike is sharp and there is just a brush of friction over the high points of the design. A loupe reveals a few small, faint numerals scratched into the left obverse field, but these are hardly obtrusive and are well-masked by the rich patina. This is the only use of this obverse die, though this reverse was later employed for the JR-4 1798 dime variety, as well as the JR-1 1800 dime variety. The similarity of the dime and quarter eagle's diameters allowed the same tail dies to be used for both issues as the Mint's budget and work load required.  
From *The Liberty USA Collection*. PCGS# 45505 Base PCGS# 7649

### 1804 Quarter Eagle, Unc Details BD-2, 14 Stars Reverse

- 6844** 1804 14 Stars Reverse, BD-2, R.4 — Improperly Cleaned — NGC Details. Unc. Ex: Hilt Collection. Bass-Dannreuther Die State a/a. BD-2 is the more often seen of the two 1804 quarter eagle varieties, though it is still itself scarce, with only 150 to 200 coins believed known in all grades. This is the second and final use of this obverse die, though this reverse was also used for the JR-2 dime variety of this same year. The obverse cracked in a later die state, but not terminally; it is unknown if this die completely failed or if it was simply not needed after a coinage of just 3,327 coins, comprising both known varieties of this issue.  
This example is well-struck and sharply detailed. The surfaces show evidence of old, light cleaning, though the color is a pleasing straw-gold hue. Some minor adjustment marks are observed on portions of the reverse rim, a typical characteristic of gold coins from this period.  
From *The Liberty USA Collection*. PCGS# 45510 Base PCGS# 7652

---

1805 Quarter Eagle, BD-1, XF Details

- 6845** 1805 BD-1, R.4 — Repaired — PCGS Genuine. XF Details. Bass-Dannreuther Die State b/a. Widely popular as the only variety for the year, but scarcely found with only 100 to 150 examples believed extant. This piece is well-struck in the margins, though the central reverse shows some of the usual weakness. Pale green-gold color blankets each side. The fields are extensively repaired on both sides, likely in an effort to efface unsightly abrasions, but the work was done carefully and is virtually undetectable without the aid of a loupe. PCGS# 45511 Base PCGS# 7653
- 

---

1806/5 Quarter Eagle, BD-2, AU Details  
Rare Overdate Variety

- 6846** 1806/5 7x6 Stars, BD-2, High R.5 — Improperly Cleaned — NGC Details. AU. Ex: Hilt Collection. Bass-Dannreuther Die State c/b. This is by far the rarer of the two 1806 quarter eagle varieties, with only 25 to 35 pieces believed extant. This obverse die was first employed in 1805, but was again annealed and then overdated for a small run of 1806 coinage. This is the third of four uses for this reverse, which was previously employed the BD-1 1805 and BD-1 1806 varieties, and later for the sole 1807 variety of this denomination.

This piece shows a bold, even strike and sharp detail, though some crisscrossing adjustment marks are observed on the reverse. NGC notes evidence of light cleaning, but the surfaces have since acquired deep orange-gold coloration and retain noticeable semiprooflike mirroring in the fields. A highly appealing example of this rare overdate variety.

*From The Liberty USA Collection. PCGS# 45513 Base PCGS# 7655*

---

1807 Quarter Eagle, BD-1, AU Details  
Ideal Bust Right Type Coin

- 6847** 1807 BD-1, R.3 — Obverse Repaired — NGC Details. AU. Ex: Hilt Collection. Bass-Dannreuther Die State a/b. This is the most often seen variety of this type, though its status as the only variety of the 1807 issue makes it highly popular among date and type collectors alike. Early quarters are in general scarcer than their half eagle counterparts, largely because demand for the denomination was comparatively negligible. This piece is boldly and evenly struck, with bright yellow-gold color. Close examination with a loupe reveals some expertly done repair work in the right obverse field, though the unaided eye finds nothing obtrusive. From *The Liberty USA Collection*. PCGS# 45514 Base PCGS# 7656

1807 Quarter Eagle, AU Details  
BD-1, Sole Variety of the Year

- 6848** 1807 BD-1, R.3 — Obverse Graffiti — NGC Details. AU. Bass-Dannreuther Die State a/a. BD-1 is the only 1807 quarter eagle variety. It is fairly plentiful in the context of early gold varieties, with 250 to 350 examples believed extant, but demand is strong among date and type collectors alike. This is the only use of this obverse, and the final of four uses for this reemployed 1805 reverse die. The present coin shows pleasing green-gold surfaces and well-struck design elements. A few faint, unobtrusive pinscratches near the E in LIBERTY account for the Details grade from NGC, but these are hardly discernable to the unaided eye. PCGS# 45514 Base PCGS# 7656

1821 BD-1 Quarter Eagle  
AU Sharpness

- 6849** 1821 BD-1, R.5 — Graffiti — PCGS Genuine. AU Details. BD-1, R.5. The sole dies for the rare date. A well defined straw-gold example. A narrow letter A is lightly entered into the left reverse field above the highest leaf pair, and a short, broad letter A is present above the arrowheads. We note a dull cluster of marks on the field beneath BUS UNUM, and a small dig at the top of the cap, but abrasions are otherwise inconsequential. PCGS# 45516 Base PCGS# 7662

1824/1 Quarter Eagle, BD-1, XF45  
High-End for the Grade

- 6850** 1824/1 BD-1, R.5, XF45 PCGS. CAC. Bass-Dannreuther Die State a/a, as always. Just a single variety is known for this rare issue which survives to the limited extant of only 50 to 60 pieces. The reverse is the same as was used for the 1821 quarter eagle, as well as the 1825 BD-1 and BD-2 varieties. The obverse is a leftover 1821 die, overdated to 1824, with the flag of the underlying 1 evident to the left of the diagonal of the primary 4. This Choice XF representative is slightly soft in the extreme centers, more a product of insufficient die pressure rather than wear, as just slight friction is detected over the high points of the design. Deep yellow-gold patina encompasses both sides, and the eye appeal is exceptional for the grade. Housed in an old green label holder and CAC-endorsed. PCGS# 45517 Base PCGS# 7663

- 6851** 1830 BD-1, R.4 — Heavily Damaged, Bent — ANACS. VF20 Details. Most survivors of the rare Capped Head Left type are priced out of reach for the typical U.S. collector, but the present tan-brown coin is collectible. The central reverse has a group of scratches that cause a bend. The obverse shows scratches on Liberty's jaw, forehead, and cap. PCGS# 45524 Base PCGS# 7670

---

1830 Quarter Eagle, BD-1, AU Details  
Elusive Date or Type Candidate

- 6852** 1830 BD-1, R.4 — Obverse Improperly Cleaned — NGC Details. AU Details. Ex: Hilt Collection. Bass-Dannreuther Die State a/a, as always. BD-1 is a scarce variety with only 80 to 100 examples believed extant, but its popularity as the only variety of this date draws strong demand in all grades. This is the only use of this obverse, though this reverse die was later employed for the final four years of the type. This piece is well-struck, with just a touch of light friction over the high points of the design. NGC notes evidence of light cleaning on the obverse, though the warm bronze-gold patina appears uniform and the eye appeal is pleasing. From *The Liberty USA Collection*. PCGS# 45524 Base PCGS# 7670

---

Rare AU Sharpness BD-1  
1833 Two and a Half

- 6853** 1833 — Rim Filing — NGC Details. AU. BD-1, R.5. The sole dies for this rare, low mintage date. The rims are lightly filed, most noticeably near 10:30 on the reverse. Otherwise, this is an attractive sun-gold example with substantial peripheral luster and only minor to moderate marks. The eagle's shield is lightly brought up, usual for the issue.

---

1833 Quarter Eagle, Choice AU  
BD-1, Pleasing Surfaces

- 6854** 1833 BD-1, R.5, AU55 PCGS. Bass-Dannreuther Die State a/c. The only dies for this rare date. The U in UNITED is repunched, and the 8 in the date is entered slightly high. A splendid Choice AU example with attractive and minimally abraded lemon-gold surfaces. The strike is generally sharp, although the curl left of the ear and the first two vertical shield stripes show minor incompleteness. Dannreuther writes, "the apparent 'die crack' that joins the upper and lower knobs of the 3s of the date is from a broken punch, not a cracked die." Housed in a green label holder. PCGS# 45527 Base PCGS# 7673

## CLASSIC QUARTER EAGLES

### 1835 Quarter Eagle, Bright MS63

- 6855** 1835 MS63 NGC. Breen-6141, Variety 6, R.2. Ex: Hilt Collection. A widely spaced AM in AMERICA identifies this distinctive Classic Head die marriage. The 1835 quarter eagle, from a mintage exceeding 131,000 pieces, has a relatively low certified population number of 145 pieces. The bright yellow-gold surfaces of this Select example display partially prooflike fields when the coin is tilted under a light source, especially on the reverse. The design elements are well-struck except for the usual softness in the hair over Liberty's ear. Census: 14 in 63, 7 finer (11/14).  
From *The Liberty USA Collection*. NGC ID# 25FT, PCGS# 7693

### 1836 Quarter Eagle, MS61 Script 8, Variety 11

- 6856** 1836 Script 8 MS61 PCGS. CAC. Breen-6143, Variety 11, R.2. A butter-gold type representative. The strike is intricate at the borders, although the centers exhibit minor merging. One thin mark is noted beneath the N in UNITED. A delicate but nearly bisecting die crack traverses the obverse between 11 o'clock and 4:30. Little has been published about die varieties of Classic quarter eagles, relative to other early Federal series. NGC ID# 25FU, PCGS# 7694
- 6857** 1838 AU58 NGC. Breen-6146, Variety 19, R.2. The sole die pair for the design and year. This dusky antique-gold example is lightly rubbed on the high points of the softly struck design elements and has minor marks and a few deeper abrasions in the fields. NGC ID# 25FY, PCGS# 7696

### 1838-C Quarter Eagle, XF40 First Branch Mint Issue

- 6858** 1838-C XF40 PCGS. Breen-6147, Variety 20, R.3. A yellow-gold example with an attractive obverse and distributed small marks throughout the reverse field. The only dies for the first branch mint quarter eagle issue. A low mintage of 7,880 pieces makes it a key to the series. The mintmark is on the obverse and is widely repunched south. The reverse displays a vertical crack beneath the wing and a radial crack above the left (facing) wing. NGC ID# 25FZ, PCGS# 7697

### 1839 Quarter Eagle, AU58 Gleaming 'Sleeper' Issue

- 6859** 1839 AU58 NGC. Breen-6148, Variety 21, R.3. The 1839 Philadelphia issue shows a surprisingly low population at either service, although its mintage is relatively substantial compared to surrounding dates. Mint State examples are infrequently seen, making this near-Mint coin both a perceptive alternative for the final year of the Classic Head motif. The wing tips and the highest points on Liberty's curls provide the only hint of circulation. Marks and abrasions are minor. Gleaming medium-gold color reveals sharp remaining luster for this issue, called the "sleeper rarity" of the series by Garrett and Guth. Census: 18 in 58, 12 finer (11/14). NGC ID# 25G2, PCGS# 7698

### 1839 Two and a Half, AU58 Better Low Mintage Date

- 6860** 1839 AU58 NGC. Breen-6148, Variety 21, R.3. This final-year low mintage Philadelphia Classic quarter eagle issue is scarce in an absolute sense, though it has attracted less attention than its branch mint counterparts. Well struck with radiant and lightly abraded lemon-gold surfaces. Census: 18 in 58, 12 finer (11/14).  
Ex: *Long Beach Signature* (Heritage, 2/2009), lot 2428; *Long Beach Signature* (Heritage, 6/2011), lot 4471, which realized \$4,600. NGC ID# 25G2, PCGS# 7698

1839-C Quarter Eagle, VF30  
Variety 23, Rich Original Patina

- 6861** 1839-C Breen-6149, Winter-1, Variety 23, R.3, VF30 PCGS. One of the scarcer of the three known die marriages for this final C-mint Classic quarter eagle. Liberty's portrait is bold and displays substantial luster, while the eagle's neck and wings display wear. Just 18,140 pieces were struck. Housed in a green label holder. Ex: *Dallas Signature* (Heritage, 10/2006), lot 2477. NGC ID# 25G4, PCGS# 7699

- 6862** 1839-C — Repaired — NGC Details. AU. Breen-6149, Winter-1, Variety 23, R.3, showing the C mintmark over the left half of the 3 and the olive branch tip nearly centered over the D in the denomination. Extensive smoothing and polishing appears in the left obverse field and on the profile of Liberty, and to a slightly lesser extent in the right field. The device and star outlines show deep charcoal-black patina. The reverse has escaped relatively unscathed, save for scattered marks. This is nonetheless an example of the Obverse Mintmark type, and as such should find numerous willing bidders. The mintage was 18,140 pieces. NGC ID# 25G4, PCGS# 7699

1839-C Quarter Eagle, Unc Details  
Pleasing Patina

- 6863** 1839-C Breen-6149, Winter-3, Variety 24, R.4 — Improperly Cleaned — NGC Details. Unc. The 1839-C is widely popular among Southern gold specialists as one of only two Charlotte issues in the Classic Head series. This example is well-struck and unworn, though NGC notes evidence of old cleaning. Both sides show deep green-gold coloration, with hints of luster remaining in the recesses. A remarkably attractive representative for a Details-graded coin. NGC ID# 25G4, PCGS# 7699

LIBERTY QUARTER EAGLES

1841-C Quarter Eagle, Toned XF45  
Scarce in Circulated Grades

- 6864** 1841-C XF45 PCGS. Variety 1. The only known variety. The 1841-C quarter eagle is scarce in circulated grades and rare in Mint State. PCGS and NGC have seen only 185 examples in all grades. Deep orange-gold, ice-blue, and lavender patination cascades over the surfaces of this well-defined offering. Neither side reveals significant marks. Population: 19 in 45, 35 finer (12/14). NGC ID# 25GE, PCGS# 7721

- 6865** 1842-C VF20 PCGS Secure. Variety 1. This low-mintage issue consisted of a mintage of 6,729 pieces, requiring only the sole die pair. This reddish-orange example shows the extensive wear and a few marks expected at this grade level. The 1842-C quarter eagle is, nonetheless, among the rarest C-mint issues, seldom seen in any grade. NGC ID# 25GH, PCGS# 7724

1842-C Quarter Eagle, XF45  
Deep Reddish-Gold and Honey Hues

- 6866** 1842-C XF45 NGC. CAC. Variety 1. The 1842-C is one of the scarcer quarter eagle issues from this mint, with only 100 to 125 examples believed extant in all grades. This issue is also often plagued by striking deficiency, and many examples are harshly cleaned. The present Choice XF representative exhibits an undeniably original "crust," with deep orange and cherry-gold patina in the recesses amid warm bronze-gold color elsewhere. The stars and extreme centers show the usual weakness, but the motifs remain remarkably well-detailed for the grade. An important opportunity for the collector who appreciates old-time coloration. Census: 9 in 45, 32 finer (11/14). NGC ID# 25GH, PCGS# 7724

---

**1843 Quarter Eagle, Bright MS62**

**6867 1843 MS62 PCGS.** Bright yellow-gold radiance dominates the eye appeal of this MS62 example, which hails from a pre-California Gold Rush issue with a mintage that just clears six figures. Strongly struck with areas of purplish alloy at the right obverse lettering. Population: 7 in 62, 2 finer (12/14).  
Ex: ANA Signature (Heritage, 8/2010), lot 5785. NGC ID# 25GL, PCGS# 7727

**6868 1844-D — Improperly Cleaned — NGC Details. AU. Variety 5-I.** This sharply detailed Dahlonega quarter eagle has moderate hairlines and other handling marks on both sides. NGC ID# 25GV, PCGS# 7736

---

**1847-D Quarter Eagle, AU50  
Variety 9-N, the Only Dies**

**6869 1847-D AU50 PCGS. Variety 9-N.** The only known dies for the 1847-D quarter eagle lasted for a total of 15,784 strikes during the year. One of those is the present AU example with its combination of light yellow and powder-blue, exhibiting a splash of navy-blue at the shield. Scattered marks are entirely trivial. Population: 18 in 50, 68 finer (12/14). NGC ID# 25H7, PCGS# 7746

**6870 1847-O — Rotated Dies — AU55 NGC. Variety 4.** The reverse is rotated clockwise 90 degrees on this example. Variety 4 is often found with the reverse rotated, sometimes a full 180 degrees. This Choice AU piece has a trace of luster on its green-gold surfaces with trivial microscopic handling marks. NGC ID# 25H8, PCGS# 7747

**6871 1848-D — Improperly Cleaned — NGC Details. AU. Variety 10-O.** The lightly cleaned obverse exhibits distinct orange coloring while the reverse has subdued greenish-gold color on this scarce Dahlonega gold quarter eagle. NGC ID# 25HC, PCGS# 7751

---

**1848-D Quarter Eagle, AU50  
Deep Red-Orange Patina, Gold CAC Label**

**6872 1848-D AU50 PCGS. Gold CAC. Variety 10-N.** The 1848-D quarter eagle saw a mintage of 13,771 circulation strikes, and the issue today is one of the few D-mint quarter eagles that can be found with a decent strike, as seen here. This piece shows the more frequently seen reverse with higher mintmark than on the 10-O variety. Deep reddish-orange patina and high-appeal surfaces make this a compelling potential acquisition, and the gold CAC approval sticker will also attract a bidder contingent. As might be expected, this is the sole 1848-D at CAC with the gold label. NGC ID# 25HC, PCGS# 7751

---

**1848-D Quarter Eagle, Well-Struck AU55  
Elusive Any Finer**

**6873 1848-D AU55 NGC. Variety 10-N.** The mintmark is high and touches the branch stem, feathers fill the upper half of the mintmark opening, and the fraction bar extends to the left side of the opening in the mintmark. From a mintage of 13,771 pieces, the 1848-D is one of the more available quarter eagles from the Dahlonega Mint. NGC and PCGS have certified nearly 300 specimens in all grades. Mint State pieces, however, account for fewer than 40 coins, none finer than MS63. Greenish-gold coloration on the obverse of this Choice AU example cedes to orange-gold on the reverse. The design elements are well-struck and neither side reveals significant marks. Census: 30 in 55, 60 finer (10/14). NGC ID# 25HC, PCGS# 7751

---

1848-D Quarter Eagle, Bright AU58

- 6874** 1848-D AU58 NGC. Variety 10-O. The high mintmark touches the branch stem and feathers fill the upper half of the mintmark opening, confirming the variety. Bright yellow-gold surfaces display ample luster and exhibit sharply struck design features. Both sides are quite clean Census: 41 in 58, 19 finer (12/14). NGC ID# 25HC, PCGS# 7751

---

1849 Quarter Eagle, MS62  
Rare in Mint Condition

- 6875** 1849 MS62 NGC. The 1849 quarter eagle is rare in mint condition. This MS62 offering displays a good amount of luster on its yellow-gold surfaces. The design elements are well-impressed except for the usually seen softness on the eagle's left (facing) leg. Minute abrasions determine the grade. Census: 6 in 62, 3 finer (12/14). NGC ID# 25HD, PCGS# 7752

---

1849-C Quarter Eagle, Well-Struck AU53

- 6876** 1849-C AU53 NGC. One die variety is known for the 1849-C quarter eagle, struck to the tune of just 10,220 pieces. Mint State examples are extremely rare and infrequently seen no better than MS61 or MS62. Greenish-gold surfaces on this AU53 example display well-struck devices save for the usual softness on the eagle's left (facing) leg. Both sides are remarkably clean. Census: 15 in 53, 43 finer (12/14). NGC ID# 25HE, PCGS# 7753

---

1850-D Two and a Half, MS61  
Ex: Green Pond Collection

- 6877** 1850-D MS61 NGC. Variety 13-N (formerly 13-M). The present 1850-D quarter eagle is the plate coin for the issue in the second edition of Douglas Winter's Dahlonega Mint gold coin reference. Formerly part of the famous Green Pond collection, it represents the usual '50-D variety with the 0 in the date close to the shoulder tip. Both sides display medium to deep orange toning with lighter lime-green shades near the rims. Well struck for a Southern gold issue. Smooth for the designated grade aside from a faint cluster of small marks on the field below the hairbun. From a mintage of 12,148 pieces, the 1850-D is highly elusive in Mint State. Census: 8 in 61, 2 finer (11/14).  
*Ex: Green Pond Collection (Heritage, 1/2004), lot 1028, which realized \$11,500. NGC ID# 25HJ, PCGS# 7757*

**1851-C Two and a Half, AU53  
Deep Original Patina**

- 6878 1851-C AU53 PCGS. CAC. Variety 1.** A fairly scarce Charlotte issue, with only 160 to 210 examples believed extant in all grades from a mintage of 14,923 pieces. This is an elusive AU representative, displaying natural green-gold patina with moderately well-struck devices. Several diagonal grooves running across each side are remnants of some unusually deep roller marks in the planchet, not completely erased by the die pressure. Population: 11 in 53, 14 finer (11/14). NGC ID# 25HM, PCGS# 7760

**1854 Quarter Eagle, Conditionally Rare MS65**

- 6879 1854 MS65 NGC.** 1854 quarter eagles are available through MS62. Gem and finer pieces are quite rare. Bright luster radiates from the yellow-gold surfaces of this MS65 specimen imbued with traces of wheat-gold. Sharply struck design elements and well-cared for surfaces heighten the coin's eye appeal. An unobtrusive linear mark in the lower reverse field may prevent an even finer grade. Census: 9 in 65 (1 in 65 ★), 2 finer (12/14). NGC ID# 25HX, PCGS# 7769

**1854-C Quarter Eagle, Remarkably Clean XF45**

- 6880 1854-C XF45 PCGS. CAC. Variety 1.** One die pairing was required to strike the meager mintage of 7,295 quarter eagles in Charlotte in 1854. A mix of yellow-gold and tan patination covers both sides of this Choice XF offering. The design elements are well-defined except for the typical strike weakness in the eagle's legs. Both sides are remarkably clean. NGC ID# 25HY, PCGS# 7770
- 6881 1857-O AU58 NGC.** The yellow-gold surfaces of this O-mint quarter eagle exhibit well-struck design elements. Minimally abraded for a coin that has seen brief circulation. NGC ID# 25JE, PCGS# 7784

**1860 Liberty Quarter Eagle, MS65  
New Reverse Type, One Finer at NGC**

- 6882 1860 New Reverse, Type Two, MS65 NGC.** A new reverse hub was prepared for quarter eagles in 1859, with smaller, more widely spaced letters and arrow heads. Most of the 22,563 Liberty quarter eagles struck the following year employed this reverse die. Unfortunately, few examples were saved by contemporary collectors and the issue is a challenging one in all Mint State grades.

This delightful Gem exhibits sharply detailed design elements and vibrant frosty mint luster on both sides. The light yellow and greenish-gold surfaces are free of mentionable distractions and eye appeal is terrific. Census: 3 in 65, 1 finer (11/14). NGC ID# 25JP, PCGS# 7791

- 6883 1862 AU58 NGC.** After a massive quarter eagle mintage in 1861, production of the denomination in Philadelphia did not reach six figures the next year. This near-Mint piece has ample wheat-gold luster in the fields and pleasing detail with only slight rub. Census: 59 in 58, 57 finer (12/14). NGC ID# 25JZ, PCGS# 7796

**1864 Quarter Eagle, AU Details  
Mintage 2,824 Pieces**

- 6884 1864 — Filed Rims — PCGS Genuine. AU Details.** The 1864 quarter eagle has a mintage of only 2,824 business strikes, making any example a prize. Though this piece has evidence of past rim filing, particularly at the top of the reverse, its yellow-gold surfaces show surprisingly little wear and the interior eye appeal is solid.

**1868 Two and a Half, MS62 Prooflike  
Among Finest Certified by NGC**

- 6885 1868 MS62 Prooflike NGC.** Since gold coins failed to circulate on the East Coast in 1868, only 3,600 quarter eagles were struck for commerce. Most were eventually melted, and survivors congregate in AU grades. This flashy and sharply struck piece has only minor marks. NGC has certified no examples above MS62, with or without a Prooflike designation. Census: 3 in 62 Prooflike, 0 finer (12/14). Ex: *West Palm Beach Signature* (Heritage, 6/2008), lot 1840; *October Signature* (Heritage, 10/2009), lot 1323. PCGS# 77807

**1869 Two and a Half, MS61  
Rare Prooflike Example**

- 6886 1869 MS61 Prooflike NGC.** The scarcity of the 1869 quarter eagle is largely a product of its low mintage of only 4,320 coins. Prooflike examples exist, but are so rare that only the most patient collector may acquire one. NGC has designated only eight coins as Prooflike in all grades, with four in MS61 and three numerically finer (12/14). This piece is sharply struck and flashy, with bright yellow-gold color overall. Minor, scattered marks in the fields account for the grade. PCGS# 77809

- 6887 1869-S AU58 PCGS.** The 29,500 quarter eagles struck in San Francisco in 1869 quickly vanished into commercial channels and attrition claimed many. This scarcely worn survivor has ample honey-gold luster remaining in the protected areas of the fields. Population: 29 in 58, 16 finer (12/14). NGC ID# 25KE, PCGS# 7810

- 6888 1893 MS65 PCGS.** All quarter eagles from 1880 to 1899 were minted at Philadelphia. The highest circulation-strike production that period occurred in 1893, when 30,000 pieces were coined. This Gem has brilliant, satiny luster with bright yellow-gold surfaces and full design definition. Population: 51 in 65, 25 finer (12/14). NGC ID# 25LH, PCGS# 7845

- 6889 1893 MS65 NGC.** With just 30,000 business strikes produced in 1893, it is clear that the quarter eagle was not a priority for the U.S. Mint at the time. This Gem has swirling sun-gold luster and a generally strong strike. Census: 51 in 65, 33 finer (12/14). NGC ID# 25LH, PCGS# 7845

**1893 Quarter Eagle, Elusive MS66**

- 6890 1893 MS66 PCGS. CAC.** The 1893 quarter eagle can be located through near-Gem without too much difficulty but becomes elusive in finer levels of preservation. This Premium Gem offering is awash in vibrant luster. The yellow- and orange-gold surfaces take on a slightly deeper hue on the reverse, and all design elements are well-impressed. There are no significant marks on either side. The CAC sticker affirms the coin's pleasing eye appeal. Population: 24 in 66, 1 finer (10/14). NGC ID# 25LH, PCGS# 7845

**1893 Quarter Eagle, MS67  
Tied for Finest Certified**

- 6891 1893 MS67 NGC.** Seemingly flawless preservation and razor-sharp design elements complement thickly frosted luster on each side of this Superb Gem example. Pale honey-gold patina is the primary hue overall, though hints of mint, rose, and lilac are also present. The 1893 quarter eagle is a significant condition rarity above the MS66 grade level. Census: 5 in 67, 0 finer (12/14). NGC ID# 25LH, PCGS# 7845

---

**1894 Quarter Eagle, Sharply Struck MS65**

**6892 1894 MS65 NGC.** The 1894 quarter eagle boasts a low mintage of 4,000 pieces and is scarce in all grades. The yellow-gold surfaces of this Gem are sharply struck throughout. Both sides are awash in pleasing luster and have been well cared for. Census: 15 in 65 (1 in 65 ★), 10 finer (11/14). NGC ID# 25LJ, PCGS# 7846

---

**1897 Quarter Eagle, MS67  
Only One Numerically Finer at PCGS**

**6893 1897 MS67 PCGS.** The 1897 quarter eagle had a low mintage of fewer than 30,000 pieces, but remains available in grades through MS65. Finer coins are scarce, and are genuinely rare as high as the MS67 level. This frosty piece showcases radiant green-gold luster and sharply struck design elements. Close examination fails to reveal any mentionable surface flaws. Population: 12 in 67, 1 finer (12/14). NGC ID# 25LM, PCGS# 7849

**6894 1899 MS65 NGC.** A great-looking type coin, this Gem 1899 quarter eagle shows rich mint luster with a full strike on surfaces that alternate lime-green and orange-gold patina. Nice for the grade. NGC ID# 25LP, PCGS# 7851

**6895 1902 MS63 PCGS. Gold CAC.** A fully struck Liberty type coin with apricot-gold centers and olive-green margins. A loupe reveals only incidental contact. Gold CAC quarter eagles are highly elusive. Encapsulated in a first generation holder. NGC ID# 25LT, PCGS# 7854

---

**1902 Liberty Quarter Eagle, MS67  
Tied for the Finest at PCGS**

**6896 1902 MS67 PCGS.** This beautiful Superb Gem is tied for the finest that PCGS has certified, with only seven finer examples submitted to NGC (12/14). Both sides have highly lustrous satin surfaces with full detailed design motifs. Rich yellow-gold surfaces host lovely pink and rose overtones. Population: 44 in 67, 0 finer (12/14). NGC ID# 25LT, PCGS# 7854

---

**1902 Quarter Eagle, Highly Lustrous MS67  
Elusive at This Level**

**6897 1902 MS67 PCGS.** The 1902 quarter eagle is elusive in Superb Gem. Greenish-gold surfaces radiate blazing luster and exhibit sharply struck design elements. Close examination reveals no mentionable contact marks, though a handful of as-made copper stains are visible, especially on the reverse. Population: 44 in 67, 0 finer (12/14). NGC ID# 25LT, PCGS# 7854

---

**1903 Quarter Eagle, MS67  
Radiantly Lustrous and Sharply Struck**

**6898 1903 MS67 NGC.** The 1903, from a production exceeding 200,000 pieces, is one of the most common dates in the Liberty Head quarter eagle series with thousands of Uncirculated coins graded by the two major services. Only about 170 specimens, however, have been certified MS67 and just five finer (11/14). Ebullient luster exudes from impeccably preserved yellow-gold surfaces and all design features are sharply struck. NGC ID# 25LU, PCGS# 7855

---

**1903 Quarter Eagle, Conditionally Rare MS68  
One of Only Five Known**

**6899 1903 MS68 NGC.** The 1903 is one of the most common dates of the Liberty Head quarter eagle series. More than 200,000 pieces were minted and well over 10,000 examples have been graded by NGC and PCGS. Even Premium Gems can be located with patient searching. MS67s are more elusive, and higher-grade coins are nearly unobtainable.

Intense luster radiates from the yellow-gold surfaces of this MS68 offering. The design elements are uniformly sharply struck and both sides are immaculately preserved. A beautiful specimen with outstanding eye appeal destined for a high-grade collection. Census: 5 in 68, 0 finer (11/14). NGC ID# 25LU, PCGS# 7855

**1904 Quarter Eagle, Intensely Lustrous MS67**

**6900 1904 MS67 NGC.** The 1904 quarter eagle is a readily available date in most Uncirculated grades, but Superb Gems such as the current offering are quite challenging and higher numerical grades are extremely rare. Intense luster radiates from yellow-gold surfaces that exhibit sharply struck design elements. An unobtrusive alloy spot left of star 5 does not detract. NGC and PCGS have graded only 6 pieces finer (11/14). NGC ID# 25LV, PCGS# 7856

**1905 Quarter Eagle, Superb Gem  
Powerful Luster**

**6901 1905 MS67 PCGS.** Despite a mintage in the low six figures, the 1905 quarter eagle is “merely” scarce in Superb Gem, though a true condition rarity finer. This MS67 marvel is broadly lustrous sun-yellow with hints of deeper orange color along the margins. Population: 71 in 67 (1 in 67+), 2 finer (12/14). NGC ID# 25LW, PCGS# 7857

**6902 1906 MS66+ NGC. CAC.** An attractive late-date Liberty quarter eagle with effusive yellow-gold luster around sharply detailed devices. NGC has graded 88 numerically finer representatives (12/14). NGC ID# 25LX, PCGS# 7858

## PROOF LIBERTY QUARTER EAGLES

1876 Quarter Eagle, PR62 Cameo  
Prior Generation Holder, Gold CAC Label

**6903 1876 PR62 Cameo NGC. Gold CAC.** The 1876 proof quarter eagle had a characteristically small mintage for the period — only 45 coins — and is inherently rare in any grade today. It is doubtful more than two dozen examples survive in all grades. The NGC and PCGS combined certified populations count 32 examples, undoubtedly including a small number of resubmissions. This spectacular Cameo is housed in a prior generation holder and with a gold CAC label marking it as a coin that is at least a full grade point undergraded, per CAC. It is also the only PR62 example of nine Cameos certified by NGC; the other eight coins in this category reside at the PR64 and PR65 levels, four coins each, respectively (12/14). Deep apricot-gold patina beautifully intensifies the bold field-device contrast on this fully struck and eye-appealing proof. Close examination reveals a few faint hairlines in the fields, but indeed fewer than would be expected for a coin at the PR62 grade level. NGC ID# 287X, PCGS# 87902

1886 Quarter Eagle, PR64 Ultra Cameo  
Stark Field-Motif Contrast

**6904 1886 PR64 Ultra Cameo NGC.** The 1886 quarter eagle is rare in proof format. Only 88 proofs were struck, and likely fewer than half are known today. NGC and PCGS report a combined certified population of 55 coins, this figure undoubtedly reflecting a number of resubmissions. Of those that do exist, Ultra Cameo representatives are in the distinct minority. NGC has so-designated just 15 coins in all grades, with four in PR64 and 11 numerically finer (12/14). This representative is boldly contrasted, with deep mirrors and heavily frosted, razor-sharp design elements. A few faint hairlines in the fields limit the grade, but do not impede the eye appeal. NGC ID# 2889, PCGS# 97912

**1895 Quarter Eagle, PR64 Deep Cameo  
Stunning Contrast**

**6905 1895 PR64 Deep Cameo PCGS.** Only 119 proof quarter eagles were struck in 1895, some of which were likely spent. The PCGS website indicates that about 60 to 80 examples are known. A number of these are Deep/Ultra Cameo examples as evidenced by the 52 pieces seen by PCGS and NGC.

The present PR64 Deep Cameo displays stunning gold-on-black motif-field contrast when the coin is observed from directly overhead. The design features are boldly impressed throughout. A few wispy handling marks barely preclude a higher numerical grade. Nevertheless, this piece yields great overall eye appeal. Population: 1 in 64 Deep Cameo, 15 finer (12/14). NGC ID# 288J, PCGS# 97921

**1899 Quarter Eagle, PR62 Cameo  
Turn-of-the-Century Proof Type Coin**

**6906 1899 PR62 Cameo NGC.** This turn-of-the-century quarter eagle is a worthy "starter" example of classic proof gold. Intricate detail surpasses what is seen on even the sharpest business strikes and the "orange-peel" texture of the yellow-to-apricot mirror-fields is a delight. Though the surfaces show a number of hairlines and light contact marks, the coin is surprisingly pleasing for the grade. NGC ID# 288N, PCGS# 87925

**1899 Quarter Eagle, PR63 Cameo  
Deeply Contrasted and Appealing**

**6907 1899 PR63 Cameo NGC.** In his *Encyclopedia of United States and Colonial Proof Coins* (1977, revised 1989), Breen mentions two varieties of 1899 quarter eagles. The present piece represents his second variety, identified by the die line between TY in LIBERTY and a series of lighter die lines within the recess left of the first vertical shield stripe. This exquisitely struck and prominently mirrored lemon-gold specimen features radiant devices, and the fields have only the faintest indication of contact. Only 150 proofs were struck, and it is likely that a number of these were eventually spent. Housed in a prior generation holder.

Ex: FUN Signature (Heritage, 1/2006), lot 4908.  
From The Free Tilly Collection. NGC ID# 288N, PCGS# 87925

**1902 Quarter Eagle, PR61  
A Worthy Classic Gold Proof**

**6908 1902 PR61 PCGS.** The proof production for 1902 neared 200 pieces, and many are found today in lower grades. This is a mishandled proof that was obviously mixed in with other coins, as seen by the numerous small contact marks scattered over each side. And yet, there is no doubt of its proof status as just a glance at the fields confirms. Even yellow-gold color throughout. NGC ID# 288S, PCGS# 7928

**1903 Quarter Eagle, PR65  
One-Sided Cameo**

**6909 1903 PR65 NGC.** The Mint altered the proof die preparation process during this period, very nearly eliminating field-device contrast on its proof coins. Those that have been certified as Cameos are barely so, with the contrast disappearing at various angles of view. For a non-Cameo, this Gem 1903 proof quarter eagle is a remarkably attractive coin, showing bold design definition and beautifully preserved, honey-gold mirrors. The reverse is, incredibly, distinctly contrasted between the eagle and the fields, though the obverse, fully brilliant, does not warrant the Cameo designation from NGC. This proof issue was struck to the extent of 197 coins, slightly more than half of which are known to survive. Still, any proof Liberty Head quarter eagle is a rare find and worth considerable bidder attention. Census: 14 in 65 (1 in 65 ★), 17 finer (12/14). NGC ID# 288T, PCGS# 7929

**1904 Quarter Eagle, Select Proof  
Fundamentally Pleasing**

**6910 1904 PR63 PCGS. CAC.** Only 170 proof Liberty quarter eagles were struck in 1904, making the issue the most elusive proof of the 20th century series. This lemon-yellow Select example exhibits razor-sharp definition on all design elements and deeply mirrored fields with a few minor contact marks and hairlines. Population: 16 in 63, 31 finer (12/14). NGC ID# 288U, PCGS# 7930

**INDIAN QUARTER EAGLES**

**1908 Two and a Half, MS65  
Splendidly Preserved Type Coin**

**6911 1908 MS65 PCGS.** A coruscating peach-gold Gem with a refreshingly unabraded appearance. The strike is excellent, since the headdress exhibits virtually full detail. A faint fingerprint is evident on the upper right reverse field. A popular first-year issue. Certified in an old green label holder. NGC ID# 288Y, PCGS# 7939

**1908 Indian Head Quarter Eagle, MS65  
First Year of the Pratt Reduced Relief Design**

**6912 1908 MS65 PCGS.** Bela Lyon Pratt's reduced relief design was a first in American coinage, a sign that the Mint was strongly committed to pushing the boundaries. The result was a highly artistic body of coinage, of which this 1908 quarter eagle is a prime example. Both obverse and reverse surfaces exhibit just a few scattered marks on this untuned Gem. NGC ID# 288Y, PCGS# 7939

---

**1908 Indian Quarter Eagle, MS66  
First Year of Issue**

- 6913 1908 MS66 NGC.** The 1908 quarter eagle represents the first date of Pratt's sunken relief Indian design. Attractive yellow and orange-gold colors along with pleasing luster and minimally abraded surfaces provide this Premium Gem example with strong eye appeal. Subtle hints of blue also appear. NGC and PCGS combined have awarded higher grades to only five examples (12/14). NGC ID# 288Y, PCGS# 7939

---

**1908 Quarter Eagle, MS66  
Rare Any Finer**

- 6914 1908 MS66 PCGS.** Premium Gem is the highest numerical grade that once can expect to obtain if searching for a 1908 quarter eagle. Indeed, PCGS and NGC have graded a mere five examples finer (12/14). Peach-gold surfaces display pleasing luster and well-struck design elements, though the eagle's shoulder feathers are soft as often-times seen. Both sides are nicely preserved. NGC ID# 288Y, PCGS# 7939

---

**1908 Quarter Eagle, Attractive MS66  
Wonderfully Preserved**

- 6915 1908 MS66 PCGS.** The first-year issue in Bela Lyon Pratt's half eagle series was struck to the extent of 564,800 coins, and contemporary collectors set examples aside as keepsakes. Representatives as well-preserved as the coin here offered are scarce nevertheless. This Premium Gem is softly frosted with rose and yellow-gold coloration. The headdress feathers are boldly defined, and only the eagle's upper wing shows typical softness. There are no singularly distracting marks. PCGS has certified only two submissions in higher numeric grades (10/14). NGC ID# 288Y, PCGS# 7939

---

**1908 Quarter Eagle, Richly Toned MS66  
Virtually Contact-Free**

- 6916 1908 MS66 PCGS.** The reverse of this 1908 Indian Head quarter eagle is almost contact-free even under a loupe, and the few marks that do appear are minuscule. The obverse shows a similar appearance, save for a single vertical mark on the Indian's cheek. Rich orange-gold patina is accented with dollops of mint in the device recesses. A beautiful example of this first-year issue. NGC ID# 288Y, PCGS# 7939

---

**1908 Indian Quarter Eagle, Two-Toned MS66  
Great First-Year Type Coin**

- 6917 1908 MS66 NGC.** The surfaces show alternating greenish-gold and orange-gold patina on each side of this lovely Premium Gem. The reverse shows evidence of die clashing around the eagle's neck and in the left field nearby. The powerful strike has nicely brought up all of the headdress feathers, and the high points are free of all but the most minor contact. A great-looking example of this first-year type. NGC ID# 288Y, PCGS# 7939

- 
- 6918 1909 MS64 PCGS.** A smooth second-year Indian quarter eagle with satiny wheat-gold and apricot surfaces. Pleasingly detailed for the date with understated eye appeal. NGC ID# 288Z, PCGS# 7940

- 6919 1909 MS64 PCGS.** This second-year Pratt quarter eagle has warm yellow-orange luster and bold eye appeal. A delicate die crack connects the first two stars of the obverse. NGC ID# 288Z, PCGS# 7940

- 6920 1909 MS64 PCGS.** A broadly lustrous near-Gem that offers a mix of wheat-gold and apricot hues. Faint alloy elements are visible on each side and the strike shows a degree of softness. NGC ID# 288Z, PCGS# 7940

---

1909 Indian Quarter Eagle, MS65

**6921** 1909 MS65 NGC. Both sides of this exquisite Gem exhibit satiny lemon-yellow luster with bold design motifs. A glass is required to make out the few trivial surface marks that prevent a higher grade. This piece is well above the average certified grade of MS61. NGC has only certified 23 numerically finer submissions of this issue (12/14). NGC ID# 288Z, PCGS# 7940

---

1909 Quarter Eagle, MS65  
A Well-Produced Issue

**6922** 1909 MS65 NGC. This second year of the Indian Head quarter eagle design type was a well-produced coin in terms of strike and luster. This Gem is no exception. Moreover, its yellow-gold surfaces that are imbued with hints of lime-green are impeccably preserved. These attributes add up to great eye appeal. The two major services have seen only 40 examples numerically finer (11/14). NGC ID# 288Z, PCGS# 7940

---

---

1909 Indian Quarter Eagle, MS66  
Unknown in Finer Grades

**6923** 1909 MS66 PCGS. From a nominal mintage of 441,760 pieces the 1909 Indian quarter eagle is one of the better dates in the series. The 1909 is underappreciated by nonspecialists, but only the famous 1911-D and the low-mintage 1914 issues are seen less often in today's market. Lower Mint State examples can be found with some patience, but specimens in MS66 condition are rare, and the date is unknown in higher numeric grades.

The present coin is a spectacular Premium Gem with sharply detailed design elements that show pinpoint definition on the headdress feathers. The pristine orange-gold surfaces display hints of red and lilac, with bright mint luster and terrific eye appeal throughout. Housed in a green label holder. Population: 17 in 66, 0 finer (12/14). NGC ID# 288Z, PCGS# 7940

---

---

**1910 Indian Quarter Eagle, MS65  
Popular Type Issue**

- 6924 1910 MS65 NGC.** The 1910 quarter eagle in Gem condition is far more elusive than the 1908 and somewhat more available than the 1909. This lovely Gem shows honey-gold color with smooth, flowing luster throughout both sides, virtually unmarked and oozing eye appeal. NGC has seen 14 numerically finer (12/14). NGC ID# 2892, PCGS# 7941

---

**1911 Two and a Half, MS65  
Nicely Struck and Well-Preserved**

- 6925 1911 MS65 NGC.** Beautiful mint and apricot hues intermingle in the toning on each side of this nicely preserved Gem 1911. The headdress feathers are decently brought up, and the eagle's feather details on the reverse are quite sharp. A single small tick on the Indian's upper lip and a longer mark in the reverse field, just above the eagle, are the only mentionable contact. NGC reports a meager seven submissions in MS66, including one Star-designated piece (12/14). NGC ID# 2893, PCGS# 7942

---

**1911 Quarter Eagle, MS65  
Almost Never Located Finer**

- 6926 1911 MS65 NGC.** The 1911 quarter eagle is readily available through MS63, but becomes rare in higher grades, particularly at the MS65 level. Examples finer than Gem are virtually unobtainable. The lustrous surfaces yield yellow-gold patina tinged with light green. The design elements exhibit better definition than sometimes seen on this issue, including the headdress feathers and the eagle's shoulder plumage. A few grade-consistent marks do not detract. NGC and PCGS combined have seen a mere eight pieces finer (12/14) NGC ID# 2893, PCGS# 7942

---

**1911 Two and a Half, Nicely Preserved MS65**

- 6927 1911 MS65 NGC.** Despite a generous mintage exceeding 700,000 pieces, the 1911 quarter eagle is seldom seen at the Gem level of this coin, and almost never found finer. The eagle's wing tip and head and the headdress feathers are normally weakly struck, although this piece shows better detail in those areas than most. The surfaces are nicely preserved on the high points and throughout, and they benefit from rich reddish-gold patina. NGC ID# 2893, PCGS# 7942

---

**1911 Quarter Eagle, Sharp MS65+**

- 6928 1911 MS65+ NGC.** The satiny, matte-like surfaces of this high-end Gem display orange-gold patination imbued with lime-green on the obverse and greenish-gold coloration on the reverse. The design elements are well-struck, including the eagle's shoulder feathers. The 1911 is very difficult to locate in the better Mint State grades due to most surviving examples having numerous surface marks along with mint-made copper spots. The current specimen is devoid of these blemishes. Really a sharp, eye appealing coin, very close to an even higher grade. NGC has graded only seven numerically finer and PCGS one higher (11/14). NGC ID# 2893, PCGS# 7942

- 6929 1911-D Weak D XF45 PCGS.** While the mintmark on this key-date coin is all but absent, the wire rim at the upper right side of the obverse and the scalloping at the top of the reverse confirm this coin's origins. Dusky antique-gold surfaces retain glimmers of luster. PCGS# 7954

1911-D Quarter Eagle, AU50  
Nice Strong D Representative

6930 1911-D AU50 PCGS Secure. Strong D. The mintmark is worn from light circulation, but remains clearly identifiable. This example of the key-date 1911-D quarter eagle retains strong detail in the headdress and eagle's feathers, with pale bronze-gold over the fields and deeper lemon-gold in the recesses. This date is highly sought-after as the only major key in this otherwise readily collectible series. NGC ID# 2894, PCGS# 7943

1911-D Indian Quarter Eagle, AU53  
Celebrated Key Date

6931 1911-D AU53 NGC. The 1911-D issue needs no introduction to series specialists, but others might be interested to know it is the sole key, elusive in all grades within the Liberty Head quarter eagle series, due to the low mintage of 55,680 pieces. This lightly circulated example displays pleasing chestnut-gold color. The Denver mintmark is faint on this piece. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, Lustrous AU58  
Attractive Wheat-Gold Surfaces

6932 1911-D AU58 NGC. Wheat-gold surfaces show a touch of friction on the high point of the Indian's cheek and the eagle's wing tip on the reverse, but essentially all of the luster remains on each side. Scattered grazes and ticks are far from overt, and in accord with a short spate in circulation. The mintmark is clear but not bold. A nice, affordable near-Mint State example of this key issue. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, AU58  
The Series Key

6933 1911-D AU58 NGC. Any collector who is contemplating a set of Indian quarter eagles is encouraged to pursue the 1911-D first. Once obtained, the rest of the set will seem easy. This near-Mint specimen is sharply detailed with a bold mintmark. The light yellow surfaces have nearly full satin luster. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle  
Collectible Near-Mint Example

6934 1911-D AU58 NGC. This is a well-detailed, original example of this popular key issue. A brush of wear over the high points of the design precludes a Mint State grade, leaving this piece with soft bronze-gold color. The mintmark shows light wear, but is clearly discernable. The Indian quarter eagle series is fairly short (just 15 date and mintmark combinations) and is avidly collected in its entirety. The 1911-D is always in strong demand as the only real "stopper" to the set. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, Mint State Sharpness

6935 1911-D — Improperly Cleaned — NGC Details. Unc. Even though the surfaces on this key-date Indian quarter eagle show some moderate hairlining and lack a bit of vibrancy on the high-point luster, they are nonetheless extremely appealing. The color is a rich orange-gold, and the strike is nicely brought up. A single diagonal scrape runs through the Indian's cheek, and a few thin marks show on the reverse. NGC ID# 2894, PCGS# 7943

---

**1911-D Quarter Eagle, MS61  
Desirable Key Date**

**6936** 1911-D MS61 NGC. Ex: Gold & Silver Pawn. The 1911-D is the most desirable single quarter eagle in the Indian Head series. It has the lowest mintage of the series and is the first to be produced at a mint other than Philadelphia. Yellow-gold surfaces display hints of light green and are minimally marked. Nice for the designated grade. Housed in a customized NGC holder. NGC ID# 2894, PCGS# 7943

---

**1911-D Quarter Eagle, MS62  
Excellent Eye Appeal**

**6937** 1911-D MS62 NGC. A nice bold D mintmark is the start of many attractions on this 1911-D quarter eagle, including lovely orange color, good luster, and only scattered small marks on each side that are few for the assigned grade. A small diagonal mark at the corner of the Indian's mouth is not overt. The eye appeal is excellent. NGC ID# 2894, PCGS# 7943

---

**1911-D Quarter Eagle, MS62  
A Famous Key**

**6938** 1911-D MS62 PCGS. The 1911-D has an obviously low mintage by the standards of the series and is sought-after regardless of condition. This MS62 piece has deep orange-gold luster with elements of peach. Though scattered abrasions determine the grade, the all-around eye appeal is better than the designation might suggest. NGC ID# 2894, PCGS# 7943

---

**1911-D Quarter Eagle, Appealing MS62  
Key Series Issue in All Grades**

**6939** 1911-D MS62 PCGS. Richly frosted surfaces show superlative deep sunset-orange color on this key-date quarter eagle. Only a couple of the most trivial pecks show on the Indian's cheek, and the eagle is free of mentionable contact. A few thin marks in the obverse field, before the Indian's profile, are undistracting. This is a coin with great eye appeal, the key in all grades to the Indian Head quarter eagles. NGC ID# 2894, PCGS# 7943

---

**1911-D Quarter Eagle, Bold D, MS62  
Essential Key Date**

**6940** 1911-D MS62 PCGS. This key-date 1911-D quarter eagle boasts excellent eye appeal for the grade and the issue, showing a clean cheek on the Indian, a nice, bold strike on the headdress feathers and the mintmark (this piece is certified as a Bold D), and there are few signs of contact for the grade. The essential issue for completion of the entire 15-piece collection. NGC ID# 2894, PCGS# 7943

---

**1911-D Quarter Eagle, MS63  
Rich Reddish-Orange Color**

**6941** 1911-D MS63 NGC. Rich reddish-orange color on each side of this Select Mint State 1911-D quarter eagle make it a standout coin. The Indian's cheek is notably clean and free of marks, and what few signs of contact appear are away from the focal points. One dark fleck appears in the left obverse field, and a trio of small hits above the eagle on the reverse. A nice coin for the grade, with rich, original color. NGC ID# 2894, PCGS# 7943

1911-D Two and a Half, MS63+  
Impressive Eye Appeal

**6942 1911-D MS63+ NGC.** Garrett and Guth write of the 1911-D quarter eagle in the second edition of their *Gold Encyclopedia* that it is “the key to the series in every grade. It boasts not only the lowest mintage (by far), but few examples were saved at the time of issue. Most of the survivors are in lower Mint State grade, and even those often show areas of minor friction on the Indian’s cheek.” Actually, we believe that what Garrett and Guth mean here is that “most Mint State survivors are in the lower grades thereof,” as most of the survivors are actually in some grade level of AU — a level where these coins are still quite attractive and in demand by throngs of collectors. Many of the survivors are just a hair’s breadth away from Mint State, on average.

This MS63+ NGC example is far and away finer than those “average” coins, an impression that no more than a lingering glance confirms. The orange-gold surfaces are fine-grained and somewhat mattelike, well-struck throughout and showing a wire rim around the upper obverse. The Indian’s cheek and the eagle throughout are notably free of marks, although the brow of the chief shows a small mark that likely precludes an MS64. It is, however, the only singular mark on this coin, a piece with impressive eye appeal. NGC ID# 2894, PCGS# 7943

1912 Indian Quarter Eagle, MS65  
Low Overall Population

**6943 1912 MS65 NGC.** The 1912 quarter eagle has the fifth lowest overall population in the Indian series, behind 1909, 1910, 1911-D, and 1914, according to NGC’s *Census Report*. In Gem and finer grades, its rank increases to the third lowest population behind the 1914 and 1914-D. The PCGS data is virtually identical, adding only the 1911-D in MS65 or finer grades to the list of high-grade rankings.

This impressive Gem has faint traces of rose toning over its frosty yellow-gold surfaces. The design motifs are sharply defined, and the eye appeal is excellent. Census: 65 in 65, 2 finer (12/14). NGC ID# 2896, PCGS# 7944

---

**1913 Two and a Half, MS65  
Thick Mint Luster, Even Color**

- 6944 1913 MS65 NGC.** The large mintage of 722,000 pieces makes the 1913 a prime target for type collectors, but it remains elusive in Gem condition. The surfaces display thick mint frost, rich color, and no mentionable marks. There is, however, a curious irregularly shaped planchet void on the reverse to the left of the eagle's left (facing) leg. NGC ID# 2897, PCGS# 7945

---

**1913 Quarter Eagle, MS65  
Rare Any Finer**

- 6945 1913 MS65 NGC.** This Pratt quarter eagle issue saw a series-record 722,000 business strikes produced, yet the issue is still a condition rarity any finer than this Gem. Wheat-gold surfaces are amply lustrous and surprisingly mark-free, never a guarantee for the "sunken-relief" Bela Lyon Pratt design. NGC ID# 2897, PCGS# 7945
- 6946 1914 MS62 NGC.** For collectors who choose not to tackle the 1911-D quarter eagle, the 1914 becomes the new "key" to the series. This MS62 representative has dusky apricot-gold surfaces with scattered minor to moderate marks but no trace of wear. NGC ID# 2898, PCGS# 7946
- 6947 1914 MS62 NGC.** Wheat-gold and apricot overall with deep alloy patches at the left obverse and upper right reverse margins. A pleasing example of the Indian quarter eagle issue with the second-lowest mintage. NGC ID# 2898, PCGS# 7946
- 6948 1914 MS63 NGC.** Gold-orange luster is subtle yet strong on this luminous Select example. Though still available for a price in MS63 condition, the 1914 quarter eagle is a semikey of its series and commands respect. NGC ID# 2898, PCGS# 7946
- 6949 1914 MS63 NGC.** A Select example of this popular lower-mintage Pratt quarter eagle issue, amply lustrous and yellow-to-orange with a handful of long, shallow abrasions in the fields. NGC ID# 2898, PCGS# 7946
- 6950 1914 MS63 NGC.** The 1914 Indian quarter eagle claims a low mintage of 240,000 pieces and the date is the second-rarest of the series. This attractive Select coin offers sharply detailed design elements and vibrant mint luster with lightly marked greenish-gold surfaces and outstanding eye appeal. NGC ID# 2898, PCGS# 7946

---

**1914 Quarter Eagle, MS63  
Rich Reddish-Orange Color**

- 6951 1914 MS63 PCGS. CAC.** The 1914 Indian quarter eagle is a better date along with the 1914-D in the series, although both take a back seat in absolute rarity to the 1911-D, and it is the higher Mint State grades where these conditional rarities become both extremely expensive and extremely elusive. Rich reddish-orange color covers both sides of this Select Mint State 1914, which shows a couple of ticks around the Indian's chin on the obverse and some hair-thin marks scattered around the reverse field. NGC ID# 2898, PCGS# 7946

---

**1914 Quarter Eagle, MS64+  
Second Lowest Indian Head Mintage**

- 6952 1914 MS64+ PCGS.** The mintage of 240,000 quarter eagles in 1914 was the second lowest production behind the key 1911-D. Examples are plentiful in grades up to MS64, and elusive in finer grades. Even MS64+ examples rarely appear in the market place. One of those is the present satiny example with brilliant and lustrous wheat-gold surfaces, bold design motifs, and minimal marks. PCGS has only certified 60 finer examples (11/14). NGC ID# 2898, PCGS# 7946

---

**1914-D Quarter Eagle, Superlative MS64  
Seldom Seen Finer**

**6953 1914-D MS64 PCGS. CAC.** The near-Gem level is seldom surpassed for this conditional rarity within the Indian quarter eagle series. Although PCGS has certified several hundred submissions in MS64 of the 1914-D — no doubt representing many duplications, given the monetary incentive for an “upgrade” — but only 47 in the numeric MS65 grade and none finer (12/14). This MS64 example boasts superlative eye appeal, a combination of lavish luster on rich orange-gold surfaces, relatively pristine device high points on each side, and a strong strike including the mintmark. A single curving mark in the left obverse field, and one in the lower headdress feathers, both appear under a loupe. The CAC approval further separates this piece from most of its cohort. NGC ID# 2899, PCGS# 7947

---

**1915 Indian Quarter Eagle, MS65  
Only Eight Finer at NGC**

**6954 1915 MS65 NGC.** The Indian quarter eagle series can be divided into two distinct series: the scarce early date series from 1908 to 1915 and the plentiful later date series from 1925 to 1929. This Gem represents the final issue of the first series. Both sides exhibit bold design motifs, splendid honey-gold luster, and pristine surfaces. NGC has only certified eight finer examples (12/14). NGC ID# 289A, PCGS# 7948

---

**1915 Quarter Eagle, Lustrous MS65  
Sharply Struck and Nicely Preserved**

**6955 1915 MS65 PCGS.** Beautiful peach-gold color and thick mint luster are the calling cards of this nicely preserved Gem 1915 quarter eagle. Even under a loupe, the Indian's cheek shows only the most abstruse pecks. A single luster graze shows on the eagle's neck, along with a nick under the E of AMERICA. The strike is quite sharp overall, better than usual for the issue. NGC ID# 289A, PCGS# 7948

---

**1915 Quarter Eagle, Attractively Patinated MS65**

**6956 1915 MS65 NGC.** Attractive patination adorns both sides of this Gem, with soft orange-gold and lime-green over the obverse and deeper hues of this color palette on the reverse. Softly frosted luster is above-average for the issue and the design features are well-struck, including the headdress feathers and all of the eagle's plumage. Minute marks on the Indian's cheek and above the eagle's beak might preclude an even finer grade. Only 12 coins have been certified finer (11/14). NGC ID# 289A, PCGS# 7948

**6957 1925-D MS65 PCGS.** The 1925-D quarter eagle was both the first issue of that denomination struck in a decade and the last issue of the same struck at Denver. This Gem has primarily apricot-gold surfaces with elements of brighter yellow. Housed in a prior-generation holder. NGC ID# 289B, PCGS# 7949

**6958 1925-D MS65 NGC. CAC.** Rich reddish-orange luster and minimal abrasions on both sides separate this Gem from most of its cohort, as does the CAC approval. The popular mintmarked “type coin” issue in the Indian Head quarter eagles. NGC ID# 289B, PCGS# 7949

---

### 1925-D Quarter Eagle, Elusive MS66

**6959 1925-D MS66 PCGS Secure.** The 1925-D quarter eagle exists in quantity through near-Gem, making it a popular type coin. Premium Gems such as the present offering are elusive and the issue is virtually unavailable any finer. Bright orange-gold luster endows this MS66 that is complemented by sharply struck design elements. A couple of light marks in the lower-left obverse field are within the confines of the grade designation. Population: 33 in 66, 0 finer (12/14). NGC ID# 289B, PCGS# 7949

---

**6960 1926 MS65 PCGS.** Variegated orange and green-gold toning ensures the eye appeal of this lustrous and well struck Gem. Scattered wispy field grazes are all that deny a finer assessment. Certified in an old green label holder.  
*Ex: Dallas Signature (Heritage, 4/2007), lot 1668, which realized \$4,053.75.*  
*From The Free Tilly Collection.* NGC ID# 289C, PCGS# 7950

**6961 1926 MS65 NGC.** The last five years of quarter eagle production are far better-represented in higher grades than their earlier peers. This Gem 1926 quarter eagle makes an excellent type coin with its broad yellow-orange luster. NGC has graded just 19 pieces as MS66 or better (12/14). NGC ID# 289C, PCGS# 7950

---

### 1926 Quarter Eagle, Pristine MS66 Tied for Finest Certified

**6962 1926 MS66 PCGS.** The 1926 quarter eagle is, along with the 1925-D, a prime type issue within the Indian quarter eagle series. Even so, the Premium Gem grade of this piece is unsurpassed by even a single example at either leading grading service. Blatantly pristine preservation, thick mint frost, and rich apricot-orange color put this piece near the top of the pack aesthetically and technically. Population: 42 in 66, 0 finer (12/14). NGC ID# 289C, PCGS# 7950

---

**6963 1927 MS65 PCGS.** The last stretch of quarter eagle production saw five issues spread out over five years. In the middle is the 1927, represented here by a luminous apricot-gold Gem with areas of richer yellow-orange. PCGS has graded 21 pieces as MS66 or better (12/14). NGC ID# 289D, PCGS# 7951

**6964 1928 MS65 PCGS.** An attractive late-date Gem Indian quarter eagle with generally light yellow-gold surfaces and splashes of saturated orange. PCGS has graded just 11 numerically finer pieces (12/14). NGC ID# 289E, PCGS# 7952

**6965 1928 MS65 PCGS.** The penultimate quarter issue is available for a price even in Gem but is conditionally rare any better. This MS65 piece has soft but pleasing luster. Largely yellow-gold surfaces have areas of saturated color and a few spots of deeper alloy. PCGS has only certified 11 finer examples (12/14). NGC ID# 289E, PCGS# 7952

---

### 1929 Quarter Eagle, MS65 Frosty With Beautiful Coloration

**6966 1929 MS65 NGC.** Of the five late-series Indian quarter eagle issues, the 1929 is the scarcest in MS65 and finer condition, but it can still be obtained for about the same price as the other four. This example is richly patinated in shades of honey, rose, and sun-gold, with frosty surfaces and just a few grade-consistent marks. Slight weakness is present on the lower headdress feathers, but the eagle's wing is sharp. NGC has seen only four numerically finer submissions (12/14). NGC ID# 289F, PCGS# 7953

---

### 1929 Indian Quarter Eagle, MS65 Final Year of Issue

**6967 1929 MS65 NGC.** The 1929 Indian quarter eagle is the last issue of the series, and this Gem approaches the best available quality. NGC and PCGS have each certified four finer examples (12/14). Both sides are fully lustrous with frosty yellow-gold surfaces and delicate rose overtones. NGC ID# 289F, PCGS# 7953

---

### 1929 Two and a Half, Honey-Gold MS65

**6968** 1929 MS65 NGC. The 1929 quarter eagle in Gem condition is about as good as it gets, as MS66 grading events at either leading service are few and far between. The few scattered, tiny marks on this piece are mostly away from the focal points, and rich luster and honey-gold color add to the broad eye appeal. NGC ID# 289F, PCGS# 7953

---

### 1929 Quarter Eagle, MS65 Final-Year Type Coin

**6969** 1929 MS65 PCGS. The 1929 quarter eagle is much scarcer in Gem condition than many earlier dates in the decade, and higher-grade pieces are genuinely rare. This piece is sharply struck, with satiny mint luster shining through dusky green and orange-gold hues on each side. Close examination reveals a few small ticks in the upper-right reverse field, but they are not out of line for the grade. Only four numerically finer examples have been certified by PCGS (12/14). Ex: *Long Beach Signature* (Heritage, 5/2008), lot 3110. NGC ID# 289F, PCGS# 7953

---

### 1929 Quarter Eagle, Frosty MS65

**6970** 1929 MS65 NGC. This frosty Gem shows alternating orange and greenish patina intermingling throughout the obverse, while the reverse is a more-consistent orange-gold. A small area of roughness appears at the top of the headdress and a couple of thin marks meander through the reverse field, but this piece overall is attractive and nicely preserved. The 1929 issue is popular as the last year of the series. NGC ID# 289F, PCGS# 7953

---

### 1929 Quarter Eagle, MS65 Frosty, Attractive Coloration

**6971** 1929 MS65 NGC. This is a deeply frosty example of this final-year issue, also boasting sharp design definition and warm honey-gold coloration. A few faint luster grazes determine the grade, but none are individually noticeable. This issue is readily available for type representation, but like most issues in the series, it becomes prohibitively rare above the Gem grade level. Only four coins are numerically finer at NGC (11/14). NGC ID# 289F, PCGS# 7953

---

### 1929 Quarter Eagle, Eye-Appealing MS65

**6972** 1929 MS65 NGC. The surfaces of this Gem show rich orange patina, while the recesses show a deep, almost mint-green color. A pair of small luster grazes appear on the obverse near star 5, and the reverse shows a few tiny ticks. This piece boasts a nice sharp strike, however, and lots of eye appeal for this last-year issue. NGC ID# 289F, PCGS# 7953

---

*End of Session Six*

## SESSION SEVEN

### THREE DOLLAR GOLD PIECES

**6973 1854 MS62 NGC.** Vibrant luster radiates from the peach-gold surfaces of this MS62 three dollar and a solid strike imparts strong definition to the design features. Faint handling marks limit the grade; nevertheless this is a highly attractive piece for the designated grade. NGC ID# 25M3, PCGS# 7969

**6974 1854 MS62 NGC.** The yellow-gold surfaces of this three dollar piece yield pleasing luster and exhibit sharply struck design elements. Both sides reveal fewer and less severe marks than what might be expected for an MS62. NGC ID# 25M3, PCGS# 7969

#### 1854 Three Dollar Gold, MS63 Pleasingly Smooth Surfaces

**6975 1854 MS63 PCGS.** Satiny yellow-gold luster shimmers over both sides of this minimally abraded Select Mint State type coin. The bow knot on the reverse is not fully defined, as usual for this type in general, but the hair curls and wreath are sharp. The 1854 three dollar gold piece had a fairly substantial mintage of more than 138,000 coins, and enough examples survive in Mint State that the date is included along with the 1874 and 1878 as a favorite for type collectors. NGC ID# 25M3, PCGS# 7969

#### 1854 Three, MS63 First Year of the Denomination

**6976 1854 MS63 NGC.** Congress mandated the three dollar gold piece in 1854, and for many years numismatists speculated that the denomination was created to facilitate the exchange of 3-cent stamps. Roger W. Burdette published findings in the Autumn 2013 *Journal of Numismatic Research* that proved otherwise, demonstrating that the coin was meant to echo the three dollar state banknote that widely circulated in that era. This yellow-gold example reveals deeper toning in the obverse fields and portrait that contrasts with the lettering at the border and within the headband. NGC ID# 25M3, PCGS# 7969

#### 1854 Three Dollar Gold, MS64+ Exceptionally Well-Preserved

**6977 1854 MS64+ PCGS.** Unusually sharp striking definition boldly imparts the details of the wreath, bow knot, and the hair curls. Shimmering straw-gold luster illuminates delicately preserved surfaces that must have just missed a Gem grade assessment. Beautiful technical and visual quality for the discerning type collector. PCGS has seen 33 numerically finer representatives (12/14). NGC ID# 25M3, PCGS# 7969

**6978 1855 AU58 PCGS.** Boldly struck with substantial luster and pleasing coloration this near-Mint piece shows typical surface abrasions for a lightly-circulated gold coin. An appealing piece that would serve well for type purposes. NGC ID# 25M6, PCGS# 7972

**6979 1855 AU58 NGC.** This issue is a readily available date among three dollar gold pieces from the Philadelphia Mint, making it a suitable choice for the type collector. This is an attractive near-Mint example with noticeable friction on some of the high points, and scattered trivial abrasions that are not unexpected for the grade. NGC ID# 25M6, PCGS# 7972

#### 1857-S Three Dollar, XF45 An Extensively Circulated Issue

**6980 1857-S XF45 NGC.** Virtually the entire production of 14,000 pieces of the 1857-S three dollar circulated, resulting in only five Uncirculated examples seen by NGC and PCGS. The peach-gold surfaces of this Choice XF specimen exhibit well-defined design elements, save for flatness on portions of Liberty's hair. Distributed small marks are within the confines of the grade designation and do not detract. Census: 28 in 45, 98 finer (10/14). NGC ID# 25MB, PCGS# 7977

**1858 Three Dollar Gold, MS62  
Condition Rarity**

- 6981 1858 MS62 PCGS.** With a scant mintage of just 2,133 coins, the 1858 three dollar gold piece is a scarce issue in all grades. While many later dates in the series were heavily saved by dealers and speculators for their numismatic potential, the 1858 was struck during an era when few high-grade pieces were set aside, accounting for its absolute rarity in any Mint State grade. This MS62 coin is well-struck, with lustrous honey-gold surfaces. There are no obtrusive abrasions present, and we instead note only light chatter in the fields that apparently limits the grade. Population: 4 in 62, 6 finer (12/14). NGC ID# 25MC, PCGS# 7978

**1859 Three Dollar, Appealing MS63**

- 6982 1859 MS63 PCGS.** A slightly scarcer date, but available enough to be collectible. This is a sharply struck Select Mint State example, with deep orange-gold coloration and semiprooflike mirroring in the fields. A few minor abrasions are observed with a loupe, but none are individually detracting. Population: 25 in 63 (1 in 63+), 24 finer (12/14). NGC ID# 25MD, PCGS# 7979

- 6983 1860 AU53 PCGS.** An attractive AU example with lightly marked surfaces and well-defined motifs, showing usual weakness on the bow knot. This issue had a tiny mintage of only 7,036 coins. NGC ID# 25ME, PCGS# 7980

**1860 Three Dollar Gold, MS63  
Scarce at this Grade Level**

- 6984 1860 MS63 PCGS Secure.** The three dollar gold piece never achieved widespread acceptance, and dwindling mintages are the general rule for this denomination. There were 7,036 coins struck in 1860, and only a limited number survive at the Select Uncirculated level. Orange and green-gold obverse fields are contrasted by yellow at several high points. The reverse is similarly toned and reveals especially nice surfaces for the assigned grade. Population: 17 in 63, 18 finer (12/14). NGC ID# 25ME, PCGS# 7980

**1860-S Three Dollar, AU50  
Last Collectible Business Strike of the Series**

- 6985 1860-S AU50 NGC.** Excepting the unique and unobtainable 1870-S three dollar, the last business strikes for the denomination struck at a branch mint were dated 1860-S. This lightly worn example is pale orange-gold with considerable luster remaining in the protected areas. Modestly abraded yet appealing. Census: 13 in 50, 53 finer (11/14). NGC ID# 25ME, PCGS# 7981

**1861 Three Dollar Gold, AU58  
CAC-Endorsed**

- 6986 1861 AU58 PCGS. CAC.** A nearly Mint State example of this elusive Philadelphia issue. Only 5,959 pieces were struck, and Uncirculated survivors are seldom available. This coin is sharply detailed, with warm honey-gold surfaces. No significant abrasions are present, despite the grade. Population: 21 in 58, 69 finer (12/14). NGC ID# 25MG, PCGS# 7982

---

1864 Three Dollar, Well-Defined AU55

**6987 1864 AU55 PCGS.** This low-mintage issue (2,630 pieces) is difficult to locate in mint condition. The orange-gold surfaces of this Choice AU example display yellowish luster in the recessed areas. The design elements are sharply defined despite high-point wear, including the bowknot, a feature that is sometimes weak. A few minor ticks are consistent with a lightly circulated coin. Population: 28 in 55, 57 finer (12/14). NGC ID# 25MK, PCGS# 7985

---

1867 Three Dollar Gold, MS62  
Flashy and Eye-Appealing

**6988 1867 MS62 PCGS. CAC.** A scant mintage of only 2,600 coins accounts the rarity of the 1867 three dollar gold piece in Mint State. This example is well-struck, with semiprooflike fields and areas of wheat and honey-gold luster. Light contact in the fields accounts for the grade, as no obtrusive abrasions are present. Population: 10 in 62, 9 finer (12/14). NGC ID# 25MN, PCGS# 7988

---

1868 Three Dollar Gold , MS63  
Scarce Low-Mintage Issue

**6989 1868 MS63 NGC.** The 1868 three dollar gold piece claims a low mintage of 4,850 pieces, but the survival rate was fortunately high for this issue. This sharply detailed Select specimen displays pleasing yellow-gold surfaces with a mix of satiny mint luster and semiprooflike reflectivity in sheltered areas. Only a few minor contact marks are evident. Census: 7 in 63, 7 finer (12/14). NGC ID# 25MP, PCGS# 7989

---

1869 Three Dollar Gold, MS61  
Challenging Low-Mintage Date

**6990 1869 MS61 PCGS.** Only 2,500 three dollar gold pieces were struck at the Philadelphia Mint in 1869, and few Mint State examples are available in today's market. This attractive MS61 specimen offers well-detailed design elements and prooflike yellow-gold surfaces that show a scattering of minor contact marks on both sides. Population: 7 in 61, 16 finer (12/14). NGC ID# 25MR, PCGS# 7990

---

1873 Closed 3 Three Dollar Piece, AU55  
Notable Philadelphia Rarity

**6991 1873 Closed 3 AU55 PCGS.** The mintage for the 1873 Closed 3 three dollar pieces is unknown, but it was certainly no more than about 1,000 coins, as survivors are scarce in all grades and are extremely rare in Mint State. Mint records do report the production of 25 proofs, although the date logotype was unrecorded. This Choice AU representative is well-detailed, with remnants of deep prooflike mirroring still present in the border recesses. Medium olive-gold patina blankets both sides, complementing the overall appeal. The 3 in the date is indeed of the Closed 3 logotype. Population: 15 in 55, 33 finer (12/14). NGC ID# 25MW, PCGS# 7995

**1874 Three Dollar, MS64  
Nice Type Selection**

**6992 1874 MS64 NGC.** The 1874, with a certified population approaching 5,000 pieces, is one of the most common dates of the three dollar gold coin series, making it ideal for type purposes. The present near-Gem displays strong luster radiating from its yellow-gold surfaces that exhibit well-struck design elements except for weakness on the right side of the bowknot. Minor reverse marks limit the grade. Census: 83 in 64 (3 in 64+), 14 finer (11/14). NGC ID# 25MX, PCGS# 7998

**1877 Three Dollar, AU55  
A Key Date in the Series**

**6993 1877 AU55 PCGS.** The 1877 three dollar gold piece comes from a scanty production of 1,468 coins and is difficult to locate in all grades. PCGS and NGC have graded fewer than 90 examples in all levels of preservation, only 20 of which are Uncirculated. The yellow-gold surfaces of this Choice AU specimen display traces of luster in the recessed areas. Strong definition is apparent on the design elements though the bowknot shows the usual softness. Scattered circulation marks are more prominent on the reverse. An important key in the three dollar gold series. Population: 13 in 55, 20 finer (12/14). NGC ID# 25MY, PCGS# 7999

**1878 Three Dollar, Lustrous MS63  
A Pleasing Type Coin**

**6994 1878 MS63 NGC.** The 1878 is the most common date of the three dollar series evidenced by more than 11,000 examples certified in all grades by the two major services. Rich coruscating luster cascades over both sides of this Select specimen. The design elements are well-delineated and the peach-gold surfaces are minimally abraded for the grade designation. This is a pleasing type coin. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS63  
Excellent Type Coin**

**6995 1878 MS63 PCGS.** This is a vibrant, orange-gold example with no sizeable abrasions on either side. The strike is more than adequate for the series and the luster is frosty in sheen. This coin offers considerable aesthetic appeal for the assigned grade.  
*Ex: Dallas Signature (Heritage, 12/2005), lot 1290.* NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS64  
Eye-Catching Type Coin**

**6996 1878 MS64 PCGS.** A beautiful, shimmering Choice example of this available type issue. There are a few faint luster grazes on the cheek, but the surfaces are otherwise seemingly pristine. Frosty wheat-gold surfaces showcase unusually sharp detail, including strong definition on the wreath bow knot, which is usually soft. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS64  
Luminous, Swirling Luster**

**6997 1878 MS64 NGC.** Shimmering orange-gold luster complements frosty, minimally disturbed surfaces on each side of this Choice 1878 type coin. The strike is above-average, and the eye appeal is characteristically excellent. This issue is by far one of the most plentiful dates in the series in Mint State, popular among type collectors. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS64+  
Attractive Coloration**

**6998 1878 MS64+ PCGS. CAC.** The Plus designation perfectly sums up this coin's quality in comparison to many other 1878 three dollar gold pieces certified in MS64. The bow knot is slightly soft, as usual, but the obverse portrait is sharp and the surfaces are free of major distractions. Frosty honey-gold luster illuminates each side, yielding the occasional lilac and rose hue in the obverse fields. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, MS65  
Odd-Denomination Type Piece**

**6999 1878 MS65 PCGS.** A handful of dates in the three dollar gold series rise from the slog of small mintages to become accessible to type collectors, though the pressure on even these "type" issues is acute. The last of them is the 1878, available for a price at the Gem level but scarce any better. This MS65 piece has rich gold-orange luster on the obverse with elements of lighter color on the reverse. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, Beautifully Toned MS65**

**7000 1878 MS65 NGC.** A melange of beautiful yellow-gold and lime-green patination highlighted with blushes of lavender, sky-blue, and apricot cascades over the radiantly lustrous surfaces of this Gem. The design elements are sharply struck and the few minuscule ticks present are within the parameters of the grade designation. NGC has seen 55 examples numerically finer (11/14). NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS66  
Rich, Shimmering Mint Frost**

**7001 1878 MS66 NGC.** The 1878 is well-known among three dollar gold enthusiasts to be the most plentiful issue in the series in Mint State grades, and also one of the most eye-appealing, frequently seen with frosty, vibrant luster and remarkable striking sharpness. Its popularity as a type coin is arguably unmatched, although the 1854 and 1874 are also often chosen for this purpose. The 1878's availability, however, declines sharply in grades above MS64, and it becomes genuinely scarce in MS66; finer pieces are rare. The present coin is awash in shimmering orange-gold luster over frosty surfaces. Liberty's hair curls and the wreath bow knot exhibit above-average definition for the type, and the surfaces are devoid of any noticeable flaws. A visually impressive example of this popular three dollar gold type. Census: 43 in 66 (3 in 66+, 5 in 66 ★), 12 finer (11/14). NGC ID# 25MZ, PCGS# 8000

**7002 1879 AU55 PCGS.** From a tiny mintage of 3,000 coins, this Choice AU example displays well-struck devices that show modest wear from circulation and a few shallow pinscratches on the reverse. Pleasing hues of apricot and antique-gold on the obverse increase the coin's eye appeal. NGC ID# 25N2, PCGS# 8001

**7003 1881 XF40 NGC.** The yellow-gold surfaces of this XF three dollar display whispers of red at the margins. Traces of luster remain in the protected areas. Both sides have high-point wear but still exhibit well-defined devices. A very popular issue due to its low mintage of 500 business strikes. NGC ID# 25N4, PCGS# 8003

**1881 Three Dollar, AU55  
Mintage 500 Pieces**

**7004 1881 AU55 PCGS.** The three dollar denomination lingered many years past its useful life, often with a desultory mintage of 1,000 or even fewer pieces. The 1881 business strike issue amounted to just 500 pieces, this Choice AU example among them. Lavender-accented high points yield to coppery-wheat and violet-gold hues through the still-lustrous fields. Marks are generally minor. Population: 26 in 55, 49 finer (11/14). NGC ID# 25N4, PCGS# 8003

**7005 1883 AU53 PCGS.** The 1883 three dollar gold piece saw a paltry circulation-strike mintage of 900 coins and is therefore highly popular. The yellow-gold surfaces of this AU53 exhibit well-defined design elements and possess traces of mint luster in the recessed areas. A few minor ticks do not disturb. NGC ID# 25N6, PCGS# 8005

**1886 Three Dollar, Conditionally Rare MS63**

**7006 1886 MS63 PCGS. CAC.** The 1886 had a meager production of 1,000 circulation strikes. A number of these were saved by contemporary collectors as evidenced by the approximately 330 submissions seen by PCGS and NGC, a number of which fall into the MS60 to MS62 range. Higher-grade coins are rare and nearly unobtainable finer than near-Gem.

Prooflike fields highlight the motifs of this Select specimen that displays modest contrast, especially when the coin is rotated under a light source. The design features exhibit strong definition throughout. A few minor handling marks preclude a higher grade. Population: 10 in 63, 7 finer (12/14). NGC ID# 25N9, PCGS# 8008

**1887 Three Dollar Gold, MS63  
Lovely, Carefully Preserved Example**

**7007 1887 MS63 PCGS.** Doubling appears on RICA, as is often seen on the business strikes of this date. Coming so close to the end of the series, the 1887 had the highest mintage of any date in the 1880s at 6,000 coins, but examples scarcely circulated, and some pieces may have been melted before ever escaping the Mint. This lovely Select Mint State piece displays satiny orange-gold surfaces with few visible abrasions. A small rectangular strike-through appears before Liberty's nose, as made.  
Ex: FUN Signature (Heritage, 1/2009), lot 5338. NGC ID# 25NA, PCGS# 8009

**1887 Three Dollar, MS64**  
Mintage 6,000 Pieces

- 7008 1887 MS64 PCGS.** Just 6,000 business strikes make up this late-date three dollar gold issue, and that is one of the *higher* outputs for the post-1878 period. The denomination's characteristic swirling luster is yellow-orange and apricot-gold with a handful of coppery elements, most visibly at the bottom left corner of the first A in AMERICA. Population: 76 in 64 (2 in 64+), 35 finer (11/14). NGC ID# 25NA, PCGS# 8009

**1888 Three Dollar Gold, MS63**  
Fiery Toned Low-Mintage Example

- 7009 1888 MS63 PCGS.** Minimal production is the rule for small denomination gold in the 1880s. Only 5,000 three dollar gold pieces were struck in 1888, the second to last year of the series. Ample luster reflects orange-gold color with lighter toning above Liberty's forehead, and only a pair of marks below T of STATES precludes a higher grade. NGC ID# 25NB, PCGS# 8010

**1888 Three Dollar, MS64**  
Highly Attractive Patination

- 7010 1888 MS64 PCGS.** Despite a small mintage of 5,000 pieces, the 1888 is one of the most common issues in the three dollar gold series. Indeed, the vast majority of the 1,200 examples seen by PCGS and NGC are in Mint State grades through near-Gem. Even Gems can be acquired with patient searching. Highly attractive, rich orange-gold patination adorns the lustrous surfaces of this MS64 offering, and the design elements are well-struck except for the usually seen softness in the bow knot. An occasional minor mark precludes Gem classification. NGC ID# 25NB, PCGS# 8010

**1889 Three Dollar Gold, MS63**  
Flashy Final-Year Type Coin

- 7011 1889 MS63 PCGS. CAC.** The 1889 three dollar had a paltry mintage of only 2,300 coins, but enough examples of this final-year issue were saved that it is remarkably collectible today in Mint State grades. This example displays deep orange-gold patina, with boldly struck design elements and semiprooflike mirroring in the fields. Light, scattered ticks preclude a finer grade from PCGS. From The A. James Evans Collection, Part II. NGC ID# 25NC, PCGS# 8011

**PROOF THREE DOLLAR GOLD PIECES**

**Proof-Only 1876 Three Dollar**

- 7012 1876 — Damaged — NGC Details. Proof.** A formidable proof-only rarity, the 1876 has a Guide Book mintage of just 45 pieces. Regarding the number of survivors, PCGS states "35 to 40 known," a number of which are impaired. Only the unique 1870-S, and the proof-only 1875 and 1873 Open 3, provide a greater obstacle to those assembling sets. The present specimen is moderately granular and displays unusual streaks of light cherry-red toning. The portrait is indistinctly defined and displays a slender horizontal depression near the jaw. An important opportunity to acquire the famous Centennial-year date at a reasonable cost. NGC ID# 28AJ, PCGS# 8040

**Proof 1881 Three Dollar  
Mintage of 54 Pieces**

**7013 1881 — Improperly Cleaned — NGC Details. Proof.** Mint records indicate that only 54 proofs were struck. Most survivors sell for five figures when available. However, the present attractive specimen is comparatively affordable due to a light cleaning. Sharply struck and flashy with rich peach-gold toning. The fields display scattered trivial contact. NGC ID# 28AP, PCGS# 8045

**EARLY HALF EAGLES**

**1795 BD-3 Small Eagle Five  
Sharp AU Details**

**7014 1795 Small Eagle, BD-3, High R.3 — Polished — NGC Details. AU.** Ex: Hilt Collection. Bass-Dannreuther Die State c/b. BD-3 is the most often seen of the 12 1795 Small Eagle half eagle varieties, but its availability is only in relation to other early gold coin varieties, as there are still only 175 to 225 pieces believed extant in all grades. This is one of three uses for this obverse, and the only use of this reverse die. This coin is boldly struck, and the only trace of wear seems to be from the polishing of the surfaces that left the fields with a bright, flashy yellow-gold appearance. The relative availability of this variety, coupled with its first year of issue status, makes it highly popular among type and date collectors alike. *From The Liberty USA Collection.*

**1795 Half Eagle, AU Details  
Rare BD-8, Small Eagle**

**7015 1795 Small Eagle, BD-8, High R.5 — Repaired — NGC Details. AU.** Ex: Hilt Collection. Bass-Dannreuther Die State a/a. BD-8 is a rare 1795 half eagle variety, with only 30 to 40 examples believed known in all grades. The obverse die is seen here in its first of four uses, its final use being on the currently unique BD-13 Large Eagle variety; this reverse die was also employed for the rare BD-1 1798 variety. The present example of the BD-8 die pairing is boldly and evenly struck, with just slight wear over the central design elements. Both sides show unnaturally bright, yellow-gold coloration with a slightly dusky hue, a product of the well-executed repair work in the fields on both sides. A still-pleasing coin to the unaided eye. *From The Liberty USA Collection.*

**1798 Large Eagle Five, BD-3, XF40  
Large 8, 14 Stars Reverse**

- 7016** 1798 Large Eagle, Large 8, 14 Stars Reverse, BD-3, R.5, XF40 NGC. Ex: Hilt Collection. Bass-Dannreuther Die State a/c. The large 8 in the date touches the bust and is above the 9 but this is the only obverse used with the unusual 14 Stars reverse. In this late die state, a crack bisects the reverse, running from the last A in AMERICA, through the right half of the shield, the M in UNUM, a star, a cloud, to the F in OF. John Dannreuther estimates that about 35 to 50 survive of this rare variety. The obverse was also used for the 1798 BD-4 variety and “still in perfect condition for this second pairing,” writes Dannreuther, so the early self-destruction of the unusual 14 Stars reverse is clearly the culprit. Perceptible high-point wear shows on each side of this bright yellow-gold example, which also shows scattered scrapes and ticks and some slight planchet adjustment marks in the lower shield area. From *The Liberty USA Collection*. PCGS# 507323 Base PCGS# 8080

**1798 Large Eagle Five, XF Details  
BD-4, 13 Stars Reverse**

- 7017** 1798 Large Eagle, Large 8, 13 Stars Reverse, BD-4, High R.4 — Obverse Scratched — NGC Details. XF. Ex: Hilt Collection. Bass-Dannreuther Die State d/e, terminal. This is the final use of both dies. BD-4 is the most plentiful of the seven 1798 Large Eagle five dollar varieties, but it is still itself scarce, with only 80 to 100 examples believed known in all grades. This piece exhibits pleasing green-gold coloration, though the central design elements show light wear. A few old, light scratches in the left and right obverse fields preclude a numerical grade from NGC, but are not overly detracting to the unaided eye. From *The Liberty USA Collection*. PCGS# 507324 Base PCGS# 8078

1799 BD-1 Half Eagle, AU55  
Small Reverse Stars in a Cross Star Pattern

**7018** 1799 Small Reverse Stars, BD-1, High R.5, AU55 NGC. Ex: Hilt Collection. Bass-Dannreuther Die State d/d. Both Walter Breen and Robert Hilt did seminal work describing the different star patterns on early U.S. gold. The BD-1 reverse shows a nearly perfect Cross Star Pattern, with field stars 3, 8, 9, 10, and 11 in a straight line. Stars 10, 11, and 13 form a triangle, the only 1799 reverse to do so and diagnostic of the BD-1 die pair. The obverse star 9 has a prominent spike off the innermost point.

Prooflikeness remains among the obverse stars and across the reverse. Light abrasions and rub account for the grade, with a bit of strike weakness at Liberty's hair around the ear. Struck from a late state of the dies, with notable die clashing on the reverse and diagnostic die cracks from the eagle's head to the clouds and edge. No more than 35 to 45 examples are thought to exist in any condition for the variety. Census (Small Reverse Stars): 3 in 55, 8 finer (11/14). From *The Liberty USA Collection*. PCGS# 519873 Base PCGS# 8081

1800 Half Eagle, BD-2, AU55  
Late-State Obverse Clashing

**7019** 1800 AU55 PCGS. CAC. BD-2, High R.3. Bass-Dannreuther Die State c/c. This is an exceedingly attractive-for-the-grade example of this relatively available die pairing for the 1800 half eagles, one that is often sought out for type purposes. Only a light scattering of marks appears on each side but no singular abrasions, and much mint luster remains on each side. The coloration, varying from canary-yellow to amber-gold with some deeper reddish glints on the device high points, is another point in this coin's favor. The obverse is extensively die-clashed in the area around LIBERTY, and a small diagonal die crack runs through IB. NGC ID# 25NW, PCGS# 8082

1800 Half Eagle, AU55  
BD-4, Blundered M, Blunt 1

**7020** 1800 BD-4, R.4, AU55 NGC. Ex: Hilt Collection. Bass-Dannreuther Die State c/a. The M in AMERICA is broadly recut and diagnostic for this variety, while the 1 in the date lacks its flag. This is a lemon-gold example, bright and untuned, with no mint planchet defects or die problems visible. The coin retains areas of mint luster around the devices. A few small marks are seen in the obverse field near stars 11 and 12. The strike is bold on both sides, although the eagle's breast feathers are weak, and the talons and head lack detail. The BD-4 variety is more available than many early five dollar varieties, from a mintage estimated by Bass-Dannreuther to be between 5,000 to 7,500 pieces.  
From *The Liberty USA Collection*. PCGS# 45594 Base PCGS# 8082

1800 Five Dollar, AU58  
BD-4, Blundered M  
Dual Cud Die State

**7021** 1800 BD-4, R.4, AU58 NGC. Bass-Dannreuther d/c with cuds over NIT and the first T in STATES. BD-4 is identified by the blundered M in AMERICA, and is seen less often than BD-2 or BD-5. Generally lightly toned lime-green but the remaining luster displays rose-red tints. Nicely struck and well defined despite light wear on the cap, forehead, and drapery. Abrasions are inoffensive for the designated grade, although we note a single vertical line at the top of the cap. Luster is particularly extensive on the reverse, but the portrait and obverse border also retain mint bloom.  
Ex: *New York Signature (Heritage, 6/2005)*, lot 6429. PCGS# 45594 Base PCGS# 8082

**1802/1 Half Eagle, BD-1, Unc Sharpness  
Sharp Strike, Rich Original Color**

- 7022** 1802/1 BD-1, High R.4 — Obverse Spot Removed — NGC Details. Unc. Ex: Hilt Collection. Bass-Dannreuther Die State a/b, reverse terminal with numerous prominent die cracks. BD-1 is one of the more plentiful varieties in the so-called “Centered Overdate” issue, but still with only about 75 to 100 examples believed extant in all grades. This piece shows original orange-gold luster with tinges of peach and wheat-gold throughout. The strike is bold and the eye appeal is exceptional. A tiny obverse spot was carefully removed beneath Liberty’s chin, though the evidence is hardly noticeable. *From The Liberty USA Collection.*

**1803/2 Half Eagle, BD-1, Bright AU55**

- 7023** 1803/2 BD-1, R.4. AU55 NGC. Ex: Hilt Collection. This variety is attributed by the 3 in the date just free of the bust, a missing right foot of T in LIBERTY, and a reverse star pointing to the upper beak. The bright yellow-gold surfaces of this Choice AU example display well-struck design elements except for weakness in the left (facing) claw and adjacent arrow shafts. There are no significant marks and no adjustment marks. *From The Liberty USA Collection.* PCGS# 504948 Base PCGS# 8084

**1803/2 Five Dollar, Choice AU  
BD-2, Green Label Holder**

- 7024** 1803/2 BD-2, R.5, AU55 PCGS. Bass-Dannreuther Die State d/c. A well struck honey-gold representative with only slight wear evident on the nose, chin, forehead, and bust tip. Minimally abraded aside from an inconspicuous scrape on the Y in LIBERTY. The rarest of the four 1803/2 die marriages. The upright of the E is states is over a gap between clouds, although in the present die state, the bisecting reverse crack is also diagnostic. Housed in a green label holder. PCGS# 504949 Base PCGS# 8084

**1804 Early Half Eagle, AU58  
BD-6, Small 8 Over Large 8**

- 7025** 1804 Small 8 Over Large 8, BD-6, R.5, AU58 NGC. Ex: Hilt Collection. Bass-Dannreuther Die State a/b. The reverse is heavily broken at multiple locations, with areas of die clashing interspersed among the die breaks. The obverse is perfect, with the date boldly repunched. Bass-Dannreuther calls this variety the “Normal 180 over Large 180,” because the underdigit 8 is large but the overdigit is of normal size. The 1 is broadly recut north as is the 0, although not as noticeably. The Small 4 is high and touches the bust. In spite of the many die issues, the strike is bold. The breast feathers are nearly complete with minor flattening of the arrow feathers and Liberty’s curls at the forehead. Attractive olive-gold surfaces display reddish-orange highlights. A notably scarce variety, with perhaps 35 to 45 pieces known in all conditions. *From The Liberty USA Collection.* PCGS# 519896 Base PCGS# 8086

1805 Half Eagle, BD-2  
Appealing Choice AU Example

- 7026** 1805 BD-2, R.4, AU55 NGC. Ex: Hilt Collection. Bass-Dannreuther Die State g/d. The terminal state for this obverse die, only in its second use, with multiple heavy cracks and bold clash marks. The reverse is heavily clash and lightly cracked, but was retained for striking the final three 1805 varieties, as well as the first 1806 variety, where it finally cracked terminally. This Choice AU BD-2 example is lightly struck on the obverse stars, but the border denticles are complete and the central reverse is unusually sharp. A few light marks are scattered across the yellow-gold surfaces, but none are individually distracting. BD-2 is a scarce variety overall, with just 100 to 150 examples believed known, and is noticeably scarcer than the “common” variety for this year, BD-1, which shares this obverse die.  
From *The Liberty USA Collection*. PCGS# 45616 Base PCGS# 8088

1806 Half Eagle, AU58  
BD-1, Pointed 6

- 7027** 1806 Pointed 6, 8x5 Stars, BD-1, R.4, AU58 NGC. Ex: Hilt Collection. Bass-Dannreuther Die State c/e. This is the first of two uses for this quickly deteriorating obverse die, which shows light peripheral cracks throughout the stars and LIBERTY. This is final of five uses for this leftover 1805 reverse; it is clashed and fatigued, with a cud over the second S in STATES and the space to the right. It cracks later in this marriage and is retired. BD-1 is the most plentiful Pointed 6 variety with 100 to 150 examples believed extant, but it is many times rarer than the available Knobbed 6 variety, BD-6. The present BD-1 example is well-struck around the borders, with just light weakness in the centers. Significant luster remains in the recesses amid warm yellow-gold patina that yields overtones of honey and sun-gold. The central reverse shows remnants of faint roller marks, not completely flattened by the die pressure. An appealing near-Mint example of this elusive variety.  
From *The Liberty USA Collection*. PCGS# 45621 Base PCGS# 8090

1806 Half Eagle, AU Sharpness  
BD-6, Knob 6

- 7028** 1806 Knob 6, 7x6 Stars, BD-6, R.2 — Harshly Cleaned — NGC Details. AU. Ex: Hilt Collection. Bass-Dannreuther Die State d/e. Many of the diagnostic die cracks of this late die state have been effaced by aggressive cleaning, though the presence of the rust lump on the R in LIBERTY confirms the attribution. This is the only use of this obverse die, and the second and final use of this reverse. The present coin is well-struck, with unnaturally bright, curiously shimmering luster due to old cleaning. Remnants of a few mint-made adjustment marks are noted on the right-hand portion of the reverse.  
*From The Liberty USA Collection.*

1806 Round Top 6 Half Eagle, AU53  
7x6 Stars, BD-6, *Guide Book* Variety

- 7029** 1806 Knob 6, 7x6 Stars, BD-6, R.2, AU53 NGC. Bass-Dannreuther Die State a/b, the reverse showing signs of die clashing in the form of a clash mark connecting a star point to the left eagle's wing nearby. The Round Top 6 is sufficient to attribute this variety, as all other half eagle die marriages of 1806 are the Pointed Top 6 type. This is an attractive, lightly circulated honey-gold example, certified in an early NGC holder. The surfaces are problem-free, and the planchet adjustment marks at the reverse rim above ES OF AMERICA and through the lower shield stripes are as made at the Mint. A popular *Guide Book* variety. PCGS# 45620 Base PCGS# 8089

1807 Bust Right Half Eagle, BD-6, XF45  
Appealing for the Grade

- 7030** 1807 Bust Right, BD-6, High R.4, XF45 NGC. Ex: Hilt Collection. Bass-Dannreuther Die State b/c. This is one of the more plentiful 1807 Bust Right varieties, with about 80 to 100 coins believed known. BD-6 is also the final variety of this type, and it is possible that both dies were retired before they completely failed, as no terminal die state is yet known for this die pairing. This example exhibits light circulation, but retains strong detail and boasts a crisp strike. Medium green-gold coloration encompasses both sides, and the surfaces are devoid of any major abrasions.  
*From The Liberty USA Collection.* PCGS# 519905 Base PCGS# 8092

1807 Bust Right BD-6 Half Eagle  
Uncirculated Details

- 7031** 1807 Bust Right, BD-6, High R.4 — Damage — PCGS Genuine. Unc. Details. Bass-Dannreuther Die State a/b. Breen's Large Date variety with a tall, narrow 1 and 8 and a broad, nearly round 0. The 1 and 0 are clearly repunched. The open obverse field exhibits myriad minute marks, the reason for the PCGS designation. Rich golden-brown luster fills the borders, while the remainder of the coin is olive-gold. PCGS# 519905 Base PCGS# 8092

1807 BD-8 Five Dollar, AU50  
John Reich's Bust Left Design

- 7032** 1807 Bust Left, BD-8, R.2, AU50 PCGS. Bass-Dannreuther Die State d/b, lightly clashed on Liberty's neck. Assistant Engraver John Reich introduced his Capped Bust Left design in 1807, replacing the Capped Bust Right type of Chief Engraver Robert Scot. The reaction of the latter is unknown. Both types are rare, but the 1807 BD-8 Reich variety is more collectible than most. This original caramel-gold example has a bold strike. The borders, eagle, curls, and cap are lustrous. A lens reveals a few faded thin marks on the field near the eagle. PCGS# 507607 Base PCGS# 8101

**1807 Bust Left Five, BD-8, AU58**  
**Appealing Original Coloration**

- 7033 1807 Bust Left, BD-8, R.2, AU58 NGC.** Ex: Hilt Collection. Bass-Dannreuther Die State d/b. BD-8 is the more plentiful of the two Capped Bust Left half eagle varieties, often chosen for type purposes. This is the second and final use of this obverse die, and the first of four uses for this reverse. This obverse is not currently known in a terminal state, and it may have simply been retired at the end of the calendar year. The present BD-8 example is boldly struck, with just a brush of friction over the high points of the design. Original honey-gold patina blankets each side, and the surfaces are devoid of any significant abrasions or mint-made adjustment marks. An immensely appealing Capped Bust Left type coin.  
*From The Liberty USA Collection.* PCGS# 507607 Base PCGS# 8101

**1808/7 Half Eagle, BD-1, AU58**  
**Rare Overdate Variety**

- 7034 1808/7 BD-1, R.6, AU58 NGC.** Ex: Hilt Collection. Bass-Dannreuther Die State c/c, terminal, with a shattered obverse die. The most significant crack bisects the obverse from the first 8 in the date, through the T in LIBERTY, to the rim above the cap. The remnants of an underlying 7 are visible to the upper and lower-left of the second 8 in the date. This variety is rare, several times rarer than the other overdate variety of this year, BD-2, which shares this reverse die, but has a different obverse. Only 20 to 30 examples of BD-1 are believed extant, making it by far the rarest variety of the 1808 issue, and nearly twice as rare as the BD-7 1807 variety, with which it is sometimes mistakenly thought to be similar in availability. This nearly Mint State example shows sharp stars and central detail, with frosty green-gold luster that yields just a brush of friction over the high points of the design and the open areas of the fields. An impressive, late die state example of this challenging die marriage.  
*From The Liberty USA Collection.* PCGS# 45636 Base PCGS# 8103

**1808 Half Eagle, BD-3, AU58**  
**Sharp, Lustrous Type Coin**

- 7035 1808 Close 5D, BD-3, R.4, AU58 PCGS.** Bass-Dannreuther Die State a/d. BD-3 is one of the more plentiful varieties of the 1808 half eagle, but it is still itself scarce, with only 100 to 125 examples believed extant. This is the first of two uses for this obverse die, but the final of four uses for this leftover 1807 reverse. This coin displays lovely straw-gold luster, with sharp details and no evidence of adjustment marks around the borders. The eye appeal is remarkably pleasing, as the surfaces are smooth and free of obtrusive abrasions. PCGS# 507604 Base PCGS# 8102

**1808 Half Eagle, BD-4, AU58**  
**Popular Wide 5D Variety**

- 7036 1808 Wide 5D, BD-4, High R.3, AU58 NGC.** Ex: Hilt Collection. Bass-Dannreuther Die State c/a, as always. The obverse die is lapped, with much of the clashing from its previous use for BD-3 effaced. This variety is fairly available in the context of early half eagles, with 175 to 225 examples believed extant, but it is unique as the only 1808 variety struck with this Wide 5D reverse die. This reverse was later used for the sole 1809 variety. The present example displays natural olive-gold patina, with remnants of original luster in the recesses. Slight friction is evident over the high points of the design, but most details remain sharp. Some faint adjustment marks are noted along the upper-right obverse rim.  
*From The Liberty USA Collection.* PCGS# 507605 Base PCGS# 8102

1809/8 Half Eagle, BD-1, AU58  
Only Variety of the Issue

- 7037** 1809/8 BD-1, High R.3, AU58 NGC. Ex: Hilt Collection. Bass-Dannreuther Die State c/c, with a crack from star 1 to the tip of the bust. This is the scarcest *date* of this type, although, with only one variety known, there are many rarer *varieties*. BD-1 has traditionally been considered an 1809/8 overdate, though John Dannreuther doubts its overdate status, suggesting that the underlying numeral may simply be another misplaced 9. Regardless, however, this date and variety is ever popular, being scarce, but obtainable, with 250 to 325 examples believed extant. This representative is well-struck, with just slight friction over the high points of the design. Substantial remaining luster illuminates medium green-gold patina, and the eye appeal is exceptional.  
From *The Liberty USA Collection*. PCGS# 507603 Base PCGS# 8104

1809/8 BD-1 Half Eagle, MS62  
Smooth, Problem-Free Surfaces

- 7038** 1809/8 BD-1, High R.3, MS62 PCGS. Bass-Dannreuther Die State c/b. An unlisted die state combination, late in life for the marriage but without the crack near the O in OF. An attractive olive-gold representative that has uncommonly unabraded surfaces. The obverse dentils display glimpses of adjustment marks, as made, but the remainder of the coin is smooth. Bright luster illuminates the legends and devices. A double set of light clash marks, as issued, is noted above the eagle's shoulders. A tadpole-shaped remnant of an underdigit is nestled between the ball and loop of the 9 in the date. PCGS# 507603 Base PCGS# 8104

1810 Half Eagle, Near-Mint  
BD-4, Large Date, Large 5

- 7039** 1810 Large Date, Large 5, BD-4, R.2, AU58 NGC. Bass-Dannreuther Die State a/a without clashes or cracks. A nicely struck almond-gold near-Mint representative. Luster dominates the borders, eagle, and curls. Distributed small marks are noted on the left and right obverse field, and on the reverse field beneath the scroll. PCGS# 507598 Base PCGS# 8108

**1810 BD-4 Five Dollar, Near-Mint  
Large Date, Large 5**

- 7040** 1810 Large Date, Large 5, BD-4, R.2, AU58 NGC. CAC. Bass-Dannreuther Die State c/b with prominent clash marks and minor die cracks. A charming green-gold Borderline Uncirculated early half eagle. Luster dominates the borders and motifs, and the only reportable abrasion is a subtle obverse rim ding at 4:30. The strike is generally bold, although the central reverse retains parallel roller marks, as coined. PCGS# 507598 Base PCGS# 8108

**1810 Large Date, Large 5 Half Eagle, MS60  
Praiseworthy and Collectible Example**

- 7041** 1810 Large Date, Large 5, BD-4, R.2, MS60 NGC. Bass-Dannreuther Die State c/b. The 1810 Large Date, Large 5 half eagle is popular as a type coin and an in-demand issue as one of the most available of early half eagle die varieties. This piece displays generous luster for the grade on mellow amber-gold surfaces with hints of prooflikeness in the fields. Only under a loupe do minor surface disturbances appear, some as made at the Mint — planchet adjustment marks on the cheek and jawline of Liberty and at the left obverse rim — and others the result of apparent post-Mint contact, including a small dotlike planchet indent near star 2 and a few miscellaneous scrapes on each side. This is still a coin with plenty of meat on the bone, one that merits collectors' attention. PCGS# 507598 Base PCGS# 8108

**1811 Half Eagle, Choice VF  
Small 5, BD-2**

- 7042** 1811 Small 5, BD-2, R.3, VF35 PCGS. Bass-Dannreuther Die State d/a. This early five dollar type coin is predominantly caramel-gold but displays rose-red in protected areas. The curls exhibit moderate wear but the wing plumage is mostly sharp. No marks merit mention, and the eye appeal is impressive for the designated grade. PCGS# 507599 Base PCGS# 8109

**1811 Small 5 Half Eagle, Well-Defined AU53**

- 7043** 1811 Small 5, BD-2, R.3, AU53 NGC. Ex: Hilt Collection. Bass-Dannreuther Die State d/a. No discernible evidence of die clashing or visible die cracks define the die state for this BD-2, Small 5 half eagle. The yellow-gold surfaces of this AU53 example display hints soft olive-green and the design features are well-defined. Neither side reveals significant marks. Census for the variety: 3 in 53, 17 finer (11/14).  
*From The Liberty USA Collection.* PCGS# 507599 Base PCGS# 8109

**1812 Half Eagle, AU58  
Pleasing Eye Appeal**

- 7044** 1812 BD-1, R.3 AU58 NGC. Ex: Hilt Collection. Of the two known varieties for the 1812 half eagle, BD-1 with a Wide 5 D is the more available, with 300 to 450 pieces believed to survive (Dannreuther, 2006), and as such is usually chosen for type purposes. A curious characteristic of this variety is a curved die line that runs through the horizontal shield lines and ends in the eagle's left (facing) wing.

This near-Mint example displays considerable luster on its yellow-gold surfaces that are blushed with whispers of apricot on the right reverse border. Sharply struck design elements and remarkably clean surfaces round out the coin's pleasing overall eye appeal.  
*From The Liberty USA Collection.* PCGS# 507601 Base PCGS# 8112

1813 Half Eagle, AU Details  
BD-1, First Year of Type

- 7045 1813 BD-1, R.2 — Cleaning — PCGS Genuine. AU Details. Bass-Dannreuther Die State b/b. Clashed on the letters of LIBERTY, and between the vertical shield stripes. An attractive early gold type coin despite a mild and inoffensive cleaning. The wheat-gold surfaces are lightly abraded apart from a faint line behind Liberty's mouth and a slender horizontal field mark beneath the left (facing) wing. PCGS# 519907 Base PCGS# 8116

1813 Half Eagle, BD-1, AU Details  
Excellent Type Representative

- 7046 1813 BD-1, R.2 — Improperly Cleaned — NGC Details. AU. Ex: Hilt Collection. Bass-Dannreuther Die State a/a. BD-1 is widely popular as the only date and variety of this type that is marginally available for type purposes. This piece is well-struck, with slight wear over the highest points of the design. The surfaces exhibit bright green-gold patina with evidence of light cleaning, though the overall appeal remains pleasing. From *The Liberty USA Collection*. PCGS# 519907 Base PCGS# 8116

1813 BD-1 Five Dollar  
Uncirculated Details

- 7047 1813 BD-1, R.2 — Cleaning — Genuine PCGS. Unc. Details. Bass-Dannreuther Die State b/b, clashed west of the eagle's left (facing) leg. A sharply defined lemon-gold first-year representative of the challenging Capped Head Left type. The surfaces are a bit bright from a wipe but no hairlines are readily apparent. In fact, abrasions of any kind are inconsequential, although light mint-made obverse roller marks appear on the dentils and the field beneath the chin.

1813 Half Eagle, AU Details  
Better BD-2 Variety

- 7048 1813 BD-2, R.4 — Obverse Repaired — NGC Details. AU. Bass-Dannreuther Die State b/a. Liberty's cheek and jaw are unobtrusively smoothed, but this well defined early gold half eagle will nonetheless satisfy many collectors. The forehead and shoulder curl display light wear, but luster outlines the stars and fills the legends. The scarcer of the two 1813 die varieties.

1834 Five Dollar, AU Details  
With Motto, Plain 4, BD-2

- 7049 1834 With Motto, Plain 4, BD-2, R.5 — Repaired — PCGS Genuine. AU Details. The right obverse field is smoothed, but the overall look of the present caramel-gold representative is attractive. The strike is crisp except on the stars, and no marks are readily evident. Although Classic Head 1834 quarter eagles are plentiful, old tenor coins of that date and denomination are rare. The head of Liberty is larger and wears a cap instead of a headband. The reverse displays E PLURIBUS UNUM on a scroll on the upper field, the most obvious difference from its Classic successor. The *Guide Book* lists an 1834 Capped Head mintage of 50,141 pieces, but most were undoubtedly melted. The few hundred survivors are distributed over four die marriages, two each with a plain or crosslet 4. PCGS# 519956 Base PCGS# 8161

## CLASSIC HALF EAGLES

- 7050** 1834 Plain 4 AU55 PCGS. CAC. Breen-6501, McCloskey 3-B, R.1. A well defined and original olive-green example. Peach-tinged luster accompanies design recesses. Only lightly abraded for the type. A few drops of lacquer are noted within the shield. NGC ID# 25RR, PCGS# 8171

### 1835 Half Eagle, Well-Struck MS61

- 7051** 1835 MS61 NGC. Breen-6505, McCloskey 3-D, R.3. The near leaf tip under the right side of U in UNITED and the middle of the 5 in the denomination centered under the tip of the arrow feathers attribute the variety. The 1835 Classic Head five dollar can be located with patient searching through near-Gem but is essentially unobtainable any finer. The bright yellow-gold surfaces of this MS61 example exhibit well-struck design elements. Some minuscule ticks do not detract. Census: 37 in 61, 54 finer (11/14). From *The Liberty USA Collection*. NGC ID# 25RV, PCGS# 8173

- 7052** 1836 AU58 NGC. Breen-6509, McCloskey 4-D, R.2. Second Head, Large Date. A well-struck and lustrous example of this Classic Head half eagle, with rich coloration and minimal surface marks. A great near-Mint example, very close to Mint State. NGC ID# 25RY, PCGS# 8174

### 1836 Half Eagle, MS61 McCloskey 6-E, Block 8

- 7053** 1836 Block 8, Large Date, Breen-6509, McCloskey 6-E, R.4, MS61 NGC. Ex: Hilt Collection. An early die state example, before the obverse shatters. The 1836 is one of the more plentiful issues from the short-lived Classic Head type, but it is significantly scarcer overall than the more often seen 1834. The typical example is lightly circulated, grading in the XF to AU range, and Mint State coins are scarce. This piece is slightly soft on the obverse stars, but the central motifs are sharply impressed. Luminous orange-gold luster engulfs each side, revealing only faint surface grazes and no obtrusive abrasions. An immensely appealing example of this issue and grade. From *The Liberty USA Collection*. NGC ID# 25RY, PCGS# 8174

### 1838 Five Dollar, Near-Mint Final Classic Date

- 7054** 1838 AU58 NGC. Breen-6514, McCloskey 1-A, R.2. Large Arrows, Small 5. A straw-gold representative with plentiful luster at the borders and across the devices. The strike is bold, and the wingtips, eyebrow, and curls show only a hint of wear. Marks are minor except for a slender abrasion concealed in the upper right portion of the hair. NGC ID# 25S4, PCGS# 8176
- 7055** 1838 AU58 NGC. Breen-6514, McCloskey 1-A, R.2. Despite a reported mintage of 286,588 pieces, just two die marriages are known. The present variety is distinguished by large arrows and a small 5. The straw-gold surfaces are well struck and exhibit only slight high point wear. The left obverse displays marks commensurate with the grade. NGC ID# 25S4, PCGS# 8176

## LIBERTY HALF EAGLES

- 7056** 1841-C XF40 PCGS. Variety 1. A wheat-gold representative of this relatively early and low mintage (21,467 pieces) Charlotte issue. The eagle's plumage is well defined although Liberty's hair shows the incompleteness of strike usual for the remote branch mint facility. There are no distracting marks. NGC ID# 25SP, PCGS# 8203
- 7057** 1843 MS61 NGC. This greenish-gold 1843 half eagle offers a nice original look and mostly distributed small abrasions, although a dig on Liberty's rear shoulder requires singular mention. A small mark appears in the right obverse field, but this is a piece with overall good eye appeal. NGC ID# 25T2, PCGS# 8213

### 1843-C Half Eagle, XF45 Minimally Abraded for the Issue

- 7058** 1843-C XF45 NGC. Variety 2. Variety 2 is attributed by the mintmark centered over the V in FIVE; Variety 1 has the mintmark centered over the right half of the V. The 1843-C half eagle is most frequently seen in the Very Fine to Extremely Fine range. Mint State specimens are scarce to rare, only 25 examples having been seen by NGC and PCGS, none finer than MS64. The orange-gold surfaces of this Choice XF example are imbued with traces of green, red, and apricot. Distributed light marks are not severe or as detracting as typically encountered on this date. The design features are well-defined. Census: 33 in 45, 67 finer (10/14). NGC ID# 25T3, PCGS# 8214

**1843-O Half Eagle, Near-Mint  
Small Letters and Mintmark**

- 7059** 1843-O Small Letters AU58 PCGS. Variety 2. A straw-gold New Orleans representative without any mentionable marks. The strike is generally good although the curls near the ear are incomplete, as are the fletchings and the eagle's neck feathers. From a low mintage of 19,075 pieces. Population: 1 in 58, 3 finer (12/14). NGC ID# 25T5, PCGS# 8217

**1844-C Half Eagle, AU55  
Above-Average Strike and Surfaces**

- 7060** 1844-C AU55 NGC. Variety 1. The sole die pair for the year shows three die states. The present Choice AU specimen is Die State II, identified by a crack from the first A in AMERICA through the wing to the eagle's neck. A shorter crack runs from the rim to the left (facing) wing tip.

The 1844-C is typically located in Very Fine to Extremely Fine. About Uncirculated pieces are very scarce, and fewer than 20 specimens have been certified in AU55. The two major services have seen only 13 Uncirculated pieces, none finer than MS63. Both sides of the current offering display greenish-gold hues, and each exhibits above-average detail on the devices, including the hair around Liberty's face, the eagle's wing tips and leg feathers, and the shield lines, all areas that tend to be weak on most coins. Only the date shows a band of minor softness across the middle, a characteristic feature of the issue. Furthermore, while the surfaces show distributed circulation marks, these are fewer and less severe than the heavy abrasions typically seen. All in all, a very nice coin with above-average attributes. Census: 11 in 55, 14 finer (10/14). NGC ID# 25T8, PCGS# 8220

**1844-C Half Eagle, Choice AU**

- 7061** 1844-C AU55 NGC. Variety 1. A caramel-gold example that has fewer marks than is usual for the grade, despite moderate contact on Liberty's cheekbone. The eagle is well struck for a C-mint issue, although the curls and fletchings are typically brought up. An elusive Charlotte issue with a mintage of only 23,631 pieces. Census: 11 in 55, 14 finer (11/14). NGC ID# 25T8, PCGS# 8220

**1844-D Half Eagle, MS60  
Rare in Mint State**

- 7062** 1844-D MS60 NGC. Variety 11-G (formerly Variety 11-H). By Dahlonega standards, the 1844-D is not rare, but Mint State pieces are nonetheless very few in number, and hardly sufficient to satisfy the demand of the many collectors of this famous Georgia mint. The strike is bold for a Dahlonega product, although the shield and the curls near the ear are not needle-sharp. Bright luster dominates the borders, and no obtrusive marks are evident. The 1 in the date is lightly recut at the peak, a diagnostic of this variety. Census: 4 in 60, 14 finer (12/14).  
Ex: Long Beach Signature (Heritage, 6/2005), lot 7765. NGC ID# 25T9, PCGS# 8221

- 7063** 1845-D XF45 NGC. Variety 13-H (formerly 12-I). A tan-gold example with glimpses of orange-tinged luster in design recesses. Substantial wing plumage detail confirms only moderate circulation. A few small marks on the upper reverse field, but attractive overall for the grade. A popular Dahlonega type issue. NGC ID# 25TC, PCGS# 8224

**1845-D Half Eagle, AU58  
Lustrous and Sharp Example**

- 7064** 1845-D AU58 NGC. Variety 13-H. This is the usually seen obverse die for the date, showing the 1 shifted further left compared to the bust truncation than on the seldom-seen Variety 14-H. Given the generous (for Dahlonega) mintage exceeding 90,000 coins, the 1845-D is considered a "type" coin for the 1840s, the secondmost-common D-mint five save for the 1843-D, and overall fourthmost-common if one includes the 1854-D and 1853-D. This example boasts attractive greenish-gold surfaces with generous luster and a bold strike, although a few light marks are scattered about. Census: 74 in 58 (2 in 58+), 22 finer (12/14). NGC ID# 25TC, PCGS# 8224

1845-O Half Eagle, MS61  
Well-Struck, Lightly Abraded

**7065 1845-O MS61 PCGS. Variety 1.** The 1845-O half eagle was coined only seven years after the United States opened its first branch mints, including New Orleans, at a time when most of the gold in the United States was still mined in Georgia and the Carolinas. The 1845-O half eagle had a production of 41,000 coins, and Mint State examples can be counted on both hands. This piece exhibits lemon-yellow toning along with tinges of light reddish patina. The strike is uniformly strong, although short of full. Small abrasions are peppered over each side but none are noticeable without magnification. A prize for the collector of antebellum O-mint gold coins. Population: 1 in 61, 3 finer (11/14).

*Ex: Fort Worth ANA Signature (Heritage, 3/2010), lot 2279, which realized \$12,650. NGC ID# 25TD, PCGS# 8225*

1846 Large Date Half Eagle, MS63  
Ex: S.S. New York

**7066 1846 Large Date MS63 NGC. Ex: S.S. New York.** Of the two major varieties of the 1846 half eagle, the Large Date variant is the more available, but in Mint State even it becomes a major 19th century rarity. NGC reports just 25 Large Date coins in all Mint State grades, with only five in MS63 and five numerically finer (11/14); even this paltry number, however, likely includes resubmissions.

The present coin is pedigreed to the famous *S.S. New York* shipwreck. The side-wheel steamship sank in a hurricane in the Gulf of Mexico while en route from Galveston, Texas to New Orleans, Louisiana in September 1846, and the bulk of its gold-coin cargo was not recovered until 2007. As a result of its long underwater sentence, this piece exhibits slight saltwater etching, but retains razor-sharp details and satiny yellow-gold luster. An important Philadelphia condition rarity. NGC ID# 28BG, PCGS# 8226

**1846 Five Dollar, MS60  
Conditionally Rare Small Date**

**7067 1846 Small Date MS60 PCGS.** The widely spaced 846 in the date distinguishes the Small Date variety from the scarcer Large Date, which shows a close 846. The present Uncirculated Small Date representative has a good strike, lemon-gold color, and plenty of flashy luster. We note three slender marks near the eagle's neck and the E in UNITED. Population: 1 in 60, 3 finer (11/14). PCGS# 88226

**7068 1846-D/D VF25 NGC. Variety 16-J (formerly 15-L).** Cherry-red toning clings to protected areas, while the remainder of this original Dahlonega example is olive-gold. No abrasions are conspicuous aside from a mark on the edge at 12 o'clock. Liberty's hair is worn but the wings show plumage detail. The mintmark is widely repunched. PCGS# 8229

**7069 1846-D/D XF40 NGC. Variety 17-J.** Lightly marked aside from two inconspicuous rim dings on the reverse near 12 and 3 o'clock. A yellow-gold example of this popular Dahlonega variety. The mintmark was initially entered much too high. The base of the errant mintmark was effaced on the die by a mint worker, but the upper half of the mintmark could not be lapped, since it would attenuate the eagle's branch. PCGS# 8229

**7070 1847-D XF45 NGC. Variety 18-K (formerly 16-L).** A pleasing Dahlonega type coin with original apricot-gold toning and crisp definition at the borders and on the wings. Liberty's curls and the eagle's neck are lightly brought up, customary for the issue.  
*Ex: Long Beach Signature (Heritage, 6/2006), lot 3303, which realized \$2,530. NGC ID# 25TP, PCGS# 8234*

**1847-D Five Dollar, AU50  
Vibrant Orange-Red Toning**

**7071 1847-D AU50 PCGS. CAC. Variety 18-K (formerly 16-L).** Deep orange-red and olive-green toning confirms the originality of this partly lustrous Dahlonega type coin. Marks are minimal, although we note a strike-through on the field behind the neck curls. The strike is above average except on the lovelock and hairbun.  
*Ex: Harry Einstein Collection (Bowers and Merena, 6/1986), lot 365; Rajj Collection (Stack's-Bowers, 8/2011), lot 9397. NGC ID# 25TP, PCGS# 8234*

**1847-O Five Dollar, AU53  
Low-Mintage Rarity**

**7072 1847-O AU53 PCGS. Variety 1.** The New Orleans Mint struck 571,500 ten dollar pieces in 1847, a mintage much greater than the combined prior production of the denomination at that facility. New Orleans must have been so busy coining eagles that half eagles were comparatively neglected. A scant 12,000 five dollar pieces were struck, and survivors are rare in all grades. The present example displays deep orange-red fields and steel-blue high points. No marks are of singular consequence, and the strike is good for the facility despite some blending on Liberty's hair. Population: 8 in 53, 4 finer (11/14). NGC ID# 25TR, PCGS# 8235

**7073 1848-C VF30 NGC. Variety 1.** The only known die variety. Deep copper-red toning covers each side of this scarce Charlotte mint example. The usual striking softness is observed on the eagle's talons and arrow fletchings. Typically worn for the grade with the expected number of small to moderate abrasions. NGC ID# 25TT, PCGS# 8237

1848-C Half Eagle, AU53  
Popular Charlotte Issue

**7074 1848-C AU53 NGC. Variety 1.** Hints of lime-green visit predominantly sun-gold surfaces. The strike is usual, showing blending on the curls and the legs of the eagle. Abrasions are inconsequential except for a slender mark behind Liberty's mouth and a few rim ticks near the left (facing) wingtip. A popular high-mintage Charlotte issue. NGC ID# 25TT, PCGS# 8237

**7075 1850-C Weak C AU53 ANACS. Variety 4.** The mintmark was lightly entered into the working die and has low relief, but virtually all of its outline is apparent when viewed beneath a lens. A luminous caramel-gold representative with relatively few abrasions. The major devices have a nice strike although several stars are lightly brought up. PCGS# 98244

1851-C Five Dollar, AU55

**7076 1851-C AU55 NGC. Variety 1.** The "earlobe punch" variety, although nowadays the "pierced ear" might be more appropriate. The 1851-C is a scarcer issue than one might imagine from the mintage of 49,176 pieces, one that Doug Winter calls "somewhat forgotten and clearly underrated." This specimen shows the numerous abrasions that 1851-C fives are known for, with only one significant mark, above the eagle's head on the reverse. The strike is good but incomplete, as expected. The surfaces are rich light-yellow with small areas of prooflike surface around the device edges.  
*Ex: Palm Beach Signature (Heritage, 3/2005), lot 6946, which realized \$4,772.50. NGC ID# 25U6, PCGS# 8247*

1852 Half Eagle, MS64  
Among the Finest Certified at PCGS

**7077 1852 MS64 PCGS.** No Motto Liberty half eagles are rarely seen in grades finer than MS63. Even the most plentiful dates are elusive in higher grades. The 1852 is a prime example with a mintage that exceeded a half-million coins, but with only 23 examples certified MS64 at NGC and PCGS combined, and with only three finer NGC coins (12/14). The average certified grade for this issue is less than AU55. This Choice Mint State specimen is boldly defined with nearly full star and hair detail on the obverse and only slight weakness on the claws, arrow feathers, and neck feathers on the reverse. Both sides have brilliant yellow luster with frosty mint surfaces and exceptional eye appeal. Population: 11 in 64 (1 in 64+), 0 finer (12/14). NGC ID# 25UA, PCGS# 8250

1852-C Half Eagle, MS62

**7078 1852-C MS62 PCGS. Variety 1.** An attractive olive-gold representative of a popular Charlotte Mint issue. The strike is above average but shows slight blending on the curls near the ear. Only minimally abraded except for a single slender mark above the left (facing) wing. Struck from widely rotated dies. The Philadelphia Mint struck 573,901 pieces in an attempt to replace hoarded and melted silver coin, but the Charlotte five dollar production was about one-eighth that level, at 72,574 pieces. Two die marriages are known. The date is placed higher on Variety 1 than on its rarer Variety 2 alternative. Population: 5 in 62, 6 finer (11/14). NGC ID# 25UB, PCGS# 8251

---

**1853 Five Dollar, Conditionally Rare MS63**

- 7079 1853 MS63 NGC.** The 1853 half eagle is common in circulated grades but mint condition examples are difficult to come by, especially in MS63 and finer. Peach-gold coloration covers the lustrous surfaces of this Select specimen. The usual softness is seen in the hair at Liberty's temple and on the eagle's neck and leg feathers. Small marks determine the grade, the most noticeable occurring on Liberty's chin. Census: 5 in 63, 5 finer (11/14). NGC ID# 25UD, PCGS# 8253

---

**1853-C Half Eagle, MS62  
Rare in Mint Condition**

- 7080 1853-C MS62 NGC. Variety 1.** The 1 in the date is close to the bust and the C mintmark is centered over the V in FIVE. Mint State examples of the 1853-C half eagle are rare and are unknown numerically finer than MS64. The bright yellow-gold surfaces of this MS62 specimen exhibit well-struck design elements. Distributed minute marks limit the grade. Census: 9 in 62, 5 finer (11/14). NGC ID# 25UE, PCGS# 8254

---

**1853-D Half Eagle, MS61  
Attractive Dahlongega Type Coin**

- 7081 1853-D Large D MS61 NGC. Variety 34-Y.** A pleasing honey-gold No Motto half eagle that boasts smooth fields and satin luster. The strike is precise aside from the first two stars. No marks are worthy of mention except for a subtle graze on the bridge of Liberty's nose. Ideal for representing the series within a Dahlongega type set. Census: 20 in 61, 13 finer (11/14). NGC ID# 25UF, PCGS# 8255

---

**1853-D Five Dollar, MS61  
Excellent Eye Appeal**

- 7082 1853-D Large D MS61 NGC. Variety 34-Y.** Five die marriages are known from the mintage of 89,678 pieces. Although it is a considerable task to obtain all five varieties, a single example of the issue can be secured with patience. However, examples are rarely encountered in Mint State, with a good strike and virtually unabraded lemon-gold surfaces. The present such piece will satisfy even the most demanding Dahlongega collector. NGC ID# 25UF, PCGS# 8255

---

**1855-C Five Dollar, Near-Mint  
Well-Struck Charlotte Type Coin**

- 7083 1855-C AU58 NGC. Variety 1.** A peach-gold Borderline Uncirculated Charlotte type coin. Well struck and without any noticeable abrasions. Luster illuminates the borders, curls, and eagle. Even scarcer than the NGC Census suggests, since resubmissions over the years inflates the number certified. Census: 22 in 58 (2 in 58+), 15 finer (11/14). NGC ID# 25UR, PCGS# 8262

**1855-O Half Eagle, AU58  
Underappreciated O-Mint Rarity**

**7084 1855-O AU58 NGC. Variety 1.** The 1855-O half eagle had a small mintage of only 11,100 coins, virtually all of which experienced heavy circulation and attrition. The number of coins surviving is much lower than many non-specialists realize. NGC and PCGS combined have certified just 110 examples, including an unknown number of resubmissions. This pegs the 1855-O as rarer than most Dahlonega and Charlotte issues from this period. Most known representatives are in the XF40 to AU50 range; high-end AUs are few and far between and Mint State coins are prohibitively rare, with just six pieces reported by the grading services, none finer than MS61.

This near-Mint representative is about as high-end for the date as is typically obtainable. The strike is sharp and there are remnants of semiprooflike mirroring in the fields. The eye appeal is compounded by deep, original coloration, ranging from honey-gold hues in the centers, to deeper orange-gold around the borders. No significant marks are observed on either side. Census: 7 in 58, 3 finer (12/14). NGC ID# 25UT, PCGS# 8264

**1856-C Five Dollar, MS61  
Peach Toning, Unmarked**

**7085 1856-C MS61 NGC. Variety 1.** Rich orange toning embraces this satiny and refreshingly unabraded Charlotte Mint half eagle. The strike is exceptionally sharp on the portrait and stars, although the eagle's neck and right obverse dentils lack full definition. Shallow strike-throughs, as coined, are present on the lower left obverse quadrant and the upper right reverse field. The reverse has a hint of granularity. The 1856-C has a mintage of just 28,457 pieces and most certified survivors are in XF to AU grades. Census: 6 in 61, 3 finer (11/14). NGC ID# 25UW, PCGS# 8267

**1856-D Half Eagle, AU53  
Original Olive and Peach Toning**

**7086 1856-D AU53 PCGS. CAC. Variety 39-FF (formerly 33-BB).** The high points and open fields are olive-green. Peach-red luster accompanies the legends and stars. This original Dahlonega half eagle is exceptionally nice for its designated grade. Minimally abraded aside from a dig between stars 9 and 10. The strike is usual for the branch facility with moderate weakness on the Liberty's curls and the eagle's neck plumage. NGC ID# 25UX, PCGS# 8268

**7087 1857 MS61 PCGS.** A well-defined yellow-gold example with warm and inviting luster. Modestly abraded overall with a shallow pinscratch rising from the eagle's head. Population: 10 in 61, 28 finer (12/14). NGC ID# 25V2, PCGS# 8271

**1857 Liberty Five, MS63  
Challenging Philadelphia Issue**

**7088 1857 MS63 PCGS.** From a relatively small Philadelphia mintage of 98,188 pieces, the 1857 Liberty half eagle is rare at the MS63 grade level and finer examples are extremely rare. This attractive Select specimen offers sharply detailed design elements and lustrous peach-gold surfaces that show only a few minor contact marks. Population: 11 in 63, 4 finer (12/14). NGC ID# 25V2, PCGS# 8271

**1857-D Half Eagle, AU58  
Attractive Original Patina**

**7089 1857-D AU58 NGC. Variety 42-HH.** The 1857-D half eagle is one of the scarcer late-date issues from the Dahlonega Mint, with just 150 to 200 coins believed extant. The typical piece grades in the XF to lower AU range, and the availability drops significantly in the upper reaches of AU. Mint State coins are extremely rare. This near-Mint example is slightly soft on the eagle's neck and arrow feathers, but is otherwise well-struck for the issue. Subtle luster resides beneath undeniably original orange-gold patina. This is a rare and important characteristic for the specialist, as Doug Winter writes: "There are only a handful of 1857-D half eagles that have original coloration." A few minor marks accompany the grade, as usual. NGC ID# 25V4, PCGS# 8273

**7090 1859-D Medium D — Improperly Cleaned — NGC Details. AU. Variety 44-HH.** Both sides exhibit the usual light hairlines indicative of improper cleaning. This pleasing piece retains traces of mint luster on its greenish yellow-gold surfaces.  
Ex: William H & Beularess K. Helem Collection (Ira & Larry Goldberg, 1/2012), lot 1562.

**1861 Liberty Half Eagle, MS62  
Lustrous Civil War Issue**

**7091 1861 MS62 NGC.** This sharply detailed MS62 Liberty half eagle was struck during the first year of the Civil War. The lustrous antique-gold surfaces of this piece exhibit a scattering of minor contact marks that do little to detract from the outstanding eye appeal. Census: 72 in 62 (1 in 62+), 55 finer (12/14). NGC ID# 25VK, PCGS# 8288

**1861-C Five Dollar, XF45  
Rare Final Charlotte Issue**

**7092 1861-C XF45 PCGS. Variety 1.** An originally toned half eagle with green-gold fields and ample glimpses of orange-gold luster. The strike is above average and there are no singularly detracting marks. A small strike-through is noted beneath the right (facing) wing. The final product of the Charlotte Mint, the 1861-C five has a mintage of only 6,879 pieces, including 887 pieces likely struck in May 1861 under Confederate authority. NGC ID# 25VL, PCGS# 8289

**1861-C Half Eagle, AU Details  
Final C-Mint Issue**

**7093 1861-C — Improperly Cleaned — NGC Details. AU. Variety 1.** Ex: On Air Collection. Only 6,879 half eagles were struck at the Charlotte Mint in 1861, and it is believed that the last 887 coins were struck under the authority of the Confederacy, after the Mint was seized on April 20. This well-detailed greenish-gold example shows highlights of rose and a few signs of a light cleaning in the past. The reverse shows a long planchet flaw across the upper portion of the coin and the faint die crack through the top of the letters in AMERICA. Housed in a customized NGC holder.

1861-S Half Eagle, AU53  
Scarce in All Grades

**7094 1861-S AU53 NGC.** The 1861-S half eagle had a limited mintage of only 18,000 coins, all of which were dispersed into Western commerce. Attrition claimed most examples, and fewer than 100 survivors are believed known today, with none certified as Mint State. This About Uncirculated representative is among the finer-known examples, with sharp details that show just light high-point wear. The stars retain virtually complete radials and the eagle's talons are separated. Warm honey-gold color blanket both sides, yielding hints of luster in the border recesses when rotated beneath a light. Census: 8 in 53, 12 finer (12/14). NGC ID# 25VN, PCGS# 8291

1866-S No Motto Five, AU58  
Scarce in All Grades  
Tied for Finest Certified

**7095 1866-S No Motto AU58 NGC.** The San Francisco Mint struck just 9,000 half eagles in 1866 before dies for the new With Motto type arrived for coinage. All were apparently dispersed into circulation, and fewer than 100 are believed to survive in all grades, with none certified as Mint State. The typical piece grades only in the VF and lower range, and the small handful of AU coins known are the finest available for this scarce S-mint five. This near-Mint representative is sharply detailed with substantial green-gold luster remaining in the recesses. Close examination is needed to detect any discernable wear on the high points of the design. Census: 10 in 58, 0 finer (12/14). NGC ID# 25VY, PCGS# 8300

**1866 Motto Five Dollar, MS61  
Very Rare in Mint Condition**

**7096 1866 MS61 NGC.** The first year of the only major design change in the long-lived Liberty half eagle series, the 1866 was produced to the extent of just 6,700 business strikes. This issue is a significant rarity at all levels of preservation, with VF and XF being the most commonly encountered grades among survivors. One of only three certified Mint State survivors from both services combined (11/14), this coin is alive with golden-rose color and boldly defined features. The surfaces are quite lustrous for the grade with an overall frosty appearance and modest hints of brightness in the fields. Moderately abraded, as befits the grade.

*Ex: Central States Signature (Heritage, 4/2002), lot 7013. NGC ID# 25VZ, PCGS# 8311*

**1870-CC Half Eagle, XF Details  
Important Carson City Rarity**

**7097 1870-CC — Improperly Cleaned — NCS. XF Details. Variety 1-A.** The 1870-CC is the first and rarest Carson City half eagle issue. From the mintage of 7,675 pieces, PCGS estimates that only between 75 and 100 coins have survived. Those in search of a better defined but affordable example need look no further than the present lot. The surfaces are glossy from cleaning and exhibit occasional moderate marks. The wings display nearly complete detail but the strike is inexact on the eagle's extremities and Liberty's hair. NGC ID# 25WA, PCGS# 8320

**7098 1872-S AU53 NGC.** The yellow-gold surfaces of this S-mint half eagle retain traces of luster in the recessed areas. The design elements are well-impressed except for the often-seen weakness in the arrow feathers. Each side reveals distributed, minute marks. The 1872-S is challenging in all grades. Census: 25 in 53, 31 finer (12/14). NGC ID# 25WH, PCGS# 8327

**1874-S Half Eagle, AU55  
Mintage 16,000 Pieces**

**7099 1874-S AU55 NGC.** The San Francisco Mint's focus on double eagles led to comparative neglect for the smaller gold denominations. Compared to its peers, the 1874-S half eagle, mintage 16,000 pieces, fared decently! Unsurprisingly, even better circulated examples of the issue are scarce and desirable. This Choice AU coin has a surprising level of remaining luster with a mix of butter-yellow and peach hues. Strong detail on Liberty's hair and most of the eagle's feathers. Census: 12 in 55, 7 finer (11/14). NGC ID# 25WR, PCGS# 8335

**7100 1875-CC AU50 NGC. Variety 1-B.** Only 11,828 half eagles were struck in this popular Western mint in 1875, and the 1875-CC has been a perennial collector favorite. It is notably scarce in AU condition. This piece is better struck than the average example encountered with slight high-point softness seen over the devices. The reddish-tinged surfaces are only marred by a couple of shallow scrapes in the right obverse field. NGC ID# 25WU, PCGS# 8337

---

**1877-CC Five Dollar, AU50**  
**Rare Carson City Emission**

- 7101 1877-CC AU50 PCGS. Variety 1-B.** A scant mintage of 8,680 pieces ensures the rarity of this Old West half eagle. Clashed from the wing near Liberty's chin and mouth, but the sun-gold surfaces are refreshingly free from visible marks. The strike shows minor merging on the curls and the eagle's neck, usual for the issue. Population: 14 in 50, 12 finer (11/14). NGC ID# 25X2, PCGS# 8343

---

**1878 Half Eagle, MS65**  
**Condition Census**

- 7102 1878 MS65 NGC.** Frosty and brilliant. Most design features are boldly and deeply defined including the obverse stars, all of which show their radials. The eagle's plumage and claw details are also sharp. Despite a fairly generous mintage of 131,740 pieces, David Akers, a pioneer in the study of 19th-century gold rarities, writes that the 1878 is "moderately scarce in strictly Uncirculated condition" and that "Gems . . . are seldom seen." This testimony is borne out by the population data for the issue which shows that MS65 examples rank as important condition rarities. Census: 5 in 65 (1 in 65+), 0 finer (12/14).  
*Ex: Dallas Signature (Heritage, 12/2005), lot 1350. NGC ID# 25X4, PCGS# 8345*
- 7103 1879-S MS63 PCGS.** The bright yellow-gold surfaces are sharply struck and offer generous luster. A few scattered, small ticks are in concert with the grade but far from overt. Population: 29 in 63, 15 finer (12/14). NGC ID# 25X9, PCGS# 8350

---

**1880 Liberty Five, MS66**  
**Tied for Finest Certified**

- 7104 1880 MS66 NGC.** The 1880 Liberty half eagle was produced in large numbers, and examples in lower Mint State grades are plentiful. However, the date is much harder to locate in grades above the Gem level than the mintage of 3.1 million pieces would suggest. This coin is tied with one other specimen at NGC and one coin at PCGS for the title of "Finest Certified."
- The present coin is a spectacular Premium Gem, with impeccably preserved reddish-gold surfaces that radiate vibrant mint luster on both sides. The design elements are well-detailed, with just a touch of softness on the centers and eye appeal is outstanding. Census: 2 in 66, 0 finer (11/14). NGC ID# 25XA, PCGS# 8351

---

**1882 Five Dollar, MS65**  
**Bold Mint Luster**

- 7105 1882 MS65 NGC.** Rings of gold-orange at the margins give way to paler yellow in the well-defined centers. Though a small flaw appears at the tip of the bust, its origin is ambiguous. Of more concern are shallow flaws at and to the right of the date, but on the whole this is a pleasing Gem. NGC has graded only three coins as MS66 or finer (11/14). NGC ID# 25XG, PCGS# 8358

**1882-S Five Dollar, MS65  
Conditionally Rare**

- 7106 1882-S MS65 NGC.** Marginally available in lower grades, the 1882-S half eagle is an often overlooked condition rarity in Gem. This representative is boldly struck, with frosty, honey-gold luster that illuminates attractively clean fields. A few wisps of rose and lilac are also distinguished upon closer examination. Census: 31 in 65, 3 finer (12/14). NGC ID# 25XJ, PCGS# 8360

**1882-S Half Eagle, Sharply Struck MS65  
Elusive at This Grade Level**

- 7107 1882-S MS65 NGC.** San Francisco half eagles of 1882 are available with relatively little trouble through near-Gem after which the population declines precipitously. Gems are elusive and higher-grade coins are extremely rare. Whispers of soft lime-green visit the lustrous peach-gold surfaces of this MS65 specimen that exhibits sharply struck devices. A few minute marks are within the confines of the grade designation. Census: 31 in 65, 3 finer (11/14). NGC ID# 25XJ, PCGS# 8360

- 7108 1883 MS64 PCGS.** A nice, sharp strike appears on each side of this near-Gem half eagle, orange-gold with generous luster and only scattered small marks. The 1883 was a low-mintage issue for the 1880s at 233,400 coins, but mintages would plummet further during the decade. Population: 22 in 64 (2 in 64+), 4 finer (12/14). NGC ID# 25XK, PCGS# 8361

**1883-CC Five Dollar, AU55  
Scarce in High Grades**

- 7109 1883-CC AU55 PCGS. CAC. Variety 1-A.** An underrated rarity in high grades, the 1883-CC has an extant population of just 23-28 AU coins from an original mintage of 12,958 pieces. A Choice quality representative for the AU grade level, this is a boldly impressed coin with only the lightest rub over the high points. The otherwise golden-rose features exhibit a swirl of orange-gold color over the eagle's left (facing) leg. Remnants of mint luster are evident, particularly toward the denticles, and the number of small abrasions is consistent with the assigned grade. NGC ID# 25XL, PCGS# 8362

- 7110 1884-S MS64 NGC.** The 1884-S half eagle issue is underrated, especially in high grades, as collectors tend to pay more attention to New Orleans Mint products. This near-Gem showcases frosty luster over honey-gold surfaces that feature sharply defined devices and only a few tiny ticks. From a mintage of 177,000 coins, NGC has certified 21 submissions in Choice condition with just two finer (12/14). NGC ID# 25XR, PCGS# 8366

**1885-S Half Eagle, MS66  
Only One Coin Numerically Finer at PCGS**

- 7111 1885-S MS66 PCGS.** Frosty, honey-gold luster yields hues of rose and lilac as it illuminates nearly undisturbed, mint-fresh surfaces. A bold strike completes the eye appeal. High-grade examples of the 1885-S are often overlooked by collectors seeking rare dates, due to the availability of lower-grade pieces, but are nonetheless major condition rarities. Population: 4 in 66, 1 finer (12/14). NGC ID# 25XT, PCGS# 8368

**1886-S Half Eagle, MS65  
Conditionally Rare S-Mint Issue**

- 7112 1886-S MS65 NGC.** The West Coast mint struck more than 3.2 million half eagles in 1886. Examples are plentiful up to and including the MS64 level, but the issue becomes rare in Gem condition. NGC has seen just 52 submissions in MS65 (two in 65+, one in 65 ★), with one coin finer (10/14). This lovely representative is crisply impressed and minimally marked. Rose-gold color and shimmering luster combine over each side. NGC ID# 25XV, PCGS# 8370

- 7113 1887-S MS64+ PCGS.** A profoundly attractive example of this high-mintage S-mint issue. Deep rose-gold coloration drapes the obverse, while the reverse exhibits lighter shades of sun-gold and mint-green. A fully struck near-Gem with carefully preserved, minimally disturbed surfaces. Rare any finer. Population: 10 in 64+, 3 finer (11/14). NGC ID# 25XW, PCGS# 8371

- 7114 1891-CC MS62 NGC. Variety 1-A.** A fully struck sun-gold Carson City five. Cartwheel luster is evident and the reverse shows only minor contact. The obverse displays marks consistent with bag storage and shipment. NGC ID# 25Y5, PCGS# 8378

---

**1891-CC Half Eagle, MS64**  
**Obtainable Carson City Example**

- 7115 1891-CC MS64 PCGS. CAC. Variety 1-A.** Although not the scarcest coin in the Carson City half eagle series, this well-struck five still bears the all important CC mintmark that evokes the romance of the American West. Near-gem luster is interrupted only by a few obverse ticks between stars 8 and 9, while the yellow-gold reverse features highlights of coppery-brown color. This CAC-approved five would be a pleasing start to a gold type or Carson City half eagle collection. NGC ID# 25Y5, PCGS# 8378

---

**1891-CC Half Eagle, MS64+**  
**High Grade Carson City Type Coin**

- 7116 1891-CC MS64+ PCGS. CAC. Variety 1-A.** The centered date variety, one of two known obverses for the issue. A fully struck and lustrous near-Gem. Beautiful orange-gold toning dominates the fields and motifs, while sea-green fills the margins. Rotation beneath a loupe reveals wispy field grazes. Nearly unsurpassable at PCGS, and a formidable entry within a Carson City type set. Population: 83 in 64 (5 in 64+), 1 finer (11/14). NGC ID# 25Y5, PCGS# 8378

---

**1892-S Five Dollar, Sharply Struck MS64**  
**An Important Condition Rarity**

- 7117 1892-S MS64 PCGS.** Most of the nearly 300,000-piece mintage of 1892-S half eagles circulated, and Mint State examples through MS63 can only be located with patience. Near-Gems are decidedly rare and finer coins are virtually unobtainable. Orange-gold luster exudes from the sharply struck surfaces of the present offering. A few minute marks are within the confines of the grade designation. Population: 7 in 64, 0 finer (11/14).  
Ex: Long Beach Signature (Heritage, 9/2005), lot 4652. NGC ID# 25Y9, PCGS# 8382

---

**1893 Half Eagle, MS66**  
**Rare This Fine**

- 7118 1893 MS66 NGC.** Creamy luster is largely wheat-gold with areas of sun-yellow and straw. This solidly struck Premium Gem is from a high-mintage issue that nonetheless is a clear condition rarity so fine; NGC has certified only eight examples in Premium Gem and only two numerically finer (12/14). NGC ID# 25YA, PCGS# 8383
- 7119 1893-CC AU58 PCGS. Variety 1-A.** The second 2 in the mintmark is lightly repunched north. Luster dominates the borders and devices of this charming sun-gold Carson City half eagle. Only minimally abraded for the near-Mint level. NGC ID# 25YB, PCGS# 8384

---

**1894 Half Eagle, MS65**  
**Seldom Seen This Nice**

- 7120 1894 MS65 PCGS.** Referring to the 1894 Liberty half eagle, Jeff Garrett and Ron Guth write, "There are very few Gem examples known." This exciting orange-gold Gem displays well-detailed devices and ample mint luster, with excellent eye appeal. PCGS and NGC combined have graded just three coins in higher numeric grades (12/14). NGC ID# 25YE, PCGS# 8387

---

**1895 Liberty Half Eagle, MS65**  
**Only Five Numerically Finer**

- 7121 1895 MS65 PCGS.** This boldly rendered half eagle exhibits Gem luster to full effect. Satiny yellow-gold surfaces give way to more intense color over the highest points of the obverse. The deeply impressed reverse reveals only a few ticks as expected at this grade level. This is an exceptional type coin worthy of a generous bid. PCGS population: 16 in 65 (1 in 65+), 5 finer (12/14). NGC ID# 25YH, PCGS# 8390

---

**1895 Half Eagle, MS65+  
Rarely Encountered Finer**

- 7122 1895 MS65+ PCGS.** A high-mintage date (more than 1.3 million coins), but conditionally scarce in Gem condition and decidedly rare any finer. This Plus-graded example displays frosty honey-gold luster, with only a few faint surface grazes limiting a full Premium Gem grade. A bold strike completes the eye appeal. Population: 16 in 65 (1 in 65+), 5 finer (11/14). NGC ID# 25YH, PCGS# 8390

---

**1895 Half Eagle, MS66  
A Condition Rarity**

- 7123 1895 MS66 NGC.** This honey-gold Premium Gem has touches of brighter orange in the velvety fields. A pleasingly detailed example of an issue that, despite a high mintage of more than 1.3 million pieces, is nonetheless a condition rarity in better-than-Gem grades. A remarkable coin that deserves an in-person look. Census: 8 in 66, 2 finer (12/14). NGC ID# 25YH, PCGS# 8390

---

**1895 Half Eagle, MS67  
Extreme Condition Rarity**

- 7124 1895 MS67 NGC.** Though heavily minted, the 1895 half eagle is an extreme condition rarity, where two NGC examples and one at PCGS are the sole survivors with none finer (12/14). This NGC Superb Gem has extraordinary eye appeal thanks to yellow-to-orange luster, finely textured and remarkably undisturbed. Great design definition also is an asset. NGC ID# 25YH, PCGS# 8390

- 7125 1896 MS64 PCGS.** This low-mintage date slightly exceeding 59,000 pieces is elusive in near-Gem and extremely rare any finer. Peach-gold surfaces display dazzling luster and sharply struck design elements. Light scuffs limit the grade. Population: 21 in 64 (1 in 64+), 4 finer (12/14). NGC ID# 25YK, PCGS# 8392

- 7126 1899 MS65 NGC.** Lavish mint frost and alternating greenish-gold and orange-gold patina invigorate the surfaces of this well-struck Gem half eagle. The few tiny marks appearing on the portrait are far from overt. NGC ID# 25YS, PCGS# 8398

- 7127 1899 MS65 NGC.** The prevailing orange-gold patina is accented by a patch of ice-blue on the obverse high points. This Gem offers sharply struck surfaces with a few scattered marks, mostly on the reverse. NGC ID# 25YS, PCGS# 8398

- 7128 1899 MS65 NGC. CAC.** Sharply struck with intensely lustrous, richly toned surfaces, this lovely Gem has outstanding eye appeal. Both sides reveal excellent preservation and just a handful of trivial nicks. NGC ID# 25YS, PCGS# 8398

- 7129 1900 MS65 PCGS.** A turn-of-the-century Gem with excellent detail on Liberty's portrait and the eagle. The surrounding fields are pale yellow overall with a deeper tone at the top of the reverse. PCGS has graded just 10 numerically finer pieces (12/14). NGC ID# 25YU, PCGS# 8400

- 7130 1900 MS65 NGC.** This spectacular Gem displays razor-sharp definition on all design elements and the well-preserved peach-gold surfaces show minimal signs of contact. NGC has graded 32 numerically finer examples (12/14). NGC ID# 25YU, PCGS# 8400

---

**1900 Half Eagle, Gem Mint State  
A Turn-of-the-Century Beauty**

- 7131 1900 MS65 PCGS. CAC.** Largely honey-gold surfaces reveal distinct lavender and mint-green shadings throughout, generating vivid eye appeal for this Gem Liberty Head five. The design elements are sharp, and only a few tiny ticks and grazes visit each side. PCGS has certified only 10 coins in numerically higher grades (12/14). NGC ID# 25YU, PCGS# 8400

---

**1900 Half Eagle, MS65+  
Rare Any Finer**

- 7132 1900 MS65+ PCGS. CAC.** This turn-of-the-century half eagle offers great quality for the type collector. Well-defined devices are delightfully smooth and the apricot-gold luster is generous. Deeper elements are noted below the I in FIVE and at a tiny fleck in the hair behind the coronet. PCGS has graded only 10 examples as MS66 or better (11/14). NGC ID# 25YU, PCGS# 8400

---

**1900 Half Eagle, Premium Gem  
A Turn-of-the-Century Condition Rarity**

- 7133 1900 MS66 PCGS.** While this turn-of-the-century issue saw a mintage of more than 1.4 million pieces, even it has a point where it becomes conditionally rare and that is MS66. This Premium Gem has a distinct yellow-orange cast on the obverse with areas of both deeper and lighter color on the strongly lustrous and crisply struck reverse. Population: 8 in 66 (1 in 66+), 2 finer (11/14). NGC ID# 25YU, PCGS# 8400

---

**1901-S Five Dollar, Conditionally Elusive MS66**

- 7134 1901-S MS66 NGC.** With thousands of coins certified by the two major services the 1901-S five dollar is available with little trouble through the Gem level of preservation. Premium Gems are elusive and this issue is rare any finer. A medley of yellow-gold and peach toning adorns the lustrous surfaces of the present offering. Sharply struck motifs and minimally marked surfaces round out the coin's pleasing eye appeal. Census: 64 in 66 (6 in 66+), 11 finer (11/14). NGC ID# 25YX, PCGS# 8404
- 7135 1902-S MS65 PCGS.** The 1902-S Liberty half eagle is a scarce issue at the MS65 level. This delightful Gem displays sharply detailed design elements and vibrant mint luster throughout, and the well-preserved peach-gold surfaces show few signs of contact. PCGS has graded 33 numerically finer examples (12/14). NGC ID# 25YZ, PCGS# 8406
- 7136 1903-S MS65 PCGS.** A delightful Gem, with vibrant mint luster and sharply detailed design elements throughout. A minor planchet flaw at 2:30 on the obverse is the only mark of note. PCGS has graded only 19 numerically finer examples (12/14). NGC ID# 25Z3, PCGS# 8408
- 7137 1903-S MS65 NGC.** Pale yellow-gold surfaces brim with cartwheel luster. A pleasingly detailed later-date Liberty five of the design later borrowed for the Old Mint commemorative of 2006. NGC has graded 50 numerically finer examples (12/14). NGC ID# 25Z3, PCGS# 8408
- 7138 1904 MS65 PCGS.** This gorgeous Gem yields radiant luster and sharply struck design elements. An occasional light mark is within the confines of the grade designation. Population: 68 in 65 (1 in 65+), 22 finer (12/14). NGC ID# 25Z4, PCGS# 8409
- 7139 1904 MS65 PCGS.** A nice sharp strike, close to full, with beaming luster and lovely orange-gold color make this well-preserved Gem one of the nicest survivors of its cohort. The issue is seldom seen in finer grades. Population: 68 in 65 (1 in 65+), 22 finer (12/14). NGC ID# 25Z4, PCGS# 8409

---

**1904 Half Eagle, Beautifully Patinated MS66**

- 7140 1904 MS66 PCGS.** Orange-gold, lime-green, and canary-yellow hues converge on this beautifully patinated 1904 half eagle. The strike is bold throughout, close to full save for a tad of softness on the eagle's claws, and the surfaces are nicely preserved throughout and free of distracting abrasions. Population: 17 in 66, 5 finer (12/14). NGC ID# 25Z4, PCGS# 8409
- 7141 1904-S MS63 PCGS.** The 1904-S is one of the scarcest 20th century issues in the Liberty half eagle series, being decidedly elusive in all Mint State grades, and rare in Choice or finer condition. This Select example displays frosty honey-gold luster and sharp design elements. Grade-limiting surface abrasions are light and evenly dispersed, with overall excellent appeal for the grade. Population: 12 in 63, 11 finer (12/14). NGC ID# 25Z5, PCGS# 8410
- 7142 1906 MS65 PCGS.** Satiny surfaces boast intermingled golden-orange and mint-green patina on each side, a lovely effect, and mentionable marks are at a minimum. The strike is somewhat soft on the lower obverse and upper reverse. Population: 73 in 65 (3 in 65+), 26 finer (12/14). NGC ID# 25Z9, PCGS# 8413

---

**1906-D Half Eagle, Conditionally Rare MS66**

- 7143 1906-D MS66 PCGS.** The 1906-D half eagle is plentiful in most grades and becomes challenging in MS65. Premium Gems such as the current offering are rare with only 14 examples seen by the two major services. Ebullient luster emanates from peach-gold surfaces that display well-struck devices save for the usual softness on the arrow feathers. Nicely preserved throughout. Population: 6 in 66, 1 finer (11/14). NGC ID# 25ZA, PCGS# 8414

## PROOF LIBERTY HALF EAGLES

**1888 Liberty Half Eagle, PR64 Cameo**  
95 Examples Struck, Few Survive

**7144 1888 PR64 Cameo NGC.** Only 95 proof Liberty half eagles were struck in 1888 and the survival rate for the issue was quite low. Probably no more than 25-30 examples survive today in all grades. This delightful Choice specimen exhibits razor-sharp definition on all design elements and the central devices display a rich coat of mint frost, creating bold cameo contrast with the reflective fields. The bright yellow-gold surfaces show the slight orange-peel effect that is seen on the best proofs of this era, with only minor signs of contact. Eye appeal is outstanding. Census: 5 in 64 Cameo, 5 finer (12/14). NGC ID# 28CS, PCGS# 88483

**1892 Half Eagle, PR61 Cameo**  
Clear Contrast

**7145 1892 PR61 Cameo PCGS.** All 19th century proof gold coinage for quarter eagles and above is rare, and the 1892 half eagle with its starting mintage of 92 proofs is no exception. While this PR61 Cameo example has a number of contact marks accumulated in the fields and a couple of digs to the left of Liberty's profile, the contrast between orange-gold mirror-fields and yellow-frosted devices is clear. Population: 3 in 61, 2 finer (12/14). NGC ID# 28CW, PCGS# 88487

**1893 Half Eagle, PR61**  
Rare 19th Century Proof Striking

**7146 1893 PR61 PCGS. CAC.** The proof 1893 half eagle is a rare issue in all grades. Only 77 pieces were struck, and it is believed as few as 25 to 35 examples are extant. The combined certified populations of PCGS and NGC count 40 coins, a number likely skewed by resubmissions. This example shows a moderate number of small marks, accounting for the grade, but the deeply reflective fields and razor-sharp design elements leave little doubt as to its proof origin. Rich honey-gold patina delivers excellent visual appeal. Population: 1 in 61, 12 finer (11/14). NGC ID# 28CX, PCGS# 8488

**1901 Liberty Half Eagle, PR58**  
Challenging Proof Gold Issue

**7147 1901 PR58 NGC.** A modest mintage of 140 proof Liberty half eagles was achieved in 1901, down from 230 examples struck the previous year. This lightly worn PR58 example exhibits sharply detailed design elements and reflective fields that show some surface wear in exposed areas. Census: 2 in 58, 6 finer (12/14). NGC ID# 28D7, PCGS# 8496

---

**1906 Liberty Half Eagle, PR61**  
**Only 85 Examples Struck**

- 7148 1906 PR61 NGC.** Only 85 proof Liberty half eagles were struck in 1906, making the issue one of the more challenging dates of the 20th century proof gold series. This sharply detailed lemon-yellow specimen exhibits the all-brilliant finish used on proof coins after 1902. The deeply reflective fields show a few minor hairlines that explain the grade. Census: 6 in 61, 20 finer (12/14). NGC ID# 28DC, PCGS# 8501
- 

**INDIAN HALF EAGLES**

- 7149 1908 MS64 NGC.** The pleasing orange-gold surfaces of this impressive Choice example show a few hints of red and amber, with vibrant mint luster on both sides. The design elements are well-detailed and scattered minor contact marks do little to detract from the overall eye appeal. NGC ID# 28DE, PCGS# 8510
- 

**1908 Indian Head Five, Satiny MS64+**

- 7150 1908 MS64+ PCGS.** A well-struck first-year type coin, with satiny green-gold luster and sharp design details. A few minor abrasions are noted in the exposed fields upon close examination, but none are singularly obtrusive. This issue is not nearly as plentiful overall as is the 1909-D, which had a mintage in excess of 3.4 million coins, but in Gem and finer grades, the 1908 is the most plentiful, thanks to many examples being saved as first-year souvenirs. NGC ID# 28DE, PCGS# 8510
- 

---

**1908 Indian Five, MS65**  
**Inaugural Year of Issue**

- 7151 1908 MS65 PCGS.** Bela Lyon Pratt introduced reduced relief on the 1908 Indian quarter and half eagles, the first year of issue for both of these novel designs. This is an Uncirculated Gem example with yellow-gold color that contrasts with deeper shades at the cheekbone. The reverse features more intense yellow toning in the left and lower right fields. PCGS grades 19 pieces at the MS66 level, one at MS66+, and two at MS67 (12/14). NGC ID# 28DE, PCGS# 8510
- 

- 7152 1908-D MS64 NGC.** A few scattered high-point ticks comprise the grade, complementing rich apricot-orange color and flowing luster throughout both sides. The Gem level of this issue is seldom seen; NGC shows only four in MS65 and none finer (12/14). NGC ID# 28DF, PCGS# 8511
- 

**1908-S Half Eagle, MS63**  
**Low-Mintage San Francisco Issue**

- 7153 1908-S MS63 NGC.** Fully lustrous and mostly brilliant, save for some wisps and blushes of olive-gold and lilac. Most design features are sharp, and the S-mintmark is clearly defined. Walter Breen attributes many of the Uncirculated examples of the issue to the Virgil M. Brand estate. Another group of these, presumably from a different source, turned up in 1968. The variety owes its popularity, in some measure, to its mintage of just 82,000 pieces, a figure which is low by 20th century standards.

*Ex: Long Beach Signature (Heritage, 6/2005), lot 7849.*

*From The Free Tilly Collection. NGC ID# 28DG, PCGS# 8512*

---

- 7154 1909 MS64 NGC.** The Indian's cheek shows only a couple of small marks, nothing blatant, and the eagle on the reverse is similarly well-preserved. Excellent wheat-gold color and good luster complete the broad eye appeal. NGC ID# 28DH, PCGS# 8513

- 7155 1909 MS64 PCGS.** One of the more available dates among Indian Head fives, the 1909 nonetheless merits type-coin status, as most examples are well-made and highly lustrous. This reddish-orange piece is Exhibit A, showing full luster and the normal bold impression over surfaces that show only a couple of small field ticks, determining the grade. NGC ID# 28DH, PCGS# 8513

1909-O Five Dollar, AU Details  
Rare New Orleans Issue

**7156 1909-O — Cleaning — Genuine PCGS. AU Details.** This caramel-gold key date half eagle has little if any wear, but the surfaces are evenly and moderately microgranular. The strike shows blending at the bottom of the headdress. The lowest mintage issue of the type, and also the only Indian five issue from the New Orleans facility.

1909-S Half Eagle, MS62  
Rarely Encountered in Finer Grades

**7159 1909-S MS62 NGC. CAC.** This issue experienced moderate circulation, and is decidedly scarce in Mint State. Pieces grading finer than MS62 are especially challenging. This representative is lightly abraded, as evidenced by the grade, but is well-struck, with satiny olive-gold luster over each side. Census: 73 in 62, 17 finer (12/14). NGC ID# 25ZL, PCGS# 8516

1909-S Half Eagle, MS61  
Conditional Rarity in Higher Grades

**7157 1909-S MS61 NGC.** A conditional rarity among the S-mint half eagle series, the 1909-S is available for a price in the lower Mint State grades but notably elusive in Gem condition. This piece shows sun-gold recesses with some hazy smoke-gray on the high points. The average grade of certified pieces is only Choice AU. NGC ID# 25ZL, PCGS# 8516

1909-S Half Eagle, MS62  
Elusive Any Finer

**7158 1909-S MS62 NGC.** Despite the mintage approaching 300,000 pieces the 1909-S half eagle is elusive above MS62. The present offering displays yellow-gold surfaces that possess considerable luster, and the design elements are well-struck except for weakness on the eagle's shoulder. No marks of consequence are evident. Census: 74 in 62, 17 finer (11/14).  
*From The Free Tilly Collection.* NGC ID# 25ZL, PCGS# 8516

1910 Half Eagle, Bright MS65  
Elusive in This Grade

**7160 1910 MS65 NGC.** The 1910 Indian Head half eagle is readily available through the Select level of preservation. Near-Gems become more challenging and higher-grade specimens are elusive. Indeed, NGC and PCGS have certified only 57 Gem examples and three pieces finer. Bright luster emanates from the yellow-gold surfaces of this MS65 offering. The design elements are sharply struck, including the eagle's shoulder feathers. Both sides have been very well cared for, an important feature of this particular coin as most-known specimens of this date are noticeably abraded. Census: 33 in 65, 3 finer (11/14). NGC ID# 28DK, PCGS# 8517

---

**1910-D Half Eagle, MS63  
Scarcer Denver Issue**

- 7161 1910-D MS63 NGC.** The 1910-D, one of only five Denver issues in the Indian half eagle series, is notably scarce in comparison to the demand for it, and is particularly difficult to locate above the MS63 grade level. This Select example is sharply struck, with satiny green-gold luster blanketing each side. Light, scattered marks contribute to the grade, but none are singularly detracting. NGC has seen only 34 numerically finer submissions (12/14). NGC ID# 28DL, PCGS# 8518

---

**1910-D Half Eagle, Bright MS63 Example**

- 7162 1910-D MS63 PCGS.** Bright orange-gold color and good luster enhance the surfaces of this 1910-D half eagle, an issue that is among the most available mintmarked Indian Head fives. The Indian's cheek is nicely free of mentionable contact, but a few ticks appear in the obverse field nearby and scattered on the reverse. NGC ID# 28DL, PCGS# 8518

---

**1910-D Half Eagle, MS63  
Scarce in Higher Grades**

- 7163 1910-D MS63 PCGS. CAC.** The 1910-D Indian half eagle is seldom found without numerous abrasions and scars in the fields, as is evidenced by the rather sparse certified population in grades finer than MS63. This Select example resides in the top part of the more affordable grade range, but is well-struck and satiny, with the grade-limiting abrasions are evenly dispersed so as not to cause significant distraction. NGC ID# 28DL, PCGS# 8518

---

**1910-D Half Eagle, MS64  
Shimmering Luster**

- 7164 1910-D MS64 NGC.** The 1910-D half eagle is one of the more accessible Pratt half eagle issues in MS64 condition outside the usual type issues, though it is still distinctly scarce in that condition. This near-Gem has a mix of yellow-to-orange hues and gently shimmering luster with few significant marks. Census: 30 in 64 (3 in 64+), 4 finer (11/14). NGC ID# 28DL, PCGS# 8518

- 7165 1910-S MS61 NGC.** Deep reddish color and rich luster prevail on each side of this Mint State 1910-S half eagle, one of the condition rarities of the series. The strike is fairly soft on the high points of each side as well as the mintmark, but there are few singular abrasions. NGC ID# 28DM, PCGS# 8519

- 7166 1910-S MS61 NGC.** The pleasing yellow and greenish-gold surfaces of this Mint State example show a scattering of minor contact marks on both sides and ample mint luster throughout. The design elements are sharply rendered and eye appeal is quite strong. NGC ID# 28DM, PCGS# 8519

- 7167 1910-S MS61 NGC.** A well-detailed Mint State example of this popular branch mint issue, with yellow and rose-gold surfaces that display ample mint luster and a scattering of minor contact marks. NGC ID# 28DM, PCGS# 8519

---

**1910-S Half Eagle, Bright MS62**

- 7168 1910-S MS62 NGC.** The 1910-S half eagle is elusive in mint condition and is rare in Select and higher grades. This MS62 example displays bright yellow-gold surfaces and well-defined design elements, including the eagle's shoulder feathers and the mintmark. Some minute marks in the lower-left obverse quadrant determine the grade.  
*From The Free Tilly Collection.* NGC ID# 28DM, PCGS# 8519

- 7169 1911 MS64 PCGS.** This near-Gem 1911 half eagle displays a few scattered ticks on each side, particularly around the border of the neck truncation, and the strike is a tad soft on the headdress feathers and the forward wing feathers on the eagle. This is a typical appearance for this issue, although this piece shows decent luster and attractive orange-gold patina. NGC ID# 28DP, PCGS# 8520

- 7170 1911 MS64 PCGS.** This impressive Choice specimen offers well-preserved orange-gold surfaces and sharply detailed design elements, with vibrant mint luster and outstanding eye appeal. No mentionable distractions are evident. NGC ID# 28DP, PCGS# 8520

**7171 1911 MS64 PCGS.** The Bela Lyon Pratt design for half eagles and quarter eagles is infamous for picking up abrasions, limiting the grade possibilities for Mint State coins. The 1911 half eagle, despite being one of the more available dates for the issue, nonetheless is scarce any finer than this MS64 example. Lemon-yellow, deeper gold-orange, and in-between hues enliven lustrous surfaces that show their share of marks, including one to the left of the portrait's lips, but are nonetheless pleasing. NGC ID# 28DP, PCGS# 8520

**1911 Half Eagle, Gem Mint State  
Extremely Rare Any Finer**

**7172 1911 MS65 PCGS.** From a mintage of 915,000 pieces, the 1911 Indian half eagle is a reasonably available issue, popular with series specialists and type collectors alike. Unfortunately, the 1911 was not well-produced and many examples are seen with soft strikes and lackluster surfaces. Surface marks are also a problem for many specimens. As a result, the 1911 is very scarce in MS65 condition and prohibitively rare in finer grades. This Gem has sharp design elements and vivid greenish-gold surfaces that show highlights of rose. Only a few minor marks are evident and eye appeal is outstanding. Population: 60 in 65 (3 in 65+), 1 finer (12/14). NGC ID# 28DP, PCGS# 8520

**1911 Half Eagle, MS65  
Only Two Coins Numerically Finer**

**7173 1911 MS65 PCGS.** As with most issues in this avidly collected series, the 1911 Indian half eagle becomes conditionally scarce in MS65, and anything finer is almost unknown. This piece is softly frosted in warm straw-gold luster, with sharp motifs and remarkably cleaned fields. With only two numerically finer examples certified by PCGS and NGC combined, it is likely that the certified MS65 population is slightly inflated by resubmissions. Population: 60 in 65 (3 in 65+), 1 finer (11/14). NGC ID# 28DP, PCGS# 8520

**1911-D Half Eagle, AU58  
Challenging in Finer Condition**

**7174 1911-D AU58 PCGS.** This series key date claims a low mintage of just 72,500 coins, and examples become exceedingly elusive in mint condition. This near-Mint representative is mostly deep orange-gold, though the sunken relief elements show somewhat lighter yellow-gold hues. Grade-consistent abrasions are lightly scattered throughout. NGC ID# 28DR, PCGS# 8521

**1911-D Indian Five, AU58  
Appealing Original Patina**

**7175 1911-D AU58 PCGS. CAC.** The 1911-D is a challenging date in all three Indian gold series, and the half eagle of this issue is particularly difficult to locate in Mint State condition. This near-Mint representative is sharply detailed, with remnants of satiny, olive-gold luster remaining on each side. Surface abrasions are largely effaced by the slight high-point friction. NGC ID# 28DR, PCGS# 8521

**1911-D Five Dollar, MS61  
Key Date in the Series**

**7176 1911-D MS61 NGC.** The Denver Mint coined 72,500 half eagles in 1911, as compared to the 55,680 quarter eagles struck at the facility in the same year. Both issues are key dates in their respective series, though the half eagle is rivaled by 1909-O and the 1929. This Uncirculated representative exhibits light-yellow gold color over moderately lustrous surfaces. The motifs are strongly detailed and show just mild blending toward the edges of the headdress. The only noteworthy blemish is a small linear depression on the Indian's cheek. NGC ID# 28DR, PCGS# 8521

**7177 1911-S MS62 NGC.** Orange-gold underlying patina shows an overlay of smoky charcoal-gray, the result of long-term bag storage, on this scarce S-mint five. Scattered marks are distributed throughout each side, including one linear mark on the Indian's cheek. NGC ID# 25ZM, PCGS# 8522

**7178 1911-S MS62 PCGS.** Although somewhat overshadowed by its semikey-date Denver counterpart, the 1911-S half eagle is a challenging issue in its own right, scarcely seen above the MS62 grade level. This piece is deeply satiny with medium green-gold color and a sharp strike. Close examination of the fields with a loupe detects grade-limiting contact, but this poses little distraction to the unaided eye. NGC ID# 25ZM, PCGS# 8522

**7179 1911-S MS62 NGC.** Well-defined and lustrous yellow-orange, though with the usual scattered marks seen on this exposed-field design. NGC has graded 99 coins as MS63 or better (12/14).  
*Ex: New York Signature (Heritage, 6/2005), lot 6541.*  
*From The Free Tilly Collection.* NGC ID# 25ZM, PCGS# 8522

### 1911-S Half Eagle, MS63 Rare Any Finer

**7180 1911-S MS63 PCGS.** More than 1.4 million half eagles were struck at San Francisco in 1911, though most of them perished after the gold recall of the 1930s. This Select survivor has generous apricot-gold luster with peach elements in parts of the fields. PCGS has graded just 31 coins as MS64 or better (12/14). NGC ID# 25ZM, PCGS# 8522

### 1912 Indian Head Five, MS64 Smooth, Well-Preserved Surfaces

**7181 1912 MS64 PCGS.** This 1912 Indian Head half eagle is appropriately well-preserved for the Choice grade level, showing satiny olive-gold luster and sharply struck design elements. No mentionable abrasions are present, giving this piece excellent eye appeal. A small die chip on the upper curve of the 2 in the date resulted in a small cud in this area, of interest to the 20th century variety and mint error enthusiast. PCGS has encapsulated 52 numerically finer representatives (12/14). NGC ID# 28DS, PCGS# 8523

### 1912 Half Eagle, MS64 Solid Type Coin

**7182 1912 MS64 PCGS.** In MS63 and better grades, any Bela Lyon Pratt-designed quarter eagle or half eagle becomes a desired commodity for type collectors. This near-Gem from the higher-mintage 1912 five dollar issue has dusky yet luminous yellow-orange surfaces and solid all-around eye appeal, though the obverse detail is a trifle soft. NGC ID# 28DS, PCGS# 8523

### 1912 Indian Half Eagle, MS64

**7183 1912 MS64 PCGS.** The 1912 Indian half eagle had a high mintage of 790,000 coins, the fifth highest of the series. However, examples are rarely seen in better Mint State grades, and PCGS has only graded 52 submissions finer than this piece (12/14). Both sides have splendid honey-gold color with frosty mint luster and pleasing surfaces for the grade. NGC ID# 28DS, PCGS# 8523

### 1912 Half Eagle, Elusive MS65

**7184 1912 MS65 NGC.** The quarter eagles of 1912 display a plentiful population through MS64. Gems such as the present specimen are highly elusive, however. Wheat-gold color covers lustrous surfaces that reveal just a few minor marks in the raised fields of the reverse. Census: 39 in 65, 3 finer (11/14). NGC ID# 28DS, PCGS# 8523

**1912-S Half Eagle, MS61**  
Above-Average Strike

**7185 1912-S MS61 NGC.** The 1912-S is among the scarcer San Francisco half eagles of this design type. Mint State coins are elusive and concentrated in the MS60 to MS62 range; higher-grade coins are very rare. The semibright surfaces of this MS61 example exhibit well-struck devices, including the peripheries that are often weak on this date. The mintmark, however, appears as a blob, seen on most known specimens.  
*From The Free Tilly Collection. NGC ID# 25ZN, PCGS# 8524*

**7186 1913 MS64 PCGS.** This near-Gem boasts rich, flowing orange-gold luster on each side. A few scattered luster grazes are mostly confined to the upper-right reverse field. An attractive example for the grade. NGC ID# 28DT, PCGS# 8525

**1913-S Five Dollar, MS61**  
Conditionally Challenging S-Mint Issue

**7187 1913-S MS61 NGC.** The 1913-S Indian five dollar had a fairly substantial mintage of 408,000 coins, but Mint State survivors are disproportionately scarce. This piece is lightly abraded, hence the grade, but is nonetheless completely original with deep green-gold color and flecks of deeper russet over each side. The strike is well-executed and there are no individually detracting marks. NGC ID# 25ZP, PCGS# 8526

**1913-S Half Eagle, MS61**  
Above-Average Design Detail

**7188 1913-S MS61 PCGS.** The present MS61 offering exhibits a better strike than typically seen on this issue. Most of the headdress is sharp as are the feathers on the eagle's shoulder. All of the peripheral letters in the obverse and reverse legends, often weak, are strong. The mintmark, however, lacks central definition, as is seen on most known examples. Yellow-gold surfaces reveal a few minute reverse marks.  
*From The Free Tilly Collection. NGC ID# 25ZP, PCGS# 8526*

**1913-S Half Eagle, MS62**  
Considerable Visual Interest

**7189 1913-S MS62 NGC.** The Bela Lyon Pratt design for quarter and half eagles is notoriously difficult to grade and collect due to the uniqueness of the sunken-relief design. At first glance this 1913-S coin appears too good to be an MS62, though close inspection of the reverse shows the shallow marks, including a faint "X" shape just off the eagle's beak. Still a great coin for arm's-length eye appeal. NGC ID# 25ZP, PCGS# 8526

**1914 Half Eagle, MS65**  
Notable High-Grade Rarity

**7190 1914 MS65 PCGS.** Few 20th century issues vex high-grade type collectors so much as the Bela Lyon Pratt-designed quarter eagles and half eagles. Though the sunken-relief effect had novelty going for it, the abrasions the coins readily accumulated render the vast majority of Uncirculated coins below the Gem level. This MS65 half eagle from 1914 has charming yellow-orange luster with scattered coppery elements that are most visible at the margins and next to the central devices. Detail is generally strong with the lowest pendant of the necklace weak but completely outlined. Population: 31 in 65, 1 finer (12/14). NGC ID# 28DU, PCGS# 8527

**1914-S Indian Five, MS62**  
**Elusive in Finer Grades**

- 7191 1914-S MS62 NGC.** The 1914-S Indian Head half eagle is a conditionally challenging date, obtainable in MS62 and lower grades, but scarcely seen finer. This example is well-struck, with original olive-gold coloration. Grade-consistent abrasions are present, but none are individually detracting. NGC has only encapsulated 24 numerically finer coins (12/14). NGC ID# 28DW, PCGS# 8529

**1914-S Five Dollar, MS62**  
**Conditionally Elusive in Mint State**

- 7192 1914-S MS62 PCGS.** Bright yellow-gold in color and attractive for the grade. The surfaces show scattered handling marks, but none are deep or distracting. About as nice as this date is found, with a handful seen finer, and a cluster of mint state examples tied with the present coin. One for the date collector who appreciates a decent strike and good eye appeal. PCGS has seen 54 numerically finer submissions, likely including a number of resubmissions (11/14).  
*Ex: Long Beach Signature (Heritage, 2/2005), lot 8706.*  
*From The Free Tilly Collection.* NGC ID# 28DW, PCGS# 8529

- 7193 1915 MS63 NGC.** Distributed marks on each side include one scrape in the headdress feathers with smaller abrasions on the Indian's cheek and in the obverse field. The upper-right field on the reverse shows a patch of small scrapes. On the positive side, the luster is rich, the wheat-gold color quite attractive, and the strike adequate. NGC ID# 28DX, PCGS# 8530

**1915 Half Eagle, MS64**  
**Seldom Seen Numerically Finer**

- 7194 1915 MS64 PCGS. CAC.** The 1915 half eagle is an available date in the context of the Indian Head series, but it becomes scarce finer than MS64. This CAC-endorsed representative displays strong luster, an appealing characteristic of this well-made issue, beneath a blanket of warm lemon-gold patina. The strike is sharp throughout the headdress feathers and the eagle's wing, and the fields exhibit only minor, grade-consistent flaws. PCGS has seen 48 numerically finer submissions (11/14). NGC ID# 28DX, PCGS# 8530

**1915 Half Eagle, MS64**  
**High-Quality for the Grade**

- 7195 1915 MS64 NGC. CAC.** The 1915 Indian half eagle is collectible in MS64 and lower grades, but finer coins are scarce and proportionately expensive for the casual series collector. This Choice example is remarkably well-preserved for the grade, with only a few minor disruptions in the fields likely accounting for NGC's assessment. The strike is sharp and both sides exhibit warm honey-gold patina. Only 38 coins are numerically finer at NGC (12/14). NGC ID# 28DX, PCGS# 8530

**1915-S Half Eagle, MS61**  
**Challenging in This Grade**

- 7196 1915-S MS61 NGC.** The 1915-S five dollar is a challenging issue through the MS62 level of preservation and is rare any finer. The bright yellow-gold surfaces of this MS61 specimen displays well-struck design features though the eagle's shoulder is a tad soft. A few minute marks on the obverse do not detract.  
*From The Free Tilly Collection.* NGC ID# 25ZR, PCGS# 8531

**1915-S Half Eagle, MS62**  
**An Elusive Issue**

- 7197 1915-S MS62 PCGS.** The 1915-S half eagle is elusive in all grades, especially the better Mint State levels. The lustrous yellow-gold surfaces of this MS62 specimen exhibit well-struck design elements, including the eagle's shoulder feathers. Scattered light marks limit the grade. PCGS and NGC have seen fewer than 80 pieces grading higher (11/14). NGC ID# 25ZR, PCGS# 8531

- 7198 1916-S MS61 NGC.** The orange-gold surfaces of this attractive Mint State example are brightly lustrous and show the minimum number of minor contact marks for the grade. The design elements are sharply detailed and eye appeal is quite strong. NGC ID# 28DY, PCGS# 8532

1916-S Five Dollar, MS62  
Final S-Mint Half Eagle

**7199 1916-S MS62 NGC.** The 1916-S half eagle is popular not only as the final San Francisco issue of this denomination, but also as the only half eagle struck in 1916, making it essential for a complete date set. The present piece is lightly abraded, but with deeply original bronze-gold patina. A few of the lower headdress feathers lack full detail, but the strike is otherwise sharp. NGC ID# 28DY, PCGS# 8532

1916-S Half Eagle, MS63  
Last Half Eagle until 1929

**7200 1916-S MS63 PCGS.** Production of gold coinage halted as the United States entered World War I. Only a few gold commemoratives were issued in 1917, and no gold coins of any type were minted in the U.S. in 1918 or 1919. This Select Mint State 1916-S half eagle exhibits frosty light yellow luster with minimal surface marks on either side. NGC ID# 28DY, PCGS# 8532

EARLY EAGLES

1795 Eagle, BD-1, VF Details

**7201 1795 13 Leaves, BD-1, High R.3 — Repaired — NGC Details.** VF. Ex: Hilt Collection. BD-1 is the most plentiful 1795 Small Eagle ten dollar variety, with 225 to 325 examples believed extant, ideal for type or date purposes. This piece is lightly circulated, with extensive repair work to both sides, possibly in an attempt to eradicate minor surface abrasions. The color is a bright green-gold hue, with a degree of flash observed when tilted beneath a light. From *The Liberty USA Collection*. PCGS# 45710 Base PCGS# 8551

1799 Eagle, AU Details  
BD-10, Large Obverse Stars

**7202 1799 Large Obverse Stars, BD-10, R.3 — Holed and Plugged — PCGS Genuine. AU Details.** This early eagle type coin has essentially full design definition. No plug is readily evident, but the dentils are repaired near 5:30 on the reverse, and the green-gold surfaces are microgranular and hairlined from cleaning. The obverse has a few faded thin marks. PCGS# 45723 Base PCGS# 8562

1801 Ten Dollar, BD-2, Unc Sharpness  
Attractive Coloration

**7203 1801 BD-2, R.2 — Improperly Cleaned — NGC Details.** Unc. Ex: Hilt Collection. Bass-Dannreuther Die State a/a. This is a seldom seen die state without the curious vertical die lines in Liberty's cap. The strike is even and boldly executed, with strong borders and no signs of the usual adjustment marks. NGC draws attention to the presence of some faint, nearly imperceptible hairlines in the fields, though the surfaces retain significant luster beneath rich honey and orange-gold patina. BD-2 is by far the more plentiful of the two 1801 eagle varieties, and is often encountered in type specialists' cabinets. The present coin will serve this purpose well, as it is remarkable appealing for a Details coin. From *The Liberty USA Collection*. PCGS# 45734 Base PCGS# 8564

## LIBERTY EAGLES

### 1839/8 Type of 1838, Large Letters Eagle Well-Struck XF45

- 7204** 1839/8 Type of 1838, Large Letters XF45 PCGS. Distinguished by the sharp bust truncation pointing above star 13. The Type of 1838 is one of two varieties produced in this transitional year, along with the so-called Type of 1840. Bright yellow-gold surfaces display well-struck design elements, although the star centers are characteristically soft. Light distributed marks are consistent with the grade designation. Population: 25 in 45, 49 finer (12/14). NGC ID# 262E, PCGS# 8576

### 1839 Ten Dollar, XF45 Type 1838, Large Letters

- 7205** 1839/8 Type of 1838, Large Letters XF45 PCGS. CAC. The Large Letters Type of 1838, with the more elegant, curved neck truncation and slightly more elaborate hairstyle. All examples of this issue show a faint 1839/8 overdate, with the outer loops of the underlying 8 visible to the right of the primary 9. This example remains well-detailed, despite light wear, with original olive-gold patina that exhibits deeper coppery-orange overtones in the recesses. Population: 25 in 45, 49 finer (12/14). NGC ID# 262E, PCGS# 8576
- 7206** 1839/8 Type of 1838, Large Letters — Damage — PCGS Genuine. AU Details. This is an important two-year type and the only date that is achievable for the average collector. Still a scarce issue with a mintage of 25,801 coins. This example is well-struck, save for the obverse stars, with attractive coloration and moderately abraded surfaces. The damage alluded to by PCGS includes several large rim nicks on the obverse rim. NGC ID# 262E, PCGS# 8576

### 1842 Liberty Eagle, AU55 Low-Mintage Small Date Variety

- 7207** 1842 Small Date AU55 PCGS. CAC. Only 18,623 Liberty eagles were struck with the Small Date dies early in 1842, making the issue much more difficult to locate than its Large Date counterpart. This Choice AU specimen shows just a trace of wear on the well-detailed design elements and the lustrous orange-gold surfaces are lightly abraded. Population: 5 in 55, 7 finer (12/14). NGC ID# 262L, PCGS# 8585

### 1844 Ten Dollar, Well-Defined XF45 Rare in All Grades

- 7208** 1844 XF45 NGC. The 1844 ten dollar had a low mintage of 6,361 pieces and is rare in all grades. The PCGS website estimates only 50 to 75 known examples, and NGC and PCGS combined have certified just 67 specimens, only two in mint condition, an NGC-graded MS61 and MS63. The yellow-gold surfaces of this Choice XF offering display hints of apricot and exhibit well-defined design elements. Numerous minute marks are scattered over both sides, but are well in keeping with a large gold coin that has seen some circulation. Census: 11 in 45, 21 finer (11/14). NGC ID# 262S, PCGS# 8590

1844 Ten Dollar, AU58  
Rare So Fine

**7209** 1844 AU58 NGC. This pre-California Gold Rush issue was struck at a time when it was the highest gold denomination in the land. This near-Mint example has coppery elements in parts of the fields, most visibly the left obverse and right reverse. Just a touch of rub affects the high points. Census: 6 in 58, 2 finer (11/14). NGC ID# 262S, PCGS# 8590

1845-O Ten Dollar, AU50  
Repunched Date

**7210** 1845-O Repunched Date AU50 PCGS. **Variety 1.** Repunching is evident beneath the 8 and the left corner of the 4. A well defined caramel-gold New Orleans eagle. Rotation beneath a light reveals pockets of luster and distributed small to moderate abrasions. A subtle obverse rim ding is at 5 o'clock. Just 47,500 pieces were struck. PCGS# 88593 Base PCGS# 8593

1849-O Ten Dollar, AU58  
Scarce in All Grades  
Ex: S.S. Republic

**7211** 1849-O AU58 NGC. **Variety 2.** Ex: Museum Collection, S.S. Republic. The 1849-O eagle is a scarce issue in all grades, with only 75 to 85 pieces believed extant. Only 23,900 coins were struck and virtually all of these experienced extensive circulation and abuse. Only a handful of low-grade Mint State pieces are known, and this issue is rare even in the AU range. Doug Winter notes that he has not seen an example with clean surfaces, as every known piece is extensively bagmarked or scarred from circulation.

The present coin is pedigreed to the famous S.S. Republic which sank in a hurricane off the coast of Georgia in October 1865, while en route to New Orleans carrying about \$400,000 in coins that was meant to be used as hard currency in the war-ravaged South. The surfaces are lightly abraded, as is expected, but none of the marks are individually bothersome. The central details are sharp, while the stars exhibit the characteristic weakness seen on all examples of this issue. Bright, yellow-gold patina confirms its shipwreck origin. Census: 6 in 58 (1 in 58+), 2 finer (11/14). NGC ID# 2636, PCGS# 8602

**1851-O Eagle, Reflective MS61  
Fantastic Eye Appeal**

**7212 1851-O MS61 PCGS. CAC. Variety 2**, date low, Liberty's upper neck curls complete. The surfaces on this honey-gold Mint State 1851-O eagle are fantastically reflective and prooflike on each side, but a light overlay of small marks dims that reflectivity a bit in the open areas (but not in the protected peripheries) and accounts for the final grade. The eye appeal is nonetheless off the charts, showing an excellent strike and eminent collectibility. The issue is the most readily available O-mint eagle from the 1850s, but Mint State examples remain elusive, and examples with this kind of eye appeal are far scarcer yet. NGC ID# 263B, PCGS# 8607

**7213 1854-S AU53 NGC.** A nominal mintage of 123,826 Liberty eagles was accomplished at the San Francisco Mint in 1854, the first year of operations at the Western facility. This attractive AU53 example shows a trace of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. NGC ID# 263K, PCGS# 8615

**1855-O Ten Dollar, AU53  
Original Color, Pleasing Surfaces**

**7214 1855-O AU53 PCGS.** Only one die marriage is known for the 1855-O, unsurprising given its low mintage of 18,000 pieces. Douglas Winter reported a repunched date variety, but that turned out to be strike doubling. The present example shows no strike doubling and offers original dusky olive-gold toning. Pockets of bright luster outline the stars and fill the legends. No marks are consequential. Population: 7 in 53, 8 finer (12/14). NGC ID# 263M, PCGS# 8617

**7215 1855-S VF20 PCGS.** The '54-S and '56-S are available by the standards of No Motto San Francisco eagles, but the '55-S is a rarity. Only 9,000 pieces were struck, since the facility focused on double eagle production. Well defined for the VF20 grade, and luster remnants emerge from the reverse legends. Housed in an old green label holder.  
*Ex: West Palm Beach Signature (Heritage, 7/2007), lot 2675, which realized \$2,760.*  
*From The Free Tilly Collection.* NGC ID# 263N, PCGS# 8618

**7216 1856 AU58 PCGS. CAC.** A scarcer, low-mintage date infrequently encountered close to Mint State. A fair amount of luster occurs on the peach-gold surfaces. Well impressed and revealing scattered, relatively inoffensive marks. Population: 25 in 58, 19 finer (12/14). NGC ID# 263P, PCGS# 8619

**1856 No Motto Eagle, MS61  
Low Mintage, Green Label Holder**

**7217 1856 MS61 PCGS.** Since double eagles were the preferred gold denomination of bankers and exporters, the 1856 ten dollar mintage was only 60,490 pieces. Most of the several hundred survivors are in circulated grades. The present lemon-gold example features a good strike, and is smooth except for a few abrasions on the upper reverse field. Certified in a green label holder. NGC ID# 263P, PCGS# 8619

---

1858 Ten Dollar, AU50

**7218 1858 AU50 PCGS.** Once the ten dollar gold piece no longer was the largest denomination of U.S. coinage, it fell into neglect. In 1858, for instance, Philadelphia coined only 2,521 business strikes. This is a rare AU survivor with considerable luster remaining in the protected areas and only light wear across surfaces with scattered abrasions. Population: 5 in 50, 13 finer (12/14). NGC ID# 263W, PCGS# 8625

**7219 1858-O XF45 NGC. Variety 1.** This low-mintage New Orleans issue only saw a total production of 20,000 pieces, and examples are typically seen at the current XF or in AU grades, with Mint State pieces being rare. This near-Mint example displays relatively modest wear for the grade, and rich orange-gold coloration that enhances the coin's eye appeal. NGC ID# 263X, PCGS# 8626

---

1858-O Ten Dollar, Near-Mint  
Only 20,000 Pieces Struck

**7220 1858-O AU58 PCGS. Variety 1.** A well defined butter-gold representative with substantial peripheral prooflike luster. Minimally abraded for the No Motto type, although we note a short mark west of the 1 in the date. A better New Orleans issue with a mintage of just 20,000 pieces. By comparison, the 1847-O eagle had a production of 571,500 pieces. Population: 12 in 58, 7 finer (11/14). NGC ID# 263X, PCGS# 8626

---

1861 Ten Dollar, MS62  
Conditionally Rare

**7221 1861 MS62 NGC.** This well-struck Mint State example has fewer abrasions than expected for the grade, with frosty orange-gold luster intermingled with medium green-gold patina. The 1861 eagle had a fairly substantial mintage for the period, exceeding 113,000 coins, but few survive in Mint State grades and most such pieces are in the MS60 and MS61 levels. This date is genuinely rare in MS62 or finer condition. Census: 12 in 62 (1 in 62+), 5 finer (12/14). NGC ID# 2647, PCGS# 8633

---

1862 Liberty Eagle, AU55  
Low-Mintage Philadelphia Issue

**7222 1862 AU55 PCGS.** Only 10,995 Liberty eagles were struck at the Philadelphia Mint in 1862, making the issue elusive in all grades. This Choice AU specimen offers sharply detailed design elements, with just a touch of high-point wear, and lightly abraded orange-gold surfaces with vibrant original mint luster. Population: 16 in 55, 6 finer (12/14). NGC ID# 2649, PCGS# 8635

**7223 1868 AU50 PCGS.** Despite the few points of wear, the golden-yellow surfaces show considerable prooflike reflectivity remaining on each side, a function of the low mintage of 10,630 pieces. A peppering of extensive small- to medium-sized abrasions appears under a loupe, and some of the protected device areas show pretty rose-gold color. NGC ID# 264N, PCGS# 8653

---

1869-S Ten Dollar, AU55  
Elusive in High Grades

**7224 1869-S AU55 NGC.** Like other San Francisco issues from the 1860s, the 1869-S has a tiny mintage. Only 6,430 pieces were coined, and none were set aside by collectors of the day. As a result, just a single 1869-S has been certified as Mint State by NGC and two by PCGS (11/14). The present example shows slight wear on the wingtips, coronet tip, and other high points, but the only relevant mark is a subtle edge nick at 2 o'clock on the reverse. Census: 10 in 55, 6 finer (11/14). Ex: *Summer FUN Signature (Heritage, 6/2008)*, lot 2145. NGC ID# 264S, PCGS# 8656

---

1870-S Ten Dollar, XF40  
Mintage of 8,000 Pieces

**7225 1870-S XF40 PCGS.** One of just 8,000 pieces struck for a postwar San Francisco issue that was little-saved after its release, this XF40 example saw a degree of honest wear but not enough that it was lost to attrition. Yellow-gold interiors give way to margins that have softly struck stars, as usually seen, and patches of coppery-gold and reddish-violet. Population: 9 in 40, 27 finer (12/14). NGC ID# 264V, PCGS# 8659

**1871-CC Eagle, AU53**  
**Challenging Early CC-Mint Issue**

- 7226 1871-CC AU53 NGC.** A very early Carson City issue with a mintage of only 8,085 pieces, the 1871-CC ten remains on most want lists for collectors of the historic Old West facility. PCGS estimates that about 100 survivors are known. Among those, just two are certified as Mint State, the Battle Born PCGS MS62+ example also in the NGC Census as MS62, and the Warren Miller NGC MS60 specimen. The present apricot-gold representative shows bold definition and only light wear. A bagmark above the hairbun provides an identifier. A good value relative to the famous 1870-CC ten, which has roughly half as many survivors but trades at a level approximately five times higher.  
*Ex: Fern E. Wagner Trust (Heritage, 7/2008), lot 2012. NGC ID# 264X, PCGS# 8661*

**1872-S Liberty Eagle, AU58**  
**Only Two Finer Coins at NGC**

- 7227 1872-S AU58 NGC.** Only 17,300 Liberty eagles were struck at the San Francisco Mint in 1872, making the issue scarce-to-rare in all grades today. This attractive near-Mint specimen shows just the slightest trace of wear on the sharply detailed design elements and the lustrous orange-gold surfaces are lightly abraded. Census: 12 in 58, 2 finer (12/14). NGC ID# 2653, PCGS# 8665

**1873-S Eagle, AU55**  
**Conditionally Rare**

- 7228 1873-S AU55 PCGS.** The 1873-S eagle had a mintage of just 12,000 coins, and fewer than 100 examples are believed to survive, only one of which has been certified as Mint State. This Choice AU representative is well-detailed, with bright yellow-gold patina overall and remnants of luster in the border recesses. Population: 3 in 55, 1 finer (12/14). NGC ID# 2656, PCGS# 8668

**1874-CC Ten Dollar, Fine 15**

- 7229 1874-CC Fine 15 PCGS. CAC. Variety 1-A.** An apricot-gold example that is only moderately abraded, given its lengthy service in Old West commerce. Some wing plumage is evident. All Carson City eagles from the 1870s are rare, although the 1874-CC is more accessible than the other CC-mint issues from that decade. A scant 16,767 pieces were issued. Certified in an old green label holder. NGC ID# 2658, PCGS# 8670

**1875-CC Ten Dollar, AU50**  
**Difficult in All Grades**

- 7230 1875-CC AU50 NGC. Variety 1-A**, probably the only dies for the date, although another variety is rumored. Many Carson City issues of the 1870s can claim low mintages, some much smaller than the 1875-CC eagle with its modest production total of 7,715 pieces. However, the date remains one of the least available Carson City tens. Doug Winter estimates a surviving population of just 65-75 examples in all grades, with only 6-7 specimens in AU condition. Only three pieces are known in Mint State, none finer than MS63.

The 1875-CC is notorious for its poor strike, especially on the obverse. The present coin is about average for the date, with weakness on the hair, facial features, and left stars. The reverse displays more detail, but wear shows more on the high points. The surfaces are an attractive medium greenish-gold, and abrasions are minimal for the grade. Census: 8 in 50, 16 finer (10/14).

Ex: *Fort Worth Signature* (Heritage, 3/2010), lot 2453. NGC ID# 265B, PCGS# 8673

- 7231 1879-S MS62 NGC.** A mildly prooflike and clearly original sunrise-gold example. Sharply struck and clean for the grade except for a few inconspicuous rim marks. Collectible this fine, though still challenging. Census: 12 in 62, 4 finer (12/14).

Ex: *Denver Signature* (Heritage, 8/2006), lot 2210.

From *The Free Tilly Collection*. NGC ID# 265R, PCGS# 8686

- 7232 1880-S MS63 NGC. Breen-7000.** Tall S. A Tiny S variety is also known, and shows the mintmark placed much further southeast. Sharply struck and lustrous with moderately marked peach and sea-green surfaces. The 1880-S is the earliest San Francisco issue affordable at the MS63 level. It is nonetheless scarce in the present quality. Census: 47 in 63, 4 finer (12/14). NGC ID# 265V, PCGS# 8690

**1881-O Ten Dollar, AU55**  
**Challenging Postwar New Orleans Issue**

- 7233 1881-O AU55 PCGS. Variety 1.** The 1881-O eagle had a limited mintage of only 8,350 coins, and survivors are scarce in all grades. The typical example grades no finer than the VF to XF range, and this issue is seldom seen in AU. Mint State coins exist, but are rarely available. This Choice AU coin is sharply detailed, with remaining luster beneath the delicate honey-gold surfaces. Population: 12 in 55, 11 finer (12/14). NGC ID# 265Y, PCGS# 8693

- 7234 1881-S MS62 PCGS.** Lovely peach-red toning embraces this lustrous and boldly struck Liberty ten. Small marks are scattered, usual for Uncirculated examples of the issue. Encased in a green label holder.

From *The Millford Collection, Part II*. NGC ID# 265Z, PCGS# 8694

**1883-S Ten Dollar, MS62**  
**Conditionally Elusive**

- 7235 1883-S MS62 PCGS.** The 1883-S eagle is challenging in all grades AU50 and up, but is especially scarce in Mint State. This MS62 coin is sharply defined on the central devices, as well as the border stars, and exhibits frosty honey-gold luster overall. No individually detracting abrasions are present, and we instead note just light chatter in the fields limiting the grade. Population: 17 in 62, 7 finer (12/14). NGC ID# 2669, PCGS# 8702

**Choice Mint State 1887-S Ten**  
**An Important Condition Rarity**

- 7236 1887-S MS64 NGC.** The issue is plentiful in circulated grades but becomes scarce in Mint State. The Smithsonian collection includes an XF example, while Harry Bass owned an MS63 coin. This MS64 representative is a conditional rarity, and only one piece is certified finer by both NGC and PCGS combined (12/14). Pinpoint-sharp design features, orange-gold color, and frosty luster further enhance the desirability of this San Francisco ten. Census: 11 in 64, 1 finer (12/14). NGC ID# 266J, PCGS# 8711

**1888 Ten Dollar, MS63  
Among the Finest Certified**

- 7237 1888 MS63 PCGS.** While European hoards have yielded vast quantities of eagles from other issues, few 1888 coins have surfaced, and the date is very rare in Select condition. In fact, PCGS has graded only nine coins in MS63 (one in MS63+) with none finer, while NGC has also failed to certify any pieces in finer condition (11/14). Peach-gold and lavender combine with frosty mint luster to generate strong eye appeal. This coin is well-struck with softness on the stars and olive leaves, and marks are lightly peppered over each side. NGC ID# 266K, PCGS# 8712

**1889 Ten Dollar, MS61  
Radiant, Fresh Mint Bloom  
Only 4,440 Pieces Struck**

- 7238 1889 MS61 PCGS.** The Philadelphia Mint only produced 4,440 gold eagles in 1889, few of which survive today in any condition. Mint State coins are scarce, and are exceedingly rare if sought above the MS61 grade level. This representative is moderately abraded, as is expected for the grade level, but its Mint State status is undeniable due to vibrant honey-gold mint bloom that illuminates sharp, unworn motifs. If ever a coin graded MS61 could be termed "remarkably attractive," this is it. Population: 27 in 61, 6 finer (11/14). NGC ID# 266N, PCGS# 8715
- 7239 1890-CC AU55 PCGS. Variety 1-A.** A sharply struck and lightly abraded sea-green and pumpkin-gold example. IN GOD WE TRUST is minutely die doubled, as always for this low mintage issue. Significantly scarcer than its 1891-CC successor. NGC ID# 266S, PCGS# 8718
- 7240 1891-CC AU58 PCGS. Variety 1-A.** An attractive peach-gold near-Mint Carson City type coin. Luster fills the borders and bathes the devices. Moderate field marks are noted beneath the hairbun and the right (facing) wing. NGC ID# 266U, PCGS# 8720

**1893-CC Ten Dollar, MS61 Prooflike  
Finest of Four Prooflikes Certified**

- 7241 1893-CC MS61 Prooflike NGC.** In addition to being uncannily underappreciated in all grades, the 1893-CC eagle emerges as a genuinely rare issue at the Mint State level. Only 14,000 pieces were produced and in all grades of Uncirculated only 14 pieces have been certified by NGC (11/14). This elusive Uncirculated example offers distinct reflective qualities over both sides and has no serious abrasions. Only this single Mint State coin has received a Prooflike designation at NGC.  
*Ex: Long Beach Signature (Heritage, 6/2005), lot 7936; FUN Signature (Heritage, 1/2008), lot 4459. PCGS# 78726*
- 7242 1895 MS64 PCGS.** This attractive Liberty eagle exhibits sharply detailed design elements and pleasing orange-gold surfaces that show a few minor contact marks on both sides. Frosty cartwheel mint luster adds to the outstanding eye appeal. PCGS has graded three numerically finer examples (12/14). NGC ID# 2678, PCGS# 8732

**1899 Ten Dollar, MS65  
Rare Any Finer**

**7243 1899 MS65 NGC.** The 1899 ten dollar is readily available through near-Gem but will require more concerted searching to locate a nice MS65; finer pieces are quite rare. Peach-gold surfaces are laced with whispers of tan on the present Gem offering. The design features are sharply impressed throughout. NGC ID# 267J, PCGS# 8742

**1899-S Ten Dollar, Sharp MS64**

**7244 1899-S MS64 PCGS. CAC.** This attractive S-mint ten dollar exhibits vibrant luster emanating from peach-gold surfaces imbued with hints of light tan. A well executed strike leaves virtually complete delineation on the design features. A handful of minute marks precludes full Gem status. Population: 15 in 64 (1 in 64+), 5 finer (12/14).  
*Ex: Summer FUN Signature (Heritage, 7/ 2007), lot 2717; FUN Signature (Heritage, 2008), lot 4471; ANA Signature (Heritage, 7-8/2008), lot 3193. NGC ID# 267L, PCGS# 8744*

**1900 Ten Dollar, MS65  
Bright, Swirling Mint Luster**

**7245 1900 MS65 NGC.** The 1900 Liberty eagle is an available date in lower grades, but examples in MS65 condition are very scarce. This delightful Gem is sharply detailed and lustrous, with an interesting obverse die crack that joins the stars on the right. Census: 64 in 65 (3 in 65+), 4 finer (11/14). NGC ID# 267M, PCGS# 8745

**1901 Ten Dollar, MS65  
Seldom Available in Finer Grades**

**7246 1901 MS65 PCGS. CAC.** The 1901 Liberty eagle is available in the absolute sense, but the certified population declines significantly at the Gem grade level, and finer pieces are scarce. This is a frosty, lustrous example, with sharp design elements and well-preserved fields. Rich apricot-gold color blankets both sides. PCGS has certified 32 numerically finer representatives (12/14). NGC ID# 267P, PCGS# 8747

**1901 Ten Dollar, MS66  
Radiant, Frosty Surfaces**

**7247 1901 MS66 NGC.** Premium Gem examples of this Philadelphia issue are about as nice as is typically available for the date, as anything finer is prohibitively rare and expensive. This representative is vibrantly frosty with rich wheat-gold luster and delicately preserved surfaces. The strike is sharp and the eye appeal is exceptional. Census: 50 in 66 (1 in 66+, 1 in 66 ★), 7 finer (12/14). NGC ID# 267P, PCGS# 8747

**1901-S Ten Dollar, MS65  
Fresh, Vibrant Surfaces**

**7248 1901-S MS65 PCGS.** Like its half eagle counterpart, the 1901-S eagle is readily obtainable and therefore highly popular among type collectors. This piece is radiantly lustrous with fresh honey-gold mint bloom. The strike is bold throughout and only a few insignificant marks in the left obverse field preclude an even finer grade. This issue is collectible in Gem condition, but finer pieces are elusive. NGC ID# 267S, PCGS# 8749

**1901-S Ten Dollar, MS65  
Old Green Label Holder**

- 7249 1901-S MS65 PCGS.** An available date with a mintage of more than 2.8 million coins, ideal for type representation. This Gem example is boldly struck, with frosty green-gold luster that yields the occasional apricot or peach tint. A few tiny ticks on Liberty's cheek are all that preclude an even finer grade. Housed in an old green label holder. NGC ID# 267S, PCGS# 8749

**1903-S Ten Dollar, MS65  
First Generation Holder**

- 7250 1903-S MS65 PCGS. CAC.** A beautiful Gem with pumpkin-gold centers and aquamarine peripheries. Lustrous and precisely struck with exemplary preservation. Housed in a first generation holder. The 1903-S is less conditionally rare than most Liberty ten issues, but the present coin will upgrade even an advanced holding of the series. Population: 61 in 65 (4 in 65+), 21 finer (11/14). From The College Collection. NGC ID# 267X, PCGS# 8754

**1906-S Eagle, MS63  
Scarce This Well-Preserved**

- 7251 1906-S MS63 PCGS.** The 1906-S is a scarce and oft-overlooked issue in Mint State grades. PCGS has certified just 32 pieces in MS63 and nine numerically finer; NGC has seen only six coins in this grade, also with nine numerically finer (12/14). This piece is well-struck and heavily frosted, with vibrant green-gold luster. Light chatter in the fields accounts for the grade, but no singularly obvious abrasions are present. NGC ID# 2687, PCGS# 8762

**1906-S Ten Dollar, Select Mint State  
Rare This Fine**

- 7252 1906-S MS63 PCGS.** The 1906-S eagle is reasonably available in grades through MS62 but becomes rare at the Select level. Though this wheat-gold example has a degree of the usual striking softness and scattered abrasions, the ample luster is key to the eye appeal. Population: 32 in 63, 9 finer (12/14). NGC ID# 2687, PCGS# 8762

**INDIAN EAGLES**

- 7253 1907 No Periods MS62 NGC. CAC.** The "ordinary" first-year ten dollar Saint-Gaudens issue, though the broad apricot-gold luster is anything but. Both sides show surprisingly few marks for the grade. NGC ID# 28GF, PCGS# 8852

**1907 No Periods Ten, MS63  
Collectible No Motto Type Coin**

- 7254 1907 No Periods MS63 NGC.** The available No Periods variety, a favorite No Motto type issue. This affordable example is lightly abraded on the high points, but does not exhibit any individually detracting marks. The strike is well-executed, with the slight weakness on the central obverse due to incomplete engraving of the die more than deficient striking pressure. This problem was remedied on later dies. Satiny yellow-gold luster is uniform over both sides. NGC ID# 28GF, PCGS# 8852

**1907 No Periods Eagle, Sharp MS63**

- 7255 1907 No Periods MS63 PCGS. CAC.** Rich peach-gold coloration is imbued with hints of mint-green. The design elements are sharply struck and both sides yield pleasing luster. This piece has been well cared for, indeed better than the MS63 grade would indicate. The CAC endorsement is very appropriated. NGC ID# 28GF, PCGS# 8852

---

**1907 No Periods Ten, MS64  
Appealing First-Year Type Coin**

**7256 1907 No Periods MS64 NGC.** No significant abrasions are observed on either side of this Choice Mint State No Motto type coin. This No Periods design was the last of three distinct types issued in 1907, each showing a slightly more advanced rendition of the motifs in regards to striking efficiency. The No Periods variant was the one that was employed for all subsequent issues in the Indian ten dollar series. This is a well-struck and satiny, honey-gold representative. NGC ID# 28GF, PCGS# 8852

---

**1907 No Periods Ten Dollar  
Choice No Motto Type Coin**

**7257 1907 No Periods MS64 PCGS.** The 1907 No Periods Indian eagle is by far the most plentiful No Motto issue in Mint State, ideal for type representation. This Choice example exhibits satiny straw-gold luster that reveals only a few minor surface grazes as it cartwheels around each side. The central hair curls are slightly soft, a product of inadequate engraving more than insufficient die pressure, with all other design elements sharply rendered. *From The Free Tilly Collection.* NGC ID# 28GF, PCGS# 8852

---

**1907 No Periods Ten Dollar, MS65  
Remarkably Clean Surfaces**

**7258 1907 No Periods MS65 NGC.** The periods around E PLURIBUS UNUM were removed in 1907 and the branch below the eagle was shaped slightly differently. The peach-gold, lustrous surfaces of this Gem display whispers of sky-blue, most noticeable clinging to the margins on both sides, each of which is remarkably devoid of mentionable marks for an MS65. NGC ID# 28GF, PCGS# 8852

---

**1907 No Periods Eagle, MS65+  
Great-Looking Type Coin**

**7259 1907 No Periods MS65+ PCGS.** The Charles Barber do-over of the Augustus Saint-Gaudens design is today a prominent type coin, as the first of the series to see mass circulation (and mass saving by collectors of the day). This MS65+ example displays the typical appealing characteristics of the issue, luminous luster over orange-gold surfaces, a sharp strike, and a lack of mentionable marks. A great-looking type coin. NGC ID# 28GF, PCGS# 8852

---

**1908 No Motto Ten Dollar, MS62  
Second and Final Year for the Type**

**7260 1908 No Motto MS62 NGC.** The No Motto subtypes for the Saint-Gaudens eagle and double eagle designs lasted only parts of two years before IN GOD WE TRUST, a motto Theodore Roosevelt personally found distasteful, was added to them by force of law. This MS62 piece has strong wheat-gold luster and a clean reverse, though a cut on Liberty's jawline determines the grade. NGC ID# 28GG, PCGS# 8853

---

**1908 Indian Eagle, MS64  
Popular No Motto Design**

**7261 1908 No Motto MS64 PCGS.** The 1908 No Motto Indian eagle is a plentiful issue in the context of the series, but it is always in demand from type collectors because of its short-lived design. This impressive Choice example is well-detailed and lustrous, with well-preserved yellow and orange-gold surfaces. Population: 66 in 64 (1 in 64+), 38 finer (11/14). *From The Free Tilly Collection.* NGC ID# 28GG, PCGS# 8853

---

**1908 No Motto Ten Dollar, Well-Struck MS64**

- 7262 1908 No Motto MS64 PCGS.** This is the last year of the No Motto ten dollar, after which the motto IN GOD WE TRUST was added to the left of the eagle. The 1908 No Motto can be located with patience through MS63. Near-Gems and Gems are scarce and higher-grade coins are rare. Yellow- and orange-gold coloration assumes somewhat darker hues on the reverse of this MS64 example. The design features are well-struck and just a few minor marks preclude Gem classification. Population: 66 in 64 (1 in 64+), 38 finer (10/14). NGC ID# 28GG, PCGS# 8853

---

**1908-D Ten Dollar, MS62  
No Motto Variant**

- 7263 1908-D No Motto MS62 NGC.** Most of the Mint State 1908-D Indian eagles are certified in the MS62 and lower grades, but even these pieces are notably elusive. The present coin exhibits warm honey-gold luster and is well-struck overall. Scattered abrasions account for the grade. Seldom seen numerically finer. NGC ID# 28GH, PCGS# 8854

---

**1908-D Indian Ten, MS62  
Short-Lived No Motto Design**

- 7264 1908-D No Motto MS62 PCGS.** A curious issue, with the D mintmark placed above the left branch tip on the reverse, requiring the viewer to rotate the coin from normal position to achieve its correct orientation. On the With Motto coins, of course, the mintmark was oriented more logically, and moved to the left of the arrow points. This pretty example has delectable, lustrous orange-gold surfaces that possess a few too many contact marks to qualify for the Select level. An underrated issue.  
*From The Free Tilly Collection.* NGC ID# 28GH, PCGS# 8854

---

**1908-D No Motto Ten Dollar, MS62  
Sole Mintmarked Issue of the Subtype**

- 7265 1908-D No Motto MS62 NGC.** The sole mintmarked No Motto ten dollar issue amounted to just 210,000 pieces. This MS62 survivor has generous wheat-gold luster with coppery elements near the rim southwest of Liberty's profile. Solid detail on the eagle's feathers. NGC has graded 85 numerically finer examples (11/14). NGC ID# 28GH, PCGS# 8854

- 7266 1908 Motto MS63 NGC.** The yellow-gold surfaces show good luster beneath a layer of light smoky haze. Some scattered small abrasions are to be expected at this grade level. A single larger mark shows on the eagle's midsection, but good eye appeal is present on this attractive type coin. NGC ID# 28GJ, PCGS# 8859

- 7267 1908 Motto MS63 NGC.** The design elements of this attractive Select specimen are sharply detailed and the lightly marked orange-gold surfaces are lustrous and appealing, with a few highlights of rose and green. NGC ID# 28GJ, PCGS# 8859

- 7268 1908 Motto MS63 PCGS.** A sharply detailed Select specimen, from the first year of the Motto design, this piece offers vivid orange-gold surfaces, with vibrant mint luster and a few minor contact marks on both sides. NGC ID# 28GJ, PCGS# 8859

- 7269 1908 Motto MS63 NGC.** Gleaming luster shines from each side of this Select 1908 With Motto eagle, with the high points of each side showing a couple of larger marks in concert with the grade, but retaining good eye appeal overall. NGC ID# 28GJ, PCGS# 8859

---

**1908 Motto Ten, MS64  
Wheat-Gold Surfaces**

- 7270 1908 Motto MS64 NGC.** The fine-grained surfaces are somewhat mattelike on this wheat-gold With Motto ten, the first year of production for the later subtype. A stray mark or two on each side are in concert with the grade, though none of them are of any consequence. Excellent eye appeal for this type-coin issue. NGC ID# 28GJ, PCGS# 8859

**1908 Motto Ten Dollar, MS64  
First of the Subtype**

- 7271 1908 Motto MS64 NGC.** Despite Theodore Roosevelt's personal objections to the motto IN GOD WE TRUST, he signed the bill that would put it on his "pet" Saint-Gaudens ten and twenty dollar designs. This near-Gem of the first Motto eagle issue has bold yellow-orange luster and decent if not perfect detail on the central design elements.

*From The Free Tilly Collection. NGC ID# 28GJ, PCGS# 8859*

**1908 Motto Ten, MS65  
Uncommonly Smooth Fields**

- 7272 1908 Motto MS65 NGC.** Liberty's eye views an unmarred swath of the obverse field on this 1908 eagle, the first year of the Motto type. Even honey-gold toning blankets both sides, and the reverse surfaces are especially clean for the Gem Uncirculated grade level. The condition scarcity enhances the overall appeal of this early Indian eagle. Census: 65 in 65 (2 in 65+), 39 finer (12/14). NGC ID# 28GJ, PCGS# 8859

- 7273 1908-D Motto MS61 NGC.** The 1908-D With Motto type was produced after its No Motto counterpart of the same date, and had a high mintage of 836,500 pieces. This pleasing example displays clean surfaces and soft luster, with some speckled toning spots and a smattering of tiny abrasions observed on both sides. NGC ID# 28GK, PCGS# 8860

**1908-D With Motto Ten, MS62  
Seldom Found Finer**

- 7274 1908-D Motto MS62 PCGS.** This early With Motto Denver issue is scarce above the MS62 grade level and is genuinely rare finer than MS63. The current offering is a collectible example, showing well-struck design elements and original rose-gold luster. Scattered abrasions limit the grade, but they are uniformly dispersed and of little distraction. NGC ID# 28GK, PCGS# 8860

**1908-D With Motto Ten, MS62  
Visually Pleasing for the Grade**

- 7275 1908-D Motto MS62 NGC.** Mint State examples of this first With Motto ten from the Denver Mint are challenging to locate with decent eye appeal, as most pieces are heavily abraded. This example is certified at the MS62 grade level, but we note an absence of any distracting surface scars and only observe the presence of minor contact on the high points of the design and light disruptions in the fields, none of which are obtrusive. The strike is sharp, and the quality is exceptional for the grade. NGC has seen 63 numerically finer submissions (12/14). NGC ID# 28GK, PCGS# 8860

**1908-D Indian Ten, MS62  
First-Year Motto Type Coin**

- 7276 1908-D Motto MS62 PCGS.** From a substantial mintage of 836,500 pieces, the 1908-D Indian eagle represents the first year of the popular Motto design type. This attractive MS62 specimen offers well-detailed design elements and lustrous orange-gold surfaces that show a minimum number of minor contact marks for the grade. *From The Free Tilly Collection. NGC ID# 28GK, PCGS# 8860*

**1908-D With Motto Ten, Sharp MS62**

- 7277 1908-D Motto MS62 PCGS. CAC.** Both the With Motto and No Motto Denver issues of 1908 are similar in rarity throughout the grade spectrum, being scarce above the MS62 grade level. This example of the later With Motto issue is sharply struck, with satiny rose-gold luster. Grade-consistent abrasions are observed over both sides. NGC ID# 28GK, PCGS# 8860

- 7278 1908-S AU58 PCGS.** The mint facility in San Francisco produced just 59,850 eagles in 1908, making this a more challenging issue in the series in mint condition. This example is close to Mint State, with lovely peach-gold and rose toning and considerable luster. Light high-point friction is evident under close examination. NGC ID# 28GL, PCGS# 8861

**1908-S Indian Ten, MS63**  
**Low-Mintage Early Series Issue**

- 7279 1908-S MS63 PCGS.** From a mintage of 59,850 pieces, the 1908-S is one of the more elusive dates of the Indian Head ten dollar series. This issue is very scarce in all Mint State grades and attractive Select examples, like the present coin, represents good balance of quality and value.

The coin offered here displays well-preserved pinkish-gold surfaces, with the expected number of minor contact marks for the grade. The design elements are well-detailed and vibrant mint luster radiates from both sides. Overall eye appeal is outstanding. Population: 46 in 63 (1 in 63+), 70 finer (11/14).

*Ex: Saint Louis Signature (Heritage, 5/2005), lot 8872.*

*From The Free Tilly Collection. NGC ID# 28GL, PCGS# 8861*

- 7280 1909 MS62 PCGS.** Glowing luster radiates from yellow-gold surfaces that show extensive but mostly small abrasions that together account for the grade. A nice example for the grade of this type-coin issue. NGC ID# 28GM, PCGS# 8862

- 7281 1909 MS62 PCGS.** The lustrous surfaces of this attractive MS62 piece show a scattering of minor contact marks that explain the grade. The design elements are sharply detailed and eye appeal is strong for the grade. NGC ID# 28GM, PCGS# 8862

- 7282 1909 MS62 PCGS.** A pleasing MS62 example of this popular early series issue, with sharply detailed design elements and vibrant mint luster throughout. The colorful orange-gold surfaces show a scattering of grade-consistent minor contact marks. NGC ID# 28GM, PCGS# 8862

**1909 Ten Dollar, Vibrant MS63**

- 7283 1909 MS63 NGC.** Vibrant luster emanates from the yellow-gold surfaces of this Select offering. The design features are sharply impressed and both sides have been nicely cared for. A minute nick on the Indian's nose and a few on the eagle's shoulder barely prevent a finer grade. NGC ID# 28GM, PCGS# 8862

**1909 Indian Ten, MS63**  
**Smooth, Satiny Surfaces**

- 7284 1909 MS63 NGC.** Fewer abrasions are present than are expected for the grade, with satiny yellow-gold luster rolling over sharply impressed design elements on both sides. A number of Mint State 1909 Indian eagle's survive, but these are primarily limited to MS62 and lower grades. Select examples are elusive and finer coins are scarcely encountered. NGC ID# 28GM, PCGS# 8862

**1909 Select Ten Dollar**  
**Lustrous and Well-Struck**

- 7285 1909 MS63 PCGS.** The yellow-gold obverse of this Select eagle cedes to more orange-gold hues on the reverse, and lustrous surfaces exhibit well-struck design elements. A few minute obverse marks prevent a higher grade. The 1909 can be located through MS63 with a degree of searching, but the issue becomes scarce any finer. NGC ID# 28GM, PCGS# 8862

**1909 Ten Dollar, MS63  
Fresh Mint Luster**

**7286 1909 MS63 PCGS.** An available date in MS63 and lower grades, the 1909 Indian eagle becomes scarce in Choice or finer condition. This lustrous, honey-gold Select example is well-struck and is devoid of any major abrasions — only some light contact on the high points of the devices limits the grade. An attractive piece, suitable for type or date representation. NGC ID# 28GM, PCGS# 8862

**1909 Indian Eagle, MS64  
Sharply Detailed, Well-Preserved**

**7287 1909 MS64 PCGS.** The 1909 Indian eagle is one of the more elusive issues from the Philadelphia Mint, with a reported mintage of 184,789 pieces. This impressive Choice example exhibits sharp definition on all design elements and the lustrous orange-gold surfaces show only a few minor contact marks. Population: 87 in 64 (1 in 64+), 29 finer (11/14).  
*From The Free Tilly Collection.* NGC ID# 28GM, PCGS# 8862

**1909-D Ten Dollar, MS62  
Pleasing for the Grade**

**7288 1909-D MS62 NGC.** Noticeably scarcer than its Philadelphia counterpart, the 1909-D Indian eagle becomes challenging above the MS62 grade level, and draws a substantial premium in these grades from competitive series collectors. This slightly more affordable example is well-struck, with satiny wheat-gold luster. A few light, scattered abrasions limit the grade, but none are individually noticeable. NGC ID# 28GN, PCGS# 8863

**1909-D Eagle, MS62  
Better Date in Mint State**

**7289 1909-D MS62 PCGS.** An appealing example for the grade, this MS62 coin shows primarily just light chatter, with no obtrusive abrasions. The strike is sharp, and the medium honey-gold surfaces exhibit strong, satiny luster. This issue is obtainable in MS62 and lower grades, but the certified population declines significantly in finer levels of preservation. This piece represents an ideal opportunity for the budget-minded collector to acquire this slightly better date. NGC ID# 28GN, PCGS# 8863

**1909-D Eagle, MS62  
Better Date with Smooth Surfaces**

**7290 1909-D MS62 PCGS.** Among all eagles struck at Denver, 1909 features the second-lowest mintage. This ten exhibits undisturbed fields that are considerably mark-free for the grade level. The obverse portrait is somewhat soft at the forehead and there is a small depression at the first star. There are scattered ticks within the eagle and the right portions of the reverse. Although luster is not at the Gem level this is a wonderful representative of the type. NGC ID# 28GN, PCGS# 8863

**1909-D Ten Dollar, MS63  
Challenging Any Finer**

**7291 1909-D MS63 PCGS.** The 1909 Denver eagle mintage consisted of 121,540 coins and surviving examples are rare. This issue is known for a lack of design details and luster. A Select example, this coin exhibits attractive intermingled shades of gold and orange. Adding to the appeal, this piece displays minimal abrasions. PCGS has awarded higher numeric grades to only 41 examples (12/14). NGC ID# 28GN, PCGS# 8863

---

**1909-D Indian Eagle, MS63  
Elusive Early Series Issue**

- 7292 1909-D MS63 PCGS.** The '09-D is one of the most elusive dates in the entire Indian eagle series. Rarely is it seen in Mint State condition, and many high grade pieces are now impounded in major collections. This piece shows the typical, pebbly surfaces that are often seen on this issue. Rich yellow-golden color enhances the lustrous appearance. A few marks and abrasions are seen, particularly in the reverse field, these being the grade-limiting factors.  
*Ex: Dallas Signature (Heritage, 7/2006), lot 1523.*  
*From The Free Tilly Collection.* NGC ID# 28GN, PCGS# 8863

---

**1909-S Ten Dollar, MS63  
Smooth, Luminous Surfaces**

- 7293 1909-S MS63 PCGS.** A uniquely attractive representative, this Select 1909-S Indian eagle displays glowing, smooth, satiny surfaces that have an almost matte-like appearance to the unaided eye. No significant abrasions are present, and the design elements are well brought up. The 1909-S is the most elusive of the three ten dollar issues from this year, being scarce in MS63 and finer grades. NGC ID# 28GP, PCGS# 8864

---

**1909-S Indian Eagle, MS63  
Seldom Seen Finer**

- 7294 1909-S MS63 NGC.** From a mintage of 292,350 pieces, the 1909-S Indian eagle is an elusive date in high grade. Most of the Mint State coins we know about today trace their history to a hoard that came on the market in the late 1970s. This well-detailed Select specimen offers lightly marked yellow-gold surfaces with vibrant mint luster. Census: 19 in 63, 69 finer (11/14).  
*From The Free Tilly Collection.* NGC ID# 28GP, PCGS# 8864

- 7295 1910 MS64 NGC.** A pleasing Choice example of this popular date, with lustrous orange-gold surfaces that show few signs of contact and subtle hints of rose. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 28GR, PCGS# 8865

- 7296 1910-D MS64 PCGS.** An appealing example of this common date issue, well-struck with vibrant mint luster and lovely reddish toning over the gold surfaces. Surface marks are minimal, making this piece seem like a high-end coin for the grade. NGC ID# 28GS, PCGS# 8866

- 7297 1910-D MS64 NGC.** Despite its enormous mintage exceeding 2.3 million coins, the certified 1910-D eagles that survive today average only MS61. This near-Gem is extremely attractive, boasting orange-gold color with few mentionable marks and showing a decent strike on surfaces that are somewhat mattelike. Examples in Gem grade are seldom seen. NGC ID# 28GS, PCGS# 8866

- 7298 1910-D MS64 PCGS.** This impressive Choice specimen displays lustrous yellow-gold surfaces, with one small alloy spot in the feathers of the headdress. The design elements are sharply rendered and no mentionable distractions are evident. NGC ID# 28GS, PCGS# 8866

- 7299 1910-D MS64 NGC.** An incredibly attractive example of this well-made issue, one much more elusive at the Gem grade level, where the certified populations are far smaller. This near-Gem 1910-D boasts excellent luster on apricot-gold surfaces that are unperturbed save for the smallest high-point marks. The strike and eye appeal are top-notch. NGC ID# 28GS, PCGS# 8866

- 7300 1910-D MS64 NGC.** Broadly orange-gold surfaces show only a few light grazes across the reverse. An above-average strike for this high-mintage issue teams with frosty luster to create substantial visual appeal. Good for type. NGC ID# 28GS, PCGS# 8866

- 7301 1910-D MS64 PCGS.** Lime-green borders encircle orange-gold centers. Lustrous and well struck with exceptionally clean surfaces, even when assessed by the standards of its designated grade. Housed in a green label holder.  
*Ex: Long Beach Signature (Heritage, 9/2005), lot 4900.*  
*From The Free Tilly Collection.* NGC ID# 28GS, PCGS# 8866

- 7302 1910-D MS64 PCGS.** A Choice branch mint Indian eagle, with sharply detailed design elements and vivid orange-gold surfaces that show a few minor signs of contact. Vibrant mint luster adds to the considerable eye appeal. NGC ID# 28GS, PCGS# 8866

---

**1910-D Ten Dollar, MS65  
Strongly Lustrous**

- 7303 1910-D MS65 NGC.** The 1910-D eagle is a highly common issue evidenced by a certified population of more than 22,000 pieces. Even near-Gems are available with minimal trouble. Gems become more challenging and numerically finer coins are elusive. The yellow-gold surfaces of this MS65 offering are awash in strong luster and exhibit well-struck devices. A few minuscule reverse marks fall within the parameters of the grade. NGC has certified fewer than 50 examples finer (11/14). NGC ID# 28GS, PCGS# 8866

---

### 1910-D Eagle, Appealing MS65

**7304 1910-D MS65 PCGS Secure. CAC.** A particularly well-struck and frosty example, this Gem 1910-D Indian eagle is also devoid of mentionable abrasions and showcases uniform honey-gold coloration. This issue is readily available in grades through MS64, but the certified population declines significantly in MS65, and finer pieces are scarcely seen at auction or on the bourse. PCGS has encapsulated 43 numerically finer representatives, likely including a small number of resubmissions (12/14). NGC ID# 28GS, PCGS# 8866

**7305 1910-S/S AU58 ANACS. Breen-7114.** The mintmark is clearly repunched northwest. Breen called the variety "extremely rare" in his 1988 *Encyclopedia*, although a number of have since turned up. Lustrous, moderately abraded, and conditionally scarce. NGC ID# 268D, PCGS# 8867

**7306 1910-S MS61 PCGS.** One of the conditional rarities in the Indian Head eagle series, the 1910-S is seldom seen in the higher Mint State grades. This piece shows the expected scattered marks on orange-gold surfaces with a bit of smoky haze. Good luster shines from underneath. NGC ID# 268D, PCGS# 8867

**7307 1910-S MS61 PCGS.** The lustrous orange-gold surfaces of this Mint State Indian eagle display the expected number of minor contact marks for the grade and the design elements are crisply detailed throughout. NGC ID# 268D, PCGS# 8867

**7308 1910-S MS61 PCGS.** The radiant cartwheel luster and lovely honey-gold color are both top-notch for the grade, but a few unfortunate scrapes appear, including one largish diagonal one on Liberty's cheek, and scattered other smaller marks appear there as well. The eagle on reverse is relatively well-preserved for the grade. NGC ID# 268D, PCGS# 8867

---

### 1910-S Indian Eagle, MS62 Unusually Appealing for the Grade

**7309 1910-S MS62 PCGS.** A pleasing lower-grade Mint State example of this challenging San Francisco issue. The strike is well-executed and the luster is vibrant in uniform yellow-gold hues. No obtrusive abrasions are present, and only light contact on Liberty's cheek and the eagle's wing appears to limit the numeric grade. This date is marginally available in MS62, but finer pieces are seldom seen. NGC ID# 268D, PCGS# 8867

---

### 1910-S Indian Eagle, MS62 Popular Mintmark Type Coin

**7310 1910-S MS62 PCGS.** The 1910-S Indian eagle claims a substantial mintage of 811,000 pieces, but the issue becomes scarce at the MS62 grade level. This attractive MS62 example offers well-detailed design elements and vibrant mint luster throughout, with lightly abraded yellow-gold surfaces. NGC ID# 268D, PCGS# 8867

---

### 1910-S Ten Dollar, MS62 Lovely Pale Rose Coloration

**7311 1910-S MS62 PCGS. CAC.** A slightly better date in Mint State, the 1910-S is scarcely seen finer than MS62. This example is well-struck, with radiant, satiny luster blanketing both sides in warm honey-red patina. Light chatter over both sides accounts for the grade, but no singularly detracting abrasions are present. NGC ID# 268D, PCGS# 8867

---

### 1910-S Indian Ten, MS63 Conditionally Elusive in Finer Grades

**7312 1910-S MS63 NGC.** The 1910-S Indian eagle is much more difficult to locate in high grade than its mintage of 811,000 pieces would suggest. This attractive Select example offers well-detailed design elements, with the often seen weakness on the first digit of the date. The lustrous yellow and rose-gold surfaces show only minor signs of contact. Census: 24 in 63, 26 finer (11/14). *From The Free Tilly Collection.* NGC ID# 268D, PCGS# 8867

**1910-S Indian Ten, MS63  
Upper-End for the Grade**

**7313 1910-S MS63 PCGS.** The 1910-S eagle is conditionally scarce in MS63, and rare any finer. This example is well-struck and showcases vibrant, honey-gold mint luster. The coin appears at least two grade points finer to the unaided eye, although close study with a loupe reveals faint signs of contact on the high points of the design, limiting PCGS' opinion. Still, one of the finest Select examples we have handled. PCGS has seen 31 numerically finer submissions (12/14). NGC ID# 268D, PCGS# 8867

**7314 1911 MS64 NGC.** The amber-gold surfaces are granular and somewhat mattelike, showing good eye appeal and excellent preservation. Radiant cartwheel luster emanates from each side. A great-looking type coin. NGC ID# 28GT, PCGS# 8868

**7315 1911 MS64 NGC.** Beautiful bicolor patina offers reddish hues on the high points and greenish tints lower down, with rich luster showing throughout both sides. A few stray marks preclude a Gem grade, but this is a coin with much eye appeal. NGC ID# 28GT, PCGS# 8868

**7316 1911 MS64 PCGS.** This impressive Choice example displays vivid orange-gold surfaces, with vibrant mint luster and sharply detailed design elements throughout. The well-preserved surfaces add to the outstanding eye appeal. NGC ID# 28GT, PCGS# 8868

**7317 1911 MS64 PCGS.** Numerous attractive shades of color are present on this eagle, among them orange, green-gold, and peach. A small area of as-made struck-in grease appears on the headdress. The few scattered abrasions are minor. This is a lovely near-Gem example. NGC ID# 28GT, PCGS# 8868

**7318 1911 MS64 PCGS.** An impressive Choice Mint State piece, the 1911 Indian eagle is seldom encountered finer. This splendid specimen has brilliant and frosty orange-gold luster with virtually mark-free surfaces. NGC ID# 28GT, PCGS# 8868

**7319 1911 MS64 NGC.** This attractive Choice 1911 eagle displays well-detailed design elements and lightly marked orange-gold surfaces with highlights of red. Both sides show full, if slightly subdued, mint luster. NGC ID# 28GT, PCGS# 8868

**7320 1911 MS64 PCGS.** Saturated sun-gold luster occupies much of the fields, while parts of the interiors show paler yellow hues. A beautifully detailed near-Gem with eye appeal in spades. *From The Free Tilly Collection.* NGC ID# 28GT, PCGS# 8868

**7321 1911 MS64 NGC. CAC.** An attractive Choice example of this popular Philadelphia Mint issue, with sharply detailed design elements and lustrous yellow-gold surfaces that show highlights of rose and lilac. NGC ID# 28GT, PCGS# 8868

**1911 Ten Dollar, MS65  
An Excellent Type Coin**

**7322 1911 MS65 NGC.** From a mintage of more than 500,000 pieces, the 1911 is one of the most obtainable dates in the Indian eagle series. The lustrous yellow-gold surfaces of this Gem exhibit well-struck design elements and are minimally abraded. An excellent choice for a high-grade type collection. NGC ID# 28GT, PCGS# 8868

**1911 Eagle, MS65  
Smooth, Wheat-Gold Surfaces**

**7323 1911 MS65 NGC.** The lustrous, wheat-gold surfaces of this Indian Head Gem feature sharp definition on Liberty's hair and the eagle's feathers. Each side is smooth, and a loupe reveals just a small graze above Liberty's nose. The issue's 505,500-coin mintage and this example's aforementioned attributes make it an appropriate type candidate. NGC ID# 28GT, PCGS# 8868

**1911 Ten Dollar, Lustrous MS65**

**7324 1911 MS65 NGC.** NGC and PCGS have graded more than 18,000 1911 eagles, making this an available date through the MS65 level of preservation. Orange-gold luster emanates from both sides of the current offering, each of which exhibits well-struck design elements. A small as-made planchet defect is visible on the back of the eagle's head. NGC has certified fewer than 60 examples finer (11/14). NGC ID# 28GT, PCGS# 8868

**1911 Ten Dollar, MS66  
Outstanding Eye Appeal**

**7325 1911 MS66 NGC.** Among all of the Indian eagles struck from 1907 to 1933, the 1911 ranks as one of the most common dates in all grades, including Gem. Even in Premium Gem quality, examples such as the present piece can be found with only a little searching. The availability of the 1911 stems from the repatriation of "a number of small groups of very high quality pieces ... located (in Europe) in the past two decades (Fuljenz, 2010)".

Both sides display a hint of very attractive greenish-gold color and possess a somewhat satiny texture. The design features are well-struck and the surfaces on both sides have been impeccably preserved. Outstanding overall eye appeal. Census: 44 in 66 (2 in 66 ★), 12 finer (11/14).

Ex: *Long Beach Signature* (Heritage, 5/2009), lot 1790. NGC ID# 28GT, PCGS# 8868

**7326 1911-D AU50 NGC.** An attractive AU specimen of this low-mintage branch mint issue, with just a trace of wear on the high points of the design elements and lightly abraded orange-gold surfaces that retain traces of original mint luster. NGC ID# 28GU, PCGS# 8869

**1911-D Eagle, Minimally Marked AU53**

**7327 1911-D AU53 PCGS.** Rich orange- and yellow-gold patination tinted with hints of lavender covers the surfaces of this AU53 ten dollar. Traces of luster reside in the recessed areas and the design features are well-defined, even accounting for high-point wear. A handful of minute marks are fewer than might be expected for a gold coin experiencing some circulation. The 1911-D is a rare issue in mint condition, especially in the better Mint State grades. NGC ID# 28GU, PCGS# 8869

**1911-D Eagle, AU55  
Still-Lustrous, Collectible Example**

**7328 1911-D AU55 NGC.** Underlying honey-gold luster produces a subtle glow on each side of this Choice AU 1911-D ten. Traces of deep olive toning glaze the high points of the design, leaving the recesses with a warm, original patina. This issue had the lowest mintage of the series (30,100 coins), and is a well-known and highly sought-after key date in all grades. NGC ID# 28GU, PCGS# 8869

**1911-D Indian Eagle, Choice AU**

**7329 1911-D AU55 NGC.** A highly regarded semikey, with a scant mintage of only 30,100 coins. This Choice AU example is ideal for the budget-minded series collector, showing strong detail and pleasantly smooth, yellow-gold surfaces. A couple small marks are noted on the eagle's wing, but no obtrusive abrasions are present. NGC ID# 28GU, PCGS# 8869

1911-D Ten Dollar, AU58  
Pleasing Luster Remains

- 7330 1911-D AU58 PCGS.** A long-respected semikey, the 1911-D Indian eagle boasts a scant mintage of only 30,100 coins and is proportionately scarce in high grades. This near-Mint representative retains substantial original mint luster beneath a warm honey-gold patina. The strike is sharp, and only slight friction is evident over the high points of the design. NGC ID# 28GU, PCGS# 8869

1911-D Ten Dollar, AU58  
Mintage 30,100 Pieces

- 7331 1911-D AU58 NGC. CAC.** With a mere 30,100 pieces struck, the 1911-D is among the more famous low-mintage 20th century U.S. gold issues, though circumstances made other dates far rarer in practice. This near-Mint example has just light rub across the high points of the coppery apricot-gold surfaces. NGC ID# 28GU, PCGS# 8869

1911-S Indian Eagle, MS64  
Low-Mintage, Branch Mint Issue

- 7332 1911-S MS64 PCGS.** In the ten dollar Indian series, the 1911-S was once considered on par with the elusive 1911-D. Even after the appearance of a small hoard of 40 to 50 pieces in the late 1970s, high grade examples such as this piece remain elusive, and the average grade encountered is about AU55. This is one of only 27 MS64 pieces so graded by PCGS, with 33 numerically finer (11/14). The granular surfaces show thick mint frost and rich, deep reddish-gold color. A few shallow marks are noted on the primary obverse device, but the reverse is remarkably free from disturbances. Certified in a green-label holder.

*Ex: Long Beach Signature (Heritage, 6/2004), lot 6346; Long Beach Signature (Heritage, 9/2006), lot 3943.*

*From The Free Tilly Collection. NGC ID# 28GV, PCGS# 8870*

- 7333 1912 MS64 PCGS.** The pale yellow-gold brilliance of the obverse yields to a slightly richer sun-gold hue on the reverse. A pleasingly detailed and all-around appealing near-Gem. PCGS has graded just 43 pieces as MS65 or better (12/14).

*From The Free Tilly Collection. NGC ID# 28GW, PCGS# 8871*

**1912 Ten Dollar, MS65  
Lustrous and Well-Struck**

**7334 1912 MS65 NGC.** Gem is the finest grade that one can expect to encounter when searching for a 1912 ten dollar piece, and even this will require patient searching. NGC and PCGS have graded fewer than 30 submissions higher than MS65. Rich peach-gold color drapes over the lustrous surfaces of the present Gem offering and the design elements are well-impressed. A faint scratch is concealed in the lower wing of the eagle. Census: 59 in 65 (1 in 65+), 14 finer (12/14). NGC ID# 28GW, PCGS# 8871

**1912-S Ten Dollar, MS61  
Appealing, Frosty Luster**

**7335 1912-S MS61 PCGS.** A distinctly elusive issue in Mint State, the 1912-S Indian eagle is even challenging in the MS61 to MS62 grade range. This MS61 coin is well-struck, with original green-gold coloration. Light chatter in the fields and on Liberty's cheek accounts for the grade, but no individually obtrusive abrasions are present. NGC ID# 28GX, PCGS# 8872

**1912-S Indian Eagle, MS62  
Colorful Surfaces**

**7336 1912-S MS62 PCGS.** A well-detailed and somewhat satiny MS62 example, with pleasing yellow and orange-gold surfaces. Scattered marks, including some on the face and on the eagle's wing, account for the grade. Housed in a green label holder. Ex: *Dallas Signature (Heritage, 10/2006), lot 3086.* From *The Free Tilly Collection*. NGC ID# 28GX, PCGS# 8872

**1912-S Ten Dollar, MS64+  
Elusive in Mint State, Rare This Nice**

**7337 1912-S MS64+ NGC.** The 1912-S Indian Head eagle is one of the most conditionally challenging dates in the series in Gem condition, and even Choice examples are exceptionally scarce, with the certified population reports no doubt skewed by resubmissions. A modest mintage of 300,000 pieces was struck, many of which experienced light circulation, contributing to the scarcity of high-grade Mint State pieces. This Plus-designated MS64 coin exhibits softly frosted luster over warm honey-gold surfaces, with minimal disruptions in the fields or on Liberty's cheek. Slight striking softness is seen on the central obverse, though the design elements are otherwise well brought up. Census: 39 in 64 (5 in 64+), 11 finer (12/14). NGC ID# 28GX, PCGS# 8872

**7338 1913 MS64 NGC.** Unusually bold sun-yellow luster with hints of orange is key to this near-Gem's eye appeal. A few stray marks determine the grade. Scarce any finer. From *The Free Tilly Collection*. NGC ID# 28GY, PCGS# 8873

**1913-S Ten Dollar, MS61  
A Low-Mintage Issue**

**7339 1913-S MS61 NGC.** The 1913-S is a popular S-mint issue within the Indian Head ten dollar series, owing in part to its mintage of only 66,000 coins, exceptionally low for a 20th century coin. It is very challenging in Mint State. The yellow-gold surfaces of this MS61 example display occasional luster and scattered minute marks. Census: 70 in 61, 48 finer (12/14). NGC ID# 28GZ, PCGS# 8874

**7340 1914 MS63 NGC.** An attractive Select specimen of this popular Indian eagle, with sharply detailed design elements and vivid orange-gold surfaces that radiate vibrant mint luster and show a few minor contact marks on both sides. NGC ID# 28H2, PCGS# 8875

**1914 Indian Eagle, MS64  
Sharply Detailed and Lustrous**

**7341 1914 MS64 PCGS.** From a smallish mintage of 151,000 pieces, this impressive Choice example displays sharply detailed design elements and vibrant mint luster throughout. The pleasing yellow-gold surfaces are lightly marked and eye appeal is strong for the assigned grade. PCGS has graded 45 numerically finer examples (12/14). NGC ID# 28H2, PCGS# 8875

**1914 Indian Ten, MS64  
Conditionally Elusive in Finer Grades**

**7342 1914 MS64 NGC.** An unsung condition rarity among P-mint Indian Eagles, the 1914 is more challenging to locate in the finer Mint State grades than the 1910, 1912, 1913, and 1915. This is a beautiful example with well blended yellow-gold, red, and pink-gold colors. The luster is well above average for the type as well as the issue, but we do note some light granularity. Razor-sharp striking definition characterizes all design elements, and the number of abrasions is minimal for a U.S. eagle at the near-Gem BU level of preservation. NGC has graded 52 numerically finer examples (11/14).  
*From The Free Tilly Collection. NGC ID# 28H2, PCGS# 8875*

**7343 1914-D MS63 PCGS.** Decent luster emanates from green- and orange-gold surfaces that show good eye appeal overall, despite a scattering of light marks and some gray haze on the high points. NGC ID# 28H3, PCGS# 8876

**7344 1914-D MS63 PCGS.** Effusive wheat-gold luster has touches of both straw and yellow. A solidly struck and generally pleasing Select coin with decently detailed devices.  
*From The Free Tilly Collection. NGC ID# 28H3, PCGS# 8876*

**7345 1914-D MS63 NGC.** This attractive Select specimen offers sharply detailed design elements and vibrant mint luster Throughout. The lightly marked yellow-gold surfaces show a scattering of minor contact marks that explain the grade. NGC ID# 28H3, PCGS# 8876

**7346 1914-D MS63 PCGS.** At first glance, this piece looks as though it deserves a higher grade, given the excellent luster, rich honey-gold and green patina, and a bold strike. A loupe, however, reveals a large hit on Liberty's jawline with a couple of smaller ticks nearby, and another small dig shows on the eagle's underside. Still a coin with lots of eye appeal. NGC ID# 28H3, PCGS# 8876

**1914-S Indian Eagle, MS61  
Nice Mint Luster**

**7347 1914-S MS61 NGC.** A nominal mintage of 208,000 Indian eagles was accomplished at the San Francisco Mint in 1914. Most examples seen today are in lower Mint State grades, like the pleasing MS61 specimen in this lot. The design elements are well-detailed and the lightly marked yellow-gold surfaces show the expected number of minor contact marks for the grade.  
*From The Free Tilly Collection. NGC ID# 28H4, PCGS# 8877*

**1915 Indian Eagle, MS64  
Saint-Gaudens' Showpiece**

**7348 1915 MS64 PCGS.** Augustus Saint-Gaudens is most closely associated with the double eagle, but the Indian Head ten is no less a worthy tribute to this gifted sculptor. The obverse displays hints of red throughout. There is an obverse depression at star 3, while the reverse eagle stands out from the smooth surfaces. PCGS counts 12 in MS64+, with 59 coins finer (12/14). NGC ID# 28H5, PCGS# 8878

---

**1915 Ten Dollar, MS65**

**7349 1915 MS65 NGC.** The 1915 eagle is reasonably available in most grades, even lesser Mint State, but it is scarce in MS65 and rare any finer. This Gem has great eye appeal for the issue thanks to above-average detail on Liberty's hair and bold butter-yellow luster showing just a hint of peach-pink. NGC has graded just 28 coins as MS66 or finer (11/14).

*Ex: Dallas Signature (Heritage, 10/2006), lot 3018.*

*From The Free Tilly Collection. NGC ID# 28H5, PCGS# 8878*

---

**1915 Eagle, MS65  
Conditionally Elusive**

**7350 1915 MS65 PCGS.** The 1915 Indian eagle is fairly available, but Gem examples present a challenge for the casual collector. This offering is sharply struck, with softly frosted luster in shades of honey and green-gold. Close examination with a loupe reveals faint grade-consistent disruptions in the cartwheel effect, but no mentionable abrasions are present, and the coin appears almost pristine to the unaided eye. Population: 50 in 65 (1 in 65+), 9 finer (12/14). NGC ID# 28H5, PCGS# 8878

---

---

**1915 Ten Dollar, Gem Mint State  
Rare Any Finer**

**7351 1915 MS65 NGC.** The 1915 ten dollar is readily available in circulated and lesser Mint State grades, though Gems like this are scarce and finer coins distinctly rare. Yellow-orange luster with occasional reddish elements is strong and beautiful. Detail is above-average on Liberty's hair and the eagle's feathers. NGC ID# 28H5, PCGS# 8878

---

**1915 Eagle, Conditionally Scarce MS65**

**7352 1915 MS65 NGC.** The 1915 eagle saw a production of 351,000 pieces. Gem specimens are scarce and the date is rare any finer. Peach-gold coloration bathes both sides of MS65 in this lot. The design elements are sharply struck and the light marks present are far less than what would be expected for the grade designation. NGC ID# 28H5, PCGS# 8878

---

**1915 Ten Dollar, MS65  
An Excellent Type Coin**

**7353 1915 MS65 NGC.** Honey-gold luster cascades over each side of this lovely Gem, and the design features are sharply impressed. A few minute marks concealed within the eagle's feathers do not detract. This is an excellent choice for a high-grade type collection. Census: 98 in 65 (3 in 65+, 1 in 65 ★), 28 finer (11/14). NGC ID# 28H5, PCGS# 8878

---

---

**1915-S Ten Dollar, MS62**  
**Third-Largest Denomination of the Year**

**7354 1915-S MS62 NGC.** For the only time in its history, the 1915-S ten dollar was the third-largest gold denomination struck at San Francisco, as the fifty dollar Panama-Pacific commemoratives joined the double eagle ahead of the eagle on the list. This broadly lustrous MS62 example ranges from pale yellow to rich orange-gold across each side. Census: 49 in 62, 29 finer (11/14).  
*From The Free Tilly Collection. NGC ID# 28H6, PCGS# 8879*

---

**1916-S Indian Eagle, MS63**  
**Underrated Issue**

**7355 1916-S MS63 NGC.** This is an important date in the Indian eagle series, although it is somewhat underrated due to the plentiful nature of the similarly dated double eagle. Although circulated and low-level Mint State examples are not difficult to locate, MS63-grade pieces require patience to find. This brilliant Select specimen has frosty yellow-gold luster with a few fine abrasions that are consistent with the grade. Census: 34 in 63, 31 finer (11/14).  
*Ex: Dallas Signature (Heritage, 12/2006), lot 2490.*  
*From The Free Tilly Collection. NGC ID# 28H7, PCGS# 8880*

---

**1920-S Ten Dollar, AU Details**  
**Third-Rarest Issue in the Series**

**7356 1920-S — Cleaning — PCGS Genuine. AU Details.** The 1920-S Indian ten dollar does not get as much publicity as the 1933, 1930-S, and 1907 Rolled Edge issues, but it ranks every bit as important in terms of overall rarity. In fact, only the 1933 and the 1907 Rolled Edge issues are absolutely rarer. The reason for its low survival rate is largely due to the gold recall order enacted by President Roosevelt in 1933, when large quantities of the date that remained in bank and Treasury vaults were confiscated and melted. PCGS and NGC combined have certified only 111 pieces in all grades, likely including a number of resubmissions (11/14). This piece is lightly cleaned, but retains pleasing, satiny luster and displays medium yellow-gold color. Slight wear is evident over the central high points, though the design elements remain otherwise well-detailed. An important offering of this scarce issue. NGC ID# 28H8, PCGS# 8881

**1930-S Ten Dollar, Unc Sharpness  
Low-Mintage, Heavily Melted Issue**

**7357 1930-S — Repaired — PCGS Genuine. Unc Details.** Gold eagle production was sporadic in the final years of the series, as the denomination was largely unneeded in circulation and most examples remained in bank vaults as backing for paper currency. The Philadelphia Mint struck more than 1 million coins in 1926 — the first issuance of the denomination since 1920 — but then none were coined again until 1930, when the San Francisco Mint struck a small run of 96,000 pieces. Even in the Western regions, this issue did not circulate to any notable extent, as most survivors are in various Uncirculated grades. Much of the mintage remained in Treasury or bank vaults when President Roosevelt, by Executive Order in 1933, prohibited the private ownership of non-numismatic gold coins, and recalled all modern currency issues for melting. As a result, the 1930-S Indian eagle is one of the scarcest dates in the series.

The present example is well-struck, with satiny green-gold luster. The surfaces are largely free of noticeable abrasions, though PCGS notes some minor repair work on Liberty's cheek. A still-pleasing example of this heavily melted key date.

**1932 Indian Ten, MS65  
Ideal for Type**

**7358 1932 MS65 PCGS.** A favorite among type collectors, the 1932 Indian eagle survives in large enough numbers to be easily obtained in most grades. Above the Gem level, however, the inherent high-grade scarcity of this type in general triumphs. The present MS65 coin is sharply struck with characteristically frosty wheat-gold luster. A few faint surface grazes on Liberty's cheek preclude an even finer grade. NGC ID# 28HB, PCGS# 8884

**1932 Ten Dollar, MS65  
Frosty, Uniformly Colored Surfaces**

**7359 1932 MS65 PCGS.** Vibrant mint frost is the hallmark of this Gem 1932 Indian eagle, although sharp design elements and uniformly rich, honey-gold coloration also contribute to the immense eye appeal. A few faint grazes on Liberty's cheek define the grade, but these hardly interrupt the rolling luster. *From The College Collection.* NGC ID# 28HB, PCGS# 8884

**1932 Indian Ten, MS65  
Delicate Multihued Patina**

**7360 1932 MS65 PCGS.** An intensely frosted, Gem type coin, this 1932 Indian eagle is beautifully colored in swirling hues of honey, rose, lilac, and orange-gold. The design elements are boldly brought up and the eye appeal is simply superb. Numerically finer coins are scarce, but visually finer coins are rare. NGC ID# 28HB, PCGS# 8884

**1932 Eagle, MS65  
Exceptional Surfaces**

- 7361 1932 MS65 PCGS. CAC.** Smooth fields highlight this absorbing Indian ten. Orange-gold admits pleasing shades of red within Liberty's visage. There are a few minor abrasions at the first star, and the obverse feathers deftly subsume a hidden mark. The reverse fields easily compete with higher-graded examples. Combined with CAC approval, this example will draw considerable bidder interest. NGC ID# 28HB, PCGS# 8884

**1932 Indian Eagle, MS66  
One Numerically Finer**

- 7364 1932 MS66 PCGS.** Collectible gold, for practical purposes, ends in 1932. 1933 tens are rare, and the twenties have their own story. This smooth-cheeked eagle is one of the finest survivors of the 1932 emission, with clean fields and bold relief. Deep yellow-gold evenly blankets both sides, with lighter shades on Liberty's headband. PCGS counts only 9 examples in MS66+ and a single coin at the MS67 level (12/14). NGC ID# 28HB, PCGS# 8884

**1932 Eagle, A Sharp MS66**

- 7362 1932 MS66 NGC.** Premium Gem is the finest grade that most collectors can hope to acquire when searching for a 1932 ten dollar. Higher-grade examples are excessively rare with fewer than 10 specimens certified by NGC and PCGS. A mixture of peach- and greenish-gold luster cascades over the well-cared for surfaces of this well-struck example. These factors add up to yield great overall eye appeal. NGC ID# 28HB, PCGS# 8884

**1932 Ten Dollar, MS66  
Late-Date Gold Type Coin**

- 7365 1932 MS66 NGC. CAC.** One of the most misguided coinages in U.S. history, the 1932 ten dollar was struck to the tune of more than 4.4 million pieces but ran into the U.S. Presidential election that saw Franklin Delano Roosevelt sweep into office and promptly take the United States off the gold standard. Today the 1932 eagles are available for a price in grades through MS66, though finer pieces are conditionally rare. This coin's pale yellow-gold luster and impressive preservation make it a standout.  
*Ex: Central States Signature (Heritage, 5/2007), lot 3963. NGC ID# 28HB, PCGS# 8884*

**1932 Indian Ten, MS66  
Conditionally Scarce**

- 7363 1932 MS66 NGC.** The 1932 is a frequent choice among type collectors and this attractive coin would make an outstanding representative. Captivating satiny luster shines beneath the pleasing yellow-gold patina. The strike is sharp, and several light grazes do not detract from the excellent eye appeal. NGC counts few coins higher, including 2 in 66+, 4 in 66 ★, and 8 finer (12/14).  
*Ex: Long Beach Signature (Heritage, 9/2009), lot 1717. NGC ID# 28HB, PCGS# 8884*

**LIBERTY DOUBLE EAGLES**

**1850 Double Eagle, XF40  
The First Year of Issue**

- 7366 1850 XF40 PCGS.** Double eagles dated 1850 circulated in the channels of commerce, evidenced by most certified examples falling into the Very Fine to About Uncirculated range. Mint condition coins can be located with patience but are infrequently seen above MS62. The present XF example displays yellow-gold surfaces and appropriately defined devices. The reverse is rotated a few degrees counterclockwise. NGC ID# 268F, PCGS# 8902

**1850 Liberty Double Eagle, AU55**  
**First-Year Type Coin**

- 7367 1850 AU55 NGC.** This first-year of denomination double eagle has significant aesthetic, historic, and numismatic significance. The obverse devices are all fully detailed with full radials on each of the peripheral stars and complete hair curls. The reverse only lacks a bit of definition on the oval of stars for a complete strike on that side. Bright green-gold color with a few small marks over each side, the only one of any significance is a shallow scratch along Liberty's jawline.

Ex: Long Beach Signature (Heritage, 9/2006), lot 4013.

From The Free Tilly Collection. NGC ID# 268F, PCGS# 8902

**1851 Double Eagle, AU58**  
**Popular Type One Issue**

- 7368 1851 AU58 NGC.** Rich greenish-gold coloration with satiny, slightly reflective fields and only minor blemishes. This is a lovely example that will please most any collector. It is an ideal choice for the date collector as well as the double eagle aficionado.

Ex: U.S. Coin Auction (Stack's, 11/94), lot 1598; Long Beach Signature (Heritage, 2/2005), lot 8923.

From The Free Tilly Collection. NGC ID# 268H, PCGS# 8904

**1851-O Double Eagle, AU50**  
**Collectible O-Mint Twenty**

- 7369 1851-O AU50 NGC. Variety 2.** The double eagles struck in New Orleans prior to the opening of the San Francisco Mint are arguably the only pieces of that denomination from that facility that are moderately available for collectors. This 1851-O representative is well-detailed, with luminous apricot-gold patina. The surfaces are delightfully smooth, a characteristic not often seen in AU grades, due to extensive circulation scars.

From The Free Tilly Collection. NGC ID# 268J, PCGS# 8905

- 7370 1852 XF40 NGC.** An appealing Type One representative with rich reddish-gold toning and evenly worn, lightly abraded surfaces. From a high mintage of 2 million coins, and a good choice for the type collector. NGC ID# 268K, PCGS# 8906

**1852 Double Eagle, AU53**  
**Important Gold Rush Issue**

- 7371 1852 AU53 NGC.** The California Gold Rush was in full swing, and large quantities of newly mined gold were shipped to Philadelphia and New Orleans for coinage. At the Pennsylvania Mint, 2,053,026 double eagle were produced. This example retains considerable luster and exhibits a few trivial handling marks on its straw-gold surfaces. NGC ID# 268K, PCGS# 8906

**1852 Twenty Dollar Gold, AU58**  
**Scarce Issue in Higher Grades**

- 7372 1852 AU58 PCGS.** Fully brilliant surfaces. The fields are lustrous as indeed are all the design elements on the reverse. The AU58 grade designation was evidently applied only because of a faint touch of wear on Liberty's cheek. Most design features are sharp save for the highest details of Liberty's hair and the feathers at the tips of the eagle's wings. Attractive for the grade and worthy of a generous bid as such. Population: 96 in 58, 89 finer (11/14).

Ex: Central States Signature (Heritage, 5/2005), lot 8908.

From The Free Tilly Collection. NGC ID# 268K, PCGS# 8906

**1852/1852 Double Eagle, AU55**  
**Cherry-pickers' RPD**

- 7373 1852/1852 FS-301 AU55 NGC.** Remnants of all four undertype digits are visible to the north of the primary digits in the date. Given the 1852 mintage of 2,000,000 pieces, it is likely that less than 10% of the issue is the dramatic repunched date variety. The present apricot-gold example offers ample luster at the borders and across the motifs. The left obverse field is typically abraded and mildly bright. PCGS# 145729 Base PCGS# 8906

1852 Double Eagle, AU55  
FS-301, Boldly Repunched Date

- 7374** 1852/1852 FS-301 AU55 NGC. The date is obviously repunched north. Among the relatively few double eagle varieties presently listed in *Cherrypickers'*. This honey-gold Choice AU twenty offers plentiful pockets of luster and features an even strike. Free from noticeable marks except for a bright line on Liberty's upper neck. PCGS# 145729 Base PCGS# 8906

1852/1852 Double Eagle, MS61  
FS-301, Date Repunched North

- 7375** 1852/1852 FS-301 MS61 NGC. CAC. All four date digits are clearly repunched north. The mintage of the 1852 was 2,000,000 pieces, and given the die life expectancy during the mid-19th century, it follows that only a small percentage of that production could be the repunched date variety. Most 1852 double eagles are in VF to AU grades, but the present coin exhibits good luster and bold definition. The apple-green and apricot-gold surfaces are only lightly abraded for the MS61 level. Even the veteran specialist will look upon this example with favor. NGC FS-301 Census: 2 in 61, none finer (12/14). PCGS# 145729 Base PCGS# 8906

1852-O Twenty Dollar, AU53  
Scarce New Orleans Type Coin

- 7376** 1852-O AU53 PCGS. Variety 1. Five different mints struck Liberty double eagles, and New Orleans is the stopper to a set with one example from each facility. The 1852-O is scarcer than its 1851-O predecessor but nonetheless often selected for Southern type purposes. The present olive-green and peach-gold twenty displays numerous pockets of bright luster. The reverse is only lightly abraded, while the obverse displays several faded thin marks. NGC ID# 268L, PCGS# 8907

1853 Twenty Dollar, AU58  
Frosty Citrine Surfaces

- 7377** 1853 AU58 NGC. This crisply struck representative provides substantial luster, which is absent only on the cheek and open obverse field. Moderate marks are distributed, but none merit singular description. The 1853 is rare and costly in Uncirculated grades, and most collectors select a nice AU example.  
Ex: *Dallas Signature* (Heritage, 10/2008), lot 3007.  
From *The Free Tilly Collection*. NGC ID# 268M, PCGS# 8908

1853 Twenty Dollar, AU58  
Late Die State of Overdate

- 7378** 1853 AU58 NGC. Struck from the same obverse die as the 1853/2 so-called overdate, confirmed by the large die lump beneath the R in LIBERTY. However, the coin is from a later die state with only a trace of recutting evident at the lower right corner of the lower knob of the 3. A caramel-gold and lime-green representative, sharply struck and only minutely granular. Abrasions are confined to a dull mark above the TY in TWENTY. NGC ID# 268M, PCGS# 8908

1853 Liberty Head Twenty, AU58  
Attractive, Natural Surfaces

**7379** 1853 AU58 NGC. Attractive, medium-gold surfaces show much remaining mint luster and a natural patina, suggesting this is an original near-Mint coin that avoided seawater immersion. A few tiny marks are distributed across the surfaces, but less than those that are seen on many lower-grade Mint State coins. Sharp details remain despite brief circulation. NGC ID# 268M, PCGS# 8908

1853 Double Eagle, MS61  
Semireflective Luster

**7380** 1853 MS61 NGC. This sharply struck Philadelphia twenty has unusual luster for the time, semireflective and stark with the slightest apricot tinge against saturated yellow-gold. While a number of light ticks are scattered across the obverse, the reverse is comparatively clean, and the overall eye appeal is better than the MS61 grade might suggest. Census: 27 in 61, 19 finer (11/14). Ex: *New York Signature* (Heritage, 3/2012), lot 4194. NGC ID# 268M, PCGS# 8908

1853-O Double Eagle, AU50  
Scarce New Orleans Issue

**7381** 1853-O AU50 NGC. **Variety 1.** Scarcer than its higher mintage 1851-O and 1853-O predecessors, the 1853-O is nonetheless often selected for type purposes by New Orleans gold collectors. The present straw-gold representative is richly defined and possesses plentiful pockets of radiant luster. Small abrasions are scattered but none merit individual mention. NGC ID# 268N, PCGS# 8910

1853-O Twenty Dollar, AU55  
Elusive New Orleans Issue

**7382** 1853-O AU55 NGC. **Variety 1.** Double eagle production at the New Orleans Mint declined slightly in 1853 to just 71,000 pieces, though it would plummet even further in 1854 when the San Francisco Mint began operations and gold bullion deposits at the Louisiana branch were drastically reduced. Still, the 1853-O experienced moderate circulation in the South and is scarce at the AU levels and prohibitively rare in Mint State. The present coin displays original honey-gold coloration with hints of luster in the protected regions. The strike is bold, with just a brush of wear over the high points of the design. A few light, scattered marks accompany the grade. Census: 50 in 55, 30 finer (11/14). NGC ID# 268N, PCGS# 8910

1854 Small Date Double Eagle  
Choice About Uncirculated Example  
Ex: S.S. Republic

- 7383 1854 Small Date AU55 NGC. Ex: S.S. Republic. Just 42 Philadelphia Mint examples of the date were brought up from the S.S. Republic, part of \$400,000 in double eagles destined for New Orleans that did not arrive. A few light marks dot the surfaces of this recovered coin, which retains much of its original mint luster and bold strike. Some flatness on Liberty's curls determine the assigned grade. This Choice About Uncirculated double eagle remains in its rosewood box of issue, with the Certificate of Authenticity and Odyssey Marine booklet intact. NGC ID# 268P, PCGS# 8911

1854 Twenty Dollar, AU58  
Small Date, Guide Book Variety

- 7384 1854 Small Date AU58 NGC. The Small Date variety is the more available date logotype relative to the Large Date variant also produced in 1854. Still, the issue is scarce in near-Mint condition and decidedly rare any finer. This representative offers light rose-gold surfaces and ample luster. A well-detailed No Motto double eagle, small abrasions are scattered over both sides. NGC has certified only 33 numerically finer submissions (10/14). NGC ID# 268P, PCGS# 8911

1854 Liberty Twenty, MS61  
Popular Small Date Variety

- 7385 1854 Small Date MS61 NGC. The 1854 Liberty double eagle is known in two major varieties, the Small and Large Date types. This attractive Mint State specimen is a representative of the more available Small Date variety, which probably accounted for most of the substantial mintage of 757,899 double eagles struck at the Philadelphia Mint that year. The issue is not difficult to locate in lower circulated grades, but Mint State specimens are rare. The present coin offers sharply detailed design elements and pleasing orange-gold surfaces that show the minimum number of minor contact marks for the grade. Satiny mint luster adds to the considerable eye appeal. Census: 18 in 61, 6 finer (12/14). NGC ID# 268P, PCGS# 8911

1854 Large Date Double Eagle  
AU Sharpness, Scarce Variety

- 7386 1854 Large Date — Cleaning — PCGS Genuine. AU Details. Only a single obverse die was used to coin the scarce Large Date variety, and can be identified by the lump on the base of Liberty's neck above the right side of the 8. The date logotype was also used on at least three different obverse dies of 1854-O eagles. The present double eagle displays partial luster and has minimal wear, but both sides display horizontal hairlines. PCGS# 98911

**1854-S Double Eagle, AU53  
First San Francisco Liberty Twenty**

- 7387 1854-S AU53 NGC.** While the twenty dollar gold piece was authorized in 1849, struck by various private issuers in the same year, and disbursed by federal authorities in 1850, it took until the opening of the San Francisco Mint in 1854 for the first Liberty twenties to be struck in California. This lightly worn first-year piece has considerable luster remaining in light yellow and yellow-orange surfaces with alloy prominent along the margins and at the bridge of Liberty's nose. A coin with individuality and character. From *The Free Tilly Collection*. NGC ID# 268U, PCGS# 8913

**1855 Double Eagle, Well-Struck AU55**

- 7388 1855 AU55 NGC.** Most known 1855 double eagles are in the circulated grades through low-end About Uncirculated. Upper-end AUs are scarce and Mint State examples are rare. This Choice AU offering displays yellow-gold surfaces with luster in the protected areas. The design elements are well-struck. Scattered minute marks are within the parameters of a lightly circulated, large gold coin. NGC ID# 268V, PCGS# 8914

**1855 Double Eagle, AU58  
Only 15 Finer at PCGS**

- 7389 1855 AU58 PCGS.** A condition rarity from a mintage of 364,666 coins, the 1855 is rarely seen in finer grades, with a combined PCGS and NGC population of only 34 Mint State examples. This near-Mint specimen has nearly full luster with scattered surface marks. Excellent eye appeal is present. Population: 27 in 58, 15 finer (11/14). NGC ID# 268V, PCGS# 8914

**1855-S Twenty Dollar, Choice AU  
Scarce Large S Mintmark  
Ex: S.S. Central America**

- 7390 1855-S AU55 PCGS. Variety 14F.** Ex: S.S. Central America. SSCA 6514. Large S. A scarce mintmark size variety. Most '55-S twenties have a Medium S. The present butter-gold double eagle has exceptional luster for its designated grade. The strike is precise, and marks are inconsequential aside from a thin line above the coronet tip and minor abrasions west of the mintmark. A navy-blue Blanchard presentation box and Certificate of Authenticity accompany the lot. NGC ID# 268X, PCGS# 8916

**1855-S Twenty Dollar, Choice AU  
From The S.S. Central America**

- 7391 1855-S AU55 PCGS. Variety 14B.** Ex: S.S. Central America. SSCA 6362. Variety 14B was designated as the "Faint S" by numismatic researcher Robert Evans. The mintmark was evenly but lightly impressed into the working die. Both sides of the present coin are olive-green but the obverse exhibits additional orange toning. Well struck and partly lustrous with lightly marked surfaces aside from a few minor abrasions on the cheekbone. Accompanying the lot is a navy blue Blanchard presentation box and Certificate of Authenticity. NGC ID# 268X, PCGS# 8916

**1855-S Type One Twenty  
Appealing Choice AU Example**

- 7392 1855-S AU55 PCGS. CAC.** The 1855-S is one of the more available Type One twenties, primarily because of the number of examples found on the S.S. Central America and S.S. Republic shipwrecks. This piece does not indicate if it originated from one of those hoards. The surfaces retain good amounts of luster around the devices, and each side has the numerous small to medium-sized marks this issue is known for. The most prominent marks are located in the field below star 13. The color is dusky gold with darker accents over the high points. Well struck. Ex: Long Beach Signature (Heritage, 6/2010), lot 1817. NGC ID# 268X, PCGS# 8916

**1855-S Double Eagle, AU58  
Dual-Error Reverse**

- 7393 1855-S AU58 NGC.** Medium S, as usually seen for this issue of more than 875,000 coins, but the left side of the crossbar in the A of STATES is absent, and the top of the E in AMERICA is broken, not an S.S. *Central America* variety that we know of but an interesting coin in its own right. A peppering of mostly small but extensive abrasions is more prevalent on the obverse. Generous luster remains on the wheat-gold surfaces, in keeping with the near-Mint State grade. The second-year issue from the nascent San Francisco Mint, the 1855-S at the leading services averages no better than AU50. This AU58 NGC example is far nicer than usually seen. From *The Free Tilly Collection*. NGC ID# 268X, PCGS# 8916

**1855-S Double Eagle, AU58  
Luminous Old-Time Patina**

- 7394 1855-S AU58 PCGS. CAC.** Medium S. The 1855-S was made slightly more available in high grades by the discovery of numerous examples on the S.S. *Central America* shipwreck, but it remains scarce in Mint State. This near-Mint example is well-detailed, with warm honey-gold luster remaining in the recesses amid deeper green-gold coloration. An old-time appeal, and a coin that is definitely not from the shipwreck finds. NGC ID# 268X, PCGS# 8916

**1856 Double Eagle, AU53  
Scarce in Finer Grades**

- 7395 1856 AU53 NGC.** This pre-Civil War double eagle issue is scarcer than the NGC *Census Report* might suggest, as the dramatic price jumps within the AU grade range have encouraged resubmissions. This AU53 representative has an antique-gold appearance with light wear across the high points but considerable luster remaining. NGC ID# 268Y, PCGS# 8917

**1856 Twenty Dollar, AU53  
One of the More Difficult Philadelphia Twenties**

- 7396 1856 AU53 NGC.** Traces of luster reside in the recessed areas of this orange-gold AU53 double eagle, and the design features on both sides are well-impressed. Distributed small marks tend to be more prevalent on the obverse. The 1856 is much more difficult to locate than many other Philadelphia double eagles of the 1850s. NGC ID# 268Y, PCGS# 8917

**1856 Double Eagle, AU55  
Rare in Mint Condition**

- 7397 1856 AU55 NGC.** Lightly marked surfaces retain excellent remnants of luster over the rich orange-gold surfaces that show slightly darker hues on the obverse. The design features are sharply struck. AU55 or AU58 are the finest most collectors will encounter as Mint State specimens are rare; the two major services have seen fewer than 50 Uncirculated pieces, mainly MS60 to MS62. Ex: *Central States Signature (Heritage, 4-5/2010)*, lot 3882. NGC ID# 268Y, PCGS# 8917

**1856-S Double Eagle, AU53  
Ex: S.S. *Central America***

- 7398 1856-S AU53 PCGS. Variety 17C.** Ex: S.S. *Central America*. SSAC 5203. A pleasing representative from the famous Gold Rush treasure ship, scarcer as such than the 1857-S. The present apricot-gold example displays substantial cartwheel sheen and is only lightly to moderately abraded. A small strike-through is noted above obverse star 9. A red Blanchard presentation box and Certificate of Authenticity accompany the lot, as initially distributed. NGC ID# 2692, PCGS# 8919

**1856-S Twenty Dollar, AU53  
Variety 17C, Full Serif  
Ex: S.S. Central America**

- 7399 1856-S AU53 PCGS. Variety 17C.** Ex: S.S. Central America. SSCA 6131. The "Full Serif, Bold Left S" variety, a reference to the mintmark placement and the upper left serif of the U in UNITED. The yellow-gold surfaces are lustrous for the AU53 level. Abrasions are minimal aside from a faint but complete circular mark around the portrait. A cherry-red Blanchard presentation box and Certificate of Authenticity accompany the lot. NGC ID# 2692, PCGS# 8919

**1856-S Double Eagle, AU53  
Ex: S.S. Central America**

- 7400 1856-S AU53 PCGS. Variety 17C.** Ex: S.S. Central America. SSCA 6125. A canary-gold example with ample luster, particularly on the reverse. That side is highly pleasing as it shows smooth surfaces and only slight wear on the wingtips. The obverse displays clusters of individually small marks on the cheek and the field near the profile. A cherry-red Blanchard presentation box and Certificate of Authenticity are included. NGC ID# 2692, PCGS# 8919

**1856-S Double Eagle, AU58  
Deeply Reflective Fields**

- 7401 1856-S AU58 PCGS.** This beauty has every outward appearance of a full Mint State example with rich honey-gold and green surfaces, reflective fields, and satiny devices. Only the presences of a small reverse scrape above and through TWEN appears to have prevented a full Mint State grade. Population: 49 in 58, 46 finer (11/14). Ex: Dallas Signature (Heritage, 10/2008), lot 3019. From The Free Tilly Collection. NGC ID# 2692, PCGS# 8919

**1856-S Double Eagle, MS61  
Variety in Color**

- 7402 1856-S MS61 NGC.** For many years Mint State 1856-S twenties were extremely rare, though the salvage of the S.S. Central America made examples more accessible. This MS61 coin has a mix of light gold and deeper orange shadings with a patch of peach behind Liberty's bun and another at the bottom right reverse. Census: 18 in 61, 12 finer (11/14). From The Free Tilly Collection. NGC ID# 2692, PCGS# 8919

**1856-S Double Eagle, Lustrous MS61  
Seldom Seen in Mint Condition**

- 7403 1856-S MS61 NGC.** Although relatively common in lower grades, the 1856-S is a rare and seldom seen issue in mint condition. This piece is sharply struck in most areas, with a few scattered bagmarks on each side that keep it from receiving an even higher numerical grade. Perhaps this coin's most noteworthy attribute is its intense, radiating mint luster over both sides. Census: 23 in 61, 15 finer (11/14). Ex: Central States Signature (Heritage, 4-5/2009), lot 3938. NGC ID# 2692, PCGS# 8919

**1856-S Double Eagle, MS62**  
**Ex: S.S. Central America**

**7404 1856-S Full Serif, Left S, Variety 17-B, MS62 PCGS. CAC.**  
 Ex: S.S. *Central America*, 5756. Many of the high-grade 1856-S double eagles available to collectors trace their origin to the more than 1,000 pieces recovered from the S.S. *Central America* shipwreck. The side-wheel steamer sank in a hurricane off the coast of the Carolinas in September 1857, taking with it some 425 people and about 30,000 pounds of gold coins and bullion. These coins are known today for their incredible eye appeal and superb preservation, and the present example is no exception. Frosty orange-gold luster illuminates razor-sharp design elements, while the surfaces are free of any obtrusive abrasions, exhibiting only light, scattered grazes. PCGS# 70011

**7405 1857 XF45 NGC.** A pleasing Choice XF Liberty double eagle with lightly abraded yellow and rose-gold surfaces that retain much of their original mint luster. The design elements are well-detailed, with some light, even wear. NGC ID# 2693, PCGS# 8920

**1857 Double Eagle, Choice AU**  
**Scarce in Finer Grades**

**7406 1857 AU55 NGC.** Unlike the 1857-S twenty, the Philadelphia version is genuinely challenging at the Choice AU level, much less Mint State. This apricot-gold piece has considerable luster remaining, particularly in the protected areas of the margins, and just a touch of wear along the high points.  
 Ex: *Central States Signature* (Heritage, 4/2011), lot 6793. NGC ID# 2693, PCGS# 8920

**1857 Double Eagle, AU58**  
**Challenging This Fine**

**7407 1857 AU58 NGC.** Unlike their San Francisco counterparts, which have considerable availability in Mint State thanks to the S.S. *Central America* recovery, the 1857 Philadelphia twenties are scarce in both near-Mint and Mint State as a whole. This AU58 example has dusky yellow-orange surfaces with subtle but appealing luster. NGC ID# 2693, PCGS# 8920

**1857 Twenty Dollar, AU58**  
**Elusive in Mint State**

**7408 1857 AU58 NGC.** Most of the sunken treasure that has been recovered over the past two decades included primarily S-Mint coins, while the Philadelphia issues remain scarce. Only 40 finer examples of this issue have been certified by NGC (12/14), and only 61 finer submissions reside in PCGS holders. This example has excellent honey-gold color with considerable luster broken only on the high points. Scattered marks are typical of these large gold coins. NGC ID# 2693, PCGS# 8920

**1857 Double Eagle, MS60  
Rare Mint State Survivor**

- 7409 1857 MS60 PCGS.** Unlike the 1857-S double eagles, famously available in Mint State after the S.S. *Central America* discoveries, their Philadelphia counterparts are scarce in any unworn grade. While this piece comes by its MS60 designation honestly, its unworn yellow-to-orange surfaces retain beautiful, and most importantly *intact* luster. Population: 9 in 60, 51 finer (11/14). NGC ID# 2693, PCGS# 8920

**1857-O Double Eagle, AU50  
Elusive New Orleans Twenty**

- 7410 1857-O AU50 PCGS. Variety 1.** The New Orleans Mint struck only 30,000 double eagles in 1857, most of which experienced extensive circulation in the South. The typical survivor can be expected to grade in the VF to XF range, and AU pieces are challenging to locate; Mint State coins are prohibitively rare and comparably expensive for the average collector. This AU representative displays strong detail and medium green-gold patina, with remnants of semiprooflike mirroring seen in the protected regions. A small scrape on Liberty's nose is the only mark of note, though it is not immediately apparent. Population: 24 in 50, 29 finer (11/14). NGC ID# 2694, PCGS# 8921

- 7411 1857-S XF40 PCGS.** An orange-gold example that appears to have AU sharpness and luster extent, although it displays distributed small to moderate marks. The present coin cannot be from the S.S. *Central America* or the S.S. *Republic*, since its old green label holder precedes the distribution from those two shipwrecks. *From The Free Tilly Collection.* NGC ID# 2696, PCGS# 8922

- 7412 1857-S XF45 NGC.** This Choice XF honey-gold 1857-S twenty does not appear to be an S.S. *Central America* recovery coin, as it lacks the characteristic look of those pieces. Scattered abrasions include some on the large size, with extensive smaller ticks. Some luster remains despite 15 points of wear. NGC ID# 2696, PCGS# 8922

- 7413 1857-S AU50 NGC.** Given the rather extensive peppering of light circulation marks and the consistent, somewhat semiprooflike orange-gold surface finish, this 1857-S twenty appears not to be one of the many recovered from (and continuing to be recovered from, apparently) the S.S. *Central America* — and it is rare as such. A few larger marks are scattered about, but this is an attractive coin for the grade. NGC ID# 2696, PCGS# 8922

**1857-S Double Eagle, AU58**

- 7414 1857-S AU58 NGC.** Although bright luster illuminates design recesses, this Type One double eagle did not originate from the S.S. *Central America* shipwreck. That is because the mintmark is tilted left and centered over the right half of the N in TWENTY, a placement different from any of the eight die varieties known from the S.S.C.A. holdings. In addition, the E in AMERICA has a defective upper crossbar, and the U in UNITED lacks an upper left serif. An original pumpkin-gold example with a sharp strike and distributed small to moderate marks. NGC ID# 2696, PCGS# 8922

**1857-S Twenty Dollar, MS61  
Likely Ex-S.S. *Central America***

- 7415 1857-S MS61 PCGS. Variety 20B.** The Bold S variety, as named by Robert Evans in his research of the S.S. *Central America* bounty. The present coin is more likely than not from that shipwreck, although 1857-S double eagles were also recovered from the *Brother Jonathan* and the S.S. *Republic*, and some Uncirculated examples never went down with the ship. No pedigree is designated on the insert. Crisply struck and satiny with minimally marked honey-gold surfaces and only a whisper of granularity. NGC ID# 2696, PCGS# 8922

**1857-S Double Eagle, MS61  
Narrow Serif Variety  
Ex: S.S. *Central America***

- 7416 1857-S MS61 PCGS. Variety 20C.** Ex: S.S. *Central America*. SSCA 3942. The "Narrow Serif" reverse, a reference to the defective left serif of the U in UNITED. This butter-gold example has booming luster and a needle-sharp strike. Wispy marks on the upper left obverse field correspond to the grade. The reverse is smooth, and on its own merits would command a higher grade. Housed in a gold label holder. NGC ID# 2696, PCGS# 8922

---

1857-S Double Eagle, MS61

- 7417** 1857-S MS61 PCGS. The low, right placement of the mintmark, relative to the N in TWENTY, makes it unlikely that the present coin came from the S.S. *Central America*, although it may have come from a different shipwreck of the era. This lustrous honey-gold representative has a precise strike and a relatively smooth obverse. The reverse field exhibits several clusters of singularly minor marks. NGC ID# 2696, PCGS# 8922

---

1857-S Double Eagle, MS63  
From The S.S. *Central America*

- 7418** 1857-S MS63 PCGS. **Variety 20A.** Ex: S.S. *Central America*. SSCA 1571. The familiar "Spiked Shield" variety with a pair of die lines at the left shield border. The present apricot-gold double eagle is outstanding for its designated grade from the technical perspective, since the lustrous surfaces are well preserved, particularly the reverse. A parallelogram-shaped strike-through (as issued) beneath star 9, unusual for the denomination, is all that limits the market grade. Housed in a gold label holder.

---

1857-S S.S. *Central America* Twenty, MS63  
**Variety 20C, Narrow Serif**

- 7419** 1857-S MS63 PCGS. **Variety 20C.** Ex: S.S. *Central America*. SSCA 0132. Narrow Serif. Housed in the original green box packaging with the "Ship of Gold" faux book and Certificate of Authenticity, this Select Uncirculated double eagle is one of more than 5,400 recovered examples of the issue (although more treasure from the famous shipwreck is being found to this day). The coin displays radiant orange-gold color and brilliant luster. A few light handling marks account for the assigned grade, although the evidence of seawater effect is minimal and the eye appeal is exceptional. Certified in its original PCGS gold label holder. *From The Free Tilly Collection.* NGC ID# 2696, PCGS# 8922

---

1857-S Double Eagle, MS63  
Lustrous and Attractive  
From The S.S. *Central America*

- 7420** 1857-S MS63 PCGS. **Variety 20C.** Ex: S.S. *Central America*. SSCA 2529. This lemon-gold representative displays sweeping luster and has a smooth reverse. Obverse marks are also minor for the grade aside from a few ticks on Liberty's cheek and chin. A quarter-century after the S.S. *Central America* was successfully excavated, a different outfit, Odyssey Marine Exploration, has resumed recovery from the famous "Ship of Gold." An olive-green Blanchard presentation box and Certificate of Authenticity are included with the lot. NGC ID# 2696, PCGS# 8922

---

1857-S Double Eagle, MS63  
Ex: S.S. *Central America*

- 7421** 1857-S MS63 PCGS. **Variety 20C.** Ex: S.S. *Central America*. SSCA 3933. A lovely pumpkin-gold Select double eagle that boasts vibrant luster and a crisp strike. The first S in STATES and the left obverse field exhibit moderate marks, but the remainder of the coin is well preserved. Accompanying the lot is an olive-green Blanchard presentation box with Certificate of Authenticity. NGC ID# 2696, PCGS# 8922

1857-S Double Eagle, MS64  
Likely Ex-S.S. *Central America*

7422 1857-S MS64 NGC. Variety 20A. The "Spiked Shield" variety with a pair of die lines near the shield's left border. The variety and preservation make it a virtual certainty that the present coin was recovered from the S.S. *Central America*, although no specific pedigree accompanies the lot. Lustrous and remarkably unabraded with a crisp strike and a single small subdued area on the cheek. NGC ID# 2696, PCGS# 8922

1857-S Twenty Dollar, MS64  
Spiked Shield Reverse  
Exceptional Eye Appeal

7423 1857-S MS64 NGC. CAC. Variety 20A. The "Spiked Shield" reverse with a pair of die lines near the left shield border. Because of its die variety and high grade, it is a virtual certainty that the present near-Gem is from the S.S. *Central America* shipwreck, although the NGC insert omits any such pedigree. A beautiful and lustrous near-Gem, smooth aside from a reed impression at 5:30 on the reverse. The butter-gold surfaces are free from any indication of granularity, although a pair of small planchet flaws are noted on the reverse border at 1 and 8 o'clock. NGC ID# 2696, PCGS# 8922

1857-S Twenty Dollar, MS65  
Ex: S.S. *Central America*  
Gorgeous Gem 'Bold S'

7424 1857-S MS65 PCGS. Variety 20B. Ex: S.S. *Central America*. SSCA 4841. The Bold S variety, among the more prevalent die marriages located in high grade from the antebellum maritime disaster, although less often encountered than the Spiked Shield Variety 20A. Likely, both varieties constituted much of the most recent San Francisco Mint delivery preceding the August 20, 1857 departure of the S.S. *Sonora*, which made the California-to-Panama leg of the ill-fated S.S. *Central America* voyage. The present example is a gorgeous pumpkin-gold Gem with hints of deeper orange shades near the rims. Fully struck and highly lustrous with exceptionally unmarked surfaces. No hint of granularity is apparent, even when inspected beneath a loupe. Certified in a gold label holder. NGC ID# 2696, PCGS# 8922

**1857-S ‘Spiked Shield’ Twenty, MS65  
S.S. Central America Recovery Coin**

- 7425 1857-S MS65 PCGS. Variety 20A.** Ex: S.S. Central America. SSCA 4809. The “Spiked Shield” reverse, so called for two die lines intersecting the lower-left shield border, is the most frequently seen among various interesting die marriages recovered from the doomed shipwreck. Gems of this issue are, accordingly, doubly popular as the “type issue” for the 1857-S pieces. The second wave of coin/ingot recovery, now under way in the Atlantic Ocean, may spur further interest in these treasure coins from a new generation of collectors. Delightfully deep, rich orange-gold color in the centers cedes to lighter yellow-gold around the rims, the whole accompanied by brilliant luster. NGC ID# 2696, PCGS# 8922

**1858 Double Eagle, Solidly Struck AU58**

- 7426 1858 AU58 NGC.** Near-Mint State is the highest grade that most collectors will locate when searching for an 1858 double eagle, and even it will require patient searching. Generous luster remains on the yellow-gold surfaces of the present example and a solid strike imparts sharp definition to the design elements. Both sides reveal the expected distributed light marks. NGC ID# 2697, PCGS# 8923

**1858-O Twenty Dollar, AU Details**

- 7427 1858-O — Cleaning — PCGS Genuine. AU Details. Variety 3.** The rare 1858-O has a mintage of just 35,250 pieces, and survivors are insufficient in quantity to meet the demand from New Orleans Mint specialists. This is a well defined example with many pockets of bright luster, especially on the reverse. The fields are slightly dull from cleaning, and Liberty’s cheek and chin are microgranular.

**1858-S Twenty Dollar, AU58  
Few Numerically Finer Pieces Known**

- 7428 1858-S AU58 NGC.** While reasonably obtainable in lower grades, the 1858-S is scarce in the upper reaches of AU, and it is a rarity in Mint condition. This is an attractive coin that has semi-reflective fields and even reddish patina over each side. Sharply struck, only a few small abrasions are scattered over obverse and reverse. NGC has seen 18 numerically finer representatives (11/14).  
Ex: Long Beach Signature (Heritage, 5/2007), lot 2552.  
From The Free Tilly Collection. NGC ID# 2699, PCGS# 8925

**1859-S Double Eagle, AU55  
Rare in Mint State**

- 7429 1859-S AU55 NGC.** The 1859-S twenty, with a business strike mintage of more than 600,000 pieces, is typically found in XF and AU. The 1859-S is very rare in Mint State and virtually unobtainable above MS62. This Choice AU coin displays traces of luster in the recesses of the reddish-gold surfaces. Its design features are well brought up, though portions of Liberty’s hair are soft. A few of the expected bag marks are visible, especially on the obverse.  
Ex: Dallas Signature (Heritage, 11/2007), lot 1947; Summer FUN Signature (Heritage, 7/2009), lot 1978. NGC ID# 269C, PCGS# 8928

**1859-S Twenty Dollar, AU55**  
Rare in Mint State

**7430 1859-S AU55 NGC.** San Francisco double eagles dated 1859 can be located in Very Fine to About Uncirculated grades. Mint State examples are rare and essentially found no better than MS62. This AU55 coin displays yellow-gold surfaces imbued with traces of greenish-tan. Well-struck and only lightly abraded. NGC ID# 269C, PCGS# 8928

**1859-S Twenty Dollar, AU58**  
Seldom Seen This Fine

**7431 1859-S AU58 NGC.** Another high-mintage issue (more than 636,000 pieces) that circulated extensively, the 1859-S double eagle is scarce in the upper AU grades, and Mint State coins are rare. This attractive near-Mint example displays lovely wheat-gold luster with hints of rose in the central regions. The strike is sharp and the surfaces are remarkably smooth. Only 20 coins are numerically finer at NGC (11/14).  
*From The Free Tilly Collection. NGC ID# 269C, PCGS# 8928*

**1860 Twenty Dollar, AU58**  
Significant Mint Luster Remains

**7432 1860 AU58 PCGS.** The 1860 Liberty double eagle is almost never the center of attention in discussions of rare issues, but the date is surprisingly scarce in the upper AU grades, and Mint State coins are particularly difficult to locate. This nearly Uncirculated representative is remarkably well-detailed and lustrous for the grade, with bright yellow-gold patina and distinctive radiance. Moderate chatter over the high points of the design and in the open fields seems to account for the grade, though actual wear is difficult to detect. PCGS has encapsulated 57 numerically finer examples (12/14). NGC ID# 269D, PCGS# 8929

**1860 Twenty Dollar, AU58**  
Well-Struck With Abundant Luster

**7433 1860 AU58 NGC.** The orange-gold surfaces of this near-Mint twenty dollar display abundant luster and the design elements are well-struck, though Liberty's hair shows a degree of softness. Mint State examples are available with patient searching.  
*Ex: Central States Signature (Heritage, 4/2008), lot 3748. NGC ID# 269D, PCGS# 8929*

**1860 Double Eagle, AU58**  
Scarce in Finer Grades

**7434 1860 AU58 NGC.** Nearly full luster appears on both sides of this attractive and slightly scarce Liberty double eagle. The surfaces exhibit scattered marks that are typical for the issue, although none are singularly evident. The reverse is especially free of distractions. NGC has only certified 53 Mint State examples of this issue (12/14). NGC ID# 269D, PCGS# 8929

**1860 Double Eagle, MS61**  
Seemingly Underappreciated in Mint State

**7435 1860 MS61 PCGS.** Mint State examples of this Type One Philadelphia issue are significantly more elusive than is generally realized by non-specialists. This MS61 coin is lightly abraded on the cheek, accounting for the grade, but is otherwise remarkably attractive, with frosty honey-gold luster and sharp design elements. Population: 22 in 61, 21 finer (12/14). NGC ID# 269D, PCGS# 8929

**1860-S Double Eagle, AU55**  
**Surprising Luster for the Grade**

- 7436 1860-S AU55 PCGS.** This Choice AU 1860-S double eagle is a tad finer than most certified survivors, which usually fall between XF45 and AU50. The wheat-gold surfaces beam with intense luster, despite a loupe's revealing a peppering of light marks along with a couple of larger scrapes. A small planchet indent near the coronet top is likely as made. NGC ID# 269F, PCGS# 8931

**1860-S Liberty Twenty, AU58**  
**Better San Francisco Issue**

- 7437 1860-S AU58 NGC.** The 1860-S double eagle is moderately challenging in AU grades, and Mint State coins are decidedly rare. This nearly Uncirculated example is sharply detailed, with substantial honey-gold luster residing in the recesses on each side. The surfaces are pleasantly smooth, devoid of the heavy chatter that is typical for this grade. NGC has certified only 25 numerically finer representatives (12/14). NGC ID# 269F, PCGS# 8931

**1860-S Double Eagle, AU58**  
**Substantial Remaining Mint Bloom**

- 7438 1860-S AU58 NGC.** The 1860-S double eagles were struck for the sole purpose of serving the growing needs of commerce through widespread circulation. Most examples known today are in the VF to XF grade range. With fewer than 60 Uncirculated examples believed extant, including a handful salvaged from at least two shipwrecks, a near-Mint 1860-S twenty is a completely acceptable conciliation for most collectors. This is a sharply defined example that retains almost complete mint luster. Lightly abraded with the most obvious abrasion being a luster scrape in the right obverse field. Housed in a prior generation holder.  
*Ex: FUN Signature (Heritage, 7/2007), lot 2852.*  
*From The Free Tilly Collection.* NGC ID# 269F, PCGS# 8931

**1860-S Double Eagle, Near-Mint**  
**Ex: S.S. Republic**

- 7439 1860-S AU58 NGC. CAC.** *Ex: S.S. Republic.* A lustrous and minimally marked representative that boasts superior eye appeal to many Type One twenties certified as Mint State. A trace of wear on the shoulder curl is all that denies a finer grade. The *S.S. Republic* had a greater variety of gold issues than the *S.S. Central America* or *S.S. Brother Jonathan*, the other two famous "Ship of Gold" maritime disasters of the era. NGC ID# 269F, PCGS# 8931

- 7440 1861 XF40 NGC.** Like most Type One Liberty double eagles, the 1861 is not too difficult to locate in circulated grades, but Mint State examples are seldom encountered. This pleasing XF example shows some light wear on the design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. NGC ID# 269G, PCGS# 8932

- 7441 1861 XF40 NGC.** The 1861 double eagle is a popular issue for type purposes, with a hefty mintage of nearly 3 million coins. This is an attractive XF example with deep orange-gold and rose toning. Well-detailed with evenly worn motifs and scattered typical marks for the grade. NGC ID# 269G, PCGS# 8932

- 7442 1861 XF40 NGC.** An appealing XF example of this popular type issue. Light orange-gold toning covers well-struck, modestly abraded surfaces. NGC ID# 269G, PCGS# 8932

- 7443 1861 XF45 NGC.** An ideal coin for type purposes, this is a well-struck example showing even wear and small to medium-sized marks from circulation. A deep orange-gold coin with considerable luster remnants in the protected areas. NGC ID# 269G, PCGS# 8932

- 7444 1861 XF45 PCGS.** The plentiful 1861 double eagle, coined from a then record 2.9 million double eagles, remains a popular type issue for today's collectors. This lightly worn example has scattered marks that are consistent with the grade. A pleasing light yellow-gold example with good overall eye appeal. NGC ID# 269G, PCGS# 8932

**1861 Double Eagle, AU55**  
**Solid Circulated Type Coin**

- 7445 1861 AU55 NGC.** The 1861 double eagle has a higher mintage than all other Philadelphia twenties struck from 1855 through 1865...combined. Even so, it is a genuinely tough date in better circulated and Mint State grades, though heavy resubmissions distort the combined certified population data. This Choice AU example has considerable luster remaining on its yellow-orange surfaces. NGC ID# 269G, PCGS# 8932

---

**1861 Double Eagle, AU58**  
**A Popular Type Coin**

**7446** 1861 AU58 NGC. The large mintage approaching 3 million pieces and the relatively high population in the better AU grades make the 1861 a very popular type coin. Light yellow-orange color overall with strong, pleasing luster. This moderately abraded near-Mint coin shows only a trace of friction at the high points.  
Ex: *Central States Signature* (Heritage, 4-5/2009), lot 3950. NGC ID# 269G, PCGS# 8932

---

**1861 Double Eagle, Near-Mint**  
**Popular Type One Issue**

**7447** 1861 AU58 PCGS. This double eagle issue from the year the Civil War started has a massive mintage of almost 3 million pieces, yet collector demand for near-Mint and better examples still outpaces supply, even before resubmissions are taken into account. This wheat-gold example retains generous luster and has only a touch of rub on the high points. Minor coppery elements are noted near the second A in AMERICA. NGC ID# 269G, PCGS# 8932

---

**1861 Twenty Dollar, MS61**  
**Remarkably Attractive for the Grade**

**7448** 1861 MS61 NGC. Aside from the 1856-S and 1857-S shipwreck survivors, the 1861 is the most available Type One double eagle, and has long been a favorite among type collectors. This Mint State example is well-struck, with attractively frosted, yellow-gold surfaces. No major abrasions are present, and the grade is limited only by some light chatter in the fields. NGC ID# 269G, PCGS# 8932

---

**1861-O Double Eagle, AU Details**  
**Rare and Historic New Orleans Issue**

**7449** 1861-O — Cleaning — PCGS Genuine. AU Details. Variety 1. The final Type Two New Orleans issue was struck the same year that Louisiana bolted the Union for the Confederacy. The mintage of 17,741 pieces was coined for three different authorities: the United States (5,000 pieces), the State of Louisiana (9,750 pieces), and the C.S.A. (2,991 pieces). All were from the same obverse die, but per Bowers, “after only limited use, the die was relapped, with the result that on nearly all known examples the bottoms of the numerals 861 are light.” On the present piece, the base of the date is sharp, which suggests it was struck for the United States. Clash marks are prominent at both centers, with a star faintly visible on Liberty’s upper neck (as made). The straw-gold surfaces are sharply defined but somewhat bright. Luster is evident although subdued. The reverse is minimally abraded while the obverse has a few facial marks and a couple of dull abrasions near the chin. NGC ID# 269J, PCGS# 8934

---

**1861-S Double Eagle, AU58**  
**Notably Rare in Finer Grades**

- 7450 1861-S AU58 NGC.** The 1861-S is one of the scarcer S-mint No Motto Double Eagles. Fewer than 750,000 pieces were produced and AU examples are quite elusive. This yellow-gold representative retains considerable luster, and displays a nice strike. A few minor contact marks are scattered over each side. NGC and PCGS together have certified just 31 pieces numerically finer (11/14).  
*Ex: Long Beach Signature (Heritage, 6/2005), lot 8049.*  
*From The Free Tilly Collection. NGC ID# 269K, PCGS# 8935*

---

**1861-S Twenty Dollar, AU58**  
**Rare Any Finer**

- 7451 1861-S AU58 NGC.** After the small production of Paquet Reverse double eagles, the regular reverse die was used to strike nearly 770,000 coins at the San Francisco Mint in 1861. The typical example grades VF to AU and Mint State pieces are rare, with only about 30 such specimens seen by NGC and PCGS (11/14). Honey-gold surfaces display a good amount of luster and exhibit well-struck devices. Distributed light marks confirm brief circulation. NGC ID# 269K, PCGS# 8935

---

**1862-S Twenty Dollar, AU58**  
**Good Value for This Difficult Early Type**

- 7452 1862-S AU58 PCGS.** This California issue was exceedingly scarce in high grades prior to the discovery of dozens of examples within the wrecks of the *S.S. Republic* and the *S.S. Brother Jonathan*. In some ways, however, those treasure coins heightened collector awareness of the issue, and prices remain strong to this day. This still-lustrous double eagle retains considerable mint luster. Its pale orange-gold surfaces have a number of short abrasions, though grade-defining friction is confined to the high points.  
*Ex: ANA Signature (Heritage, 8/2007), lot 3303; Dallas Signature (Heritage, 11/2007), lot 1950.*  
*From The Free Tilly Collection. NGC ID# 269N, PCGS# 8938*

---

**1862-S Twenty Dollar, AU58**  
**Better Date S.S. Republic Recovery Coin**

- 7453 1862-S AU58 NGC.** *Ex: S.S. Republic.* This better-date San Francisco double eagle was one of 127 examples recovered by Odyssey Marine Exploration, Inc., changing the rarity of the issue from exceedingly rare to rare-but-available status. A yellow-gold example with sharp remaining luster and minimal evidence of handling or circulation, the quality of preservation is excellent for the grade. Housed in the original rosewood case with the Odyssey Marine certificate of authenticity and the accompanying commemorative booklet. NGC ID# 269N, PCGS# 8938

---

**1862-S Twenty Dollar, AU58**  
**Repunched Date, Breen-7214**

- 7454 1862-S AU58 NGC. CAC. Breen-7214.** *Ex: S.S. Republic.* The 86 in the date is repunched. A caramel-gold double eagle with substantial cartwheel sheen and a minimal number of abrasions. The eye appeal exceeds many examples certified as Mint State, although the 1862-S is rare in such condition. The sidewheel steamship *S.S. Republic* sank in the Atlantic Ocean off the coast of Georgia on October 25, 1865. A vast array of gold coins were recovered in 2003. NGC ID# 269N, PCGS# 8938

- 
- 7455 1863-S VF30 NGC.** The yellow-gold surfaces of this pleasing Type One Liberty double eagle are lightly abraded and the design elements retain most of their original detail, with some wear on the high points. The 1863-S twenty is seldom encountered in high grade. NGC ID# 269R, PCGS# 8940

---

**1863-S Double Eagle, AU55**  
**Difficult to Locate Any Finer**

- 7456 1863-S AU55 NGC.** This San Francisco issue saw almost a million pieces produced, yet their hard use in the California economy and elsewhere means that the issue is challenging in AU55 and better grades. This AU55 example has scattered abrasions on the obverse but also largely intact pale gold luster. An alloy spot is noted at the top of the reverse.  
*From The Free Tilly Collection. NGC ID# 269R, PCGS# 8940*

---

**1863-S Liberty Twenty, AU55**  
**Scarce Issue in Higher Grades**

- 7457 1863-S AU55 PCGS.** This is a historic Liberty Head twenty issue on two counts—from the first decade of coinage at the San Francisco Mint and from a large production midway through the Civil War. Light high-point wear and a few moderate abrasions, more prominent on the obverse, point to a short spate in circulation, but considerable luster and appeal are present. NGC ID# 269R, PCGS# 8940

---

**1864 Liberty Twenty, XF40**  
**Popular Civil War Issue**

- 7458 1864 XF40 NGC.** A few scattered marks appear on both sides of this pleasing Civil War-era Liberty double eagle, with dark stains at the upper right reverse, though the AM in AMERICA. The wheat-gold surfaces exhibit sharp design motifs with traces of luster remaining in the protected areas. NGC ID# 269S, PCGS# 8941

---

**1864-S Liberty Twenty, AU53**  
**Challenging in High Grades**

- 7459 1864-S AU53 NGC.** The 1864-S did not circulate quite as extensively as did some earlier San Francisco double eagles, but it is still scarce above the AU grade range. This Almost Uncirculated example displays pale yellow-gold color, with hints of luster remaining in the recesses. The devices remain well-detailed, and the surfaces are attractively smooth.  
*From The Free Tilly Collection. NGC ID# 269T, PCGS# 8942*

---

**1865 Double Eagle, AU50**  
**Abundant Luster in the Recesses**

- 7460 1865 AU50 NGC.** Yellow-gold surfaces yield abundant luster that glints from the stars, legends, and recessed areas of the devices. Liberty's ear lobe is surrounded by numerous raised die lines, as made. Wispy pinscratches within the D in the denomination provide the only conceivable distraction. NGC ID# 269U, PCGS# 8943

- 7461 1865-S AU53 NGC.** The federal government intended for the 1865-S to be the last No Motto double eagle at San Francisco, but difficult cross-country communication led to the subsequent famous 1866-S No Motto coins. This 1865-S piece has pink-influenced apricot-gold luster in the protected areas.  
*From The Free Tilly Collection. NGC ID# 269V, PCGS# 8944*

---

**1865-S Twenty Dollar, Well-Struck AU55**

- 7462 1865-S AU55 NGC.** The 1865-S double eagle was very rare in high grades before the discovery of more than 500 coins on the wreck of the S.S. *Brother Jonathan*. Choice AU examples such as the present offering are not encountered that frequently, but higher-grade coins are plentiful. Greenish-gold surfaces display traces of luster in the recesses of the well-struck devices. Distributed light marks are within the confines of the grade designation. NGC ID# 269V, PCGS# 8944

---

**1866 Motto Twenty, AU55**  
**First-Year Type Two Issue**

- 7463 1866 AU55 NGC.** Surprisingly lustrous for a Choice AU example, with friction that is consistent for the grade. A small amount of grease was struck into the coin: below and onto the lower parts of the second S in STATES, on the upper reverse. This is the first Type Two double eagle issue from the Philadelphia Mint with the motto IN GOD WE TRUST added to the reverse.  
*Ex: Dallas Signature (Heritage, 10/2008), lot 2339. NGC ID# 269X, PCGS# 8949*

---

**1866-S Double Eagle, AU53**  
**With Motto Variant**

- 7464 1866-S Motto AU53 NGC.** Although not as scarce as its No Motto counterpart, the 1866-S With Motto double eagle is nonetheless elusive in pleasing AU grades, and Mint State coins are rarely seen. This example is well-detailed and retains soft yellow-gold luster in the recesses. A single mark near Liberty's eye is the only obvious abrasion. NGC ID# 269Y, PCGS# 8950

---

**1866-S Double Eagle, AU55**  
**Later With Motto Variant**

- 7465 1866-S Motto AU55 NGC.** The 1866-S With Motto twenty is available in the context of 1860s S-mint double eagles, but the certified population declines significantly in Mint State, where this issue becomes conditionally rare. The present Choice AU piece displays smooth, green-gold patina with hints of rose-gold luster in the protected areas. An unusually appealing coin for the grade, showing just slight rub over the high points of the design.  
*From The Free Tilly Collection. NGC ID# 269Y, PCGS# 8950*

- 7466 1867-S AU53 PCGS.** A second-year Type Two double eagle with light wear across the devices but plenty of yellow-gold luminosity to the fields. A scrape to the left of the profile contributes to the grade.  
*From The Free Tilly Collection. NGC ID# 26A2, PCGS# 8952*

---

**1867-S Liberty Twenty, AU58**  
**Conditionally Challenging Type Two Issue**

- 7467 1867-S AU58 PCGS. CAC.** The 1867-S had a substantial mintage of more than 920,000 coins, but virtually all experienced heavy circulation and a number were later melted. High-end AU examples are typically the finest available to collectors, and Mint State survivors are rare and seldom seen finer than MS61. This near-Mint piece retains hints of luster in the recesses amid original olive-gold patina. Light, scattered abrasions are present, as is expected at this grade level, but the devices are sharp and exhibit little friction. Population: 67 in 58, 17 finer (11/14). NGC ID# 26A2, PCGS# 8952

- 7468 1868-S AU53 NGC.** A Type Two San Francisco double eagle with light apricot-gold luster remaining in the protected areas. Modestly but plainly worn on the softly struck high points.  
*From The Free Tilly Collection. NGC ID# 26A4, PCGS# 8954*

---

**1868-S Twenty Dollar, AU55**  
**Elusive in Mint Condition**

- 7469 1868-S AU55 NGC.** The 1868-S double eagle is most frequently seen in Very Fine and Extremely Fine. About Uncirculated examples are scarce and Mint State pieces are elusive, NGC and PCGS having seen only about 60 so graded, virtually all in MS60 and MS61. This Choice AU piece has faint rose-pink overtones on green-gold surfaces with considerable luster. Light abrasions are typical for this issue.  
*Ex: Long Beach Signature (Heritage, 6/2010), lot 1833. NGC ID# 26A4, PCGS# 8954*

---

**1868-S Double Eagle, AU58**  
**Ample Remaining Luster**

- 7470 1868-S AU58 NGC. CAC.** Ample remaining luster on yellow-gold surfaces shows both green and orange tinges. Just a touch of rub visits the high points and fields. This Type Two issue saw a sub-million mintage and AU58 coins are scarcer than the Census data might suggest due to heavy resubmissions. NGC has graded only 38 coins finer (11/14). NGC ID# 26A4, PCGS# 8954

**1868-S Double Eagle, AU58**  
Rare in Finer Grades

**7471 1868-S AU58 PCGS. CAC.** High-end AU examples of this Type Two San Francisco issue are generally about as nice as is typically available, as Mint State coins are rarely encountered at auction. This near-Mint representative retains substantial mint frost beneath a warm veil of honey-gold patina. Smooth surfaces further complement the eye appeal. Population: 67 in 58 (1 in 58+), 24 finer (12/14). NGC ID# 26A4, PCGS# 8954

**1869 Double Eagle, MS60**  
Remarkably Vibrant

**7472 1869 MS60 PCGS.** A less often seen Type Two Philadelphia issue, rare in Mint State. This example is moderately abraded, as expected for the grade, but nonetheless possesses distinct eye appeal. The fields display a balance of radiant luster and semiprooflike mirroring, while the design elements are well-struck and frosty. Delicate honey-gold patina adds a degree of warmth to each side. Population: 5 in 60, 25 finer (12/14). NGC ID# 26A5, PCGS# 8955

**1869-S Double Eagle, AU58**  
Scarce Any Better

**7473 1869-S AU58 NGC.** The ten-year span of Type Two Liberty double eagles has a number of challenging issues, and the 1869-S fits snugly into that category in the higher AU and Mint State grade range. This near-Mint beauty has ample yellow-gold and apricot luster, excellent detail, and just a touch of rub crossing the high points. *From The Free Tilly Collection.* NGC ID# 26A6, PCGS# 8956

**1869-S Double Eagle, MS61**  
Elusive in This Grade

**7474 1869-S MS61 NGC.** The 1869-S double eagle came from a generous production approaching 700,000 pieces and is readily available in the grades of Very Fine to About Uncirculated. Mint State examples are highly elusive in the MS60 to MS62 range and are excessively rare any finer.

The peach-gold surfaces of this MS61 coin display traces of luster in the recessed areas. The design elements are relatively well-impressed though the centers in the stars along the left border are soft. Distributed minuscule marks are somewhat more prevalent on the obverse. Census: 36 in 61, 42 finer (12/14). NGC ID# 26A6, PCGS# 8956

**7475 1870-S AU55 NGC.** The San Francisco mint struck nearly a million double eagles in 1870, but most of those coins apparently entered circulation. That includes this pleasing Choice AU example, which retains nearly full design details and plenty of luster. Surface marks are relatively modest on both sides. NGC ID# 26A9, PCGS# 8959

**7476 1870-S AU55 NGC.** In a year when multiple small denominations of gold came back to San Francisco for a final hurrah, the double eagle remained tops with almost a million pieces struck. This honey-gold and apricot-orange piece retains considerable luster in the protected areas. *From The Free Tilly Collection.* NGC ID# 26A9, PCGS# 8959

---

**1871 Double Eagle, Near-Mint  
Rare in Better Grades**

**7477 1871 AU58 NGC.** This Type Two issue with a five-figure mintage is rare in Mint State with just 27 such pieces in the combined certified population (11/14). This near-Mint representative is the next best thing, brightly lustrous yellow-gold with scattered copper on and near the portrait. Just a hint of wear determines the grade. NGC ID# 26AA, PCGS# 8960

**7478 1871-S AU55 PCGS.** Small Squat S mintmark. This issue had a relatively large mintage of 928,000 coins, and it is plentiful in VF to AU condition, but scarce in Mint State. This Choice AU example displays pleasing wheat-gold color and well-defined motifs that are only slightly worn. Small to medium-sized abrasions are scattered over both sides. NGC ID# 26AC, PCGS# 8962

---

**1871-S Twenty Dollar, AU58  
Lovely Original Patina**

**7479 1871-S AU58 NGC.** A typical San Francisco issue from this period, available in the XF to AU range, but scarce in Mint State. This near-Mint example is unusually appealing for the grade, with warm honey and orange-gold hues over each side and substantial luster remaining in the recesses. Well-detailed with minimal surface detractors. NGC ID# 26AC, PCGS# 8962

---

**1871-S Double Eagle, MS60  
Generous Luster**

**7480 1871-S MS60 NGC.** Most examples of this plentiful issue in an earlier time were either VF or XF, as most circulated in the West, like so many S-mint gold coins of the 1860s and 1870s. A few Mint State pieces have since been repatriated from overseas hoards, however, making the issue available in MS60 to MS62 with patient searching. Generous luster abounds on both sides of this MS61 piece, but numerous abrasions prevent an even finer grade. The lovely orange-gold color is a plus. Census: 48 in 60, 87 finer (11/14). *Dallas Signature (Heritage, 10/2009), lot 1707.* NGC ID# 26AC, PCGS# 8962

---

**1871-S Double Eagle, MS61  
Conditionally Rare Issue**

**7481 1871-S MS61 NGC.** Micro S. An attractive sun-gold representative that lacks the distracting abrasions often encountered on MS61 double eagles. Luster dominates the reverse, and fills the obverse curls, coronet, and stars. Despite a mintage of 928,000 pieces, the 1871-S is infrequently located in Uncirculated grades. *From The Free Tilly Collection.* NGC ID# 26AC, PCGS# 8962

**7482 1872 AU53 NGC.** The surfaces boasts beautiful peach-gold color and some semiprooflike reflectivity under a light layer of scattered abrasions and some faint grayish haze. A nice appearance for this rather low-mintage Type Two issue. NGC ID# 26AD, PCGS# 8963

**1872-CC Twenty Dollar, AU55  
Very Rare in Mint Condition**

- 7483 1872-CC AU55 NGC. Variety 1-B.** Attributed by the first C in the mintmark far left over the upper diagonal of the N in TWENTY. Although the obverse has a few moderate reeding marks, this piece reveals fewer and less severe abrasions that are encountered on most specimens of this issue. The frosty luster and rich orange-gold patination provide strong eye appeal to this significant Carson City twenty. A trace of high-point wear accounts for the Choice AU grade. Very rare in mint condition. Ex: *Central States Signature* (Heritage, 4-5/ 2009), lot 3969. NGC ID# 26AE, PCGS# 8964

**1872-S Double Eagle, Well-Defined AU58**

- 7484 1872-S AU58 NGC.** Just a trace of wear shows on the high points of the well-detailed design elements and the light greenish-gold surfaces radiate vibrant mint luster. While near-Mint specimens are not too difficult to locate, the 1872-S is scarce in higher grades. Ex: *Pittsburgh Signature* (Heritage, 10/2011), lot 5133. NGC ID# 26AF, PCGS# 8965

**1872-S Double Eagle, MS61  
Upper-End for the Grade**

- 7485 1872-S MS61 NGC.** Remarkably smooth, satiny surfaces yield luminous wheat-gold luster with the occasional glint of deeper honey and peach. The design elements are well-defined, and the surfaces exhibit fewer abrasions than are expected for the grade. An unusually eye-appealing 1872-S twenty, with few coins numerically superior. Census: 73 in 61 (1 in 61 ★), 16 finer (12/14). NGC ID# 26AF, PCGS# 8965

**1872-S Liberty Twenty, AU58  
Seldom Seen Prooflike Example**

- 7486 1872-S AU58 Prooflike NGC.** Bright, deeply reflective yellow-gold fields showcase frosty, sharply detail devices on this nearly Uncirculated 1872-S double eagle. Scattered abrasions are present, as is typical at this grade level, but none are singularly noteworthy. This issue is available in AU grades, but finer coins are scarce. This piece ranks as one of only two examples awarded a Prooflike designation by NGC, both AU58 coins (11/14). From *The Free Tilly Collection*. PCGS# 78965

- 7487 1873 Open 3 MS62 NGC.** The 1873 Open 3 double eagle is more available than its Close 3 cousin. The yellow-gold surfaces of this MS62 specimen exhibit somewhat better design detail than is typical for a Type Two twenty, especially noticeable in the hair atop Liberty's head. Distributed small contact marks determine the grade. NGC ID# 26AH, PCGS# 8967

- 7488 1873 Open 3 MS62 NGC.** Scattered marks appear on both sides of this lustrous Mint State coin, although none of those marks stand alone. Both sides are fully lustrous with delicate lemon-yellow toning near the borders. NGC ID# 26AH, PCGS# 8967

---

### 1873 Open 3 Double Eagle, Elusive MS63

**7489** 1873 Open 3 MS63 NGC. Mint State 1873 Open 3 double eagles are available in the MS60 to MS62 range. Select specimens are very elusive and numerically finer pieces are extremely rare. This Select example displays yellow-gold lustrous surfaces and well-struck design elements. Distributed minuscule marks determine the grade. Census: 71 in 63 (1 in 63+), 3 finer (11/14). NGC ID# 26AH, PCGS# 8967

**7490** 1873-S Closed 3 AU58 NGC. A lovely near-Mint example of the Closed 3 double eagle variety of this San Francisco mint issue. Still very lustrous, with deep auburn-gold toning and bold strike definition. Both sides are peppered with small abrasions. NGC ID# 26AL, PCGS# 8969

---

### 1873-S Closed 3 Twenty, MS61

**7491** 1873-S Closed 3 MS61 NGC. Small S. A boldly struck butter-gold representative with cartwheel sheen and a number of small to moderate marks consistent with the grade. Uncirculated Type Two double eagles are elusive since they were coined to late to participate in shipwreck hoards, yet preceded the large-scale export of Federal gold into foreign bank reserves. NGC ID# 26AL, PCGS# 8969

---

### 1873-S Closed 3 Twenty, MS61 Radiantly Lustrous

**7492** 1873-S Closed 3 MS61 NGC. The Closed 3 1873-S twenty is slightly more plentiful than its Open 3 counterpart, but Mint State pieces are nonetheless scarce. The present coin is sharply struck, with vibrant yellow-gold luster that reveals lightly scattered, grade-consistent abrasions. NGC has encapsulated just 28 numerically finer representatives (11/14).  
*From The Free Tilly Collection.* NGC ID# 26AL, PCGS# 8969

**7493** 1873-S Open 3 AU50 NGC. Small S. The lower ball on the Open 3 is a tad further from the center point than on the Closed 3, but the difference is slight. The honey-gold surfaces on this piece show scattered ticks, including a few on the large side, as might be expected from Western gold of this era and in this grade. NGC ID# 26AM, PCGS# 8979

---

### 1873-S Double Eagle, AU58 Scarcer Open 3 Logotype

**7494** 1873-S Open 3 AU58 PCGS. An attractive and lustrous yellow-gold example of this elusive Open 3 variety. Quite sharply struck, with just light abrasions and a trace of friction accounting for the grade. This variety was discovered by "Mr. 1873," Harry X Boosel. The date was changed in 1873 from the Closed 3 to the Open 3 logotypes, eliminating the concern that the Closed 3 variant looked too much like an 8 at first glance.

*Ex: Palm Beach Signature (Heritage, 3/2005), lot 7211.*

*From The Free Tilly Collection.* NGC ID# 26AM, PCGS# 8979

---

### 1873-S Open 3 Double Eagle, AU58 Elusive in Mint State

**7495** 1873-S Open 3 AU58 NGC. The 1873-S Open 3 is scarcer than its Closed 3 counterpart. The yellow- and greenish-gold surfaces of this near-Mint example display luster in the recessed areas and is well-struck. Distributed marks are in line with a large gold coin having experienced brief circulation. Mint State coins are elusive and virtually unavailable finer than MS62. NGC ID# 26AM, PCGS# 8979

**7496** 1874 MS60 PCGS. Rich lemon-gold toning endows this thoroughly lustrous and boldly struck Type Two twenty. The field near the profile has a slender mark, but the surfaces overall show fewer abrasions than associated with double eagles in the designated grade. Encapsulated in a green label holder. NGC ID# 26AN, PCGS# 8970

**7497** 1874 MS60 NGC. This orange-yellow-gold example is softly struck but has no trace of wear. Extensive abrasions in the left obverse field and on the portrait account for the grade. NGC ID# 26AN, PCGS# 8970

**7498** 1874-CC VF30 NGC. **Variety 3-B.** Most 1874-CC double eagles exhibit a widely spaced mintmark, but the present piece has a Close CC, and is the first such example identified by the present cataloger. The reverse die was later used to coin the Variety 4-C 1875-CC. A sun-gold double eagle with moderately marked surfaces. Luster is noticeable within the legends and other design recesses. NGC ID# 26AP, PCGS# 8971

---

**1874-CC Double Eagle, AU55**  
**Ample Luster**

- 7499 1874-CC AU55 NGC. Variety 3-A.** The 1 is centered over a dentil, the right-bottom serif of the 4 is close to a dentil, and a small die chip appears at Liberty's temple. Only a single reverse is known for the issue. A still-lustrous Carson City twenty with largely yellow-orange color, though a degree of reddish alloy is present around the lettering at the top of the reverse. Minimally worn but with a number of abrasions on each side, most notably at Liberty's cheek and jawline and to the right of her head.  
Ex: *Long Beach Signature* (Heritage, 9/2009), lot 1820. NGC ID# 26AR, PCGS# 8971
- 

**1874-S Twenty Dollar, MS61**  
**Seldom Available Finer**

- 7500 1874-S MS61 NGC.** In the context of Type Two San Francisco issues, the 1874-S double eagle is not unusually scarce, but its availability plummets dramatically above the MS61 grade level. This MS61 coin is lightly abraded, but the marks are even distributed over each side so as to not impose a significant distraction. Frosty, honey-gold luster illuminates well-defined motifs, giving this piece pleasing eye appeal. Only 33 coins are numerically finer at NGC (12/14). NGC ID# 26AR, PCGS# 8972
- 

**1874-S Double Eagle, MS61**  
**Deep Original Patina**

- 7501 1874-S MS61 NGC.** Of the many hundreds of 1874-S double eagles certified by NGC and PCGS as Mint State, the vast majority grade MS60 or MS61; finer pieces are decidedly scarce, and none grade above MS63. This MS61 example displays well-impressed design features, and honey-gold surfaces whose luster flow is somewhat interrupted by small contact marks scattered about. NGC has seen only 33 numerically finer submissions (11/14).  
Ex: *Long Beach Signature* (Heritage, 9/2007), lot 3825.  
From *The Free Tilly Collection*. NGC ID# 26AR, PCGS# 8972
- 

---

**1874-S Double Eagle, MS61**  
**Elusive Any Finer**

- 7502 1874-S MS61 NGC.** While the 1874-S double eagle can be located in MS61 condition without too much difficulty, examples in higher grades are elusive. The present coin is a well-struck specimen, with just a touch of weakness on Liberty's hair. The pleasing greenish-gold fields exude frosty mint luster. As expected from the grade, a few handling marks are evident, especially in the obverse field in front of Liberty's face and on the portrait.  
Ex: *Boston Signature* (Heritage, 8/2010), lot 6675. NGC ID# 26AR, PCGS# 8972
- 

**1875 Double Eagle, MS62**  
**Radiant Mint Luster**

- 7503 1875 MS62 NGC.** The 1875 double eagle is significant as the only collectible Philadelphia gold issue from this year. All other gold denominations were struck in extremely limited numbers, ranging from just 100 coins for the eagle to 400 for the quarter eagle and dollar. The double eagle had a mintage of nearly 300,000 pieces, and is obtainable for the date collector. This Mint State coin is vibrantly lustrous, with frosty rose-gold luster and well-struck devices. Light, scattered abrasions account for the grade, while a coppery-red alloy spot is noted by the rim near star 13. NGC has certified only 33 numerically finer representatives (12/14). NGC ID# 26AS, PCGS# 8973
- 

**1875 Double Eagle, MS62**  
**Attractive Type Two Example**

- 7504 1875 MS62 PCGS.** A simply fantastic coin for what it is, an attractive MS62 example of a Type Two double eagle issue. Swirling yellow-gold luster shows occasional variations and a small copper spot just behind the hair bun. The most visible scrape is visible just below and to the left of the eagle's tail. PCGS has graded 76 numerically finer examples (11/14).  
Ex: *Long Beach Signature* (Heritage, 2/2005), lot 9099; *Long Beach Signature* (Heritage, 9/2007), lot 3826; *Stamford Coinfest* (Heritage, 10/2010), lot 5012. NGC ID# 26AS, PCGS# 8973
-

---

**1875 Twenty Dollar, MS62**  
**Deep, Original Patina**

- 7505 1875 MS62 PCGS.** The eye appeal of this remarkably original 1875 double eagle is almost unbelievable for the MS62 grade level. Sharply struck design elements are set amid thickly frosted mint bloom that yields deep orange-gold and pale rose hues over vibrant cartwheel luminance. A few minor grazes on the obverse preclude a finer grade, but these are hardly noticed against the eye-catching patina. NGC ID# 26AS, PCGS# 8973

---

**1875-CC Double Eagle, XF45**  
**An Available CC-Mint Issue**

- 7506 1875-CC XF45 NGC. Variety 6-B.** The 1875-CC twenty dollar, from a mintage exceeding 111,000 pieces, is one of the most common issues from the Carson City Mint. NGC and PCGS have graded more than 3,000 examples in all grades, making the date available through MS62. Greenish-gold patina on the obverse yields to coppery-gold on the reverse of this Choice XF specimen. Appropriately defined for the grade and issue, and scattered marks are consistent with a lightly circulated large gold coin. Copper spots, often seen on this date, are not a problem on the present coin. NGC ID# 26AT, PCGS# 8974

- 7507 1875-CC — Harshly Cleaned — NGC Details. AU. Variety 7-A.** Boldly struck save for some of the obverse stars and the eagle's right (facing) talons. An attractive piece despite light hairlines in the fields from cleaning.

---

**1875-S Liberty Double Eagle, MS62**  
**Elusive Type Two Issue in High Grade**

- 7508 1875-S MS62 PCGS.** Despite the large reported mintage of 1.2 million pieces, the 1875-S Liberty double eagle is a scarce issue in MS62 condition, and finer examples are rare. This attractive MS62 specimen exhibits well-detailed design elements and vivid orange-gold surfaces that radiate vibrant mint luster on both sides. A scattering of minor contact marks explains the grade. PCGS has graded 22 numerically finer examples (11/14).  
*From The Free Tilly Collection.* NGC ID# 26AU, PCGS# 8975

- 7509 1876 MS61 PCGS.** Heavy Motto. Sweeping luster and bold design definition confirm that this orange-gold and lime-green Type Two twenty has never entered circulation. As is customary for the MS61 level, the fields and portrait exhibit distributed marks. NGC ID# 26AV, PCGS# 8976

---

**1876 Double Eagle, MS62**  
**Considerable Luster and Well-Struck**  
**Elusive Any Finer**

- 7510 1876 MS62 NGC.** The 1876 twenty can be located through MS62 without too much difficulty but higher-grade examples are elusive. Indeed, NGC and PCGS have seen only about 100 pieces in MS63 and MS64 and none finer (11/14). The yellow-gold surfaces imbued with hints of red retain considerable luster and exhibit well-struck design features. Moderate scattered marks limit the grade. NGC ID# 26AV, PCGS# 8976

---

**1876-CC Twenty Dollar, XF45**

- 7511 1876-CC XF45 PCGS. Variety 3-A.** Ten die marriages have been confirmed for the 1876-CC, despite a small mintage of 138,441 pieces. The production was less than one-tenth of its San Francisco counterpart. Presumably, coinage at Carson City often switched between double eagle and Seated silver production, and dies were randomly selected from inventory by the coiner. The present '76-CC twenty has bright lemon-gold surfaces. Well defined with ample luster and a typically abraded left obverse. NGC ID# 26AW, PCGS# 8977

- 7512 1876-CC — Improperly Cleaned — NGC Details. AU. Variety 3-A.** Well-detailed with light coloration and several splashes of deeper red-orange patina on the reverse, perhaps due to an imperfect alloy mixture. Lightly abraded with faint hairlines from improper cleaning.

---

**1876-CC Double Eagle, Well-Struck AU58**

- 7513 1876-CC AU58 NGC. Variety 1-A.** The variety is attributed by the first C of the mintmark lower than the second and over the far left side of the right serif of the N in TWENTY, and the second C between the N and the T. Also, spindly cracks are visible through TY as well as through the U in UNITED. Greenish-gold surfaces retain luster in the protected areas. Well-struck, including the radial lines in the obverse stars, an unusual attribute of this issue. Contact marks are visible but these are not as deep as usually seen. Some usually seen smudges are visible on Liberty's portrait, but the copper spots that typically plague this date are absent. NGC ID# 26AW, PCGS# 8977

- 7514 1876-S MS61 PCGS.** Variegated yellow-gold and mint-green patina runs over both sides of this MS61 twenty. The design elements are sharply struck and most of the luster is intact. NGC ID# 26AX, PCGS# 8978

- 7515 1876-S MS61 NGC.** This well-struck S-mint twenty displays well-struck devices. Scattered marks result in some interruption in the luster flow. NGC ID# 26AX, PCGS# 8978

---

**1876-S Twenty Dollar, MS62  
Lustrous, Peach Toned**

- 7516 1876-S MS62 NGC.** Rich peach and sea-green toning embraces this lustrous and sharply struck double eagle. The reverse is only lightly abraded, and the cheek and obverse field lack any individually consequential marks. Type Two double eagles become conditionally scarce in the present quality. Certified in a former generation holder. NGC ID# 26AX, PCGS# 8978

---

**1876-S Liberty Twenty, MS62  
Last Type Two Double Eagle**

- 7517 1876-S MS62 NGC.** The 1876-S Liberty double eagle is the last date of the Type Two design. The issue is not difficult to locate in circulated grades, but high-grade specimens are quite scarce. This well-detailed Mint State example would make an ideal type coin, with light orange-gold surfaces that display hints of lilac and especially vibrant mint luster. NGC ID# 26AX, PCGS# 8978

---

**1876-S Twenty Dollar, MS62  
Highly Collectible Type Two Design**

- 7518 1876-S MS62 PCGS.** This lemon-gold representative is flashy and sharply impressed. The reverse on its own merits a finer grade, as it has only minimal marks. The obverse has no more abrasions than is customary for the MS62 level. The final year for the conditionally scarce Type Two design.  
*Ex: FUN Signature (Heritage, 1/2008), lot 4783; Long Beach Signature (Heritage, 5/2009), lot 1902.*  
*From The Free Tilly Collection. NGC ID# 26AX, PCGS# 8978*

---

**1876-S Double Eagle, MS62  
Attractive Green-Gold Surfaces**

- 7519 1876-S MS62 PCGS.** The 1876-S is available in Mint State with heavy bagmarks, but the present coin is only lightly marked for the MS62 level. It is lustrous and well struck with rich peach-gold and aquamarine toning. Housed in a green label holder.  
*Ex: Long Beach Signature (Heritage, 6/2012), lot 5272. NGC ID# 26AX, PCGS# 8978*

---

**1876-S Double Eagle, MS62  
Rich Lemon Toning**

- 7520 1876-S MS62 NGC. CAC.** A lemon-gold representative with booming luster and a precise strike. Abrasions are moderate for the MS62 grade, aside from a few marks on Liberty's neck and a cluster of thin lines on the field above the arrowheads. Certified in a prior generation holder. NGC ID# 26AX, PCGS# 8978

**1876-S Twenty, MS63  
Great Type Coin**

- 7521 1876-S MS63 PCGS.** A popular S-mint issue, the 1876-S is also among the last of the Type Two double eagles with the denomination expressed as TWENTY D. This piece offers many pluses: copious luster, deep orange-gold color, and a bold strike, as well as generous eye appeal. A great type coin, seldom seen finer. *Ex: October Signature (Heritage, 10/2009), lot 1737.* NGC ID# 26AX, PCGS# 8978

**1876-S Liberty Head Double Eagle, MS63  
Few Finer Coins**

- 7522 1876-S MS63 PCGS.** Few collectors have the wherewithal to form extensive date and mintmark sets of double eagles, and as a result there are numerous opportunities within the series to acquire conditionally scarce examples which might otherwise fall to specialists. The present coin is a prime example, with only 17 finer coins graded. The obverse reveals no unusual marks, and the reverse surfaces are notably clean for the grade. PCGS counts three coins in 63+, and 14 higher (12/14). NGC ID# 26AX, PCGS# 8978

- 7523 1877 MS61 NGC.** The 1877 Liberty double eagle is a scarce issue in Mint State grades and represents the first date of the Type Three design. The lustrous yellow-gold surfaces of this sharply detailed Mint State specimen are lightly abraded, aside from one deeper scratch at Liberty's mouth. NGC ID# 26AY, PCGS# 8982

- 7524 1877 MS61 PCGS.** Yellow-gold cartwheel luster is excellent on this first-year Type Three double eagle. The obverse has several scuffs on the portrait but the reverse is relatively clean. NGC ID# 26AY, PCGS# 8982

**1877 Double Eagle, MS62  
Appealing, Conditionally Scarce Example**

- 7525 1877 MS62 PCGS. CAC.** This is the first Type Three double eagle issue from the Philadelphia Mint, with the denomination spelled out on the lower reverse. Examples are scarce in mint condition, and rare any finer than the current MS62 example. This piece, residing in an old green PCGS holder, displays intense mint luster and eye-catching peach-gold and rose coloration. A number of small-to-moderate marks limit the grade. NGC ID# 26AY, PCGS# 8982

**1877-CC Twenty, XF40  
Early Type Three Issue**

- 7526 1877-CC XF40 PCGS. CAC. Variety 2-C.** Original surfaces display muted shades of pale gold with russet patina surrounding the devices. The surfaces are unusually clean for a CC twenty. The 1877-CC is moderately scarce as an issue, and from a condition standpoint it is seldom located finer than XF. NGC ID# 26AZ, PCGS# 8983

**1877-CC Twenty, AU53  
Low-Mintage Carson City Issue**

- 7527 1877-CC AU53 PCGS. Variety 1-A.** The first C in the mintmark is markedly lower than the second, and the last 7 in the date is centered over a dentil. Liberty's ear opening shows "earbar" clash marks from the reverse, an interesting effect seen more often on Bust halves than on Liberty Head twenties. Light wear and a fairly soft strike combine on this Carson City twenty, although abrasions are few for the assigned grade. The surfaces are an attractive orange-gold deepening to amber-gold around some of the device outlines. A faint die grease streak appears in the left obverse field. The mintage was a low 42,565 pieces for this issue. NGC ID# 26AZ, PCGS# 8983

**1877-CC Double Eagle, AU55  
Scarce Carson City Issue**

- 7528 1877-CC AU55 PCGS. Variety 1-B.** In 1877, the Mint modified the design of the double eagle by changing the value from TWENTY D. to TWENTY DOLLARS. As Douglas Winter indicates: "it presents the only significant design change for the gold coinage from this mint." The yellow-gold surfaces of this Choice AU specimen exhibit well-defined devices. Minute abrasions are slightly more prevalent on the obverse.  
*Ex: Summer FUN Signature (Heritage, 7/2009), lot 2080. NGC ID# 26AZ, PCGS# 8983*

- 7529 1877-S MS61 PCGS.** Scintillating luster shines beneath the vivid apricot-gold patina that covers both sides. Scattered grade-defining abrasions are not individually significant. The 1877-S is seldom seen above low mint state grades.  
*Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 5028. NGC ID# 26B2, PCGS# 8984*

- 7530 1877-S MS61 PCGS.** This S-mint twenty dollar retains a good amount of luster on its wheat-gold surfaces despite scattered marks and scuffs. The design elements are sharply struck. NGC ID# 26B2, PCGS# 8984

**1877-S Twenty Dollar, MS62  
Rarely Encountered Finer**

- 7531 1877-S MS62 NGC.** This fully lustrous piece displays green-gold and salmon-pink hues, and is crisply struck throughout. Small marks are distributed, customary for the MS62 level. Like other S-mint gold issues of the era, the 1877-S was regarded by contemporaries strictly as bullion, and indifferent handling and storage has greatly thinned the ranks of quality survivors. NGC has certified a mere eight pieces numerically finer (11/14).  
*Ex: Palm Beach Signature (Heritage, 3/2006), lot 2044. From The Free Tilly Collection. NGC ID# 26B2, PCGS# 8984*

- 7532 1878 MS61 NGC. CAC.** A second-year Type Three double eagle with a beautiful array of yellow-to-orange hues and an area of coppery alloy at the top of the reverse. Pleasingly detailed and appealing despite significant abrasions. NGC ID# 26B3, PCGS# 8985

**1878 Double Eagle, MS62  
Minor Doubled Die Reverse**

- 7533 1878 MS62 NGC.** A lovely apricot-gold example with exemplary luster and a crisp strike. Minor marks are scattered but are invariably inoffensive. At least two doubled die reverse varieties are known for the 1878. The present example represents a minor doubled die variety with a slight spread evident on the lower letters in PLURIBUS. NGC ID# 26B3, PCGS# 8985

**1878 Double Eagle, MS62  
Lustrous and Attractive**

- 7534 1878 MS62 PCGS.** PCGS and NGC population data indicate that the 1878 double eagle is readily available from About Uncirculated to MS61. MS62s are somewhat more difficult to locate and Select and near-Gems are elusive. Neither service has graded any pieces higher than MS64. Bright luster adorns this sharply struck MS62 example. The deep reddish-gold surfaces reveal minute grade-limiting marks.  
*Ex: Central States Signature (Heritage, 4-5/2009), lot 3981. NGC ID# 26B3, PCGS# 8985*

**1878 Double Eagle, MS62+  
Lightly Die Doubled Reverse**

- 7535 1878 MS62+ PCGS.** A highly lustrous peach-gold double eagle that displays the expected number of individually minor obverse abrasions. At least two different doubled die varieties are known for the 1878. The strongest (Breen-7270) has impressive doubling. The present coin also has a die doubled reverse, but it is a different variety with lesser doubling, best observed on STATES OF. NGC ID# 26B3, PCGS# 8985

---

**1878-CC Double Eagle, XF45  
Scarce, Low-Mintage Issue**

**7536 1878-CC XF45 PCGS. Variety 2-B.** Ex: Rainy Day Collection. The much scarcer Narrow CC variety. The portrait has light rub on the hair and cheek. The remaining luster is both pervasive and moderately prooflike, and the only abrasion of any relevance is a shallow, curving mark in the lower right obverse field. The 1878-CC is considerably scarcer than the Carson City dates from 1874 to 1876. Only 13,180 pieces were struck.  
Ex: *Portland Signature* (Heritage, 3/2004), lot 6432; *Summer FUN* (Heritage, 7/2009), lot 2086. NGC ID# 26B4, PCGS# 8986

**7537 1878-S MS61 PCGS.** The design elements of this attractive Mint State example are well-detailed, with just a touch of softness on some of the stars and the pleasing orange-gold surfaces show a scattering of minor contact marks, with prooflike reflectivity in sheltered areas. NGC ID# 26B5, PCGS# 8987

**7538 1878-S MS61 NGC.** The central devices of this pleasing 1878-S double eagle are sharply defined, but a little softness shows on stars 1 and 2. The orange-gold surfaces are bright and lustrous, with a scattering of minor abrasions that explain the grade.  
Ex: *ANA Signature* (Heritage, 3/2011), lot 4965. NGC ID# 26B5, PCGS# 8987

**7539 1878-S MS61 PCGS.** The recessed areas of this MS61 specimen hold a considerable amount of mint luster on its yellow-gold surfaces. The design elements are sharply impressed. NGC ID# 26B5, PCGS# 8987

**7540 1878-S MS61 PCGS.** Most 1878-S double eagles were exported overseas and those that have returned to the States are heavily bagmarked, resulting in Uncirculated pieces being rare above MS62. Most of the original orange-gold luster remains on this MS61 specimen despite the moderately abraded surfaces. All design elements are sharply struck. NGC ID# 26B5, PCGS# 8987

---

**1878-S Double Eagle, MS62  
Rare in Better Grades**

**7541 1878-S MS62 PCGS.** The surfaces have primarily yellow-gold luster, though the hues tend toward orange at the margins and a sizable copper spot appears just off star 9 on the obverse. Well-defined devices show surprisingly few abrasions, though marks are noted in the fields nearby. PCGS has graded only nine coins as MS63 or finer (12/14). NGC ID# 26B5, PCGS# 8987

---

**1878-S Twenty Dollar, MS62  
Radiant, Frosty Mint Luster**

**7542 1878-S MS62 NGC.** The 1878-S double eagle is available in MS61 and lower grades, but it becomes scarce in MS62 and finer pieces are undeniably rare, with NGC and PCGS combined having certified only 15 such coins (11/14). This piece is boldly struck, with vibrant lemon-gold luster. A few small ticks on the obverse preclude a finer grade, but hardly impede the eye appeal.  
From *The Free Tilly Collection*. NGC ID# 26B5, PCGS# 8987

---

**1879 Double Eagle, MS61  
Lustrous, Well-Struck**

**7543 1879 MS61 PCGS.** The 1879 is relatively plentiful in circulated condition but scarce in Mint State. Sharply struck throughout, the design elements that are highlighted by the semiprooflike fields. Numerous distributed ticks limit the grade, yet the coin exudes considerable eye appeal.  
Ex: *Long Beach Signature* (Heritage, 2/2010), 1747. NGC ID# 26B6, PCGS# 8988

---

**1879-CC Double Eagle, XF45  
Scarce, Low-Mintage Issue**

**7544 1879-CC XF45 PCGS. Variety 1-A.** This is a low-mintage issue with just 10,708 pieces struck, the second-lowest double eagle mintage of the 1870s from the mint in Carson City. This is a pretty red-orange and red-gold coin with substantial remnants of original mint luster in the protected regions on each side. Normal marks and high-point wear are noted for the Choice XF grade. NGC ID# 26B7, PCGS# 8989

**1879-S Double Eagle, MS61**  
Unusually Appealing for the Grade

- 7545 1879-S MS61 NGC.** Following the general pattern of S-mint double eagles from this period, the 1879-S is only marginally elusive in the MS60 to MS61 grade range, but finer pieces are scarce. This representative is sharply defined on the hair curls and the stars, with radiantly lustrous rose and honey-gold surfaces. Grade-defining abrasions are light, and uniformly distributed. NGC has seen 41 numerically finer representatives (11/14).  
*From The Free Tilly Collection.* NGC ID# 26B9, PCGS# 8991

**1879-S Liberty Twenty, MS61**  
Very Scarce Any Finer

- 7546 1879-S MS61 NGC.** From a large mintage of 1.2 million pieces, the 1879-S Liberty double eagle is easy to locate in circulated grades, but the issue is very scarce above the MS61 grade level. This attractive Mint State specimen exhibits well-detailed design elements and vibrant mint luster throughout. The pleasing greenish-gold surfaces show the expected number of minor contact marks for the grade. NGC has graded 41 numerically finer examples (12/14). NGC ID# 26B9, PCGS# 8991

**1879-S Double Eagle, MS61**  
Rich Color on This Early Type Three

- 7547 1879-S MS61 PCGS. CAC.** While this issue is readily available in lower grades, About Uncirculated pieces are difficult to find, and Mint State pieces such as the present piece are downright elusive. The highly lustrous orange-gold surfaces have a touch of rose-gold over the high points, and the devices are bold. The obverse is moderately abraded, like almost every known example, but the reverse is clean for the grade. Worth a close look.  
*Ex: Dallas Signature (Heritage, 10/2006), lot 3277.* NGC ID# 26B9, PCGS# 8991

**1879-S Double Eagle, MS61**  
Conditionally Rare

- 7548 1879-S MS61 PCGS. CAC.** This beautiful twenty shows frosty yellow luster and accompanying light olive and pale rose toning, especially on the obverse. The 1879-S is a condition rarity like so many other of the Type Three double eagles.  
*Ex: Long Beach Signature (Heritage, 9/2010), lot 5618.* NGC ID# 26B9, PCGS# 8991

- 7549 1880 AU55 NGC.** The 1880 double eagle saw a low mintage of slightly more than 51,000 pieces and is a challenging acquisition in all grades. This Choice AU specimen displays luster in the recessed areas of its sharply struck yellow-gold surfaces. Scattered minute marks are within the confines of the grade designation and do not detract. NGC ID# 26BA, PCGS# 8992

**1880-S Double Eagle, MS60**  
Flashy Prooflike Example

- 7550 1880-S MS60 Prooflike ANACS.** The availability of the 1880-S double eagle in Mint State is similar to that of most other San Francisco issues of the period, being marginally scarce through MS61, and elusive any finer. This example, however, ranks as one of just four Prooflike pieces certified by NGC, with one in this grade and one numerically finer (11/14). Flashy honey-gold fields highlight sharp, satiny devices. Scattered abrasions define the grade, with a small reed mark in the left obverse field being the only singularly noticeable flaw.  
*From The Free Tilly Collection.* NGC ID# 26BB, PCGS# 8993

**1880-S Twenty, MS61**  
Lustrous and Appealing

- 7551 1880-S MS61 PCGS.** The 1880-S Liberty Head double eagle is slightly scarce in lower Mint State grades, and very rare above MS62. The present coin is a high-end MS61 example, with a razor-sharp strike and vibrant mint luster. The pleasing greenish-gold surfaces exhibit the normal number of handling marks for the grade.  
*Ex: Summer Fun Signature (Heritage, 7/2010), lot 4864.* NGC ID# 26BB, PCGS# 8993

---

**1880-S Twenty Dollar, MS61**

- 7552 1880-S MS61 PCGS.** Tall S. This lustrous example exhibits the classic toning pattern for an Uncirculated Type Three Liberty double eagle. The centers are pumpkin-gold and the borders display sea-green. The cheek and obverse field are typically abraded, while the reverse is only lightly marked. NGC ID# 26BB, PCGS# 8993

---

**1880-S Twenty Dollar, MS62  
Rich Peach Color**

- 7553 1880-S MS62 PCGS.** Tall S. A peach-gold example with olive-green shades across the margins. Potent luster sweeps sharply struck and moderately to typically abraded surfaces. Most Uncirculated Type Three double eagles were exported as payment to Europe or Latin America during the gold standard era. They gradually returned to the U.S. after the 1933 gold recall. Population: 77 in 62 (2 in 62+), 10 finer (11/14). NGC ID# 26BB, PCGS# 8993

- 7554 1881-S MS61 NGC.** Satiny yet strong luster is primarily deep peach-gold with elements of pink through the obverse fields. Liberty's hair shows solid detail. Moderately marked. *From The Free Tilly Collection.* NGC ID# 26BD, PCGS# 8995

- 7555 1881-S MS61 PCGS.** Light greenish-gold color fits this flashy S-mint twenty well. Strongly struck but with a number of prominent abrasions and scrapes that define the grade, most visible on the cheek.  
*Ex: ANA Signature (Heritage, 3/2011), lot 4969.* NGC ID# 26BD, PCGS# 8995

- 7556 1881-S MS61 PCGS.** A Mint State specimen, this coin displays attractive yellow-gold and peach surfaces. The reverse in particular exhibits nice luster. The design elements display bold definition overall, with areas of minor incompleteness present, including the eagle's claws. As expected at this grade level, a number of scattered marks are present. A few tiny splashes of as-made struck-in grease appear near 8 o'clock on the reverse. NGC ID# 26BD, PCGS# 8995

---

**1881-S Double Eagle, MS62+  
Rare Any Finer**

- 7557 1881-S MS62+ NGC.** Though a significant number of heavily abraded Mint State 1881-S double eagles have survived, even Select coins are rarities. This MS62+ example is the next best thing, amply lustrous with bold orange-gold color overall and occasional paler hues. Census: 74 in 62 (2 in 62+, 1 in 62 ★), 2 finer (11/14). NGC ID# 26BD, PCGS# 8995

---

**1882-CC Twenty Dollar, AU55  
Generous Remaining Luster**

- 7558 1882-CC AU55 PCGS. Variety 1-B.** The second C in the mintmark is slightly higher. Generous remaining mint luster covers each side of this golden-orange Choice AU 1882-CC twenty, which shows a sharp strike as well amid the high-point rub that determines the grade. Fewer marks appear than might be expected for the grade level. The moderate mintage was 39,140 coins. NGC ID# 26BF, PCGS# 8997

---

**1882-CC Double Eagle, AU55  
A Low-Mintage Issue**

- 7559 1882-CC AU55 NGC. Variety 1-B.** The second C in the CC mintmark is slightly higher than the first, and a die crack encircles most of the letter tops on the reverse periphery. Impressive yellow-gold luster with a hint of orange. The design elements are well-impressed. A scattering of light abrasions is noted over each side. Despite a mintage of only 39,140 pieces, this date is available due to imports from abroad.  
*Ex: Long Beach Signature (Heritage, 9/2009), lot 1844.* NGC ID# 26BF, PCGS# 8997

**1882-CC Twenty Dollar, AU58  
Scarce in Mint State**

- 7560 1882-CC AU58 PCGS. Variety 1-B.** A semireflective and bright yellow-gold example from the middle years of the Carson City twenties, strongly struck with only a touch of wear on the high points. A few small alloy dots visit the peripheries and Liberty's lower hair. PCGS has graded just 65 examples in all Mint State grades (11/14).

*Ex: The Baltimore Collection (Heritage, 10/2008), lot 3094.  
From The Free Tilly Collection. NGC ID# 26BF, PCGS# 8997*

- 7561 1882-S MS61 PCGS.** Orange- and yellow-gold patina races over both sides of this MS61 twenty, each of which exhibits sharply struck design elements. Scattered marks only minimally impede the luster flow. NGC ID# 26BG, PCGS# 8998

- 7562 1882-S MS61 NGC.** Honey-gold and apricot hues saturate this solidly struck S-mint double eagle. Though appreciably abraded, the coin is surprisingly clean for the MS61 grade.

*From The Free Tilly Collection. NGC ID# 26BG, PCGS# 8998*

- 7563 1882-S MS61 PCGS.** Philadelphia double eagles of 1882 are extremely rare, and Carson City pieces are rare, leaving the S-mint coins to represent the date in most collections. This piece has an attractive display of pink, green, and yellow over frosty surfaces.

*Ex: Central States Signature (Heritage, 4/2011), lot 6849. NGC ID# 26BG, PCGS# 8998*

**1882-S Double Eagle, Sharply Struck MS62  
Elusive Any Finer**

- 7564 1882-S MS62 NGC.** The 1882-S double eagle is readily available through the MS62 level of preservation. Higher-grade examples are very elusive; indeed, the two major services have graded fewer than 60 pieces finer (12/14). The orange-gold surfaces retain considerable luster and exhibit sharply struck design elements. Distributed minuscule marks determine the grade. NGC ID# 26BG, PCGS# 8998

**1882-S Double Eagle, MS62**

- 7565 1882-S MS62 PCGS.** Tall S. Orange and apple-green toning adorns this lustrous and sharply struck double eagle. Moderate marks are distributed. Like other San Francisco issues from its era, the 1882-S is obtainable in bagmarked Mint State, but due to long-term bag storage, the issue has never appeared at auction in a grade above MS63. NGC ID# 26BG, PCGS# 8998

**1883-CC Double Eagle, Sharply Struck AU55**

- 7566 1883-CC AU55 NGC. Variety 1-B.** A scarcer variety showing the second C in the mintmark left of the D in DOLLARS, and diagonal die lines within the lower shield. A sharply struck representative of this Carson City mint twenty. Traces of luster rest in the recessed areas that possess peach-gold coloration. A few minuscule marks are evenly scattered over each side, but are not of the severity ordinarily seen on this issue.

*Ex: Dallas Signature (Heritage, 11/2007), lot 2350. NGC ID# 26BH, PCGS# 8999*

**1883-CC Double Eagle, AU58  
Original Patina**

- 7567 1883-CC AU58 PCGS. CAC. Variety 2-A.** The second C in the mintmark is positioned over the flag of the D in DOLLAR. Blatant originality provides this near-Mint Carson City double eagle with outstanding visual appeal. The design elements are typically well-struck with a nearly imperceptible amount of rub over the high points, preventing an Uncirculated status. Lightly abraded with frosty luster and peach-gold coloration. From a mintage of 59,962 coins. NGC ID# 26BH, PCGS# 8999

**1883-CC Double Eagle, MS61  
Popular Carson City Issue**

- 7568 1883-CC MS61 PCGS. CAC. Variety 1-A.** The 1883-CC Liberty double eagle claims a mintage of 59,962 pieces, making it an available issue in the context of the series and a popular choice of mintmark type collectors. The surviving population numbers approximately 900-1,000 pieces in all grades, but Mint State examples are very scarce.

This attractive MS61 specimen exhibits sharply detailed design elements and lustrous orange-gold surfaces that show a minimum number of minor contact marks for the grade. Visual appeal is outstanding. This coin will be a welcome addition to a fine collection of Carson City gold. Population: 53 in 61, 25 finer (12/14). NGC ID# 26BH, PCGS# 8999

- 7569 1883-S MS62 NGC.** The 1883-S twenty is available for a price in grades through MS62 but scarce any better. This coin, though lightly abraded, impresses with its yellow-to-orange luster. *Ex: Long Beach Signature (Heritage, 6/2005), lot 8090. From The Free Tilly Collection.* NGC ID# 26BJ, PCGS# 9000
- 7570 1883-S MS62 NGC.** Soft greenish-gold patination resides on the lustrous surfaces of this MS62 offering, and a solid strike delivers strong definition to the design elements. Minimally marked for the designated grade. NGC has seen only 80 pieces finer (12/14). NGC ID# 26BJ, PCGS# 9000
- 7571 1883-S MS62 PCGS. CAC. Tall S.** This semiprooflike Liberty twenty is well struck and has attractive eye appeal for this usually bagmarked grade. The light abrasions noted on each side never rise to the level of warranting individual mention. *Ex: Central States Signature (Heritage, 4/2011), lot 6853; Chicago Signature (Heritage, 8/2011), lot 5843.* NGC ID# 26BJ, PCGS# 9000

**1883-S Twenty Dollar, MS63  
Rare any Better**

- 7572 1883-S MS63 PCGS.** Tall S. Rich peach-gold and sea-green toning bathes this lustrous, well struck, and lightly marked representative. Despite a mintage of 1,189,000 pieces, a number of which made it into foreign bank holdings, few survivors exceed the present coin in quality, due to indifferent shipment and storage. NGC ID# 26BJ, PCGS# 9000
- 7573 1884-S MS62 PCGS.** Goodly amounts of luster remain on this sharply struck S-mint double eagle. Peach-gold surfaces reveal scattered grade-determining marks. NGC ID# 26BL, PCGS# 9002
- 7574 1884-S MS62 PCGS.** This attractive MS62 double eagle exhibits sharply detailed design elements and vivid orange-gold surfaces that radiate vibrant mint luster. A number of minor contact marks are evident, but eye appeal is outstanding. NGC ID# 26BL, PCGS# 9002
- 7575 1884-S MS62 PCGS.** Wide yellow-gold margins frame the orange centers. Lustrous and sharply struck. As expected of the grade, moderate marks are scattered, and are most apparent on the shield. Certified in a green label holder. *From The Free Tilly Collection.* NGC ID# 26BL, PCGS# 9002
- 7576 1884-S MS62 PCGS.** The design elements of this twenty dollar are sharply brought up. Greenish- and peach-gold color runs over both sides, each of which shows distributed marks. NGC ID# 26BL, PCGS# 9002
- 7577 1884-S MS62 PCGS. CAC.** The lime-green peripheries and pumpkin-gold centers are bathed with luster. This well-struck double eagle is kept from a higher grade by the occasional abrasion, notably a horizontal mark on the jaw. *Ex: Houston Signature (Heritage, 12/2010), lot 4649.* NGC ID# 26BL, PCGS# 9002

**1884-S Twenty Dollar, MS63  
Rarely Found Finer**

- 7578 1884-S MS63 NGC.** This issue was heavily exported for trade, and most examples that have returned to the collector marketplace in recent decades are heavily abraded. MS63 coins are challenging to locate, and finer pieces are rare. This offering exhibits sharp design features over frosty luster in shades of honey and green-gold. Minor grazes limit the grade, but no obtrusive abrasions are present. Only nine coins are numerically finer at NGC (11/14). NGC ID# 26BL, PCGS# 9002

**1884-S Double Eagle, MS63**  
**Rarely Obtainable Finer**

**7579 1884-S MS63 PCGS.** A small number of 1884-S double eagles were among those coins represented in the Saddle Ridge Hoard, but this issue remains rare above the MS63 grade level. This piece is well-struck and vibrantly lustrous beneath deep orange-gold patina. Abrasions are light and evenly dispersed. Only 23 coins are numerically finer at PCGS (12/14). NGC ID# 26BL, PCGS# 9002

**7580 1885-S MS62 PCGS.** The yellow-gold surfaces display mild field-device contrast, especially when the coin is tilted slightly under a light source. The design elements are nicely rendered. NGC ID# 26BP, PCGS# 9005

**7581 1885-S MS62 NGC.** The peach-gold surfaces of this MS62 S-mint double eagle show minimal disruption of the luster flow by scattered abrasions. The design elements are sharply struck. NGC ID# 26BP, PCGS# 9005

**7582 1885-S MS62 NGC.** Peach-gold surfaces display whispers of mint-green at the margins of this S-mint double eagle and exhibit sharply struck design elements. This piece is quite lustrous despite scattered marks. NGC ID# 26BP, PCGS# 9005

**7583 1885-S MS62 NGC.** The yellow-gold surfaces are imbued with hints of mint-green and exhibit mild field-device contrast when the coin is rotated beneath a light source. Grade-determining marks are more prevalent on the obverse. NGC ID# 26BP, PCGS# 9005

**1885-S Twenty Dollar, MS63**  
**Rare Any Finer**

**7584 1885-S MS63 PCGS.** A popular Type Three San Francisco issue, but rarely seen finer than MS63. This Select example displays frosty green-gold luster around the margins, with warmer rose-gold hues in the centers. The design elements are sharply struck, even on the finer details. Light, scattered abrasions on the obverse limit the grade, but are not singularly detracting. PCGS has encapsulated just 35 numerically finer representatives (12/14). NGC ID# 26BP, PCGS# 9005

**1885-S Liberty Twenty, MS63**  
**Beautiful Two-Toned Coloration**

**7585 1885-S MS63 PCGS.** Frosty green-gold margins surround warmer rose-gold centers on this sharply struck Select example. Light chatter on the cheek contributes to the grade, though no singularly obtrusive abrasions are present. PCGS has only certified 35 numerically finer representatives, and NGC has seen only 11 such pieces (12/14). NGC ID# 26BP, PCGS# 9005

**1885-S Twenty Dollar, MS63**  
**Semiprooflike Fields**

**7586 1885-S MS63 PCGS.** Blended olive and honey-gold hues blanket semiprooflike fields on both sides of this sharply struck Select 1885-S double eagle. Light abrasions on Liberty's cheek are, as usual, the grade-limiting factor, but are not overly detracting. PCGS has only certified 35 numerically finer representatives (12/14). NGC ID# 26BP, PCGS# 9005

**1885-S Double Eagle, MS62 Prooflike**  
**Razor-Sharp, Deeply Mirrored**

**7587 1885-S MS62 Prooflike NGC.** Highly reflective with ochre fields and sharply struck, straw-gold devices. The surfaces are surprisingly clean for the grade. NGC has certified only five pieces of this issue as Prooflike, with two in this grade (1 in 62 ★), and the other three in MS61 (11/14).  
*Ex: Long Beach Signature (Heritage, 2/2005), lot 9194; Denver Signature (Heritage, 8/2006), lot 2321.*  
*From The Free Tilly Collection. PCGS# 79005*

- 7588 1887-S MS61 NGC.** Mostly brilliant surfaces with blushes of olive-gold at the borders. The devices are satiny and the fields are semireflective while shading toward satin.  
*Ex: Dallas Signature (Heritage, 11/2005), lot 4530. NGC ID# 26BS, PCGS# 9007*

**1887-S Twenty, MS62  
Great Eye Appeal**

- 7589 1887-S MS62 PCGS.** Strongly struck with yellow-gold devices that show coppery elements over the high points. The surrounding fields are flashy, especially on the reverse, though rings of patina are present around the margins. Great eye appeal for an issue that is a borderline condition rarity any finer.  
*Ex: Houston Signature (Heritage, 12/2010), lot 4654. NGC ID# 26BS, PCGS# 9007*

**1887-S Double Eagle, MS62  
Type Three Issue, Scarce**

- 7590 1887-S MS62 NGC.** This San Francisco issue is known as a heavily exported date, with many surviving examples cluttered with bagmarks and abrasions from repeated transport and storage. This example shows a lightly abraded portrait and surrounding fields, but the number and severity of abrasions are less than often seen. The coin is a brilliant yellow-gold with a glimpse of ocean-green at the rims. Boldly struck and appealing. NGC ID# 26BS, PCGS# 9007

**1887-S Twenty Dollar, Sharply Struck MS63  
Excessively Rare Any Finer**

- 7591 1887-S MS63 PCGS.** The 1887-S double eagle has a mintage of 283,000 pieces, relatively low for a San Francisco issue. Many were shipped overseas, and their later repatriation provides most of the supply today, nearly all of which are heavily bagmarked or worn. The Mint State population is concentrated in the MS60 to MS62 range.

Attractive orange-gold color laced with wisps of mint-green covers the lustrous surfaces of this Select offering and the design elements are sharply impressed, including the strands of Liberty's hair and the star centers. Distributed minute marks determine the grade. MS63 is the highest grade that will likely be encountered as the two services have certified only six specimens finer. Population: 68 in 63, 5 finer (12/14). NGC ID# 26BS, PCGS# 9007

- 7592 1888 MS61 PCGS.** Well-defined with satiny luster. The surfaces are mostly orange-gold with lilac accents, though several thin alloy streaks appear at the upper and left obverse.  
*Ex: Central States Signature (Heritage, 4-5/2009), lot 3992. NGC ID# 26BT, PCGS# 9008*

**1888 Double Eagle, MS62  
Rare in Higher Grades**

**7593 1888 MS62 NGC. CAC.** A pleasingly detailed and elegantly lustrous amber-gold Type Three twenty with scattered light abrasions but no true wear. The 1888 double eagle had a mintage in the lower six figures and Select and finer coins are conditionally rare, NGC having certified just 12 such pieces (11/14). NGC ID# 26BT, PCGS# 9008

**7594 1888-S MS62 NGC.** Sharply struck straw-gold devices contrast with the richer butter-yellow fields. Scattered marks have little individual impact on the eye appeal.  
*Ex: Denver Signature (Heritage, 8/2006), lot 2210.* NGC ID# 26BU, PCGS# 9009

**7595 1888-S MS62 PCGS.** Greenish-gold surfaces exhibit sharply struck design elements. A few as-made grease spots are visible, more so on the reverse. NGC ID# 26BU, PCGS# 9009

**1888-S Twenty Dollar, MS62  
Premium Quality**

**7596 1888-S MS62 PCGS. CAC.** Remarkably few abrasions are present for the grade, giving this sharply struck 1888-S double eagle superior eye appeal for the MS62 level. Honey-gold centers fade to frosty green-gold margins on both sides, while the surfaces reveal only light contact on the cheek when rotated beneath a light. NGC ID# 26BU, PCGS# 9009

**1888-S Twenty, MS63  
Sharp and Frosty**

**7597 1888-S MS63 PCGS.** The 1888-S Liberty Head double eagle is genuinely available in grades through MS62, but the certified population declines significantly in MS63, and finer pieces are scarce. This green-gold representative displays vibrant luster and sharply struck relief elements. Some light chatter on the cheek is all that precludes a finer grade. PCGS has seen 51 numerically finer submissions (12/14). NGC ID# 26BU, PCGS# 9009

**1888-S Double Eagle, Sharply Struck MS63**

**7598 1888-S MS63 NGC.** The 1888-S is one of the more plentiful San Francisco double eagles of the decade, with more than 5,000 examples certified by NGC and PCGS. Select specimens such as the present offering can be located with patience but finer pieces are elusive; the two services have seen only 91 near-Gems, and the finest certified is a solitary NGC MS65 (10/14). Lustrous apricot surfaces yield sharply struck design elements, including Liberty's hair strands, the obverse and reverse star centers, and the eagle's plumage. Distributed light marks determine the grade. NGC ID# 26BU, PCGS# 9009

**1888-S Double Eagle, MS63  
Seldom Seen Finer**

**7599 1888-S MS63 PCGS.** Although it is considered one of the most common dates in the Type Three series of San Francisco Mint double eagles, few 1888-S twenties exist in higher grades. PCGS has only graded 51 finer pieces (11/14). This example has a semiprooflike orange-gold obverse combined with a frosty yellow-gold reverse.  
*Ex: Central States Signature (Heritage, 4-5/2009), lot 3996.* NGC ID# 26BU, PCGS# 9009

**1888-S Double Eagle, MS63**  
**Pleasing Eye Appeal**

**7600 1888-S MS63 PCGS.** A lovely lemon-gold example with lustrous surfaces and a bold strike. Although Liberty's cheek displays several minor marks, the fields are minimally abraded for the designated grade, and the eye appeal is excellent. A costly acquisition any finer. Encapsulated in a green label holder. NGC ID# 26BU, PCGS# 9009

**7601 1889 AU58 NGC. CAC.** The 1889 double eagle is a scarce, low-mintage issue of 44,000 coins. This near-Mint example has remarkable eye appeal for the grade, with a combination of rich reddish-gold coloration and substantial mint luster. A pleasing and affordable representative of this elusive issue. NGC ID# 2695, PCGS# 9010

**7602 1889 MS61 NGC. CAC.** A well-detailed example of this scarce, low-mintage issue of just 44,000 pieces. The highly lustrous surfaces exhibit pleasing, variegated hues of orange-gold and rose, along with traces of mint-green. Minor scuff marks limit the grade. NGC ID# 2695, PCGS# 9010

**7603 1889-CC — Damage — PCGS Genuine. AU Details. Variety 1-A.** A well-struck example with sandy-gold surfaces that have a somewhat granular, mattelike appearance. Surface abrasions are minimal. Both sides display strong AU details. The damage alluded to by PCGS may include an indentation near the obverse periphery between stars 11 and 12. NGC ID# 26BV, PCGS# 9011

**1889-CC Twenty Dollar, AU55**  
**Rich Color, Good Remaining Luster**

**7604 1889-CC AU55 NGC. Variety 1-A.** Though it is not so celebrated a rarity as its Morgan dollar counterpart, the 1889-CC double eagle actually has less than one-tenth the mintage. This Choice AU coin is attractive for the grade with ample yellow-gold luster across each side and strongly struck, minimally abraded devices that show only trifling wear. A few small alloy dots are visible on the portrait. Ex: *Houston Signature (Heritage, 12/2009)*, lot 2023. NGC ID# 26BV, PCGS# 9011

**7605 1889-S MS62 PCGS.** Bright yellow-gold surfaces display sharply struck design features. Scattered abrasions determine the grade and impact the luster flow somewhat. NGC ID# 26BW, PCGS# 9012

**7606 1889-S MS62 NGC.** The primarily yellow-orange obverse has distinct pink elements, while the reverse offers a richer peach-gold experience with the same swirling luster. Modestly marked for the grade. Ex: *Dallas Signature (Heritage, 11/2005)*, lot 9219. From *The Free Tilly Collection*. NGC ID# 26BW, PCGS# 9012

**1889-S Double Eagle, MS63**  
**Elusive Any Finer**

**7607 1889-S MS63 PCGS.** Although not as elusive as in previous years, after the discovery of the Saddle Ridge Hoard, the 1889-S double eagle is still a relatively scarce issue in high Mint State grades. This intensely lustrous example displays lovely blended coloration and sharp strike definition. A few wispy abrasions are observed on both sides, in accord with the MS63 grade assessment. PCGS has only rated 37 examples finer (11/14). NGC ID# 26BW, PCGS# 9012

**1889-S Liberty Twenty, MS63**  
**Lustrous Colorful Example**

**7608 1889-S MS63 PCGS.** The 1889-S Liberty double eagle claims a substantial mintage of 774,700 pieces, but the issue becomes very scarce above the MS63 grade level. This attractive Select specimen offers sharply detailed design elements and vibrant mint luster throughout, with lightly marked peach-gold surfaces. NGC ID# 26BW, PCGS# 9012

**1889-S Double Eagle, Well-Struck MS63**  
**Elusive Any Finer**

**7609 1889-S MS63 PCGS.** Orange-gold and yellow-green patination drapes the lustrous surfaces of this Select S-mint double eagle. The design elements are well-struck, including most of Liberty's hair and the star centers. Both sides are minimally abraded. PCGS has graded only 40 pieces finer (12/14). NGC ID# 26BW, PCGS# 9012

---

**1889-S Double Eagle, Conditionally Scarce MS64  
Outstanding Eye Appeal**

**7610 1889-S MS64 PCGS.** The 1889-S double eagle can be located through the Select level of preservation with relatively little trouble thanks to the discovery of the Saddle Ridge hoard in February 2013. Near-Gems remain very scarce and higher-grade examples are rare. Intense luster emanates from the peach-gold surfaces of this MS64 offering and sharp detail is seen on the design elements. Both sides are remarkably smooth for the grade designation. These attributes add up to give this piece outstanding eye appeal. Population: 54 in 64 (17 in 64+), 5 finer (12/14). NGC ID# 26BW, PCGS# 9012

---

---

**1889-S Liberty Twenty, MS64  
Rare in Finer Condition**

**7611 1889-S MS64 PCGS.** The radiant, uninhibited mint bloom that is a hallmark of the 1889-S double eagle is especially prominent on this Choice representative, showcasing blended shades of honey, rose, and sun-gold color. The strike is sharp, and close study with a loupe reveals only a few minor grazes on Liberty's cheek that preclude a full Gem assessment from PCGS. Prior to the discovery of the Saddle Ridge Hoard, PCGS had not encapsulated any examples of this issue above the Choice grade level, although now the population reports show five Gems that are finer. This piece, however, remains just as appealing aesthetically as it was before, and the rarity of finer examples makes it equally as appealing to the budget-minded specialist. Population: 71 in 64 (17 in 64+), 5 finer (12/14). NGC ID# 26BW, PCGS# 9012

---

1889-S Double Eagle, MS64  
Uninhibited Cartwheel Luster

- 7612 1889-S MS64 NGC. CAC.** An incredibly radiant, mint-fresh blazer, this Choice 1889-S Liberty Head double eagle is awash in frosty yellow-gold luster that exhibits the occasional hue of deeper honey color around the extreme outer peripheries. The coin is not attributed to the Saddle Ridge Hoard, but does possess the immense eye appeal and spectacular luster that are often characteristic of those pieces recovered from that California hoard. Saddle Ridge Hoard coins account for almost half of the MS64 and finer 1889-S double eagles known to collectors, making this date a favorite for type and date collectors who seek only the most eye-appealing coins for their sets. Census: 35 in 64 (7 in 64+, 1 in 64+ ★), 5 finer (12/14). NGC ID# 26BW, PCGS# 9012

1889-S Double Eagle, MS64  
Brilliant Mint Bloom

- 7613 1889-S MS64 NGC. CAC.** Although not attributed on the holder to the Saddle Ridge Hoard, this beautifully preserved Choice 1889-S double eagle has the overall appearance that is characteristic of the long-buried treasure coins — dazzling, mint-fresh luster and incredibly clean, bright-yellow fields. Faint contact on Liberty's cheek appears to be all that kept this coin from a finer numeric grade, and the overall quality is superior to that of most other MS64 Liberty double eagles we have seen. This piece is one of just 35 examples certified by NGC as MS64 (7 in 64+, 1 in 64+ ★), including Saddle Ridge Hoard coins, and only five are numerically finer at that service (12/14). NGC ID# 26BW, PCGS# 9012

1890 Twenty, MS62  
Scarce Low-Mintage Issue

- 7614 1890 MS62 PCGS.** Rich peach and green-gold toning graces this lustrous and nicely struck, low-mintage twenty. The cheek and fields exhibit typical marks for the MS62 level, and a faint streak of struck-in grease is accompanied by wispy abrasions. The date is lightly repunched, visible on the flag of the 1.  
Ex: Boston Signature (Heritage, 8/2010), lot 6229. NGC ID# 26BX, PCGS# 9013

**7615 1890-CC — Obverse Scratched — NGC Details. XF. Variety 1-A.** An attractive coin with lovely honey-gold and rose toning and bold strike definition. Two or three light scratches are evident on the upper obverse.

**7616 1890-CC — Improperly Cleaned — NGC Details. AU. Variety 2-B.** A lovely, boldly struck example with minimally-abraded surfaces and pleasing light coloration. Wispy hairlines in the obverse fields are a sign of improper cleaning. The scarcer Variety 2-B for this date.

---

**1890-CC Double Eagle, AU53**  
**A Frequently Seen Carson City Issue**

**7617 1890-CC AU53 NGC. Variety 1-A.** The 1890-CC is one of the more common double eagles from the Carson City Mint. NGC and PCGS have certified nearly 3,900 pieces, concentrated mostly in the Extremely Fine to About Uncirculated grade range. Reddish-gold hues cascade over both sides of this AU53 offering, each of which retains luster in the recessed areas. The design features are well-defined and neither side reveals mentionable copper spots or grease stains that are often seen on this issue. NGC ID# 26BY, PCGS# 9014

---

**1890-CC Double Eagle, AU53**  
**A Popular CC Issue**

**7618 1890-CC AU53 NGC. Variety 1-A.** Yellow- and greenish-gold coloration resides on the surfaces of this AU53 twenty and most of the motifs are well-detailed. What appears to be weakness on the eagle's tailfeathers on the far right is probably the result of a light impression into the working die (Doug Winter, 2001). Scattered marks are fewer and less severe than the deep, detracting abrasions found on most examples. A small toning spot is visible just to the left of the hair above Liberty's forehead. The 1890-CC, like all Carson City gold coins, is a very popular issue. NGC ID# 26BY, PCGS# 9014

---

**1890-CC Double Eagle, Sharp AU55**

**7619 1890-CC AU55 NGC. Variety 1-A.** The 1890-CC double eagle, with a mintage exceeding 91,000 pieces, is available with relatively little trouble from Very Fine to high-end About Uncirculated. Mint State specimens can be located with patience through MS62, but finer examples are extremely rare. Indeed, NGC and PCGS have seen just nine Select coins and none finer!

The bright yellow-gold surfaces of this Choice AU offering display ample luster in the protected areas. The design elements are well-struck, including Liberty's hair, the star radials, and the eagle's plumage. Even the tailfeathers that are often weak on most coins are sharp on this particular specimen. An excellent choice for the gold or Carson City specialist. NGC ID# 26BY, PCGS# 9014

---

**1890-CC Twenty Dollar, AU58**  
**Minor Doubled Die Reverse**

**7620 1890-CC AU58 NGC. Variety 1-A.** The scarce early die state with complete tail feathers. Minute die doubling is evident on PLURIBUS, TWENTY, and UNITED. An attractive peach-gold and olive-green example that has greater luster and fewer abrasions than is customary for the AU58 grade. One slender dull arc-shaped mark is noted behind Liberty's mouth. NGC ID# 26BY, PCGS# 9014

---

**1890-CC Twenty Dollar, AU58**  
**Green Label Holder**

**7621 1890-CC AU58 PCGS. Variety 1-A.** Rich apricot and sea-green toning drapes this lustrous and well struck Carson City type coin. The fields are less abraded than is usual for the near-Mint level, although the cheek is moderately marked and the obverse rim has a small dig at 3 o'clock. Certified in a green label holder. NGC ID# 26BY, PCGS# 9014

**1890-CC Twenty Dollar, MS61**  
Above-Average Surfaces for the Issue and Grade

**7622 1890-CC MS61 NGC. Variety 1-A.** The usual late die state with some of the eagle's rightmost tailfeathers partially effaced by die lapping. The 1890-CC, with a mintage of slightly more than 91,000 pieces, is one of the more common-date issues from Carson City. Honey-gold surfaces display ample luster and exhibit well-struck design elements. Marks are fewer and less severe than ordinarily seen on this issue, or for the designated grade. Moreover, the copper spots and stains that often plague the date are not significant on this coin. NGC ID# 26BY, PCGS# 9014

**7623 1890-S MS62 PCGS.** Semireflective fields supplement the eye appeal of this solidly struck S-mint double eagle. A number of minor marks scattered across the obverse account for the grade. *From The Free Tilly Collection.* NGC ID# 26BZ, PCGS# 9015

**1890-S Double Eagle, MS63**  
Conditionally Elusive

**7624 1890-S MS63 PCGS.** Large numbers of the 1890-S double eagle were shipped abroad for international trade. Most examples returning to America were in lower grades or heavily abraded Mint State coins. This Select offering exhibits sharply struck design features and pleasing luster. Greenish-gold surfaces reveal a few minute grade-limiting marks. Housed in a green label holder. *Ex: Central States Signature (Heritage, 4-5/2009), lot 4007.* NGC ID# 26BZ, PCGS# 9015

**1890-S Liberty Twenty, MS63**  
Frosty and Well-Struck, Scarce Finer

**7625 1890-S MS63 PCGS.** Small numbers of the 1890-S double eagle were found in the Saddle Ridge Hoard, but this date remains rare in grades finer than MS63. The present piece is well-struck, with frosty green-gold luster that exhibits the occasional rose and honey hue. Scattered abrasions contribute to the grade, but none are individually noteworthy. PCGS has only certified 30 numerically finer examples (12/14). NGC ID# 26BZ, PCGS# 9015

**1890-S Double Eagle, Lustrous MS63**  
Elusive Any Finer

**7626 1890-S MS63 PCGS.** MS63 is about the finest grade that most collectors will encounter when searching for an 1890-S twenty dollar. PCGS and NGC have graded only about 40 finer. Orange-gold and lime-green surfaces exude pleasing luster and exhibit sharply struck design elements. NGC ID# 26BZ, PCGS# 9015

**1891-CC Double Eagle, Unc Details**  
Low-Mintage Key

**7627 1891-CC — Cleaning — PCGS Genuine. Unc Details. Variety 1-A.** Although the 1891-CC five and ten are the most available Carson City issues of their respective denominations, it is a different story for the 1891-CC twenty. Just 5,000 pieces were struck, which makes the issue the key CC-mint issue of any denomination from the second era of coinage (1889 to 1893) at the legendary Old West facility. The present lemon-gold example exhibits cartwheel sheen and a good strike. The surfaces are somewhat bright from a wipe, and a small area between obverse stars 10 and 11 is tooled. Overall presentation is most attractive for this elusive issue. NGC ID# 26C3, PCGS# 9017

**7628 1891-S MS63 PCGS.** The design elements of this impressive Select example are sharply detailed and the lightly marked orange-gold surfaces show hints of lilac and rose. Both sides radiate vibrant mint luster, adding to the outstanding eye appeal. NGC ID# 26C4, PCGS# 9018

**7629 1891-S MS63 PCGS. CAC.** Medium S, the usual mintmark size for the issue, although Minute S examples are known. Many MS63 Type Three twenties display numerous bagmarks, particularly on the obverse, but the present green-gold and apricot example is superior for the MS63 level and is only lightly marked. NGC ID# 26C4, PCGS# 9018

**7630 1891-S MS63 PCGS. CAC.** Modest contrast is apparent when this Select specimen is rotated under a light source. The devices are sharply struck throughout. The 1891-S double eagle becomes somewhat elusive finer than MS63. NGC ID# 26C4, PCGS# 9018

**1891-S Twenty Dollar, MS64  
Only Three Certified Numerically Finer**

**7631 1891-S MS64 PCGS.** Frosty green-gold luster in the margins yields to warmer rose-gold centers on this Choice 1891-S double eagle. The strike is sharply executed and no significant abrasions are present. This date is fairly available in circulated and lower Mint State grades, but Choice examples remain elusive and finer pieces are prohibitively rare. PCGS has certified only one numerically finer example, NGC just two (11/14). NGC ID# 26C4, PCGS# 9018

**1891-S Twenty Dollar, MS62  
Elusive Prooflike Representative**

**7632 1891-S MS62 Prooflike NGC.** A boldly struck and moderately abraded Liberty Head twenty, with appreciable mirrored brilliance in the fields. Quite scarce with prooflike qualities. NGC has so-designated only 15 coins in all grades, with five in MS62 and none numerically finer (11/14).

*Ex: New York Signature (Heritage, 6/2005), lot 6755; Long Beach Signature (Heritage, 9/2005), lot 5097.  
From The Free Tilly Collection. PCGS# 79018*

**1892-CC Twenty Dollar, AU55  
Low-Mintage Carson City Emission**

**7633 1892-CC AU55 NGC. Variety 1-A.** A butter-gold double eagle with minor wear on the curls and substantial cartwheel luster on the reverse. Abrasions are minor for the grade and denomination aside from a mark on the right half of the 9 in the date. A scarce Carson City issue that has a mintage of only 27,265 pieces. NGC ID# 26C6, PCGS# 9020

**1892-S Twenty, MS63  
Scarce in Finer Grades**

**7634 1892-S MS63 NGC.** Vivacious luster sweeps this boldly struck and carefully preserved Liberty twenty. A yellow-gold example with good eye appeal. Only a few small ticks on the obverse limit the grade. As a date, this issue is readily available in MS62 and lower grades, but the certified population begins a noticeable decline at the MS63 level.

*Ex: Dallas Signature (Heritage, 4/2007), lot 2005.  
From The Free Tilly Collection. NGC ID# 26C7, PCGS# 9021*

**1892-S Double Eagle, MS63  
Lustrous and Appealing**

**7635 1892-S MS63 PCGS.** This San Francisco issue was heavily exported and Choice examples are scarce. Select Mint State coins are relatively plentiful, however, making them a much more affordable option for the collector. This is a well-struck example with attractive peach-gold and rose toning. The highly lustrous surfaces show only the few superficial marks expected for the MS63 grade. NGC ID# 26C7, PCGS# 9021

---

**1892-S Double Eagle, MS63**  
**Conditionally Scarce**

**7636** 1892-S MS63 NGC. Booming luster, a bold strike, and vibrant orange toning ensure the eye appeal of this San Francisco double eagle. The fields exhibit occasional moderate abrasions, particularly near DOLLARS and obverse star 12, but marks are fewer overall than often seen for the grade. Certified in a former generation holder. NGC ID# 26C7, PCGS# 9021

---

**1892-S Double Eagle, Lustrous MS63**  
**Attractive and Well-Struck**

**7637** 1892-S MS63 NGC. Amber-gold surfaces on this S-mint double eagle show a light overlay of smoky gray patina, but mentionable marks are few and far between, and ample cartwheel luster appears. The strike is decently executed on this piece, which is considerably nicer than most survivors of the issue, struck to the extent of more than 930,000 pieces. NGC ID# 26C7, PCGS# 9021

---

**1892-S Twenty Dollar, MS64**  
**Rare in Finer Grades**

**7638** 1892-S MS64 PCGS. High-grade examples of the 1892-S double eagle are often overlooked due to the availability of lower-grade pieces, but this issue is genuinely scarce in Choice condition and is rare any finer. The present piece displays frosty orange-gold luster and minimally abraded surfaces. The strike is sharp, with no evidence of the die lapping that often affects issues of this period. PCGS has seen only 13 numerically finer submissions (12/14). NGC ID# 26C7, PCGS# 9021

---

**1892-S Double Eagle, MS64+**  
**Impressive Quality for the Grade**

**7639** 1892-S MS64+ NGC. CAC. Close study with a lens is needed to detect the minor flaws on Liberty's cheek that kept this beautifully preserved 1892-S double eagle from a full Gem grade assessment. The strike is sharp, and both sides display frosty yellow-gold luster with subtle rose-gold hues in the central regions. Census: 73 in 64 (10 in 64+), 6 finer (12/14). NGC ID# 26C7, PCGS# 9021

**7640** 1893 MS63 NGC. Pale straw-gold interiors yield to deeper yellow-orange at the margins, particularly the bottom of the obverse and the top of the reverse. Scarce any finer, with just 63 such coins at NGC (12/14). NGC ID# 26C8, PCGS# 9022

---

**1893-CC Double Eagle, MS62**  
**Upper-End for the Grade**

**7641** 1893-CC MS62 ANACS. Variety 2-A. This is a highly appealing example of this final-year Carson City issue, with frosty green-gold luster and sharply struck design elements. Close scrutiny with a loupe reveals some faint interruptions in the luster on Liberty's cheek, likely what precluded ANACS from awarding this piece a finer grade, as the surfaces are devoid of the noticeable abrasions and deep cuts that typically affect gold pieces at this level. Numerically finer examples are rare. NGC ID# 26C9, PCGS# 9023

---

**1893-S Liberty Twenty, MS63**  
**Challenging Any Finer**

- 7642 1893-S MS63 PCGS.** While several light to medium abrasions are noted on Liberty's cheek, the rest of the obverse and the reverse of this Select coin are more consistent with an MS64 or better designation. Strong yellow-gold surfaces come alive with elements of orange in the fields. PCGS has graded 47 finer examples (11/14).  
*Ex: Long Beach Signature (Heritage, 2/2010), lot 1766. NGC ID# 26CA, PCGS# 9024*

**1893-S Liberty Double Eagle, MS63**  
**Shimmering Original Luster**

- 7643 1893-S MS63 PCGS.** Heavily frosted honey-gold luster illuminates minimally abraded surfaces on both sides of this Select 1893-S double eagle. The strike is sharp and the eye appeal is proportionately high for the grade. This issue is available in MS63 condition, but finer pieces present a patience-demanding and costly challenge. PCGS has seen 47 numerically finer submissions (12/14). NGC ID# 26CA, PCGS# 9024

**1893-S Double Eagle, Sharply Struck MS63**

- 7644 1893-S MS63 PCGS.** A subtle blend of greenish-gold and yellow-gold coloration cascades over the lustrous surfaces of this Select S-mint twenty. The design elements are sharply struck, including Liberty's hair strands and the eagle's plumage. Scattered light marks prevent an even finer grade. PCGS has seen 47 examples finer (12/14). NGC ID# 26CA, PCGS# 9024

**1893-S Double Eagle, MS63+**  
**Rare Any Finer**

- 7645 1893-S MS63+ PCGS. CAC.** A broadly lustrous apricot-gold San Francisco twenty with surfaces that are, though lightly abraded, still a step above the typical Select coin despite a grade-defining mark just to the right of the nose. The 1893-S double eagle is rare in better grades with just 47 pieces rated MS64 or better by PCGS as of (12/14). NGC ID# 26CA, PCGS# 9024

**1894 Liberty Head Twenty, MS63+**  
**Lovely Rose-Gold Highlights**

- 7646 1894 MS63+ PCGS. CAC.** The scarcity of Choice and Gem examples of the 1894 double eagle puts increased demand on high-end MS63 coins. This Plus-designated representative is sharply struck with frosty green-gold luster that yields warmer rose and honey hues in the centers. Light abrasions on the cheek limit the grade, but hardly affect the eye appeal. NGC ID# 26CB, PCGS# 9025

- 7647 1894-S MS63 PCGS.** Principally pumpkin-gold, although sea-green graces the peripheries. The strike is bold and luster dominates the moderately marked surfaces. Housed in a green label holder.  
*Ex: Charlotte ANA Signature (Heritage, 3/2007), lot 2304. From The Free Tilly Collection. NGC ID# 26CC, PCGS# 9026*

- 7648 1894-S MS63 NGC.** Greenish-gold luster resides on both sides of this sharply struck twenty. Lightly abraded, somewhat more so on the obverse. NGC ID# 26CC, PCGS# 9026

**1895 Liberty Twenty, MS64  
Extremely Rare Any Finer**

- 7649 1895 MS64 NGC.** Like many double eagle issues from this period, the 1895 is available in grades through MS63, but becomes scarce at the Choice level and is rare finer. This piece is not only free of major abrasions, but is also sharply struck and blanketed in frosty green-gold luster that exhibits occasional hints of rose and honey in the centers. Only nine coins are numerically finer at NGC (12/14). NGC ID# 26CD, PCGS# 9027

**1895 Liberty Twenty, MS64+  
Extremely Rare in Finer Grades**

- 7650 1895 MS64+ PCGS. CAC.** This amazing Liberty double eagle seems undervalued at reported market levels. Given its Plus designation from PCGS, and the population of just two finer coins (12/14), we expect this example to enjoy considerable bidding activity. Both sides have sharp design motifs with splendid yellow-gold luster and delicate pink and orange overtones. A single line on Liberty's cheek is the only mark worth mentioning. NGC ID# 26CD, PCGS# 9027
- 7651 1895 MS63 Prooflike ANACS.** This delightful Select specimen exhibits razor-sharp definition on all design elements and the deeply reflective prooflike fields contrast boldly with the frosty devices. The pleasing yellow-gold surfaces show a few minor contact marks that explain the grade. PCGS# 79027
- 7652 1895-S MS63 NGC.** The wheat-gold cartwheel luster of the obverse takes on a slightly brighter yellow on the no-less-lustrous reverse. Solidly struck and a worthy Select type coin. *From The Free Tilly Collection.* NGC ID# 26CE, PCGS# 9028
- 7653 1895-S MS63 PCGS.** Vibrant cartwheel mint luster radiates from both sides of this pleasing Select example and the vivid orange-gold surfaces show a scattering of minor contact marks that explain the grade. The design elements are sharply detailed and the overall presentation is most attractive. NGC ID# 26CE, PCGS# 9028
- 7654 1895-S MS63 PCGS.** An intricate strike and potent cartwheel sheen aid the eye appeal of this orange-gold and olive-green Liberty type coin. The obverse displays a smattering of small abrasions consistent with the Select grade. Certified in a green label holder. *Ex: Santa Clara Bullet (Heritage, 4/2000), lot 611; Philadelphia ANA (Heritage, 8/2000), lot 7527.* NGC ID# 26CE, PCGS# 9028

**1895-S Twenty, Vibrant MS65  
An Important Condition Rarity**

- 7655 1895-S MS65 PCGS.** The 1895-S double eagle is easily located through MS63, after which the population takes a significant drop. The issue becomes an important condition rarity in MS65 where only 17 coins have been certified by PCGS and NGC and a solitary piece finer (an NGC MS66). The current MS65 example displays vibrant luster emanating from yellow-gold surfaces imbued with traces of apricot. The design features are sharply defined, including Liberty's hair strands, the star centers, and the eagle's plumage. A few minute marks are within the confines of the grade designation. Population: 9 in 65, 0 finer (10/14). NGC ID# 26CE, PCGS# 9028
- 7656 1896-S MS63 NGC.** This sharply struck apricot-gold example is amply lustrous with just a few scattered luster grazes overall to define the grade. A great later-date coin. *Ex: The Dr. Kurt Peters Collection (Heritage, 6/2005), lot 8120. From The Free Tilly Collection.* NGC ID# 26CG, PCGS# 9030
- 7657 1896-S MS63 NGC.** The yellow-gold luster of this Select double eagle displays considerable flash. Sharply struck devices further contributes to the coin's pleasing eye appeal. Trivial marks preclude a finer numerical grade. NGC ID# 26CG, PCGS# 9030
- 7658 1896-S MS63+ PCGS.** Fully struck with vibrant mint luster and gorgeous apricot-gold and rose coloration, this Select example offers splendid eye appeal to the viewer. A typical number of small- to medium-sized abrasions are evident for the grade, but they are easy to overlook alongside this coin's other attributes. Very scarce any finer. NGC ID# 26CG, PCGS# 9030

---

**1897 Double Eagle, Sharply Struck MS64  
Elusive Any Finer**

**7659 1897 MS64 NGC. CAC.** Sharply struck with a measure of frostiness to the luster. Yellow-gold is the principal color, though occasional sun-gold hues are also visible. A handful of grazes limits the grade. NGC has graded just 14 numerically finer pieces (12/14).  
*Ex: Houston Signature (Heritage, 12/2009), lot 2050. NGC ID# 26CH, PCGS# 9031*

**7660 1897-S MS63 NGC.** Yellow-gold brightness defines this Select San Francisco twenty's eye appeal. The solidly detailed portrait shows the expected small, scattered abrasions.  
*From The Free Tilly Collection. NGC ID# 26CJ, PCGS# 9032*

**7661 1897-S MS63 NGC.** The central design elements of this impressive Select specimen are sharply detailed, but a touch of softness is evident on some of the stars. The bright greenish-gold surfaces show a few minor contact marks and vibrant mint luster radiates from both sides. NGC ID# 26CJ, PCGS# 9032

**7662 1897-S MS63 NGC.** Solid detail is apparent on the design elements of this lustrous yellow-gold twenty dollar. Some minuscule, scattered marks limit the grade. Nevertheless, this piece has considerable eye appeal. NGC ID# 26CJ, PCGS# 9032

---

**1897-S Twenty, MS64  
Upper-End for the Issue**

**7663 1897-S MS64 PCGS.** The 1897-S is only marginally scarce in this grade, but finer pieces are extremely rare. PCGS has certified only 11 numerically finer pieces, and NGC just 19 (12/14). This Choice example is well-frosted in medium green-gold luster with a few rose-gold hues in the central regions. The strike is sharp and only a few minor grazes on the cheek preclude a full Gem grade assessment. NGC ID# 26CJ, PCGS# 9032

---

**1897-S Double Eagle, MS64  
Dynamic Luster**

**7664 1897-S MS64 NGC.** This green-gold Choice Type Three twenty provides dynamic cartwheel luster and a sharp strike. The obverse field is remarkably unabraded, as is the reverse. Noticeable contact is limited to Liberty's jaw and cheek, which displays a slender thin diagonal mark. NGC has certified just 19 pieces finer (11/14).  
*Ex: Houston Signature (Heritage, 12/2010), lot 4674. NGC ID# 26CJ, PCGS# 9032*

---

**1897-S Double Eagle, MS64  
Noticeable Mirroring in the Fields**

**7665 1897-S MS64 PCGS.** This Choice example is boldly struck, with warm yellow-gold luster that yields splashes of deeper honey and peach hues. The fields are noticeably semiprooflike, and minor ticks and abrasions are limited to unobtrusive areas. The 1897-S twenty is rarely seen in numerically finer grades, with PCGS having seen only 11 such examples (12/14). NGC ID# 26CJ, PCGS# 9032

**7666 1898 MS62 PCGS. CAC.** Lustrous yellow-gold surfaces exhibit sharply struck design elements and reveal just a few minor marks. The 1898 becomes more difficult to locate above the MS62 level. NGC ID# 26CK, PCGS# 9033

---

**1898 Twenty Dollar, MS63  
Rarely Encountered Finer**

**7667 1898 MS63 PCGS.** Intensely frosted mint bloom is the initial draw on the viewer's eye for this Select Mint State 1898 double eagle, showing original rose-gold centers that transition to green-gold luster in the margins. The strike is sharp, while grade-consistent abrasions are noted on Liberty's cheek. PCGS has certified only 15 numerically finer representatives (12/14). NGC ID# 26CK, PCGS# 9033

---

**1898 Double Eagle, Elusive MS63**

- 7668 1898 MS63 NGC.** This late 19th century double eagle issue is readily accessible through the MS62 level, though Select pieces are elusive and anything finer is a condition rarity. This MS63 example has characteristically solid design definition on Liberty's head, and the cartwheels of the yellow-orange luster are understated but undeniable. NGC has graded just 23 numerically finer pieces (11/14).  
*Ex: Houston Signature (Heritage, 12/2010), lot 4674. NGC ID# 26CK, PCGS# 9033*

---

**1898 Twenty Dollar, Attractive MS63+**

- 7669 1898 MS63+ PCGS.** Gorgeous surfaces on this Select Mint State 1898 twenty alternate between rose-gold and golden-yellow, with effulgent cartwheel luster and some slight smoky haze on the high points of Liberty's cheek. The strike is nicely executed, and a few minor scrapes appear on the reverse, just below the glory of rays. An extremely nice example of this issue. NGC ID# 26CK, PCGS# 9033
- 7670 1898-S MS64 PCGS.** Subtly satiny luster is bright nonetheless on this near-Gem. Surfaces are largely pale yellow but with significant apricot elements and an alloy spot just before the U in UNITED on the reverse.  
*From The Free Tilly Collection. NGC ID# 26CL, PCGS# 9034*
- 7671 1898-S MS64 PCGS.** A great 19th century gold type coin with a mix of pale yellow and deeper apricot shadings on each side and occasional small alloy spots. Strongly detailed on the devices and highly appealing. NGC ID# 26CL, PCGS# 9034

---

**1898-S Liberty Twenty, MS64+  
Smooth, Frosty Surfaces**

- 7672 1898-S MS64+ PCGS. CAC.** This gorgeous high-end near-Gem yields lustrous, yellow-gold surfaces and sharply struck devices. Scattered light marks limit the grade, but hardly impede the eye appeal. This date is available in grades through MS64, but finer pieces are scarce, making Plus-graded examples such as the present coin especially popular among budget-conscious collectors. NGC ID# 26CL, PCGS# 9034

---

**1898-S Liberty Twenty, MS62  
Very Rare Deep Prooflike Example**

- 7673 1898-S MS62 Deep Prooflike NGC.** An unusually mirrored business strike that was presumably among the first pieces struck from a newly installed pair of dies. Cameo contrast is evident between the major devices and the flashy fields. Some faint obverse hairlines are found on close inspection, and the distributed light field marks are typical of the MS62 grade. Census: 2 in 62 Deep Prooflike, 1 finer (11/14).  
*Ex: Long Beach Signature (Heritage, 6/2006), lot 3845. From The Free Tilly Collection. PCGS# 79034*
- 7674 1899 MS64 PCGS.** This attractive Choice specimen offers sharply detailed design elements and vibrant mint luster throughout. The well-preserved orange-gold surfaces show only minor signs of contact. PCGS has graded 21 numerically finer examples (12/14). NGC ID# 26CM, PCGS# 9035
- 7675 1899 MS64 NGC.** This attractive Choice specimen displays lightly marked orange-gold surfaces that show hints of rose and vibrant mint luster throughout. The design elements are sharply detailed and eye appeal is quite strong. NGC ID# 26CM, PCGS# 9035

**1899 Twenty Dollar, MS64  
Pleasing Eye Appeal**

**7676 1899 MS64 PCGS. CAC.** A lovely near-Gem with rich apricot toning and an intricate strike. Well preserved aside from a faint U-shaped mark on the upper portion of the right scroll. Since an MS65 trades at four times the price of an MS64, the present lot provides an ideal combination of value and quality. Encapsulated in a green label holder. NGC ID# 26CM, PCGS# 9035

**1899 Double Eagle, Beautifully Frosted MS65**

**7677 1899 MS65 NGC.** Beautifully frosted surfaces boasts bountiful luster and incredible eye appeal on this Gem 1899, one of the nicest survivors of the large mintage of nearly 1.7 million coins. Only the most unobtrusive signs of contact appear on either side. NGC reports 76 submissions in this grade level but only two numerically finer (12/14). NGC ID# 26CM, PCGS# 9035

**7678 1900-S MS63 NGC.** This attractive example displays bold striking details throughout, glassy semi-prooflike fields, and rich green-gold coloration. A generally appealing turn-of-the-century Select coin. *Ex: Dallas Signature (Heritage, 12/2005), lot 1823.* From The Free Tilly Collection. NGC ID# 26CR, PCGS# 9038

**7679 1900-S MS63 NGC.** The 1900-S double eagle was produced in large quantities exceeding 2.4 million pieces, but most examples circulated in foreign trade resulting in few high-grade specimens today. This brightly lustrous Select offering exhibits sharply struck design elements. Scattered light marks determine the grade. NGC ID# 26CR, PCGS# 9038

**7680 1900-S MS63 NGC.** Pleasing luster emanates from the greenish-gold surfaces of this sharply struck Select S-mint double eagle. Minute marks limit the grade. NGC ID# 26CR, PCGS# 9038

**7681 1901 MS64 NGC.** An impressive near-Gem example with deep orange-gold surfaces and vibrant mint luster. The strike definition is outstanding and full on both sides. A few minor scuff marks in the fields prevent an even higher grade. This issue had a low mintage of 111,400 coins, and examples are scarce any finer than MS64. NGC ID# 26CS, PCGS# 9039

**7682 1901 MS64+ PCGS.** A splendid near-Gem example with impressive, nearly full-strike definition, glowing luster, and lovely light orange-gold patina. A handful of trivial marks and luster grazes are noted on each side. NGC ID# 26CS, PCGS# 9039

**7683 1901 MS64 NGC. CAC.** From a low mintage of 111,400 pieces the 1901 double eagle is relatively available through the current MS64 grade level, but becomes scarce any finer. This impressive example is fully struck and intensely lustrous, with lovely light toning and minimal surface marks. NGC ID# 26CS, PCGS# 9039

**1901-S Twenty Dollar, MS63  
Softly Frosted Mint Luster**

**7684 1901-S MS63 NGC.** Gold production at the San Francisco Mint was substantial across all denominations in 1901, but the double eagle of this year is surprisingly scarce finer than MS63. This is a well-struck Select example, with shimmering honey-gold luster that exhibits lighter lilac-gold peripheral hues. Light, scattered abrasions on the obverse portrait and the adjacent field account for the grade. NGC ID# 26CT, PCGS# 9040

**1901-S Double Eagle, Wonderfully Toned MS63**

**7685 1901-S MS63 PCGS.** Intense luster endows this Select twenty, the surfaces of which display a beautiful array of lime-green and orange-gold coloration. Moreover, crisp delineation is apparent on the design elements, including Liberty's hair strands. A few minute, unobtrusive obverse marks stand in the way of near-Gem classification. NGC ID# 26CT, PCGS# 9040

**1902 Double Eagle, MS61  
Ample Luster and Sharply Struck**

**7686 1902 MS61 NGC.** The 1902 double eagle is the lowest-mintage (31,140 pieces) Liberty Head double eagle from the mid-1890s to the end of the type in 1907. Ample yellow-orange luster and sharply struck design elements stand out on this specimen. Scattered light to moderate abrasions but displaying nice eye appeal for an MS61. Streaked in copper alloy just above Liberty's hair bun. *Ex: Long Beach Signature (Heritage, 9/2010), lot 5671.* NGC ID# 26CU, PCGS# 9041

**7687 1902 MS61 NGC.** This early 20th century issue has a surprisingly small mintage of just 31,140 business strikes. The MS61 coin offered here has no wear on its solidly struck devices or in the wheat-gold fields, though both sides are moderately abraded. NGC ID# 26CU, PCGS# 9041

---

**1902-S Liberty Double Eagle, MS63**  
**Vivid Color, Vibrant Luster**

- 7688 1902-S MS63 NGC.** Rich golden color accompanies modestly abraded surfaces that alternate between cartwheel radiance and a more satiny appearance. Comparatively obtainable in Mint State, yet challenging above the present grade level. NGC has graded 44 numerically finer examples (11/14).

*Ex: Central States Signature (Heritage, 4/2006), lot 4412.  
From The Free Tilly Collection. NGC ID# 26CV, PCGS# 9042*

---

**1902-S Double Eagle, MS63**  
**Scarce in Better Grades**

- 7689 1902-S MS63 NGC.** This San Francisco issue is available for a price in grades through Select Mint State, though finer examples are scarce. What is not guaranteed with an MS63 holder, however, is quality, which this piece offers. Excellent central detail and soft apricot-gold luster make up for the scattered fine abrasions that determine the grade. NGC ID# 26CV, PCGS# 9042
- 

**1902-S Double Eagle, MS63**  
**Lovely Orange-Gold Mint Bloom**

- 7690 1902-S MS63 NGC.** Most Mint State survivors of this issue are certified in MS62 and lower grades; the date's availability drops significantly in MS63, and finer coins are decidedly elusive. This pleasing Select example is sharply struck, with vibrant orange-gold luster and no major surface abrasions. NGC has encapsulated just 44 numerically finer representatives (12/14). NGC ID# 26CV, PCGS# 9042
- 

---

**1902-S Liberty Twenty, Sharp MS63**

- 7691 1902-S MS63 PCGS.** A sharp strike and radiant mint luster are the hallmarks of this Select 1902-S double eagle, showing warm honey-gold hues over the central regions and lighter ocean-green tints around the margins. A small scrape below Liberty's eye is the only singularly mentionable abrasion, with the surfaces otherwise just lightly disturbed. Scarcely encountered in finer grades. NGC ID# 26CV, PCGS# 9042
- 

- 7692 1903 MS64 PCGS.** This attractive near-Gem double eagle displays impressive definition, vibrant mint luster, and lovely orange-gold toning. A handful of minor marks and shallow luster grazes on the obverse keep it from grading higher. NGC ID# 26CW, PCGS# 9043
- 

**1903 Double Eagle, MS65**  
**Rare in Better Grades**

- 7693 1903 MS65 NGC.** Before the famously high-mintage 1904 double eagle issue came the 1903 with a mintage of fewer than 300,000 pieces. Gem examples like this piece with warm yellow-gold luster and scattered coppery accents are available for a price, but NGC has graded just 10 coins finer (11/14), a testament to better pieces' condition rarity. NGC ID# 26CW, PCGS# 9043
- 

**1903-S Twenty, MS64**  
**Attractive, Luminescent Surfaces**

- 7694 1903-S MS64 NGC.** The 1903-S double eagle is a notable condition rarity in Gem grades, making this Choice representative about as nice as is typically available for the cost-conscious collector. Both sides display shimmering honey-gold luster and minimally abraded surfaces, with sharply impressed design elements. Only 22 coins are certified numerically finer at NGC (12/14). NGC ID# 26CX, PCGS# 9044
-

**1903-S Liberty Twenty, MS64**  
**Conditionally Rare in Finer Grades**

- 7695 1903-S MS64 PCGS.** This attractive Choice example offers razor-sharp definition on all design elements, with well-preserved orange-gold surfaces that show tinges of olive patina at the borders. There is a small grease stain at the center of Liberty's head, but the overall eye appeal is excellent. PCGS has graded 13 numerically finer examples (11/14).  
*Ex: Dallas Signature (Heritage, 11/2005), lot 4612.*  
*From The Free Tilly Collection. NGC ID# 26CX, PCGS# 9044*

**1903-S Double Eagle, MS64**  
**Elusive in Better Grades**

- 7696 1903-S MS64 NGC.** This 1903-S double eagle was struck just a few years before the 1906 San Francisco earthquake that left little but the Mint facility, the "Granite Lady," standing. Its apricot-gold surfaces have strong, creamy luster and the well-defined devices have few marks of individual significance. NGC has graded just 22 numerically finer examples (11/14). NGC ID# 26CX, PCGS# 9044

**1903-S Twenty Dollar, Razor-Sharp MS64**

- 7697 1903-S MS64 NGC.** Whispers of soft mint-green cling to the margins, framing the yellow-gold centers imbued with traces of peach-gold. Razor-sharp detail shows in most of Liberty's hair, the star centers, and the eagle's plumage. A few unobtrusive marks prevent Gem classification. NGC has certified only 22 examples finer (12/14). NGC ID# 26CX, PCGS# 9044

**1903-S Twenty Dollar, MS64**

- 7698 1903-S MS64 NGC.** Sweeping cartwheel luster, a good strike, and consistent lemon-gold color characterize this Liberty type coin. The reverse is exceptionally free from contact, and obverse marks are inconsequential except near Liberty's chin. Housed in a prior generation holder. NGC ID# 26CX, PCGS# 9044

- 7699 1904 MS64 PCGS.** The defining type issue for the Type Three Liberty double eagles, offered here as a near-Gem with sharp detail, satin luster, and a mix of light to medium-yellow hues. NGC ID# 26CY, PCGS# 9045

- 7700 1904 MS64+ NGC. CAC.** Vibrant luster issues from the peach-gold, minimally abraded surfaces of this high-end near-Gem. The design elements are sharply struck. These attributes add up to nice eye appeal, aptly recognized by CAC. NGC ID# 26CY, PCGS# 9045

- 7701 1904 MS65 PCGS.** No other issue in the Liberty double eagle series is as numerous today as the 1904-P, but the condition of this coin places it head and shoulders above the pack. Pristine, nearly full struck surfaces are in possession of frosty, swirling luster that, combined with the lack of surface marks, give it instant appeal.  
*From The A. James Evans Collection, Part II. NGC ID# 26CY, PCGS# 9045*

- 7702 1904 MS65 NGC.** The peach-gold surfaces of this Gem are imbued with faint hints of mint-green, and all of the design elements are sharply impressed. A few marks are visible, the most noticeable beneath the eagle's left (facing) wing. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS65**  
**Lovely Coloration**

- 7703 1904 MS65 PCGS.** The availability and characteristically excellent eye appeal for which the 1904 double eagle is widely known make it a popular choice for type representation. This Gem example is a pleasing coin in that regard, showing a sharp strike and lovely hues of rose, honey, and green-gold. NGC ID# 26CY, PCGS# 9045

---

**1904 Double Eagle, Crisply Defined MS66  
Excessively Rare Any Finer**

**7704 1904 MS66 NGC.** A voluminous number of 1904 double eagles have been certified in mint condition, making this issue readily available through MS65. The population declines precipitously between MS65 and MS66 where Premium Gems become somewhat elusive. Crisp design detail is evident on the peach-gold surfaces imbued with hints of lime-green. No mentionable marks are visible. NGC and PCGS have seen a mere three examples numerically finer (11/14) NGC ID# 26CY, PCGS# 9045

**7705 1904 MS63 Prooflike NGC.** The greenish-gold surfaces of this Select example display modest field-motif contrast, especially when the coin is rotated under a light source. This sharply struck piece reveals just a few minor contacts. PCGS# 79045

---

**1904 Liberty Twenty, MS63 Prooflike  
Slight Reddish-Orange Surfaces**

**7706 1904 MS63 Prooflike NGC.** The vast number of Liberty Head double eagles struck in Philadelphia in 1904 — exceeding 6.25 million — ensures that some small number of them will be certified as Prooflike or Deep Prooflike at NGC, although the percentages are quite small indeed. This Select Mint State example offers slight reddish-orange surfaces on each side with high field reflectivity and well-frosted devices creating the desired effect. NGC shows only 65 Prooflike examples in numerically finer grades (10/14). PCGS# 79045

**7707 1904-S MS64 PCGS.** Sharply struck with lovely reddish-orange coloration and shimmering mint luster, this is an outstanding coin for the grade. Only trivial marks keep it from a Gem grade. A scarce issue any finer. NGC ID# 26CZ, PCGS# 9046

**7708 1904-S MS64 PCGS.** The 1904-S issue had a massive mintage of 5.1 million coins, and it is the most readily available Liberty double eagle date from the San Francisco mint. Near-Gems like this one are numerous, but Gems are scarce. This example is well-struck with lustrous, lightly toned surfaces and few abrasions. NGC ID# 26CZ, PCGS# 9046

**7709 1904-S MS64 ★ NGC.** An intricately struck and flashy apricot-gold near-Gem that has a clean reverse and a few minor obverse marks. The luster is moderately prooflike, though not designated as such by NGC; the Star is perhaps a “make-up” designation, though in any case true.  
Ex: Long Beach Signature (Heritage, 2/2005), lot 9393; Long Beach Signature (Heritage, 6/2005), lot 8152.  
From The Free Tilly Collection. NGC ID# 26CZ, PCGS# 9046

---

**1904-S Liberty Double Eagle  
Appealing Gem Example**

**7710 1904-S MS65 PCGS.** An available date through the Choice grade level, the 1904-S double eagle becomes conditionally elusive in Gem, and finer pieces are rare. This example well-struck, with frosty straw-gold luster that yields a few deeper honey hues on each side. Only six coins are numerically finer at PCGS (12/14). NGC ID# 26CZ, PCGS# 9046

---

**1904-S Double Eagle, MS65  
Extremely Rare in Finer Condition**

**7711 1904-S MS65 PCGS. CAC.** A touch of semiprooflike mirroring in the fields highlights warm orange-gold patina over both sides of this well-preserved Gem example. The strike is sharp and there are no distracting abrasions present. PCGS has encapsulated just six numerically finer coins, and NGC has seen only one such piece (12/14). NGC ID# 26CZ, PCGS# 9046

---

**1905 Twenty Dollar, Scarce MS62**

**7712 1905 MS62 NGC.** In 1905, Treasury vaults were presumably still flush with double eagles from the previous year's combined Philadelphia and San Francisco mintage of more than 11 million pieces. Just 58,919 twenties were struck in 1905 at Philadelphia. Even at the MS62 level, the 1905 is scarce. This lustrous straw-gold example is nicely struck and has only the expected number of distributed minor abrasions. NGC has seen only 19 examples finer (11/14).  
Ex: FUN Signature (Heritage, 1/2011), lot 7429. NGC ID# 26D2, PCGS# 9047

**1905-S Double Eagle, MS63  
Popular Mintmark Type Coin**

- 7713 1905-S MS63 PCGS.** The 1905-S Liberty double eagle is an available issue in the context of the series, from a mintage of 1.8 million pieces. The 1905-S is always popular with mintmark type collectors. This well-detailed Select specimen offers vivid orange-gold surfaces, with vibrant mint luster and a scattering of minor contact marks on both sides.  
*From The Free Tilly Collection.* NGC ID# 26D3, PCGS# 9048

**1905-S Double Eagle, Pleasing MS63  
Scarcer Than its High Mintage Might Suggest**

- 7714 1905-S MS63 NGC.** The 1905-S is a bit scarcer than its large production exceeding 1.8 million pieces might suggest. Perhaps many were sent overseas and did not return, or maybe many were melted in the States. With its solid design detail and light yellow-gold lustrous surfaces marked by occasional suggestions of alloy, this example offers both beauty and originality.  
*Long Beach Signature (Heritage, 2/2010), lot 1790.* NGC ID# 26D3, PCGS# 9048

**1905-S Double Eagle, MS63  
Scarcer Late-Series S-Mint Issue**

- 7715 1905-S MS63 NGC.** The 1905-S is arguably the scarcest San Francisco Liberty double eagle of the 20th century, with limited population numbers in grades finer than MS63. This Select representative shows sharp design definition, with no evidence of the die lapping that often affects coins of this type. Vibrant honey-gold luster illuminates minor, grade-consistent abrasions, none of which are of individual concern. NGC ID# 26D3, PCGS# 9048

**1905-S Double Eagle, Lustrous MS64**

- 7716 1905-S MS64 PCGS.** A lovely honey-gold type coin with a beautifully preserved reverse and a clean obverse. Both sides are awash with potent luster. This well struck and frosty near-Gem is worthy of the finest advanced cabinet, and is extremely difficult finer.  
*Ex: Long Beach Signature (Heritage, 9/2005), lot 5201.* NGC ID# 26D3, PCGS# 9048

- 7717 1906 AU58 PCGS. CAC.** Impressively detailed with light rub across the uppermost design elements. Wispy abrasions and a few scattered marks populate immensely lustrous, mildly patinated yellow-gold surfaces.  
*Ex: Long Beach Signature (Heritage, 9/2010), lot 5684.* NGC ID# 26D4, PCGS# 9049

- 7718 1906 MS61 NGC.** Generous yellow-orange luster enriches each side of this late-date Liberty twenty. Both sides have decent all-around detail which appears complete, if not strictly sharp on the obverse. Scattered minor marks and wispy abrasions account for the grade.  
*Ex: Chicago Signature (Heritage, 8/2011), lot 5907.* NGC ID# 26D4, PCGS# 9049

- 7719 1906-D MS62 NGC.** Fully struck and highly lustrous, with rich orange-gold toning. This is an exceptionally attractive double eagle from the first year of the Denver mint. A few moderate abrasions limit the grade. NGC ID# 26D5, PCGS# 9050

**1906-D Double Eagle, MS63  
First-Year D-Mint Issue**

- 7720 1906-D MS63 PCGS. CAC.** Always popular as the first double eagle from the Denver Mint, the 1906-D is scarce in higher Mint State grades. An attractive Select specimen, like the present coin, is a good combination of quality and value. This piece exhibits sharply detailed devices, with few abrasions for the grade. The pleasing rose-gold surfaces display bright mint luster and excellent eye appeal.  
*Ex: Houston Signature (Heritage, 12/2010), lot 4701.* NGC ID# 26D5, PCGS# 9050

---

### 1906-D Double Eagle, Vibrant MS64

**7721 1906-D MS64 PCGS.** Double eagles were struck at the Denver Mint for the first time in April 2006. The 1906-D is most often seen in the MS62 and MS63 grade range; near-Gems are available with a concerted effort and finer coins are decidedly rare. Vibrant luster issues from the peach-gold surfaces of the current MS64 offering, and the design elements are sharply struck, including Liberty's hair and the star centers. A mint-made lamination is visible at the first T in TWENTY. NGC ID# 26D5, PCGS# 9050

**7722 1906-S MS63 NGC.** A pleasing late-date San Francisco twenty from the year of that city's Great Earthquake. Wheat-gold luster is ample and bright.

*Ex: Dallas Signature (Heritage, 12/2005), lot 1872.*

*From The Free Tilly Collection. NGC ID# 26D6, PCGS# 9051*

**7723 1906-S MS63 PCGS.** The reddish-gold surfaces are highly lustrous and the motifs are well-defined. Wispy marks that define the grade are not overly distracting. NGC ID# 26D6, PCGS# 9051

**7724 1906-S MS63 PCGS.** This lustrous Select Liberty double eagle offers vivid orange-gold surfaces with a minimum number of minor contact marks for the grade. The design elements are sharply detailed and eye appeal is exceptional. NGC ID# 26D6, PCGS# 9051

**7725 1906-S MS63 PCGS.** Ebullient luster cascades over both sides of this sharply struck S-mint double eagle. Peach-gold surfaces reveal occasional minor, grade determining marks. NGC ID# 26D6, PCGS# 9051

**7726 1907-D MS63 PCGS.** This appealing, impressive example represents one of the best-made Type Three issues, from just the second year of operations at the Denver mint facility. This highly lustrous Select Uncirculated coin is fully struck and offers appealing apricot-gold and rose coloration in addition to minimally abraded surfaces. NGC ID# 26D8, PCGS# 9053

---

### 1907-D Liberty Twenty, MS64 Appealing Final Year of Type Example

**7727 1907-D MS64 PCGS.** This is a popular issue as the final Liberty double eagle production from the Denver Mint. Examples are relatively available at the MS64 and MS65 grade levels, making this issue a prime target for type collectors. The current example is fully struck and displays exemplary, swirling mint luster. Lovely rich coloration and minimal surface marks make this piece high-end for the assigned grade. NGC ID# 26D8, PCGS# 9053

---

### 1907-D Twenty Dollar, MS64 Flashy, Semiprooflike Fields

**7728 1907-D MS64 PCGS.** This dazzling, honey-gold representative exhibits pronounced semiprooflike mirroring in the fields, showcasing exceptional preservation and razor-sharp design elements. A number of Gem examples have been certified, but it is doubtful if more than a few trump this piece in regards to sheer eye appeal. NGC ID# 26D8, PCGS# 9053

**7729 1907-S MS63 NGC.** Soft luster resides on the yellow-gold, lightly marked surfaces of this Select twenty. All design elements are sharply struck. NGC ID# 26D9, PCGS# 9054

**7730 1907-S MS63 PCGS.** Just over 2 million double eagles were coined at San Francisco in 1907, all featuring the Liberty design that was discontinued that same year. This Select Mint State piece has attractive light yellow luster with delicate peripheral lemon toning. NGC ID# 26D9, PCGS# 9054

**7731 1907-S MS63 PCGS.** A pleasing Select example from the last year of the Liberty design, this coin exhibits sharply detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster throughout. NGC ID# 26D9, PCGS# 9054

**7732 1907-S MS63 NGC.** The lustrous surfaces of this Select offering exhibit excellent detail on the design features. Scattered minute marks determine the grade. NGC ID# 26D9, PCGS# 9054

---

### 1907-S Double Eagle, MS64 Seldom Encountered in Finer Grades

**7733 1907-S MS64 PCGS.** The 1907-S is most frequently encountered in the lower grades of Mint State, but it is rarely seen in MS64 or finer condition. In fact, in higher grades the 1907-S is the most challenging of all three issues produced in 1907. This softly frosted example has even, orange-gold coloration and only the slightest abrasions are present. PCGS has graded 10 numerically finer examples (11/14).

*Ex: Dallas Signature (Heritage, 12/2005), lot 1879.*

*From The Free Tilly Collection. NGC ID# 26D9, PCGS# 9054*

1907-S Liberty Double Eagle, MS64  
Conditionally Rare Any Finer

**7734 1907-S MS64 PCGS.** Numerous coins from this issue exist in lower Mint State grades. According to Garrett and Guth, however: "Choice examples are scarce, and in gem condition the date is rarely seen." This fully struck example displays vibrant, shimmering mint luster and attractive light toning. A handful of small abrasions and a couple of orange alloy spots are noted on the obverse, while the reverse is distraction-free. Just 10 examples are graded finer by PCGS (11/14). NGC ID# 26D9, PCGS# 9054

1907-S Double Eagle, Lustrous MS64

**7735 1907-S MS64 PCGS.** This final-year Liberty Head double eagle is one of the over 2 million coins produced at the San Francisco Mint in 1907. Near-Gem examples such as the present specimen are the finest-grade that one can expect to locate; higher-grade coins are rare. Both sides are awash with potent luster and display attractive peach-gold color. The design elements are well-struck. Scattered marks determine the grade. NGC ID# 26D9, PCGS# 9054

HIGH RELIEF DOUBLE EAGLES

1907 High Relief Double Eagle  
Wire Rim, Unc Details

**7736 1907 High Relief, Wire Rim — Cleaning — PCGS Genuine. Unc Details.** Light hairlines are apparent with magnification, but the evidence of cleaning is more obvious from the brighter-than-usual surfaces. Nevertheless, no trace of friction from handling is seen over the high points, and the devices are fully brought up. Almost the entire obverse rim is encircled by a thin wire rim with a less-pronounced metal extrusion seen on the reverse. A truly curious striking detail is noted on the reverse: A die crack connects two of the longer feathers of the eagle's wing which then continues into the rim at 3 o'clock. Quite an attractive and interesting coin in spite of the grade qualifier. NGC ID# 26F2, PCGS# 9135

1907 Saint-Gaudens Twenty, Unc Details  
High Relief, Wire Rim Variant

**7737 1907 High Relief, Wire Rim — Improperly Cleaned — NGC Details. Unc. Ex: On Air Collection.** A sharply detailed yellow and rose-gold specimen of this iconic issue, with lustrous surfaces that show only minor signs of contact and a few microscopic alloy spots between the rays on the obverse. Signs of a light cleaning in the past. Housed in a customized NGC holder. NGC ID# 26F2, PCGS# 9135

MCMVII High Relief Double Eagle  
Wire Rim, Uncirculated Details

**7738 1907 High Relief, Wire Rim — Improperly Cleaned — NGC Details. Unc.** The most medallion of all U.S. coin issues, the MCMVII double eagle has such remarkable high relief that it could be coined only after direct intervention from President Roosevelt. He famously commanded, "Begin the new issue even if it takes you all day to strike one piece!" The eventual mintage was 11,250 pieces, and they have been prized by numismatists ever since their production. The present yellow-gold High Relief is mildly bright from a careful wipe, but the satiny surfaces are well struck and only inoffensively abraded. NGC ID# 26F2, PCGS# 9135

1907 High Relief, XF Details  
Collectible Example of Famous Rarity

**7739 1907 High Relief, Flat Rim — Rim Filed — NCS. XF Details.** It is difficult to believe that any High Relief twenty remained in circulation for very long, given their distinct relief and Roman numeral date. But the present piece has moderate wear on Liberty's chest and raised leg, and on the eagle's breast as well as the crest of the front wing. Substantial design definition is nonetheless present, and the fields display noticeable luster. An obverse rim ding at 2:30 has been filed, and the rims show lesser evidence of filing elsewhere. The obverse field exhibits light hairlines and a few faded thin marks. PCGS# 9136

---

**1907 Flat Rim High Relief  
AU Sharpness**

- 7740** 1907 High Relief, Flat Rim — Obverse Improperly Cleaned — NGC Details. AU. The fields are somewhat glossy, and Liberty's raised knee shows light wear, but this High Relief double eagle is nonetheless both lustrous and desirable. There are no consequential marks and the eye appeal is pleasing. Although the small mintage was principally saved, surviving examples of this famous issue are insufficient to meet collector demand. PCGS# 9136

---

**SAINT-GAUDENS DOUBLE EAGLES**

- 7741** 1907 Arabic Numerals MS64+ NGC. CAC. Radiant mint-green and apricot luster radiate from both sides of this high-end near-Gem. The design elements are sharply struck, including Liberty's facial features and fingers and the panes and pillars on the Capitol building. The CAC endorsement affirms the coin's outstanding eye appeal. NGC ID# 26F5, PCGS# 9141

---

**1907 Saint-Gaudens Twenty, MS65  
Arabic Numerals**

- 7742** 1907 Arabic Numerals MS65 PCGS. A beautiful Gem example of this first-year Arabic Numerals Saint. Both sides are awash in frosty honey-gold luster and exhibit only a few faint grazes on the high points of the design. The strike is sharp and the eye appeal is excellent. Due to the high cost of High Reliefs, the Arabic Numerals 1907 Saint-Gaudens double eagle is ideal for date representation. NGC ID# 26F5, PCGS# 9141

---

**1907 Arabic Numerals Twenty, MS65  
Attractive Surfaces**

- 7743** 1907 Arabic Numerals MS65 PCGS. President Theodore Roosevelt spearheaded the redesign of the nation's coinage in the early 20th century, and Saint-Gaudens' rendering of a standing Liberty chartered a new artistic course for the Mint. This yellow-gold Gem reveals more vivid shades of yellow about the portrait and rims. The minimally abraded fields are largely smooth, and marks are well-distributed with no distracting concentrations. NGC ID# 26F5, PCGS# 9141

---

**1907 Arabic Numerals Double Eagle, MS65  
First Year of Issue**

- 7744** 1907 Arabic Numerals MS65 PCGS. Augustus Saint-Gaudens' masterpiece, an icon of American coinage design, first appeared in 1907 and was issued in multiple formats in that year. The present coin, the Arabic Numerals type, is the most collectible of the 1907 emissions. The obverse orange-gold center evolves to yellow at Liberty's breast and the right rim, while the reverse exhibits alternating yellow and orange. This Gem example would be a notable start to a gold type set. NGC ID# 26F5, PCGS# 9141

---

**1907 Saint-Gaudens Twenty, MS65  
Arabic Numerals**

- 7745** 1907 Arabic Numerals MS65 PCGS. Vibrantly lustrous, apricot-gold margins encroach upon lilac, rose, and mint-gold centers. Liberty's knee is softly defined, as usual, though the design elements are otherwise sharply struck. Light contact on the figure of Liberty appears to be the only surface flaw precluding an even finer grade. NGC ID# 26F5, PCGS# 9141

---

**1907 Saint-Gaudens Twenty, MS65  
CAC-Approved in Old Green Holder**

- 7746 1907 Arabic Numerals MS65 PCGS. CAC.** While the “low relief” or Arabic Numerals version of the Saint-Gaudens double eagle might have been a step down from the High Relief coins struck earlier that year, it was still an artistic step up from the Longacre design it replaced. This Gem, bright yellow with occasional coppery accents and few distractions, has two green labels, one inside the PCGS holder and another on the outside from CAC. NGC ID# 26F5, PCGS# 9141

---

**1907 Arabic Numerals Twenty, MS66  
Conditionally Rare Any Better**

- 7747 1907 Arabic Numerals MS66 PCGS.** The first Arabic Numerals or “low relief” double eagle issues came in 1907. While a number of examples were saved overseas and the 1907 Philadelphia issue is available for a price even in MS66, PCGS has graded just 17 coins finer (11/14). This Premium Gem has vibrant apricot-gold luster with a deeper orange “sky” above the eagle.

*From The A. James Evans Collection, Part II.* NGC ID# 26F5, PCGS# 9141

- 7748 1908 No Motto MS65 PCGS.** A delightful Gem example of the short-lived No Motto design, with sharply detailed design elements and vibrant mint luster on both sides. The well-preserved orange-gold surfaces add to the outstanding eye appeal. NGC ID# 26F6, PCGS# 9142

- 7749 1908 No Motto MS65+ PCGS.** An exceptionally attractive example of this brief two-year subtype, lacking the motto IN GOD WE TRUST on the reverse. Vibrant luster and rich apricot-gold toning are noted, along with clean surfaces that exhibit few marks, all of which are trivial in nature. NGC ID# 26F6, PCGS# 9142

---

**1908 No Motto Saint, MS67  
Outstanding Visual Appeal**

- 7750 1908 No Motto MS67 PCGS.** Double eagles are a visually impressive denomination, large coins whose gold color and content convey substantial value. The tactile sense of heft adds to the appeal, and when combined with superior technical grade, the experience is indelible. This Superb Gem hosts virtually perfect surfaces and saffron-gold toning throughout. The strike is no less convincing, articulating even the individual pillars of the Capitol. Population: 69 in 67 (2 in 67+), 2 finer (12/14). NGC ID# 26F6, PCGS# 9142

- 7751 1908 No Motto, Wells Fargo Nevada MS66 PCGS.** This impressive Premium Gem was struck early in the year, before the design was changed to include the motto IN GOD WE TRUST. The well-preserved yellow-gold surfaces are brightly lustrous and show a few highlights of rose. PCGS# 99142

- 7752 1908 No Motto, Wells Fargo Nevada MS66 NGC.** The hoard largely responsible for the No Motto twenties being collectible in high grades gave the world this Premium Gem. Brightly lustrous surfaces shift from apricot to pale yellow. PCGS# 99142

- 7753 1908 No Motto, Wells Fargo Nevada MS66 NGC.** Radiant luster issues from the yellow-gold surfaces of this lovely Premium Gem. Additionally, the design elements are razor-sharp. An impeccably preserved specimen. PCGS# 99142

---

**1908 No Motto Twenty, MS66+  
From the Wells Fargo Hoard**

- 7754 1908 No Motto, Wells Fargo Nevada MS66+ PCGS Secure.** Pedigreed to the famous Wells Fargo Hoard, and exhibiting the exceptional preservation and quality that is characteristic of so many of those coins. This Plus-graded Premium Gem is richly frosted in warm honey and pale rose-gold hues, with well-defined motifs and no mentionable surface flaws. PCGS# 99142

**1908 No Motto Twenty, MS67  
Ex: Wells Fargo Nevada Hoard**

**7755 1908 No Motto, Wells Fargo Nevada MS67 PCGS.** Numismatics never fails to surprise, and the discovery of nearly 20,000 double eagles in a Wells Fargo vault made headlines in the 1990s. Unlike many bank hoards subject to rough handling, these coins were largely undisturbed, and today PCGS counts an extraordinary ten coins at the lofty MS69 level. Although Wells Fargo Superb Gems are not especially difficult to find, there are no less beautiful representations of the type. Yellow-gold blankets the pristine surfaces of this lustrous twenty, with lemon highlights in the left and right fields. The unmarred reverse completes the package of one of America's most beautiful type coins. PCGS# 99142

**7756 1908-D No Motto MS64 PCGS.** The only mintmarked No Motto double eagle issue, seen here as a near-Gem with semi-satin yellow-to-orange surfaces. Decently detailed. NGC ID# 26F7, PCGS# 9143

**1908 With Motto Double Eagle, MS64  
Scarce Any Finer**

**7757 1908 Motto MS64 PCGS.** Augustus Saint-Gaudens' 1907 reinterpretation of Liberty and the American eagle resulted in the creation of one of the most popular coinage types in the United States series. The Mint modified the design in 1908 to include the motto IN GOD WE TRUST at the base of the reverse rays. The orange-gold obverse color of this example leads toward shades of yellow at the rim, while the reverse intermixes yellow and orange throughout. PCGS reports 76 coins numerically finer (12/14). NGC ID# 26F8, PCGS# 9147

**7758 1908 Motto MS64 PCGS.** An impressive lemon-yellow double eagle, this Choice Mint State piece has frosty luster, sharp details, and minimal surface marks. This scarce issue is known to the extent of just 77 finer PCGS certified examples. NGC ID# 26F8, PCGS# 9147

**1908 With Motto Twenty, Well-Struck MS64**

**7759 1908 Motto MS64 PCGS.** Light contact on the high points of the figure of Liberty appear to be all that limit this lovely Choice example from a full Gem grade. Radiant, satiny luster illuminates deep orange-gold patina on each side, and the design elements are sharply brought up. Numerically finer pieces are scarce. NGC ID# 26F8, PCGS# 9147

**7760 1908-D Motto MS64 NGC.** The honey-gold surfaces of this near-Gem exhibit well-struck design elements. The luster is strong and just a few minor marks limit the grade. NGC ID# 26F9, PCGS# 9148

**1908-D Motto Twenty, MS65  
Rare in Finer Grades**

**7761 1908-D Motto MS65 PCGS. CAC.** The first Denver issue of the With Motto type is elusive any finer than this Gem, a bright beauty with streaks of golden-orange framing the hair and occasional coppery accents elsewhere. The reverse die was rotated approximately 30 degrees clockwise from coin turn. PCGS has certified 32 examples as MS66 or better (11/14). NGC ID# 26F9, PCGS# 9148

**1908-D Saint-Gaudens Twenty, MS66  
First-Year With Motto**

**7762 1908-D Motto MS66 PCGS.** The 1908-D Saint-Gaudens double eagle claims a mintage of 349,500 pieces, but examples are rare at the MS66 grade level, and finer specimens are virtually unobtainable. Representing the first year of the Motto design, the 1908-D is a popular coin with mintmark type collectors.

The present coin is a delightful Premium Gem, with pinpoint definition on all design elements and bright orange-gold surfaces that radiate vibrant mint luster on both sides. Close inspection with a loupe reveals no mentionable distractions and eye appeal is terrific. Population: 28 in 66 (2 in 66+), 4 finer (12/14). NGC ID# 26F9, PCGS# 9148

**1908-S Twenty Dollar, AU58  
Low-Mintage Favorite**

**7763 1908-S AU58 PCGS. CAC.** The low mintage 1908-S is a favorite among gold coin collectors. Most examples lack unbroken mint luster, but the cartwheel sheen is nearly complete on the present piece. The eagle's breast and Liberty's knee betray slight friction. No marks of any consequence are present, and the eye appeal is superior for the grade.

Ex: Fort Worth Signature (Heritage, 3/2010), lot 2750. NGC ID# 26FA, PCGS# 9149

**1909 Double Eagle, MS64  
Rarely Seen Finer**

**7764 1909 MS64 PCGS.** An important condition rarity among Philadelphia Mint Saint-Gaudens issues. Relatively few Mint State survivors exist, and the vast majority of those are lackluster, heavily abraded pieces that often come weakly struck. This piece exhibits a warm, satiny glow, and only a few minor blemishes on the obverse keep the grade below Gem status. Population: 237 in 64 (4 in 64+), 25 finer (12/14).

Ex: ANA Signature (Heritage, 7/2005), lot 7826. NGC ID# 26FB, PCGS# 9150

**1909 Double Eagle, Sharply Struck MS64  
Infrequently Seen Any Finer**

**7765 1909 MS64 PCGS.** Very few 1909 double eagles can be located above the near-Gem level as the two major services have seen fewer than 35 examples numerically finer (11/14). Frosty yellow-gold luster cascades over the yellow-gold surfaces of this sharply struck twenty. A few small marks determine the grade, the most noticeable being a couple of grazes below the eagle's beak. NGC ID# 26FB, PCGS# 9150

**7766 1909-D AU58 PCGS.** An attractive brassy-gold example with bold design details and lightly abraded surfaces that retain noteworthy amounts of original mint luster. This issue is a scarcer Saint-Gaudens double eagle date from the Denver mint, with a low mintage of just 52,500 pieces. NGC ID# 26FD, PCGS# 9152

**7767 1909-D AU58 PCGS.** Well-struck with lightly worn devices and two or three noticeable abrasions on the obverse, obtained during brief circulation. Pleasing honey-tan coloration and substantial mint luster bolster the eye appeal of the piece. NGC ID# 26FD, PCGS# 9152

---

**1909-D Twenty Dollar, MS63  
Low-Mintage Branch Mint Issue**

**7768 1909-D MS63 PCGS Secure.** Deep orange-gold coloration allows for only small areas of lilac and green-gold on each side, with vibrant, satiny underlying luster. The design elements are well brought up, and grade-limiting abrasions are light and uniformly dispersed over each side. With a low mintage of only 52,500 coins, this early Denver issue is understandably elusive in Mint State. NGC ID# 26FD, PCGS# 9152

**7769 1909-S MS64 PCGS.** The mintmark is lightly repunched, and shows two sets of serifs. The RPM variety is not to be confused with the more dramatic FS-501. A lustrous apricot-gold near-Gem. A minor alloy spot is noted beneath the stem of Liberty's branch. NGC ID# 26FE, PCGS# 9153

**7770 1909-S MS64+ NGC.** Honey and rose-gold hues blend together over both sides of this Plus-designated Choice Mint State example. The design elements are sharply impressed, and the surfaces are free of any major abrasions. This issue is readily available in Uncirculated condition, but the certified population declines sharply above the MS64 level. NGC ID# 26FE, PCGS# 9153

---

**1909-S Twenty, MS65  
Rare in Finer Grades**

**7771 1909-S MS65 PCGS.** This is a frosty example with lustrous yellow-gold surfaces and sharp design elements. It is a common date issue, but is seldom found in Gem quality, and rarely seen finer. PCGS has only encapsulated 11 numerically finer representatives (12/14).  
*Ex: Palm Beach Signature (Heritage, 3/2005), lot 7436.* NGC ID# 26FE, PCGS# 9153

**7772 1910 MS64 PCGS. CAC.** A sun-gold Choice Saint-Gaudens type coin with dynamic luster and a bold strike. Close evaluation locates only scattered minor abrasions. Encapsulated in an old green label holder. NGC ID# 26FE, PCGS# 9154

**7773 1910-D MS65 PCGS.** Orange, lilac, and mint hues all appear in the patina on this lustrous Gem 1910-D, one of the popular early mintmarked series issues that can be found at such a grade while remaining relatively affordable. A few light field marks constitute the grade, but this piece boasts the sharp strike and good eye appeal the issue is justly renowned for. NGC ID# 26FG, PCGS# 9155

---

**1910-D Double Eagle, Sharply Struck MS66  
Nearly Unobtainable Any Finer**

**7774 1910-D MS66 PCGS.** Several thousand certified pieces makes the 1910-D double eagle readily obtainable through MS65. The population declines significantly in Premium Gem, and higher-grade specimens are nearly impossible to locate. This MS66 example displays peach-gold surfaces imbued with traces of mint-green. Pleasing luster, sharply struck devices, and impeccable preservation round out the coin's pleasing eye appeal. PCGS has seen two coins finer (12/14). NGC ID# 26FG, PCGS# 9155

---

**1910-D Double Eagle, MS66  
Vibrant Luster**

**7775 1910-D MS66 NGC. CAC.** The 1910-D double eagle has the lowest mintage of any 1910 twenty dollar issue, yet it is the most accessible among them in better Mint State grades. Said availability stops at the Premium Gem level, however, as the combined certified population lists just four MS67 and better pieces for the 1910-D (11/14). This MS66 example has shimmering straw-gold luster and generous eye appeal for the grade. NGC ID# 26FG, PCGS# 9155

**1911 Saint-Gaudens Twenty, MS65  
Rarely Seen Finer**

**7776 1911 MS65 PCGS.** From a nominal mintage of 197,250 pieces, the 1911 Saint-Gaudens double eagle is an underrated date in the early Philadelphia series, especially in high-grade. Most examples seen grade no better than MS63, with attractive MS65 examples, like the present coin, very scarce. Finer examples are condition rarities.

The coin offered here is a spectacular Gem, with sharply detailed design elements throughout. The well-preserved yellow and orange-gold surfaces radiate vibrant mint luster and show a few highlights of rose. Eye appeal is outstanding. Population: 43 in 65 (1 in 65+), 11 finer (11/14). NGC ID# 26FJ, PCGS# 9157

**1911 Double Eagle, Exceptional MS65  
Remarkably Clean Surfaces**

**7777 1911 MS65 NGC.** Most Mint State 1911 double eagles seen by NGC and PCGS grade MS60 to MS64. The population drops to less than 100 pieces in MS65, and fewer than 30 examples grade numerically finer. The present MS65 offering is well above average for the issue in terms of luster and surfaces. Both sides are awash with frosty yellow-gold luster imbued with hints of light green, and each side is remarkably clean. Additionally, the design elements are sharply struck, including Liberty's facial features, the fingers on both hands, the panes and pillars in the Capitol building, and the eagle's plumage. These attributes add up to highly appealing eye appeal. It is our opinion that this piece may well be deserving of the CAC sticker. Census: 48 in 65 (1 in 65+, 1 in 65 ★), 15 finer (11/14). NGC ID# 26FJ, PCGS# 9157

**7778 1911-D MS65 PCGS.** Well-defined and intensely lustrous, this pleasing Gem also displays lovely reddish-gold toning and clean surfaces. The only readily available gold issue of the year, from the Denver mint.  
*From The Rawlin "Mac" McNelly Collection.* NGC ID# 26FK, PCGS# 9158

---

**1911-D Double Eagle, Well-Defined MS66**

**7779 1911-D MS66 PCGS.** The 1911-D double eagle is a plentiful issue through MS65, and even MS66 pieces are obtainable without too much trouble. The date is a condition rarity any finer; the two major services have graded 44 MS67s and none are numerically higher. Frosty luster resides on the orange-gold surfaces of this Premium Gem offering, and the design elements are sharply defined, including Liberty's fingers on both hands, the facial features, the Capitol building, and the eagle's feathers. No significant marks detract from the coin's overall very pleasing eye appeal. NGC ID# 26FK, PCGS# 9158

---

**1911-S Double Eagle, MS65  
Rare Any Finer**

**7780 1911-S MS65 PCGS. CAC.** With a solid mintage of 775,750 pieces and many representatives saved in overseas hoards, the 1911-S double eagle is readily available in most grades. At the MS65 level, though, that availability becomes "for a price" as anything finer is a rarity; PCGS has graded just 32 pieces as MS66 or better (11/14). This Gem has bright luster and a mixture of pale yellow and bolder orange hues. A few light marks cannot keep it from being a quality coin for the grade. NGC ID# 26FL, PCGS# 9159

---

**1912 Double Eagle, MS64  
Date Set Essential**

**7781 1912 MS64 PCGS. CAC.** Only the Philadelphia Mint struck double eagles in 1912, making an example of this issue essential for a complete date set of Saint-Gaudens twenties. This Choice representative is awash in satiny green-gold and honey hues, with well-struck design elements and minimal abrasions. Only 43 coins are numerically finer at PCGS (12/14). NGC ID# 26FM, PCGS# 9160

---

**1912 Double Eagle, MS64  
Scarce in Better Grades**

**7782 1912 MS64 NGC. CAC.** Only Philadelphia struck double eagles in 1912, and its output amounted to just 149,750 business strikes plus the usual small number of proofs. Examples are available for a price through MS64, though anything finer is very scarce. This near-Gem has lively luster and light color with delicate rose-lavender accents. NGC has graded just 20 pieces as MS65 or better (11/14). NGC ID# 26FM, PCGS# 9160

---

**1913 Twenty Dollar, MS64  
Scarcer Philadelphia Issue**

**7783 1913 MS64 PCGS.** A slightly better date in regards to Philadelphia issues, the 1913 Saint-Gaudens double eagle is marginally scarce in Choice condition and is genuinely rare any finer. This MS64 coin is limited technically only by light, scattered luster grazes, while the surfaces exhibit vibrant, honey-gold mint bloom and sharply struck devices. PCGS has only seen 12 numerically finer representatives (12/14). NGC ID# 26FN, PCGS# 9161

---

### 1913 Double Eagle, Lustrous MS64+

**7784 1913 MS64+ PCGS. CAC.** The 1913 double eagle is available through the near-Gem level of preservation. Gems, however, are significant condition rarities; to date (10/14), PCGS and NGC have graded only 30 MS65s and a solitary coin finer (NGC MS66). Bright orange-gold luster reaches out to the observer of this high-end near Gem, and the design features are well-impressed, including most of the panes and pillars of the Capitol building. A few scattered minuscule marks prevent Gem classification, but do not impact the coin's above-average eye appeal. NGC ID# 26FN, PCGS# 9161

**7785 1913-D MS64 PCGS.** The 1913-D Saint-Gaudens double eagle is scarce in grades above the Choice level. This attractive MS64 example displays lustrous orange-gold surfaces and sharply detailed design elements, with outstanding eye appeal. NGC ID# 26FP, PCGS# 9162

---

### 1913-D Double Eagle, MS65 Rare in Better Grades

**7786 1913-D MS65 NGC.** A bright and beautiful Denver Gem from just before the First World War, decently if not fully struck with bright apricot-gold luster that shows a tiny alloy spot just below the base of the torch. Though available for a price even at the Gem level, the 1913-D is a stark condition rarity any finer; NGC has certified just 12 such pieces (11/14). NGC ID# 26FP, PCGS# 9162

---

### 1913-D Double Eagle, MS65 Exceptionally Challenging Any Finer

**7787 1913-D MS65 PCGS.** This yellow-gold Uncirculated Gem exhibits intense rim toning, with deeper shades of yellow located about the borders on both sides. Liberty's knees, a perpetual problem in the Saint series, are pleasingly clean for the grade. The 1913-D can be found at the Gem level but becomes quite difficult any finer. PCGS reports three pieces in MS65+ with five finer (12/14). NGC ID# 26FP, PCGS# 9162

---

### 1913-D Twenty Dollar, MS65 Radiant Mint Bloom

**7788 1913-D MS65 PCGS.** Contrary to its Philadelphia and San Francisco counterparts, the 1913-D double eagle is collectible in Gem condition, and is also quite eye-appealing at this level. The present coin is vibrantly lustrous, with a blend of warm honey and apricot-gold hues over frosty surfaces. The strike is sharp and there are no abrasions of note. Only five coins are numerically finer at PCGS (12/14). NGC ID# 26FP, PCGS# 9162

**7789 1913-S AU58 PCGS.** The bronze-gold surfaces reveal bold strike definition, with some softness noted on the upper torch, torch hand, and Capitol building. Still quite lustrous, this near-Mint example displays relatively few surface marks, and only slight high-point friction. From the second-lowest mintage in the series, a mere 34,000 pieces. NGC ID# 26FR, PCGS# 9163

---

**1913-S Saint-Gaudens Twenty  
Appealing MS62 Example**

- 7790 1913-S MS62 PCGS.** A slightly better branch mint issue, seldom found in pleasing Mint State condition. This MS62 coin is unusually attractive for the grade, showing frosty wheat-gold luster with rose highlights and sharp design elements. Light, scattered abrasions contribute to the PCGS assessment, but none are individually detracting. NGC ID# 26FR, PCGS# 9163

---

**1913-S Twenty, MS64  
Rarely Found in Better Grades**

- 7791 1913-S MS64 PCGS.** A scant mintage of just 34,000 coins sparks intense collector interest in the 1913-S Saint-Gaudens double eagle, and the issue is also appropriately difficult to locate in high grade. This Choice representative is satiny with straw-gold luster and well-defined motifs. Light, scattered abrasions contribute to the grade. PCGS has certified only 24 numerically finer examples (12/14). NGC ID# 26FR, PCGS# 9163

---

**1913-S Double Eagle, MS64  
Upper-End for the Grade**

- 7792 1913-S MS64 PCGS Secure.** This beautiful Choice representative is unusually appealing compared to other so-graded examples of this date, showing smooth, satiny luster and remarkably few surface imperfections. The strike is sharp and the honey-gold surfaces deliver pleasing eye appeal. Just 24 numerically finer representatives of this better San Francisco issue are certified by PCGS (12/14). NGC ID# 26FR, PCGS# 9163

---

**1913-S Double Eagle, Lustrous MS64+**

- 7793 1913-S MS64+ PCGS.** The 1913-S has long been a collector favorite in the Saint-Gaudens double eagle series because of its low mintage of 34,000 pieces, the third lowest in the series, trailing the 1908-S and the High Relief among the regular issues. Near-Gem is likely to be the finest most collectors will encounter as the date is rare any finer.

Intense luster cascades over the orange-gold surfaces and the design elements are well-impressed. Occasional light ticks are fewer and less severe than usually seen on this highly abraded issue. A couple of alloy spots (often seen on this date) are visible above Liberty's right (facing) shoulder. NGC ID# 26FR, PCGS# 9163

---

**1913-S Double Eagle, MS64  
Rare in Finer Grades**

- 7794 1913-S MS64 PCGS. CAC.** Despite a mintage of just 34,000 pieces, the 1913-S twenty remains available for a price up to MS64 condition, though it becomes rare any finer. This attractive, CAC-labeled near-Gem has pale, shimmering luster and less-than-usual softness in areas such as Liberty's torch. PCGS has graded 24 finer examples (11/14). NGC ID# 26FR, PCGS# 9163

---

**1913-S Saint-Gaudens Double Eagle, MS64+  
Appealing, Low-Population S-Mint Issue**

**7795 1913-S MS64+ PCGS. CAC.** Even gold toning blankets this near-Gem Saint-Gaudens twenty. Marbled luster dominates the texture throughout, with traces of copper color among the lower obverse stars. Liberty's torch reveals a small depression adjacent to the base, and there is a thin scratch underneath Liberty's outstretched arm to the right. The central feathers of the reverse conceal a pair of light, diagonal lines. Several letters in UNITED exhibit slight indentation. This is a challenging coin in MS64+ and will draw considerable bidder interest. The 1913-S enjoys the second lowest mintage in the series among the normal relief issues (only the 1908-S is less), and survivors at this grade level are rare. Population: 13 in 64+, 24 finer (12/14). NGC ID# 26FR, PCGS# 9163

---

**1913-S Twenty Dollar, MS64+  
High-End and Appealing**

**7796 1913-S MS64+ PCGS. CAC.** When it comes to low-mintage dates like the 1913-S double eagle, which had a mintage of only 34,000 coins, the collector can expect a significant drop in availability between the MS64 and MS65 grades, as well as a proportionate climb in value. This has no doubt skewed the certified population reports for Choice examples, and makes high-end representatives all the more alluring to the specialist. This Plus-graded coin combines the immense quality and eye appeal of a near-Gem with the affordability of a high-end Choice example, ideal for the quality conscious collector on a budget. The strike is sharp, and the warm wheat-gold surfaces are vibrant with fresh mint frost. Only a few light luster grazes on the figure of Liberty limit the numeric grade. PCGS has seen only 24 numerically finer submissions (12/14). NGC ID# 26FR, PCGS# 9163

---

### 1914 Double Eagle, Sharp MS64

- 7797 1914 MS64 PCGS.** The 1914 double eagle can be obtained in near-Gem with a bit of effort. That said, the present MS64 is particularly sharp for the grade. The design elements are crisply defined, including Liberty's facial features and fingers, the panes in the Capitol building, and the eagle's plumage. Additionally, soft yellow- and greenish-gold patina rests on the highly lustrous surfaces. Some scattered ticks preclude Gem classification. PCGS has seen only 40 coins finer (11/14). NGC ID# 26FS, PCGS# 9164

---

### 1914 Double Eagle, MS64+ Elusive Any Finer

- 7798 1914 MS64+ PCGS.** The 1914 double eagle can be found with little trouble through MS63, and even near-Gems are available with a degree of searching. The yellow- and orange-gold surfaces of this MS64+ specimen display well-struck design features and are devoid of significant marks. This issue is elusive any finer where PCGS and NGC have graded fewer than 70 pieces (11/14). NGC ID# 26FS, PCGS# 9164

---

### 1914 Double Eagle, MS64 Five-Figure Mintage

- 7799 1914 MS64 PCGS. CAC.** In the year of the first World War's outbreak, the Philadelphia Mint had a limited mintage of double eagles, not reaching the six-figure mark. This near-Gem representative is well-placed, as the issue becomes decidedly challenging at the Select level and Gem coins are genuinely rare; PCGS has graded just 40 pieces as MS65 or better (11/14). Wheat-gold surfaces have generous luster and aspects of richer hue in the fields near Liberty's head and arms. NGC ID# 26FS, PCGS# 9164

- 7800 1914-S MS65 PCGS. CAC.** Peach-gold surfaces emit radiant luster and possess sharply struck design elements. Both sides are minimally marked. Deserving of the CAC label. NGC ID# 26FU, PCGS# 9166

- 7801 1915 MS63 PCGS.** The vivid orange-gold surfaces of this attractive Select specimen show a few minor contact marks and highlights of red on both sides. The design elements are sharply detailed and the surfaces are brightly lustrous. NGC ID# 26FV, PCGS# 9167

---

### 1915 Twenty Dollar, MS64 Pleasing Eye Appeal

- 7802 1915 MS64 PCGS.** Most mint condition 1915 double eagles fall into the MS62 to MS63 range. The population declines somewhat in MS64 and drops more significantly any finer. A combination of sharply struck devices, strong luster, and minimally abraded yellow-gold surfaces yields pleasing eye appeal on this near-Gem offering. PCGS has graded fewer than 50 pieces finer (11/14). NGC ID# 26FV, PCGS# 9167

---

### 1915 Double Eagle, MS64 Mintage 152,000 Pieces

- 7803 1915 MS64 NGC. CAC.** The 1915 double eagles were the last struck at Philadelphia before the United States entered World War I. Due to contemporary Atlantic naval warfare, examples were less likely to reach European vaults and thus be saved from the gold destruction of subsequent decades. This MS64 piece has ample luster and above-average detail on its pale golden surfaces. NGC has graded just 42 pieces as MS65 or better (11/14). NGC ID# 26FV, PCGS# 9167

- 7804 1915-S MS65 PCGS.** This attractive Gem offers sharply detailed design elements and vibrant mint luster throughout. The vivid orange-gold surfaces show only minor signs of contact, with exceptional eye appeal. NGC ID# 26FW, PCGS# 9168

---

**1915-S Double Eagle, Sharply Delineated MS66  
Outstanding Eye Appeal**

**7805 1915-S MS66 NGC.** Several overseas hoards elevated the grade distribution of 1915-S double eagles, making the issue readily obtainable through the Gem level. The population drops significantly in Premium Gem, but even these can be located with patient searching. Moreover, MS66 is the highest collectible grade as only a solitary piece has been graded finer, an NGC MS67 (11/14)!

Razor-sharp detail is apparent on the design elements, including Liberty's face and fingers on both hands, the panes and pillars of the Capitol building, and the eagle's plumage. Radiant luster and impeccably preserved peach-gold surfaces round out the coin's outstanding eye appeal. NGC ID# 26FW, PCGS# 9168

---

**1916-S Double Eagle, MS66  
Highest Numeric Grade at PCGS**

**7806 1916-S MS66 PCGS.** Remarkably preserved for a 1916-S Saint, an issue that can be located without too much difficulty even in MS65 condition, but rarely exceeds that level. Both sides are tinted a lovely golden-orange and boast an impeccable, satiny sheen. Just a few trivial marks are noticed on each side of the coin. PCGS has graded no examples in higher numeric grades (11/14).

Ex: *FUN Signature* (Heritage, 1/2006), lot 5997; *Pittsburgh Signature* (Heritage, 10/2011), lot 5255. NGC ID# 26FX, PCGS# 9169

---

**1920 Double Eagle, MS64  
Only One Numerically Finer at PCGS**

**7807 1920 MS64 PCGS.** The 1920 double eagle is deceptively available in MS64 condition, as it is suddenly prohibitively rare in MS65. This frosty, Choice example is well-struck, with radiant wheat-gold luster. A few minor marks on the devices limit the grade, but hardly impact the eye appeal. Only a single coin is numerically finer at PCGS (12/14). NGC ID# 26FY, PCGS# 9170

---

**1920 Double Eagle, Sharply Struck MS64**

**7808 1920 MS64 PCGS.** Much of the relatively low mintage slightly exceeding 228,000 pieces of the 1920 double eagle escaped the melting pot and was saved by contemporary collectors, as thousands are extant through MS63. The population drops markedly in MS64, but even these can be acquired. Numerically finer coins are excessively rare, however. The lustrous yellow-gold surfaces of this near-Gem exhibit sharply struck devices, including Liberty's fingers and head and the Capitol building. NGC ID# 26FY, PCGS# 9170

---

**1920 Double Eagle, Sharply Struck MS64**

**7809 1920 MS64 PCGS.** This near-Gem is the finest 1920 double eagle that collectors can hope to locate. PCGS has graded only one finer and NGC seven better (11/14). Sharply struck throughout — the strongest evidence seen by the detail in the panes of the Capitol building and the eagle's feathers. Lustrous yellow-gold surfaces are minimally marked.

Ex: *Fort Worth Signature* (Heritage, 3/2010), lot 2802. NGC ID# 26FY, PCGS# 9170

---

**1920 Saint-Gaudens Double Eagle, MS64  
Almost Unobtainable Any Finer**

**7810 1920 MS64 PCGS.** The 1920 double eagle is one the lower mintage issues in the Saint-Gaudens series but typically trades at the type coin level. Yellow-gold evolves to orange at the lower portion of the obverse and again at the upper portion of the reverse. The rays reveal an arcing band of marks above IN GOD of the motto. This appealing, better-date double eagle nicely showcases one of America's most admired coinage designs. NGC ID# 26FY, PCGS# 9170

---

**1920 Twenty Dollar, MS64  
Eye-Catching Luster**

- 7811 1920 MS64 PCGS. CAC.** The 1920 Saint-Gaudens double eagle is obtainable in grades through MS64, but finer pieces are prohibitively rare. This example is sharply struck with satiny, orange-gold luster. Light, scattered ticks preclude a full Gem grade, but none are individually detracting. PCGS has certified only a single numerically finer representative (11/14). NGC ID# 26FY, PCGS# 9170

---

**1920 Double Eagle, MS64  
Just One Finer at PCGS**

- 7812 1920 MS64 PCGS. CAC.** The compound economic traumas of World War I and the subsequent financial depression as the United States shifted off a war footing suppressed non-commemorative gold coinage for a time. The double eagle's "comeback" year of 1920 saw 228,250 pieces struck at Philadelphia, and while near-Gems are available for a price, PCGS has graded only one coin as MS65 or better (11/14). This MS64 piece is primarily wheat-gold with attractive luster and a small coppery area on the reverse's sun disk. Ex: *Long Beach Signature* (Heritage, 5/2008), lot 3765. NGC ID# 26FY, PCGS# 9170

---

**1922 Double Eagle, MS65  
Smooth, Satiny Luster**

- 7813 1922 MS65 NGC.** Another Philadelphia issue that is available in Gem and lower grades, but prohibitively rare any finer. This example is attractively sharp throughout, with frosty honey-gold luster that illuminates delicately preserved surfaces. NGC has only seen eight numerically finer representatives (12/14). NGC ID# 26G3, PCGS# 9173

---

**1922 Double Eagle, MS65  
Very Rare Any Better**

- 7814 1922 MS65 NGC.** The 1922 double eagle is available for a price through the Gem level, though anything finer is very rare. This MS65 beauty has shimmering apricot-gold luster with hints of lighter wheat and deeper peach visiting the margins. Well-defined overall, though the torch hand is a trifle soft. NGC ID# 26G3, PCGS# 9173

---

**Gem 1922 Double Eagle  
Rare Any Finer**

- 7815 1922 MS65 NGC.** This issue is one of the most plentiful dates in the Saint-Gaudens double eagle series, with more than 93,000 pieces certified by NGC and PCGS. Pleasing luster emanates from the greenish-gold and golden-tan, minimally abraded surfaces of the current MS65 offering. The design features are well-defined. Rare any finer with only 16 examples seen by the two services (11/14). NGC ID# 26G3, PCGS# 9173

---

**1922 Saint-Gaudens Double Eagle, MS65  
Especially Smooth Surfaces**

- 7816 1922 MS65 PCGS.** Unblemished surfaces highlight this Gem Saint. The obverse is a warm, golden color with traces of pink and yellow in the date and stars. The reverse fields are similarly unmarred, with a lighter center giving way to orange-gold at the eagle's head and wing tips. PCGS notes only eight examples in MS65+ and eight in MS66 (12/14). NGC ID# 26G3, PCGS# 9173

- 7817 1922-S AU58 PCGS.** This high-mintage issue suffered considerably in the mass meltings of gold coinage in the 1930s, but several thousand coins have found their way home from Europe and South America in recent decades. Rich luster and lovely light toning elevate the eye appeal of this near-Mint coin. A modestly abraded, lightly worn example of this once-rare issue. NGC ID# 26G4, PCGS# 9174

**7818 1922-S MS61 PCGS.** Dynamic mint luster and lovely honey-gold and rose toning endow this Mint State example with considerable eye appeal. A moderate number of small to medium-sized abrasions are found on each side of the coin. NGC ID# 26G4, PCGS# 9174

**1922-S Twenty, Lustrous MS62  
Attractive Semikey Issue**

**7819 1922-S MS62 NGC.** This 1922-S twenty is in a typical grade for certified survivors of this issue, which saw enormous meltings in the 1930s. Attractive peach-gold color and generous mint luster show on surfaces that also display scattered light marks, mostly removed from the prime focal areas. An attractive semikey issue in this popular series. NGC ID# 26G4, PCGS# 9174

**1922-S Twenty Dollar, MS63  
One of the Few S-Mints Obtainable From the 1920s**

**7820 1922-S MS63 PCGS.** Pleasing luster radiates from the surfaces of this MS63 double eagle. There is a patch of marks about the branch stem, and a few hidden hits within Liberty's gown, adjacent to the left (facing) knee. The smooth reverse fields with minimal abrasions are, on their own, worthy of consideration at a higher grade level. NGC ID# 26G4, PCGS# 9174

**1922-S Double Eagle, MS64  
Rare Any Finer**

**7821 1922-S MS64 PCGS.** Near-Gem is the finest grade that will likely be encountered; Gem and finer examples are a condition rarity with only about 30 or so coins certified by PCGS and NGC. Most of the 2.6 million-piece mintage of 1922-S double eagles were melted in the 1930s. Yellow-gold surfaces display pleasing luster and are well-defined. A few minute marks determine the grade. NGC ID# 26G4, PCGS# 9174

**1922-S Double Eagle, MS64  
Rare in Finer Grades**

**7822 1922-S MS64 PCGS.** The 1922-S double eagle, struck as the United States was emerging from the post-World War I economic downturn, is available for a price as a near-Gem but a rarity just one point finer. This MS64 piece has a significant apricot-gold cast and scattered pink elements in the fields. PCGS has certified just 16 numerically better examples (11/14). NGC ID# 26G4, PCGS# 9174

**1922-S Twenty Dollar, MS64  
Rare in Finer Grades**

**7823 1922-S MS64 PCGS. CAC.** Near-Gem is the limit for most collectors seeking a 1922-S double eagle, as PCGS has graded only 16 examples as MS65 or better (11/14). This MS64 piece with CAC green label has above-average detail and vibrant luster with a mix of pale yellow, richer gold, and occasional coppery variations across each side. NGC ID# 26G4, PCGS# 9174

**1923 Twenty Dollar, Vibrant MS65**

**7824 1923 MS65 NGC.** Retrieval from overseas hoards has kept the 1923 double eagle in the common-date status. Gem is the highest grade that is likely to be encountered, and these will require a degree of searching. Finer specimens are essentially out of reach with just three MS66s certified, all by PCGS. Orange and soft green vibrant luster radiates from the well-struck surfaces that have been nicely cared for. NGC ID# 26G5, PCGS# 9175

**7825 1924 MS66+ PCGS.** The 1924 double eagle is a defining type issue, and this MS66+ example has eye appeal in spades. Pale yellow surfaces are smooth and delightful. PCGS has graded just 88 numerically finer examples (12/14). NGC ID# 26G7, PCGS# 9177

**7826 1924 MS66+ NGC.** Hints of orange toning appear on the brilliant yellow surfaces of this frosty Premium Gem. The design motifs are sharp and the eye appeal is exceptional. This is an ideal type coin for the connoisseur. NGC ID# 26G7, PCGS# 9177

---

**1924 Double Eagle, Conditionally Challenging MS67**

- 7827 1924 MS67 NGC.** Staggering numbers of 1924 double eagles have been certified, with more than 300,000 by NGC alone! The issue does not become challenging until the MS67 level and anything finer is exceedingly rare. The orange-gold surfaces of this Superb Gem yield intense luster and exhibit sharply struck devices. Both sides are impeccably preserved. NGC ID# 26G7, PCGS# 9177

---

**1924 Double Eagle, MS67  
Ideal for Type**

- 7828 1924 MS67 NGC.** Superb Gem condition is the grade level at which the 1924 Saint-Gaudens double eagle finally becomes elusive, but these pieces are also the most sought-after for type purposes. This example is beautifully frosted in warm straw-gold luster, with sharp design elements and delicately preserved surfaces. Only two coins are numerically finer at NGC (12/14). NGC ID# 26G7, PCGS# 9177

- 
- 7829 1924-S — Cleaning — PCGS Genuine. Unc Details.** An attractive survivor of this scarce issue, despite improper cleaning, with bright peach-gold and rose surfaces that show hairlines and a few wispy abrasions. NGC ID# 26G9, PCGS# 9179

---

**1925-S Twenty Dollar, AU58  
Better S-Mint Issue**

- 7830 1925-S AU58 PCGS.** Vast quantities of the 3.77 million 1925-S twenties struck were melted during the 1930s, and the high mintage figure does not represent the true scarcity of this issue. A relatively low number have emerged from European bank vaults, which makes this date difficult to locate in Mint State. This briefly circulated example has lovely yellow-gold patina and boldly defined details. Flashy luster gives this piece excellent eye appeal. Ex: Long Beach Signature (Heritage, 9/2008), lot 4490. NGC ID# 26GC, PCGS# 9182

---

**1926-S Saint-Gaudens Twenty, MS63+  
Premium Quality for the Grade**

- 7831 1926-S MS63+ NGC.** Well-struck with a bold satiny sheen, this example boasts a high degree of visual appeal which is enhanced by light honey-gold and rose coloration. This issue is readily available at MS63 or MS64, but at the Gem grade level it immediately becomes rare at both grading services. Both sides of the coin are minimally marked, making it seem conservatively graded at the Select Mint State level. NGC ID# 26GF, PCGS# 9185

---

**1926-S Double Eagle, Sharp MS64  
Elusive Any Finer**

- 7832 1926-S MS64 NGC.** The peach-gold surfaces of this near-Gem display pleasing luster and possess sharply struck devices, including the panes in the Capitol building and the eagle's feathers. Occasional light marks are fewer and less severe than what might be expected for an MS64. Elusive any finer where the two services have graded only about 60 coins (11/14). NGC ID# 26GF, PCGS# 9185

- 
- 7833 1927 MS65 PCGS.** The second of three significant With Motto double eagle type issues, represented by a charming Gem with yellow-orange luster and an above-average strike. The fields are notably smooth. NGC ID# 26GG, PCGS# 9186

- 7834 1927 MS65 NGC.** The 1927 Saint-Gaudens twenty is reasonably available in high grade and a favorite choice of type collectors. This sharply detailed Gem offers well-preserved lustrous surfaces with few signs of contact. NGC ID# 26GG, PCGS# 9186

- 7835 1927 MS65 PCGS Secure.** This delightful Gem displays vibrant mint luster and well-detailed design elements, with unusually well-preserved yellow and orange-gold surfaces. Overall eye appeal is exceptional. NGC ID# 26GG, PCGS# 9186

- 7836 1927 MS66 PCGS.** Intensely lustrous and fully struck, this delightful Premium Gem offers fabulous eye appeal. The radiant yellow-gold and rose surfaces are minimally abraded. NGC ID# 26GG, PCGS# 9186

- 7837 1928 MS65 NGC.** The 1928 Saint-Gaudens double eagle is always in demand from type and date collectors alike. This delightful Gem exhibits sharply detailed design elements and well-preserved, lustrous orange-gold surfaces with outstanding eye appeal. NGC ID# 26GK, PCGS# 9189

**7838** 1928 MS65 NGC. CAC. A fully struck peach-gold Gem. Lustrous and beautiful with a clean reverse and only wispy grazes on the obverse field. A high mintage issue from the Roaring' Twenties, but quality examples are always in demand to represent the type. Housed in a prior generation holder. NGC ID# 26GK, PCGS# 9189

**1928 Double Eagle, MS67  
None Numerically Finer**

**7839** 1928 MS67 NGC. CAC. The highest mintage for any U.S. gold coin came in 1928, when more than 8.8 million double eagles were struck...right before the worst financial panic in the nation's history and a crushing depression that led directly to many of the same coins' recall and meltdown. This Superb Gem is among the numerically finest certified survivors, as there are none in MS68 or better in the combined NGC and PCGS populations (11/14). Apricot-gold surfaces are brightly lustrous with occasional hints of orange and wheat. Well-defined and pleasingly preserved. NGC ID# 26GK, PCGS# 9189

**TERRITORIAL GOLD**

**C. Bechtler Gold Dollar, XF40  
30 G., K-1, Rich Peripheral Toning**

**7840** (1831-34) C. Bechtler Dollar, 30G. XF40 PCGS. CAC. K-1, R.4. A charming representative with rich original toning. The centers are apricot and olive while the margins are deep sea-green. A pair of minor, subdued marks are noted above ONE. K-1 is a Third Series issue struck prior to the 1834 Federal devaluation of the dollar, relative to gold. Scarcer than the K-4 and K-24 Bechtler dollar varieties. Listed on page 380 of the 2015 *Guide Book*. PCGS# 10064

**August Bechtler Gold Dollar  
AU55, 27 G., 21 C., K-24**

**7841** (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge AU55 NGC. K-24, R.3. A lovely Choice AU Bechtler type coin. Specialists know that the typical example has various problems, but the present piece is free from the abrasions, laminations, and evidence of cleaning that affect most survivors. The legends exhibit bright luster, and marks are confined to a single line below the 2 in 21. This green-gold dollar is certain to command a hefty premium from bidders. Listed on page 382 of the 2015 *Guide Book*. PCGS# 10040

**7842** (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge — Scratches — NGC Details. Unc. A couple of delicate pinscratches on the upper border above CAROLINA are strictly assessed by NGC. Lightly hairlined beneath DOL. An early die state that shows repunching on the base of the 2 in 27 G. The reverse die is free from rust or cracks. Listed on page 382 of the 2015 *Guide Book*. PCGS# 10040

(1842-52) A. Bechtler Five Dollar, AU58  
Rare, Late Issue 134G. 21C., K-27  
Among the Finest Known

**7843** (1842-52) A. Bechtler Five Dollar, 134G. 21C. K-27, AU58 NGC. CAC. Reeded Edge, No Star in Center. Prooflike surface with vivid-orange luster remains among the lettering of this rare and desirable later issue by August Bechtler. With no way to economically transport local gold bullion to the Philadelphia Mint, Bechtler was allowed to strike private gold coinage for two decades. From 1831 to perhaps as late as the mid-1850s, Bechtler, his son, and later his grandson issued coinage that normally exceeded Federal standards and was readily accepted for local trade.

Establishment of the nearby Charlotte Mint in 1838 curtailed Bechtler's operations but did not end it. This attractive piece is one of the later issues, perhaps struck by Augustus Bechtler prior to his death in 1846, or possibly by his grandson Christopher Jr., who inherited the business and related jewelry trade. A green-gold example with orange accents, sharply struck and minimally abraded. CAC endorsed for quality and eye appeal. Census: 13 in 58 (1 in 58+), 2 finer (11/14). PCGS# 10046

1849 Moffat & Co. Five, K-4a, VF20  
Lightly Circulated, Original Example

**7844** 1849 Moffat & Co. Five Dollar, K-4a, R.4, VF20 NGC. Similar to K-4, but with a heavy die break joining E DO on the reverse. This is a pleasing, lightly circulated example of this early Moffat & Company five dollar piece, ideal for the budget-minded collector. Wear is even and both sides display original olive-gold coloration. Struck from mildly rotated dies. Listed on page 384 of the 2015 *Guide Book*. PCGS# 10240

1849 Moffat Five Dollar, AU58  
Scarce Kagin-4

**7845** 1849 Moffat & Co. Five Dollar AU58 NGC. K-4, R.5. No die break at the denomination, though clashed in the right reverse field. This yellow-orange piece is well struck overall with ample remaining luster. Though the Moffat & Co. gold pieces in general saw significant circulation, the present piece has experienced little wear. The luminous canary-gold surfaces exhibit minimal marks. A desirable example from the famous California pioneer gold coiner. Census: 18 in 58, 24 finer (12/14).

*Ex: Houston Signature (Heritage, 12/2008), lot 2667. PCGS# 10240*

1851 Humbert Fifty Dollar, XF Details  
Reeded Edge, 880 Thous., K-5

- 7846** 1851 Humbert Fifty Dollar, Reeded Edge, 880 Thous. — Obverse Scratched — NGC Details. XF. K-5, Low R.5. A moderately circulated example of the first collectible reeded edge Humbert fifty slug variety. As part of the slow progression of San Francisco gold from ingots to coins, K-5 shows the date on the obverse exergue, and the face value is included on the die. Prior Humbert varieties have stamped values and the date is relegated to the edge. The present K-5 example retains noticeable peach-tinged luster but is mostly toned honey-gold. The corners have a couple of minor dings, and a patch of hairlines is noted on the obverse near 5 o'clock. The obverse field displays numerous small abrasions but none that would merit a designation as scratched. Listed on page 381 of the 2014 *Guide Book*.

1851 Humbert Fifty Dollar, AU Details  
K-5, 880 Thous., Reeded Edge

- 7847** 1851 Humbert Fifty Dollar, Reeded Edge, 880 Thous., K-5, Low R.5 — Repaired, Cleaned — NGC Details. AU. No 50 on reverse. A rare reeded edge variety of the fifty dollar gold "slug" made by the U.S. Assay Office under Moffat & Co. Augustus Humbert was the appointed U.S. Assayer, with the inscription AUGUSTUS HUMBERT UNITED STATES ASSAYER OF GOLD CALIFORNIA seen around the perimeter, with the date 1851 at the bottom. The reverse displays larger concentric circles in the center than are seen on the earlier lettered edge varieties. The example here offered shows deep olive-gold patina, with strong detail. NGC notes evidence of light cleaning, with minor repair work observed in the peripheral recesses, but the appeal is nonetheless pleasing. Subtle remnants of luster are seen in the protected regions when rotated beneath a light.

**1851 Humbert Fifty Dollar  
K-6, 887 Thous., Reeded Edge**

- 7848 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous., K-6, R.4, PCGS Genuine.** This scarce variety is similar to K-7, but the concentric circles on the reverse are larger. K-6 is of a slightly greater fineness than K-5 (.887 versus .880), produced by the U.S. Assay Office under Moffat & Co., Augustus Humbert as assayer. Examples of these early Assay Office “slugs” are always in strong demand. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been lightly cleaned and repaired, with some of the details reengraved. Extensive repair work is evident in the obverse fields, and the central eagle is tooled. The reverse exhibits remaining luster, with just one small tick in the engine turn at 1 o'clock. Rich bronze-gold patina encompasses each side. PCGS# 10214

**1852 Humbert Ten Dollar, VF35  
K-10, Late Die State, 884 THOUS  
Ex: S.S. Central America**

- 7849 1852 Humbert Ten Dollar VF35 PCGS. K-10, Low R.4.** Ex: S.S. Central America. SSCA 7036. A surprising number of Territorial gold pieces were recovered along with the numerous gold bars and an astonishing number of double eagles — a recovery effort that continues to this day. Much in the way the perceived rarity of several twenty dollar gold dates has changed with the shipwreck treasure, so has the availability of several Territorial pieces. This ten dollar Humbert gold shows moderate wear and light, lemon-gold coloration typical of the recovered seawater coins. Pleasing detail and virtually no abrasions are visible. Most of the wear appears on the central devices, with the die crack beneath UNITED confirming the late die state. Housed in its original gold-label PCGS holder. Listed on page 386 of the 2015 *Guide Book*. PCGS# 10187

**1852 K-10 Humbert Ten, XF40  
Ex: Strong Museum**

- 7850 1852 Humbert Ten Dollar XF40 PCGS. K-10, Low R.4.** Ex: The Strong National Museum of Play. This pleasing green-gold Humbert ten has surprisingly few abrasions considering its service to the Gold Rush economy. A lens reveals only a thin diagonal obverse mark through the TE in STATES. High point wear is moderate and mostly confined to the fletchings, the eagle's leg, and the upper right portion of the shield. Listed on page 386 of the 2015 *Guide Book*. PCGS# 10187

**1852 K-10 Humbert Ten Dollar, XF40**  
**Attractive Provisional Mint Issue, 884 THOUS**

- 7851** 1852 Humbert Ten Dollar XF40 NGC. CAC. K-10, Low R.4. Issued with the Humbert nameplate dated 1852 without the overdate. This example of the early U.S. Assay Office issue reads AUGUSTUS HUMBERT. UNITED STATES ASSAYER OF GOLD. CALIFORNIA. 1852. and was struck to 884 THOUS fineness. The coin offers exceptional eye appeal for the grade, with orange-gold coloration and fewer marks than expected for a territorial gold piece of this grade. A single curving scrape on the reverse within the rectangular tablet is the sole significant mark. CAC-approved for quality. PCGS# 10187

**1852 Humbert Ten, Well-Preserved XF45**  
**K-10a 'IUNITED' Variety**

- 7852** 1852 Humbert Ten Dollar XF45 NGC. K-10a, Low R.4. A charming olive-gold example lacking noticeable abrasions, unlike most Humbert gold coins. Kagin's "IUNITED" variety, caused by a die crack through the base of UNITED. The advanced obverse die crumbling is mint-made and provides greater interest for the pioneer gold specialist. Struck from rotated dies. Listed on page 386 of the 2015 *Guide Book*. PCGS# 10187

**1852 K-10 Humbert Ten Dollar, AU53**  
**Sharply Detailed Original Example, 884 THOUS**

- 7853** 1852 Humbert Ten Dollar AU53 NGC. K-10, Low R.4. The N in UNITED is positioned over the O in OF, and the Y in ASSAYER is centered over the NI of CALIFORNIA to confirm this piece as the Kagin-10 variety, one of three variants available to collectors from the non-overdated 1852 Humbert tens. A diagnostic die crack at the bottom of UNITED distorts the lettering and signifies a late state of the dies. The originality of the patina and the sharpness of strike on the eagle and shield are especially noteworthy. Attractive orange luster enlivens the greenish-gold surfaces, which display a few small marks but nothing unexpected for the About Uncirculated grade. PCGS# 10187

**1852/1 Humbert Ten Dollar, VF Details**  
**K-8, Scarce Pioneer Variety**

- 7854** 1852/1 Humbert Ten Dollar — Harshly Cleaned — NGC Details. VF. K-8, R.4. A wheat-gold example with clear legends and partial plumage detail. Both sides appear cloudy from horizontal hairlines. The usual die state with a nearly bisecting crack on the reverse between 12 and 5 o'clock. The dies were apparently prepared in 1851 in anticipation of Federal permission to strike denominations other than 50 dollars, which did not arrive until the following year. Listed on page 386 of the 2015 *Guide Book*.

**1852 Assay Office Ten Dollar, MS61**  
**K-12a, Well-Struck**

- 7855** 1852 Assay Office Ten Dollar MS61 NGC. K-12a, R.4. A well struck and satiny olive-gold representative. Free from noticeable marks aside from a small obverse rim bump at 9 o'clock. A single small drop of translucent residue rests between the NI in UNITED. The Kagin standard reference refers to strong and faint bead variations, respectively early and later die states of K-12a. The present example has faint beads on the reverse border. K-12a is distinguished from the rare K-12 by differences in the layout of the reverse legend. Listed on page 386 of the 2015 *Guide Book*. PCGS# 10001

1853 Assay Office Twenty, 900 Thous., XF45  
K-18, Eye-Appealing and Relatively Unmarked

- 7856** 1853 Assay Office Twenty Dollar, 900 Thous. XF45 NGC. K-18, R.2. These pieces even today are not rare, but much of the large production, using 900- over 880-fineness obverse dies, were likely melted in the next few years after their production, given that the San Francisco Mint opened in 1854. This piece shows good eye appeal and color — the orange-gold surfaces are relatively unabraded — and the second 8 under the 0 is boldly visible in the fineness. Listed on page 388 of the 2015 *Guide Book*. PCGS# 10013

---

1853 Assay Office Twenty, AU Details  
K-18, Partial Mint Luster

- 7857** 1853 Assay Office Twenty Dollar, 900 Thous. — Rim Damage — NGC Details. AU. K-18, R.2. The obverse rim has a moderate ding at 8 o'clock and a dig at 1 o'clock. Otherwise, the green-gold surfaces are devoid of mentionable marks. The reverse is particularly attractive and displays substantial apricot-tinged luster. A rim die break near the U in UNITED may be of interest to the specialist. Listed on page 388 of the 2015 *Guide Book*. PCGS# 10013

---

1853 Assay Office Twenty, AU55  
900 Thous., K-18

- 7858** 1853 Assay Office Twenty Dollar, 900 Thous. AU55 NGC. K-18, R.2. A butter-gold example that displays iridescent luster across the legends and devices. The obverse field exhibits distributed small marks, but none merit singular mention. A late product of the U.S. Assay Office, the design was fully hubbed. Nonetheless, minor varieties exist. For example, the present coin has a clash mark between the ES in STATES. The lower half of the 9 in 900 is filled, and the first 0 shows repunching north, likely from an 8 underdigit. Listed on page 388 of the 2015 *Guide Book*. PCGS# 10013

---

1853 Assay Office Twenty, AU55  
900 Thous., Kagin-18 Variety

- 7859** 1853 Assay Office Twenty Dollar, 900 Thous. K-18, R.2, AU55 PCGS. CAC. The early California private minter Moffat & Company had fully morphed into the U.S. Assay Office of Gold in 1852, or at least so it seemed, although ongoing disputes with the Treasury Department made the relationship a tenuous one. Although new equipment received by the Assay Office provided the capacity to mint 36,000 twenty dollar gold pieces per day, shortages of parting acids made conforming to the legal .900 THOUS fineness mandate difficult.

Coin shortages were so severe that in the middle of 1853 Augustus Humbert prepared to strike 880 THOUS gold eagles and double eagles in defiance of the law. Before many were issued, supplies arrived and most of the illegal coins were recoined at the correct fineness, and the dies modified to 900 THOUS. The current example shows the overdigits 9 and 0 replacing the two underdigit 8s. This Choice About Uncirculated piece displays apricot-gold color with orange accents. The surfaces are smooth and unmarked except for three tiny "test cuts" at the rim — one on the obverse, the others on the reverse. Ample luster remains. PCGS# 10013

---

**1853 Assay Office Twenty, Orange-Gold MS62  
Attractive Example of the K-18 Variety**

- 7860 1853 Assay Office Twenty Dollar, 900 Thous. MS62 NGC. K-18, R.2.** Although the 1853 Assay Office twenty dollar pieces were issued by a provisional Mint of the United States and bore the legend UNITED STATES ASSAY OFFICE OF GOLD on the reverse, they could not compete, once the San Francisco Mint opened in 1854, with federal-style gold reading simply UNITED STATES OF AMERICA. Most were, accordingly, melted and restruck in short order. This piece displays mellow orange-gold coloration on lustrous surfaces, a particularly attractive example of this issue, one that is nonetheless relatively available for a so-called "Territorial" issue. A few light abrasions on each side determine the grade but do not detract from the appeal. Listed on page 388 of the 2015 *Guide Book*. PCGS# 10013

**1852 Wass Molitor Ten Dollar, XF45  
Large Head, Wide Date, K-4**

- 7861 1852 Wass Molitor Ten Dollar, Large Head, Wide Date XF45 PCGS. CAC. K-4, R.5.** Wide Uneven Date, Short Neck, Pointed Bust. The obverse was cut deeply for this issue and appears almost "dished" in appearance, exposing the reverse to inordinate wear and strike weakness. Multiple diagnostic die cracks appear in relation to the obverse stars as well as throughout the motifs on both sides. Wass, Molitor & Co. joined Moffat & Co. in issuing lower-denomination gold coins (five and ten-dollar gold pieces by Wass, Molitor and ten-dollar pieces by Moffat & Co.) in 1852 to fill a critical need for circulating coinage while the U.S. Assay Office was restricted by the federal government from issuing these denominations. This Choice XF example of the Wass, Molitor issue is attractive and well-made for the rudimentary conditions and dies. The CAC approval is for eye appeal and quality. Population: 28 in 45, 27 finer (11/14). PCGS# 10348

---

1861 Clark, Gruber Two and a Half  
VF25, Kagin-5

- 7862** 1861 Clark, Gruber & Co. Quarter Eagle VF25 ANACS. K-5, R.4. A problem-free and collectible tan-brown representative of the short-lived Clark, Gruber & Co. private pioneer mint. The types resemble the Federal quarter eagle, but PIKES PEAK replaces LIBERTY on the coronet, and the reverse legend states the maker instead as CLARK GRUBER & CO DENVER. Softly impressed at the centers, but peripheral details are clear, and the original surfaces lack consequential marks. Listed on page 399 of the 2015 *Guide Book*. PCGS# 10139

---

1861 Clark, Gruber Two and a Half  
Borderline Uncirculated, K-5a

- 7863** 1861 Clark, Gruber & Co. Quarter Eagle AU58 NGC. K-5a, R.4. Like its 1860 predecessor, the Denver, Colorado 1861 Clark, Gruber two and a half imitates its Federal counterpart. This well defined example is primarily wheat-gold despite a blush of olive-gray along the reverse margin. Smooth aside from a cluster of thin marks on the upper right reverse field. K-5 and K-5a are likely different die states of the same marriage. K-5a shows light repunching on star 7, while K-5 does not. Listed on page 399 of the 2015 *Guide Book*. PCGS# 10139

---

1861 Clark, Gruber Two and a Half  
Copper Die Trial, K-9a, MS62
